The third king of the twenty-fifth (Ethiopian) dynasty, Taharḳo (see Tirhaḳah), had a share in rebellions of the vassals of Assyria, especially in the rebellion of Tyre, which led to two expeditions of Esarhaddon against Egypt. It was conquered in the second campaign and divided among twenty princes, descendants of Libyan generals. Taharḳo and his successor Tandamani repeatedly disputed without success the possession of Egypt by the Assyrians (comp. Nahum iii.); about 660 B.C. Psam(m)ethik I. (son of Necho I.), a descendant of the 24th dynasty, nominal reign 664–610, made himself independent of Assurbanipal's sovereignty.

Saïtic Dynasty.

The new Saïtic dynasty (the 26th) brought the first centralized government after several centuries, and new prosperity, which was demonstrated by a remarkable archaizing revival of art. The enterprising Necho (Nekau) II. (610–594) undertook the conquest of Syria, which, however, was frustrated by his defeat at Carchemish by Nebuchadrezzar. He built a fleet, dug the first connection between the Nile and the Red Sea, and sent Phenician sailors around Africa. After Psam(m)ethik II. (594–588), Apries or Uaphris (Pharaoh-hophrah, 588–569), seeking to check the Babylonians who menaced Egypt, instigated and aided the Jews (Jer. xxxvii. 5; comp. Ezek. xxix. 6) and Tyrians and received their fugitives (Jer. xli. 17). This policy seems to have been continued by his successor, the clever usurper Amasis (Aʿḥmose II., 564–526), who still warded off the destruction threatened in Jer. xlvi. 26.

But when the Babylonian empire had been superseded by the Persian, Psam(m)ethik III. could not maintain himself any longer. In 525 Egypt was conquered by Cambyses, and remained a Persian province notwithstanding various rebellions, led by the half-Libyan soldiers, in 487, 460, and most successfully in 414. The period of independence (414–350?) was filled by internal struggles and by wars of defense against the Persians. The Macedonian conquest brought Egypt independence under the dynasty of the Ptolemies. But Egyptian culture was sinking fast; the native population (which rebelled repeatedly against the foreign rulers, led again by the old soldier class of Libyan descent) was reduced to the position of heavily taxed pariahs; and the kings in Alexandria considered their empire as a part of the Greek world. The annexation by Rome (31 B.C.) aggravated this decline of an old civilization, though temples were repaired or built by the Roman government and decorated with very poor hieroglyphics till about 300 C.E. The condition prophesied, that Egypt should be without native rulers, can, however, be traced back, as an actuality, as far as the tenth century B.C. (see above).

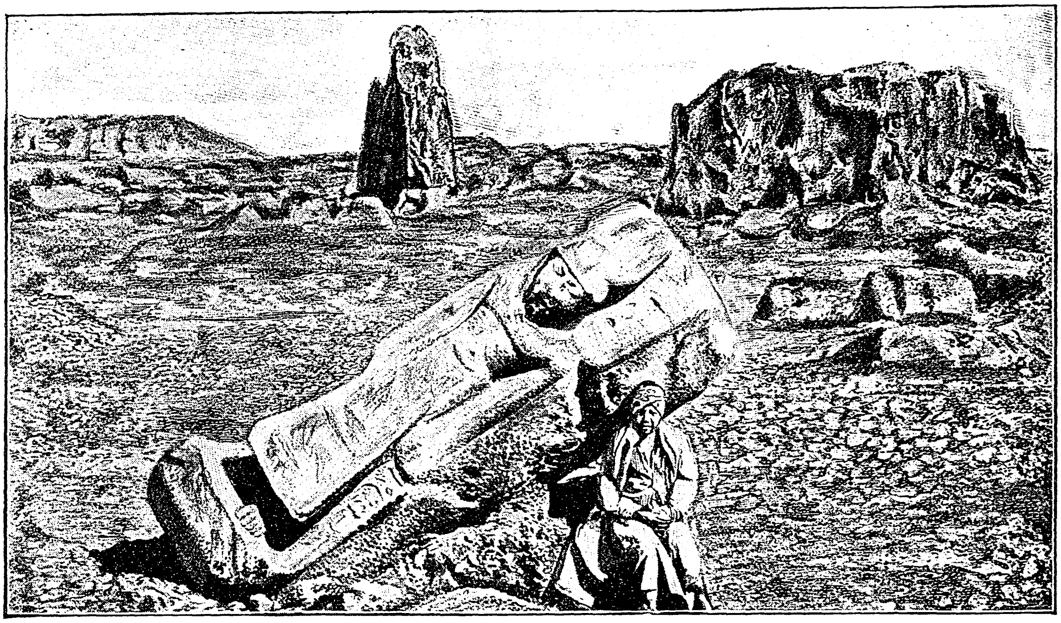
For the political history of the Ptolemies down to Ptolemy XVI. and the famous queen Cleopatra VII., see Ptolemy. The great development of African commerce by Ptolemy II. and the building of the Jewish temple at Leontopolis under Ptolemy VI. may be mentioned. Palestine was an Egyptian province until 198 B.C., when Antiochus III. the Great conquered it. The attempt of Ptolemy VI. Philometor to regain it (I Macc. xi. 1) was ended by his death in 145 B.C.

The Biblical name (land of) "Mizraim," or (in more poetic style) "Maẓor," is Semitic ("Miṣri" is the earliest Babylonian form) and may have some connection with that of the neighboring Muṣri (see above). The Biblical (dual?) form was usually understood as an allusion to the prehistoric division of Egypt, but, although the Hebrew (and Assyrian) has a special name for Upper Egypt, "Pathros" (Isa. xi. 1; Jer. xliv. 1; Ezek. xxix. 14, xxx. 14), the ending "ayim" is now considered as a locative by scholars. The common Egyptian designation was "Keme[t]" = "black," *i.e.*, "fertile land." The classical name "Ægyptos" seems to be connected with the old name of Memphis, "(Ḥ)a(t)-ka-ptaḥ." The Bible calls Egypt also "land of Ham" (Ps. cv. 23, 27; comp. Ps. lxxviii. 51, cvi. 22), or contemptuously "Rahab," *i.e.*, "boasting monster." The fertility of the country is mentioned in Gen. xiii. 10; Ex. xvi. 3; and Num. xi. 5 (see Deut. xi. 10 on the necessity of laborious irrigation). That the country depends on the Nile (the abundance and overflowing of which are proverbial; see Nile) is indicated by the Prophets, who threaten Egypt often with its drying up (*e.g.*, Isa. xix. 5; comp. also the kine of Pharaoh's dream rising from the river [Gen. xl.]). On other disadvantages of the country see Plagues.

The monuments furnish several examples of permission given to large numbers of fugitive or starving Semites to settle in the land, as Gen. xlviii. describes. Traders had always free access, as Gen. xxxvii. 25 and xlii. 2 imply. Hence after 1700 B.C. Egypt had constantly a large Semitic element of population, especially along the eastern frontier of the Delta (comp. Isa. xix. 18 on five cities speaking the language of Canaan). The Egyptian cities mentioned in the Bible all belong to this part of the country. No (Thebes) and Syene show, however, that the land south of Memphis also was well known in Palestine. More Jews and Samaritans immigrated in the Ptolemaic time, settling especially around Alexandria. The heavy taxation of the Egyptian peasants and their serfdom, from which only the priests were exempted, are mentioned in Gen. xlvii. 20-26; the hard socage of the Israelites in Egypt was the usual one of royal serfs, into the condition of whom the colonists of Goshen had to enter. The most important industry, the weaving of various kinds of linen (of which "buẓ" [byssus] and "shesh" kept their Egyptian names with the Hebrews), is alluded to in Isa. xix. 9; Ezek. xxvii. 7; and Prov. vii. 16. Of Egyptian customs, the shaving of the beard and (sometimes) of the head (which, however, the better classes, except the priests, covered again by a wig), circumcision, the laws of clean and unclean (almost as complicated as those of Israel and often quite analogous), the custom of embalming the dead by a long process (mummification), and the long mourning are alluded to in Gen. xli. 14; Joshua v. 9 (?); Gen. xliii. 32, xlvi. 36, l. 2-3, respectively. Otherwise the customs did not differ very much from those of the Syrian peasants (beer largely replaced wine, as castor-oil, etc., did the olive-oil, and linen the woolen clothing of Syria). Flax and spelt (the modern "durrah") were especially characteristic products of the fields (Ex. ix. 31-32, R. V.).

Biblical References.

In morals, the marriage of brothers and sisters as a regular institution was the principal difference. Women had greater liberty even than in Babylonia (comp. Gen. xxxix.). The Egyptians were very industrious (as their gigantic constructions attest), but neither enterprising (hence they never made good sailors or traders) nor warlike. From the earliest period they preferred to employ foreign mercenaries (comp. Jer. xlvi. 9; Ezek. xxvii. 10). Hence Egypt was a conquering power only on a rather limited scale (comp. on its military weakness II Kings xviii. 21; Isa. xxxvi. 6). The country exercised a strong influence in the development of Eastern culture chiefly by its remarkable art and industries, less by science because of the national writing, the hieroglyphs, which could not be adapted to other languages (what the Greeks called hieratic writing was merely the cursive form; the demotic was a kind of stenography, developed from that cursive after 700 B.C.).



Tell al-Yahudiyyah (The Mound of the Jews), Egypt.

(From "Memoirs of Egypt Exploration Fund.")

Of the enormous number of local divinities (usually arranged in triads—father, mother, and child—as in Babylonia) the Bible mentions only the god of Thebes, since the 18th dynasty the official deity of Egypt (see AMON); for the sun-god (with whom later religion tried to identify almost all ancient local gods) see BETH-SHEMESH. For the reputation of Egyptian learning see an allusion in I Kings iv. 30; for magic, Isa. xix. 3; Ex. vii. 11. The magic literature is, indeed, endless. Modern scholars consider Babylonia as generally more advanced in science (except, perhaps, medicine, which was an Egyptian specialty). Contrary to a popular erroneous view on the character of the Egyptians as gloomy, they were extremely superstitious, but less serious than any branch of the Semites, as a very remarkable entertaining literature and their non-official art demonstrate. Their massive architecture forms no contradiction, being relieved by polychromy.

——**In Medieval and Modern Times:*** The history of the Jews in Egypt during the Greek and Ptolemaic periods centers almost completely in the city of ALEXANDRIA (see JEW. ENCYC. i. 361 *et seq.*). As early as the third century B.C. there was a widespread Jewish diaspora in Egypt. In addition to those in Alexandria a colony of Jews existed during the Ptolemaic period at Athribis in Lower Egypt, on the Damietta arm of the Nile (*ib.* ii. 273). An inscription in which the Jews dedicate a synagogue to Ptolemy and Berenice has recently been found near the canal which connected Alexandria with the Canopic mouth of the Delta (T. Reinach, in R. E. J. xlv. 161; Mahaffy, "Hist. of Egypt," p. 192). Farther to the south, on the west bank of the Nile, was Fayum, identified by Saadia (to Ex. i. 11) with Pithom. A papyrus of the year 238-237 B.C. mentions a certain Ionathas of this city (Mahaffy, "The Flinders Petrie Papyri," part ii., pp. 15, 23). Another papyrus of the same date records that the Jews and Greeks in a place called "Psenyris" had to pay a special tax for the slaves in their possession (compare *idem*, "Hist. of Egypt," p. 93; T. L. Z. 1896, 2, p. 35); and in a third papyrus a place called "Samareia" in the Fayum is mentioned, together with a number of names, among which is that of a certain Sabbathion, a Jewess according to Schürer (*ib.* 20, p. 522) and Reinach (R. E. J. xxxvii. 520). Another papyrus of the third century B.C. (Grenfell, "The Oxyrhynchus Papyri," i. 74) mentions a Jew named "Danooul." For the Roman period there is evidence that at Oxyrynchus (Behneseh), on the east side of the Nile, there was a Jewish community of some importance. It even had a Jews' street (R. E. J. xxxvii. 221). Many of the Jews there must have become Christians, though they retained their Biblical names (*e.g.*, "David" and "Elisabeth," occurring in a litigation concerning an inheritance). There is even found a certain Jacob, son of Achilles (*c.* 300 C.E.), as beadle of an Egyptian temple. A papyrus of the sixth or seventh century C.E. contains a receipt given to Gerontius, quartermaster of the general Theodosius, by Aurelius Abraham, son of Levi, and Aurelius Amun, son of David, hay-merchants. To the same century belongs a papyrus detailing an exchange of vinegar for must between Apollos of the Arab village in the Arsinoe nome (*i.e.*, Fayum) and the Hebrew Abraham, son of Theodotus (see also Wesseiy in "Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften in Wien," 1902, pp. 12 *et seq.* For a Hebrew inscription at Antinoë, in Middle Egypt, see JEW. ENCYC. i. 630, *s.v.* ANTINOË).

From the Arab Conquest.

Knowledge of the history of the Jews in Egypt from the time of the Arab invasion is still very fragmentary. There are a few scattered notices in the Hebrew chronicles and travels of later periods; but the best information comes from the fragments found in the Cairo genizah and in part published by Neubauer, Schechter, Hirschfeld, Margoliouth, Kaufmann, and others. To these may be added occasional references in Arabic works on Egyptian history and topography. No attempt has yet been made to put this material together.

Cairo.

During this period, Egypt was known to the Jews by its old name מצרים; for which, at times, was substituted מלכות נף (Ezek. xxx. 13) or מלכות סוינים (Ezek. xxix. 10; see Ahimaaz Chronicle, 128, 7). It was also known as "the Diaspora" (גולה, Al-Ḥarizi, § 46; M. xli. 214, 424; J. Q. R. xv. 86, 88; גליות *ib.* 88). In the Ahimaaz Chronicle בבולוניא is perhaps used once (126, 2; see Z. D. M. G. li. 437). This last is derived from בבל, a name given to Fostat (M. V. p. 181; J. Q. R. ix. 669; synonymously, שנער, *ib.* xv. 87), which was known to Strabo and other Greek writers as well as to the Arabs, who, for the sake of distinction, often called it "Babylon of Egypt" (Pauly-Wissowa, "Real-Encyc." i. 2699; Z. D. M. G. li. 438; L.-P. p. 3). The name "Babli-on" (Heliopolis) was popularly connected with Babylon (Lane-Poole, "Cairo," p. 214). Cairo itself (Miṣr al-Ḳahirah, "the victorious") is called מצר, or, as in Arabic, מצר אלקאהרא (S. 118, 7); it was a new city, founded by the vizier Jauhar in 969 for the Fatimites. The older city was farther to the southwest. It was called "Al-Fosṭaṭ" (the camp), and was founded by 'Amr ibn al-'Aṣi in 641 (B. p. 341). It remained the official capital for three centuries, and the commercial capital up to the time of the crusading King Amalric (1168), when it was burned. Its Hebrew name was פסטאט, פסטאט מצרים (Z. D. M. G. li. 451; Kaufmann Gedenkbuch, p. 236), פסטאט מצר (S. 118, 5); or "the older M.," מצרים

---

* For the titles of works cited under abbreviations, see Bibliography at the end of the article.

הישנה (G. p. 34), מצרים העתיקה (or מצר אלעתיקה, S. 136, 29). Synonymously, Fostat was called שפריר נילוס or שפריר מצרים, in accordance with the translation of שפריר (Jer. xliii. 10); by the Karaites יפיפיה מצרים (L. notes, p. 61; compare Jer. xlvi. 20). Another name for Fostat was צען (Zoan), or צען מצרים (Al-Ḥarizi, "Taḥkemoni," § 46; S. 118, 5), and for the inhabitants בנות צען (J. Q. R. xiv. 477; compare בנות ציון. Curiously enough, Benjamin of Tudela uses the name "Zoan" for a stronghold between Cairo and the Muḳaṭṭam Hills.

Alexandria was identified with the Biblical נא אמון (Nahum iii. 8) and so called by Ibn Safir ("Eben Sappir," i. 2a), though the Greek name was also used, אלכסנדריא של מצרים (Conforte, "Ḳore ha-Dorot," p. 5a); and, following the Arabic, the gentile adjective אסכנדרי or סכנדרי (see Neubauer, "Cat. Bodl. Hebr. MSS." No. 146). The region of the east arm of the Nile was called by its Arabic name דמיאט, *i.e.*, Damietta; or, symbolically, אי כפתור, ("Abiathar Megillah" and Benjamin of Tudela; see J. Q. R. xv. 89). In the letter of Al-Afḍal's ex-minister of finance (see below) occurs the form אִישְׁטִימְיַאתִי = εἰς το טמיאתי, Tamiathis, *i.e.*, Damietta Z. D. M. G. li. 447). The Fayum was generally identified with the Biblical "Pithom" (פיתום) and so called (Dunash b. Tamim; compare Grätz, "Gesch." Hebr. transl., iii. 465). The gentile form was הפיתומי (M. J. C. i. 40); or, according to the Arabic, אלפיומי (*e.g.*, Saadia and Nathanael).

Saadia was naturally well acquainted with Egyptian topography. In his translation of Gen. x. 13, 14 he has the following identifications:

לודים = inhabitants of Tanis.
ענמים = " " Alexandria.
להבים = " " Behneseh.
נפתחים = " " Farama (Yaḳut, iii. 882).
פתרסים = " " Biyama (*idem*, i. 899).
כסלחים = " " Sa'id.
כפתרים = " " Damietta.

Jerome was in Egypt in the year 400; he mentions five cities there "which still speak the Canaanitish [*i.e.*, the Syriac] language." This perhaps refers to Aramaic—not to Coptic, as Krauss believes—and may very well have been due to the large colonies of Jews in the land (J. Q. R. vi. 247). The part taken by the Jews in the Arab invasion of Egypt is not clear. In addition to the Jews settled there from early times, some must have come from the Arabian peninsula. The letter sent by Mohammed to the Jewish Banu Janba in Maḳna near Aila (Wellhausen, "Skizzen," iv. 119) in the year 630 is said by Al-Baladhuri to have been seen in Egypt; and a copy, written in Hebrew characters, has been found in the Cairo genizah (J. Q. R. xv. 173). Hebrew papyri are found in the Theodore Graf collection covering the period 487-909. The Jews had no reason to feel kindly toward the former masters of Egypt. In 629 the emperor Heraclius I. had driven the Jews from Jerusalem (Bury, "Later Roman Empire," ii. 215). According to Al-Maḳrizi, substantiated by Eutychius, this was followed by a massacre of Jews throughout the empire—in Egypt, aided by the Copts, who had old scores against the Jews to wipe out, dating from the Persian conquest of Alexandria at the time of Emperor Anastasius I. (502) and of the Persian general Shahin (617), when the Jews assisted the conquerors against the Christians (B. pp. 82, 134, 176). The treaty of Alexandria (Nov. 8, 641), which sealed the Arab conquest of Egypt, expressly stipulates that the Jews are to be allowed to remain in that city (B. p. 320); and at the time of the capture of that city, Amr, in his letter to the calif, relates that he found there 40,000 Jews.

The Jews and the Arabs.

Of the fortunes of the Jews in Egypt under the Ommiad and Abbassid califs (641–868), the Tulunids (863–905), and the Ikhshidids, next to nothing is known. One important name has come down from that time, viz., Mashallah (770–820), the astrologer, called "Al-Miṣri" or "Al-Alaksandri" (B. A. § 18). The Fatimite 'Ubaid Allah al-Mahdi, who founded the new Shiitic dynasty in 909, is said to have been the son of a Jewess, or to have been a Jew adroitly exchanged for the real heir. This is probably nothing more than an invention of the Sunnites tending to discredit the Alid descent of the new house (Weil, "Geschichte der Califen," ii. 600; Becker, "Beiträge zur Geschichte Aegyptens," p. 4). During the earlier period of this dynasty lived the gaon Saadia (892–942), whose teacher in Egypt was a certain Abu Kathir mentioned by Al-Mas'udi (Grätz, "Gesch." v. 282).

The Fatimite rule was in general a favorable one for the Jews, except the latter portion of Al-Ḥakim's reign. This is directly confirmed by the laudatory terms in which the dynasty is spoken of by the author of the "Abiathar Megillah" (discovered by Schechter, J. Q. R. xv. 73). From this time on Jews are found prominent in the service of the califs. Isaac b. Solomon Israeli, the physician (d. 953), was recalled to Egypt from Kairwan and entered the service of 'Ubaid Allah; he was still in the royal service at the death of Al-Manṣur (952). Al-Mu'izz (952–975) had several Jews in his service. The Bagdad apostate Ya'ḳub ibn Killis, who had been the right-hand man of the Ikhshidid Kafur (966), was driven by the intrigues of the vizier Ibn al-Furat to enter the service of Al-Mu'izz. He was probably with Jauhar when the latter led the calif's forces into Egypt, and he became vizier under the calif 'Aziz. This Jauhar, who for some time was practically ruler over Egypt and Syria, has been identified by De Goeje with Paltiel, of whom the Ahimaaz Chronicle speaks with much enthusiasm (Z. D. M. G. lii. 75). Jauhar is known to have been brought from South Italy; but the identification is still very uncertain. The first fifteen years of Al-'Aziz's reign were dominated by Ibn Killis, whom Kaufmann has endeavored to identify with Paltiel; these were years of plenty and quiet. A Jew, Manasseh, was chief secretary in Syria (J. Q. R. xiii. 100; B. A. § 60; L.-P. p. 120). Moses b. Eleazar, his sons Isaac and Ishmael, and his grandson Jacob, were in the service of this calif (B. A. § 55).

Rule of the Fatimite Califs.

The foundation of Talmudic schools in Egypt is usually placed at this period, and is connected with the story of the four captive rabbis who were sold into various parts of the Diaspora. Shemariah b.

Elhanan is said to have been taken by the Arab admiral Ibn Rumaḥis (or Damahin) to Alexandria and then sent to Cairo, where he was redeemed in the tenth century (Ibn Da'ud, ed. Neubauer, M. J. C. i. 68). A letter from him is published by Schechter (J. Q. R. vi. 222, 596), and one from Ḥushiel to him (*ib.* xi. 644). That he was settled in Fostat is proved by a legal document, dated 1002, in his own handwriting. His cosignatories are Paltiel b. Ephraim, Solomon b. David, Aaron b. Moses, and Jalib b. Wahb. He is here termed "rosh" (ha-yeshibah; J. Q. R. xi. 648; "Teshubot he-Geonim," ed. Harkavy, p. 147). Early responsa sent to Egypt are made mention of (*ib.* pp. 20, 142, 146), and one by Samuel b. Ḥofni (?) to Shemariah is likewise mentioned (J. Q. R. xiv. 491).

The Pranks of the Mad Calif.

That the mad calif Al-Ḥakim (996–1020) during the first ten years of his reign allowed both Jews and Christians to remain in the somewhat exceptional position which they had obtained under the toleration of Al-'Aziz is proved by the fragment of a versified megillah, in which the calif הרן באומר אל (Al-Ḥakim bi-Amr Allah) is lauded as "the best of rulers, the founder of hospitals, just and equitable" (J. Q. R. ix. 25; Z. D. M. G. li. 442). But the Jews finally suffered from the calif's freaks. He vigorously applied the laws of Omar, and compelled the Jews to wear bells and to carry in public the wooden image of a calf. A street in the city, Al-Jaudariyyah, was inhabited by Jews. Al-Ḥakim, hearing that they were accustomed to mock him in verses, had the whole quarter burned down; and, says Al-Maḳrizi, "up to this day no Jews are allowed to dwell there" ("Al-Khiṭaṭ," ii. 5). According to Al-Ḳalkashandi ("Ṣubḥ al-A'sha," transl. Wüstenfeld, p. 73) the Jews then moved into the street Al-Zuwailah. Both of these streets were in the northwestern part of the city, not far from the Darb al-Yahud of to-day.

During the reign of Al-Mustanṣir Ma'add (1035–1094) the real power was wielded by his mother, a black Sudanese slave, who had been sold to Al-Ẓahir by Sahl, a Jew of Tustar. This Sahl had two sons, Abu Sa'id, a dealer in antiquities, and Abu Naṣr Harun, a banker. Through the intrigues of Abu Sa'id the vizier Ibn al-Anbari was deposed and his place taken by an apostate Jew, Abu Manṣur Ṣadaḳah ibn Yusuf. After nine months Ṣadaḳah, fearing the power of Abu Sa'id, had him put to death (Wüstenfeld, "Fatimiden," p. 230). To the eleventh century belongs the papyrus letter sent (1046) from Egypt to the Palestinian gaon Solomon b. Judah ("Mittheilungen aus der Sammlung der Papyrus Erzherzog Rainer," 1892, p. 127). It seems that an Egyptian community had been rent asunder by the presence in the synagogue of Solomon Sabik, a ḥazzan who had been excommunicated by the bet din of Ramleh for witchcraft. Sabik's letter of recommendation from the Palestinian gaon was considered a forgery; and a new letter from the gaon was demanded (R. E. J. xxv. 272; J. Q. R. xv. 82). A papyrus deed of gift, dated 1089, names Abraham b. Shemaiah as head of the rabbinate at Fostat, his colleagues being Samuel the Spaniard and Ḥalfon b. Shabib, the ḥazzan ("Führer durch die Sammlung der Papyrus Erzherzog Rainer," p. 266). At this time there lived also Ephraim ibn al-Zafan (Za'faran; died 1068), a noted court physician, from whom Al-Afḍal once bought a library of 10,000 volumes, and who, when he died, left more than 20,000 books (B. A. § 142).

Jewish Ministers.

At the beginning of the twelfth century a Jew, Abu al-Munajja ibn Sha'yah, was at the head of the Department of Agriculture. He is especially known as the constructor of a Nile sluice (1112), which was called after him "Baḥr Abi al-Munajja" (Ibn Duḳmaḳ, "Description de l'Egypte," ii. 46, Cairo, 1893; Al-Maḳrizi, *l.c.* i. 72, 477; Ibn Iyyas, "Bada'i al-Zuhur," ii. 109, 182; Al-Kutubi, "Fawat," i. 89; Al-Ḳalkashandi, *l.c.* p. 27). He fell into disfavor because of the heavy expenses connected with the work, and was incarcerated in Alexandria, but was soon able to free himself (J. Q. R. xv. 73). A document concerning a transaction of his with a banker has been preserved (J. Q. R. xv. 168). Under the vizier Al-Malik al-Afḍal (1137) there was a Jewish master of finances, whose name, however, is unknown. His enemies succeeded in procuring his downfall, and he lost all his property. He was succeeded by a brother of the Christian patriarch, who tried to drive the Jews out of the kingdom. Four leading Jews worked and conspired against the Christian, with what result is not known. There has been preserved a letter from this ex-minister to the Jews of Constantinople, begging for aid in a remarkably intricate poetical style (J. Q. R. ix. 29, x. 430; Z. D. M. G. li. 444). One of the physicians of the calif Al-Ḥafiẓ (1131–49) was a Jew, Abu Manṣur (Wüstenfeld, p. 306). Abu al-Faḍa'il ibn al-Nakid (died 1189) was a celebrated oculist (B. A. § 151).

In this century a little more light is thrown upon the communities in Egypt through the reports of certain Jewish scholars and travelers who visited the country. Judah ha-Levi was in Alexandria in 1141, and dedicated some beautiful verses to his friend Aaron Ben-Zion ibn Alamani and his five sons of that city. At Damietta Ha-Levi met his friend, the Spaniard Abu Sa'id ibn Ḥalfon ha-Levi. About 1160 Benjamin of Tudela was in Egypt; he gives a general account of the Jewish communities which he found there. At Cairo there were 2,000 Jews; at Alexandria 3,000, with a R. Phineas b. Meshullam, who had come from France, at their head; in the Fayum there were 20 families; at Damietta 200; at Bilbais, east of the Nile, 300 persons; and at Damira 700. At Maḥallah (Yaḳut, iv. 428), now Maḥallat al-Kabir, half-way on the railroad line between Alexandria and Damietta, Benjamin found 500. Sambari (119, 10) mentions a synagogue here (אלמחלה), with a scroll of the Law (seen as late as 1896 by S. Schechter) in a metal case, which was used only on Rosh Ḥodesh, and which was supposed to entail the death of any one who swore falsely after having touched it. Benjamin also found 200 Jews at Sefitah and 200 at Al-Butij, on the east bank of the Nile. Sambari (156, 16) speaks of Jews also at Reshid (Rosetta), where Samuel b. David saw two synagogues (G. p. 4).

The rigid orthodoxy of Saladin (1169–93) does not seem to have affected the Jews in his kingdom. A Karaite doctor, Abu al-Bayyan al-Mudawwar (d. 1184), who had been physician to the last Fatimite, treated Saladin also (B.A. § 153); while Abu al-Ma'ali, brother-in-law of Maimonides, was likewise in his service (*ib.* § 155). In 1166 Maimonides went to Egypt and settled in Fostat, where he gained much renown as a physician, practising in the family of Saladin and in that of his vizier Ḳadi al-Faḍil al-Baisami. The title "Ra'is al-Umma" or "al-Millah" (Head of the Nation, or of the Faith), was bestowed upon him. In Fostat, he wrote his "Mishneh Torah" (1180) and the "Moreh Nebukim," both of which evoked opposition even from the Mohammedans, who commented upon them (J.Q. R. vi. 218). From this place he sent many letters and responsa; *e.g.*, to Jacob, son of Nathaniel al-Fayyumi, on the pseudo-Messiah in South Arabia, and to R. Ḥasdai ha-Levi, the Spaniard, in Alexandria ("Teshubot ha-Rambam," p. 23a). In 1173 he forwarded a request to the North-African communities to aid in releasing a number of captives. The original of the last document has been preserved (M. xliv. 8). He caused the Karaites to be removed from the court (J. Q. R. xiii. 104). He also served Saladin's successors as physician.

Plan of the City of Cairo, Twelfth Century.

(After Lane-Poole, "Medieval Egypt.")

Maimonides' presence in Egypt at this time was quite fortunate. A certain Zuṭa, also called "Yaḥya," had supplanted the nagid Samuel for sixty-four days. Samuel, however, was reinstated. Zuṭa hoarded up much wealth, and when the nagid died (before 1169), denounced his manner of collecting the revenues. Though the accusation was proved to be false, Zuṭa induced Saladin to sell him the dignity, and under the name of "Sar Shalom ha-Levi" he greatly overtaxed the people for four years—probably from 1185 to 1189, two documents written during his tenure of office bearing these dates respectively (J. Q. R. viii. 555). Maimonides, with the aid of R. Isaac, whom Harkavy and Neubauer connect with Isaac b. Shoshan ha-Dayyan, succeeded in driving Zuṭa out of office; and he and his son were put under the ban for the denunciations which they had hurled right and left. The matter was even brought to the attention of the vizier (מלך). A megillah ("Megillat Zuṭa") recounting these events was written in rimed prose by ABRAHAM BAR HILLEL in 1196 (J. Q. R. viii. 541, ix. 721, xi. 532; Wertheimer, "Ginze Yerushalayim," i. 37; see also Harkavy in "Ha-Mizpah," 1885, ii. 543; Kaufmann, in M. xli. 460, and J.Q. R. ix. 170).

The severe pest that visited Egypt in 1201–1202 in consequence of an exceptionally low Nile, and which is graphically described by the physician 'Abd al-Laṭif, is also described in a Hebrew fragment which is at present in the possession of A. Wolf of Dresden (Z. D. M. G. li. 448).

Al-Ḥarizi's Visit.

It was during the nagidship of Abraham Maimonides, who was physician to Al-Malik al-Kamil (1218–38), that Al-Ḥarizi went to Egypt, of which he speaks in the thirty-sixth and forty-sixth maḳamahs of his "Taḥkemoni." The former is supposed by Kaminka to be possibly a satire on Zuṭa (M. xliv. 220; Kaminka's ed., p. xxix.; but סבאים must refer to South Arabia). In Alexandria Al-Ḥarizi mentions R. Simḥah ha-Kohen, the Karaite Obadiah (the royal scribe) and his son Joseph, R. Hillel, and R. Zadok, the ḥazzan. In Fostat he mentions especially the dayyan Menahem b. R. Isaac. He also met Abraham Maimonides; and in Egypt he began to write his "Taḥkemoni." At the beginning of the thirteenth century there lived Jacob b. Isaac (As'ad al-Din al-Maḥalli), a renowned physician and medical writer (B. A. § 163). A letter to Hananeel b. Samuel (*c.* 1200), author of commentaries to the Talmud, has been published by Horwitz (Z. H. B. iv. 155; compare B. A. § 166). In 1211 a number of French rabbis, at the head of whom were the brothers Joseph and Meïr ben Baruch, emigrated to Palestine, and on their way visited Abraham Maimonides, who mentions them in his "Milḥamot Adonai" (ed. Leipsic, p. 16*a*; see R. E. J. vi. 178; Berliner's "Magazin," iii. 158).

Under the Mamelukes.

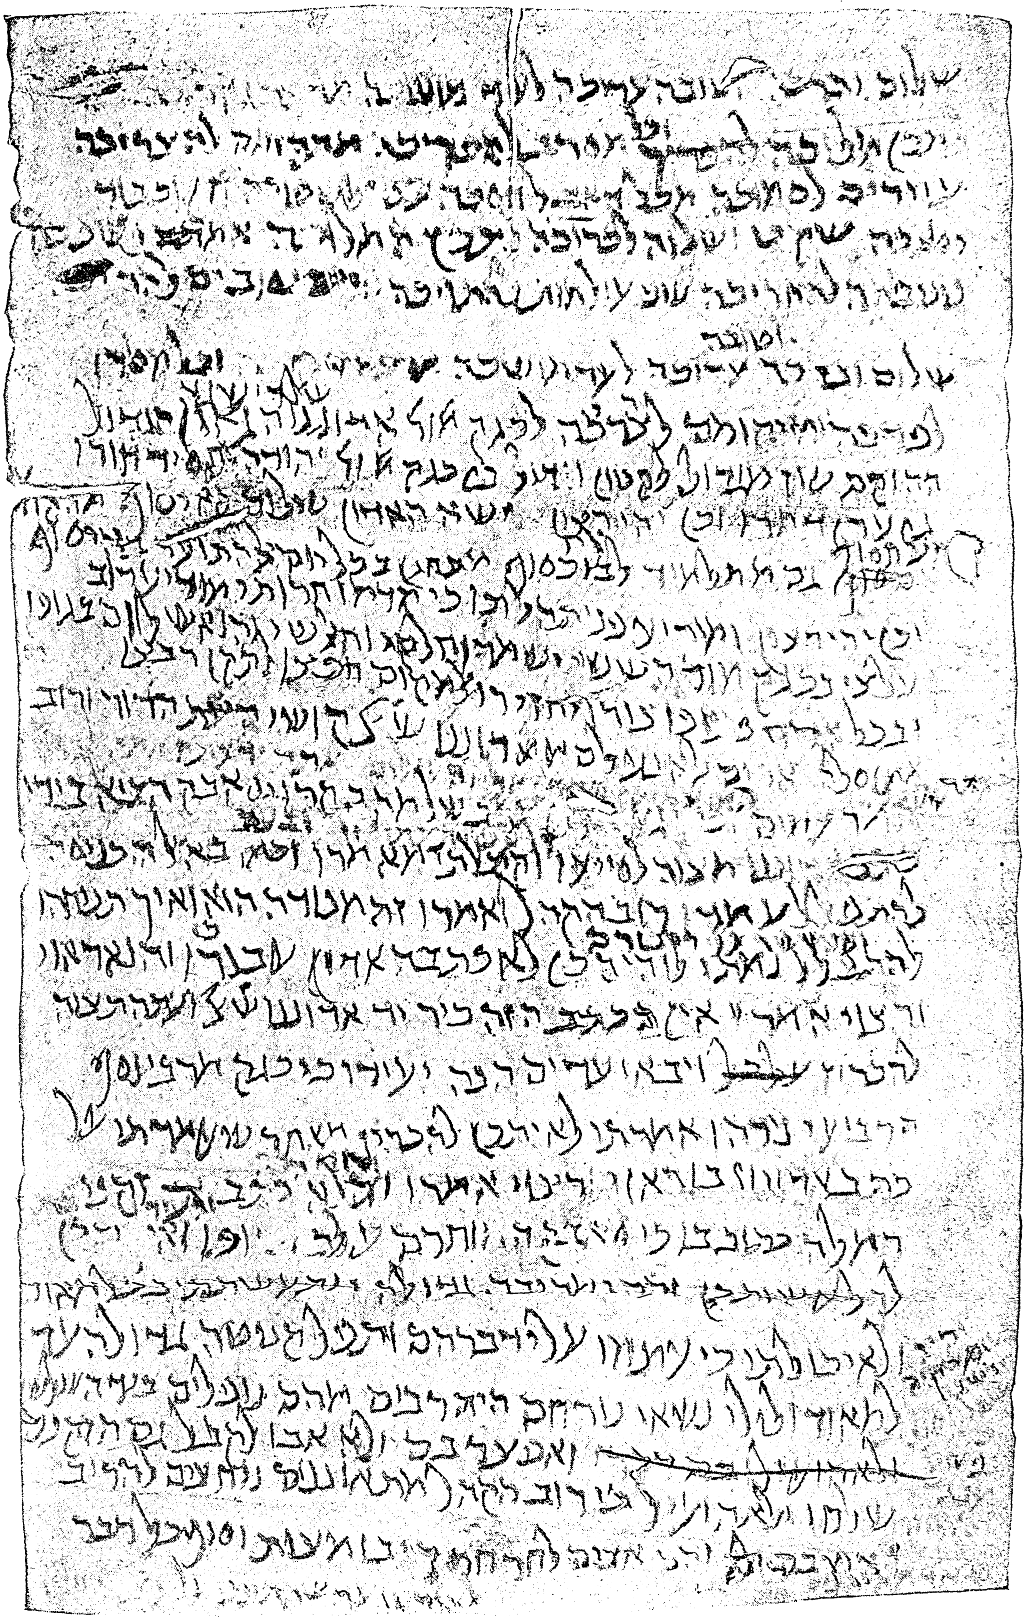
Under the Baḥri Mamelukes (1250–1390) the Jews led a comparatively quiet existence; though they had at times to contribute heavily toward the maintenance of the vast military equipment, and were harassed by the cadis and ulemas of these strict Moslems. Al-Maḳrizi relates that the first great Mameluke, Sultan Baibars (Al-Malik al-Thahir, 1260–77), doubled the tribute paid by the "ahl al-dhimmah." At one time he had resolved to burn all the Jews, a ditch having been dug for that purpose; but at the last moment he repented, and instead exacted a heavy tribute, during the collection of which many perished (Quatremère, "Histoire des Sultans Mamelukes," ii. 154). Under Al-Naṣir Mohammed (three times sultan, 1293–1340) the tribute from Jews and Christians amounted to 10 to 25 dirhems per head (L.-P. p. 304).

An account is given in Sambari (135, 22) of the strictness with which the provisions of the Pact of Omar were carried out. The sultan had just returned from a victorious campaign against the Mongols in Syria (1305). A fanatical convert from Judaism, Sa'id ibn Ḥasan of Alexandria, was incensed at the arrogance of the non-Moslem population, particularly at the open manner in which services were conducted in churches and synagogues. He tried to form a synod of ten rabbis, ten priests, and the ulemas. Failing in this, he endeavored to have the churches and synagogues closed. Some of the churches were demolished by the Alexandrian mob; but most of the synagogues were allowed to stand, as it was shown that they had existed at the time of Omar, and were by the pact exempted from interference. Sambari (137, 20) says that a new pact was made at the instance of letters from a Moorish king of Barcelona (1309), and the synagogues were reopened; but this probably refers only to the reissuing of the Pact of Omar. There are extant several notable fetwas (responsa) of Moslem doctors touching this subject; *e.g.*, those of Aḥmad ibn 'Abd al-Ḥaḳḳ, who speaks especially of the synagogues at Cairo, which on the outside appeared like ordinary dwelling-houses—a fact which had occasioned other legal writers to permit their presence. According to Taki al-Din ibn Taimiyyah (b. 1263), the synagogues and churches in Cairo had once before been closed. This fanatical Moslem fills his fetwas with invectives against the Jews, holding that all their religious edifices ought to be destroyed, since they had been constructed during a period when Cairo was in the hands of heterodox Moslems, Ismailians, Karmatians, and Nusairis (R. E. J. xxx. 1, xxxi. 212; Z. D. M. G. liii. 51). The synagogues were, however, allowed to stand (Weil, *l.c.* iv. 270). Under the same sultan (1324) the Jews were accused of incendiarism at Fostat and Cairo; they had to exculpate themselves by a payment of 50,000 gold pieces (Quatremère, *l.c.* ii. 16). The dignity which Moses Maimonides had given to Egyptian-Jewish learning was not maintained by his descendants. In 1314 the French philosopher and exegete Joseph Caspi went on a special mission to Egypt, where he hoped to draw inspiration for philosophical study; but he was much disappointed, and did not remain there for any length of time (Grätz, "Gesch." vii. 362). During the period just referred to lived Abu al-Muna al-Kuhin al-Aṭṭar, who compiled a much-used pharmacopœia (ed. Cairo, 1870, 1883; B. A. § 176), and the apostate Sa'd ibn Manṣur ibn Kammuna (1280), who wrote a number of tracts on philosophy and an interesting controversial tract on Judaism, Christianity, and Islam (B. A. § 178).

In the Fifteenth Century.

Under the Burji Mamelukes the Franks again attacked Alexandria (1416), and the laws against the Jews were once more strictly enforced by Sheik al-Mu'ayyid (1412–21); by Ashraf Bars Bey (1422–38), because of a plague which decimated the population in 1438; by Al-Ẓahir Jaḳmaḳ (1438–53); and by Ḳa'iṭ-Bey (1468–95). The last-named is referred to by Obadiah of Bertinoro (O. p. 53). The Jews of Cairo were compelled to pay 75,000 gold pieces (Muir, "Mamluks," pp. 136, 154, 180). During this century two travelers visited Egypt—namely, Meshullam of Volterra (1481) and Obadiah of Bertinoro (1488), just mentioned—and they have left accounts of what they saw there (see Bibliography, below). Meshullam found 60 Jewish householders in Alexandria, but no Karaites or Samaritans; there were two synagogues, a large and a small one. Fostat was in ruins; but he mentions the Elijah and the Damwah synagogues. In Cairo he found 500 Jewish householders, 22 Karaites, and 50 Samaritans; six synagogues, and a royal interpreter of Jewish descent, one Tagribardi. Of other prominent Jews he mentions R. Samuel רבך a rich and charitable man, physician to the sultan, and his son Jacob; R. Joshua אלחמר and Zadakah b. עֻבַרִי (M. V. pp. 176–187).

Obadiah was protected in Alexandria by R. Moses Grasso, interpreter for the Venetians, whom he mentions as a very prominent man. He speaks of only 25 Jewish families there; but there were 700 Jews in Cairo, 50 Samaritans, and 150 Karaites. The Samaritans, he says, are the richest of all the Jews, and are largely engaged in the business of banking. He also met there Anusim from Spain (O. p. 51). The Jewish community must have been greatly augmented by these exiles. They were well received, though occasionally their presence caused strife, as in the case of Joseph ibn Ṭabul, who insisted upon joining the Sephardim, though he really belonged to the Arabic community. Sulaimah ibn Uḥna and-



Letter (Papyrus) of an Egyptian Rabbi to Solomon ben Judah, Twelfth Century.

(In the collection of Grand Duke Rainer.)

Ḥayyim Vital interfered, and copies of their letters to Ibn Ṭabul have been preserved (Frumkin, "Eben Shemuel," p. 7). Among their number may be mentioned Moses b. Isaac Alashkar, Samuel Sidillo (1455–1530), David ibn Abi Zimra (1470–1572), Jacob Berab (who came from Jerusalem in 1522; Frumkin, *l.c.* p. 30), and Abraham ibn Shoshan, the last three holding official positions as rabbis. Moses de Castro, a pupil of Berab, was at the head of the rabbinical school at Cairo.

Under the Turks.

On Jan. 22, 1517, the Turkish sultan, Salim I., defeated Tuman Bey, the last of the Mamelukes. He made radical changes in the affairs of the Jews, abolishing the office of nagid, making each community independent, and placing David ibn Abi Zimra, at the head of that of Cairo. He also appointed Abraham de Castro to be master of the mint. About this time David Re'ubeni was in Cairo (1523?); he speaks of the Jews' street there (מסילת היהודים = "Darb al-Yahudi"), of their occupation as goldsmiths, and of Abraham de Castro, who, he says, lived as a pseudo-Mohammedan (M. J. C. ii. 141). It was during the reign of Salim's successor, Sulaiman II., that Aḥmad Pasha, Viceroy of Egypt, revenged himself upon the Jews because De Castro had revealed (1524) to the sultan his designs for independence (see Aḥmad Pasha; Abraham de Castro). The "Cairo Purim," in commemoration of their escape, is still celebrated on Adar 28.

The text of the megillah read on that day has been published by Löwe in "Ha-Maggid," Feb. 14, 28, 1866, and, from a genizah fragment, in J. Q. R. viii. 277, 511. The short report of an eyewitness, Samuel b. Naḥman, is given in Neubauer, "Aus der Petersburger Bibliothek," p. 118. Secondary sources: Ibn Verga, Additamenta, p. 111; S. 145, 9 (see J. Q. R. xi. 656); Joseph ha-Kohen, "'Emeḳ ha-Bakah," pp. 76, 95; *idem*, "Dibre ha-Yamim," p. 72.

Toward the end of the sixteenth century Talmudic studies in Egypt were greatly fostered by Bezaleel Ashkenazi, author of the "Shiṭṭah Meḳubbeẓet." Among his pupils were Isaac Luria, who as a young man had gone to Egypt to visit a rich uncle, the tax-farmer Mordecai Francis (Azulai, "Shem ha-Gedolim," No. 332); and Abraham Monson (1594). Ishmael Kohen Tanuji finished his "Sefer ha-Zikkaron" in Egypt in 1543. Joseph ben Moses di Trani was in Egypt for a time (Frumkin, *l.c.* p. 69), as well as Ḥayyim Vital Aaron ibn Ḥayyim, the Biblical and Talmudical commentator (1609; Frumkin, *l.c.* pp. 71, 72). Of Isaac Luria's pupils, a Joseph Ṭabul is mentioned, whose son Jacob, a prominent man, was put to death by the authorities ("Sar shel Miẓrayim"; Conforte, "Ḳore ha-Dorot," 40b).

According to Manasseh b. Israel (1656), "The viceroy of Egypt has always at his side a Jew with the title 'zaraf bashi,' or 'treasurer,' who gathers the taxes of the land. At present Abraham Alkula [אלכולי] holds the position." He was succeeded by Raphael Joseph Tshelebi, the rich friend and protector of Shabbethai Ẓebi (Grätz, "Gesch." x. 34). Shabbethai was twice in Cairo, the second time in 1660. It was there that he married the ill-famed Sarah, who had been brought from Leghorn (*ib.* p. 210). The Shabbethaian movement naturally created a great stir in Egypt. It was in Cairo that Miguel (Abraham) Cardoso, the Shabbethaian prophet and physician, settled (1703), becoming physician to the pasha Kara Mohammed. In 1641 Samuel b. David, the Karaite, visited Egypt. The account of his journey (G. i. 1) supplies special information in regard to his fellow sectaries. He describes three synagogues of the Rabbinites at Alexandria, and two at Rashid (G. i. 4). A second Karaite, Moses b. Elijah ha-Levi, has left a similar account of the year 1654; but it contains only a few points of special interest to the Karaites (*ib*).

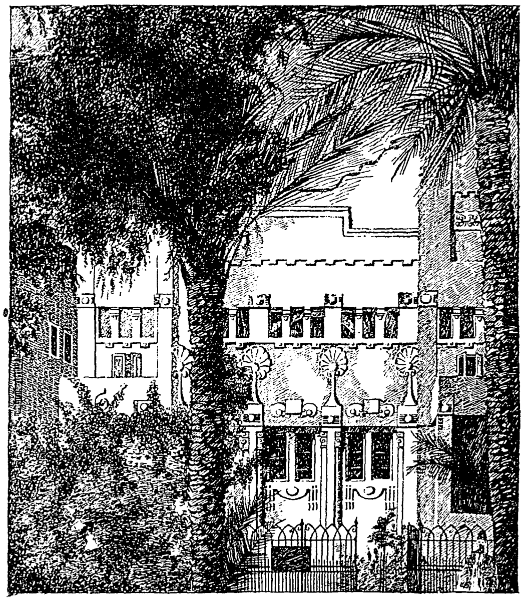
Sambari mentions a severe trial which came upon the Jews, due to a certain "ḳadi al-'asakir" (= "generalissimo," not a proper name) sent from Constantinople to Egypt, who robbed and oppressed them, and whose death was in a certain measure occasioned by the graveyard invocation of one Moses of Damwah. This may have occurred in the seventeenth century (S. 120, 21). David Conforte was dayyan in Egypt in 1671. In Sambari's own time (1672) there were Jews at Alexandria, Cairo, and Damanhur (R. Ḥalfon b. 'Ula, the dayyan); at כולבים or כולבים (S. 133, 11; 136, 18; R. Judah ha-Kohen, the dayyan; this city is perhaps identical with Bilbaïs, though a genizah fragment in Cambridge mentions the city כלבים in 1119); at Maḥallah (R. Peraḥiah b. Jose, the dayyan), at Bulak (S. 162, 7), and at Rashid (S. 156, 16), where he mentions Moses ibn Abu Darham, Judah משעאל, and Abraham ibn Ẓur. Sambari gives also the names of the leading Jews in Alexandria and Cairo. His chronicle (edited in part by Neubauer, and reprinted by Berliner, Berlin, 1896) is chiefly valuable for the history of the Jews in Egypt, his native country. From 1769 to 1773 Ḥayyim Joseph Azulai was rabbi in Cairo (J. Q. R. xv. 333).

Solomon Ḥazzan gives the following list of rabbis at Alexandria during recent times: Jedidiah Israel (1777–82), his nephew Israel (1802–23), Solomon Ḥazzan (1832–56), Israel Moses Ḥazzan (1862), Nathan Amram (1862–73), Moses Pardo (1873–74), and Elijah Ḥazzan (1888). Israel Yom-Ṭob, who was nominally chief rabbi of Cairo, died April 8, 1892, and was succeeded by Aaron ben Simon ("Israelit," 1892, p. 639).

In the Nineteenth Century.

Two Jewish travelers have left an account of the condition of the Jews in Egypt about the middle of the nineteenth century. Benjamin II. found in Alexandria about 500 families of indigenous Jews and 150 of so-called Italians. Each of these communities had its own synagogue, but both were presided over by R. Solomon Ḥazzan, a native of Safed. In Cairo also he found two Jewish communities; the indigenous numbering about 6,000 families and the Italian 200. Both were presided over by Ḥakam Elijah Israel of Jerusalem. Benjamin speaks of their eight synagogues, one of which is called "the Synagogue of Maimonides." In Fostat, or old Cairo, he found 10 Jewish families, very poor, and supported by their richer brethren in Cairo. In Damietta there were 50 Jewish families, and between that place and Cairo several scattered Jewish communities which had lapsed into a dead state of ignorance (Benjamin II., "Eight Years in Asia and Africa," pp. 230 *et seq.*).

Ibn Safir ("Eben Sappir," pp. 26 *et seq.*, Lyck, 1866) gives a more detailed account. He says that most of the Jews at present in Alexandria went there in recent times, after the cutting of the Maḥmudiyyah Canal. A number had gone from Rashid and from Damietta, so that only a handful of Jews was left in those places. The number in Alexandria he estimates at 2,000. Among the synagogues were the Kanis al-'Aziz, a small one, and the Kanis Sardahil, a large one. The Elijah synagogue had been rebuilt three years before his arrival. He speaks also of a synagogue with Sephardic ritual for the Italian Jews, numbering 100, and of a special synagogue for 50 Jews who had come there from eastern Europe. Of Jews in other parts of Egypt he mentions: 20 at Ṭanṭa, between the Rosetta and Damietta arms of the Nile, with a synagogue; 40 families in Manṣurah; 20 families in Maḥallah, with a synagogue (p. 21b); 20 families in Bet Jamari (?); 5 families at Ziftch, on the left bank of the Damietta arm, 10 Jews at Benha, and only 1 in Fayum (p. 25a). In Cairo he found 600 families of native Jews and 60 of Italians, Turks, etc., following the Sephardic ritual, and 150 Karaite families living in a separate quarter. The Jews live in the northwestern part of the city in a special quarter called "Darb al-Yahudi." The lanes are narrow, but the houses are large. The Jews are well-to-do and are engaged largely in the banking business. The cemetery is two hours distant from the city, and the graves are not marked by any stones. There is, however, a monument to a celebrated pious man, R. Ḥayyim כפוסי, to which the Jews make pilgrimages, taking off their shoes as they approach it. Kapusi (?) must have lived toward the end of the sixteenth and at the beginning of the seventeenth century. He is mentioned in a document of the year 1607, together with Abraham Castro, Benjamin קאגיני (קאניני, Conforte, *l.c.* p. 41b), and Moses Arragel (Ḥazzan, "Ha-Ma'alot li-Shelomoh," p. 12a), and by Conforte (*ib.*).



New Synagogue at Cairo, Egypt.
(After a photograph.)

The head of the Egyptian Jews outside of Alexandria was R. Elijah Israel b. Isaac of Jerusalem, whose power over the community was considerable. Ibn Safir mentions as leaders of the community Yom-Ṭob b. Elijah Israel, a judge; Jacob Shalom; the Ya'beẓ family; Jacob Catawi; Saadia; and Abraham Rosana. In the ruined city of Fostat he found twelve Jewish families, whose number was increased during the summer by the rich Cairo Jews who go there for a time ("Eben Sappir," p. 20a).

Blood accusations occurred at Alexandria in 1844 (Jost, "Neuere Geschichte," ii. 380), in 1881 (Jew. Encyc. i. 366), and in Jan., 1902 (see "Bulletin All. Isr." 1902, p. 24). In consequence of the Damascus Affair, Montefiore, Crémieux, and Solomon Munk visited Egypt in 1840; and the last two did much to raise the intellectual status of their Egyptian brethren by the founding, in connection with Rabbi Moses Joseph Algazi, of schools in Cairo (Jost, *l.c.* p. 368; *idem*, "Annalen," 1840, p. 429).

In 1892 a German-Italian congregation was formed at Port Said under Austrian protection ("Israelit," 1892, p. 1620). When Khartum fell into the hands of the Mahdi (1885), seven or eight Jews were found there, among them Neufeld. They were, however, all foreigners.

According to the official census published in 1898 (i., xviii.), there were in Egypt 25,200 Jews in a total population of 9,734,405. Of these, 12,693 were Egyptians and 12,507 strangers. Their distribution in the various cities was as follows:

The Alliance Israélite Universelle, together with the Anglo-Jewish Association, maintains at Cairo a boys' and a girls' school, founded in 1896. There are Zionist societies in Cairo, Alexandria, Manṣurah, Suez, Damanhur, Maḥallah, Kobra, and Ṭanṭa. The Zionist society Bar Cochba in Alexandria founded there a Hebrew school in 1901; it issues a journal, "Le Messager Sionist," which in 1902 superseded the "Mebassereth Zion."

Constitution; the Nagid.

The Egyptian communities were presided over for many centuries by a nagid, similar to the "resh galuta" in the East. One of the earliest references to the Egyptian nagid is to be found in the Midrash Agadat Bereshit (p. 110, Warsaw, 1876). His full title was נגיד עם אל (compare the title of Simon, *σαραμελ* = שר עם אל, I. Macc. xiv. 28), or נגיד עם סגולה (MS. Cambridge Add. No. 3124, David Maimonides, 1396), or perhaps שר השרים (Benjamin of Tudela; compare Z. D. M. G. lii. 446; J. Q. R. ix. 116); and Sambari (116, 20; 133, 7) speaks of him as נשיא גליות כל ישראל. His authority at times, when Syria was a part of the Egyptian-Mohammedan empire, extended over Palestine; according to the Ahimaaz Chronicle (130, 5), even to the Mediterranean littoral on the west. In one document ("Kaufmann Gedenkbuch," p. 236) the word is used as synonymous with "padishah." The date is 1209; but the term may refer to the non-Jewish overlord. In Arabic works he is called "ra'is al-Yahud" (R. E. J. xxx. 9); though his connection with the "shaikh al-Yahud," mentioned in many documents, is not clear. Meshullam of Volterra says expressly that his jurisdiction extended over Karaites and Samaritans also; and this is confirmed by the official title of the nagid in the instrument of conveyance of the Fostat synagogue. At times he had an official vice-nagid, called by Meshullam הוויצי נגיד (M. V. p. 187, 5); in Hebrew, עטרת השרים (J. Q. R. x. 162). To assist him he had a bet din of three persons (S. 133, 21)—though Meshullam mentions four judges and two scribes, and the number was at times increased even to seven—and there was a special prison over which he presided (M. V. p. 186). He had full power in civil and criminal affairs, and could impose fines and imprisonment at will (David ibn Abi Zimra, Responsa, ii., No. 622; M. V. *ib.*; O. p. 17). He appointed rabbis; and the congregation paid his salary, in addition to which he received certain fees. His special duties were to collect the taxes and to watch over the restrictions placed upon the further construction of synagogues (Shihab al-Din's "Ta'rif," cited in R. E. J. xxx. 10). Even theological questions—regarding a pseudo-Messiah, for example—were referred to him (J. Q. R. v. 506, x. 140). On Sabbath he was escorted in great state from his home to the synagogue, and brought back with similar ceremony in the afternoon (S. 116, 8). On Simḥat Torah he had to read the Pentateuchal lesson and to translate it into Aramaic and Arabic. Upon his appointment by the calif his installation was effected with much pomp: runners went before him; and the royal proclamation was solemnly read (see E. N. Adler in J. Q. R. ix. 717).

Origin of the Office.

The origin of the nagidship in Egypt is obscure. Sambari and David ibn Abi Zimra (Frumkin, "Eben Shemuel," p. 18) connect it directly with a daughter of the Abbassid calif Al-Ṭa'i (974–991), who married the Egyptian calif 'Adud al-Daulah (977–982). But 'Aḍud was a Buwahid emir of Bagdad under Al-Muktafi; and, according to Ibn al-Athir ("Chronicles," viii. 521), it was 'Aḍud's daughter who married Al Ṭa'i. Nor does Sambari give the name of the nagid sent from Bagdad. On the other hand, the Ahimaaz Chronicle gives to the Paltiel who was brought by Al-Mu'izz to Egypt in 952 the title of "nagid" (125, 26; 129, 9; 130, 4); and it is possible that the title originated with him, though the accounts about the general Jauhar may popularly have been transferred to him. If this be so, he was followed by his son, R. Samuel (Ahimaaz Chronicle, 130, 8), whose benefactions, especially to the Jews in the Holy Land, are noticed. This must be the Samuel mentioned as head of the Jews many hundred years previous by Samuel b. David, and claimed as a Karaite. The claim is also made by Firkovitch, and his date is set at 1063. He is said to have obtained permission for the Jews to go about at night in the public streets, provided they had lanterns, and to purchase a burial-ground instead of burying their dead in their own courtyards (G. pp. 7, 61). The deed of conveyance of the Rabbinite synagogue at Fostat (1038), already referred to, mentions Abu (Ibn?) Imran Musa ibn Ya'ḳub ibn Isḥaḳ al-Isra'ili as the nagid of that time. The next nagid mentioned is the physician Judah b. Josiah, a Davidite of Damascus, also in the eleventh century (S. 116, 20; 133, 10); a poem in honor of his acceptance of the office has been preserved (J. Q. R. viii. 566, ix. 360). In the same century lived the nagid Meborak b. Saadia, a physician (J. Q. R. viii. 557): he is referred to in a contract dated 1098 (*ib.* ix. 38, 115), in the epistle of the ex-minister of finance of the vizier Al-Afḍal (Z. D. M. G. lii. 446), and in a Lewis-Gibson fragment (J. Q. R. ix. 116). He was maligned by the exilarch David, and was forced to take refuge for a time in Fayum and Alexandria (*ib.* xv. 89).

Succession of Nagidim.

It is uncertain whether there was a nagid named Mordecai; the expression "Mordekai ha-Zeman" is probably appellative (*ib.* ix. 170); but the fragment of a poem (see "He-Ḥaluẓ," iii. 153) addresses him as "Negid ʿAm El," which is quite distinctive (J. Q. R. viii. 553). His full name would then be Mordecai b. al-Ḥarabiyyah. He was succeeded by Abu Manṣur Samuel b. Hananiah, who was nagid at the time of Judah ha-Levi (1141). He is not to be confused with Samuel ha-Nagid of Spain, as he is even in Sambari (S. 156, 24; see J. Q. R. ix. 170, xiii. 103; M. xl. 417). He was living in 1157, but not so late as 1171, as he is not mentioned by Benjamin of Tudela. When Benjamin was in Egypt the nagid was Nathanael (Hibat Allah ibn Jami, a renowned physician; B. A. § 145). This can be seen from Benjamin's description, though the title is not used (despite Neubauer, J. Q. R. viii. 553). He is mentioned in 1164 in a marriage contract published by Merx ("Doc. Paleogr." 1894; M. xxxix. 150, xli. 214; J. Q. R. xiii. 103; B. A. § 145). During the time that he farmed the revenues the usurper Zuṭa must have held office (M. xli. 463). Zuṭa was ousted by Maimonides, though whether the latter took his place as nagid, and what was his relationship to Nathanael, are not clear. A ketubbah, dated 1172, in the library of the late D. Kaufmann, seems by its wording to indicate that Maimonides did hold the office (Z. D. M. G. li. 451; M. xli. 425, 463). Maimonides induced many Karaites to return to Rabbinism (Grätz, "Gesch." vi. 359).

The dignity of nagid was vested for some time in the family of Maimonides: Abraham (1186–1237; a document from his bet din is published by D. W. Amram in "The Green Bag," xiii. 339, Boston, 1901); his son David (1212–1300; S. 120, 15; 134, 29; M. xliv. 17; "Kerem Ḥemed," ii. 169; "Or Meïr," p. 34); the latter's son Abraham Maimonides II. (1246–1310); and Abraham's son Joshua b. Abraham (b. 1248).

In regard to the fourteenth century there is no information. In the fifteenth occurs a Nagid Amram (1419), to whom a letter was sent (preserved by the Italian stylist Joseph b. Judah Sarko) introducing a certain R. Elias, who was on a mission to seek the Lost Ten Tribes (J. Q. R. iv. 303). Lipmann of Mühlhausen mentions the office in his "Niẓẓaḥon" (ed. Amsterdam, p. 96). In 1481 Meshullam of Volterra mentions Solomon b. Joseph, whose father before him had also been nagid. Solomon was physician to the sultan Al-Malik al-Ashraf Ḳa'it Bey (M. V. p. 186); his dayyanim were Jacob b. Samuel ככח (רבך?), Jacob אלטאבוייה, Samuel b. Akil, and Aaron Me'appe. He was followed by Nathan Kohen Sholal (seen by Obadiah of Bertinoro, 1488), who was born in the Maghreb and had formerly lived in Jerusalem (O. p. 52). Nathan was followed by his nephew, Isaac Kohen Sholal (1509; S. 157, 1). A letter from his bet din is mentioned, among others, by Conforte ("Ḳore ha-Dorot," p. 31a; compare Frumkin, *l.c.* p. 20, and Azulai, "Shem ha-Gedolim," No. 322, i. 45a). For a time he was deprived of his rank; but he returned to Egypt in 1500 (Samuel de Avila in Frumkin, "Eben Shemuel," p. 18; Brüll's "Jahrb." vii. 123). Abraham de Castro (1524), the mint-master, is given the title "nagid" by Sambari (145, 10; 159, 20); his nephew, Jacob de Castro (d. 1610), was a rabbinic authority. The same source mentions (S. 157, 6) as the last dignitaries תאגיד (תאגיר?) and Jacob ibn Ḥayyim. From the time of the Osmanli rule, says Sambari (116, 22), the nagid dynasty was no longer in the family of David, but was given to the one preeminent for wisdom and riches. He was sent to Egypt by the Jewish notables of Constantinople. The pretensions of Jacob ibn Ḥayyim made him disliked (116, 25). He was put under the ban by Bezaleel Ashkenazi, and driven from the country.

The office of nagid was suspended about the middle of the sixteenth century (according to Azulai, "Shem ha-Gedolim," i. 16, by Bezaleel himself), the chief rabbi being given the title "tshelebi." David ibn Abi Zimra was chief rabbi of Egypt for many years (*c.* 1570), and his decisions were widely followed throughout the Orient ("Ma'alot li-Shelomoh," p. 18b). The title "nagid" given to Berab (Responsa, מב"ימ, i. 87) is purely honorific.

The following is a tentative list of the negidim, as far as they can at present be determined:

Tenth Century.

Paltiel (?)
Samuel (?)

Eleventh Century.

Musa ibn Ya'ḳub al-Isra'ili
Judah b. Josiah
Meborak b. Saadia
(Mordecai b. al-Ḥarabiyyah ?)

Twelfth Century.

Samuel b. Hananiah
Zuṭa
Nathanael Hibat Allah
Maimonides

Thirteenth Century.

Abraham Maimonides I.
David Maimonides
Abraham Maimonides II.
Joshua b. Abraham Maimonides

Fifteenth Century.

Amram
Joseph
Solomon b. Joseph (1481)
Nathan Kohen Sholal
Isaac Kohen Sholal

Sixteenth Century.

Abraham de Castro (1524)
תאגיד
Jacob ibn Ḥayyim

Gaon and Nagid.

The question of the relation of the religious leadership (gaonate) to the more worldly nagidship is extremely difficult of solution on account of the paucity of documents. The Egyptians seem to have recognized the authority of the Babylonian geonim; for they addressed questions to them (Harkavy, "Teshubot ha-Geonim," p. 342), and even helped the declining fortunes of the Eastern schools (Schechter, "Saadyana," pp. 117 *et seq.*). The head of the schools in Egypt was called, as in Babylon, "rosh ha-yeshibah," or "nasi"—a title which was much misused, to judge from a responsum of Abraham Maimonides ("Teshubot ha-Rambam," p. 50a). The quarrel between the Babylonians and the Palestinians regarding the right to fix the religious calendar each year could not have been passed unnoticed in Egypt. All the fragments dealing with the controversy between Saadia and Ben Meïr that have been found of recent years have come from the Cairo genizah (see R. E. J. xliv. 230). There is evidence that the question became acute for the Jews in Egypt also, during the califate of Al-Mustanṣir Billah (1036–94). This evidence is the so-called "Abiathar scroll." It seems as if a new Palestinian gaonate had begun about 1045 with Solomon b. Judah. Abiathar was a scion of a Palestinian priestly family. His father Elijah and a certain Joseph (before 1054) claimed jurisdiction over the Jews both in Palestine and in Egypt under the title of "gaon." They were bitterly opposed by a member of the exilarch's family, Daniel b. Azariah, "the Nasi," who had come from Babylon. Joseph was supported by the government; he died in 1054, and Daniel ruled for eight years without opposition (d. 1062). On his death, Elijah (d. 1084) held the office for nearly twenty-three years. In 1082 this Elijah called a synod at Tyre, and ordained his son Abiathar as gaon. But about 1081 David b. Daniel, a descendant of the Babylonian exilarch, aged 20, had gone to Egypt (Damira?), and in 1083 was in Fostat, where his claims were supported by the government, especially by the nagid Meborak and by a relative of his, Josiah b. Azariah, the head of the school there, to whom the title "gaon" is also given (J. Q. R. xv. 86). At times the title does not seem to have been distinctive of any office.

The Babylonian gaonate had died out with Hezekiah; and the idea was to renew it in Egypt. David was declared exilarch; and he exercised power over the Jewish communities in Alexandria, Damietta, and Fostat, which he oppressed with taxes. He also had power over the Jews in Ashkelon, Cæsarea, Haifa, Beirut, and Byblus, and over Tyre also when it came again under the power of Egypt (1089), causing the gaon there to flee. Daniel then sent his own representative to the city. In 1093, in opposition to Abiathar, David endeavored to be made "rosh gelayot" over all Israel. His harshness caused Meborak to support Abiathar; and in 1094 Meborak assisted in having Abiathar's power as gaon acknowledged (J. Q. R. xiv. 449, xv. 91). A defense of the pretensions of David by the school in Fostat has been published by Schechter (*ib.* xiv. 476). Abiathar was probably succeeded as gaon by his brother, Solomon b. Elijah, who had been "ab bet din" (*ib.*

xiv. 481). Solomon was followed by his son Mazliaḥ (*c.* 1131). Following a notice of Benjamin of Tudela, Bacher believes that the gaonate was then transferred to Damascus (*ib.* xv. 95). This gives the following list of Egyptian geonim:

Solomon (1047)
Joseph (d. 1054)
Elijah (d. 1084)
Abiathar
Solomon
Mazliaḥ (*c.* 1131)

Karaites in Egypt.

It is not known how early the Karaites commenced to settle in Egypt. The polemics against them of Saadia Gaon (before 928) show that at that time their numbers must have been large; and his activity in this respect may have won for him his position at Sura (J. Q. R. x. 240). It was in Egypt that he wrote his polemical work against Anan, "Kitab al-Rudd" (915), and his "Kitab al-Tamyiz" (926). His "Emunot" was written in 933. Four years afterward Al-Ḳirḳisani wrote his "Kitab al-Anwar," in which he gives an account of the Jewish sects of his day. Among these he mentions the "Ḳar'ites" (אלקרעיה), so called because they used vessels made of gourds. They resided near the Nile, 20 parasangs from Fostat, and traced their descent from Johanan the son of Kareah (Jer. xliii. 4), who had emigrated to Egypt. They celebrated Sunday in addition to Saturday (*ib.* vii. 704). Saadia even had personal disputations with Karaites, notably with Abu al-Sari ben Zuṭa (M. xli. 204). Of his adversaries in Egypt, mention may be made of Solomon b. Jeroham, author of Karaitic commentaries to the Bible and of controversial tracts (B. A. § 40), and of Menahem Gizni of Alexandria, who wrote polemics against Saadia, and of whom a poem and a letter to the Karaites of Fostat have been preserved (L., Notes, p. 50). The oldest Egyptian Karaitic document published is a bill of divorce dated Fostat, 1030 (E. N. Adler in J. Q. R. xii. 684). Present knowledge of Karaitic scholars and communities commences really with the twelfth century. Cairo and Alexandria became, after Jerusalem and Constantinople, their chief centers; and Karaites were to be found in Egypt wherever Jews dwelt. Most of the Karaitic manuscripts in the Paris and St. Petersburg libraries have come from Egypt (Neubauer, "Aus der Petersburger Bibliothek," p. 21). At the end of the twelfth century there lived in Egypt the Karaite poet Moses Dar'i: Israel b. Daniel al-Ḳumisi (about 1162), who wrote a "Sefer ha-Miẓwot" (J. Q. R. viii. 701; B. A. § 70); and David b. Solomon (Sulaiman b. Mubarak, 1161-1241), who is described by his contemporary, Ibn Abi Usaidia, as an excellent physician and teacher in the service of the Ayyubid Abu Bakr al-'Adil, and as being connected with the hospital Al-Naṣiri in Cairo (J. Q. R. xiii. 103; B. A. § 154). Ibn al-Ḥiti, in his literary chronicle, mentions in Ramleh the sheik 'Ali b. Abraham al-Ṭawil, and especially the nasi Solomon, who wrote on forbidden marriages (J. Q. R. ix. 440). Of Karaites in the following centuries mention may be made of Yafith b. Saghir, author of a "Sefer ha-Miẓwot"; Solomon Kohen (Abu Manṣur Sulaiman ibn Ḥafas), writer on medical subjects (B. A. § 194); and Yafith ibn Abi al-Ḥasan al-Barkamani, polemic—all of the thirteenth century; Israel b. Samuel ha-Ma'arabi (1310), who also wrote a "Sefer ha-Miẓwot" (B. A. § 184); Samuel b. Moses ha-Ma'arabi (1434), author of "Al-Mushid," on the laws and commandments, as well as of commentaries to the Bible (B. A. § 199).

Karaite Organization in Egypt.

Little is known about the organization of the communal life of the Karaites. They claim to have had at the head a "ra'is," whose seat for a time was in Fostat; though Saadia (Commentary to Ps. 119, end) expressly states that the Karaites agreed to have no nasi in the Diaspora (L., Notes, p. 52). This head was called "nasi" or "rosh ha-golah." A list of the nasis is given in Karaitic manuscripts, carrying their genealogy back to David, which fact at once raises suspicions. For Egypt the following are given: Saadia, 980; Solomon; Hezekiah; Ḥasdai; David; and Solomon Abu al-Faḍl—(see Fürst, "Gesch. des Karäerthums," ii. 192; Notes, p. 77; J. Q. R. ix. 441).

The fact of there being such a head can hardly be doubted, since several of those cited above are mentioned regularly with the title attached to their names. Samuel b. David gives a description of his Karaite brethren in Egypt in the seventeenth century, and paints their condition in glowing colors (G. p. 5; transl. in Neubauer, *l.c.* p. 40). He stayed in Cairo with the nasi Baruch; and he mentions especially one Abraham Ḳudsi (*i.e.*, "of Jerusalem"). This latter, together with the physician Zachariah, is mentioned by Moses b. Elijah also (G. p. 34). Samuel relates further that many of the Karaites were goldsmiths, but that in his day the wealth of the community was reduced (p. 5). Ibn Safir likewise speaks of the Karaitic goldsmiths. In his day Moses ha-Levi of Jerusalem was their ḥakam and Elisha their "rosh." Reference has already been made to the number of Karaites in Egypt at various times. Occasionally many were converted to Rabbinism, notably by Abraham Maimonides in 1313 (S. 134, 15; "Kaftor u-Feraḥ," p. 13b; J. Q. R. xiii. 101), a fact due, perhaps, to the mild and considerate manner in which they were treated, especially by Moses Maimonides (see his "Teshubah," No. 153, ed. Leipsic, p. 35b). A similar policy was pursued by Joseph del Medigo, who, being in Cairo in 1616, entered into friendly relations with their ḥakam, Jacob Alexandri (Geiger, "Melo Chofnajim," p. xxxii.). According to a report in Jost's "Annalen" (iii. 84), they numbered 100 in Cairo in 1841; while E. N. Adler speaks of 1,000 in 1900 (J. Q. R. xii. 674). A Karaitic Haggadah, with Arabic translation for the use of the Karaites in Cairo, was published at Presburg in 1879 by Joshua b. Moses ("Hebr. Bibl." xix. 2).

Samaritans in Egypt.

The Samaritans also settled in Egypt at an early date, though very little is known of their actual history. For Alexandria, see Jew. Encyc. i. 366; and for the Dosithean sect, *ib.* iv. 643. The Samaritan chronicle published by Neubauer (J. A. 1869, No. 14) gives the names of the high priests and of the chief Samaritan families in Egypt. He mentions Ḥelbaḥ b. Sa'adah, who went to live in Egypt and was the progenitor of the Ha-Mora and Ḥelbah families (*idem*, offprint, p. 74); Garnakah b. Ḥelef, progenitor of the Garnakah family (p. 75); Raḥiz b. Shafar, the first to go to Egypt by sea; Joseph b.

Ḥelef; Elias Ṣadaḳah ha-Ḥifi, progenitor of the Ḥofni family at Cairo (p. 77); and in 1504 one Jacob of the family Puḳah, who is called "King of Israel" and "Abrek" (compare "He-Ḥaluẓ," iii. 153, 2), and whom the writer praises for his numerous good deeds (p. 80). In the fifteenth (?) century lived Abu Sa'id al-'Afif, one of the best-known physicians in Cairo, and a writer on medical subjects (B. A. § 325). Mention must also be made of Muhadhdhib al-Din Yusuf al-'Askari, author of a "Sefer ha-Miẓwot" (*ib.* § 328).

In 1481 Meshullam of Volterra found 50 Samaritan families in Cairo, with a synagogue (p. 185). A hanging for the Ark with a Samaritan inscription and coming from this synagogue was presented to the congregation of Widdin or to that of Ofen in the sixteenth century. Samaritans are also mentioned by David ibn Abi Zimra and by Joseph del Medigo, who saw them at disputations with Ali ibn Raḥmadan (Brüll's "Jahrb." vii. 44). Of Samaritan literature in Egypt nothing is as yet known. Müller and Kaufmann suspect that a papyrus fragment containing part of an acrostic litany is of Samaritan origin ("Mittheilungen aus der Sammlung der Papyrus Erzherzog Rainer," i. 39). The use of Hebrew script by Samaritans is not, as Harkavy thinks (see "Allg. Zeit. des Jud." 1891, p. 57), peculiar. One of the Arabic Pentateuch manuscripts described by De Sacy ("Mémoire sur la Version Arabe à l'Usage des Samaritains," p. 13) was bought at Cairo, and seems to have been written there at the time of the Circassian sultan Al-Ashraf Kansuḥ al-Ghuri (beginning of the sixteenth century) by one Ṣadaḳah b. Joseph שמש המכתבים הקדושים במצרים; *ib.* p. 17; compare a similar expression, שמש המכתב הקדש, in the colophon of a Cambridge Samaritan Pentateuch, J. Q. R. xiv. 28, l. 8; 352; xv. 75). The Scaliger manuscript, from which Juynboll edited the Book of Joshua (Leyden, 1848), came from the Egyptian Samaritans in 1584. It was written upon the skin of the Passover lamb (Juynboll, "Commentarii in Historiam Gentis Samaritanæ," p. 33).

Synagogues in Cairo.

The importance of the Jewish communities in Egypt may be seen from the number of synagogues which formerly existed in and around Cairo. Arabic topographers of Egypt have even given accounts of them; *e.g.*, Ibrahim ibn Mohammed ibn Duḳmaḳ (1350–1406; "Description de l'Egypte," ed. Vollers, 1893, p. 108) and Al-Maḳrizi ("Al-Ḥiṭaṭ," ii. 464). These accounts are followed by Sambari (S. 118, 136; see Schreiner in Z. D. M. G. xlv. 296). There were at least ten synagogues; Meshullam of Volterra (M. V. p. 185) describes six of them. The Karaite Samuel b. David speaks of thirty-one, besides fifty בתי הקדשות ("charitable foundations"), of which there were originally as many as seventy (G. p. 6). Following is a list of the synagogues:

1. The Damwa synagogue in Gizeh, on the west bank of the Nile, opposite Fostat: רמוה (S. 120, 4), דומו (O. p. 18 and a MS. in "Or Meïr," p. 34), רמו (M. V. p. 182; see J. Q. R. xv. 75); on the spot to which Moses is said to have retired. Tradition says that it was built forty years after the destruction of the First Temple. A tree there is said to have grown out of Moses' rod. Al-Maḳrizi relates that the Jews made pilgrimages to this synagogue on the Feast of Revelation. Sambari states that the Cairo Jews were accustomed to invite their brethren from all parts of Egypt to come there on Adar 7 (Death of Moses), the day following being celebrated with feasting. It was also called "Moses' Synagogue" ("Kanisat Musa"; S. 120, 137; Benjamin of Tudela, ii, 235); but in Sambari's time it was in ruins (S. 119, 30; 137, 14). According to Benjamin of Tudela, the overseer of the synagogue was called "Al-Shaikh abu Naṣr" (p. 98). Bertinoro speaks also of a Karaite synagogue in the place.

2. The Jauhar synagogue, built upon the spot where both Elijah and Phineas b. Eliezer were born ("Al-Ḥiṭaṭ," ii. 47). This also was in ruins (S. 121, 15).

3. The Al-Maṣaṣah synagogue in Cairo, built in the year 315, Seleucidan era [= 3-4 C.E.], and restored under Omar ibn al-Khaṭṭab (816); situated in the Darb al-Karmah.

4. The synagogue of the Palestinians ("Al-Shamiyyin"), in a section of Cairo called Ḳaṣr al-Sham; according to Ibn Duḳmaḳ, in the Ḳaṣr al-Rum. A wooden tablet over the gate says that it was built in 336 of the Seleucidan era, forty-five years before the destruction of the Temple; but Moses ben Elijah (G. p. 34) gives the date as 1531 (= 1291, if, as he thinks, this is according to the Seleucidan era). It is called after Elijah (S. 118, 9), who is said to have appeared in the southeast corner (O. p. 18). About 1487 the sultan Ḳa'it Bey, or his vizier (המלך), wished to remove the columns of the building for use in his own palace. He was bought off with 1,000 gold pieces (O. *ib.*). In the northeast corner was a platform, on which was a celebrated Torah scroll, said to have been written by Ezra, and to which magical powers were attributed (S. 118, 137; O. *ib.*). Moses b. Elijah speaks of the many inscriptions and psalms which covered the walls and the "hekal," as well as the names, written or cut in, of the many visitors to the synagogue. Benjamin II. calls it also "Kenisat Eliyahu" (Engl. ed., p. 233). It is standing to-day (1903); and E. N. Adler holds that it was originally a church of the third or fourth century, the titular saint of which was Michael (J. Q. R. ix. 670). Samuel b. David tries to make out that it was in former times a Karaite synagogue (G. p. 60).

The best description of the synagogue is given by Ibn-Safir (*l.c.* pp. 20 *et seq.*). He calls it the "synagogue of Ezra," on the theory that it was founded by him. Rosh Ḥodesh Iyyar is celebrated with much pomp here, and Jews flock from Cairo and other places with offerings. Ibn Safir also mentions the many inscriptions and names to be found upon the walls; the room in the southeast corner where Elijah is said to have appeared; the cupboard in the northeast corner containing the Ezra manuscript; and especially the GENIZAH, to which he ascended by means of a ladder, but found little of value there.

5. In the same part of the city (Ibn Duḳmaḳ, again, has Ḳaṣr al-Rum), in the "Jews' Lane' ("Zuḳaḳ al-Yahud") was the synagogue of the Babylonian Jews ("Al-'Iraḳiyyin"). In Sambari's time it was in ruins. Benjamin II. must refer to this in speaking of the synagogue "Al-Karkujan" (S. p. 233).

6, 7. Al-Maḳrizi mentions two Karaite synagogues; one that of Ibn Shamikh (כ' בן צומה; S. 137, 11). This is the only one referred to by Sambari, in the district אלכורניפיש (*i.e.*, the street Al-Khurunfush in the northern part of Cairo; Maḳrizi, *l.c.* ii. 27; Al-Ḳalḳashandi, p 72); it is now in ruins. Ibn Duḳmaḳ mentions one in Maṣmuma, in a small alley of the Darb al-Karmah (see above). The Karaites, however, speak of two: one, large and spacious, for the Jerusalem Karaites, with fourteen marble pillars and containing five hekalot, fourteen scrolls, and many Arabic Karaitic manuscripts; the second, smaller and private, situated in the courtyard of a certain Aaron (G. pp. 6, 34).

8. A Rabbinite synagogue in which Sambari worshiped, "Kanisat al-Musta'rab" (S. 156, 5; compare Conforte, "Ḳore ha-Dorot," 32b, 33a), for the Arabic Jews. The deed of conveyance of the synagogue (1038) speaks of it as situated in the Darb al-Banadir in the Zuwailah quarter. It was closed at one time, opened again by Eliezer Skandari in 1580, but had been closed for forty years before Sambari wrote (S. 160, 10). A specially venerated Bible codex, called "Al-Sunbaṭi," was brought to the synagogue in 1623 from the Egyptian village of Sunbaṭ; a light was kept burning before it, and on Simḥat Torah it was carried once around the synagogue (S. 119, 1; perhaps the "Codex Sambuki"; see JEW. ENCYC. iii. 179).

9. Synagogue al-Ḥadrah (Al-Maḳrizi). This also was in the Zuwailah quarter, in the Darb al-Ra'id.

10. A Samaritan synagogue (Al-Maḳrizi; M. V. p. 185).

In addition, Sambari mentions a synagogue of the West-African Jews (כנישה של ק"ק מוגרב: 134, 9), in which Maimonides was buried before his body was taken to Palestine, and a private one of R. Sedillo, still standing in his day (S. 145, 16; but 159, 7 has סביליא = Sevilla ?). In the middle of the nineteenth century Ibn Safir (*l. c.* p. 9a) found ten old synagogues in Cairo proper, and of them mentions the following: (1) Synagogue of

R. Ishmael, rebuilt, in which most of the Franks (European Jews) worshiped. Attached to it was a school for orphans and poor children. (2) Synagogue Miẓrayim, the oldest of all, about to be rebuilt. (3) Synagogue of the Portuguese, rebuilt. (4) Synagogue of R. Moses (Maimonides), still standing; on the north side was a small room before which a perpetual light burned. This must be Sambari's Maghrabi synagogue. (5) Synagogue of R. Zimrah (David ibn Abi Zimrah). (6) Synagogue of R. Ḥayyim כפוסי (see below). (7) Synagogue of the "Ba'al ha-Nes"; who he was is unknown. (8) Turkish synagogue; very old, and in which various minyanim prayed.

Literary Productions.

Of the literary ability of the Egyptian Jews the old Cairo genizah is continually giving further evidence. The old Bible fragments still to be found there are minutely described by Ibn Safir, *l.c.* pp. 11b *et seq.*; the standard Bible codex of Aaron b. Asher was brought to Egypt and used by Maimonides ("Yad," Sefer Torah, p. 3, end). A codex of the year 1008, written in Egypt, was corrected by means of this standard manuscript (M. xx. 8). Maimonides found there portions of the Gemara which he thought were 500 years old ("Yad," Malweh, xv. 2). Many of the writers and scholars whose names have become famous have already been mentioned. All departments of Jewish literature are represented; but it was especially in poetry of various kinds that they excelled. This was probably due to their intimate personal and literary acquaintance with Arabic authors. Mention may be made here of the dedicatory poem to the nagid Judah (J. Q. R. viii. 556, ix. 360); the "Maḳamah" of the historian Abraham b. Hillel (*ib.* ix. 168), which shows also the influence of the Spanish-Hebrew poets; the involved and extremely well-executed "Tarshish" (Arabic, "Tajnis") of the professional scribe who wrote the letter of the ex-minister of Al-Afḍal (*ib.* ix. 29, x. 430); the verses of Abraham Maimonides, mentioned even by Sambari (S. 134, 16); and the prose with occasional lapses into piyyuṭ, many specimens of which have been found by Schechter. The megillah form was generally used for historical records, either in prose or in poetry; *e.g.*, the Cairo Purim, the Zuṭa, and the Abiathar Megillot (*ib.* xiv. 449). From Egypt have come nearly all the fragments of the Hebrew original of Ben Sirach (Ecclesiasticus). The number of the manuscripts of this text testifies that it was widely read. Many private libraries of large extent must have existed in Egypt—*e.g.*, those of Bezaleel Ashkenazi and David ibn Abi Zimrah; and the fragments of catalogues which have been preserved show the wide scope of the literary interests of the times (Schechter, "Saadyana," p. 78).

The material used for writing was at first papyrus (for an example of the eighth century see Chwolson, "Corpus," p. 121; for a marriage contract of the ninth century see "Führer Durch die Papyr. Erzherzog Rainer," p. 262; see also *ib.* p. 234; "Aegyptische Zeitschrift," xxxiii. 64; "Magazin," vi. 250); later, parchment and paper were employed. The Egyptian Jews wrote in Arabic as frequently as in Hebrew, and wrote well. Sambari's remark to that effect (S. 120, 1) is borne out by recent discoveries. At times they even went so far as to write their Hebrew in Arabic characters; *e.g.*, the Karaite Bible manuscripts described by Hörnle ("British Museum Karaite MSS." London, 1889), and the fragments published by Hirschfeld (J. Q. R. xv. 168). They busied themselves also with Arabic literature, fragments of which have been found written in Hebrew characters (*ib.*).

As regards typography, one Jewish work only is known to bear the imprint "Miẓrayim" (Cairo)—Ḥayyim Vital's ritual book in two volumes, "Ḥok le-Yisrael" (1740). It was edited by Isaac Baruch and published by Abraham Ẓaddiḳ. The establishment in which it was printed was owned by Abraham ben Moses Yatom, whose workmen were Solomon Sachata ben Samuel, Aaron ben Isaac Naḥmias, Israel ben Jacob Ḳimḥi, and Gershon ben Solomon. The book was approved by Nissim Solomon al-Gazi, rabbi at Cairo, and Moses Israel, rabbi at Alexandria.

With the exception of this one work, it is only quite recently that Hebrew books have been printed in Egypt, notably by Faraj Ḥayyim Mizraḥi in Alexandria. He has published the following works:

By Solomon Ḥazzan: ס׳ המעלות לשלמה, a companion to the "Shem ha-Gedolim," dealing with Eastern authors (1894); ס׳ שער הקדים (1895); ס׳ כרוב ממשח (1895); בן שלמה, an alphabetic collection of ritual ordinances (1900). By Elijah Ḥazzan: ס׳ נוה שלום, on the peculiar religious observances and customs of the Alexandrian Jews (1894). By Meborak Berhent of Tripolis: ס׳ הגדה של פסח עם פירוש (1896).

In addition, the following works have been printed in Alexandria:

פרקי אבות, with commentary of David Maimonides (1901).
הגדה (1888); אלתוליד (1887). By Abraham Kestin: תלמוד שפת עברא, "Hebrew Grammar for Arabic-speaking Jews" (1896).
גיא חזיון משל ומליצה (1880).
עבודת התמיד, prayer-book, Egyptian rite.
שפרה דיהוסף.

Liturgy.

The peculiarities in the liturgy and religious observances of the Egyptian Jews have been indicated by Zunz ("Ritus," p. 55), and for Alexandria they have been explained at length by Elijah Ḥazzan in his "Neweh Shalom" (Alexandria, 1894); see also Ibn Safir, pp. 10 *et seq.* In the Siddur of Saadia there is given probably the earliest form of the Egyptian order of service (see the account by Steinschneider in "Cat. Bodl." col. 2203, and B. A. § 62); but it seems doubtful if this order was observed for any length of time. Maimonides found little occasion to make changes; though his decisions in such matters became authoritative for the greater part of the East. As the Palestinians and Babylonians had their own synagogues, so they preserved some of their peculiar customs; *e.g.*, the Babylonians preserved the yearly cycle in the Reading of the Law; the Palestinians, the triennial—an arrangement not touched by Maimonides ("Yad," Tefillah, xiii. 1), and of which Abraham Maimonides complains (J. Q. R. v. 420; M. xli. 464; Benjamin of Tudela, p. 98; S. 118, 25). The buying of certain mizwot was a hereditary privilege. The "Kol Nidre" prayer was not recited in Cairo (Geiger's "Zeitschr." ii. 254; M. xli. 464). On special occasions, when more than seven were called to the Law on a Sabbath, certain portions were repeated. On week-days the Sabbath portion was read, but without the Hafṭarah (Samuel b. David, ed. Gurland, p. 6). According to Conforte (*l.c.* p. 14a), David Maimonides' Midrashot to the Torah were read in some of the Egyptian congregations every Sabbath.

Some Egyptian liturgical texts have been found in the Cairo genizah, and their peculiarities noted by Schechter (J. Q. R. x. 654). From these, fragments of the Passover Haggadah have been published by I. Abrahams (*ib.* p. 41), in which the repeated reference to the "Memra" or "Logos" discloses peculiar Egyptian traits. The first attempts to illustrate the Haggadah are also found in the genizah fragments (Kaufmann, *ib.* p. 381). Peculiarities in connection with the rite of circumcision are described in the letter of Moses b. Elijah (ed. Gurland, p. 35); but it is not said whether these are Karaitic. It was customary in Egypt to put a reference to the ritual bath ("miḳweh") in the ketubbah, a point upon which Maimonides, having the Karaite system in view, insisted with rigor ("Teshubot," No. 116); also to insert a promise from the man that he would not marry an additional wife (ketubbah of 1396; MS. Cambridge Add. No. 3124; compare חש"בין, i. 94). It was also customary to carry the dead to Palestine for burial (Abi Zimrah, Responsa, §§ 611, 741). According to Ibn Safir (p. 11b), in every synagogue in Cairo there is a small cupboard (called also היכל) in which an old copy of the Bible in book-form, or portions of it, is kept, and before which a light is kept burning (see above).

G.

EḤAD MI YODEA' ("One; who knows?"): Initial words of a Hebrew nursery-rime which, with Ḥad Gadya, is recited at the close of the Seder on Passover eve. It consists of thirteen numbers, and was probably recited originally as a dialogue, if not in chorus.

Question: "One—who knows?" *Answer*: "One—I know: One is our God in heaven and on earth."

Question: "Two—who knows?" *Answer*: "Two—I know: the two tables of the Covenant." *Chorus*: "One is our God in heaven and on earth."

Question: "Three—who knows?" *Answer*: "Three—I know: the three patriarchs." *Chorus*: "Two tables of the Covenant, One is our God in heaven and on earth."

Question: "Four—who knows?" *Answer*: "Four—I know: the four mothers in Israel." *Chorus*: "Three patriarchs, Two tables of the Covenant, One is our God in heaven and on earth."

Question: "Five—who knows?" *Answer*: "Five—I know: the five books of Moses." *Chorus*: "Four mothers in Israel, Three . . . ."

Question: "Six—who knows?" *Answer*: "Six—I know: the six books of the Mishnah." *Chorus*: "Five books of Moses, Four . . . ."

Question: "Seven—who knows?" *Answer*: "Seven—I know: the seven days of the week." *Chorus*: "Six books of the Mishnah, Five . . . ."

Question: "Eight—who knows?" *Answer*: "Eight—I know: the eight days of circumcision." *Chorus*: "Seven days of the week, Six . . . ."

Question: "Nine—who knows?" *Answer*: "Nine—I know: the nine months of child-bearing." *Chorus*: "Eight days of circumcision, Seven . . . ."

Question: "Ten—who knows?" *Answer*: "Ten—I know: the Ten Commandments." *Chorus*: "Nine months of child-bearing, Eight . . . ."

Question: "Eleven—who knows?" *Answer*: "Eleven—I know: the eleven stars" (in Joseph's dream: Gen. xxxvii. 9). *Chorus*: "Ten Commandments, Nine . . . ."

Question: "Twelve—who knows?" *Answer*: "Twelve—I know: the Twelve Tribes of Israel." *Chorus*: "Eleven stars, Ten . . . ."

Question: "Thirteen—who knows?" *Answer*: "Thirteen—I know: the thirteen attributes of God" (Ex. xxxiv. 6-7). *Chorus*: "Twelve Tribes of Israel, Eleven . . . ."

This song, stated by Zunz in "G. V." p. 133 to occur only in German Pesaḥ haggadahs since the fifteenth century, was later found by Zunz himself in the Avignon ritual as a festal table-song for holy-days in general ("Allg. Zeitung des Judenthums," iii. 469). The theory, therefore, advanced by Zunz, and worked out in detail by Perles ("Grätz Jubelschrift," 1887, pp. 37 *et seq.*; Brüll's "Jahrb." iv. 97 *et seq.*), that it is an adaptation of a German folk-song, must be revised, notwithstanding the striking parallels brought by the former from Simrock's "Die Deutschen Volkslieder" (1851, p. 520), where it is shown that what was originally a peasants' drinking-song was adapted by monks, and the numbers (one to twelve successively) declared to signify: one, the Lord God who lives in heaven and earth; two, the tablets of Moses; three, the Patriarchs; four, the Evangelists; five, the wounds of Jesus; six, the jugs of wine at the wedding of Cana; seven, the sacraments; eight, the beatitudes; nine, the choruses of angels; ten, the Ten Commandments; eleven, the eleven thousand virgins; twelve, the twelve Apostles. Other German parallels are given in L. Geiger's "Zeitschrift für die Geschichte der Juden in Deutschland," iii. 93, 234 (note), 238; while Sander ("Das Volksleben der Neugriechen," 1844, p. 328) has compared an old Greek Church song; Kohler, in Geiger, "Zeitschr." *l.c.* p. 239, an English Church song; and Green, in "The Revised Hagada," p. 98, London, 1897, a Scotch nursery-rime.

A peculiar feature of Eḥad Mi Yodea' is that it proceeds to the unlucky number thirteen (see "D. M. L. Z." xxix. p. 634, note), and stops there as if to make the Jew feel that with him thirteen (= אחד) is a holy, and therefore lucky, number. The origin of the numerical folk- or riddle-song has been traced by Kohler (*l.c.*) to ancient Oriental sources (comp. Cosquin, "Contes de Lorraine," 1876).

K.

EHRENKRANZ, BENJAMIN WOLF (also known as **Zbarazer**): Galician Yiddish poet; born in Zbaraz, Galicia, about 1812; died about 1882. He spent many years in Rumania and southern Russia, wandering from place to place, and singing his songs, sometimes extemporaneously composed, in cafés and similar resorts. Some of his poems were written down by his hearers, and given to him for revision when he was in better condition for such literary work. He was a real folk-poet, and his songs are still sung by the Jewish masses of Galicia and southern Russia. Some of them are reproduced in Dalman's "Jüdisch-Deutsche Volkslieder aus Galizien und Russland," pp. 29–42, 2d ed., Berlin, 1891.

His first published poem, written in Hebrew and based on a Talmudical parable, appeared in "Kokebe Yiẓḥaḳ," xii. 102–103, Vienna, 1848. His next work, "Ḥazon la-Mo'ed," a satire on the Ḥasidim and their rabbis, is also in Hebrew (Jassy, 1855). His Yiddish songs were published with a Hebrew translation in four parts, under the collective name "Makḳel No'am" (Vienna, 1865, and Lemberg, 1869–78). A new edition in Roman characters appeared in Braila, Rumania, 1902 (see "Ha-Meliẓ," v. 42, No. 125). His "Makḳel Ḥobelim" (1869) and "Sifte Yeshenah" (1874) appeared in Przemysl.

Bibliography: L. Wiener, *History of Yiddish Literature in the Nineteenth Century*, pp. 77–80; *Ha-Shaḥar*, ii. 204–206; v. 367, 368.

EHRENREICH, MOSES LEVI: Italian rabbi; born at Brody, Galicia, 1818; died at Rome Dec. 27, 1899. Having graduated from the gymnasium of his native city, Ehrenreich, attracted by the reputation of Samuel David Luzzatto, went to Padua to study at the Istituto Rabbinico, where he received the rabbinical diploma (May 10, 1845). He immediately began teaching at Göritz, where he became friendly with Isaac Reggio, whose daughter Helena he married later on. After a short stay at Triest, he became rabbi at Modena, and in 1861 rabbi at Casale, Piedmont. In 1871 he was teacher in the families of Guastalla and Malvano at Turin, and in 1882 he was called to the principalship of the Talmud Torah in Rome, shortly afterward becoming chief rabbi of the Italian capital. It was through his efforts and under his direction that the Collegio Rabbinico Italiano was reopened in 1887. In 1894 the infirmities of old age compelled his retirement from the rabbinate.

His chief literary work consisted of the part he took the translation of the Bible into Italian under the direction of Luzzatto, for which he translated Hosea, Micah, Daniel, Ezra, and Nehemiah. He also wrote a biography of his father-in-law, Isaac Reggio. He was a member of the committee of the society of Meḳiẓe Nirdamim from its reestablishment in 1885.

Bibliography: *Allg. Zeit. des Jud.* 1900, p. 20; *Vessillo Israelitico*, 1900, p. 23.

s. I. E.

EHRENTHEIL, MORITZ: Hungarian educator and writer; born at Szilágy-Nagyfalu in 1825; died at Budapest Dec. 27, 1894. After teaching in various cities, he established himself in Budapest (1857), and devoted his time to literary work.

His published works are: a Hungarian grammar, written under the pseudonym "Erényi Mór"; "Kleine Deutsche Sprachlehre," Budapest, 1865; "Jüdische Charakterbilder," Sâros-Patak, 1866; a Hebrew-Hungarian dictionary to the five books of Moses, Sâros-Patak, 1868; "Jüdisches Familienbuch," Budapest, 1888; "Der Geist des Talmud," *ib.* 1888; "Rezeption und Orthodoxie," *ib.* 1892. He also edited the magazines "Jüdische Volksschule" (Arad) and "Das Traditionelle Judenthum" (Budapest), the latter under the pseudonym "Dr. Freund."

Bibliography: Petrik, *Könyvészet*; Kiss Árón, *Magyar Népiskolai Tanitás Története*, p. 322.

s. L. V.

EHRLICH, ADOLPH (ABRAHAM ABELE): Russian educator and rabbi; born in Mitau, Courland, Sept. 20, 1837. In 1858 he became teacher of the Hebrew language and religion at the Jewish government school in Friedrichstadt, Courland. In 1861 he studied at Berlin under Michael Sachs, who employed him as teacher for his children. He spent three years at Berlin University, and in 1868 received his degree of Ph.D. from Halle.

He then taught at the Religionsschule in Berlin until 1870, when he became rabbi of Neudenberg, East Prussia; eighteen months later he returned to his old post in Berlin; in 1872 he was elected government rabbi of Riga, but the election was not confirmed; and in 1876 he was placed by the Russian government at the head of the Jewish school in Riga. This position he held for about twenty years. Ehrlich is now (1903) rabbi of Tilsit, Prussia.

Ehrlich has written: "De Judicio ab Aristotele de Republica Platonica," Berlin, 1872; "Vaterland und Landesvater," three sermons, St. Petersburg, 1883; "Le-Regel ha-Yeladim," a Hebrew primer, Wilna, 1883; and "Entwickelungsgeschichte der Jüdischen Gemeindeschule zu Riga, ein Beitrag zur Culturgeschichte," St. Petersburg, 1894. He has also written critical notes to the "Be'er Mikael" of his teacher, Michael Sachs.

Bibliography: *Sefer Zikkaron*, pp. 81–82, Warsaw, 1891.

H. R. P. Wi.

EHRLICH, ARNOLD: Bible critic; born in Volodovka, near Brest-Litovsk, Russia, Jan. 15, 1848. Educated at the universities of Leipsic and Berlin, he later became assistant librarian of Oriental books in the Royal Library in Berlin. In 1878 he emigrated to the United States, settling in New York city, where he still (1903) resides.

Since 1898 Ehrlich has devoted practically his entire time to his commentary on the Hebrew Bible, entitled "Miḳra ki-Peshuṭo." The first volume, on the Pentateuch, appeared in Berlin in 1899; the second, on the prose books (including Ruth, but not Esther), has the subtitle "Dibre Soferim" (*ib.* 1900); the third, entitled "Dibre Nebuah" (*ib.* 1901), includes all the Prophets; and the fourth and last volume, on the poetical works of the Old Testament, is in course of preparation.

Bibliography: W. Frankenberg, in *Göttingische Gelehrte Anzeigen*, v. 162, 333–338; *Hebrew Standard*, May 9, 1902; *Ha-Maggid*, 1901, Nos. 23–26; *Ha-Shiloaḥ*, v. 546–552.

H. R. P. Wi.

EHRLICH, HEINRICH: German composer, pianist, and musical critic; born at Vienna Oct. 5, 1822; died Dec. 20, 1899. He began his musical career at Bucharest and Jassy, and for some years was court pianist to George V. of Hanover. From 1855 to 1862 he lived successively at Wiesbaden, in England, and at Frankfort-on-the-Main. Thence he removed to Berlin, where he became teacher of piano at the Stern Conservatorium, and musical critic on the "Tageblatt," the "Gegenwart," and the "Neue Berliner Musikzeitung." In 1875 the title of professor was conferred upon him.

Among Ehrlich's noteworthy compositions are

"Konzertstück in Ungarischer Weise," "Variationen über ein Originalthema," and a sonata for violoncello. He was one of the foremost writers on music; his chief work in this line includes the text-books "Der Musikalische Anschlag," "Wie Uebt Man Klavier?" "Musikstudien beim Klavierspiel," "Die Ornamentik in Beethoven's Sonaten," "Die Ornamentik in Sebastian Bach's Klavierwerken," and the works "Schlaglichter und Schlagschatten aus der Musikwelt," "Aus Allen Tonarten," "Lebenskunst und Künstlerleben," "Modernes Musikleben," "Dreissig Jahre Künstlerleben." He wrote besides many novels and stories. His autobiography was published posthumously in the "Berliner Musik- und Theater-Welt" (vol. iii., Nos. 21, 22) by Ad. Kohut, who also published the letters addressed to Ehrlich by Hector Berlioz, Robert Frank, Clara Schumann, and others. Ehrlich embraced Christianity in middle life.

S. A. Ko.

EHRLICH, MESHULLAM: Polish philologist; born at Lublin 1818; died at Paris 1861. He was one of the leading Talmudic scholars of his time, as well as a master of Oriental and modern languages. His numerous works all remain in manuscript, with the exception of one containing researches in the field of Hebrew philology, published under the title "Ḥeker Millim u-Sefat Ḳodesh," Paris, 1868.

H. R. M. R.

EHRLICH, PAUL: German physician; born at Strehlen, Prussian Silesia, March 14, 1854. He studied medicine at the universities of Breslau, Freiburg-in-Baden, Leipsic, and Strasburg, being graduated from the last-named in 1878. After holding some minor appointments, he became privat-docent at Berlin University in 1887, and in 1890 assistant professor and assistant to Koch in the laboratory for infectious diseases. In 1896 he was appointed director of the laboratory for serum examination (Institut für Serumforschung und Serumprüfung) at Steglitz, near Berlin; and when in 1899 this laboratory was transferred to Frankfort-on-the-Main, Ehrlich became its director, resigning his university position. Ehrlich is the author of various essays and treatises relating to his profession.

EHRMANN, DANIEL: Austrian rabbi; born at Muttersdorf, Bohemia, in 1816; died at Brünn Nov. 15, 1882. After studying at Budapest and Prague, he became rabbi and preacher at Kuttenplan and Dürrmaul in 1843; and a year later succeeded Abraham Kohn in Hohenems. He was rabbi at Böhmisch-Leipa from 1852 to 1860, when he resigned his office and, removing to Prague, engaged in the book business. In Prague and Brünn he edited for many years the Jewish periodical "Das Abendland." In 1867 he was called as teacher of religion to Brünn, where he remained until his death. Ehrmann's works include: "Betrachtungen über Jüdische Verhältnisse" (Budapest, 1841); "Gebete für Israelitische Frauenzimmer" (Prague, 1845); "Beiträge zu einer Geschichte der Schulen und der Kultur Unter den Juden" (Prague, 1846); "Geschichte der Israeliten von den Urältesten Zeiten bis auf die Gegenwart," 2 vols. (Brünn, 1869; 2d ed., 1871); "Aus Palästina und Babylon: Eine Sammlung von Sagen, Legenden, Allegorien, Fabeln, Erzählungen, Gleichnissen, u. s. w. aus Talmud und Midrash" (Vienna, 1880). He also wrote a story, "Die Tante"; and contributed to the "Orient," "Kokebe Yiẓḥaḳ," and other periodicals.

S. M. K.

EHUD.—Biblical Data: Second judge of Israel; a Benjamite, the son of Gera. Concealing under his garment a two-edged sword, he carried a present to Eglon, the Moabite king who had held Israel in subjection for eighteen years. After delivering it he requested a private audience, which was granted. Being left-handed, Ehud was able to draw his weapon without suspicion, and he plunged it through the body of the king, who was too surprised and too corpulent to resist. Ehud made his escape to Seirath, and gathering an Israelitish army, slew the whole Moabite forces numbering 10,000 men (Judges iii. 14-30). See EGLON.

J. JR. C. J. M.

——**Critical View:** The story of Ehud was taken from one of the oldest sources of the Book of Judges, into which it had possibly been put after having passed from mouth to mouth as a folk-tale. The beginning of the tale has been displaced by the pragmatic introduction of the author of Judges (compare Moore, Commentary on Judges, pp. 89 *et seq.*; "Judges," in "S. B. O. T." pp. 6 *et seq.*; and Budde, "Die Bücher Richter und Samuel," etc., p. 28). The author of Judges has taken the narrative of a local incident and transformed it into a deliverance of all Israel. The story is not quite homogeneous, but is not so composite as Winckler ("Untersuchungen zur Altorientalischen Geschichte," pp. 55 *et seq.*) believed. Recent critics accept Ehud as a historical character. In addition to references above, compare Budde, *ib.* pp. 98 *et seq.*

J. JR. G. A. B.

EIBENSCHÜTZ, ALBERT: German pianist; born in Berlin April 15, 1857; studied pianoforte under Reinecke and composition under Paul at the Leipsic Conservatorium. He was professor at the musical institute at Kharkof, Russia, until 1880, and then teacher at the Royal Conservatorium at Leipsic until 1883, when he accepted a professorship at the Cologne Conservatorium. In 1893 he became director of the Cologne Liederkranz, and in 1896 first professor of piano at the Stern Conservatorium in Berlin. Two years later he became the owner and director of the Conservatorium at Wiesbaden.

As a pianist Eibenschütz is distinguished by a brilliant technique, richness of tone, and remarkable delicacy and precision of touch.

S. J. So.

EIBENSCHÜTZ, DAVID SOLOMON: Russian rabbi and author; died in Safed, Palestine, 1812. He was a pupil of Rabbi Moses Ẓebi Heller, author of "Geon Ẓebi," and occupied the position of rabbi in Buzhanow, Soroki (Volhynia), and Jassy, (Rumania). From the last-named city he went to Palestine and remained there till his death. He was the author of many cabalistic and Talmudical works, which still exist in manuscript. He also wrote "Lebushe Serad," in two parts. The first part contains a commentary on the Shulḥan 'Aruk, Oraḥ Ḥayyim, with comments on David b. Samuel's "Ṭure Zahab" and Abraham Abele Gumbinner's "Magen Abraham"; at the end of this part is added the plan of the Temple as described by Ezekiel (Mohilev, 1818, and frequently). The second part is on Shulḥan 'Aruk, Yoreh De'ah (Mohilev, 1812). His "Ne'ot Deshe" is a compilation of 138 responsa, in two parts, the first of which was published in Lemberg, 1861, while the second is in manuscript. "'Arbe Naḥal" is also in two parts. the first being a treatise on the Pentateuch, the second consisting of sermons (Kopust, Sdilkov, 1835; Krotoschin, 1840; Jitomir, 1850; Lemberg, 1856).

L. G. N. T. L.

EIBENSCHÜTZ, ILONA: Hungarian pianist; born at Budapest May 8, 1872. She received her first instruction in music from her cousin Albert Eibenschütz; Liszt is said to have played at a concert with her when she was only five years old. She later studied with Carl Marek, and from 1878 to 1885 at the Leipsic Conservatorium under Hans Schmitt. At her début in Vienna her remarkable playing created a sensation. After attaining her twelfth year she annually made a concert tour through Germany, Austria, France, Russia, Denmark, Norway, and Sweden; playing before the Queen of Denmark at Copenhagen, before the Czar and Czarina of Russia at the Gatschina Palace, and before the Emperor of Austria at Vienna, by whom she was granted an imperial stipend for five years.

From 1885 till 1890 she was taught by Clara Schumann, and then resumed her concert tours, playing with great success in London.

EIBENSCHÜTZ, JONATHAN. See Eybeschütz, Jonathan.

EIBESCHÜTZ, SIMON AARON: Danish philanthropist; born Nov. 14, 1786 in Copenhagen; died there Nov. 25, 1856. He left a fortune amounting to about 1,700,000 Danish crowns; a part of the income was to go to his nearest relatives, provided they continued in the Jewish faith, but by far the greater part was to go to Jewish and municipal institutions. The income of the sum bequeathed to the Copenhagen University Library was to be devoted to the purchase of Hebrew and Oriental works. Equal sums were bequeathed to the Polytechnic Institute and to the Academy of Arts in Copenhagen, on condition that they receive without compensation two Jewish youths annually, and that the Academy of Arts employ the income of its share to establish a prize for a work of art, the subject of which must be derived from the Old Testament.

EICHBERG, JULIA. See Rosewald, Julia Eichberg.

EICHBERG, JULIUS: Violinist, director of music, and composer; born in Düsseldorf, Germany, June 13, 1824; died at Boston, Mass., Jan. 18, 1893. In his youth he had the benefit of the best musical instructors in his native town and at Mayence, and he became a favorite of Reitz and Mendelssohn. He also studied at the Conservatoire in Brussels, and upon his graduation received the first prize for violin playing and composition. Soon afterward he became the director of an opera troupe at Geneva, Switzerland, where he remained for eleven years.

In 1857 Eichberg went to New York, and two years later removed to Boston, where he was engaged as director of music at the Museum. At this time he wrote the operetta "The Doctor of Alcantara," which had a favorable reception, and is even now frequently played in America. His other compositions include the operettas "The Rose of Tyrol," "The Two Cadis," and "A Night in Rome," besides trios and quartets for strings, violin pieces, and songs.

After serving seven years as conductor of the orchestra at the Boston Museum he established the Boston Conservatory of Music, and about the same time was appointed general supervisor and director of music in the high schools of the city.

EICHBERG, PAULINE. See Weiller, Pauline Eichberg.

EICHENBAUM, JACOB: Russian educator, poet, and mathematician; one of the pioneers of modern education among the Russian Jews; born in Krasnopolie, Galicia, Oct. 12, 1796; died at Kiev Dec. 27, 1861. He showed extraordinary ability in Hebrew and mathematical studies, in which latter he was assisted by his father, Moses Gelber.

In 1815 Eichenbaum settled in Zamoscz, Russian Poland, in which city there was a circle of progressive Jewish youths who were followers of the "Berlin culture." Here he gave himself up to his favorite work, occupying himself with the rational interpretation of the Bible, and with the study of Hebrew, German, philosophy, and mathematics, especially the last-named. In 1819 he translated for his own use Euclid's "Elements" from German into Hebrew. Jacob, who had assumed the family name of "Eichenbaum," soon entered on a period of wandering and of hard struggle for his daily bread. He became a private tutor, and lived in different towns of southern Russia, teaching Hebrew subjects and mathematics in the houses of wealthy people. In 1835 at Odessa, which was then the educational center of the south-Russian Jews, he opened a private school for Jewish children on the lines of the German-Jewish schools. In 1836 he published at Leipsic, under the title "Ḳol Zimrah," a series of Hebrew poems. This little book was one of the first productions of Neo-Hebrew poetry which received its inspiration from Mendelssohn's school.

The verse-making talent of Eichenbaum is strikingly evidenced in his "Ha-Ḳerab," London, 1840, in which are described the moves in the game of chess. Joseph (Ossip) Rabbinovicz translated this poem into Russian verse (Odessa, 1847; 2d ed., *ib.* 1874).

In the course of a few years the pedagogic and literary labors of Eichenbaum attracted the attention of the Russian government, which in 1844 appointed him overseer of the Russo-Jewish school in Kishinev, and six years later chief inspector of the new rabbinical school opened by the Russian government in Jitomir (1850). He retained this position until his death.

In the later years of his life he published a textbook of arithmetic in Hebrew, "Ḥokmat ha-Shi'urim," Warsaw, 1857, and an allegorical poem, "Ha-Ḳosem," in "Ha-Meliẓ," 1861 (also in book form, Odessa, 1862).

H. R. S. M. D.

EICHHORN, JOHANN GOTTFRIED: Orientalist and Biblical scholar; born at Dörrenzimmern, in the principality of Hohenlohe-Oehringen, Oct. 16, 1752; died at Göttingen June 27, 1827. After studying theology and Oriental languages under Johann David Michaelis at the University of Göttingen, he was appointed professor of Oriental languages at Jena in 1775. Later (1788) he became professor of philosophy at Göttingen. After Michaelis' death (1794) he succeeded his former teacher as professor of Old Testament literature. This post he occupied until his death.

The diversity of Eichhorn's studies and labors is remarkable, but his lasting merit lies in the field of Old Testament research. His "Einleitung in das Alte Testament" (3 vols., Leipsic, 1780-82) marks an epoch in the study of the Bible. Accepting the theories advanced by Herder, Eichhorn attempts to give a just appreciation of the poetry and religion found in Hebrew literature. His work, which passed through four editions and was often reprinted, combines vividness of exposition with great scholarship, although the criticism is often immature, and is directed more to an esthetic enjoyment than to a real solution of the difficulties. Eichhorn's second great work is "Die Hebräischen Propheten" (3 vols., 1816-1819), a poetical translation, with a short exposition, of the prophetic literature, arranged in chronological order. Here for the first time an important and suggestive problem was seriously dealt with, although it was not solved. In 1777-86 Eichhorn published a "Repertorium für Biblische und Morgenländische Litteratur," and in 1787-1803 appeared his "Allgemeine Bibliothek der Biblischen Litteratur."

J. K. H. C.

EICHTHAL, GUSTAVE D': French publicist and Hellenist; born at Nancy March 22, 1804; died at Paris April 9, 1882. At the age of thirteen he became a convert to Roman Catholicism, and when he left the Lycée Henri IV. in 1822, he became a disciple of Auguste Comte, who initiated him into the doctrines of Saint-Simon, to the propagation of which he devoted a part of his fortune.

In 1832 D'Eichthal went to Greece, and on his return to Paris in 1836 published "Les Deux Mondes," containing his reflections on the Orient. He now began to advocate the use of Greek as a universal language, and published many works, among which were: "Les Trois Grands Peuples Méditerranéens et le Christianisme," Paris, 1864; "Origines Bouddhiques de la Civilisation Américaine," in the "Revue Archéologique," Sept., 1864, and April, 1865; and "Texte Primitif du Premier Récit de la Création," Paris, 1875; reprinted after his death under the title "Mélanges de Critique Biblique."

D'Eichthal was one of the chief founders (1881) of L'Association pour l'Encouragement des Etudes Grecques. After his death his son published his "La Langue Grecque," Paris, 1887.

EIDLITZ, MOSES ZARAH: Austrian Talmudist; born before 1725; died May 17, 1786, at Prague. Following the custom of the time, he conducted a Talmud school in his dwelling, and, besides teaching his pupils gratuitously, he aided them with his small means to such an extent that he impoverished himself. Nevertheless, he continued to pay the same Jew-tax that had been apportioned to him in his better days. Only when he was actually unable to pay the sum did he bend to the entreaties of his friends and state his case to the "primator," Israel Frankl. Eidlitz, however, refused the roll of ducats that the latter sent him. Frankl, desiring to force the modest rabbi to accept the money, declared that he could not remit the tax if Eidlitz was rich enough to refuse such a sum of money, and the rabbi was finally forced to yield. After his death the roll of ducats was found among his few possessions, with a note requesting his family to restore the money to its original owner, Frankl.

Eidlitz wrote מלאכת החשבון, a manual of arithmetic in Hebrew, Prague, 1775; and אור לישרים, haggadic discourses, *ib.* 1785.

EIGHTEEN BENEDICTIONS. See SHEMONEH 'ESREH.

EILENBURG, ISSACHAR BAER BEN ISRAEL LEYSER: Polish rabbi; born in Posen about 1570; died in Austerlitz, Moravia, in 1623. His father gave him a thorough training in the Talmud. From Posen Eilenburg went to Prague and entered the yeshibah of Rabbi Liva. After studying there for a few years, he returned to Posen and continued his studies in the yeshibah of Rabbi Mordecai Jafe.

About 1600 Eilenburg became rabbi of the city and district of Göritz, and about 1620 rabbi of Austerlitz, Moravia.

Eilenburg's works are: "Be'er Sheba'," commentaries on the treatises of the Talmud upon which there are no tosafot (Venice, 1614). This work is divided into seven parts, namely: (1) "Ner Miẓwah," on

Horayot; (2) "Ner Tamid," on Tamid; (3) "Ner Adonai," on the first and last chapters of Keritot; (4) "Ner Elohim," on two chapters of Soṭah; (5) "Ner Yisrael," on the last chapter of Sanhedrin; (6) "Ner Hora'ah," on parts of Ḥullin; (7) "Ner Torah," novellæ and responsa. Eilenburg also wrote "Ẓedah la-Derek," supercommentary on Rashi to the Pentateuch (Prague, 1623–24).

L. G. B. FR.

EINBECK: Town in the province of Hanover, Prussia. That Jews lived there at a very early date is shown by the fact that some Einbeck Jews were burned at the stake in 1298. In a document of 1355 a Jews' street and a "schole der Joden" are mentioned, and an "old Jewish cemetery" is referred to in a document dated 1454. An old and mutilated tombstone still exists to record the interment of a Jewess in the year 5160 (= 1400). It appears from an assignment of Duke Erich of Brunswick to his wife Ilse (Elizabeth), dated July 14, 1405, and from a letter of Duke Philipp to his brother Ernst, dated 1562, that the Jews of Einbeck paid a yearly tax which formed part of the revenues of the castle of Grubenhagen. When the dukes Wolfgang and Philipp of Grubenhagen forbade all Jews not under their protection to pass through the principality, the envoys of the "Gemeine Jüdischheit" petitioned Emperor Maximilian (Feb. 25, 1570), who annulled their decree. A few years later, in 1579, when the fanatic Magister Johann Velius, pastor of the Jacobi- or Marktkirche at Einbeck, raised a storm of public feeling against the Jews of the town, the latter were expelled. They reappeared, however, after the Thirty Years' war.

In 1718 the elector Georg Ludwig of Hanover was forced to restrict the influx of Jews in the interest of the Christian merchants. During the French supremacy (1806–13) the district contained forty Jewish families, nine of which lived at Einbeck. On Aug. 31, 1896, a new synagogue was dedicated by Dr. Lewinsky, to which the banker Bernhard Meyersfeld of Brunswick, a native of Einbeck, contributed 20,000 marks. In 1902 the community of Einbeck included 110 persons.

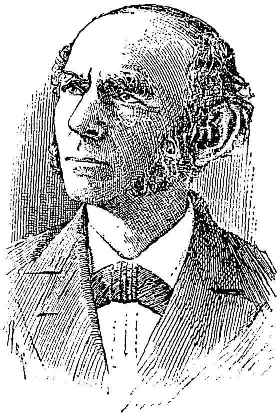
D. A. LEW.

EINHORN, DAVID: German rabbi, preacher, and theological writer; leader of the Reform movement in America; born at Dispeck, Bavaria, Nov. 10, 1809; died in New York Nov. 2, 1879. A disciple of R. Wolf Hamburger and R. Joshua Moses Falkenau in Fürth, he received the Morenu title in his seventeenth year, and pursued his philosophical studies in Würzburg and Munich. When the congregation of Wellhausen near Uffenheim elected him rabbi in 1838, the Bavarian government would not confirm the election on account of his liberal views. In 1842 he became rabbi of Hoppstädten and chief rabbi of the principality of Birkenfeld. Though he advocated Reform as represented by Geiger (see "Rabbinische Gutachten über die Verträglichkeit der Freien Forschung mit dem Rabbineramte," pp. 125–139, Breslau, 1842), he strenuously opposed the radical tendencies of the Reformverein in Frankfort-on-the-Main, which, as he wrote, "instead of regenerating Judaism upon a historical basis and with full recognition of Israel's priestly character and Messianic mission, desired to create a schism in Judaism under the pretext of Reform, denying the very essentials of the Jewish faith" ("Allg. Zeit. des Jud." Dec. 5, 1844).



David Einhorn.

His Principles.

At the rabbinical conference at Frankfort in 1845, Einhorn pleaded against Z. Frankel in favor of the vernacular in the liturgy and the elimination of all prayers referring to the restoration of the Jewish state and Temple, but insisted on the accentuation of the universal character of the Messianic hope. At the Breslau conference in 1846, he was appointed chairman of the committee on the dietary laws (see DIETARY LAWS). In 1847 Einhorn succeeded Holdheim as chief rabbi of Mecklenburg-Schwerin. In the same year he was charged with heresy by Franz DELITZSCH, then professor at Rostock, for having pronounced the blessing over an uncircumcised Jewish child in the synagogue; but he refuted the charge by referring to rabbinical authorities who declared that the child of Jewish parents is entitled to all Jewish rights and privileges (see "Sinai," Nov., 1857 *et seq.*; L. Donath, "Geschichte der Juden in Mecklenburg," pp. 237–244, Leipsic, 1874; and CIRCUMCISION).

Opposed by the Conservatives, Einhorn found his position becoming perilous under a reactionary government, and he accepted a call as rabbi of the Reform congregation at Budapest in Oct., 1852. But the Austrian government also was opposed to the Reform movement, and, despite the protestations and personal entreaties of Einhorn, the temple was, after a brief period, ordered closed.

Einhorn in America.

Einhorn determined to continue his career in America. In 1855 he became rabbi of the Har Sinai Congregation of Baltimore, and was soon the leader of the radical Reform element, issuing a protest against Wise, Lilienthal, and Cohn, who, under the title "American Sanhedrin," had, at a rabbinical conference held in Cleveland, declared "the Talmud to be the only legally binding interpretation of the Bible," and endeavored to organize an American synod on that principle. Soon afterward he started, in the interest of radical Reform Judaism, a monthly magazine in German under the name of "Sinai." In 1858 his prayer-book, "Olat Tamid," appeared; it was at once recognized as the standard Reform liturgy in America. Afterward its principal contents were, though in a somewhat altered form, embodied in the Union Prayer-book (see Reform Judaism).

Opposes Slavery.

A man of resolute character and well-defined principles, Einhorn impressed friends and antagonists alike by his consistency and courage. When the Civil war broke out in 1861, he denounced the defenders of slavery so unsparingly that to stay in Baltimore became dangerous in the extreme. The mob threatened his life, and he fled on the night of April 22, 1861, guarded by friends, to Philadelphia, where he became rabbi of the Congregation Keneseth Israel. Philadelphia had hitherto been the bulwark of conservative Judaism; Einhorn, from his pulpit and in his periodical "Sinai," which he continued until 1863, fought for more liberal views.

In August, 1866, Einhorn became rabbi of the Adath Yeshurun congregation in New York. Here he worked, in common with Dr. Samuel Adler, rabbi of Temple Emanu-El, and with his successor in Philadelphia, Dr. Samuel Hirsch, for the propagation and better comprehension of the views and aims of Reform Judaism. In 1869 a rabbinical conference was held in Philadelphia, at which he was the leading spirit (see Conferences, Rabbinical).

At the approach of his seventieth year he resolved to retire; his farewell sermon was delivered on July 12, 1879. In 1844 Einhorn had married Julia Ochs of Kreuznach, and of this union were born five daughters and four sons, the third daughter marrying Dr. K. Kohler, and the fourth Dr. Emil G. Hirsch.

Einhorn wrote: "Princip des Mosaismus und Dessen Verhältniss zum Heidenthum und Rabbinischen Judenthum," Leipsic, 1854 (written in Budapest; one volume only completed); "Ner Tamid," a religious catechism in German, stating concisely the fundamental principles of Reform Judaism; and many controversial articles on the religious questions of the time in "Allg. Zeit. des Jud.," "Israelit des XIX. Jahrhunderts" (1842–46), "Sinai," and "Jewish Times."

Bibliography: H. S. Morais, *Eminent Israelites of the Nineteenth Century*, pp. 66–71, Philadelphia, 1880; *David Einhorn's Ausgewählte Predigten und Reden*. ed. Dr. K. Kohler, New York, 1880; *Der Zeitgeist*, Nos. 1 and 2, Milwaukee, 1880; *American Israelite*, Supplement, Nov., 1879; *Publications Am. Jew. Hist. Soc.* v. 147–151.

A. K.

EINHORN, IGNATZ (EDUARD HORN): Hungarian preacher and political economist; born at Vágh-Ujhely Sept. 25, 1825; died at Budapest Nov. 2, 1875. He was educated at the Talmud schools at Neutra, Presburg, and Prague, and at the University of Budapest. In the last-named city he began his journalistic career, contributing to the "Pester Zeitung," the "Allgemeine Zeitung des Judenthums," and "Der Orient."

In 1847 he began to preach in the temple of the new community of Alt-Ofen, and he also edited the first Judæo-Hungarian year-book. A year later appeared his "Zur Judenfrage in Ungarn," Alt-Ofen, 1848. In April, 1848, he founded at Budapest the weekly "Der Ungarische Israelit," which gave the first impulse toward the formation of the Reform congregation there. Einhorn became the first preacher of this new congregation.

In religion as in politics Einhorn was a decided liberal. He took part in the Hungarian struggle for liberty, first as a revolutionary speaker at Budapest, and then as an army chaplain at Komorn, a position to which he had been appointed by General Klapka. After the capitulation of Vilagos he returned home; but not feeling secure there, he went to Vienna and then to Prague. Still pursued by the police, he finally went to Leipsic (March, 1850), where he remained for two years. There he published under the pseudonym of "Eduard Horn," which he had assumed since the Revolution, the pamphlets "Arthur Görgey," "Ungarn im Vormärz, "and "Zur Ungarisch-Oesterreichischen Centralisationsfrage." He wrote for Brockhaus' "Konversations-Lexikon" the articles relating to Hungary. He also wrote in 1851 "Die Revolution und die Juden in Ungarn." His "Ludwig Kossuth" (1851), which was immediately confiscated and led to the publisher's imprisonment for two years, again directed the attention of the Austrian police to Einhorn. To escape extradition to Austria and consequent imprisonment, he went to Brussels, and thence, destitute of all resources, to Amsterdam, where he published his "Spinoza's Staatslehre zum Ersten Male Dargestellt" (1852). Returning to Brussels, he devoted himself to the study of the French and English languages. He also studied Belgian affairs with such success that in 1853 and 1854 he was able to publish two works: "Statistische Gemälde des Königreichs Belgien," and "Bevölkerungswissenschaftliche Studien aus Belgien."

At the time of the Paris Exposition of 1856 he went to the French capital as correspondent of several German periodicals. There Michel Chevalier secured him for the "Journal des Débats." In 1863 he became one of the founders of "L'Avenir National." From Paris he directed a persistent literary war against the policy of the Austrian government. King Victor Emmanuel appointed him a Knight of the Order of Saint Maurice and Saint Lazarus. In 1867 he published "L'Economie Politique Avant les Physiocrates," which was crowned with the "Grand Prix" of the French Academy.

In 1869 Einhorn was enabled to return to Hungary. He was elected a member of the Reichstag from Presburg, and some years later from the most populous district of the capital. He founded the "Neue Freie Lloyd," but it had a short existence. In Judaism, in the struggle between the Orthodox and Reform parties, which was conducted with great bitterness, he sided with the former, although he had been a liberal theologian. He was appointed assistant secretary of commerce, but had held this post for six months only when he died.

His brother, **Moritz Einhorn**, an able mathematician, fought in the Hungarian civil war under General Bem in Transylvania, and was killed beside his cannon.

Anton Einhorn (Horn), who had been editor of the "Journal de St. Petersburg" for several years, fought in the same war.

S. M. K.

EINHORN, MAX: Physician; born Jan. 10, 1862, at Grodno, Russia; studied medicine at the universities of Kiev and Berlin, graduating as M.D. from the latter in 1884.

Einhorn worked for a time with Ehrlich and Salkowski, and then went to America, settling in New York city. In 1885 he was appointed house physician in the German Hospital at New York, but relinquished the post in 1886 to engage in private practise. In 1887 he returned for a few months to Berlin, where he acted as Ewald's assistant.

On his return to New York Einhorn occupied himself with questions relating to the pathology of digestion. In 1888 the New York Post-Graduate Medical School appointed him instructor in diseases of the stomach and intestines, and in 1898 he was appointed assistant professor at that institution, and in 1899 professor. He has also for several years been physician to the German Dispensary of New York.

Einhorn is the inventor of many new instruments and pieces of apparatus which have become well known throughout the medical world, such as the fermentation saccharometer, the stomach-bucket, the gastro-diaphane, the deglutitive stomach electrode, the stomach spray apparatus, the gastrograph, etc.

Einhorn's literary activity has embraced nearly the whole domain of stomach pathology.

H. R.

EINSTEIN, EDWIN: Born at Cincinnati Nov. 18, 1842; educated in New York city; received the degree of master of arts at Union College, Schenectady, New York. Einstein was a representative from New York city in the Forty-sixth Congress; was the Republican candidate for mayor of New York in 1892, receiving the greatest number of votes ever polled for the mayoralty nominee of that party; he acted as commissioner and treasurer of the department of docks from 1895 to 1898, and was a director of the Mt. Sinai Hospital from 1876 to 1878.

A.

EIRAGOLY. See KOVNO.

EISENMENGER, JOHANN ANDREAS: Anti-Jewish author; born in Mannheim 1654; died in Heidelberg Dec. 20, 1704. The son of an official in the service of the Elector of the Palatinate, Eisenmenger received a good education, and distinguishing himself at the Collegium Sapientiæ at Heidelberg by his zeal for Hebrew studies, he was sent by the elector to England and Holland to continue them there. In Amsterdam he met three Christians who had been converted to Judaism, and this filled him with indignation. As a further cause of his hatred of Judaism, he claims the otherwise unknown attacks against Christianity which he heard from the mouth of David Lida, then (1681) rabbi of Amsterdam. For nineteen years he studied rabbinical literature assisted by Jews, first in Heidelberg and afterward in Frankfort-on-the-Main, pretending that he desired to be converted to Judaism. Having collected from rabbinical literature all that was calculated to bring it into disrepute and to give justification for anti-Jewish prejudices, he published his "Entdecktes Judenthum" (Judaism Unmasked), which has remained the arsenal for detractors of Talmudic literature down to the present day. The full title of the book is interesting and is given in the facsimile on page 81. The work, in two large quarto volumes, appeared in Frankfort-on-the-Main in 1700, and the prince elector took great interest in it, appointing Eisenmenger professor of Oriental languages in the University of Heidelberg. The Jews, who feared that the publication of this book would give additional strength to the prejudice against them, denounced it as a malicious libel; and the fact that only a year previously riots against the Jews had occurred in the diocese of Bamberg, and that in the same year (July 21) a mob had sacked the house of the court Jew Samuel Oppenheimer in Vienna, made their opposition all the stronger. Oppenheimer was chiefly instrumental in procuring an order of confiscation from the emperor, who commanded that the whole edition of 2,000 copies should be placed under lock and key. With him others worked for the same end, *including* Jospa von Geldern, the great-grandfather of Heinrich Heine's mother. There was also Roman Catholic influence at work, as Eisenmenger was accused of anti-Catholic tendencies.

Studies Rabbinical Literature.

His "Entdecktes Judenthum."

The Jews had offered Eisenmenger the sum of 12,000 florins ($5,000), if he would suppress his work; but he demanded 30,000 florins, and the transactions led to no result. Eisenmenger died suddenly of apoplexy in 1704. Meanwhile two Jewish converts to Christianity in Berlin had brought charges against their former coreligionists of having blasphemed Jesus. King Frederick William I. took the matter very seriously, and ordered an investigation. Eisenmenger's heirs applied to the king; and the latter tried to induce the emperor to repeal the injunction against the book, but did not succeed. He therefore ordered a new edition of 3,000 copies to be printed in Berlin at his expense, but as there was an imperial prohibition against printing the book in the German empire, the title-page gave as the place of publication Königsberg, which was beyond the boundaries of the empire. Almost forty years later the original edition was released.

Of the many polemical works written by Christians against rabbinical literature, Eisenmenger's has become the most popular one, and since the beginning of the anti-Semitic movement it has supplied anti-Semitic journalists and the authors of anti-Semitic pamphlets with their main arguments. Eisenmenger undoubtedly possessed a great deal of knowledge, but he was blinded by prejudice. His work is best characterized by Siegfried, who says ("Allg. Deutsche Biographie," *s.v.* "Eisenmenger"): "Taken as a whole, it is a collection of scandals. Some passages are misinterpreted; others are insinuations

TITLE-PAGE OF EISENMENGER'S "ENTDECKTES JUDENTHUM," KÖNIGSBERG, 1711.

(In the library of Joseph Jacobs.)

based on one-sided inferences; and even if this were not the case, a work which has for its object the presentation of the dark side of Jewish literature can not give us a proper understanding of Judaism."

The incorrectness of many of Eisenmenger's translations is shown by Delitzsch in his "Rohling's Talmudjude." Through Rohling's "Talmudjude" Eisenmenger's work had again become popular, and from Rohling many other libelists copied these charges, notably Sir Richard Burton in his "The Jew, Gypsy, and El Islam." Much earlier an English adaptation had been made by J. P. Stekelin under the title "The Traditions of the Jews, with the Expositions and Doctrines of the Rabbins," etc., 2 vols., 1732–34. A new edition of the "Entdecktes Judenthum" was published by F. X. Schieferl, Dresden, 1893.

Eisenmenger edited with Leusden the unvocalized Hebrew Bible, Amsterdam, 1694, and wrote a "Lexicon Orientale Harmonicum," which was not published.

D.

EISENSTADT (Hungarian, **Kis-Márton**; Hebr. עיר הברזל): City in the county of Oedenburg (Sopron), Hungary. The Jewish community of Eisenstadt is the only community of Hungary that has an independent political existence with an organization of its own, though the neighboring Mattersdorf (Nagy-Márton) was on the same footing until 1903. Unlike other Hungarian communities of the present day, Eisenstadt has the right to elect its own mayor in addition to its president, although both offices can be, and generally are, held by one and the same person.

Eisenstadt, which once belonged to the "Sheba' Ḳehillot" (Seven Communities), is among the oldest communities in Hungary. It is mentioned as early as 1388. Many of the Jews of Oedenburg fled in 1526 to Eisenstadt. Leopold I. expelled the Jews from the city in 1671; but Prince Palatine Paul Esterhazy settled a number of Nikolsburg Jews at Eisenstadt, which belonged to his dominions, and granted them an interesting privilege (Jan. 1, 1690).

He designated the outer city dairy ("Stadtmeierhof") at Eisenstadt as their dwelling-place, where he built twenty houses for them, the Jews contributing from 30 to 50 florins each. In return for the yearly protective tax they were allowed the free exercise of their religion. They paid thirty pounds of pepper a year for their cemetery. They might elect a Jewish judge and officials for the community according to the Jewish law, the candidates being confirmed by the government, to whom the retirement of the officials had to be reported. They were allowed to maintain a Jewish inn and a slaughter-house, paying for the latter two hundredweight of tallow a year; they might sell kasher meat to Christians, but not wine or beer. They were allowed to keep horses and cattle; but they had to be careful that the cattle of the overlord were not injured in the pasture.

On informing the bailiff they might intermarry with Jews from other towns, but neglect to report a wedding entailed a fine of five florins. They might buy and sell distilled liquors, the director of the estate fixing the tax. They might work as tailors, shoemakers, lacemakers, furriers, barbers, physicians, and jewelers. Any one who opened his shop before ten o'clock on Sundays or festivals, when the people were going to church, was fined two florins. Their lawsuits were settled according to the Jewish law. They were not allowed to sell or take in pawn stolen objects. When anything was stolen, the owner reported the loss to the Jewish judge, who proclaimed the theft. Any one who had bought the stolen articles before this proclamation had to return them at the price paid; if they were bought afterward, the buyer had to restore them without compensation, and was also fined. The Jews might not smelt coins without informing the government officials, lest they should be suspected of making stolen goods disappear in this fashion.

No Jew from another town was allowed to settle in the community without the knowledge of the government. An honest, able person, against whom the community had no objection, paid an initiation fee of six florins. A Jewish traveler was allowed to stay only three days in the community, and was obliged to report his country and his origin. Whenever a rich Jew left the district, he paid fifteen thalers to the government; one of the middle class paid ten thalers; and a poor Jew five thalers: and each of them paid to the community whatever sum the president named. Whoever did not keep his house and grounds or his portion of the street clean was fined two pounds of pepper. Chimneys had to be swept every four weeks; and every one was required to help in case of fire. The government sold the Jews wood for fuel. They were protected against the blunders of the officials.

During the Kurucz wars the Jews of Eisenstadt, terrorized by the enemy, were forced to leave their homes; but when peace was restored the community entered upon a period of prosperity. At the census of 1735 about 112 Jewish families (600 individuals) were living at Eisenstadt. Several persons employed at Vienna had become members of the community, and it owed its development to the fact that it was the fictitious legal residence of many Viennese Jews.

The Cabala was much cultivated in Eisenstadt in the seventeenth century. The false Messiah Mordecai Mokiaḥ lived there, as did also Meïr ben Ḥayyim, who wrote glosses to Ḥayyim Vital's "Sefer ha-Gilgulim," and Simeon b. Ephraim Judah, the author of "Ḥeleḳ Shimeon" (Prag, 1687). The most famous rabbi of Eisenstadt was MEÏR BEN ISAAC (d. June 7, 1744), author of "Panim Me'irot." From 1851 to 1869 Israel Hildesheimer was rabbi of Eisenstadt, and his yeshibah became a prominent factor in Orthodox Judaism. The present rabbi (1903) is Solomon Kutna.

D. A. BÜ.

EISENSTADT: Polish family which, when the Jews were compelled to adopt family names, selected the name of Eisenstadt, a town in Hungary, where some of the family became rabbis.

Abigdor Eisenstadt, or **Abigdor Sofer (ben Moses)**: Died 24th of Ab, 1591. He was the author of a translation from Polish into German of the festival prayers (Cracow, 1571) and of a prayer-book (*ib.* 1609).

J. H. GUT.

Abraham Hirsch b. Jacob Eisenstadt of Byelostok: Russian rabbi; born in 1812; died in Königsberg 1868. He was a rabbi in Ottymia (?), government of Kovno. He began at an early age to write his important work, "Pitḥe Teshubah," which is the most popular and useful index to the responsa and decisions of later authorities on the subjects treated in the Shulḥan 'Aruk. Eisenstadt's great merit consists in having collected all the material given in the works of his predecessors, and in having added to it an almost complete collection of references to responsa of all the later eminent rabbis. Of little value are the novellæ which Eisenstadt added to the "Pitḥe Teshubah" under the title "Naḥalat Ẓebi." The part of the "Pitḥe Teshubah" on Yoreh De'ah was published at Wilna in 1836 (republished Jitomir, 1840, and Lemberg, 1858); that on Eben ha-'Ezer, in 1862; and, after the author's death, that on Ḥoshen Mishpaṭ, in Lemberg, 1876 (republished in Wilna, 1896). Eisenstadt is also the author of a commentary on the "Seder Giṭṭin wa-Ḥaliẓah," by Michael ben Joseph of Cracow, Wilna, 1863, 2d ed. 1896.

L. G. N. T. L.

Benzion ben Moses Eisenstadt: Russian Hebraist; born at Kletzk, government of Minsk, March 13, 1873. Eisenstadt devoted himself to Neo-Hebrew. At eighteen he was in correspondence with Jewish scholars like Slonimsky, Buber, and Reifmann. Though comparatively young, Eisenstadt has written: "Ziyoni," a collection of poems (Warsaw, 1895); "Dor Rabbanaw we-Soferaw," a biographical dictionary of contemporary rabbis and other scholars (part 1, *ib.* 1895; parts 2-4, Wilna, 1899-1902); "Rabbane Minsk wa-Ḥakameha," a history of the rabbis and scholars of Minsk (Wilna, 1899); "We-Zot li-Yehudah," a supplement to the responsa collection "Noda' bi-Yehudah" (*ib.* 1901). Eisenstadt is now (1903) resident in New York.

H. R. M. SEL.

Israel Tobiah Eisenstadt: Russian biographer; born in Rushony, government of Grodno; died in St. Petersburg Jan. 13, 1893. Descended from Tobiah Bacharach and Israel ben Shalom, who were executed in his native city Sept. 19, 1659, on an accusation of ritual murder brought against the entire community, Eisenstadt published their history in his "Da'at Ḳedoshim," the material for which was largely taken from the Friedland library, afterward presented to the Asiatic Museum of St. Petersburg. The unfinished work was completed by Samuel Wiener (St. Petersburg, 1897-98), who added several appendixes. The work contains genealogies of the Eisenstadt, Bacharach, Günzburg, Friedland, Katzenellenbogen, Rapoport, and other families.

H. R. P. WI.

Jacob Eisenstadt: English scholar; lived in London, England, in the eighteenth century. He wrote homiletic explanations on the Talmud and some portions of the Bible, under the title of "Toledot Ya'aḳob," London, 1770. This book bears the approbation of the Sephardic haham of London, Moses de Azevedo ha-Kohen, and was the first Hebrew book printed for a Jew in England by Isaac b. Jedidiah ha-Levi, Moses b. Gerson, and Jacob b. Issachar Cohen, who had secured typesetters from Holland and occupied a shop in the house of W. Tooke, an Englishman.

J. A. R.

Jacob ben Eliezer Eisenstadt: Born in Szidlowca, Poland, about 1730. He was the author of "Toledot Ya'aḳob," explanations on the Haggadah and on difficult Biblical passages, London, 1770.

BIBLIOGRAPHY: Eisenstadt-Wiener, *Da'at Ḳedoshim*, p. 194, St. Petersburg, 1897-98; Gaster, *History of the Ancient Synagogue of the Spanish and Portuguese Jews*, p. 141, London, 1901.

J. B. FR.

Meïr Eisenstädter (also known as **Meïr Ash** [compare JEWISH ENCYCLOPEDIA, ii. 176], and, after his later rabbinates, **Meïr Gyarmath** and **Meïr Ungvár**): One of the greatest Talmudists of the nineteenth century; died at Ungvár, Dec. 2, 1861. He was called in 1807, while still a young man, to the rabbinate of Baja, where he directed a large yeshibah. He was the intimate friend of Götz Schwerin, who was then living at Baja. When Schwerin was, through the ruin of his father-in-law, compelled to seek a rabbinate, Eisenstadt voluntarily resigned to him the office at Baja, and, on the recommendation of Moses Sofer, obtained a position at Gyarmath in 1815, removing later to Ungvár, where he died. His responsa were published after his death by his son, under the title אמרי א״ש, Ungvár, 1864.

S. L. V.

Meïr ben Isaac Eisenstadt: Lithuanian rabbi; born in 1670; died at Eisenstadt (Kismarton), Hungary, June 6, 1744. After having been dayyan at Sachtschewar, province of Posen, and rabbi at Szydlowiec, government of Radom, he went to Germany and settled at Worms. Through the influence of Samson WERTHEIMER, Eisenstadt was appointed lecturer on Talmud in a bet ha-midrash. In 1701, Worms having been taken by the French, he went to Prossnitz, Moravia, where he was appointed rabbi. Among the innovations introduced by him in that community was the issuing of bills of divorce, although Prossnitz is not situated on a river large enough to meet rabbinical requirements. Among his disciples in Prossnitz was Jonathan Eybeschütz. In 1711 he again filled the office of rabbi at Szydlowiec, but did not remain there long, receiving, before 1714, a call to Eisenstadt, Hungary. Here he adopted the name of "Eisenstadt." In 1723 he was obliged to flee from this city. According to Zipser ("Orient, Lit." viii. 187), he returned eight months later. But the pinḳeses of Eisenstadt (see Eisenstadt-Wiener, "Da'at Ḳedoshim," p. 190) show that he was absent for three years, and that his son Jacob officiated in his place. Meïr Eisenstadt was widely recognized as an authority in rabbinical law, being consulted by the rabbis of Turkey, Italy, and Germany. He was the author of: "Or ha-Ganuz," novellæ on Ketubot and notes on Yen Nesek of the Yoreh De'ah (Fürth, 1766); "Panim Me'irot," responsa and novellæ on various Talmudic treatises, in four parts (part 1, Amsterdam, 1715; part 2, Sulzbach, 1733; part 3, *ib.* 1738; part 4, *ib.* 1739); "Kotnot Or," homiletic commentary on the Pentateuch and the Five Scrolls, published, with the "Or Ḥadash" of his grandson, Eleazar Kalir, under the title "Me'ore Esh," the latter word being an abbreviation of "Eisenstadt" (Fürth, 1766).

K. M. SEL.

Moses Eisenstadt ben Isaac: Lived in the beginning of the eighteenth century; died in Prague. He is the author of a compendium of arithmetic (Dyhernfurth, 1712); a German translation of the "Eben Boḥan" by Kalonymus ben Kalonymus (Sulzbach, 1715); a dirge on the plague of 1713 in Pesth (Prague, 1713). He also translated into Yiddish the "Diwan" (Maḥberot) of Immanuel Romi.

J. H. GUT.

EISENSTEIN, JULIUS (JUDAH DAVID): Russian-American writer; born in Meseritz, government of Siedlec, Russian Poland, Nov. 21, 1855. He emigrated in 1872 to the United States, and settled in New York, in which city he still resides. Eisenstein was the first to translate into Hebrew and Yiddish the Constitution of the United States (New York, 1891). Other writings of his are: "Ma'amare Biḳkoret," *ib.* 1897, and "The Classified Psalter" (Pesuḳe de-Zimrah), Hebrew text with a new translation (1899). He also made an attempt to translate and explain a modified text of the Shulḥan 'Aruk.

Eisenstein took a prominent part in the controversy concerning the Kolel Ameriḳa, a society for the collection of funds for the poor Jews of Palestine, and was one of the leaders in the movement to arrange that the money contributed in the United States should go primarily to former residents of America. In "Ha-Modia' la-Ḥadashim" (New York) for 1901 he published, under the title "Le-Ḳorot Gole Russiya be-Ameriḳa," a sketch of the history of Russo-Jewish emigration to America. His "History of the First Russo-American Jewish Congregation" appeared in No. 9 of the "Publications of the Am. Jew. Hist. Soc.," 1901.

H. R. P. WI.

EISHISHKI. See WILNA.

EISLER, LEOPOLD: Austrian rabbi; born Feb. 11, 1825, at Boskowitz, Moravia; studied Talmud under Rabbi Abraham Placzek, and Oriental languages at the University of Prague. In the latter city he also attended lectures by S. L. Rapoport. In 1856 he was chosen rabbi of Eiwanowitz, and in 1892 of the newly organized community of Wischau. He has since acted as rabbi for both communities.

Eisler is the author of "Beiträge zur Rabbinischen Sprach- und Altertumskunde," in 4 parts, Vienna, 1872–90; and "Dibre Yehuda ha-Aḥaronim" (1900), containing studies and criticisms, revisions and additions (1903). S.

EISLER, MORITZ: Austrian educator and philosophical writer; born at Prossnitz, Moravia, Jan. 20, 1823; died at Troppau, Silesia, Dec. 21, 1902. He studied philosophy and Oriental languages at the University of Prague, and in 1853 was appointed teacher of religion at the Piarist gymnasium, and director of the communal school in Nikolsburg.

In 1862 he organized a society for the care of invalid teachers and the widows and orphans of teachers, which gave rise to the Moravian-Silesian Hebrew Teachers' Association (Mährisch-Schlesisch-Israelitischer Lehrerverein), whose president Eisler was until 1898, when it was transformed into the Kaiser Franz Joseph I. Jubiläumsstiftung zur Unterstützung von Lehrerwittwen und -Waisen.

Besides essays in various literary reviews, Eisler has published "Vorlesungen über die Jüdischen Philosophen des Mittelalters," 3 vols., Vienna, 1870–1883.

In June, 1893, after forty years of active service, Eisler withdrew from public life and retired to Troppau.

BIBLIOGRAPHY: *Mähren's Männer der Gegenwart*, Brünn, 1889; De Gubernatis, *Ecrivains du Jour*; Hinrichsen, *Das Literarische Deutschland*, Berlin, 1887; Joseph Wytzlik, *Deutsche Dichter und Schriftsteller-Charaktere*, Vienna, 1902.

S.

EISLER, RUDOLPH: Austrian writer; born in Vienna Jan. 7, 1873. He was educated at the universities of Berlin, Vienna, and Leipsic, graduating from Leipsic as doctor of philosophy in 1894. In 1899 Eisler settled at Vienna, in which city he has since resided. He is editor of the "Wissenschaftliche Volksbibliothek" and author of the following essays and works: "Der Psychophysische Parallelismus," Leipsic, 1894; "Psychologie im Umriss," *ib.* 1895, 2d ed. 1899; "Elemente der Logik," *ib.* 1898; "Einführung in die Philosophie," *ib.* 2d ed., 1901; "Wörterbuch der Philosophischen Begriffe und Ausdrücke, Quellenmässig Bearbeitet," Berlin, 1900; "Das Bewusstsein der Aussenwelt," Leipsic, 1901.

S. F. T. H.

EISS, ALEXANDER, RITTER VON: Austrian colonel; born at Piesling, Moravia, 1832. He entered the Austrian army at the age of fifteen, and took part in the campaigns of 1848, 1849, 1859, and 1866. The following orders were conferred upon him: the Order of Leopold, the Order of the Iron Crown, the Order of Elizabeth Theresa, and the Order of the Sword; and he also received two medals for meritorious military service. Von Eiss retired in 1896. He is an ardent Zionist. S.

EJECTMENT: An action to recover the immediate possession of real property, with damages for wrongful withholding.

The general principle governing all cases of possession of real estate in Jewish law was קרקע בחזקת בעליה קיימת ("Real property is presumed to belong to its owner," as distinguished from its tenant or possessor). Mere possession, while of great weight in cases involving personal property, was not recognized in connection with real estate, except when such possession continued for an uninterrupted period of at least three years (see ḤAZAḲAH). Hence, one who claimed title to real property which was known to belong to some one else had to substantiate his claim with good proof; and any doubt arising in such matters was always resolved in favor of the owner (B. M. 102b; Ket. 20a; Tos. and Asheri, *ad loc.*; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 225, 21, Isserles' gloss).

No writ of ejectment was necessary to reinstate the rightful owner in possession of his property. The owner, if powerful enough, could personally eject the holder of the property and take possession of it. Even if the property passed through many hands, and the owner lost all hope ("yi'ush") of ever regaining it, it was still in the same status, and might be recovered whenever a favorable opportunity presented itself (B. Ḳ. 27b; Maimonides, "Yad," Sanh. ii. 12; Ḥoshen Mishpaṭ, 4 and 331).

Any damage caused to the property by the occupant, or any benefit derived by him from it during his tenure, became a debt which the owner could collect by a regular legal procedure. If, however, the damage was caused through no fault of the occupant—for instance, if water overflowed a field, or trees were burned down—he could not be held responsible for it, since the land was legally in the possession of the owner all this time. In the case of improvements being made on the property by the occupant, the court estimated such improvements and the money expended on them. If the amount expended exceeded the value of the improvements, the owner had to pay only for the value of the improvements. If the value of the improvements exceeded the amount of the expenditure, the occupant received the amount he had expended (B. Ḳ. 95a; B. M. 14b; "Yad," Gezelah, ix.; Ḥoshen Mishpaṭ, 371, 374).

Ejectment at Expiration.

A tenant holding real property for a specific period of time might be ejected immediately after the expiration of such time. One holding property under an indefinite lease at so much per month might not be ejected unless notified by the landlord thirty days previously. No ejectment might be proceeded with in the winter from Sukkot until Passover. In large cities notice had to be given twelve months before ejectment might be effected. A tenant holding a shop had to be notified twelve months, and in some cases three years, before he might be ejected. Just as the landlord had to notify the tenant before he might eject him, so the tenant had to notify the landlord that he wished to leave, and the length of notice was the same in either case.

The amount of rental was regulated by the market value. If rent had risen during the period of tenure, the landlord might demand the higher price, and eject the tenant if he refused to pay it. If rent became cheaper, the tenant might demand a reduction, or leave immediately. If the landlord's dwelling was destroyed, so that he had no place in which to live, he might eject the tenant without any notice. The same laws governing the relations of landlord and tenant remained in force if in the meanwhile the landlord sold his property to another (B. M. 101b; "Yad," Sekirut, iii.; Ḥoshen Mishpaṭ, 312, 5-13).

The king had a right to eject a person from his property and to give it to any one he desired. There were, however, differences of opinion among later commentators regarding this right (Sanh. 20b; Tos. *s.v.* "Melek"; "Yad," Melakim, ii. 5, iii. 3; compare the incident of Naboth in I Kings xxi., and Ḳimḥi *ad loc.*).

Ejectment in consequence of a mortgage might only be proceeded with after the necessary steps of (1) "adrakta," tracing the property, (2) "ṭirfa," seizure of property sold after the loan, and (3) "shuma," appraisement of the property by the court, had been taken (see Debts; Procedure).

S. S. J. H. G.

EKAH (LAMENTATIONS) RABBATI: The Midrash on Lamentations, like Bereshit Rabbah and the Pesiḳta ascribed to Rab Kahana, belongs to the oldest works of the Midrashic literature. It begins with thirty-six consecutive proems forming a separate collection, certainly made by the author of the Midrash. They constitute more than one-fourth of the work (47b-52b in the Venice ed., 1545). These proems and, perhaps, most of the annotations, which are arranged in the sequence of the verses (52c-66b), originated in the discourses of which, in olden times, the Book of Lamentations had been the subject. The haggadic explanation of this book—which is a dirge on the fall of the Jewish state and the extinction of the national splendor—was treated by scholars as especially appropriate to the Ninth of Ab, to the day of the destruction of the Temple, and to the eve of that fast-day (comp. Yer. Shab. 15c; Lam .R. iv. 20; Yer. Ta'an. 68d *et seq.*).

The Proems.

The sources from which Yerushalmi drew must have been accessible to the author of Ekah Rabbah, which was certainly edited some time after the completion of the former, and which probably borrowed from it. In the same way older collections must have served as the common source for Ekah Rabbah, Bereshit Rabbah, and especially for the Pesiḳta de-Rab Kahana. The haggadic comment on Hosea vi. 7 appears earlier as a proem to a discourse on Lamentations, and is included among the proems in this Midrash (ed. Buber, p. 3a) as a comment on Gen. iii. 9 (Ber. R. xix.). The close of this proem, which serves as a connecting link with Lam. i. 1, is found also in the Pesiḳta as the first proem to pericope xv. (p. 119a) to Isa. i. 21, the Hafṭarah for the Sabbath before the Ninth of Ab (comp. Müller, "Einleitung in die Responsen," p. 38). The same is the case with the second and fourth proems in the Pesiḳta, which are identical with the fourth and third (according to the correct enumeration) of the proems to Ekah Rabbah; the fifth in the Pesiḳta (120b-121b), which corresponds to the second in this Midrash, has a defective ending. With a change in the final sentences, the first proem in Ekah Rabbah is used as a proem in the Pesiḳta pericope xi. (110a), and with a change of the proem text and of its close, proem 10 (9) of Ekah Rabbah is found as a proem in the Pesiḳta pericope xix. (137b). On the other hand, there is found embodied in the exposition of Lam. i. 2, "she weepeth sore in the night," etc., a whole proem, the text of which is Ps. lxxvii. 7 *et seq.*, "I remember my lute-playing in the night," etc. (Hebr.); this proem contains also the final sentence which serves as introduction to the section Isa. xlix. 14 (ed. Buber, p. 30a), and it is known from the Pesiḳta pericope xvii. (129b *et seq.*) to be a proem to a discourse on this section, which is intended for the second "consolatory Sabbath" after the Ninth of Ab. From this it becomes evident that the collector of the Ekah Rabbah used the haggadic exposition—found in the Pesiḳta fulfilling its original purpose—as a comment on Lam. i. 2. The same is true of the commentary to Lam. i. 21 (ed. Buber, p. 47a), for which there was used a proem on the Pesiḳta section Isa. li. 12, intended originally for the fourth Sabbath after the Ninth of Ab, and a section which had for its text this verse of Lamentations (pericope xix., p. 138a); and also in regard to the comment to Lam. iii. 39 (ed. Buber, p. 68a), which consists of a proem of the Pesiḳta pericope xviii. (p. 130b). But the author also added four proems from Ekah Rabbah itself (29, 18, 19, 31, according to the correct enumeration), retaining the introductory formula פתח . . . .'ר, as a commentary to Lam. iii. 1, 14, 15; iv. 12 (ed. Buber, pp. 61b, 64a, b, 74b). The opinion set forth in the introduction to Buber's critical edition that the arrangement of the proems at the beginning of the work was made by a later editor, who included the marked comments of the Midrash as proems, and who, after prefixing the introductory formula to a comment on the Midrash Ḳohelet xii. 1 *et seq.*, used it as a proem for Lam. R. xxiv. (xxiii.), is entirely wrong. There can be no doubt that precisely the opposite process has taken place. The entire interpretation in Eccl. R. xii. 1-7, which consists of two versions, is composed of two proems —that in Wayiḳra Rabbah, ch. 18, beginning, and the proem in this Midrash. The numberless proems originating in the synagogal discourses of the earliest times must be regarded as the richest source upon which the collectors of the midrashim could draw (comp. "Monatsschrift," 1880, p. 185; Maybaum, "Die Aeltesten Phasen in der Entwickelung der Jüdischen Predigt," p. 42). The character of the interpretation in that part of the midrash which contains the running commentary to Lamentations is on the whole the same as in the BERESHIT RABBAH. Side by side with the simple interpretation of sentences and words, and with various midrashic explanations dating from different authors, whose comments are placed in juxtaposition, the Midrash contains haggadic passages having some sort of relation to the verse; as, for instance, in connection with the verse "at the beginning of the watches" (ii. 19) is introduced the whole discussion of Yerushalmi, Ber. 2d, on the statement of the Mishnah, "to the end of the first watch"; in connection with the words "let us lift up our heart with our hands to God in heaven" (iii. 41) is introduced a story from Yer. Ta'an. 65a, telling how R. Abba b. Zabda preached on this verse during a fast-day service. It is not strange that for similar expressions, such as "en lo . . ." and "lo maẓ'ah manoah" occurring in Lam. i. 2, 3, and Gen. viii. 9, xi. 30, Ekah Rabbah (ed. Buber, pp. 31a *et seq.*) uses the explanations of Ber. R. xxxviii. and xxxiii., end; or that in the Ekah Rabbah the same haggadah is found three times (pp. 23a, 56a, 56b)—*i.e.*, in explaining the three passages Lam. i. 1, ii. 4, and ii. 5, in each of which the word "like" occurs; or that the same comment is applied to iii. 53 and iii. 56; or that a sentence of R. Simeon b. Laḳish is used five times—namely, to iii. 3, 18, 22, 26, 32; or that the explanation for reversing the order and putting the letter פ before ע is given twice—namely, to ii. 16 and iii. 46.

Relation to Bereshit Rabbah.

Only a few verses in ch. iii. are entirely without annotations. To some verses (ii. 20, iii. 51, iv. 13, 18, 19) are added the stories to which they were referred, even though they are also found in the large collections on ii. 2 and i. 16: "For these things I weep; mine eye, mine eye runneth down with water." These collections, as well as the long passage on i. 5 ("her enemies prosper"), giving so many accounts of the sufferings of Israel, including the times of the First and Second Temples and the fateful revolt under Bar Kokba, are the most impressive in the Midrash to Lamentations; they form an integral part of the work, like the interesting sagas and stories to Lam. i. 1 on the greatness of the city of Jerusalem and the intelligence of her inhabitants. Jerusalem and Athens are contrasted in ten stories. The Scriptural words "the populous city, the city great among the nations," are vividly interpreted in the Midrash as meaning "great in intelligence." In connection with iv. 2, "the sons of Zion, the splendid ones" (Hebr.), the Midrash tells of social and domestic customs. The stories of Ekah Rabbah fill over fifteen columns of the Venice edition (about eleven in the first chapter), and include more than one-fourth of the midrashic comments (without the proems). Without these stories the differences in size of the several chapters would have been less apparent, even if (as was perhaps the case) the first chapter, in the form in which the author knew it, offered more opportunity for comments than did the other chapters. From this it is erroneously concluded in the "Gottesdienstliche Vorträge" that "the last sections were added later"; and, furthermore, "that the completion of the whole work must not be placed before the second half of the seventh century," because Zunz concludes that the empire of the Arabians is referred to even in a passage of the first chapter.

According to a reading of Buber's edition (p. 39a), which is the only correct one as shown by the context, Seir, not Ishmael, is mentioned in connection with Edom in this passage to i. 14. The other arguments of the "Gottesdienstliche Vorträge" likewise fail to prove such a late date for the Midrash, especially since Zunz himself concludes that the authorities mentioned therein by name are not later than Yerushalmi. All that can be definitely stated is that Lamentations Rabbah was edited after the completion of that Talmud, and that Bereshit Rabbah must also be considered as of earlier date, not so much because it was drawn upon, as because of the character of the proem collection in Ekah Rabbah. Like Bereshit Rabbah, this Midrash is also of Palestinian origin, and rich in foreign words, especially Greek. It certainly is not strange that the "Vive domine imperator!" with which R. Johanan b. Zakkai is said to have approached Vespasian in his camp, should have been reproduced. The same phrase was likewise transmitted in Aramaic and Hebrew form, in Buber's edition and in the 'Aruk. The Midrash is quoted, perhaps for the first time, by R. Hananeel under the name "Agadat Ekah." Many passages are quoted by R. Nathan, who invariably calls the work "Megillat Ekah." The term "Ekah Rabbati," which is general even now, is used to designate the many extracts in Yalḳuṭ which have been included with the other Biblical books. In Ekah

Rabbah itself the sources are almost always missing. The names "Midrash Ekah," "Midrash Ḳinot," "Megillat Ḳinot," are also found in the old authors. In Yalḳuṭ there are likewise long extracts from a Midrash on Lamentations published under the name "Midrash Zuṭa" (Berlin, 1894) by Solomon Buber.

Bibliography: Earliest editions of the *Midrash Ekah* in the Midrashim on the Five Megillot, Pesaro, 1519; Constantinople, 1520; in the complete editions of the Rabbot to Pent. and Megillot, Venice, 1545; Cracow, 1587; Salonica, 1594; *Ekah Rabbati*, ed. Buber, specially valuable for its commentary and introduction, Wilna, 1899: the text differs largely from that of previous editions in being inferior, having at times the character of another recension, whole passages being summarized in some cases; on other MSS. compare Buber, *Introduction*, pp. 37b *et seq.*; Zunz, *G. V.* pp. 179-181; Rapoport, *Erek Millin*, pp. 252 *et seq.*; Weiss, *Dor Dor we-Dorshaw*, iii. 262 *et seq.*; Winter and Wünsche, *Die Jüdische Litteratur*, i. 543-554; Bacher's work on the *Haggadah*. EKATERINOSLAV. See Yekaterinoslav.

EKRON (עקרון; LXX. 'Ακκαρών; probably the modern Akir): One of the five cities belonging to the Philistines (Josh. xiii. 3), situated in the maritime plain. It is mentioned in connection with the Ark in I Sam. v. 10, vi. 1-8. Ekron was noted for its sanctuary of Baal-zebub (II Kings i. 2, 3, 6, 16). In later days it is merely named with the other cities of the Philistines in the denunciations of the Prophets (Jer. xxv. 20; Amos i. 8; Zeph. ii. 4; Zech. ix. 5). In the Apocrypha it appears as "Accaron" (I Macc. x. 89), and was bestowed with its borders by Alexander Balas on Jonathan Maccabeus as a reward for his services. Eusebius ("Onomasticon," ed. Lagarde, p. 218) describes Accaron as a large Jewish village between Ashdod and Jabneh. According to Jerome, Turris Stratonis (Cæsarea) was identified by some with Accaron.

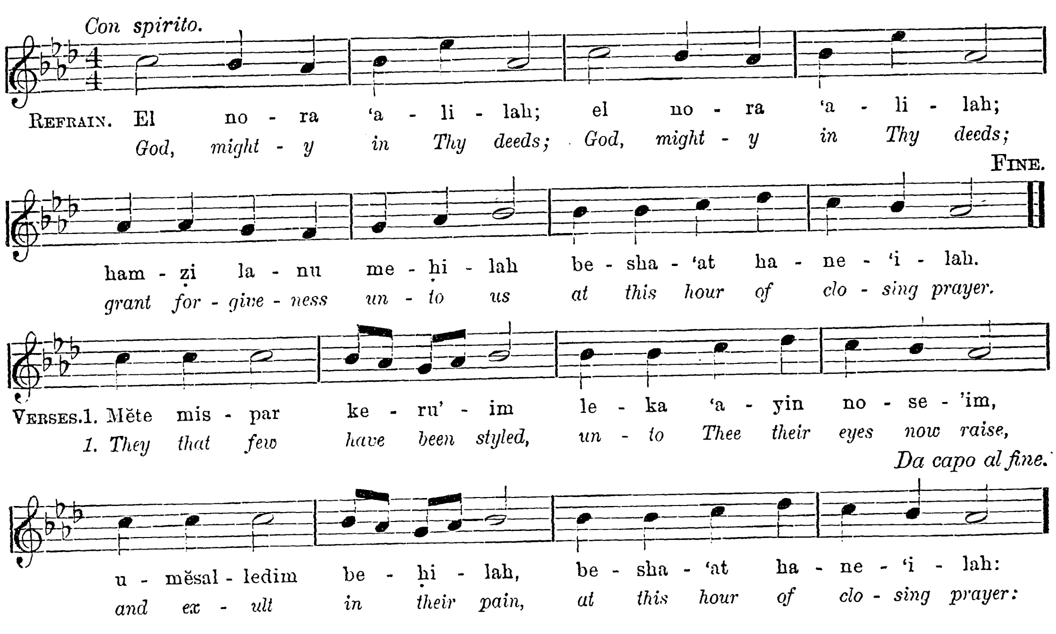
EL NORA 'ALILAH



Con spirito.
Refrain. El no - ra 'a - li - lah; el no - ra 'a - li - lah;
God, might - y in Thy deeds; God, might - y in Thy deeds;
Fine.
ham - zi la - nu me - hi - lah be - sha - 'at ha - ne - 'i - lah.
grant for - give - ness un - to us at this hour of clo - sing prayer.
Verses. 1. Mĕte mis - par ke - ru' - im le - ka 'a - yin no - se - 'im,
1. They that few have been styled, un - to Thee their eyes now raise,
Da capo al fine.
u - mĕsal - ledim be - ḥi - lah, be - sha - 'at ha - ne - 'i - lah:
and ex - ult in their pain, at this hour of clo - sing prayer:

EL 'ELYON (אל עליון).—**Biblical Data:** The most high God (Gen. xix. 18-20, 22, A. V.; R. V. "God most high"), as whose priest Melchizedek blesses Abraham (compare "Urusalem," in the El-Amarna tablets; Schrader, "K. B." iv. 180, 25 *et seq.*; 183, 14; 185). He is further characterized as the "possessor [or "creator"] of heaven and earth" (Gen. xiv. 19). As an epithet of the Deity, "'Elyon" occurs with "El" in Ps. lxxviii. 35; with "Yhwh" in Ps. vii. 18, xlvii. 3, xcvii. 9; with "Elohim" in Ps. lvii. 3, lxxviii. 56; and without additional noun in Num. xxiv. 16; Deut. xxxii. 8; Ps. ix. 3, xviii. 14; Isa. xiv. 14; Dan. vii. 18-25 (compare Hoffmann, "Phönizische Inschriften," pp. 48, 50). Among the Phenicians "'Elyon" was an appellation of God. The plural, אלנם ("gods"), is found on an inscription of Eshmun'azar (Bloch, "Phönizisches Glossar," p. 12). The name is old, and analogous to "El-Shaddai," "El-'Olam," and the like. See God, Names of.

——**Critical View:** The Melchizedek episode is regarded as a post-exilic interpolation, the term "El 'Elyon" being compared to the formula by which the Maccabean priests were designated as "priests of the most high God" (Josephus, "Ant." xvi. 6, § 2; compare also Assumptio Mosis, vi. 1). This view is maintained, among others, by Holzinger in Marti, "Kurzer Handkommentar," under Gen. xiv. Gunkel ("Genesis," p. 261) maintains that the foregoing assumption disregards the fact that an old tradition connected Melchizedek with Jerusalem, and that the possibility is not excluded that in remote days the God of Jerusalem was known as "El 'Elyon." E. G. H.

EL MALE RAHAMIN. See Hazkarat Neshamot.

EL NORA 'ALILAH (אל נורא עלילה): A

hymn attributed to Moses ibn Ezra, and chanted, in the Sephardic liturgy, before the commencement of the "Ne'ilah" or closing service of the Day of Atonement. It is sung to spirited tunes by English-speaking, Dutch, and Italian Sephardim. The Italian melody is of a modern character, but that of the northern Sephardim has some claim to the Peninsular origin attributed to it. The six verses, containing the acrostic משה חזק, are sung with the refrain from which the hymn takes its name.

The stirring Spanish melody has been further utilized for the Scriptural verses which conclude the section "U-ba' le-Ẓiyyon" and immediately precede the "Ne'ilah" prayer in the Ashkenazic liturgy. The transcription given on page 87 follows the tradition of Bevis Marks, London.

EL SHADDAI. See GOD.

ELA (HELA, ILAA, ILAI, ILI, LA, LEIA, YELA): Palestinian scholar of the third amoraic generation (third and fourth centuries). In one form or another, his name frequently appears in both Yerushalmi and Babli, mostly in the field of the Halakah. He was so distinguished that his contemporary and friend Zera I., admiring Ela's acumen, exclaimed, "The very air of Palestine imparts wisdom" (B. B. 158b). On two other occasions the same Zera applied to him the epithet "Bannaya d'Oraita" (Builder of the Law: establisher of fine legal points; Yer. Yoma iii. 40c; Yer. Giṭ. vii. 48d).

"Builder of the Law."

He carried his theoretical knowledge into actual life, so that the very appointments of his house afforded object-lessons in rabbinic rites (Yer. Yoma i. 38c; Yer. Meg. iv. 75c). It is related that when on a certain Friday his duties detained him at college till late into the night, and, returning home, he found the entrance barred and the people asleep, rather than desecrate the Sabbath by knocking at the gate for admission, he spent the night on the steps of his house (Yer. Beẓah v. 63a).

In halakic exegetics Ela laid down the guiding rule, "Every textual interpretation must respect the subject of the context" (Yer. Yoma iii. 40c; Yer. Meg. i. 72a). Another and the most frequently cited of his exegetic rules is, "Wherever the Bible uses any of the terms 'beware,' 'lest,' or 'not,' a prohibitory injunction is involved" (Men. 99b, and parallels). Quite a number of exegetical observations applied to halakic deductions are preserved under Ela's name (Yer. Shab. i. 2b, etc.), and he reports like interpretations by his predecessors (Yer. Ma'as. Sh. v. 55d). In the field of the Haggadah, also, Ela is often met (Yer. Shab. ii. 5b, vi. 8c; Yer. Yoma v. 42b, etc.), but as a transmitter of the homilies of others he appears only rarely (Yer. Peah i. 16a; Sanh. 44a). That psychological test of human character as betrayed in the passions produced "by the cup, by cash, and by choler" (בכוסו בכיסו ובכעסו, Er. 65a; compare Derek Ereẓ Zuṭa v.), which some ascribe to this Ela (Ilai), others ascribe to Ilai the tanna (second century).

Exegesis of Job xxviii.

Eulogizing R. Simon b. Zebid, Ela skilfully interweaves several verses from the Book of Job, to which he adds simply their application to Simon's death, thus: "'Where shall wisdom be found? and where is the place of understanding?' (Job xxviii. 12). 'The depth saith, It is not in me: and the sea saith, It is not with me' (*ib.* 14). 'It is hid from the eyes of all living, and kept close from the fowls of the air' (*ib.* 21). The four objects necessary to man, if lost, may be replaced; for 'there is a vein for the silver, and a place for gold where they fine it. Iron is taken out of the earth, and brass is molten out of the stone' (*ib.* 1–2); but when a scholar dies, who can take his place? We have lost Simon: whence shall we procure his like?" (Yer. Ber. iii. 5c, and parallels).

S. S. S. M.

ELADAH (R. V. Eleadah): Son of Tahath and father of Tahath, found in the genealogical list of Ephraim in I Chron. vii. 20, but not mentioned in the list in Num. xxvi. He met his death in a raid upon Gath.

E. G. H. G. B. L.

ELAH: King of Israel; son of Baasha, who seized the throne of northern Israel after the murder of Nadab, the son of Jeroboam, its first king. Before he had reigned two years a conspiracy was organized against him within his corrupt court at Tirzah, and he was slain by Zimri, "captain of half his chariots, . . . as he was . . . drinking himself drunk in the house of Arza, steward of his house" (I Kings xvi. 8–10). Josephus states that Zimri struck his blow when the army, which was the king's defense, was absent fighting at Gibbethon ("Ant." viii. 12, § 4). The family of Elah, experiencing the treatment usual in that semibarbarous age, found no mercy at the hands of the conspirators.

J. JR. C. F. K.

ELAH, THE VALLEY OF (Hebr. "'Emeḳ ha-Elah"): Scene of the combat between David and Goliath (I Sam. xvii. 2, xxi. 9). It is identified with the fertile Wadi al-Sanṭ, rich in oaks, terebinths, and acacias. The older as well as the newer name refers to the trees growing in the valley. The present name is an exact equivalent for an older designation, if Wellhausen's plausible suggestion is correct, that the valley of Shittim, mentioned in Joel iv. (A. V. iii.) 18, is to be found in Wadi al-Sanṭ (Hebr. "shiṭṭah" = Arabic "sanṭ").

E. G. H. F. BU.

ELAM (עילם): The great plain north of the Persian Gulf and east of the lower Tigris and the mountainous districts by which it is enclosed on the east and north. It is the "Elamtu" of the Babylonians and Assyrians and the "Elymais" of the Greeks—who also called it "Susiana" from the capital Susa (Shushan)—and corresponds nearly to the modern Khuzistan. The name may have originally signified "the front," that is, "the east country," in the Babylonian language; but as the east was to the Babylonians also the mountainous region, a popular etymology connected it with "high land," and this is the meaning of the ideograph employed to designate it. Elam is mentioned frequently in some of the very oldest Babylonian inscriptions. Southern Elam was known as Anshan from the earliest times to the days of the Persian empire.

The political importance of Elam depended upon its attitude toward the empires of the Euphrates and Tigris. Long before the rise of the city of Babylon the old city-states of Accad and Lagash held for a time part of the Elamitic territory, and border warfare was very frequent.

Two well-marked eras must be specially noted. One is the period in the twenty-third century B.C., when the Elamites conquered the city of Ellasar (Larsa) and subjected the whole of Babylonia. At this epoch two expeditions were made to Palestine under the leadership of Elam (referred to in Gen. xiv). The other era is marked by the prolonged resistance offered by Elam to the Assyrians in the eighth and seventh centuries B.C. Assurbanipal, after he had crushed and annexed Babylonia, put an end to the independence of Elam itself by taking the capital Susa (645 B.C.) and making the whole country one of his many provinces. After the downfall of Assyria, northern Elam became subject to the victorious Medes, and somewhat later southern Elam was occupied by the Persians, so that Anshan was the hereditary domain of Cyrus the Great.

In Gen. x. 22 Elam is made a son of Shem along with Asshur, but the Elamites were not Semites either in race or language. The allusion in Isa. xxii. 6 is also obscure.

The subjection of Elam by Persia is predicted in Jer. xlix. 34-39. In Isa. xxi. 2 Elam is mentioned with Media as about to subvert Babylon. Here "Elam" is put by synecdoche for "Anshan" before the title of "King of Persia" had been assumed by Cyrus. Other references to Elam are Jer. xxv. 25, Ezek. xxxii. 24, and Ezra iv. 9.

EL'ASAH: Amora, whose epoch is uncertain; known chiefly on account of a controversy which he had with a certain Philippus (or a philosopher). The latter remarked: "Does not the prophet say concerning Edom (Mal. i. 4), 'They shall build, but I will throw down'? And yet, behold, whatever they builded still stands!" Thereupon El'asah said: "Scripture does not mean material building, but machinations. As much as ye plan and devise against us, to upbuild yourselves and to destroy us, the Holy One—blessed be He!—annihilates it all." "As thou livest," then admitted the first, "so it really is. We often make attempts to destroy you, but some elder appears and prevents our accomplishing anything" (Midr. Teh. ix. 7; Yalḳ., Mal. 587 reads "Eliezer").

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 761.

S. S. S. M.

ELATH (אילת or אילות; in the Sinaitic inscriptions אילת): Idumean port at the northern end of the Ælanitic Gulf, the later Aila. According to the Old Testament, the name of the place is also El-paran. In Deut. ii. 8 it is mentioned with Ezion-geber (comp. I Kings ix. 26; II Chron. viii. 17). In Solomon's time the city came into the possession of the Israelites, but afterward it was probably taken from them. Later Uzziah reconquered it (II Kings xiv. 22; II Chron. xxvii. 2), but under Ahaz it was again lost (II Kings xvi. 6). The old city owed its name to the abundance of palms in the vicinity.

ELBOGEN, ISMAR: German scholar; born at Schildberg Sept. 1, 1874. Educated by his uncle, Jacob Levy, author of the "Neuhebräisches Wörterbuch," and then at the gymnasium and the Jewish Theological Seminary in Breslau, he received his doctor's degree from the Breslau University. He obtained his rabbinical diploma in 1899 and was appointed lecturer on Biblical exegesis and Jewish history at the Collegio Rabbinico Italiano in Florence. In 1902 he became privat-docent at the Lehranstalt für die Wissenschaft des Judentums, Berlin. Elbogen's writings include: "Der Tractatus de Intellectus Emendatione und Seine Stellung Innerhalb der Philosophie Spinoza's," Breslau, 1898; "In Commemorazione di S. D. Luzzatto," Florence, 1901; "Die Neueste Construction der Jüdischen Geschichte," Breslau, 1902.

S.

ELCESAITES: A Judæo-Christian sect of Gnostic tendencies, whose period of influence extended from about 100 to 400. The Church Fathers, who alone mention the sect, derive the name from the alleged founder—’Ηλξαί (Epiphanius), ’Ηλχασαί (Hippolytus), or Ελκεσαί (Eusebius, Theodoretus). Epiphanius, who mentions as Elkesai's brother a man called Ιεξέος ("Hæreses," xix. 1), explains the name as being derived from the Hebrew [Aramaic] חל = "strength" and כסיא = "hidden"; with which the name ’Ιεξέος = יה כסיא corresponds, both names designating their owners as the teachers of the "hidden power" and "the hidden God." At the time of Epiphanius the "saints" of the Elcesaites were two women—Martha ("mistress") and Marthana ("our mistress").

The Holy Book of the Elcesaites.

The Elcesaites based their doctrine on a book which they claimed either had fallen from heaven, or had been given by an angel to Elkesai at Seræ, Parthia, Elkesai then giving it to Σοβιαί ("the Baptist"; from צבע). Fragments of this book, found in the works of the Church Fathers, have recently been collected by Hilgenfeld ("Elxai Libri Fragmenta," in his edition of "Hermæ Pastor," 1889, pp. 228-240). But the date of the book is uncertain; Ritschl and Harnack assign it to the second half or the close of the second century, while others, following the statement of Hippolytus (*l.c.*)

place it about 100. The book is characterized by Epiphanius as containing the doctrine of persons "who are neither Jews nor Christians nor pagans, but hold a middle position between these" ("Hæreses," liii. 1); and in fact the creed of the Elcesaites contains such a mixture of Jewish, Christian, and pagan elements that a classification of the sect is extremely difficult. They must be regarded as Jewish because they expressly insisted on "the rule of the Law," and held that "the faithful must be circumcised and live according to the Law" (Hippolytus, "Hæreses," ix. 14). Special emphasis was laid on the observance of the Sabbath (*l.c.* ix. 16), and the turning of the face toward Jerusalem during prayer (Epiphanius, *l.c.* xix. 3). At the same time they asserted that sacrificing had not been enjoined upon the Patriarchs, and condemned it altogether (compare Uhlhorn, "Homilien und Recognitionen," p. 396).

Elcesaite Baptism.

The Christo-Messianology of the book is very ambiguous. The Messiah is conceived, on the one hand, as an angel of giant dimensions, a concept that recalls Shi'ur Ḳomah in the Cabala, and Adam in the Haggadah; and, on the other hand, the doctrine of the continuous incarnation of the Messiah from Adam to Jesus (see Adam Ḳadmon) is taught. A strongly marked naturalistic-pagan element is found in the prescribed ablutions which among the Elcesaites answered to the Christian baptism. Water was held sacred by them—an ancient pagan conception widely spread, especially in Babylonia (Anz, "Ursprung des Gnostizismus," pp. 99 *et seq.*); hence the Elcesaites preached not only forgiveness of all sins with the new baptism, but also enjoined ablutions against madness, consumption, and possession. During baptism they invoked, besides God and His son, the great king, also heaven, earth, water, oil, and salt, representing the five elements, according to the ancient Semitic conception. It may also be gathered from Hippolytus' quotations from the book of the Elcesaites that astrology and magic were prominent in their religion. The doctrine of Elcesai is as follows: "There exist wicked stars of impiety. This declaration is now made by us: O ye pious ones and disciples, beware of the power of the days of the sovereignty of these stars, and engage not in the commencement of any undertaking during the ruling days of these." The Sabbath is important as "one of those days during which prevails the power of these stars." For a similar astrological reason no work must be begun on the third day from the Sabbath—Monday (Hippolytus, *l.c.*; compare Astrology; Mandæans). The asceticism of this sect, which forbade the eating of meat, but maintained the sanctity of marriage, must be noted.

Relation to Other Judæo-Christian Sects.

According to Epiphanius, Elcesai and his brother Jexai had joined the Ossæans, probably identical with the Essenes, who, as well as the related sect of the Nazarites, recognized Elcesai's authority. They lived in the region beyond the Jordan, offering no sacrifices, and condemning the use of meat. The Elcesaites, then, represent the stage of transition from those Jewish sects to the Christian heresy of the Sampsæans—as a section of the Elcesaites was called at the time of Epiphanius—and to those circles in which the Clementine Homilies originated, the doctrines of which are very similar to those of the Elcesaites; but while the pagan and Jewish elements preponderate over the Christian among the Elcesaites, in the Clementine Homilies the reverse is the case (compare Clementina; Ebionites; Judæo-Christians).

K. L. G.

ELCHE: City in the former kingdom of Valencia. When Don Jaime I. of Aragon took the city from the Moors, he gave houses and land to the Jews he found there, as he did to the other Jews of Valencia, and appointed a special street for them. In 1410 Vicente Ferrer came to Elche to carry on his work of conversion. Those Jews who remained true to their faith fled to Italy and Turkey. Abraham Rondi (perhaps Gerondi) lived here, and corresponded with Isaac ben Sheshet.

ELDAD BEN MAHLI HA-DANI: Merchant and traveler of the ninth century. He professed to have been a citizen of an independent Jewish state in eastern Africa, inhabited by the tribes of Dan (hence his name, "ha-Dani" = "the Danite"), Asher, Gad, and Naphtali. Starting from this alleged state, Eldad visited Babylonia, Kairwan, and Spain, causing everywhere a great stir among the Jews by his fanciful accounts of the Lost Ten Tribes, and by the halakot which he asserted he had brought from his native country. These halakot, written in Hebrew, deal with the slaughtering and subsequent examination of animals. They differ widely from the Talmudic ordinances, and are introduced in the name of Joshua ben Nun, or, according to another version, of Othniel ben Kenaz. Eldad's accounts soon spread, and, as usual in such cases, were remodeled and amplified by copyists and editors. There are no less than eight versions with important variations. The following is a summary of Eldad's narrative according to the most complete of these versions:

His Alleged Travels.

On leaving the land "on the other side of the river of Kush," Eldad traveled with a man of the tribe of Asher. A great storm wrecked the boat, but God prepared a plank for him and his companion, on which they floated until thrown ashore among a cannibal Ethiopian tribe called "Romrom." (As to the existence in former times of such a tribe, see Metz in "Das Jüdische Litteraturblatt," 1877, No. 41.) The Asherite, who was fat, was immediately eaten, while Eldad was put into a pit to fatten. Soon after a fire-worshiping tribe assailed the cannibals, and Eldad was taken prisoner. He remained in captivity during four years, when his captors brought him to the province of Azanian (according to another version, to China), where he was ransomed by a Jewish merchant for thirty-two pieces of gold. Eldad continued his journey, and fell in with the tribe of Issachar, dwelling among high mountains near Media and Persia, their land extending ten days' journey on every side. They are at peace with all, and their whole energy is devoted to the study of the Law; their only weapon is the knife for slaughtering animals. Their judge and prince is called "Naḥshon," and they use the four methods of capital punishment.

The tribe of Zebulon occupies the land extending from the province of Armenia to the River Euphrates. Behind the mountains of Paran the tribe of Reuben faces them. Peace reigns between these two tribes; they war as allies and divide the spoils. They possess the Bible, the Mishnah, the Talmud, and the Haggadah.

The tribe of Ephraim and half of Manasseh dwell in the southern mountains of Arabia, and are very warlike.

The tribe of Simeon and the other half of Manasseh are in the land of the Chazars. They take tribute from twenty-eight kingdoms, and many Mohammedans are subjected to them.

The tribe of Dan emigrated to the land of gold, Havilah (Kush), shortly after the separation of Judah and Israel. The tribes of Naphtali, Gad, and Asher joined the Danites later. They have a king called Adiel ben Malkiel, a prince by the name of Elizaphan, of the house of Elihab, and a judge named Abdan ben Mishael, who has the power to inflict the four capital punishments prescribed in the Law. The four tribes lead a nomadic life, and are continually at war with the five neighboring Ethiopian kings. Each tribe is in the field three months, and every warrior remains in the saddle without dismounting from one Sabbath to the next. They possess the entire Scriptures, but they do not read the Roll of Esther (not having been included in the miraculous salvation mentioned in it) nor Lamentations (to avoid its disheartening influence). They have a Talmud in pure Hebrew, but none of the Talmudic teachers is mentioned. Their ritual is introduced in the name of Joshua, who had received it from Moses, who in his turn had heard its contents from the Almighty. They speak only Hebrew (Eldad himself professed not to understand a word of Ethiopic or Arabic).

On "the other side of the river of Kush" dwell the Bene Mosheh (tribe of Levi). The River Sambation encircles their land. It rolls sand and stones during the six working days and rests on the Sabbath. From the first moment of Sabbath to the last, fire surrounds the river, and during that time no human being can approach within half a mile of either side of it. The four other tribes communicate with the Bene Mosheh from the borders of the river. The Bene Mosheh dwell in beautiful houses, and no unclean animal is found in their land. Their cattle and sheep as well as their fields bear twice a year. No child dies during the lifetime of its parents, who live to see a third and fourth generation. They do not close their houses at night, for there is no theft or wickedness among them. They speak Hebrew, and never swear by the name of God.

Reception of His Story.

This fanciful narrative, the origin of which is to be found in the haggadic literature, of which Eldad must have had a very extensive knowledge, was accepted by his contemporaries as true. The inhabitants of Kairwan were, it is true, troubled by the differences between his halakot and those of the Talmud, and by some strange Hebrew expressions used by him; but the gaon Ẓemaḥ ben Ḥayyim of Sura, whose opinion they had asked, tranquilized them by saying that there was nothing astonishing in the four tribes disagreeing with the Talmud on some halakic points. Moreover, Eldad's personality, asserted the gaon, was known to him through Isaac ben Mar and R. Simḥah, with whom the Danite associated while he was in Babylonia. Ḥasdai ibn Shapruṭ cites Eldad in his letter to the king of the Chazars, and Eldad's halakot were used by both Rabbinites and Karaites as weapons in defense of their respective creeds. Talmudic authorities like Rashi, Abraham ben David (RABaD), and Abraham ben Maimon quote Eldad as an unquestioned authority; and lexicographers and grammarians interpret some Hebrew words according to the meaning given them in Eldad's phraseology.

Source of "Prester John."

The influence of Eldad's narrative extended beyond Jewish circles. It was the source of the apocryphal letter of the so-called "Prester John," which appeared in the twelfth century. Intending to refute Eldad's assertion of the existence of independent Jewish states—an assertion contrary to the teaching of the Roman Church—the Christian writer told of a priest who ruled over the great kingdom of Ethiopia, to which were subject some Jewish tribes, including the Bene Mosheh who dwelt beyond the River Sambation. The only writers of the Middle Ages who expressed doubts as to the genuineness of Eldad's narrative and his halakot were Abraham ibn Ezra (Commentary to Ex. ii. 22) and Meïr of Rothenburg (Responsa, No. 193).

Modern Opinions.

Modern critics are divided in their opinions concerning Eldad. Pinsker, Grätz, and Neubauer saw in him a Karaite missionary endeavoring to discredit the Talmud by his statement that the four tribes did not know the names of the Tannaim and Amoraim, and that their halakot were different from those of the Talmud. This opinion was refuted by Schorr and Jellinek, who observed that Eldad's halakot contain rules concerning the examination of slaughtered animals which are not accepted by the Karaites. P. Frankl regarded Eldad as a mere charlatan whose sayings and doings are not worth attention. Reifmann denied outright the existence of Eldad, and considered the letters of the community of Kairwan and of Ẓemaḥ ben Ḥayyim of Sura to be forgeries. Metz was the first to analyze the contents of Eldad's book in the light of the reports of other travelers. A. Epstein followed Metz's method, and came to the conclusion that Eldad's book is somewhat of the nature of a historical novel in which truth is mixed with imagination. The halakot are, according to him, genuine, and were in use among the countrymen of Eldad, either in a province of eastern Africa or in Yemen, where the Jews at that time knew Hebrew, but not the Talmud. For Eldad could not have been a native of Abyssinia, the country of the Falashas, since there only Geez is spoken; and no trace of this dialect appears in Eldad's Hebrew; there are, however, some traces of Arabic, which Eldad must have known, although he asserted the contrary.

Editions.

Eldad's travels have been published from the various existing versions: Mantua, 1480; Constantinople, 1516; *ib.* 1519; Venice, 1544, 1605, 1648; Fürth, with a Judæo-German translation by S. H. Weil, 1769; Zolkiev, 1772; Jessnitz, 1772; Leghorn, 1828; in Jellinek's "Bet ha-Midrash," iii., vi.; Presburg, 1891 (ed. by Abraham Epstein). As to the differences between the various versions, see D. H. Müller, "Die Recensionen und Versionen des Eldad ha-Dani," in "Denkschriften der Kaiserlichen Akademie der Wissenschaften" (vol. xli. Vienna, 1892). Eldad's narrative was translated into Latin by G. Genebrard (Paris, 1584), and also, anonymously, into Arabic (St. Petersburg MSS. Nos. 674, 703) and into German (Dessau, 1700; Jessnitz, 1723). Extracts of the Hebrew text are given by Bartolocci ("Bibl. Rab.," i. 100) and by Eisenmenger ("Entdecktes Judenthum," ii. 527).

G. I. Br.

ELDAD AND MEDAD (Modad according to the Septuagint): Two men who prophesied in the camp during the wanderings in the wilderness (Num. xi. 26–29). According to an old rabbinical tradition, they predicted the war with Gog and Magog. "The king from the land of Magog will unite all the hosts of the heathen in a warfare on the soil of Palestine against the Jews returning from the Exile at the Messianic time, but the Lord [קירים = Κύριος] will be ready in the time of distress and slay them with the fire issuing forth from His throne, and their bodies will fall upon the mountains of the land of Israel and be eaten up by the wild beasts and the birds of heaven. Then will all the dead of the people of Israel be revived and partake of the bliss prepared for them from the beginning" (Targ. Yer. to Num. xi. 26; comp. Sanh. 17a; Tan., Beha'aloteka, ed. Buber, 22). According to the fragment of Targum Yer. (*ib.*), the heathen will fall into the hand of the Messiah (comp. Bacher, "Ag. Tan." i. 88, ii. 119; "Monatsschrift," 1857, pp. 346 *et seq.*).

This Messianic prophecy of Eldad and Medad seems to have been made the subject of a special work, consisting of 400 lines, which circulated in the first Christian century; it is quoted in the "Shepherd of Hermas," vision ii. 3, as containing the sentence found also in the Targum: "The Lord [Κύριος] is nigh to those in distress." See Schürer, "Gesch." 3d ed., iii. 266.

E. G. H. K.

ELDER, or ZAKEN: In primitive times age was a necessary condition of authority. Not only among the ancient Jews, but also among other nations of antiquity, the elders of the nation or of the clan constituted the official class. The institution of elders existed among the Egyptians (Gen. l. 7), among the Midianites (Num. xxii. 7), and later among the Greeks (*γέροντες* or *πρεσβύτεροι*) and Romans ("patres" or "senatus"). Although the Talmud (Yoma 28b) points to the existence of such an institution in the time of Abraham, no distinct mention is made of it in the Bible until the period of the Exodus. Moses is commanded to assemble the elders of the people, and to assure them of a speedy redemption from Egyptian bondage (Ex. iii. 16, 18). Afterward the elders occupied an important position in the communal as well as in the political affairs of the Jewish people. It is not certain that they were elected by the people, although they were considered their representatives, and were frequently identified with the "'am" (people) itself in the Bible (Ex. iv. 29; xix. 7, 8; xxiv. 1; Josh. xxiii. 2 *et al.*).

The position and function of the elder are nowhere clearly defined. "What there was of permanent official authority lay in the hands of the elders and heads of the houses; in times of war they commanded each his own household, and in peace they dispensed justice each within his own circle" (Wellhausen). They were the defenders of the interests of their constituents, and were especially powerful in local or municipal affairs (Deut. xix. 12, xxi. 2, xxii. 15, xxv. 7; Josh. xx. 4; Ruth iv. 2). Together with the priests, they sometimes participated in certain sacrificial rites (Lev. iv. 15, ix. 1). In national affairs they held a very important position. It was at the request of the elders that Samuel consented to a monarchical form of government in Israel (I Sam. viii. 4). It was through their intervention that Abner succeeded in appointing David king over Israel (II Sam. iii. 17). The elders were accomplices in the conspiracy of Absalom (II Sam. xvii. 4); to them Rehoboam first turned for advice (I Kings xii. 6), and they were also a prominent factor in the proceedings brought against Naboth by Jezebel (I Kings xxi. 8–13).

It is not known whether all the officers of the commonwealth were chosen from the body of elders (compare Ex. xviii. 25 and Num. xi. 16). As judges, however, and as the chief representatives of the people, the elders enjoyed their authority for a long period. The Mishnah speaks of the elders as the recipients of the oral law from Joshua (Abot i. 1), and as the forerunners of the Sanhedrin (Sanh. 2a). The institution of elders flourished during the period of the Babylonian Exile (Ezek. viii. 1, xiv. 1, xx. 1), and continued in Palestine during the Persian and Greek periods (Ezra v. 5, 9; vi. 7, 14; x. 8; I Macc. vii. 31; xii. 6, 35; xiii. 36; Judith vi. 21, vii. 23, viii. 33, x. 6; and in Susanna). See Judge; Patriarchal Family and Authority; and especially Sanhedrin.

ELDER, REBELLIOUS (= זקן ממרה): An elder who defies the authoritative rabbinic interpretation of the Mosaic Law. In the period when the Sanhedrin flourished this was a capital offense, punishable by strangulation (Sanh. xi. 1). This is based on Deut. xvii. 8–13, and according to the Talmud refers not to an ordinary man who refuses to abide by the decision of the priest or the judge, but to a regular ordained rabbi, or a judge, or an elder over the age of forty, or one of the twenty-three jurists constituting the minor Sanhedrin of a city or town. If such a judge dared to defy the decision of a majority of the major Sanhedrin, he became liable to the penalty of strangulation. R. Meïr, however, would convict only an elder whose opposition concerned a criminal act which, if committed unintentionally, would entail a sin-offering, or, committed intentionally, would be punished with excision (= כרת). According to R. Judah, the elder could be convicted only of a schismatic decision concerning a law which had its origin in Scripture, but the interpretation of which was left to the Soferim.

The mode of procedure in such cases of contumacy is related in the Mishnah. There were three tribunals (in Jerusalem), one at the foot of the Temple hill (Mount Moriah), another at the entrance to the court of the Temple, and another at the granite corridor (= לשכת הגזית) of the Temple. The associate judges, with the accused, came before the tribunal at the foot of the Temple hill. The accused pleaded: "Thus and so have I expounded the Law, and thus and so have my associates; thus and thus have I taught the people, and thus have my associates." The judges of the tribunals, if they had any tradition bearing upon the case, gave their opinion; if not, they betook themselves to the tribunal at the entrance to the court of the Temple, where the same proceeding was repeated. Finally, they all appeared before the highest tribunal at the granite hall of the Temple, whence came the interpretation of the Torah. The Great Sanhedrin rendered a decision. Should the elder still maintain a schismatic position and persist in asserting it, he became liable to punishment. In this event he was brought before the supreme court for trial, conviction, and execution. According to R. Akiba, the execution took place on the first festival following his conviction, when, as a rule, the people were gathered together in Jerusalem, so "that the people may hear and fear." R. Meïr thought such a delay cruel, and would have had the culprit executed immediately after his conviction, which would be followed by a reproclamation announcing the execution. The rebellious elder was classed with three other offenders: one who incites to idolatry (= מסית), a rebellious son, and a perjured witness. In all these cases the execution was publicly announced (Sanh. 89a).

The question whether the supreme court might pardon the rebellious elder and overlook the insult done it by his dissent is a controverted point, and the opinion of the majority was that pardon was not permissible, as this would increase the number of schisms in Israel (Sanh. 88a and b).

S. S. J. D. E.

ELEAD: A descendant of Ephraim, found in the genealogical list in I Chron. vii. 21. He joined a party of raiders to take away the flocks of Gath, and was killed by the Gittites. The name does not appear in the genealogical list in Numbers.

E. G. H. G. B. L.

ELEALAH: Town of the Moabite plateau, conquered by Gad and Reuben and rebuilt by the latter (Num. xxxii. 3, 37). It is mentioned, together with the town of Heshbon, in the prophecies concerning Moab (Isa. xvi. 9). Elealah was still known in Roman times, and is to-day identified with the mound of débris called "Al-'Al" about a mile north of Heshbon.

E. G. H. E. I. N.

ELEAZAR: **1.** High priest; third son of Aaron. After his two elder brothers, Nadab and Abihu, had suffered death for offering strange fire before the Lord, Eleazar became his father's chief assistant, with the title "prince of the princes of the Levites" (Num. iii. 32), his functions including the supervision of the oil for the seven-branched candlestick, the incense, and all that pertained to the inner sanctuary (*ib.* iv. 16). Shortly before Aaron's death Eleazar was clothed in his father's official garments to signify that he was Aaron's successor (*ib.* xx. 25-28). God's commands were now addressed to Moses and Eleazar (*ib.* xxvi. 1), and Eleazar is mentioned as God's second representative in Israel, beside Moses (*ib.* xxxii. 28), and even before Joshua (Num. xxxii. 28, xxxiv. 17; Josh. xiv. 1, xvii. 4, xix. 51, xxi. 1). He was the progenitor of most of the high priests. He was buried "in Gibeah, of Phinehas his son, which was given him in the hill country of Ephraim" (Num. xxiv. 33, R. V.).

Eleazar is said to have added to the Book of Joshua the section xxiv. 29-32 (B. B. 15a, l. 27), and his son Phinehas, verse 33.

E. G. H. E. K.

2. A son of Dodai, an Ahohite (II Sam. xxiii. 9, R. V.), or of Dodo the Ahohite (I Chron. xi. 12); one of the three principal captains of David's army.

3. Fourth son of Mattathias and brother of Judas Maccabeus; surnamed "Avaran" (I Macc. ii. 5, *Αὐαράν*; *ib.* vi. 43, *Σαυαράν* for *Αὐαράν*; Josephus, "Ant." xii. 6, § 1, *Αὐράν*). He distinguished himself by a courageous act at the battle of Bet-Zekaryah (162 B.C.), when the Jews under Judas Maccabeus were hard pressed by the large Syrian army commanded by Lysias and encouraged by the presence of the youthful king Antiochus Eupator. Eleazar, seeing among the enemy's elephants one that was armed with royal breastplates, and that was taller than the rest, concluded that it carried the king. Wishing to put an end to the misery of his people, and being desirous of gaining everlasting fame for himself, Eleazar fought his way through the ranks of the enemy, and, creeping under the elephant, speared it from beneath, the animal crushing him in its fall (I Macc. vi. 43-46; Josephus, *l.c.* xii. 9, § 4; *idem*, "B. J." i. 1, § 5). Because of this deed Eleazar is especially mentioned in a midrash (Rashi to Deut. xxxiii. 11; comp. "Megillat Antiochus," ed. Gaster, verses 63, 64).

II Maccabees does not mention Eleazar; and Josephus modifies the account in his "Wars," following the story of I Macc. vi. 43 only in his "Antiquities." Eleazar is included among the seventy translators of the Bible that are mentioned in the Letter of Aristeas (§ 50); and scholars have assumed that this fictitious name was taken from that of the Maccabean (Wendland, in Kautzsch, "Apokryphen," ii. 3). In the Syrian document, however, the name reads "Eliezer" (Wendland, "Aristeas," p. 143, Leipsic, 1900).

E. G. H. E. K.—S. Kr.

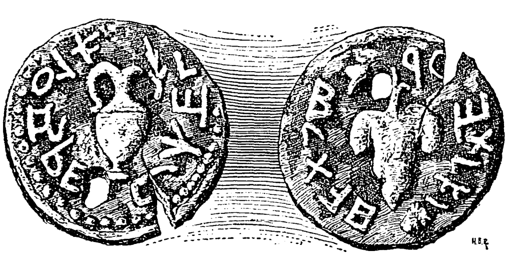
4. Son of Ananias, the high priest. Though belonging to a family which strove to maintain friendly terms with the Romans, he induced his priestly colleagues to discontinue the daily sacrifice for the emperor, and to decline presents from the pagans ("B. J." ii. 17, §§ 2-4), thereby causing a rupture with the Romans. The rebels, under the leadership of Eleazar, took possession of the lower city and the Temple, and fought for seven days with the peace party. The Sicarii under Menahem attacked the peace party, killing Ananias and his brother Hezekiah. This led to a conflict between the parties of Menahem and Eleazar, in which the former was defeated and driven from Jerusalem. Eleazar also attacked the Roman garrison that had retired to the fortified towers—Hippicus, Phasælus, and Mariamne; the Romans capitulated and surrendered their arms on condition of free retreat, but were all massacred by the rebels (Josephus, "B. J." ii. 17, §§ 2–10). Meg. Ta'an. 11 refers to this event.

The Romans retired from Judah and Jerusalem on the 17th of Elul. It seems that Eleazar had coins struck in his name, with the inscription: "The First Year of the Liberation of Jerusalem." On the organization of the rebellion Eleazar, with Jesus b. Sapphias, was appointed general of Idumea ("B. J." ii. 20, § 4, reading *'Ανανίου* instead of *υἱὸν Νέου*). Grätz's opinion that Eleazar is identical with Eleazar b. Ananiah b. Hezekiah Garon is inadmissible. In Yosippon, ch. 95–97, Eleazar b. Ananiah is confounded with Eleazar ben Jair (see ALBINUS; ANANIAS).

BIBLIOGRAPHY: Grätz, *Gesch.* 4th ed., iii. 453, 471; Schürer, *Gesch.* 3d ed., i. 602; Schlatter, *Zur Topographie und Gesch. Palästinas*, p. 368; Madden, *History of Jewish Coinage*, pp. 161–166; Levy, *Gesch. der Jüdischen Münzen*, p. 88; *Agadat Shir ha-Shirim*, ed. Schechter, pp. 47, 96.

5. Priest and treasurer of the Temple of Jerusalem. Eleazar, anxious to save the costly curtains of the Temple from the greed of Crassus, who had seized the treasure of the Temple amounting to 2,000 talents, gave him a golden beam weighing 300 minæ, the existence of which was unknown to the other priests on account of its wooden casing. He made Crassus swear to spare the rest of the Temple. Crassus, notwithstanding his oath, took all the gold of the Temple (Josephus, "Ant." xiv. 7, § 1).

6. Leader of the Zealots in the war against Vespasian and Titus; son of Simon (Josephus, "B. J." ii. 20, § 3; iv. 4, § 7; for *υἱὸς Γίωνος* read *Σίμωνος*). He belonged to a noble priestly family. After the defeat of Cestius, Eleazar seized the abandoned impedimenta of the Romans and the treasure of the Temple, and employed the Zealots as armor-bearers ("B. J." ii. 20, § 3). He found an ally in the priest Zacharias, son of Amphikalles, with whose help he supplanted the peaceable high priest Ananias and his party, and admitted the Idumeans into Jerusalem (*ib.* iv. 4, § 1). When the patriot Johannes turned from Giscala to Jerusalem after the subjugation of Galilee, Eleazar would not submit to him, but retired to the court of the Temple with his friends Judah b. Ḥelika and Simon b. Ezron. During the Passover Eleazar's men opened the gates of the court of the Temple, whereupon the followers of Johannes stole in among the pilgrims, overpowered Eleazar's people, and drove them from the court (70 C.E.: *ib.* v. 3, § 1; Tacitus, v. 12).



BRASS COIN OF ELEAZAR BEN SIMON.

Obverse: אלעזר הכוהן—"Eleazar the Priest." A vase; in field to right a palm-branch. *Reverse*: שנת אחת לגאלה ישר[אל]—"The First Year of the Redemption of Israel," round a cluster of grapes.

(After Madden, "History of Jewish Coinage.")

BIBLIOGRAPHY: Grätz, *Gesch.* 4th ed., iii. 509, 526; Schürer, *Gesch.* 3d ed., i. 623, 625; Schlatter, *Zur Topographie und Gesch. Palästinas*, p. 368; Reinach, *Textes d'Auteurs Grecs et Romains*, p. 320; *Prosopographia Imperii Romani*, s.v. *Eleazar*.

7. Martyr in the days of Antiochus Epiphanes. In the religious persecution under Antiochus, Eleazar, a scholar of rank, "and of a noble countenance," at that time "well stricken in years," was compelled to eat pork, his mouth being opened by force. When offered the alternatives of death or renunciation of his faith, he chose the former, in order to set a "noble example to the young." The king's followers desired to protect him, and implored him at least to pretend to obey the commands of the king. Eleazar refused, and died the death of a martyr (II Macc. vi. 18–31). In Antioch (IV Macc. v., vi.), Eleazar's edifying martyrdom, with that of the seven Maccabean brothers, was honored by the Roman Church (Origen, "Exhortatio ad Martyrium," ch. 22–27; "Comm. in Ep. ad Rom." iv. ch. 10; Chrysostom). Cardinal Rampolla's investigations have proved the historical character of the account despite the fact that while the seven martyrs are mentioned in rabbinical legend, Eleazar seems to be unknown to the Rabbis ("Martyre et Sepulture des Macchabées," Bruges, 1900). Grätz had already declared it to be substantially true ("Geschichte," 2d ed., ii. 317). Herzfeld's supposition ("Geschichte des Volkes Jisrael," ii. 75) that Eleazar is identical with Eleazar ben Ḥarsom is untenable.

G. S. KR.

ELEAZAR I. (LAZAR) (Eleazar b. Shammua'): Mishnaic teacher of the fourth generation, frequently cited in rabbinic writings without his patronymic (Ab. iv. 12; Giṭ. iii. 8, incorrectly "Eliezer"; compare Gem. Giṭ. 31b; Yer. Giṭ. iii. 45a, Mishnah and Gem.). He was of priestly descent (Meg. 27b; Soṭah 39a) and rich (Eccl. R. xi. 1), and acquired great fame as a teacher of traditional law. He was a disciple of Akiba (Zeb. 93a, 110b), but owing to the Hadrianic proscriptions of Jewish observances, was not ordained by him. After Akiba's death, however, R. Judah b. Baba ordained Eleazar, together with Meïr, Jose b. Ḥalafta, Judah b. Ila'i, and Simon b. Yoḥai, at a secluded spot between Usha and Shefar'am. The ordainer was detected in the act and brutally slain; but the ordained escaped, and eventually became the custodians and disseminators of Jewish tradition (Sanh. 13b; 'Ab. Zarah 8b).

Mention is made of a controversy between Eleazar and R. Meïr at Ardiska (Tosef., Naz. vi. 1; see Neubauer, "G. T." p. 106). He also maintained halakic discussions with R. Judah b. 'Illai and R. Jose (Tosef., Zeb. v. 4, x. 10), and quite frequently with R. Simon b. Yoḥai (Sheḳ. iii. 1; Yoma v. 7); but he never appeared with them at the sessions of the Sanhedrin at Usha. Hence it may be assumed that he did not return to the scene of his ordination. Wherever he settled, he presided over a college to which large numbers of students were attracted ('Er. 53a; Yer. Yeb. viii. 9d; compare Mek., Beshallaḥ, Amalek, i.), among whom are named Joseph or Issi ha-Babli (Tosef., Zeb. ii. 17; Men. 18a), and the compiler of the Mishnah, R. Judah I. ('Er. 53a); and thus, while his name does not appear in rabbinic lore as often as the names of his colleagues at the ordination, Eleazar had an ineradicable influence on the development of the Talmud. Abba Arika styles him "the most excellent among the sages" (טובינא דחכימי, Ket. 40a; Giṭ. 26b), and R. Johanan expresses unbounded admiration for his large-heartedness ('Er. 53a).

His Motto.

Eleazar's motto was, "Let the honor of thy pupil be as dear to thee as that of thy colleague; that of thy colleague, as the reverence of thy master; and the reverence of thy master, as that of the Most High" (Ab. iv. 12; Ab. R. N. xxvii. 4). His disciples once requested him to tell them whereby he merited unusual longevity, when he replied, "I have never converted the Synagogue into a passageway [for the sake of convenience]; have never trodden over the heads of the holy people [*i.e.*, come late to college and stepped between the rows of attentive students; compare Abdan]; and have never pronounced the priestly blessing before offering the benediction preceding it" (Meg. 27b; Soṭah 39a). When asked what merits will save man from the tribulations which are to precede the Messianic epoch, he replied, "Let him engage in the study of the Law and in deeds of benevolence" (Sanh. 98b). According to Eleazar, children as well as pious adults share in the glory of God (Midr. Teh. xxii. 31). He also taught that the world rests on a single pillar, the name of which is "Righteousness"; as the Bible says (Prov. x. 25, Hebr.), "The righteous is the foundation of the world" (Ḥag. 12b).

The following anecdote concerning Eleazar is twice told in the Midrashim (Lev. R. xxiii. 4; Cant. R. ii. 2): R. Eleazar visited a certain place where he was invited to lead the people in prayer, but he avowed inability to do so. "What!" cried the astonished people; "is this the celebrated R. Eleazar? Surely he deserves not to be called 'Rabbi'!" Eleazar's face colored with shame, and he repaired to his teacher Akiba. "Why art thou so crestfallen?" inquired Akiba; whereupon Eleazar related his unpleasant experience. "Does my master wish to learn?" asked Akiba; and, on receiving Eleazar's affirmative answer, Akiba instructed him. Later, Eleazar again visited the scene of his mortification, and the people again requested him to lead them in prayer. This time he readily complied with their request, whereupon the people remarked, "R. Eleazar has become unmuzzled" (איתחסם, from חסם = "to muzzle"), and they called him "Eleazar Ḥasma" (compare Geiger, "Schriften," iv. 343). The hero of this anecdote is doubtless the subject of the present article, and not, as is generally assumed, Eleazar Ḥisma. The latter was never Akiba's pupil. Indeed, he was Akiba's senior, and in the account of a halakic discussion between him and Eleazar b. Azariah and Akiba, his name precedes that of Akiba (Neg. vii. 2; Sifre, Deut. 16). Eleazar I. was an acknowledged disciple of Akiba, and the Midrashim explicitly state that he "went to Akiba, his teacher."

S. S. S. M.

ELEAZAR II. (LAZAR): Palestinian amora of the third century (second and third generations). In the Midrashim he is frequently cited with his patronymic, **Eleazar b. Pedat,** but in the Talmudim only occasionally so. He was a Babylonian by birth (Yer. Ber. ii. 4b; Yer. Sheḳ. ii. 47a) and of priestly descent (Yer. Ber. v. 9d; M. Ḳ. 28a). In his native country he was a disciple of Samuel ('Er. 66a; B. B. 82b), and more especially of Rab (B. B. 135b; Ḥul. 111b), whom he in after years generally cited by the appellation "our teacher" (Giṭ. 9b; B. B. 152a), and whose college he revered above all others, recognizing in it the "lesser sanctuary" of the Diaspora, spoken of by Ezekiel (xi. 16) as promised to the exiles in Babylonia (Meg. 29a; Yalḳ., Ezek. 352). When and why he left his native country is not stated; but from the data extant it appears that his ardent love for "the land of Israel" (Ket. 111a), and the superior opportunities which Palestine afforded for religious practises (Yer. R. H. ii. 58b; Ket. 112a), impelled him to emigrate thither—and at a comparatively early age, since some of Rabbi's contemporaries were still alive and active (B. B. 87a; Ḥul. 110a). Indeed, it seems that for a time Eleazar even attended the lectures of R. Ḥiyyah (Yer. Ket. ix. 33b; Yer. B. M. x. 12c) and of R. Hoshaiah (Yer. Yeb. iv. 5d). This was for him a period of hard study, which gave rise to the homiletic remark that the Biblical saying (Prov. v. 19), "Be thou ravished always with her love," was well illustrated by Eleazar b. Pedat at Sepphoris, who was so absorbed in his studies as to be unconscious of all worldly needs ('Er. 54b).

At Tiberias.

Later, Eleazar became attached to the college founded by R. Johanan at Tiberias (Yer. Ber. ii. 4b; Tem. 25b; Ker. 27a), where his scholarship procured him great honors. In the city he was associated with Simon b. Eliakim in the office of judge (B. Ḳ. 117b), and at the college he occupied the position of colleague-disciple (חבר ותלמיד) of Johanan (Yer. Sanh. i. 18b), who himself repeatedly admitted that Eleazar had enlightened him (Yer. Meg. i. 72c; Yer. Sanh. iii. 21b), once declaring that "the son of Pedat sits and interperts the Law as did Moses at the direct inspiration from the Almighty" (Yeb. 72b). After the death of Simeon b. Laḳish, Eleazar was chosen to fill the position of assistant to Johanan (B. M. 84a). When Johanan became disabled through grief at Simeon's death, Eleazar presided over the college (Yer. Meg. i. 72b), and after the death of Johanan succeeded him in the office of head master.

The fame of Eleazar as an expert expounder of the Law having reached Babylonia, his most prominent contemporaries there addressed to him intricate halakic questions, to which he returned satisfactory answers (Beẓah 16b; Yer. Ḳid. i. 60c; B. B. 135b; Ḥul. 86b). This happened so often that he became known in his native country as the "master [*i.e.*, legal authority] of the land of Israel" (Yoma 9b; Giṭ. 19b; Niddah 20b); and anonymous decisions introduced in the Babylonian schools with the statement שלחו מתם ("They sent word from there"; Beẓah 4b; Giṭ. 73a) were understood, as a matter of course, to emanate from Eleazar b. Pedat (Sanh. 17b).

Eleazar was averse to the study of esoterics (Ḥag.

His Views on Study.

13a). With reference to this study, he would cite the saying of Ben Sira (Ecclus. [Sirach] iii. 21), "Seek not things that are too hard for thee, and search not out things that are above thy strength" (Yer. Ḥag. ii. 77c). He prized knowledge above all things; therefore he remarked, "He who possesses knowledge is as great as if the Temple were rebuilt in his days" (Sanh. 92a); and from Job xx. 21 he teaches that he who does not contribute toward the support of scholars will not be blessed in his property (*ib.*). Eleazar was exceedingly poor, and often lacked the necessaries of life (Ta'an. 25a). He frequently sang the praises of charity. "The practise of charity," he was wont to say, "is more meritorious than all oblations; as the Bible says (Prov. xxi. 3), 'To do justice [Hebr. צדקה] and judgment is more acceptable to the Lord than sacrifice' [Suk. 49b]. He who practises charity secretly is greater [in the sight of God] than Moses himself; for Moses himself admitted (Deut. ix. 19), 'I was afraid of the anger,' while of secret charity the Bible says (Prov. xxi. 14), 'A gift in secret pacifieth anger'" (B. B. 9b). Benevolence and acts of loving-kindness, גמילות חסדים, extending to both rich and poor, are, according to Eleazar's interpretation, even greater than charity; as the Bible says (Hosea x. 12), "Sow to yourselves in righteousness [Hebr. לצדקה], reap in mercy [חסד]." With reference to צדקה, the Bible uses "sowing," indicating an operation that leaves it in doubt whether the sower will or will not enjoy the fruit; while with reference to mercy "reaping" is used, an occupation that renders the enjoying of the results very probable (Suk. 49b). From the same Scriptural expression Eleazar draws the lesson, "Charity is rewarded only in proportion to the kindness in it" (*ib.*); that is, the pleasant and thoughtful way in which it is given, and the personal sacrifice it involves.

Poor as he was, Eleazar would never accept any gifts, or even invitations to the patriarch's table. When any were extended to him, he would decline them with the remark, "It seems that ye do not wish me to live long, since the Bible says (Prov. xv. 27), 'He that hateth gifts shall live'" (Meg. 28a; Ḥul. 44b). His scant earnings he would share with other needy scholars; thus, he once purposely lost a coin in order that poverty-stricken Simon b. Abba, who was following him, might find it. When the latter did find it and offered to restore it, Eleazar assured him that he had renounced its ownership and forfeited all rights thereto, and that consequently it was the property of the finder (Yer. B. M. ii. 8c). It is also reported as his custom first to offer a mite to the poor, and then to offer prayer to God (B. B. 10a). Even to impostors he would never refuse charity. "Were it not for the existence of impostors, not a single refusal of charity could ever be atoned for; we therefore ought to show gratitude to them" (Yer. Peah viii. 21b; Ket. 68a).

There are no data to show how long Eleazar survived R. Johanan, but the probability is that he died about 279 C.E.

ELEAZAR B. ABINA: Palestinian haggadist of the fourth amoraic generation (fourth century C.E.); junior contemporary of Aḥa III., in whose name he repeats some homiletic remarks (Pesiḳ. R. xiv. 60b, xxi. 109b), and senior of R. Yudan, who reports in his name (Midr. Teh. xxxi. 7).

One of the homilies bearing Eleazar's name argues that the observance of the Sabbath is tantamount to all other commandments combined, which he tries to prove from passages in each of the three divisions of the Bible—the Pentateuch (Ex. xvi. 28, 29), the Prophets (Ezek. xx. 13), and the Hagiographa (Neh. ix. 13, 14).

ELEAZAR, ABRAHAM: Fictitious author of an ancient work on alchemy published in Leipsic in 1760, and bearing the title "R. Abrahami Eleazaris Uraltes Chymisches Werk." The real author seems to have been Julius Gervasius of Schwarzburg, whose name is given as the editor on the title-page of the first part. In the preface it is stated that Abraham took not only his alchemistic notions, but also the illustrations, from the copper tablets of Tubal Cain. The edition of 1760 is said on the title-page to be the second. The second part also pretends to be by Abraham Eleazar, who asserts that he merely reproduces what was engraved upon the copper tablets by a certain Jew, Samuel Baruch. It is further stated that the original was written in Latin, Arabic, Chaldaic, and Syriac.

G.

ELEAZAR BEN AḤWAI (AḤBAI): Probably identical, according to Bacher ("Ag. Tan." ii. 553), with Eleazar b. Maḥbai or Maḥbai, a tanna of the second century, contemporary of Judah b. Bathyra and Aḥa I. (Tosef., Yeb. xiv. 4). He is cited but twice under this name. His most important remark is with regard to the Pentateuchal expression לאמר ("saying"; literally, "to say"), which frequently follows the statement, "God spake to Moses," and which he explains as implying that God spake to Moses not in Moses' interest, but in that of Israel: He spake to Moses *to say* to the people (Sifra, Wayiḳra, ii. 13; compare Yalḳ., Lev. 431, where the patronymic is "Dehabai").

S. S. S. M.

ELEAZAR BEN 'ARAK: Tanna of the second generation (first century C.E.). Being first among the disciples of R. Johanan ben Zakkai (Ab. ii. 8; Ab. R. N. xiv. 3), he delighted his master with his wisdom and penetration, so that the most extravagant encomiums were lavished upon him. It was said, "Were all the sages of Israel placed in one scale, and Eleazar b. 'Arak in the other, he would outweigh them all" (Ab. *l.c.*; Ab. R. N. xiv. 4), while his great master styled him "Rising Well" or "Gushing Stream" (מעין המתגבר, נחל שוטף, *ib.*). The master once propounded the question, "Which acquisition is best for man to strive after?" Several solutions were handed in, among them one from Eleazar, who suggested, "A good heart" (לב טוב); thereupon Johanan remarked, "I prefer Eleazar's solution to all of yours, since yours are included in his" (Ab. ii. 9; Ab. R. N. xiv. 5). Again, the master propounded, "Which is the worst characteristic that man should shun?" In this case, also, Eleazar's reply, "An evil heart," was accepted by the teacher (*ib.*). Compare Beruriah; Consolation.

In the mystical interpretation of the Scriptures, also, Eleazar distinguished himself, and to such an extent as to call forth his master's ecstatic exclamation, "Happy art thou, O father Abraham, from whose loins sprang Eleazar b. 'Arak" (Yer. Ḥag. ii. 77a). To his counsel, often sought and always beneficial, was applied the Biblical expression (Ps. i. 3), "Whatsoever he doeth shall prosper." Beneficiaries of his counsel in their admiration styled him "Prophet"; whereupon he remarked, "I am neither a prophet nor the son of a prophet, but my teachers have communicated to me the traditional verity that every counsel subserving the promotion of the glory of God realizes good results" (Midr. Teh. i. 3.). His motto was, "Be diligent in the pursuit of study; be prepared to answer the Epicurean, and realize for whom thou laborest and who thy employer is."

Eleazar in Emmaus.

Eleazar's name is connected with but few halakot, and with only one halakic midrash. The reason for this disappointing paucity of doctrines and sayings is found in the story of the period immediately succeeding the death of Johanan b. Zakkai. The disciples chose Jabneh for their scene of activity, while Eleazar went to Emmaus, the residence of his wife—a particularly healthful place, blessed with good water, a pleasant climate, and warm baths. Separated from his colleagues, his faculties became stunted; and he is said to have completely forgotten all he had ever learned (Ab. R. N. xiv. 6; Eccl. R. vii. 7). In later years he was pointed out as a warning to the self-opinionated; the Talmud applying to him the motto of R. Nehorai: "Inter thyself in a place where the Law is studied, and think not that it will seek thee; for only thy colleagues will perpetuate it in thy possession: rely not on thine own understanding" (Shab. 147b; Ab. iv. 14).

ELEAZAR B. ARYEH. See Löw, Eleazar.

ELEAZAR B. AZARIAH: Mishnaic scholar of the second generation (first century c.e.); junior contemporary of Gamaliel II., Eliezer b. Hyrcanus, and Joshua b. Hananiah, and senior of Akiba (Sifre, Deut. 32; Sanh. 101a). He traced his pedigree for ten generations back to Ezra (Ber. 27b; Yer. Yeb. i. 3b), and was very wealthy (Shab. 54b; Beẓah 23a; compare Ḳid. 49b). These circumstances, added to his erudition, gained for him great popularity. When Gamaliel II., in consequence of his provoking demeanor, was temporarily deposed from the patriarchate, Eleazar, though still very young, was elevated to that office by the deliberate choice of his colleagues. He did not, however, occupy it for any length of time, for the Sanhedrin reinstated Gamaliel. He was retained as vice-president ("ab bet din"), nevertheless, and it was arranged that Gamaliel should lecture three (some say two) Sabbaths, and Eleazar every fourth (or third) Sabbath (Ber. 27b *et seq.*; Yer. Ber. iv. 7c *et seq.*; Yer. Ta'an. iv. 67d).

Journey to Rome.

In company with Gamaliel, Joshua, and Akiba, he journeyed to Rome (Kallah R. vii.; Derek Ereẓ R. v.). Neither the object of the journey nor the result of the mission is stated; but that affairs important as pressing were involved is apparent from the season at which the journey was undertaken: they celebrated the Feast of Booths aboard the ship (Sifra, Emor, xvi. 2; Suk. 41b). With the same companions Eleazar once visited the ruins of the Temple at Jerusalem (Sifre, Deut. 43). On a visit to the aged Dosa b. Harkinas the latter joyfully exclaimed, "In him I see the fulfilment of the Scriptural saying (Ps. xxxvii. 25): 'I have been young, and now am old; yet have I not seen the righteous forsaken, nor his seed begging bread'" (Yeb. 16a; Yer. Yeb. i. 3c *et seq.*), by which he probably alluded to Eleazar's great learning and his proverbial wealth. The latter was amassed by dealing in wine, oil (Tosef., 'Ab. Zarah, v. 1; B. B. 91a), and cattle (Shab. 54b; Beẓah 23a). Subsequent generations entertained the belief that dreaming of Eleazar b. Azariah presaged the acquisition of wealth.

His Exegetic Principle.

With Eleazar's accession to the patriarchate the portals of the academy were opened wide to all who sought admittance. It is said that three hundred benches had to be added for the accommodation of the eager throngs which pressed into the halls of learning. Under his presidency, too, a review of undecided points of law was undertaken. To Eleazar rabbinic homiletics owes the introduction of the rule called סמוכין (= "contiguous"), by which one Scriptural passage is explained or supplemented by another immediately preceding or succeeding it. Thus, Eleazar declares that the slanderer and the listener and the false witness deserve to be thrown to the dogs. He derives this idea from the juxtaposition of the expression (Ex. xxii. 30 [A. V. 31]), "Ye shall cast it to the dogs," and (*ib.* xxiii. 1) the prohibition against raising false reports, bearing false witness, and associating with the false witness (Pes. 118a; Mak. 23a).

In his homilies he generally aims to bring out some ethical or practical lesson. With reference to the Day of Atonement the Bible says (Lev. xvi. 30), "On that day . . . ye may be clean [Hebr. תטהרו = "ye shall cleanse yourselves"] from all your sins before the Lord." Therefrom Eleazar draws the lesson that the efficacy of the day extends only to sins against God, while sins against man are not forgiven unless the offended party has first been reconciled (Yoma viii. 9; Sifra, Aḥare Mot, viii. 2). The Bible says (Deut. xxiii. 8 [A. V. 7]), "Thou shalt not abhor an Egyptian . . . because thou wast a stranger in his land." Thereupon Eleazar remarks, "The Egyptians admitted the Israelites out of self-interest; nevertheless God accounts their act as one of merit. Now, if he who unintentionally confers a favor is accorded a token of merit, how much more so he who intentionally does a good deed" (Sifre, Deut. 252; compare Ber. 63b). Similar is his deduction from Deut. xxiv. 19, which says, "When thou cuttest down thine harvest in thy field, and hast forgot a sheaf in the field, thou shalt not go again to fetch it: it shall be for the stranger, for the fatherless, and for the widow: that the Lord thy God may bless thee in all the work of thine hands." "Here," argues Eleazar, "the Bible promises blessings to him by whom a good deed is done unintentionally; hence if one unwittingly loses money, and a needy one finds it and sustains life thereon, God will bless the loser for it" (Sifra, Wayiḳra [Ḥoba], xii. 13; Sifre, Deut. 183).

Biblical Interpretations.

Eleazar was independent in his Biblical interpretations. He often rejected Akiba's opinions, remarking, "Even if thou persist the whole day in extending and limiting [see HERMENEUTICS], I shall not harken to thee" (Sifra, Ẓaw, xi. 6; Men. 89a), or, "Turn from the Haggadah and betake thee to the laws affecting leprosy and the defilement of tents" (נגעים ואהלות; Ḥag. 14a; Sanh. 38b). Above all, he strove to be methodical. When one applied to him for information on a Biblical topic, he furnished that; was he called upon to explain a mishnah, a halakah, or a haggadah, he explained each point. Eleazar was opposed to frequent sentences of capital punishment. In his opinion a court that averages more than one execution in the course of seventy years is a murderous court (Mak. i. 10; see CAPITAL PUNISHMENT).

In the following few sentences is comprised Eleazar's practical philosophy:

Wisdom.

> "Without religion there is no true wisdom; without wisdom there is no religion. Where there is no wisdom there is no fear of God; where there is no fear of God there is no wisdom. Where there is no discernment there is no learning; without learning there is no discernment. Where there is a want of bread, study of the Torah can not thrive; without study of the Torah there is a lack of bread.
>
> "With what is he to be compared who possesses more knowledge than good deeds? With a tree of many branches and but few roots. A storm comes and plucks it up and turns it over. Thus also Scripture says (Jer. xvii. 6), 'He shall be like the heath in the desert, and shall not see when good cometh; but shall inhabit the parched places in the wilderness, in a salt land and not inhabited.' But what does he resemble who can show more good deeds than learning? A tree of few branches and many roots. Even should all the winds of heaven rage against it, they could not move it from its place. Thus, the Bible says (*l.c.* 8), 'He shall be as a tree planted by the waters, that spreadeth out her roots by the river, and shall not see when heat cometh, but her leaf shall be green; and shall not be careful in the year of drought, neither shall cease from yielding fruit'" (Ab. iii. 17; Ab. R. N. xxii. 1).

While he lived he enjoyed the encomiums of his famous colleagues, who said, "That generation in which Eleazar b. Azariah flourishes can not be termed orphan" (Ḥag. 3b; Mek., Bo, xvi.); and when he died the learned said, "With the death of R. Eleazar b. Azariah was removed the crown of the sages" (Tosef., Soṭah, xv. 3; Soṭah 49b; Yer. Soṭah ix. 24c).

ELEAZAR OF BARTOTA. See ELEAZAR B. JUDAH OF BARTOTA.

ELEAZAR B. DAMA. See BEN DAMA.

ELEAZAR B. DINAI: Leader of the ZEALOTS (35–60, C.E.). When the Jews of Peræa had boundary disputes with the pagan population of Philadelphia, the procurator Fadus killed Annibas, one of the three leaders, and banished the other two, Amram and Eleazar. The latter may be identical with Eleazar b. Dinai. When Jewish pilgrims traversing Samaritan territory were killed by hostile Samaritans, the Jews in self-defense called Eleazar b. Dinai down from the mountains, and he ravaged Akrabatene.

The procurator Felix succeeded by cunning in capturing Eleazar and his band, sending him in chains to Rome (Josephus, "Ant." xx. 1, § 1; 6, § 1; 8, § 5; "B. J." ii. 12, § 4; 13, § 2).

Rabbinical sources also mention Eleazar. The Midrash to Cant. iii. 5 says that in the days of Amram and (Ben) Dinai the Jews prematurely attempted liberation. Mention is also made of a companion of Eleazar, Teḥina ben Perisha by name, probably the Alexander mentioned by Josephus. Through the example of these two men murders became so frequent that the sacrifice of atonement for an unknown murderer (Deut. xxi. 1–8) was abolished (Soṭah ix. 9; Tosef. xiv. 1; Bab. 47b; Yer. 24a; Sifre, Deut. 205). The wife of Eleazar b. Dinai is also mentioned (Ket. 27a).

G. S. KR.

ELEAZAR B. DURDAIA: A famous penitent, quoted both as a warning against debauchery, which leads to death, and as an encouragement to repentance, which leads to eternal happiness. It is related of him that, after leading a life of licentiousness, he at last bethought himself of his latter end. He mentally sought intercessors among the elements, beseeching them to appeal for his pardon and future peace; but none was found competent to act for him, they themselves being finite, and doomed to annihilation. Concluding that his future depended solely on himself, he prayed and wept until he died. Thereupon, legend adds, a BAT ḲOL announced that Eleazar was assured of happiness in the hereafter. When Rabbi (Judah I.) heard this story, he exclaimed, "Verily, some procure eternal happiness only after toiling many years, while others obtain the same result in a short time" ('Ab. Zarah 17a).

S. S. S. M.

ELEAZAR B. ELEAZAR HA-KAPPAR. See BAR ḲAPPARA.

ELEAZAR (ELIEZER) B. ENOCH: A scholarly contemporary of 'Aḳabia b. Mahalalel and Gamaliel II. According to the statement of Judah

b. 'Illai, it was this Eleazar, and not 'Aḳabia, who was excommunicated by the Sanhedrin for the reason that he quibbled about the rabbinic regulations concerning "cleansing of hands" ('Eduy. v. 6). Nothing more is known of him; but the fact of his being cited in connection with 'Aḳabia, and the explicit declaration of the transgression which prompted the august tribunal to excommunicate him, evidence his prominence in his day. Probably because of excommunication, in which state he ended his earthly existence (*ib.*), none of his doctrines was discussed in the academies or recorded in rabbinic literature.

S. S. S. M.

ELEAZAR OF HAGRONIA: Babylonian scholar of the fourth amoraic generation (fifth century); junior of Aḥa b. Jacob and Raba (b. Joseph). He is mentioned twice in the Babylonian Talmud, and both times in connection with extraordinary circumstances. Once he incurs divine punishment for assuming rabbinic authority at a place over which extended the jurisdiction of Aḥa b. Jacob ('Er. 63a); and then again he is represented as having dreamed an ominous dream. It was a season of drought at Hagronia (Agranum; Neubauer, "G. T." p. 347) when Raba happened to visit the town. He ordained a day of fasting and prayer, but no rain came. Then he inquired, "Did any one have a dream last night?" Eleazar had had one, and at Raba's request he told it as follows: "There was said to me in my dream, 'Good greetings to the good teacher from the good Lord who, in His goodness, doeth good to His people.'" On hearing this Raba remarked, "This betokens that Heaven will be propitious." Thereupon prayer was again offered, and soon rain descended (Ta'an. 24b).

S. S. S. M.

ELEAZAR (ELIEZER) B. HISMA: Tanna of the second and third generations (second century); disciple of Joshua b. Hananiah and Gamaliel II. (Ḥag. 3a; Hor. 10a). In their use of the word "ben" in connection with his cognomen "Ḥisma" or "Ḥasma" (see Geiger, "Schriften," iv. 343, and Strack, "Einleitung in den Thalmud," 2d ed., p. 81), the sources are inconsistent; its insertion, however, seems justifiable. "Ḥisma" is not an adjectival cognomen (see Eleazar I.), but a locative, the place probably being identical with Hizmeh (see Luncz, "Jerusalem," vi. 67; Hastings, "Dict. Bible," i., *s.v.* "Azmaveth"); hence "ben Ḥisma" means "son of [= "native of"] Ḥisma" (compare R. H. 17a; Meg. 19a; Ḳid. ii. 3).

Several halakot are preserved under Eleazar's name in the Mishnah (Ter. iii. 5; B. M. vii. 5), and he is met with in halakic controversies with Eleazar b. Azariah and Akiba (Neg. vii. 2; Sifra, Tazria', i. 2), and with Eliezer b. Jacob I. (Pes. 32a; Yalḳ., Lev. 638); and to him is ascribed the economic rule that the employee is not entitled to a proportion of his employer's produce greater than the amount of his wages (B. M. vii. 5, 92a; Sifre, Deut. 266).

Some haggadot also are ascribed to him (Mek., Beshallaḥ, Wayassa', 4; *ib.*, Amalek, 1; Yoma 19b). Conjointly with R. Joshua, he gives an allegorical reason for Amalek's attack on Israel (Ex. xvii. 8 *et seq.*) just at the time it occurred. Citing Job viii. 11, "Can a rush grow up without mire? Can the flag grow without water?" he remarks, "Even so is it impossible for Israel to flourish without the Law; and since they had neglected the Law [see Ex. xvii. 1–7], an enemy was ordered out to war against them" (compare Yalḳ. to Ex. *l.c.*, § 262; anonymous in Yalḳ. to Job *l.c.*, § 904). Again, he cites Isa. xliii. 22, "But thou hast not called on me, O Jacob," and applies it to those who are not devout in their prayers, but while reciting the "Shema'" communicate with their neighbors by sign language (compare Yalḳ. to Isa. *l.c.*, § 318).

Specimen of Exegesis.

Not only was he possessed of wide rabbinic learning, but he was also an adept in the sciences. Joshua, introducing him and Johanan b. (Gudgada) Nuri to the notice of Patriarch Gamaliel II., remarked of them that they could approximately calculate the number of drops contained in the ocean (Hor. 10a). As they were very poor, Gamaliel appointed them to remunerative offices in the academy (Sifre, Deut. 14; Yalḳ., Deut. 902; Hor. *l.c.*). Probably it was here—because the academicians sought from him instruction in secular science—that Eleazar remarked, "The laws concerning birds' nests and those concerning the incipient uncleanness of woman are elements of the Law, while astronomy and geometry are only condiments of wisdom" (Ab. iii. 18; Ab. R. N. xxvii. 2).

ELEAZAR B. JACOB. See Eliezer b. Jacob.

ELEAZAR B. JAIR: Leader of the Sicarii, the remnant of whom, driven from Jerusalem about 70 by Eleazar b. Ananias, retired to Masada. Eleazar was a descendant of Judah, the founder of the party of Zealots. Besieged by the Romans, Eleazar exhorted his fellow warriors to prefer death to slavery, and, when it became necessary, to kill first their families and then themselves. This speech, together with a dirge on the fall of Jerusalem ascribed to him, is found in Hebrew in Yosippon, ch. 97, though the hero is here erroneously called "Eleazar b. Ananias."

Bibliography: Grätz, *Gesch.* 4th ed., iii. 460, 549; Schürer, *Gesch.* 3d ed., i. 639.

G. S. Kr.

ELEAZAR (LAZAR) BEN JOSE I.: Tanna of the fourth and fifth generations (second century). He was second among the five learned sons of Jose b. Ḥalafta (Shab. 118b; Yer. Yeb. i. 2b); and the father repeatedly reports opinions which he had heard from Eleazar (Sifre, Deut. 148; Pes. 117a; Yoma 67a), while the latter transmits halakot in his father's name (Men. 54b; Pesiḳ. i. 4a). He is often cited in the Tosefta, though never in the Mishnah. He accompanied Simon b. Yoḥai on a visit to Rome, with the object of appealing to the government for the abrogation of the renewed Hadrianic decrees, which seriously impeded the religious life of the Jews. On the way Eleazar was attacked by a dangerous illness, but he recovered and proceeded on the journey (Me'i. 17b; see Rashi). The mission was successful (Me'i. 17a *et seq.*; see SIMEON B. YOḤAI), and at Rome Eleazar met the organizer of the first Roman Jewish academy, Mattai b. Ḥeresh, with whom he discussed halakic questions (Yoma 84b; Me'i. 17a).

Of this and other journeys Eleazar reports some experiences. In Rome he saw the curtain of the Holy of Holies and the high priest's golden headband, which Titus had carried thither from Jerusalem (Yoma 57a; Suk. 5a). In Alexandria he learned that the ancient Egyptians had filled in with Jewish bodies unfinished places in the walls: he is even said to have actually seen evidences of those cruelties (Sanh. 111a). Twice he reports controversies with Samaritans (Soṭah 33b [Yer. Soṭah vii. 21a reads "Eleazar b. Simon"]; Sanh. 90b).

Eleazar lays great stress on philanthropic works, saying, "Charity and benevolence are intercessors for Israel: they effect peace between God and the people" (Tosef., Pes. iv. 18; B. B. 10a). He further says, "Whoso sinneth and repenteth, and thereafter leadeth an upright life, obtaineth immediate pardon; but whoso saith, 'I shall sin and then repent,' three times will he be forgiven, but no more" (Ab. R. N. xl. 5).

S. S. S. M.

ELEAZAR (LAZAR) B. JOSE II.: Palestinian amora of the fifth generation (fifth century); senior of Naḥman II. and Aḥa III. (Pesiḳ. v. 55a). Most of his utterances are remarks which he had directly or indirectly heard from Abbahu, Ḥanina b. Abbahu, Tanḥum b. Ḥiyya, and others (Yer. Ber. vii. 11d; Yer. Ma'as. i. 49a, ii. 49c; Yer. 'Er. iii. 23d; Lam. R. iii. 17); but he also expresses his own views, both doctrinal and homiletical (Yer. Shab. xvi. 15d; Yer. Kil. viii. 31a; Yer. Ḥallah, ii. 58b; Ex. R. xxiii. 5; Lev. R. xi. 6; Pesiḳ. *l.c.*). His father, Jose II., seems to have been his principal teacher, for frequently it was before him that Eleazar propounded his views (Yer. Ber. i. 3d, iv. 8a; Yer. Ned. iv. 38d); and it is related that his father often chided him for lack of zeal. Quoting the statement (I Chron. ix. 20), "In time past the Lord was with him [Phinehas]," he used to say, "As long as Phinehas was zealous for the Law, the Lord was with him; but when he ceased to be zealous the Lord forsook him" (Yer. Yoma i. 38d; Yer. Meg. i. 72a; Yer. Hor. iii. 47d).

S. S. S. M.

ELEAZAR (ELIEZER, LAZAR) B. JUDAH OF BARTOTA (BIRIA, BIRTA, BIRTOTA): Scholar and philanthropist of the third tannaitic generation (first and second centuries); disciple of Joshua b. Hananiah, and contemporary of Akiba (T. Y. iii. 4, 5; Tosef., Bek. vii. 6). Sometimes the cognomen is omitted (compare Tosef., Zab. i. 5, and Zab. i. 1), and sometimes the patronymic (Ab. iii. 7). While his name is connected with but few halakot, and with still fewer midrashim, he has established for himself an indelible name in the list of the charitable. His motto was, "Give Him of His own: thyself and what thou possessest are His, as David says (I Chron. xxix. 14): 'All things come of thee, and of thine own have we given thee'" (Ab. iii. 7); and he lived up to his motto. It is related that he was so extravagant in his benevolence as to give away all that he possessed; wherefore the collectors for the poor would avoid meeting him (Ta'an. 24a). In illustration of this characteristic, the Talmud (*ib.*) cites the following instance: "Eleazar's daughter was to be married. While making purchases for the occasion, he espied the collectors, who were hiding from him. He overtook them, and begged them to acquaint him with their mission. They informed him that they were soliciting for a marriage portion for a couple of orphans, whereupon he exclaimed, 'Verily, that couple takes precedence over my daughter'; and he gave them all that he had about him." Legend adds that he retained one zuz, and with that he bought wheat, which he carried home and put away in the storeroom. When his wife soon afterward tried to open the room in order to see what Eleazar had brought, it was found to be full to overflowing with grain. In the meantime Eleazar had repaired to the academy, and thither his daughter hastened with the joyful tidings, remarking, "Come and see what thy friend has done for thee"; but when he had heard her story, he consecrated the grain also to charity.

S. S. S. M.

ELEAZAR BEN JUDAH BEN KALONYMUS OF WORMS: Talmudist and cabalist; born, probably at Mayence, about 1176; died at Worms in 1238. He was a descendant of the great Kalonymus family of Mayence, and a disciple of Judah he-Ḥasid, who initiated him into the study of the Cabala, at that time little known in Germany. According to Zunz, Eleazar was ḥazzan at Erfurt before he became rabbi at Worms. In 1233 he took part in the great Synod of Mayence which enacted the body of regulations known as "Taḳḳanot ShuM" (שום = "Speyer, Worms, Mayence"). Eleazar underwent great sufferings during the Crusades. On the night of 22 Kislew, 1196, he was engaged on his commentary on Genesis (he relates that he had reached the parashah Wayesheb), when two crusaders entered his house and killed his wife Dulcina, his two daughters Belat and Hannah, and his son Jacob. His wife had conducted a business in parchment scrolls in order to support the family and enable him to devote all his time to study.

Eleazar developed a vigorous activity in many directions. On the one hand, he was a Talmudist of vast erudition, a liturgist gifted with a clear and easy style, and an astronomer, and was well versed in the sciences open to the Jews of Germany at that time. On the other hand, he was a cabalist swayed by hallucinations; he saw legions of angels and demons, and exerted himself to spread cabalistic systems which went far beyond the conceptions of the authors of the Cabala. In his cabalistic works he developed and gave a new impulse to the mysticism associated with the letters of the alphabet. The philosophical Cabala of the school of Isaac the Blind is replaced by arithmetical speculations. By the gemaṭria and noṭariḳon systems of interpretation found in the Talmud, Eleazar invented new combinations by which miracles could be performed. The haggadic anthropomorphism which he had combated in his earlier works ("Ha-Roḳeaḥ," "Sha'are ha-Sod weha-Yiḥud") occupied later the foremost place in his cabalistic writings. Eleazar's great merit lies not in his new cabalistic system, but in his ethical works. In these he shows greatness of soul and a piety bordering upon asceticism. Though so severely tried by fate, he inculcates cheerfulness, patience, and love for humanity.

Ethical Works.

Eleazar's ethical works are: (1) "Ha-Roḳeaḥ," on the numerical value of the word הרקח, corresponding to that of אלעזר (= 308). It is divided into 497 paragraphs containing halakot and ethics; first published at Fano, 1505. (2) "Adderet ha-Shem," still extant in manuscript in the Vatican Library. (3) "Moreh Ḥaṭṭa'im," or "Seder ha-Kapparot," on penitence and confession of sin, first published at Venice, 1543. This work, which is included in the Hilkot Teshubah of the "Ha-Roḳeaḥ," has been reproduced many times under various titles. It appeared under the title "Darke Teshubah" at the end of the responsa of Meïr of Rothenburg in the Prague edition; as "'Inyane Teshubah," or "Seder Teshubah," in the Sephardic ritual of 1584; as "Yesod Teshubah," with additions by Isaac ben Moses Elles, first published in 1583; as "Yore Ḥaṭṭa'im ba-Derek"; and as "Sefer ha-Kapparot." The title adopted here is the same as that given in the "Kol Bo," in which the work was reproduced. (4) "Sefer ha-Ḥayyim," treating of the unity of God, of the soul and its attributes, and of the three stages (recognized by the ancients as "plant, animal, and intellectual") in man's life. (5) "Sha'are ha-Sod ha-Yiḥud weha-Emunah," a treatise on the unity and incorporeality of God, combating the anthropomorphism of the Haggadah (published by Jellinek in the "Kokabe Yiẓḥaḳ" collection [xxvii.].

Cabalistic Works.

Eleazar's mystical works are: (1) "Yir'at El," still extant in manuscript in the Vatican Library, containing mystical commentaries on Psalm lxvii., on the Menorah, and on Sefirat ha-'Omer. (2) "Sefer ha-Kabod," mystical explanations of various Biblical passages (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1566, 1). (3) "Yayin ha-Reḳaḥ," mystical commentaries on the five Megillot. Those on Ruth and the Song of Songs were published at Lublin, 1608. (4) A commentary on Psalm cxlv. (MS. De Rossi No. 1138). (5) A commentary on the prayers mentioned by Joseph Delmedigo in his "Maẓref la-Ḥokmah" (p. 14b). (6) "Ta'ame we-Sodot ha-Tefillah" (Neubauer, *ib.* No. 1575.) (7) "Perush 'al Sefer Yeẓirah," a commentary on the "Yeẓirah," being extracts from Shabbethai Donnolo's commentary. Fragments of this work were first published at Mantua in 1562, later in several other places; a complete edition was printed at Przemysl, 1889. (8) "Midrash we-Perush 'al ha-Torah," cabalistic commentary on the Pentateuch, mentioned by Azulai. (9) "Sha'are Binah," in which, interpreting Biblical verses by the system of gemaṭriyyot, he shows the origin of many haggadot of the Talmud. This work is frequently quoted by Solomon al-Ḳabiẓ in his "Manot ha-Lewi." (10) "Shi'ur Ḳomah," a commentary on the "Shi'ur Ḳomah," the "Pirḳe de-Rabbi Yishma'el," and the "Merkabah" (MS. Michael). (11) "Sefer ha-Ḥokmah," cabalistic treatise on the various names of God and of angels, and on the seventy-three "Gates of the Torah" (שערי תורה). (12) "Sefer ha-Shem," mystical dissertations on the names of twenty-two letters, with a table of permutations (Neubauer, *ib.* No. 1569, 4). (13) "'Eser Shemot," commentary on the ten names of God (MS. Michael, No. 175). (14) A commentary on the piyyuṭ "Ha-Oḥez." (15) Six small cabalistic treatises entitled "Sod ha-Ziwwug," "Sefer ha-Ne'e-lam," "Sefer Mal'akim," "Sefer Tagim," "Sefer Pesaḳ," and "Sefer ha-Ḳolot," all of which are still extant in manuscript (Neubauer, *ib.* No. 1566). (16) "Liḳḳuṭim," cabalistic fragments, mentioned by Recanate. (17) "Sode Raza," a treatise on the mysteries of Cabala, particularly on the "Merkabah." Part of this work was published at Amsterdam in 1701, under the title "Sefer Razi'el ha-Gadol." In the introduction the editor says that he decided to publish this book after having seen that the greater part of it had been produced in French under the title "Images des Lettres de l'Alphabet."

In addition to these works, Eleazar wrote tosafot to many Talmudical treatises, referred to by Bezalel Ashkenazi in his "Shiṭṭah Meḳubbeẓet"; a commentary on "Sheḳalim" in the Palestinian recension, cited by Asheri in his commentary to that treatise in the Babylonian Talmud; thirty-six chapters on the examination of slaughtered animals (MS. Michael No. 307). Zunz enumerates fifty-five liturgical poems and dirges composed by Eleazar and occurring in the Ashkenazic maḥzorim, ḳinot, and seliḥot.

K. I. Br.

ELEAZAR (ELIEZER) HA-ḲAPPAR: Tanna of the fourth generation (second century); father of Bar Ḳappara, who is sometimes cited by the same name. Eleazar is quoted in the Mishnah (Ab. iv. 21), where he says, "Envy, lust, and ambition shorten man's life." From him the Mishnah (*ib.* 22) also preserves the following exhortation: "The born are to die, and the dead to revive, and the living to be judged; in order to know, and to notify, and that it may be known, that He is the Framer, and He the Creator, and He the Judge, and He the Witness, and He the Complainant, and He with whom there is no iniquity, nor forgetfulness, nor respect of persons, nor taking of a bribe, for all is His, is about to judge; and know that all is according to His plan. Let not thy 'yeẓer' [evil inclinations] assure thee that the grave is an asylum; for perforce thou wast created (Jer. xviii. 6), and perforce thou wast born, and perforce thou livest, and perforce thou diest, and perforce thou art about to give account and reckoning before the King of Kings, the Holy One, blessed be He!" Elsewhere (Sifre, Num. 42; compare Num. R. xi. 7) he says, "Great indeed is peace: it is the end of all blessings" (see Num. vi. 26). For other ethical lessons from him see Ab. R. N. xxix. 4; Derek Ereẓ Zuṭa ix. 1. Some of his teachings are probably to be ascribed to his son.

S. S. S. M.

ELEAZAR LASI BEN JOSEPH: German Talmudist; born in Berlin Sept. 24, 1740; died at Hamburg Jan. 22, 1814. He studied under Tebele Scheuer, rabbi of Bamberg, and later in the yeshibah of Schwersenz under R. Gedaliah. After his marriage he settled at Posen, where he was appointed dayyan under R. Raphael b. Jekuthiel ha-Kohen. In 1781, after the latter had been appointed rabbi at Altona, Lasi removed there also. He filled for some time the office of dayyan at Wandsbeck, and was appointed "rosh bet-din" of the three communities of Altona, Wandsbeck, and Hamburg. Eleazar Lasi wrote: "Mishnat de Rabbi Eli'ezer," commentary on Shulḥan 'Aruk, Ḥoshen Mishpaṭ, the first part of which was published by his son Moses (Altona, 1815); a similar commentary on Eben ha-'Ezer; the anonymous "Ḳontres," a criticism of Saul Berlin's "Miẓpeh Yoḳte'el." His glosses and novellæ on the Talmud, as well as his commentary on the Pentateuch and a treatise on the benedictions, are still in manuscript.

L. G. A. Pe.

ELEAZAR B. MAHBAI. See Eleazar b. Aḥwai.

ELEAZAR B. MALAI: Palestinian scholar of the fourth century, whose name is mentioned but once, in the Babylonian Talmud, and then only as the reporter of a homily of Simeon b. Laḳish, which reproves the wickedness of the courts with the following words: "'Your hands are defiled with blood' (Isa. lix. 3) refers to the judges, whose hands are ever open to receive bribes; 'your fingers with iniquity' (*ibid.*) refers to the judiciary's scribes, who write false or specious documents; 'your lips have spoken lies' refers to the lawyers, who misconstrue the law, or instruct their clients how to plead; 'your tongue hath muttered perverseness' refers to the litigants, who plead falsehood" (Shab. 139a; Rashi *ad loc.*). It is not certain, however, that "Malai" was Eleazar's real patronymic, some editions reading "Simlai" instead (see Rabbinowicz, "Diḳduḳe Soferim" to Shab. *l.c.*).

S. S. S. M.

ELEAZAR B. MATTAI (MATTHIAS): Tanna of the third and fourth generations (second century); contemporary of Hananiah b. Ḥakinai, Ben 'Azzai, and Simon of Teman (Tosef., Ber. iv. 18). It is stated that, together with Ḥalafta and Hananiah, he examined the stones which, by order of Joshua, the Israelites brought up from the Jordan and pitched in Gilgal (Josh. iv.), and approximated their weight (Tosef., Soṭah, viii. 6). Eleazar was a disciple of R. Tarphon (Tosef., Ber. *l.c.*; compare Mek., Beshallaḥ, 5), and is met with in scholastic disputations with Judah b. 'Ilai and Simon b. Yoḥai (Tosef., Pes. vi. 2; Pes. 79b *et seq.*). According to one report, he and Hananiah were "the disciples" present at the dispute between R. Meïr and the rabbis; (Yer. Ma'as. Sh. ii. 53d); according to another, they were among the four expert linguists of the Jamnian Sanhedrin (Yer. Sheḳ. v. 48d; compare Sanh. 17b). From the Scriptural dictum (Lev. v. 1), "If a soul sin, and hear the voice of swearing," he argues that one is subject to hear the voice of swearing because of his having sinned. Accordingly, he teaches, "Whoso witnesses a transgression was doomed to see it; and whoso witnesses a good deed has deserved to see it" (Tosef., Shebu. iii. 4). He is mentioned once in the Mishnah (Yeb. x. 3), and several times in baraitot, in connection with halakic controversies.

BIBLIOGRAPHY: Brüll, *Mebo ha-Mishnah*, i. 141; Frankel, *Darke ha-Mishnah*, p. 133; Weiss, *Dor*, ii. 123.

S. S. S. M.

ELEAZAR B. MENAHEM: Palestinian scholar of the fourth amoraic generation (fourth century). No halakot and but few haggadot are connected with his name. Commenting on the Biblical expression (Ps. xxxvi. 9 [A. V. 8]), "Thou shalt make them drink of the river of thy pleasures" (עדניך, lit. "thy Edens"), he remarks, "Since the Bible says not 'thy Eden,' but 'thy Edens,' it implies that every pious soul has an [apartment in] Eden for itself" (Tan., Emor, ed. Buber, 9; Lev. R. xxvii. 1; Midr. Teh. xxxiv. 23 reads "Isaac b. Menahem"). From the expression (Gen. xiii. 3), "He [Abraham] went on his journeys," Eleazar infers that Abraham returned from Egypt by the way he had traveled thither, to liquidate the debts he had previously incurred (Gen. R. xli. 3).

S. S. S. M.

ELEAZAR OF MODI'IM (MODAIM): Scholar of the second tannaitic generation (first and second centuries); disciple of Johanan ben Zakkai (B. B. 10b), and contemporary of Joshua ben Hananiah and Eliezer ben Hyrcanus (Mek., Beshallaḥ, Wayassa', 3 *et seq.*). He was an expert haggadist, and frequently discussed exegetical topics with his distinguished contemporaries. Gamaliel II. often deferred to Eleazar's interpretations, admitting, "The Moda'i's views are still indispensable" (Shab. 55b).

As his life embraced the period of Hadrianic persecutions and of the Bar Kokba insurrection, many of his homilies refer, explicitly or impliedly, to existence under such conditions (Grätz, "Gesch." iv. 79, note). Eleazar expressed his confidence in Providence in this comment on the Scriptural statement (Ex. xvi. 4), "the people shall go out, and gather a certain rate every day" (lit. "the portion of the day on its day," דבר יום ביומו): "He who creates the day creates its sustenance." From this verse he also argued, "He who is possessed of food for the day, and worries over what he may have to eat the next day, is wanting in faith; therefore the Bible adds [*ib.*], 'that I may prove them, whether they will walk in my law, or no' " (Mek. *l.c.* 2).

Eleazar's last days fell in the dark period of the insurrection headed by Bar Kokba, and he ended his life in the then besieged city of Bethar. Of these days rabbinic tradition relates as follows:

> "During the Roman siege R. Eleazar of Modi'im fasted and prayed daily that God might not strictly judge the people that day nor surrender the city to the enemy, because of the sins of the inhabitants. The siege being protracted, and no immediate conquest being in prospect, the Roman commander meditated on withdrawing, when a Samaritan persuaded him to wait a while, and offered his services to aid in subduing the apparently unconquerable Jews by stratagem—by creating a suspicion of treachery among the besieged against Eleazar. 'For,' argued he, 'as long as this hen wallows in ashes [as long as Eleazar by his prayers encourages in the people the hope of God's protection], so long will Bethar remain impregnable.' Thereupon he smuggled himself into the city through some subterranean ducts, and, approaching Eleazar, who was engaged in prayer, pretended to whisper into his ear a secret message. Those present, regarding this mysterious movement with suspicion, soon reported it to Bar Kokba, and declared, 'Eleazar intends to establish peace between the city and Hadrian.' Bar Kokba had the Samaritan brought before him and interrogated him on the import of his conversation with the sage; but the Samaritan replied, 'If I reveal the royal secrets to thee, the commander will kill me; and if I refrain, thou wilt kill me. I would rather kill myself than betray my king's secrets.' Bar Kokba then summoned Eleazar and questioned him; but Eleazar protested that he had been absorbed in devotional exercises, and had heard nothing. This increased Bar Kokba's suspicion of meditated treason, and aroused him to such anger that he kicked Eleazar, in consequence of which the aged sage, enfeebled by fasting and prayer, fell dead."

The story adds that a "bat ḳol" thereupon pronounced the immediate doom of the chief of the insurrection and of the beleaguered city, which soon came to pass (Yer. Ta'an. iv. 68d; Lam. R. ii. 2; see Bar Kokba).

ELEAZAR B. NATHAN. See Eliezer b. Nathan.

ELEAZAR BEN PEDAT. See Eleazar II. (Lazar).

ELEAZAR BEN PERATA I.: Tanna of the third generation (second century); junior contemporary of Eleazar of Modi'im (Tosef., Sanh. iv. 8; Yer. Meg. i. 71c) and of Jose the Galilean (Mek., Yitro, Baḥodesh, 2). He lived through the period when, according to a younger contemporary, the performance of circumcision was punished by the Romans with the sword; the study of the Jewish law, with the stake; the celebration of Passover, with crucifixion; and the observance of the Feast of Booths, with the scourge (Mek. *l.c.* 6; Lev. R. xxxii. 1). Still, Eleazar faithfully adhered to the teachings of his religion. Once he was arrested and cast into prison, where he met Hananiah ben Teradion. He tried to instil hope into his fellow prisoner's breast, because there was only one charge against him, that of teaching the Law, while himself he considered lost, because there were five counts against him. Hananiah, on the contrary, thought that Eleazar's chances of escape were better than his own; and the sequel proved that he was right. Hananiah was condemned to a terrible death, while Eleazar was acquitted ('Ab. Zarah 17b).

Eleazar's studies embraced both Halakah and Haggadah, mostly the latter. One of his homilies warns against calumny in these words: "Observe how mighty are the consequences of the evil tongue. Learn them from the fate of the spies [see Num. xiii. *et seq.*]. Of the spies it is related [*ib.* xiv. 37], 'Those men that did bring up the evil report upon the land, died by the plague before the Lord.' And of what had they spoken evil? Of trees and of stones [see *ib.* xiii. 32]. If, now, those who slandered dumb objects were punished so severely, how much greater must be the punishment of him who traduces his neighbor, his equal!" (Tosef., 'Ar. ii. 11; 'Ar. 15a).

He draws practical lessons also from Scriptural texts. On a certain Sabbath some prominent coreligionists, having just learned that the Romans were seeking them, applied to Eleazar for legal advice as to the permissibility of flight from danger on the Sabbath. Eleazar referred them to Scriptural history. "Why do you inquire of me?" said he. "Look at Jacob [see Hosea xii. 13 (A. V. 12)], at Moses [Ex. ii. 15], and at David [I Sam. xix. 10, 18], and see what they did under similar circumstances" (Tan., Masse'e, i.; Num. R. xxiii. 1).

S. S. S. M.

ELEAZAR BEN PERATA II.: Tanna of the second and third centuries; grandson of Eleazar ben Perata I.; sometimes designated as "Eleazar b. Perata, the grandson of Eleazar b. Perata ha-Gadol" (Ket. 100a; Giṭ. 33a; Yer. Meg. iv. 75b), and also without the addition of his grandfather's name (Yer. Suk. iii. 54a; Suk. 39a). He confined his studies mainly to the Halakah, and was a contemporary of R. Judah I. (see Suk. *l.c.*; Yer. Meg. *l.c.*).

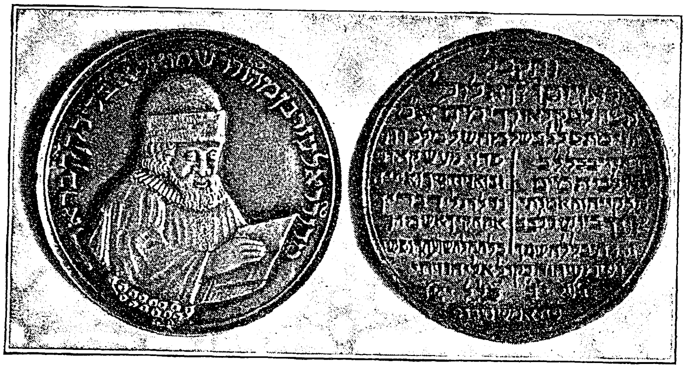
S. S. S. M.

ELEAZAR BEN SAMUEL: Rabbi; born at Cracow about 1665; died at Safed, Palestine, 1742. On the completion of his studies he became dayyan of Cracow. In 1708 he accepted the rabbinate of Rakow, Poland. From there he went to Brody, where he became rabbi (1714). In 1735 he went to Amsterdam in response to a call from the Ashkenazic congregation there. A medal was designed in his honor, one side of which exhibited his head in relief, surrounded by the words: "Eleazar ben Samuel, Rabbi of Brody," the other side containing chosen verses from the Psalms. Eleazar was one of those who placed Moses Ḥayyim Luzzatto under excommunication.

In 1740 Eleazar decided to go to Palestine. He took up his residence at Safed, where his life, however, was not of a peaceful character. It came to his knowledge that many of the most respected citizens of the place were reading the works of Nehemiah Ḥayyun and of other adherents of Shabbethai Ẓebi. Eleazar vigorously endeavored to eradicate this tendency, but his efforts were in vain. His life thus became embittered, and he was seriously contemplating a return to Europe, when death intervened.

Eleazar, besides being a great Talmudist, was a profound cabalist and an able darshan.

His published works are: "Arba' Ṭure Eben" (Four Rows of Stone), containing responsa and novellæ on Maimonides' "Yad" and on the Talmud (Lemberg, 1789); "Ma'aseh Roḳeaḥ" (Work of the Ointment-Maker), a cabalistic commentary on the Mishnah (Amsterdam, 1740); "Ma'aseh Roḳeaḥ," on the Pentateuch (Lemberg, 1789).



Medal Struck by the Amsterdam Community in Honor of Rabbi Eleazar ben Samuel.

(In the collection of Albert Wolf, Dresden.)

L. G. B. Fr.

ELEAZAR BEN SAMUEL OF METZ (also known as **RAM**): French tosafist; died 1198. He was a pupil of R. Tam, and is often quoted in tosafot—sometimes as "RAM," sometimes as "R. Eleazar." He wrote commentaries on Nedarim, Berakot, and Ḥullin, the last two of which Azulai saw in manuscript. His commentary is probably referred to in the Tosafot to Nedarim, where "Eleazar" is frequently quoted. The ascription to him of the authorship of the "Shiṭṭah Meḳubbeẓet" (Berlin, 1859), a collection of tosafot on Nedarim, is erroneous, as its author mentions Judah ben Yaḳir as his brother, and speaks of the death of Simon of Sens, a junior and survivor of Eleazar. Besides the above non-extant works, Eleazar wrote the "Sefer Zera'im," on the teachings of the Pentateuch, divided into twelve parts in imitation of Gaon Judah's "Halakot Gedolot." It is preserved in manuscript in Paris, but an extract by Benjamin ben Abraham was printed at Venice (1566), and has been several times reprinted.

ELEAZAR B. SHAMMUA'. See Eleazar I (Lazar).

ELEAZAR SHEMEN. See Löw, Eleazar.

ELEAZAR BEN SIMON: Tanna of the second century. He was the son of Simon b. Yoḥai, and since he participated in many of his father's adventures, history and legend have woven an almost interminable tissue of fact and fiction concerning him (see B. M. 83b *et seq.*; Pesiḳ. x. 88b *et seq.*). His youth he spent with his father in a cave, hiding from the Roman persecutors of the Jews, who sought his father's life; and there he devoted himself to the study of the Torah (Shab. 33b; Gen. R. lxxix. 6, and parallel passages; compare Yer. Sheb. ix. 38d). After the death of Hadrian, when events took a somewhat more favorable turn for the Jews, father and son left the cave and returned to the busy world. Eleazar, grown too zealous during his protracted hermitage, often cursed those who devoted their time to things secular, and his father found it necessary to interfere, appeasing them and mollifying him (Shab. *l.c.*).

After Simon's death Eleazar entered the academy of the Patriarch Simon b. Gamaliel II., and became the colleague of the patriarch's son, Judah I., the compiler of the Mishnah; but no great friendship seems to have subsisted between these two scholars.

Unlike his father, who hated the Romans and their rule, Eleazar accepted office under their government. In consequence thereof he grew very unpopular, and one of the rabbis remonstrated with him, saying, "Vinegar product of wine [= "Degenerate scion of a distinguished sire"], how long wilt thou continue to deliver the people of God to the hangman?" Eleazar, however, continued in office, excusing himself with the averment, "I but weed out thistles from the vineyard." His mentor answered that the weeding ought to be left to the proprietor of the vineyard—that is, that God Himself would visit punishment on the idlers and evildoers.

Later in life he regretted the part he had taken under the hated government, and is said to have imposed on himself the most painful penance. Still, fearing that the aversion engendered in his people by the aid he had rendered their persecutors would prompt them to deny him the last honors after his death, he enjoined his wife not to bury him immediately after dissolution, but to suffer his remains to rest under her roof. He died at Akbara, in northern Galilee, and his faithful wife carried out his injunction to the letter. Legend relates many miracles performed by the dead rabbi, one of which was that litigants plead their cases in the rabbi's house, and the verdict was pronounced from the mortuary chamber.

Place of Burial.

After many years his former colleagues resolved to bury him, but a new difficulty arose. The inhabitants of Akbara, believing that the sage's remains miraculously protected them against incursions of wild beasts, refused permission to remove the body. Ultimately, however, in compliance with the request of the rabbis people from the nearby town of Biria carried it off by stealth, and it was deposited at Meron beside that of his father (B. M. 84b). In consideration of his varied learning, his surviving colleagues cited the Scriptural verse (Cant. iii. 6), "Who is it that cometh out of the wilderness like pillars of smoke, perfumed with myrrh and frankincense, with all powders of the merchant?" and answered, "It is Eleazar b. Simon, who united in himself all noble qualities, he having been well versed in Scripture and in traditional law, and having been a [liturgical] poet, a leader in prayers, and a preacher" (Lev. R. xxx. 1; Cant. R. *l.c.*).

ELEAZAR B. ZADOK. See Eliezer b. Zadok.

ELEAZAR BEN ZIṬA ABU AL-SARI (generally cited as **Ben Ziṭa** or, more correctly, **Ben Zuṭa**): Karaite Bible exegete; lived probably in Egypt in the tenth century. He supported the rigid, ascetic, and Sadducean doctrines advocated by Anan and other Karaites, though at times he opposed Anan's teaching.

It is not at all certain that he ever wrote any work, or that Saadia compiled any reply to his views. His disputes with Saadia seem to have been oral. All that is known of Ben Ziṭa comes from Abraham ibn Ezra, who probably derived the information from Saadia's commentary to the Pentateuch. Ibn Ezra mentions Ben Ziṭa several times in his commentary to Exodus.

Ibn Ezra also mentions Ben Ziṭa in his "Sefer ha-'Ibbur" (7a), in regard to the question whether the method of determining the months and the festivals is to be found in the Bible. Ben Ziṭa was the first to cite Gen. i. 14; Num. xxviii. 14; and Ps. civ. 19 as such proof. A marginal note to a Bodleian manuscript (No. 316) of Ḳimḥi's commentary to Ezekiel, published by Neubauer in "Jour. Asiatique," 1861, p. 230, also contains a reference to Ben Ziṭa's refutation of Anan's quaint interpretations of Ezek. xviii. 6; but Israelsohn has shown that the passage is quoted not from Ibn Janaḥ, but from Judah ibn Balaam's commentary to Ezekiel. The name "Abu al-Ari," found in the Bodleian manuscript and accepted by Neubauer, Fürst, and Geiger, is a mistake for "Abu al-Sari."

Bibliography: Geiger, in *Jüd. Zeit.* ii. 151; Pinsker, *Likkuṭe Ḳadmoniyyot*, p. 43; Fürst, *Gesch. des Karäert.* i. 100, 173; ii. 33; Israelsohn, in *Rev. Etudes Juives*, xxiii. 132; Poznanski, in *Monatsschrift*, xli. 203.

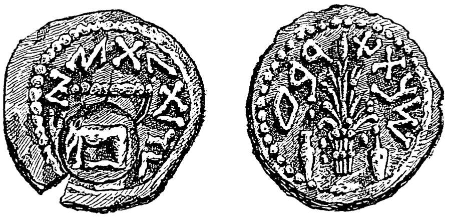
K.—G.

ELEGY. See Ḳinah.

ELEPHANT: A pachydermatous mammal of the family of the *Elephantidæ*. It is now commonly agreed that the elephant (*Elephas indicus*) is indirectly mentioned in a passage of the Hebrew Bible. In I Kings x. 22 (II Chron. ix. 21), namely, it is said that Solomon had a navy which every three years brought gold, silver, ivory ("shenhabbim"), apes, and peacocks. The word "shenhabbim" is evidently a compound word, the first part of which is well known as meaning a tooth or ivory (I Kings x. 18; Cant. v. 14, vii. 14). The second element has long been a puzzle to etymologists; but now it is well-nigh certain (see, however, Ebony) that it means "elephant," and is probably derived from the Assyrian "alap," with the assimilation of the lamed, "app" = "abb" (see Hommel, "Namen der Säugethiere," p. 324, note 1).

How and when the Hebrews became acquainted with ivory can not be determined. In the Targums of Jonathan and of Jerusalem it is said that the sons of Jacob laid their father in a coffin inlaid with "shendephin" (Gen. l. 1)—probably a substitute for "shendephil," the accepted word for ivory in the East, "pil" meaning "elephant."

The presence of the elephant in Palestine is not recorded before the time of Antiochus Epiphanes, who used the animals in the war against the Jews (I Macc. i. 16, 17; vi. 30). These elephants carried each a wooden turret strapped to its back, and holding a guard of from three to five men (I Macc. ii. 37, "thirty-two men" being certainly a wrong number) and a guide, called the "Indian." A special officer, the elephantarch, was in command of this branch of the military service (II Macc. xiv. 12). Before battle the animals were given intoxicating drinks to make them furious and thus more dangerous, as they were intended to carry confusion into the ranks of the enemy (II Macc. xv. 20; III Macc. v. 2).



Jewish Coin of the Maccabean Period, Countermarked by an Elephant, the Type of the Seleucid Kings. The Reverse is from a similar Coin.

(After Madden, "History of Jewish Coinage.")

The Talmudic and Neo-Hebrew name for elephant is פילא, פיל; plural, פילים (Ber. 55b, 56b), which is the common name also in Syriac and Arabic, and is the Assyrian "pîru" (see Lewy, "Griech. Fremdwörter," p. 5). The elephant's favorite food is the vine-leaf, for which reason Noah laid in a large supply of vine branches (Gen. R. xxxi.; Yer. Shab. xviii. 16c, middle; Shab. 128a).

The time of gestation is given as three years (Bek. 8a). To see an elephant in one's dream was not a good omen (Ber. 57b); but a proverb expressive of impossible things says: "None is shown in his dream a golden date-tree, nor an elephant that goes through a needle's eye" (Ber. 55b). In other contrasts, too, the elephant appears as the extreme in size (see examples given in "Zeitschrift für Alttestamentliches Wissenschaft," xvi. 205; *e.g.* מן היתוש ועד הפיל = "from the gnat to the elephant"; compare in Shab. 77b: אימת היתוש על הפיל = "the gnat is the terror of the elephant"; and in Maimonides, Introduction to Zera'im: מן הפילים עד התלעים = "from the elephants to the worms").

H. H.—E. G. H.

ELEUTHEROPOLIS: Greek name of a city called "Bet Gubrin" in the Talmud and "Baitogabra" by Ptolemy. In the Old Testament the name can not be identified, but it probably occurs in a corrupted form (see Josephus, "B. J." ed. Niese, iv. 8, § 1). From II Chron. xiv. 9 it is likely that the city had no existence in ancient time. Later the Hebrew name came to the front as Bait Jibrin, a village with some ruins, twenty minutes to the north of Merash, the old Maresah. The immediate vicinity is rich in natural and artificial caverns. As "ḥorim" means "caverns" in Hebrew, and "ḥor" also signifies "free," the Greek name is founded on a confusion of, or a conscious play upon, words.

E. G. H. F. Bu.

ELḤA'IK, UZZIEL: Rabbi and preacher in Tunis, of which place he was a native; died there 1812. He left two works which were printed long after his death: one, "Mishkenot ha-Ro'im," Leghorn, 1860, a collection of 1,499 responsa, relating to the history of Tunisian Judaism during the seventeenth and eighteenth centuries; the other, "Ḥayyim wa-Ḥesed," *ib.* 1865, a series of twenty-two funeral orations delivered by Elḥa'ik on the deaths of rabbis of Tunis (Cazès, "Notes Bibliographiques," pp. 169–173, Tunis, 1893).

S. M. Fr.

ELHANAN ("God is gracious"): **1.** According to II Sam. xxi. 19, R. V., the son of Jaareoregim, the Bethlehemite, who in a battle with the Philistines at Gob killed Goliath, the Gittite. According to I Chron. xx. 5, he was the son of Jair, and killed Lahmi, the brother of Goliath. The original traditions had it that the death of Goliath was brought about by Elhanan; but when David became the central figure of heroic adventures it was attributed to him instead, and to Elhanan was credited the death of Lahmi, Goliath's brother. The discrepancy is arbitrarily harmonized by the Targum, which identifies Elhanan with David, and takes "oregim" literally as "who wove the curtains for the Temple."

2. Another Bethlehemite, son of Dodo, and one of the "thirty" of David (II Sam. xxiii. 24 = I Chron. xi. 26).

E. G. H. G. B. L.

ELHANAN BEN BEZALEL URI ḤEFEẒ: Polish scholar; lived in Posen in the sixteenth and seventeenth centuries. He was the author of a work called "Ḳiryat Ḥannah," a commentary on Pirḳe Abot (Prague, 1612).

Bibliography: Steinschneider, *Cat. Bodl.* col. 920; Michael, *Or ha-Ḥayyim*, p. 157.

L. G. M. Sel.

ELHANAN HENDEL (HAENLE) BEN BENJAMIN WOLF KIRCHHAN: Ethical writer; lived at Frankfort-on-the-Main at the end of the seventeenth century and the beginning of the eighteenth. Elhanan published in Judæo-German an ethical work, "Simḥat ha-Nefesh" (Frankfort-on-the-Main, 1707). The book enjoyed great popularity and was reprinted many times. The eminent woman preacher Vögele der Maggid frequently referred to the book, and Berthold Auerbach mentions it in his "Dichter und Kaufmann" (ed. 1855, p. 54). Twenty years later Elhanan published under the same title a work containing poems and music (Fürth, 1727). He occupied himself also with Biblical exegesis and published "Ḥiddushim," novellæ on the Pentateuch (Offenbach, 1722).

Bibliography: Steinschneider, *Cat. Bodl.* col. 920; Grünbaum, *Jüdisch-Deutsche Chrestomathie*, pp. 238 *et seq.*; Michael, *Or ha-Ḥayyim*, p. 157, No. 46.

K. I. Br.

ELHANAN BEN ISAAC OF DAMPIERRE: Tosafist and liturgist; martyred in 1184 (Solomon Luria, Responsa, No. 29; see Azriel). He was on his grandmother's side a grand-nephew of R. Jacob Tam. One of his pupils was Judah Sir Leon of Paris. It has been suggested that Elhanan is identical with the Deodatus Episcopus of the English record (see Jacobs, "The Jews of Angevin England," p. 412). He has left numerous tosafot, to which his father, who outlived him, added glosses. Luzzatto speaks of his tosafot to 'Abodah Zarah up to folio 61 of that tractate, and then makes the following remark: "Here terminate the tosafot of R. Elhanan b. Isaac of Dampierre; from here onward are those of Judah b. Isaac of Brina."

The great authority of Elhanan is attested by Joseph Colon (Responsa, No. 52). Elhanan also wrote: "Tiḳḳun Tefillin," a casuistic treatise on the phylacteries, mentioned in Tos. to Ber. (60b) and in Mordecai ("Halakot Ḳeṭannot," § 932); "Sod ha-'Ibbur," on the intercalary days, mentioned in the "Minḥat Yehudah," section "Wayera"; Responsa, some of which are quoted in "Shibbole ha-Leḳeṭ," ch. i, and in Maimonides' "Hafla'ah," ch. 4; several "pizmonim" for the eighth evening of Passover, which give the acrostic of his name; a commentary to the Pentateuch.

G. M. Sel.

ELHANAN BEN ISSACHAR KATZ: Religious writer in Hebrew and Judæo-German; lived in the second half of the seventeenth century and at the beginning of the eighteenth in Prossnitz, Moravia, where he was shammash, cantor, and sofer. He was the author of the following works: "Zot-Ḥanukka Büchl," Judæo-German verses for the Feast of Ḥanukkah, Frankfort-on-the-Oder, 1702; "Mar'eh le-Hitḳashsheṭ Bo," and the same in Judæo-German, under the title "Zierspiegel Anzuhängen an der Wand," ethical sentences, Dyhernfurth, 1693. He translated into Judæo-German the seliḥot of שוב"בים ת"ת (the eight weeks in which are read the eight sections of Exodus from "Shemot" to "Teẓawweh"), Frankfort-on-the-Oder, 1703, and Berlin, 1712. Besides, he published the work of an anonymous author entitled "Sha'ar ha-Haẓlaḥah," prayers for prosperity, Prague, 1684.

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* cols. 445, 507, 922; Benjacob, *Oẓar ha-Sefarim*, pp. 422, 598.

L. G. I. BER.

ELHANAN BEN SAMUEL (SANWEL) ASHKENAZI: Rabbi of Schottland, near Danzig; born in 1713; died Sept. 27, 1780. At the age of eighteen he became rabbi of Fordon, Prussia, and in 1752 first rabbi of Schottland. He wrote various Talmudic commentaries and "ḥillukim," or discussions, as well as commentaries to the four "Ṭurim," but, with the following exceptions, they have not been published: "Sidre Ṭohorah," novellæ on the laws of Niddah in the Yoreh De'ah; "Ḥiddud Halakot," novellæ on the Niddah; "Shiyyure Ṭohorah," novellæ on the laws of "ṭebilah," or immersion, in the Yoreh De'ah (all published by Judah Löb b. Elhanan, Berlin, 1783). The "Or ha-Yashar" of Aaron Simeon b. Jacob Abraham contains two responsa of Elhanan b. Samuel.

K. M. SEL.

ELHANAN B. SIMON. See ANDREAS.

ELI (עלי): High priest at Shiloh and judge over Israel (I Sam. i. 3, iv. 18, xiv. 3; I Kings ii. 27). He was a descendant of Aaron's fourth son Ithamar (Lev. x. 12), for it is stated that Abiathar (I Sam. xxii. 20; I Kings ii. 27) was of the line of Ithamar (I Chron. xxiv. 3), and Abiathar was the son of Ahimelek, the son of Ahitub (I Sam. xiv. 3), Eli's grandson.

Eli held a twofold office: he was high priest at the central sanctuary of Shiloh, where the Ark of the Covenant was kept (*ib.* i. 3, 12; iii. 2), and he was a judge in Israel, as is expressly stated in *ib.* iv. 18. Eli had two sons, Hophni and Phinehas, whose wickedness brought grief and disgrace upon him and his family (*ib.* ii. 12-17, 27-36).

Eli lived in a sad period of Israel's history. Shortly before, the armies of the Philistines, probably strengthened by reenforcements (Guthe, "Geschichte des Volkes Israel," 1899, p. 65), had begun to overrun the central districts from the southwestern border of Palestine (Josephus, "Ant." v. 8, § 1). Samson had arisen "to deliver Israel out of the hand of the Philistines" (Judges xiii. 5); but after his death the attacks were renewed, and Israel was obliged to take up arms (I Sam. iv. 1). In order to assure themselves of God's help the Israelites brought the Ark from Shiloh to the seat of the war, where it was carried by Eli's two sons. But God had not decreed victory to His people. They were first to be punished by disaster. Therefore the Israelitish army was defeated; Eli's two sons were killed, and the Ark was lost. When the messenger who brought the news of the battle told of the capture of the Ark Eli, who was ninety-eight years old, fell from his seat and died (*ib.* iv. 10-18).

The only specific Old Testament reference to the term of Eli's life is in the words, "And he had judged Israel forty years" (*ib.* iv. 18). Some scholars, like Kessler ("De Chronologia Judicum et Primorum Regum," pp. 29 *et seq.*) and Nowack ("Richter-Ruth," p. 19), have inferred that the forty years of the Philistine oppression mentioned in Judges xiii. 1 are synchronous with the twenty years ascribed to Samson (Judges xv. 20, xvi. 31) and with Eli's forty years. But this assumption does not tally with the words of the Old Testament; the years of Samson's judgeship are set forth in the same way as those of Eli's. The Book of Judges, moreover, always mentions the years of oppression in contrast to the period of a judge's dispensation; and, finally, Eli's forty years do not, as a whole, appear to have been a period of oppression.

Biblical criticism has advanced few new theories in regard to Eli's life. The only point that has been made with some probability is mentioned by H. P. Smith ("Samuel," in "International Critical Commentary," p. 20): "An earlier source on Eli's life contained originally some further account of Eli and of Shiloh, which the author [of the Books of Samuel] could not use. One indication of this is the fact that Eli steps upon the scene in i. 3 without introduction." H. P. Smith also admits that great difficulties are encountered "in assigning a definite date to either of our documents."

ELI B. JUDAH. See JUDAH B. ELI.

ELI ZIYYON (אלי ציון): The alphabetical hymn closing the series of "ḳinot" chanted in the northern rituals on the morning of the Fast of Ab, where it comes as a comparative relief to the series of dirges which precede it. The tune is not older than the later Middle Ages, and is probably of South-German origin. As the most prominent melody of the "Three Weeks" (*i.e.*, the time between the Feast of Weeks and the Ninth of Ab), in the chant of the officiant it is taken as the representative theme forecasting and recalling that period (compare JEW. ENCYC. i. 187, 302), and as such is utilized very generally for the refrain to the hymn "Lekah Dodi." (See music on following page).

On the hymn as a "representative theme," compare Baer, *l.c.* No. 327; Hast, *The Divine Service*, i. 29, 152; Cohen and Davis, *Voice of Prayer and Praise*, p. 19.

A. F. L. C.

ELIAB (אליאב: "God," or "my God is Father"): **1.** Son of Helon and leader of the tribe of Zebulun at the time when the census was taken in the wilderness (Num. i. 9; ii. 7; vii. 24, 29; x. 16).

2. A Reubenite, the son of Pallu or Phallu, father of Nemuel, Dathan, and Abiram (Num. xvi. 1, 12; xxvi. 8; Deut. xi. 6).

3. One of David's brothers, the eldest of the family (I Chron. ii. 13; I Sam. xvi. 6; xvii. 13, 28). In I Chron. xxvii. 18 mention is made of a certain Elihu as one of the brothers of David. But "Elihu" is probably a variant for "Eliab" (comp. Jerome, "Quæstiones Hebraicæ," *ad loc.*).

4. A Levite in the time of David who was both a porter and musician (I Chron. xv. 18, 20; xvi. 5).

5. One of the warlike Gadite leaders who came to David when he was in the wilderness (I Chron. xii. 9).

6. An ancestor of Samuel the Prophet; a Kohathite, son of Nahath (I Chron. vi. 12 [27]). In I Sam. i. 1 the name appears as "Elihu," and in I Chron. vi. 19 (34) as "Eliel."

7. Son of Nathanael, an ancestor of Judith (Judges viii. 1).

E. G. H. B. P.

ELIADA. See BEELIADA.

ELIAKIM (אליקים = "El [God] sets up," corresponding to Sabean הקמאל, and יקמאל, 'Ελιακείμ): Name borne by three Biblical personages. **1.** Son of Hilkiah; appointed successor of Shebna, the "treasurer" (R.V. "scribe," margin "secretary") of Hezekiah (Isa. xxii. 20 *et seq.*). The office to which he succeeded is described as על הבית (= "over the household"), according to Delitzsch and others a "major domus" (comp. I Kings iv. 6, xvi. 8, xviii. 3; II Kings x. 5, xv. 5), the incumbent carrying the title סכן, connected with the Assyrian "saknu" (a high officer: Cheyne, "The Prophecies of Isaiah," ii. 153). This designation occurs also in the feminine form סכנת (= "caretaker"), used of Abishag (I Kings i. 2, 4), and it is met with on a Phenician inscription ("The Soken of the New City": "C. I. S." I. i. 5; Hastings, "Dict. Bible," p. 685b).

Eliakim is clothed with long tunic and girdle: the key of the house of David is laid on his shoulder (comp. Rev. iii. 7), and he is proclaimed "father of the people." According to R. Eleazar ben Pedat, "tunic and girdle" were the insignia of the high priest's office (Lev. R. to v.). But R. Eleazar does not regard "soken" as a title. From the double form "soken" (masculine, Isa. xxii. 15) and "sokenet" (feminine, I Kings i. 2) he concludes that Eliakim's predecessor was a "sensuous" man (בעל הנאה: Sanh. 26b). At the invasion of Sennacherib (II Kings xviii. 18 = Isa. xxxii. 3) Eliakim appears as the chief diplomatic emissary of Hezekiah, while Shebna is mentioned as his secretary. Eliakim sprang from a family of no social standing: his elevation to dignity conferred distinction on his "father's house" (Isa. xxii. 23, 24). Some commentators have construed the words of the prophet to imply a resentment of Eliakim's nepotism as bound to end in the downfall of the family. But nepotism is so common at Eastern courts that it would be strange for Isaiah to advert to it specifically. The whole matter hinges on the interpretation given to verses 24 and 25; the prediction may refer to Eliakim or to Shebna, or the verses may be an interpolation. Certain it is, that the Biblical documents nowhere mention the deposition of Eliakim from office.

2. The second son of King Josiah, who, upon his elevation to the throne by Pharaoh-nechoh, was compelled to take the name of Jehoiakim (II Kings xxiii. 34; II Chron. xxvi. 4).

3. A priest at the time of Nehemiah (Neh. xii. 41).

ELIAKIM: A Palestinian scholar of the third century. His name is connected with no halakot, and with a single haggadah only. He construes the Psalmist's saying (Ps. i. 6), "The Lord knoweth the way of the righteous; but the way of the ungodly shall perish," as teaching that God causes the ways of the wicked to be lost out of sight for the sake of the righteous, that the latter be not misled by them (Midr. Teh. *l.c.*, ed. Buber, p. 22; comp. BERECHIAH II. on same verse). Eliakim is probably identical with the better-known Jakim (the first syllable being dropped to avoid the frequent and unnecessary repetition of "El" [God], as in 'ANANI from 'Ananiel). Jakim was father of Ashian b. Jakim, who once applied to R. Jesa (Assi II.) for a ritualistic decision (Yer. Yeb. xi. 12a). He was senior to Ammi, the latter explaining an observation of the former.

Eliakim classes the Jewish people among the most stubborn of the animal kingdom, which Ammi explains as referring to Jewish pertinacity in religion; that the Jew would submit to crucifixion rather than live as an apostate (Ex. R. xlii. 9; in Beẓah 25b Simeon ben Laḳish makes a remark very similar to Jakim's). Elsewhere (Pesiḳ. R. xxi. 107a) Eliakim is found to differ with Judah (b. Shalom) in surveying the scope of the prohibition (Ex. xx. 17), "Thou shalt not covet." Judah argues that its transgression leads to the violation of the seven prohibitions contained in the Decalogue; viz., in the second, third, sixth, seventh, eighth, ninth, and tenth commandments. Eliakim asserts that he who violates the prohibition, "Thou shalt not covet thy neighbor's wife," is as if he had violated all the ten commandments. This declaration is followed in the Pesiḳta (*l.c.*) by citations illustrating Eliakim's doctrine.

S. S. S. M.

ELIAKIM BEN ABRAHAM: Cabalist and grammarian; lived at London in the eighteenth and nineteenth centuries. His works are: "'Asarah Ma'amarot," a collection of ten essays; "Milḥamot Adonai," on philosophy and religion; "Binah la-'Ittim," on the computations of the periods enumerated in Daniel; "Ẓuf Nobelot," an abridgment of Joseph Delmedigo's cabalistic "Nobelot Ḥokmah"; "Ma'yan Gannim," an abridgment of Joseph Gikatilla's cabalistic "Ginnat Egoz"; "'En ha-Ḳore," on Hebrew vocalization, an endeavor to justify the German pronunciation; "Be'er Mayim Ḥayyim," a treatise on "Aẓilut"; "Ma'yan Ḥatum," Luria's notes on the "Sefer Yeẓirah"; "Dibre Emet," on Cabala; "Sha'ar Ḥeshbon," on cabalistic computations; "Arẓot ha-Ḥayyim," Biblical and Talmudical annotations. Of these the first three were published in London (1794-99), and the essay on Hebrew vocalization in Berlin (1803). In addition to these works he published a Hebrew grammar, entitled "'En Mishpaṭ" (Rödelheim, 1803).

Eliakim was a cabalist of vast erudition, and was endowed with a fine critical sense. In the "Ẓuf Nobelot," not content with giving Delmedigo's text in abridged form, he frequently emended it. He is chiefly noted among the modern cabalists for the development of the theory of יש מאין ("creatio ex nihilo")—the stumbling-block of many religious thinkers. Through God's self-concentration (צמצום), says Eliakim in the first chapter of the "Ẓuf Nobelot," originated space or the primal air, which, though considered as nothing (אין) in regard to the "En Sof" (God), is the foundation of the world.

ELIAKIM BEN ASHER SELIG: Polish Talmudic scholar; lived at Yampol in the eighteenth century. He was sent by the Polish Jews (1757) to Rome to defend them against the blood accusation, and presented a petition to Pope Benedict XIV., who commissioned Cardinal Ganganelli (later Pope Clement XIV.) to examine the case. The latter concluded in his report that the blood accusation was frivolous. Clement XIII., who had in the meantime succeeded Benedict XIV., dismissed Eliakim b. Asher with honor, and ordered Cardinal Corsini to recommend him in his name to Bishop Visconti of Warsaw. August III., King of Poland, issued in consequence a decree exculpating the Jews, stating that inability to prove the truth of the accusation rendered the accuser liable to capital punishment.

In Ganganelli's memoir, as well as in Corsini's letter of recommendation, the Jewish deputy is called "Jacob Selech" or "Selek" (Grätz, Fürst, and Levisohn have "Jacob Jelek"). He probably simplified his name designedly; but in a long letter which he wrote from Rome to Samuel Gallichi (probably the chief of the community) he calls himself "Eliakim b. Asher Selig of Yampol." In the same letter he stated that he met at Rome Rabbi Shabbethai Piana, with whom he discussed several rabbinical laws.

ELIAKIM GOTTSCHALK OF ROTHENBURG: German Talmudist; lived in the sixteenth and seventeenth centuries. He was a descendant of Meïr of Rothenburg, and, according to Michael, the son of Raphael ben Eliakim of Rothenburg. If Michael is correct, Eliakim was identical with the Swabian rabbi of the same name who with Isaiah Horwitz (SheLaH) and Azriel Mühlhausen signed in 1611 the halakic decision incorporated in Horwitz's Responsa (§ 118). Eliakim was the author of a commentary to the Targum on the Megillot, entitled "Ge'ullat ha-Ger," published anonymously at Prague in 1618. The author says in the introduction that he composed a commentary to the Targum on the Pentateuch.

Bibliography: Wolf, *Bibl. Hebr.* iii. 677; Zunz, *Z. G.* p. 293; Steinschneider, *Cat. Bodl.* col. 968; Michael, *Or ha-Ḥayyim*, No. 470.

K. I. Br.

ELIAKIM (GÖTZ) BEN JACOB: Galician cantor, teacher, and translator; born at Komarno; died at Amsterdam before 1709. He was the author of "Leshon Limmudim," a guide to letter writing in Hebrew (Amsterdam, 1686); "Seliḥot," in Judæo-German, recited by the community of Frankfort-on-the-Main (*ib.* 1688); "Refu'ot ha-Nefesh," precepts, devotional prayers for the sick, and regulations in regard to funerals (*ib.* 1692). He translated into Judæo-German Manasseh b. Israel's "Miḳweh Yisra'el" (*ib.* 1691); Ibn Verga's "Shebeṭ Yehudah" (*ib.* 1700); the daily prayers (*ib.* 1703); the Teḥinnot (*ib.* 1703); the seliḥot of the Lithuanian rite (*ib.* 1706); "Melammed Siaḥ," Judæo-German vocabulary to the Pentateuch and the Five Scrolls (*ib.* 1710), and the German seliḥot (*ib.* 1720). Eliakim also edited Benjamin's "Massa'ot" (*ib.* 1697) and Samuel Auerbach's "Ḥesed Shemu'el" (*ib.* 1699).

K. M. Sel.

ELIAKIM (GÖTZ) BEN MEÏR: Polish Talmudist; flourished in the seventeenth and eighteenth centuries. In his youth, at Posen, he devoted himself to the study of the Talmud, afterward accepting the position of rabbi in the neighboring community of Schwersenz, where about 1679 he wrote his haggadic commentary. From there he was called to Hildesheim, but maintained close relations with the congregation of Posen. In the closing years of the century, passing through Posen on his way, probably, to Palestine, he joined a delegation to Prague to collect money for the support of the congregation. In 1701 he went to Posen as dayyan, but according to Michael he left Hildesheim to take the post of rabbi at Luzk. He wrote: "Rappeduni be-Tappuḥim," on the stories of Rabba bar bar Ḥana, published by his son Samuel, Berlin, 1712; "Eben ha-Shoham" and "Me'irat 'Enayim," responsa, published by his son Meïr, Dyhernfurth, 1733. His novellæ on Talmud and Bible are not published.

Bibliography: Walden, *Shem ha-Gedolim he-Ḥadash*, p. 25; Michael, *Or ha-Ḥayyim*, p. 220; Perles, in *Monatsschrift*, xiv. 127, 133; Steinschneider, *Cat. Bodl.* s.v.

L. G. A. Pe.

ELIAKIM BEN MESHULLAM (HA-LEVI): German Talmudist and payyeṭan; born about 1030; died at the end of the eleventh century in Speyer, Rhenish Bavaria. He studied at the yeshibot in Mayence and Worms, having Rashi as a fellow student. Eliakim himself founded a famous Talmudical school in Speyer. He wrote a commentary on all the tractates of the Talmud except Berakot and Niddah (see Solomon Luria, Responsa, No. 29, and Asher ben Jehiel, Responsa, Rule 1, § 8), which was used by scholars as late as the fourteenth century. At present there exists only the commentary on Yoma, in manuscript (Codex Munich, No. 216). Ritual decisions by Eliakim are mentioned by Rashi ("Pardes," 42a, 44c, 48a). He was the composer of a piyyuṭ commencing אות ברית, to be read when a circumcision takes place in the synagogue on a Saturday.

L. G. I. Ber.

ELIAKIM BEN NAPHTALI: Italian ethical writer; lived in the fifteenth century; author of "Ṭob Shem Ṭob," selections from the Talmud and Midrashim, treating of the retribution, the suffering in the tomb, and the resurrection. The work, divided into 11 chapters, was published by the son of the author, Venice, 1606. Eliakim mentions another of his works, entitled "Eben Shetiyyah," which is no longer extant.

Bibliography: Nepi, *Zeker Ẓaddiḳim*, p. 19; Steinschneider, *Cat. Bodl.* col. 970; Michael, *Or ha-Ḥayyim*, p. 221.

K. I. Br.

ELIAM: **1.** One of David's heroes (II Sam. xxiii. 34); son of Ahithophel the Gilonite (comp. I Chron. xi. 36)..

2. Father of Bath-sheba (II Sam. xi. 3). In I Chron. iii. 5 the name occurs transposed as "Ammiel" אלעם is found in the Phenician inscription "C. I. S." 147, 6 (Lidzbarski, "Handbuch der Nordsemitischen Epigraphik").

E. G. H. G. B. L.

ELIANO, VITTORIO: Jewish convert to Christianity; grandson of Elijah Levita; lived in Italy in the sixteenth century; became priest and canon. Well versed in Hebrew literature, he was appointed censor of Hebrew books, first at Cremona, afterward (1567) at Venice. In this capacity he permitted (1557) the publication of the Zohar, and edited (1558) the Ṭur. Elijah was prominent in the denunciation of the Talmud, which was publicly burned April 17, 1559.

ELIAS CRETENSIS. See Delmedigo, Elijah.

ELIAS, JULIUS: German author; born at Hoya, Hanover, June 21, 1861. He was educated at Dorotheenstadt industrial school, Friedrich Werder gymnasium, and Munich University, taking his Ph.D. degree in 1888. He is the author of "Christian Wernicke," 1888, and has edited the following works: "Briefe der Elisabeth Charlotte," 1889; "Johann Gottlieb Regis' 'Fragmente einer Shakespeareübersetzung,'" 1893; and, with G. Brandes and P. Schlenther, the collected works of Ibsen.

Since 1891 Elias has been editor-in-chief of the "Jahresberichte für Neuere Deutsche Litteraturgeschichte."

Bibliography: Eisenberg, *Das Geistige Berlin*, i. 94-95.

S. N. D.

ELIAS LEVITA. See Levita, Elijah.

ELIAS, NEY: British consul-general at Meshed, Persia, and explorer; died in London May 31, 1897. At an early age he found his way to China, and in 1871 conceived the daring project of returning to Europe overland, across the entire continent of Asia. The report of this journey was recorded in the "Journal" of the Royal Geographical Society, from which it appears that he crossed the desert of Gobi by a hitherto unexplored route, traveled amid the opposing factions of the great Mohammedan rebellion of that time, and traversed the breadth of Siberia to Russia.

After this, Elias accepted service under the Indian government and was sent to Yunan, and afterward to Ladak. Later he was despatched on a political mission to Chinese Turkestan.

In 1885 he traversed the entire length of the Pamirs, traveled through Badakhshan and Afghan Turkestan to the neighborhood of Herat, and returned to India by way of Chitral and Gilgit. For this he was made a C.I.E. In 1889-90 Elias demarcated the frontier between Siam and the Shan States of Burma; and in 1891 he was appointed consul-general at Meshed, in Persia.

ELIAS PASHA. See Cohen, Elias.

ELIAS SAMUEL: English pugilist, popularly known as "Dutch Sam"; born April 4, 1775, in London; died July 3, 1816. After successful contests with Tom Jones (July 3, 1801), Caleb Baldwin (Aug. 7, 1804), and Britton of Bristol (April 27, 1805), Elias was easily beaten by James Brown (June, 1805).

Of three fights with Tom Belcher of Bristol, Elias lost the first (Feb. 8, 1806); the second (July 28, 1807) was declared off; and the third (Aug. 21, 1807) Elias won in 36 rounds.

Elias followed these encounters with two other victories, defeating William Cropley, May 10, 1808, and Benjamin Medley, May 31, 1810; then he rested for four years; but he reentered the prize-ring Dec. 8, 1814, when he was defeated by William Nosworthy, of Moulsey, in 38 rounds. By his contemporaries Elias was considered the hardest hitter the prize-ring had ever seen; he originated what in pugilism is technically known as "the upper cut," which he introduced in his fight against Caleb Baldwin. Elias retired from the ring with a ruined constitution, and died in abject poverty.

ELIASBERG, BEZALEEL JUDAH: Russian Hebraist; born at Ivenitz 1800; died at Minsk 1847. Under the title "Marpe le-'Am," with a supplement entitled "Ḳonṭres Reshit Da'at," he translated from the Polish into Hebrew the medical work of Friedrich Pauliczki (2 vols., Wilna, 1834; 2d ed., Jitomir, 1868).

BIBLIOGRAPHY: Fuenn, *Keneset Yisrael*, p. 190; Zeitlin, *Bibl. Post-Mendels.* p. 77.

H. R.

ELIASBERG, JONATHAN B. MORDECAI: Russian rabbi; born in Kovno 1850; died in Volkovisk, government of Grodno, Nov. 20, 1898. His first rabbinate was in Pumpian, government of Wilna, and he afterward became rabbi of Mariampol, government of Suwalki. Like his father he became one of the leaders of the Zionist movement in Russia; and Samuel MOHILEVER, who found in him a very able lieutenant, was instrumental in securing for him the rabbinate of Volkovisk, in order to have him nearer to himself. Eliasberg was the author of a rabbinical work entitled "Darke Hora'ah," Wilna, 1884, of which a part is devoted to Talmudic weights, measures, and coinage. He was also the author of novellæ, which were appended to his father's work "Terumat Yad," and of "Toledot Mordekai," a biography of his father, which he published in the latter's "Shebil ha-Zahab," Warsaw, 1897.

BIBLIOGRAPHY: *Aḥiasaf*, 5660, p. 381; Aḥad ha-'Am (= Asher Ginzberg), *'Al Parashat Derakim*, 2d ed., pp. 103-114, Berlin, 1902.

L. G. P. WI.

ELIASBERG, MORDECAI B. JOSEPH: Russian rabbi; born in Chaikishok, government of Grodno, Feb., 1817; died in Bausk, Courland, Dec. 11, 1889. His father-in-law, who had settled in Kovno as soon as Jews were permitted to dwell there, established him in that city as a dealer in grain and spices. Eliasberg acquired a knowledge of German, and made several business journeys to Riga. He there made the acquaintance of Max LILIENTHAL, and became interested in his educational schemes, the two corresponding for some time afterward. Following the advice of his erstwhile teacher, Kalischer, Eliasberg retired from business and devoted himself exclusively to rabbinical studies. In 1852 he became rabbi of Zezmer, government of Wilna, and remained there for six years, until his wife's illness forced him to return to Kovno. About 1861 he became rabbi of Bausk, where he officiated until his death, having declined the more important rabbinate of Suwalki, which had been offered to him in 1876.

When the Zionist movement began to spread in Russia, Eliasberg became one of its most ardent advocates. He gave his decision, as a rabbinical authority, permitting the colonists in Palestine to sow their fields in "shemiṭṭah" (fallow year), which gave rise to a heated controversy with the rabbis of Palestine and other opponents of colonization. Eliasberg's part in the discussion was conducted with mildness and broad-mindedness.

Of the twenty-four works which Eliasberg wrote on various subjects, only one, "Terumat Yad," a collection of responsa, was published during his lifetime (Wilna, 1875). His "Shebil ha-Zahab," which was published posthumously (Warsaw, 1897), deals with questions of the day in a highly interesting manner, giving the truly Orthodox view on many important subjects. Besides being an eminent Talmudist, he was also a profound thinker and a diligent student of history. Eliasberg contributed to Hebrew periodicals, especially to "Ha-Maggid," usually signing his articles מבי"ע (Mordecai b. Joseph Eliasberg).

BIBLIOGRAPHY: Jonathan Eliasberg, *Toledot Mordekai*, prefixed to the *Shebil ha-Zahab*; Aḥad ha-'Am (= Asher Ginzberg), *'Al Parashat Derakim*, 2d ed., pp. 68-73, Berlin, 1902.

L. G. P. WI.

ELIEZER ("God is help"): 1. Servant of Abraham; mentioned by name only in Gen. xv. 2, a passage which presents some difficulties. Eliezer is described by Abraham as בן משק (R. V. "possessor of my house") and as דמשק (R. V. "Dammesek-Eliezer"). According to Eduard König ("Syntax," § 306h) בן here, as frequently, has the force of an adjective or participle, and the phrase "ben mesheḳ" (steward; comp. ממשק, Zeph. xi. 9, and משך, Job xxviii. 18) is the subject of the sentence, which reads "and the steward of my house is this Damascene [Onḳ. and Pesh.] Eliezer," "Damasheḳ" being used intentionally for the adjective "Damashḳi" on account of the assonance with "mesheḳ" (König, "Stilistik," 1900, p. 291). Holzinger ("Genesis") and Gunkel ("Genesis") think the Masoretic text of xv. 2 has no meaning, and Cheyne and Black ("Encyc. Bibl." col. 1269) condemn it as absurd and incorrect, but no satisfactory emendation has been suggested.

That Abraham, on his way from Haran, passed through Damascus is certainly not improbable. Naḥmanides connects him with that city, as do various traditions (Justinus, "Historiæ," xxvi. 2; Judith v. 6 *et seq.*; Josephus, "Ant." vii. 1, viii. 2; Eusebius, "Præparatio Evangelica," ix. 7 *et seq.*). He may there have acquired this servant, who is also spoken of in Gen. xxiv., though the name is not given, in connection with the commission to choose a wife for Isaac. Still, even the Rabbis felt the difficulties of the present text, as their various interpretations of דמשק show. According to Eleazar b. Pedath, it denotes Eliezer as one "that draws and gives others to drink" (דולה ומשקה)—that is, imparts to others the teachings of his master (Yoma 18b; comp. Rashi *ad loc.*). Others found in the word "meshek̇" an allusion to his coveting (שוקק) Abraham's possessions. In דמשק lies the indication that Abraham pursued the kings (Gen. xiv.) to Damascus, and the Targum Pseudo-Jonathan and Yerushalmi read: "through whom many miracles were wrought for me in Damascus" (comp. Gen. R. xliv.).

That Eliezer took part in that battle, or was, perhaps, the only combatant at Abraham's side, the Rabbis find indicated in the number (318) of the soldiers (Gen. xiv. 14), the numerical value of the letters in אליעזר being 1 + 30 + 10 + 70 + 7 + 200 = 318 (Gen. R. xliii., xliv.; Pesiḳ. 70a, b; Ned. 32a; Shoḥer Ṭob to Ps. cx.; compare Ep. Barnabas ix.; it is the classical illustration of GEMAṬRIA under the twenty-ninth Exegetical Rule of Eliezer, the son of Jose the Galilean). Modern critics (Hugo Winckler and Gunkel) have held this "318" to refer to the number of days in the year that the moon is visible. The rabbinical cryptogram for "Eliezer" rests certainly on as solid grounds.

E. G. H.

——**In Rabbinical Literature:** Eliezer was presented to Abraham by Nimrod. Once Eliezer saved Abraham's life by disclosing to him the devices for his destruction prepared by Nimrod (Pirḳe R. El. xvi.). At Sodom Eliezer saw a native maltreating a stranger: taking the part of the wronged man, he was himself severely wounded. He brought suit against his aggressor, but the judge condemned Eliezer to pay to the native of Sodom a certain amount of money for having been bled. Thereupon Eliezer inflicted a severe wound upon the judge, saying: "Pay to the man who bled me the amount you owe me for having bled you." The men of Sodom used to place a guest on a bed, and if his length exceeded that of the bed they cut off the excess, but if the man was shorter than the bed he was stretched (comp. the Greek legend of Procrustes). Asked to lie in the bed, Eliezer replied that at the death of his mother he had vowed never to sleep in a bed. Another custom in Sodom was that he who invited a stranger to a wedding should forfeit his coat. Once Eliezer, being very hungry, entered a house where a wedding was being celebrated, but could get nothing to eat. He then sat down next one of the wedding guests; on being asked by him who had invited him, he replied: "By you." The latter, fearing to lose his coat, left the house precipitately. Eliezer then sat near another, on whom he played the same trick, with the same result, until at last he had succeeded in driving all the guests out of the house. He then secured the meal for himself (Sanh. 109b).

Eliezer and Abraham.

Eliezer is credited with having acquired all the virtues and learning of his master (Yoma 28b). It is even said that his features resembled so closely those of Abraham that Laban mistook him for his kinsman. When Abraham led Isaac to Mount Moriah to offer him as a sacrifice, Eliezer cherished the hope of becoming Abraham's heir, and a discussion on this subject arose between him and Ishmael (Pirḳe R. El. xxxi.). On completing the mission of selecting a wife for Isaac he was freed, and God rewarded him with the kingdom of Bashan, over which he reigned under the name of "Og." It was he who refused to allow the Israelites to go through his territory on their way to Palestine (Masseket Soferim, end). His size was so vast that from one of his teeth, which he had lost through fright when scolded by Abraham, the latter made a chair on which he used to sit. In the treatise Derek Ereẓ Zuṭa (i. 9) Eliezer is counted among the nine who entered paradise while still living.

S. S. I. Br.

2. The second son of Moses; mentioned in Ex. xviii. 4; I Chron. xxiii. 15, 17. The name is explained (Ex. *l.c.*) to mean "the God of my father was mine help" (the ב of the predicate; see Koenig, "Syntax," § 338). Rashi, quoting the Mekilta, relates a miraculous incident to account for the choice of the name, while Ibn Ezra makes it expressive of the joy of Moses upon hearing of the death of the Pharaoh who had proscribed him. The historical existence of this son has been doubted. Ex. ii. 22 and iv. 25 mention only one son—Gershom. Ibn Ezra felt the difficulty, but concluded that the one son mentioned in iv. 25 is Eliezer; while Naḥmanides argues that there was another son, but that there had been no occasion to mention him before. Ex. iv. 20 indicates that Moses, before leaving for Egypt, whether with his family (Ex. iv. 20) or without it (Ex. xviii. 2), had more than one son; and the reading בנה = "her son" (iv. 25) may be a miswriting for בניה = "her sons," agreeing with xviii. 3. Baentsch ("Exodus-Leviticus") holds that "Eliezer" is a double for "Eleazar," the son of Aaron, while Holzinger ("Exodus," p. 7) accounts for the uncertainty by arguing that in view of Judges xviii. 30 P intentionally omitted all reference to the sons.

E. G. H. E. K.

3. A prophet, the son of Dodavah of Mareshah, who opposed the alliance of Jehoshaphat with Ahaziah (II Chron. xx. 37).

4. Son of Zichri, made captain of the Reubenites by King David (I Chron. xxvii. 16).

5. A priest who acted as trumpeter before the Ark when it was conveyed to Jerusalem by King David (I Chron. xv. 24).

6. One of the chief men sent by Ezra (Ezra viii. 16) to secure ministers for the Temple at Jerusalem.

E. G. H. E. I. N.

ELIEZER: Palestinian amora of the fifth century; contemporary of Abdimi (Yer. 'Er. x. 26a) and of Berechiah II. (Gen. R. lxxvii. 3; Yalḳ., Gen. 132). Conjointly with Abba Mari and Mattaniah, he permitted Jews to bake bread on the Sabbath for the Roman soldiers under Ursicinus (Yer. Beẓah i. 60c; compare Jastrow, "Dict." 124b, *s.v.* ארסקינס; Frankel, "Mebo," 55b *et seq.*). He was more of a halakist than a haggadist (see, in addition to passages cited, Yer. 'Orlah ii. 62b; Yer. Pes. viii. 36a).

S. S. S. M.

ELIEZER THE ASTRONOMER (החוזה): German scholar of the sixteenth century; author of "Ge Ḥizzayon," an astrological compilation from

Hebrew, Arabic, and Latin sources (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2066). He quotes Abraham bar Ḥiyya ha-Nasi, Ibn Ezra, Andruzagar, Albumazar, 'Ali ibn Riḍwan, 'Ali ibn Rajil, Leopold of Austria, Johannes, Guido Bonatti, and, according to Dukes, Copernicus. In the introduction Eliezer says he began a great work on astrology, a chapter of which, entitled "Reshit Ḥokmah" (quoted by Neubauer, *l.c.*), is devoted to Ibn Ezra. Whether the "Sefer ha-Goralot" (Vatican MS. No. 216), bearing the name "Eliezer החוזה," is by the same author is not known. The same uncertainty prevails regarding Vatican MS. No. 477, which contains a commentary on Ptolemy's "Centiloquium," and which also bears the name "Eliezer."

BIBLIOGRAPHY: Fürst, in *Orient, Lit.* xi. 81; Dukes, *ib.* p. 318; Steinschneider, in *Z. D. M. G.* xxv. 383; idem, *Hebr. Uebers.* p. 531.

G. I. Br.

ELIEZER OF BEAUGENCY: French exegete of the twelfth century; born at Beaugency, capital of a canton in the department of Loiret; pupil of Samuel ben Meïr, the eminent grandson of Rashi. Eliezer was one of the most distinguished representatives of his master's school and of the exegesis of northern France. His chief concern was to find the connection between successive verses and the sequence of thought, a method that is also characteristic of the system of interpretation employed by Samuel as well as Joseph Caro. Not concerned with grammatical observations or daring criticisms, he reached very happy results in explaining certain figurative passages in accordance with the metaphors employed in the context. He often used French terms to express his thoughts more clearly. His interpretation is entirely free from midrashic admixture. Of his works there have so far been published only the commentaries on Isaiah (ed. Nutt, 1879) and Hosea (ed. S. Poznanski, in "Ha-Goren," iii. 98–127). There still exists in manuscript a commentary on the other Minor Prophets and on Ezekiel (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1465). Extracts from his commentary on Job are also extant; and he himself refers to his commentary on Genesis.

T. I. L.

ELIEZER OF BOURGOGNE: French Talmudist of the thirteenth century. Gross identifies him with Eliezer ben Aaron of Bourgogne, one of the six rabbis to whom Meïr Abulafia sent his letter on the doctrine of the resurrection. Eliezer was the author of a Talmudic work no longer extant, entitled "Sha'ar ha-Penim," mentioned by Aaron ha-Kohen of Lunel in his "Orḥot Ḥayyim."

BIBLIOGRAPHY: Gross, *Gallia Judaica*, p. 109.

L. G. A. Pe.

ELIEZER BEN FARUḤ: Jewish mathematician, said by certain Mohammedan authors to have first established the Jewish calendar. He is mentioned by Al-Biruni (972–1048) in his "Chronology of Ancient Nations"; and this account is repeated, almost word for word, in Al-Maḳrizi's (1364–1442) topographical history of Egypt. Steinschneider has connected him with a certain Andrazzur ibn Zadi Faruḥ, a famous Jewish astronomer mentioned by Al-Kabiṣi, the tenth-century Moslem astrologer, and by Abraham ibn Ezra in his "Sefer ha-Ṭe'amim." The first name seems to indicate that he was a Persian by birth; and it occurs in such varying forms as "Andruzagar," "Alezdegoz," "Alendruzgar." It has been suggested that there is a confusion here either with Eliezer ben Hyrcanus or Eleazar ben 'Arak. Sachau reads פרוח (I Kings iv. 17).

ELIEZER B. ḤISMA. See Eleazar b. Ḥisma.

ELIEZER (LIEZER) BEN HYRCANUS: One of the most prominent tannaim of the first and second centuries; disciple of R. Johanan ben Zakkai (Ab. ii. 8; Ab. R. N. vi. 3, xiv. 5) and colleague of Gamaliel II., whose sister he married (see Imma Shalom), and of Joshua b. Hananiah (Ab. *l.c.*; Ab. R. N. *l.c.*; B. B. 10b). His earlier years are wrapped in myths; but from these latter it may be inferred that he was somewhat advanced in life when a desire for learning first seized him, and impelled him, contrary to the wishes of his father, to desert his regular occupation and to repair to Jerusalem to devote himself to the study of the Torah. Here he entered Johanan's academy and for years studied diligently, notwithstanding the fact that he had to cope with great privations. It is said that sometimes many days elapsed during which he did not have a single meal. Johanan, recognizing Eliezer's receptive and retentive mind, styled him "a cemented cistern that loses not a drop" (Ab. *l.c.*). These endowments were so pronounced in him that in later years he could declare, "I have never taught anything which I had not learned from my masters" (Suk. 28a).

His father in the meantime determined to disinherit him, and with that purpose in view went to Jerusalem, there to declare his will before Johanan ben Zakkai. The great teacher, having heard of Hyrcanus' arrival and of the object of his visit, instructed the usher to reserve for the expected visitor a seat among those to be occupied by the élite of the city, and appointed Eliezer lecturer for that day. At first the latter hesitated to venture on Johanan's place, but, pressed by the master and encouraged by his friends, delivered a discourse, gradually displaying wonderful knowledge. Hyrcanus having recognized in the lecturer his truant son, and hearing the encomiums which Johanan showered on him, now desired to transfer all his earthly possessions to Eliezer; but the scholar, overjoyed at the reconciliation, declined to take advantage of his brothers, and requested to be allowed to have only his proportionate share (Ab. R. N. vi. 3; Pirḳe R. El. i. *et seq.*). He continued his attendance at Johanan's college until near the close of the siege of Jerusalem, when he and Joshua assisted in smuggling their master out of the city and into the Roman camp (see Johanan ben Zakkai).

Subsequently Eliezer proceeded to Jabneh (Ab.

R. N. iv. 5; Giṭ. 56), where he later became a member of the Sanhedrin under the presidency of Gamaliel II. (Ab. R. N. xiv. 6; Sanh. 17b), though he had established, and for many years afterward conducted, his own academy at Lydda (Sanh. 36b). His fame as a great scholar had in the meantime spread, R. Johanan himself declaring that Eliezer was unequaled as an expositor of traditional law (Ab. R. N. vi. 3); and many promising students, among them Akiba (*ib.*; Yer. Pes. vi. 33b), attached themselves to his school.

Eliezer became known as "Eliezer ha-Gadol" (= "the Great"; Tosef., 'Orlah, 8; Ber. 6a, 32a; Soṭah 13b, 48b, 49a; generally, however, he is styled simply "R. Eliezer"), and with reference to his legal acumen and judicial impartiality, the Scriptural saying (Deut. xvi. 20), "That which is altogether just [lit. "Justice, justice"] shalt thou follow," was thus explained: "Seek a reliable court: go after R. Eliezer to Lydda, or after Johanan ben Zakkai to Beror Ḥel," etc. (Sanh. 32b). Once he accompanied Gamaliel and Joshua on an embassy to Rome (Yer. Sanh. vii. 25d; Deut. R. ii. 24).

Eliezer's Conservatism.

Rabbi Eliezer was very severe and somewhat domineering with his pupils and colleagues (see Sifra, Shemini, i. 33; 'Er. 63a; Ḥag. 3b; Meg. 25b), a characteristic which led occasionally to unpleasant encounters. The main feature of his teaching was a strict devotion to tradition: he objected to allowing the Midrash or the paraphrastic interpretation to pass as authority for religious practise. In this respect he sympathized with the conservative school of Shammai, which was also opposed to giving too much scope to the interpretation. Hence the assertion that he was a Shammaite, though he was a disciple of R. Johanan ben Zakkai, who was one of Hillel's most prominent pupils. This brought Eliezer into conflict with his colleagues and contemporaries, who realized that such conservatism must be fatal to a proper development of the oral law. It was also felt that the new circumstances, such as the destruction of the Temple and the disappearance of the national independence, required a strong religious central authority, to which individual opinion must yield.

At last the rupture came. The Sanhedrin deliberated on the susceptibility to Levitical uncleanness of an 'aknai-oven (an oven consisting of tiles separated from one another by sand, but externally plastered over with cement). The majority decided that such an oven was capable of becoming unclean, but Eliezer dissented. As he thus acted in direct opposition to the decision of the majority, it was deemed necessary to make an example of him, and he was excommunicated. Still, even under these circumstances great respect was manifested toward him, and the sentence was communicated to him in a very considerate manner. Akiba, dressed in mourning, appeared before him and, seated at some distance from him, respectfully addressed him with "My master, it appears to me that thy colleagues keep aloof from thee." Eliezer readily took in the situation and submitted to the sentence (B. M. 59b; Yer. M. Ḳ. iii. 81a *et seq.*). Thenceforth Eliezer lived in retirement, removed from the center of Jewish learning; though occasionally some of his disciples visited him and informed him of the transactions of the Sanhedrin (Yad. iv. 3).

Relations with Christianity.

During the persecutions of the Jewish Christians in Palestine, Eliezer was charged with being a member of that sect, and was summoned before the penal tribunal. Being asked by the governor, "How can a great man like thee engage in such idle things?" he simply replied, "The judge is right." The judge, understanding thereby Eliezer's denial of all connection with Christianity, released him, while Rabbi Eliezer understood by "judge" God, justifying the judgment of God which had brought this trial upon him. That he should be suspected of apostasy grieved him sorely; and though some of his pupils tried to comfort him, he remained for some time inconsolable. At last he remembered that once, while at Sepphoris, he had met a sectary who communicated to him a singular halakah in the name of Jesus; that he had approved of the halakah and had really enjoyed hearing it, and, he added, "Thereby I transgressed the injunction (Prov. v. 8), 'Remove thy way far from her, and come not nigh the door of her house,' which the Rabbis apply to sectarianism as well as to heresy" ('Ab. Zarah 16b; Eccl. R. i. 8). The suspicion of apostasy and the summons before the dreaded tribunal came, therefore, as just punishment. This event in his life may have suggested to him the ethical rule, "Keep away from what is indecent and from that which appears to be indecent" (Tosef., Ḥul. ii. 24). It is suggested that his sayings, "Instructing a woman in the Law is like teaching her blasphemy" (Soṭah iii. 4); "Let the Law be burned rather than entrusted to a woman" (*ib.*); and "A woman's wisdom is limited to the handling of the distaff" (Yoma 66b), also date from that time, he having noticed that women were easily swayed in matters of faith.

Separated from his colleagues and excluded from the deliberations of the Sanhedrin, Eliezer passed his last years of life unnoticed and in comparative solitude. It is probably from this melancholy period that his aphorism dates: "Let the honor of thy colleague [variant, "pupils"] be as dear to thee as thine own, and be not easily moved to anger. Repent one day before thy death. Warm thyself by the fire of the wise men, but be cautious of their burning coals [= "slight them not"], that thou be not burned; for their bite is the bite of a jackal, their sting is that of a scorpion, their hissing is that of a snake, and all their words are fiery coals" (Ab. ii. 10; Ab. R. N. xv. 1). When asked how one can determine the one day before his death, he answered: "So much the more must one repent daily, lest he die to-morrow; and it follows that he must spend all his days in piety" (Ab. R. N. *l.c.* 4; Shab. 153a).

His Death.

When his former colleagues heard of his approaching dissolution, the most prominent of them hastened to his bedside at Cæsarea. When they appeared before him he began to complain about his long isolation. They tried to mollify him by professing great and unabated respect for him, and by averring that it was only the lack of opportunity that had kept them away. He felt that they might have profited by his teaching. Thereupon they besought him to communicate to them traditions concerning certain moot points, particularly touching Levitical purity and impurity. He consented, and answered question after question until all breath left him. The last word he uttered was "ṭahor" (= "pure"), and this the sages considered as an auspicious omen of his purity; whereupon they all rent their garments in token of mourning, and R. Joshua revoked the sentence of excommunication.

Eliezer died on a Friday, and after the following Sabbath his remains were solemnly conveyed to Lydda, where he had formerly conducted his academy, and there he was buried. Many and earnest were the eulogies pronounced over his bier. R. Joshua is said to have kissed the stone on which Eliezer used to sit while instructing his pupils, and to have remarked, "This stone represents Sinai [whence the Law was revealed]; and he who sat on it represented the Ark of the Covenant" (Cant. R. i. 3). R. Akiba applied to Eliezer the terms which Elisha had applied to Elijah (II Kings ii. 12), and which Joash subsequently applied to Elisha himself (*ib.* xiii. 14), "O my father, my father, the chariot of Israel, and the horsemen thereof" (Ab. R. N. xxv. 3).

Though excommunicated, Eliezer is quoted in the Mishnah, the Baraita, and the Talmudim more frequently than any one of his colleagues. He is also made the putative author of PIRḲE DE-R. ELIEZER or BARAITA OF R. ELIEZER, though internal evidence conclusively proves the late origin of the work.

ELIEZER B. ISAAC. See DEL BENE, DAVID.

ELIEZER BEN ISAAC OF BOHEMIA. See TOSAFISTS.

ELIEZER ISAAC COHEN BEN ABRAHAM ASHKENAZI OF VITERBO: Italian physician and Talmudic authority; born at Rome at the beginning of the sixteenth century; died, probably at Sienna, Oct. 16, 1590. He was a brother-in-law of the physician and Talmudist David de Pomis, and, like him, distinguished in both medicine and rabbinical literature. A halakic decision of his on "Ḥaliẓah" is quoted by Isaac Lampronti ("Paḥad Yiẓḥaḳ," *s.v.* חליצה); and Moses Provençal, in his responsa, cites him as an authority and gives him the title "Ha-Kohen ha-Gadol." In 1587 the community of Bologna consulted Eliezer regarding an ignorant shoḥeṭ.

Eliezer is believed to be identical with Theodoro de Sacerdotibus, the physician of Pope Julius III. It is probable that the "Librum de Duello," credited to Isaac Viterbo by Bartolocci ("Bibl. Rabb." iii. 891) followed by Wolf ("Bibl. Hebr." i. 651, No. 1176), was the work of Eliezer. Late in life Eliezer settled at Sienna. The high esteem in which he was held is shown by the elegy composed at his death by Jacob of Tivoli (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1998).

K. I. BR.

ELIEZER BEN ISAAC HA-GADOL ("The Great"): German rabbi of the eleventh century. He was a pupil of his cousin R. Simon ha-Gadol of Mayence and of R. Gershom Me'or ha-Golah. David Conforte, relying on the statement in the tosefta to Shab. 54b, says that Eliezer ha-Gadol was the teacher of Rashi ("Ḳore ha-Dorot," p. 8a); but Rashi himself, in citing Eliezer (Pes. 76b), does not say so. In Rashi's quotation he is sometimes called Eliezer ha-Gadol and sometimes Eliezer Gaon, which induced Azulai ("Shem ha-Gedolim," p. 12a) to consider them as two separate persons. According to Menahem di Lonsano ("Shete Yadot," p. 122a), Eliezer ha-Gadol was the author of the well-known "Orḥot Ḥayyim" or "Ẓawwa'at R. Eliezer ha-Gadol," generally attributed to Eliezer b. Hyrcanus. As to the authorship of the selihah "Elohai Basser 'Ammeka," recited in the service of Yom Kippur Ḳaṭon and attributed to Eliezer by Michael ("Or ha-Ḥayyim," pp. 205-207), see Landshuth, "'Ammude ha-'Abodah," p. 20.

J. M. SEL.

ELIEZER (LIEZER-ELEAZAR) B. JACOB: 1. Tanna of the first century; contemporary of Eleazar b. Ḥisma and Eliezer b. Hyrcanus, and senior of 'Illai (Pes. 32a, 39b; Yalḳ., Lev. 638). Of his personal history nothing is known, except that he had seen the Temple at Jerusalem and was familiar with the specific purposes of its many apartments, a subject on which he was considered an authority (Yoma 16b; see MIDDOT). Some of the details, however, he eventually forgot, and was reminded of them by Abba Saul b. Baṭnit (Mid. ii. 5, v. 4).

Simon b. 'Azzai, Akiba's contemporary, relates that he had discovered a genealogical roll wherein was stated, "The Mishnah of R. Eliezer b. Jacob is only a 'ḳab' [small in proportion], but clear" (משנת ראב"י קב ונקי, Yeb. 49b), wherefore subsequent generations generally adopted Eliezer's views as law (Yeb. 60a; Bek. 23b).

In the Haggadah, too, he is mentioned. According to him, what the Bible says (Deut. xi. 13), "To serve him with all your heart and with all your soul," is an admonition to the priests that, when officiating, they shall entertain no thought foreign to their duty (Sifre, Deut. 41).

2. Tanna of the second century, quoted among Akiba's younger disciples who survived the fall of Bethar and the subsequent Hadrianic persecutions: Judah b. 'Illai, Meïr, Simon b. Yoḥai, Eliezer b. Jose ha-Gelili (Gen. R. lxi. 3; Cant. R. ii. 5; compare Ber. 63b; Yeb. 62b). With most of them he maintained halakic disputations (Neg. x. 4; Tosef., Yeb. x. 5; *ib.* B. Ḳ. v. 7; *ib.* Ker. i. 11; *ib.* Parah, iii. 10). He was the founder of a school known in the Talmud after his name, Debe R. Eliezer b. Jacob, which sometimes opposed the Debe R. Ishmael (Sanh. 90b; Ḥul. 132a; Yoma 45b; see Ḥanina b. Minyomi).

Like his older namesake, Eliezer is quoted in both the Halakah and the Haggadah. From the Pentateuchal injunction (Deut. xxii. 5), "The woman shall not wear that which pertaineth to man, neither shall a man put on a woman's garment," he maintains that a woman must never handle arms or go to war, and that man must not use ornaments which women usually wear (Sifre, Deut. 226; Nazir 59a). Eliezer taught: "Whoso performs a pious deed gains for himself an advocate [before heaven], and whoso commits a sin creates an accuser against himself. Penitence and pious deeds constitute a shield against heavenly visitations" (Ab. iv. 11).

It is related of him that he once gave up the seat of honor to a poor blind man. The distinction thus conferred on the visitor by so eminent a man induced the people thereafter bounteously to provide for the needy one, who, when he realized the cause of his good fortune, thanked its author. He said, "Thou hast shown kindness unto one who is seen, but can not see: may He who sees, but can not be seen, harken to thy prayers and show thee kindness" (Yer. Peah viii. 21b).

G. M. Sel.

ELIEZER B. JACOB NAHUM. See Nahum.

ELIEZER BEN JOEL HA-LEVI (ראבי"ה): German Talmudist; born probably at Bonn 1160-65; died about 1235. He belonged to a German family of scholars; his father, Joel ben Isaac ha-Levi, was a prominent teacher of the Talmud, and his maternal grandfather was Eliezer b. Nathan, perhaps the greatest Talmudist of Germany in the early part of the twelfth century. Eliezer's first teacher was his father; he then attended the yeshibot of Metz, Mayence, and Speyer. His teachers in Mayence and Speyer were Eliezer b. Samuel and Moses b. Solomon ha-Kohen, two pupils of Jacob Tam. Isaac b. Asher II. of the yeshibah at Speyer is often designated by him as his teacher. Eliezer settled first at Bonn, whence he went to Bingen, where he and his family barely escaped a massacre at New-Year. On this occasion he lost all his property, including his books and manuscripts.

In 1200 he succeeded his father as chief rabbi of Cologne, his assistants being Menahem b. David and Shealtiel b. Menahem; he conducted at the same time a large yeshibah. He took part in the Synod of Mayence (1220 or 1223), which had for its object the amelioration of the moral, religious, and social condition of the communities. His daughter's son Hillel was the father of Mordecai b. Hillel, and among his pupils may be mentioned Isaac b. Moses, who frequently quotes his teacher in his "Or Zarua'."

Eliezer displayed a many-sided literary activity. His comments on the Bible and his glosses show that he was influenced by the German mysticism of his time. Like his colleague Eleazar of Worms, he attached great importance to gemaṭria, though many of his glosses are grammatical and lexicographical.

His Works.

The four liturgical poems by Eliezer that have been preserved voice the sorrows of Israel, of which he himself had ample experience. They are distinguished by wealth of thought and perfection of form, and are among the best German piyyuṭim. He, however, devoted himself chiefly to the Talmud and the Halakah. He wrote tosafot to various Talmudic treatises, those to Baba Ḳamma, Ketubot, Yebamot, and Nedarim being quoted by later authorities; but they are little known, as he lost the manuscripts at Bingen. His chief productions, "Abi ha-'Ezri" and "Abi Asaf," deal with ritualistic problems and acquired great authority in Germany. Both follow mostly the arrangement of the treatises of the Talmud, the author first explaining the several passages of the Talmud with especial reference to the halakic Midrashim Sifra and Sifre, and to the Jerusalem Talmud, and then laying down the rules for religious observances, adding his own or other responsa relating to the subject.

Eliezer, like most German scholars, lacked skill in presentation, and the works in which he attempted to codify the laws regulating daily life are more or less chaotic in arrangement. The "Abi ha-'Ezri" contains most of the material discussed in Berakot, in Seder Mo'ed, in Ḥullin, and in Niddah, and also treats of "issur we-hetter" (that which is forbidden and permitted), and some parts of the marriage laws. The "Abi Asaf" contains the material referring to the orders Nashim and Neziḳin, hence the larger part of the marriage laws, and the Talmudic-rabbinical law. Notwithstanding these methodological defects, Eliezer's works enjoyed the highest reputation during the Middle Ages, and are abundantly praised by his contemporaries. So far only a small fragment of the "Abi ha-'Ezri," under the title ספר ראבי"ה (Cracow, 1882), has been published, while the whole work is preserved in manuscript in the Bodleian Library (Neubauer, Nos. 637–639) and in several other libraries. Azulai saw part of the "Abi Asaf" in manuscript, and the work may still be extant. A treatise by Eliezer on the legal ordinance of Ketubah is also extant (MS. De Rossi, No. 563). Long extracts from "Abi Asaf" are found in Isaac b. Moses' "Or Zarua'," in Meïr of Rothenburg's responsa, in "Mordecai," in Haggahot Maimuniyyot, and in Asher b. Jehiel's Halakot. They are not only of great value for the study of the Halakah, but are also of great interest for the history of Jewish literature. Eliezer's responsa give information on authorities and works otherwise little or not at all known. These extracts also give an adequate idea of Eliezer's personality. He himself rigorously observed the religious practises, even keeping the Day of Atonement two days in succession, while at the same time he was lenient toward others. He permitted, for instance, non-Jewish musicians at weddings on the Sabbath. But he was inflexible in disputes relating to morals. He enforced rigorously Rabbenu Gershon's decree against polygamy, not even permitting a husband to marry again in the case of the wife's incurable insanity.

L. G.

ELIEZER B. JOSE HA-GELILI: Tanna of the fourth generation (second century); one of Akiba's later disciples (Ber. 63b; Cant. R. ii. 5; Eccl. R. xi. 6; see Eliezer b. Jacob). While he cultivated both the Halakah (Soṭah v. 3; Tosef., Sanh. i. 2; Sanh. 3b) and the Haggadah, his fame rests mainly on his work in the latter field. Indeed, with reference to his homiletics, later generations said, "Wherever thou meetest a word of R. Eliezer b. R. Jose ha-Gelili in the Haggadah, make thine ear as a funnel (Ḥul. 89a; Yer. Ḳid. i. 61d; Pesiḳ. R. x. 38b; compare Jastrow, "Dict." *s.v.* אפרכסת). For, even where he touched on the Halakah, he always brought exegesis to bear upon the matter. Thus, arguing that after legal proceedings are closed the court may not propose a compromise, he says, "The judge who then brings about a settlement is a sinner; and he who blesses him is a blasphemer, of whom it may be said (Ps. x. 3) ובוצע ברך נאץ ה' ["The compromiser he blesseth: the Lord he contemneth"; A. V. "Blesseth the covetous, whom the Lord abhorreth"]. The Law must perforate the mountain (*i.e.*, must not be set aside under any considerations); for thus the Bible says (Deut. i. 17), 'Ye shall not be afraid of the face of man; for the judgment is God's'" (Tosef., Sanh. *l.c.*; Sanh. 6b; Yer. Sanh. i. 18b). He compiled a set of hermeneutic rules as guides in interpreting the Scriptures (see Baraita of the Thirty-two Rules), some of which are adaptations of those of his predecessors, and in so far applicable to Halakah as well as to Haggadah. Those specifically homiletical are based on syntactical or phraseological or similar peculiarities of the Biblical texts which constitute the substance of the Midrashim.

Like his colleagues, at the close of the first academic session after the Bar Kokba insurrection, Eliezer publicly thanked the people of Usha. He said, "The Bible relates (II Sam. vi. 12), 'The Lord hath blessed the house of Obed-edom, and all that pertaineth unto him, because of the ark of God.' Is this not very significant? If, for merely dusting and cleaning the Ark, which neither ate nor drank, Obed-edom was blessed, how much more deserving of blessings are they who have housed the scholars, have furnished them with meat and drink, and have otherwise shared with them their goods!" (Ber. 63b). Elsewhere (Cant. R. ii. 5) this is attributed to another speaker, while Eliezer is credited with the following: "It is recorded (II Sam. xv. 6), 'Saul said unto the Kenites . . . Ye showed kindness unto all the children of Israel, when they came up out of Egypt.' Was it not to Moses alone to whom Jethro ["the Kenite"; see Judges i. 16, iv. 11] had shown kindness? But the Bible here implies the rule that whoso deals kindly with any one of the spiritual heads of Israel, to him it is accounted as if he had done so to the whole people" (compare Lev. R. xxxiv. 8). With reference to the Biblical statement (Josh. xxiv. 32), "The bones of Joseph, which the children of Israel brought up out of Egypt, buried they in Shechem," he remarks, "Was it not Moses who brought up those bones (Ex. xiii. 19)? But this teaches that where one starts a good deed and fails to bring it to a finish, another party performing the unfinished part, the whole deed is credited to the latter" (Gen. R. lxxxv. 3; compare Soṭah 13b; Tan., 'Ekeb. 6). He counsels that one should advance or postpone a journey in order to enjoy the company of a good man; and likewise to avoid the company of a bad one (Tosef., Shab. xvii. [xviii.] 2, 3; *ib.* 'Ab. Zarah i. 17, 18).

S. S. S. M.

ELIEZER BEN JOSEPH OF CHINON: French Talmudist; born about 1255; martyred on the Jewish New-Year, Sept. 25, 1321; a pupil of Perez ben Elijah of Corbeil, whose sister he married. Estori Farḥi, Eliezer's pupil, in his "Kaftor wa-Feraḥ," mentions a work by his teacher, entitled "Halakot," which, however, has not been preserved. Eliezer is known chiefly by his correspondence and controversies. One of the latter refers to the Talmudic law that a document predated is void. The question arose whether this law was applicable to a deed of gift; after a good deal of correspondence it was decided in Eliezer's favor by Solomon ben Adret. Eliezer suffered death during the terrible persecutions of the lepers. Joseph, the father of Eliezer, was a prominent rabbi and scholar; according to Zunz, Nathanel of Chinon was the father of Joseph; this, however, is doubtful.

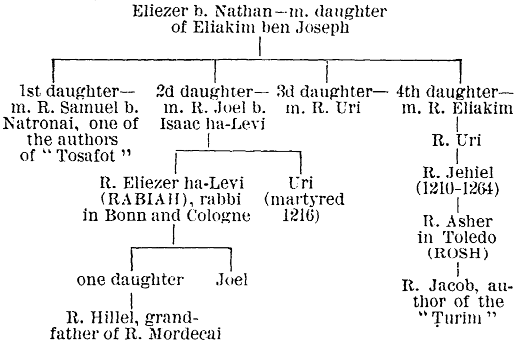
ELIEZER B. NAPHTALI OF FRANKFORT. See TREVES, ELIEZER B. NAPHTALI.

ELIEZER B. NATHAN OF MAYENCE (ראב״ן = RABaN): Halakist and liturgical poet; flourished in the first half of the twelfth century. He was the son-in-law of Rabbi Eliakim b. Joseph of Mayence, a fellow student of Rashi. Through his four daughters Eliezer became the ancestor of several learned families which exerted a great influence upon religious life in the subsequent centuries. One of his great-grandsons was R. Asher b. Jehiel (ROSH), father of R. Jacob, author of the "Ṭurim."

The following table represents the genealogy of the family:



Eliezer b. Nathan—m. daughter of Eliakim ben Joseph
1st daughter—m. R. Samuel b. Natronai, one of the authors of "Tosafot"
2d daughter—m. R. Joel b. Isaac ha-Levi
3d daughter—m. R. Uri
4th daughter—m. R. Eliakim
R. Eliezer ha-Levi (RABIAH), rabbi in Bonn and Cologne
Uri (martyred 1216)
one daughter
Joel
R. Hillel, grandfather of R. Mordecai
R. Uri
R. Jehiel (1210-1264)
R. Asher in Toledo (ROSH)
R. Jacob, author of the "Ṭurim"

Eliezer maintained a scholarly correspondence with his noted contemporaries, R. Tam and Rashbam (Jacob and Samuel b. Meïr), who esteemed him very highly, and in conjunction with whom, at the head of a synod of 150 rabbis from France and Germany, he had directed important measures. His ritual and juridical decisions were eagerly sought. The most important of his responsa he included in his principal halakic work. This book, which, playing upon the initials of his name, he terms "EBeN ha-'Ezer," is cited by his great-grandson Rosh, and by R. Solomon Luria, under the title of "Ẓofnat Pa'aneaḥ." The author attempts in this work to account for certain traditional customs, to offer solutions of complicated legal questions, and to throw light on the significance of ritual observances. The work is therefore necessarily lacking in unity. The first and smaller part, mainly in short chapters of varied contents (in the printed text extending up to No. 385), contains answers to questions from pupils and contemporaries; while the second and larger section presents elaborate halakic discussions arranged according to subjects, corresponding to the Talmudic tractates. Since the decisions as well as the scholarly treatises often contain personal reminiscences, observations regarding customs and usages, names of scholars, and miscellaneous literary data, the work is a storehouse for the student of Jewish history in that century. The various Hebrew paraphrases of German and French words which occur in the work are of importance for linguistic research.

"Eben ha-'Ezer."

Eliezer proves himself conscientious and careful in his decisions. Unlike R. Tam, he possessed little self-confidence, and in his humility and reverence for tradition he is inclined to extremely rigid interpretations of the Law. Solomon's injunction (Prov. i. 8), "Forsake not the teaching of thy mother," he interprets as meaning, "What the older rabbis have prohibited we must not permit" (No. 10). The chapters on civil law contain many an interesting document, and also a statement of commercial relations occasioned by various trials. They contain precise statements of the prices of goods and accurate information concerning commercial usages in the Rhineland and in distant Slavic countries; *e.g.*, concerning the gold trade in Strasburg and Speyer (fol. 145b); the coinage of the time (Zunz, "Z. G." p. 5b); and the export trade with Galicia and southern Russia (No. 5). Slavic customs and character are also discussed in connection with ritual matters. Among the decisions are some containing interpretations of Biblical and Talmudic sayings; one of them (No. 119) even presenting a connected commentary on Prov. xxx. 1-6, in which R. Saadia's view is cited—namely, that Ithiel and Ucal were the names of two men who addressed philosophical questions to Agur ben Jakeh.

The work mentions the year 1152, and must therefore have been completed after that date. The year 1247, which occurs on two copies, may be credited to later transcribers. In the subsequent centuries Eliezer came to be regarded as a great authority, but his work was little known. Not until its importance had been specially urged by the most influential rabbis of Poland—Mordecai Jafe, Samuel Eliezer Edels (Maharsha), Solomon Ephraim Luntschitz, among others, in a formal appeal issued from Posen in 1609—was its publication undertaken. The first edition, Prague, 1610, has, up to the present time, remained the only one.

As Liturgical Poet.

Eliezer wrote numerous yoẓerot, seliḥot, and other piyyuṭim; very few of them, however, have been incorporated in the German and Polish liturgy. The "Akapperah Pene Melek" in the seliḥot to the musaf of the Day of Atonement is an example. His poetical productions are valuable only as an index to his devout nature and to his estimate of the importance of the liturgy. They are distinguished for neither originality, elevation of thought, nor elegance of diction. With their allusions to haggadic interpretations, their employment of payyeṭan phraseology, acrostics, rimes, and similar mechanical devices, they differ little from many other liturgical productions. Some of these poems he seems to have written on special occasions. Thus, one piyyuṭ composed for a circumcision occurring on the Sabbath bears at the close the cipher "ABN," and the words "Long live my child Eliakim." Altogether twenty-five piyyuṭim of his are known. One of his seliḥot depicts the persecutions of the First Crusade (1096); another, those of 1146.

As Commentator.

To Eliezer is attributed the commentary on the Maḥzor published in Ostroh in 1830. Some of Eliezer's expositions are mentioned in a commentary on the festal prayers called "Ḳorban Aharon." Mention is also made of a commentary on Abot, from which Jehiel Morawtschik, in his "Minḥah Ḥadashah," written in 1576 after a manuscript of the year 1145, makes quotations.

As Chronicler.

Eliezer is also supposed to be the author of a history of the terrible events of 1096, the year of the First Crusade. The persecutions of the Jewish communities in the towns along the Rhine, the horrible butcheries that were perpetrated, are faithfully depicted here in chronological order. In this work various acrostic verses contain the name "Eliezer b. Nathan." In deference to a passage in Joseph ha-Kohen's "'Emeḳ ha-Baka," p. 31, which makes a certain Eleazar ha-Levi the author, some writers (as Landshuth and Grätz) have denied Eliezer's authorship of this chronicle. This view, however, has recently been refuted. The chronicle was first edited by Adolph Jellinek ("Zur Geschichte der Kreuzzüge," Leipsic, 1854); and was republished as "Hebräische Berichte über die Judenverfolgungen Während der Kreuzzüge," by Neubauer and Stern, together with a German translation, in the "Quellen zur Geschichte der Juden in Deutschland," ii., Berlin, 1892.

ELIEZER BEN REUBEN. See Kahana, Eliezer ben Reuben.

ELIEZER BEN SAMSON: Rabbi and liturgist of Cologne, of the twelfth century; a relative of the tosafist R. Eliezer b. Nathan; studied at Speyer under R. Isaac b. Elhanan, and at Mayence. He was one of the leaders of the "great synod" in which one hundred and fifty rabbis took part under the guidance of R. Jacob Tam and his brother Samuel (Rashbam). He is mentioned, and one of his responsa is cited, by Mordecai (Ket. 219; Shebu. 761; Ḳid. 515); another responsum is cited in "Or Zaro'a" (Shab. 45). Two of his piyyuṭim are extant: (1) for the second evening of the Feast of Tabernacles, a pizmon of seven stanzas, six verses in each; (2) "Reshut" to the "Hafṭarah," in Aramaic, consisting of thirty-two verses which rime in "raya." Both piyyuṭim give the acrostic of the author's name.

Bibliography: Michael, *Or ha-Ḥayyim*, p. 218; Zunz, *Literaturgesch.* p. 176; Fuenn, *Keneset Yisrael*, p. 133.

ELIEZER B. SAMUEL. See Treves, Eliezer b. Samuel.

ELIEZER BEN SAMUEL OF VERONA: Italian tosafist; lived about the beginning of the thirteenth century. He was a disciple of Rabbi Isaac the elder, of Dampierre, and grandfather of the philosopher and physician Hillel of Forli. He had sanctioned the second marriage of a young woman whose husband had probably, though not certainly, perished by shipwreck. But Eliezer ben Joel ha-Levi refused to indorse the permission, and a protracted controversy resulted, into which other rabbis were drawn. Eliezer ben Samuel is often quoted on Biblical and halakic questions. Mordecai, in speaking of Eliezer, calls him "Eliezer of Verdun," though undoubtedly meaning "Verona."

Bibliography: Azulai, *Shem ha-Gedolim*, i. 28; Zunz, *G. S.* iii. 250; *Monatsschrift*, xxxiv. 520; Gross, *Gallia Judaica*, p. 207.

L. G. A. Pe.

ELIEZER B. TADDAI: Tanna of the second century; contemporary of Simon b. Eleazar (Tosef., 'Er. vii. [v.] 9); and quoted in some baraitot in connection with halakot and with haggadot (Tosef., Shab. xvi. [xvii.] 10; Mek., Beshallaḥ, Shirah, i.; Tan., Beshallaḥ, 11). Nothing is known of his history, and, as is the case with many others, the exact version of his prænomen can not be ascertained. The Tosefta (*l.c.*) reads "Eleazar," and so does Yerushalmi (Shab. iii. 5d.; 'Er. vi. 33c); while the Babylonian Talmud (Shab. 123a; 'Er. 71b) and the Midrashim (*l.c.*) read "Eliezer." See also Tosef., Shab. *l.c.*; Rabbinowicz, "Diḳduḳe Soferim" to Shab. and 'Er. *l.c.*

S. S. S. M.

ELIEZER OF TOLEDO: Rabbi in Constantinople in the first half of the nineteenth century and a contemporary of Ḥiyya Pontremoli. He was the author of "Mishnat de-Rabbi Eli'ezer," a collection of one hundred and thirty-four responsa on the civil laws of Ḥoshen Mishpaṭ (Salonica, 1853).

Bibliography: Fuenn, *Keneset Yisrael*, p. 124; Walden, *Shem ha-Gedolim he-Ḥadash*, i. 24.

K. M. Sel.

ELIEZER OF TOULOUSE: French tosafist; died about 1234. In his youth Eliezer was a tutor in the house of the wealthy scholar Hezekiah ben Reuben of Boppard. His tosafot on Beẓah are quoted by Zedekiah Anaw in his "Shibbole ha-

Leḳeṭ," and other quotations often made in his name may also have been taken therefrom.

Bibliography: Gross, *Gallia Judaica*, p. 211; Zunz, *Z. G.* p. 39.

L. G. A. Pe.

ELIEZER OF TOUQUES (מטוך): French tosafist; lived at Touques in the second half of the thirteenth century. He abridged the tosafot of Samson of Sens, Samuel of Evreux, and many others, and added thereto marginal notes of his own, entitled "Gilyon Tosafot," or "Tosafot Gillayon." This abridgment, together with the notes, after undergoing many alterations and receiving several additions from later authorities, was called "Tosafot Ṭuk"; it forms the foundation of the Tosafot now printed with the Talmud (see Hillel ben Mordecai, 'Ab. Zarah, § 1295; Judah ben Eliezer, "Minḥat Yehudah," 58a; R. Nissim to Alfasi, Giṭ. viii.; and Bezalel Ashkenazi, "Shiṭṭah," pp. 47–49). Gershon Soncino, who printed Eliezer's tosafot for the first time, says, in the preface to Ḳimḥi's "Miklol" edited by him (Constantinople, 1532–34), that he collected them in various places in France, especially in Chambéry, Savoy. Eliezer was also the author of a commentary on the Pentateuch, mentioned in a list of works appended to the manuscript of Ibn Janaḥ's "Sefer ha-Riḳmah," now in the Bibliothèque Nationale, Paris (No. 1216).

Bibliography: Azulai, *Shem ha-Gedolim*, ii., s.v. תוספות; Zunz, *Z. G.* p. 39; Gross, *Gallia Judaica*, p. 209; Rabbinowicz, *Ma'amar 'al Hadfasat ha-Talmud*, p. 23, Munich, 1877; Michael, *Or ha-Ḥayyim*, No. 424.

K. I. Br.

ELIEZER (ELEAZAR) B. ZADOK: 1. Tanna of the first century; disciple of Johanan the Horonite (Tosef., Suk. ii. 3; Yeb. 15b). He traced his descent from Shinḥab or Senaah of the tribe of Benjamin ('Er. 41a; Ta'an. 12a). In his youth he saw the Temple in its glory (Mid. iii. 8; Suk. 49a; Sanh. 52b; Men. 88b), and later witnessed its destruction by the Romans (Tosef., Ket. v. 9; Lam. R. i. 5). During his residence in Jerusalem he, in partnership with Abba Saul b. Baṭnit, conducted a wine and oil business (Tosef., Beẓah, iii. 8). He is reported to have acquired from some Alexandrian Jews a building formerly used as a private synagogue (Tosef., Meg. iii. [ii.] 6; Yer. Meg. iii. 72d). The partners were generally applauded for their fairness and piety (Tosef., Beẓah, *l.c.*).

After the destruction of Jerusalem, Eliezer is found at Acco (Acre), where, as he himself relates, he witnessed the distress of his vanquished people. There he saw the daughter of the once fabulously rich Nicodemus b. Gorion of Jerusalem risking her life at the hoofs of horses to pick up the grains which they had dropped (Ket. 67a; Lam. R. i. 16; compare Yer. Ket. v. 30b *et seq.*). Another prominent Jewish woman, Miriam, the daughter of Simon b. Gorion (perhaps Giora, the leader of the Zealots, who surrendered to Titus; see Josephus, "B. J." vii. 2), Eliezer saw tied by her tresses to the tail of a horse, and thus dragged behind the Roman horsemen (Yer. Ket. v. 30c; compare Lam. R. *l.c.*). Later he is found at Jabneh, a frequent visitor at the residence of Patriarch Gamaliel II. (Tosef., Beẓah, ii. 13 *et seq.*; Pes. 37a; Beẓah 22b), and a member of the Sanhedrin (Shab. 11a; Niddah 48b), where he frequently related personal observations which he had made in the days of Judea's independence (Tosef., Pes. vii. 13; compare Yer. Pes. viii. 36b; Tosef., Suk. ii. 10; Tosef., Meg. iii. 15; Tosef., Sanh. ix. 11; Tosef., Kelim, B. B. ii. 2); and on some of his reports the Sanhedrin founded halakot (Pes. x. 3, 116b; B. B. 14a; Men. 40a).

The frequency of his reminiscences in Talmudic literature forms the strongest argument for the assumption that he was the first compiler of a now lost treatise on mourning called "Ebel Zuṭarta" (see Brüll, "Jahrb." i. 16–26; Klotz, "Ebel Rabbati," pp. 3 *et seq.*). How long he remained in Jabneh is not stated; but he did not end his days there. According to a Talmudic notice (M. Ḳ. 20a; Sem. xii.), he died at Ginzaḳ (Gazaca) in Media, far away from his family; and his son, Zadok II., learned of his death only after the lapse of three years.

2. Grandson of the preceding; flourished in the fourth tannaitic generation (second century). He is often met with in halakic controversies with the later disciples of Akiba (Kil. vii. 2; Kelim xxvi. 9; Miḳ. vi. 10). Like his grandfather, he spent many years in Babylonia, where Abba Arika's father studied under him (Suk. 44b; see Aibu, 1). Unlike his grandfather, in whose name no practical decisions are on record, he decided questions submitted to him (Suk. *l.c.*); and his own acts are cited as illustrations in ritualistic law (*ib.*; Tosef., Suk. ii. 2; Yer. Sanh. vii. 24b; the illustration of the Tosefta is anachronistically ascribed to the elder Eliezer b. Zadok).

Bibliography: Bacher, *Ag. Tan.* i. 50–55; Brüll, *Mebo ha-Mishnah*, i. 91–93; Frankel, *Darke ha-Mishnah*, pp. 97–99, 178; Heilprin, *Seder ha-Dorot*, ed. Maskileison, ii. 59a, 68b; Weiss, *Dor*, ii. 121; Zacuto, *Yuḥasin*, ed. Filipowski, pp. 26a, 58a.

ELIEZER BEN ZEEB WOLF: Russian rabbi; lived about the middle of the eighteenth century. He was the author of two works: (1) "Imre Shefer," containing sermons, Poryck, 1786; and (2) "Dammeseḳ Eli'ezer," containing novellæ on Talmud and Tosafot, ethical sermons, a commentary on Ps. cxx.–cxxxiv., and various other explanations and homilies, *ib.* 1790.

Bibliography: Fuenn, *Keneset Yisrael*, p. 123; Van Straalen, *Cat. Hebr. Books Brit. Mus.* p. 70.

L. G. I. Br.

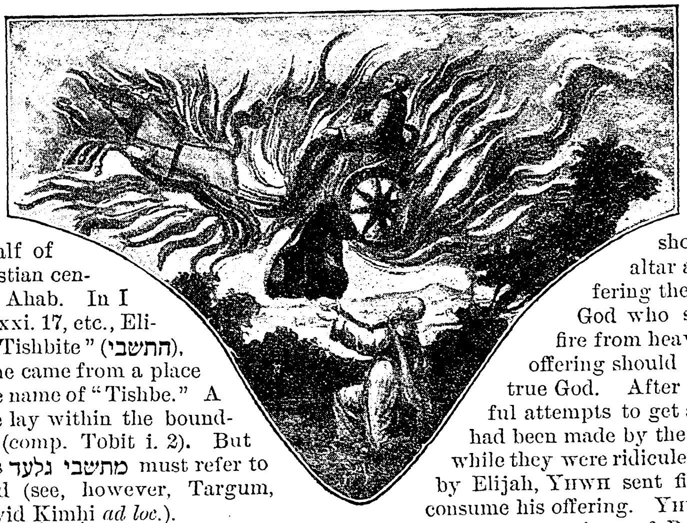
ELIHU: Name of several Biblical personages. It has two forms—אליהוא and אליהו—and its meaning is "He is my God," *i.e.*, "He remains my God and does not change," not as G. Hoffmann ("Hiob," 1891, p. 23) renders it: "He is my God," *i.e.*, "My God is the only true God." The most famous bearer of this name is found in the Book of Job (xxxii. 2–6, xxxiv. 1, xxxv. 1, xxxvi. 1), where he is described as the son of Barachel (ברכאל), and a descendant of Buz (בוז). Since the latter, according to Gen. xxii. 21, was a son of Abraham's brother Nachor and a brother of Huz (עוץ), the ancestor of Job, it follows that Elihu, the Buzite, was a distant relative of Job. The Assyrian equivalent of the land of Buz is "Bazu," designating a region probably east of Damascus (Friedrich Delitzsch, "Assyrische Lesestücke," 4th ed., 1901, p. 192). Elihu is therefore described as a non-Israelite living during the patriarchal period, like Job and other personages of the book named after him. Elihu is the speaker in ch. xxxii.-xxxvii., and his argument is as follows: God is the educator of mankind, who punishes only until the sinner has atoned for his sin and recognizes his wrong-doing. Then God has attained His object, to "bring back his soul from the pit, to be enlightened with the light of the living" (xxxiii. 17-30). Elihu, therefore, holds a middle ground, maintaining that God neither "takes away judgment," nor sends suffering merely as a punishment, but acts as the educator and teacher of mankind (xxxiv. 5; xxxv. 1, 14; xxxvi. 10, 22). As regards the relation of Elihu's speeches to the Book of Job, see Job, Book of.

Among the Israelites the following bore the name of Elihu: (1) Samuel's great-grandfather (I Sam. i. 1); (2) a brother of David (I Chron. xxvii. 18); (3) a chief of the tribe of Manasseh, who joined David when the latter fled to Ziklag (I Chron. xii. 20); (4) one of the Korhites (I Chron. xxvi. 7).

E. G. H. E. K.

ELIJAH (**אליהו**).—**Biblical Data:** The name אליהו means "Yhwh is (my) God," and is a confession that its bearer defended Yhwh against the worshipers of Baal and of other gods. It has therefore been assumed that the prophet took this name himself (Thenius, in "Kurzgefasstes Exegetisches Handbuch zu I Könige," xvii. 1). Elijah was a prophet in Israel in the first half of the ninth pre-Christian century, under King Ahab. In I Kings xvii. 1 and xxi. 17, etc., Elijah is called "the Tishbite" (התשבי), probably because he came from a place (or a family) by the name of "Tishbe." A place of that name lay within the boundaries of Naphtali (comp. Tobit i. 2). But the Hebrew words מתשבי גלעד must refer to a place in Gilead (see, however, Targum, Masoretes and David Ḳimḥi *ad loc.*).

The Ascension of Elijah.
From an illuminated ketubah of the early nineteenth century.
(In the U. S. National Museum, Washington, D. C.)



Elijah, therefore, came from the land east of the Jordan, to wage war, in the name of the God of his fathers, against the worship of Baal. He was marked as an adherent of the old customs by his simple dress, consisting of a mantle of skins girt about the loins with a leather belt (II Kings i. 8). He began his activities with the announcement that the drought then afflicting the land should not cease until he gave the word (comp. Josephus, "Ant." viii. 13, § 2).

Ahab and Elijah.

This announcement, addressed to Ahab and his wife, marked the beginning of a life of wandering and privation for the prophet. He fled from hiding-place to hiding-place, the first being by the brook Cherith (כרית). Since Robinson's explorations in Palestine (ii. 533 *et seq.*) this brook has been identified with the Wadi el-Ḳelt, which discharges into the Jordan near Jericho. But the resemblance between the two names is really less close than appears, for it must be remembered that "Ḳelt" is pronounced with the emphatic "k." Moreover, since the expressions קדמה and על־פני הירדן refer to the land east of the Jordan, the brook Cherith must have been there, even if there is no modern river-name with which to identify it. After the brook Cherith had dried up, the prophet was forced to seek refuge beyond the boundaries of Israel, and found it in the Phenician Zarephath, about four hours' journey south of Sidon, where a widow sustained him. She was rewarded by the prophet's miraculous benefits (I Kings xvii. 9-24).

The greatest achievement of Elijah's life was his victory over the priests of Baal at Mt. Carmel. Having heard that the other prophets of Yhwh were also persecuted, he requested King Ahab to gather the people of Israel, the 450 priests of Baal, and the 400 prophets of Ashtaroth on Mt. Carmel. Then he asked Israel the famous question: "How long do ye halt on both knees?" (A. V.: "How long halt ye between two opinions?"), meaning, "How long will ye be undecided as to whether ye shall follow Yhwh or Baal?" The people remaining silent, he invited the priests of Baal to a contest, proposing that he and they should each build an altar and lay a burnt offering thereon, and that the God who should send down fire from heaven to consume the offering should be accepted as the true God. After various unsuccessful attempts to get a favorable answer had been made by the prophets of Baal, while they were ridiculed with subtle irony by Elijah, Yhwh sent fire from heaven to consume his offering. Yhwh was recognized by Israel, and the priests of Baal were slain near the brook Kishon (I Kings xviii. 40).

Elijah at Mount Horeb.

But this victory brought no rest to Elijah. He had to leave Israel in order to escape the vengeance of Jezebel (*ib.* xix. 3 *et seq.*), and fled to the place where Israel's Law had been promulgated by Moses. As he lay under a juniper-tree, exhausted by his journey, he was miraculously provided with food; and on reaching Horeb, the mountain of God, he heard the voice of the Lord exhorting him to patience. This is the sense of the famous passage (*ib.* xix. 11-13). God manifested Himself neither in the great wind that rent the mountains, nor in the earthquake, nor in the fire, but in the "still small voice." The three following measures were suggested: the appointing of a foreign enemy of Israel; the anointing of an Israelitic rival king to Ahab's dynasty; and the anointing of Elisha to continue the spiritual work of the prophet. This, the chief work of the prophet, Elijah himself carried on to the end of his life. After the election of Elisha (xix. 19-21), he prophesied both punishments and promises (xxi. 17-28; II Kings i. 3 *et seq.*), and left the field of his activities as suddenly as he had appeared (II Kings ii. 11).

Elijah is also mentioned in later Biblical and apocryphal passages as follows: II Chron. xxi. 12 *et seq.*; Mal. iii. 24; Ecclus. (Sirach) xlviii. 1; I Macc. ii. 58; Isaiah's Martyrdom, ii. 14 (in Kautzsch, "Die Apokryphen und Pseudepigraphen des Alten Testaments," 1898, ii. 125).

E. G. H. E. K.

——**In Rabbinical Literature:** Elijah, "let him be remembered for good," or "he who is remembered for good" (Yer. Sheb. iii., end); or, as he is commonly called among the Jews, "the prophet Elijah" (Eliyahu ha-nabi'), has been glorified in Jewish legend more than any other Biblical personage. The Haggadah which makes this prophet the hero of its description has not been content, as in the case of others, to describe merely his earthly life and to elaborate it in its own way, but has created a new history of him, which, beginning with his death or "translation," ends only with the close of the history of the human race. From the day of the prophet Malachi, who says of Elijah that God will send him before "the great and dreadful day" (Mal. iii. 23 [A. V. iv. 5]), down to the later marvelous stories of the Ḥasidic rabbis, reverence and love, expectation and hope, were always connected in the Jewish consciousness with the person of Elijah. As in the case of most figures of Jewish legend, so in the case of Elijah the Biblical account became the basis of later legend. Elijah the precursor of the Messiah, Elijah zealous in the cause of God, Elijah the helper in distress—these are the three leading notes struck by the Haggadah, endeavoring to complete the Biblical picture with the Elijah legends. Since, according to the Bible, Elijah lived a mysterious life, the Haggadah naturally did not fail to supply the Biblical gaps in its own way. In the first place, it was its aim to describe more precisely Elijah's origin, since the Biblical (I Kings xvii. 1) "Elijah, who was of the inhabitants of Gilead," was too vague.

Three different theories regarding Elijah's origin are presented in the Haggadah: (1) he belonged to the tribe of Gad (Gen. R. lxxi.); (2) he was a Benjamite from Jerusalem, identical with the Elijah mentioned in I Chron. viii. 27; (3) he was a priest. That Elijah was a priest is a statement which is made by many Church fathers also (Aphraates, "Homilies," ed. Wright, p. 314; Epiphanius, "Hæres." lv. 3, *passim*), and which was afterward generally accepted, the prophet being further identified with Phinehas (Pirḳe R. El. xlvii.; Targ. Yer. on Num. xxv. 12; Origen, ed. Migne, xiv. 225). Mention must also be made of a statement which, though found only in the later cabalistic literature (Yalḳuṭ Reubeni, Bereshit, 9a, ed. Amsterdam), seems nevertheless to be very old (see Epiphanius, *l.c.*), and according to which Elijah was an angel in human form, so that he had neither parents nor offspring. See MELCHIZEDEK.

In the Times of Ahab.

If the deeds which the Scripture records of Phinehas be disregarded, Elijah is first met with in the time of Ahab, and on the following occasion: God bade the prophet pay a visit of condolence to Hiel, who had suffered the loss of his sons because of his impiety. Elijah was unwilling to go, because profane words always angered and excited him. Only after God had promised to fulfil whatever words the prophet might utter in his righteous indignation did Elijah go to Hiel. Here the prophet met Ahab and warned him that God fulfils the maledictions of the godly, and that Hiel had been deprived of his sons because Joshua had anathematized the rebuilding of Jericho. The king derisively asked: Is Joshua greater than his teacher Moses? For Moses threatened all idolaters with hunger and distress, and yet he—Ahab—was faring very well. At this Elijah said (I Kings xvii. 1): "As the Lord God of Israel liveth," etc.; thereupon God had to fulfil His promise, and a famine came in consequence of the want of rain (Sanh. 113a; Yer. Sanh. x.). God sent ravens to supply the wants of the prophet during the famine. Some think "'orebim" (ravens) refers to the inhabitants of Oreb (Gen. R. xxxviii. 5; Ḥul. 5a; so also the Jewish teacher of Jerome in his commentary on Isa. xv. 7). The ravens brought meat to Elijah from the kitchen of the pious Jehoshaphat (Tan., ed. Buber, iv. 165; Aphraates, *l.c.* p. 314; different in Sanh. 113). God, however, who is merciful even toward the impious, sought to induce Elijah to absolve Him from His promise, so that He might send rain. He accordingly caused the brook from which the prophet drew water to dry up, but this was of no avail. God finally caused the death of the son of the widow in whose house the prophet lived, hoping thereby to overcome the latter's relentless severity. When Elijah implored God to revive the boy (compare JONAH IN RABBINICAL LITERATURE), God answered that this could only be accomplished by means of "the heavenly dew," and that before He could send the dew it would be necessary for the prophet to absolve Him from His promise (Yer. Ber. iv. 9b; different in Sanh. 113a). Elijah now saw that it would be necessary to yield, and took the opportunity to prove before Ahab, by a second miracle, the almighty power of God. He arranged with the king to offer sacrifices to God and Baal at one and the same time, and to see which would turn out to be the true God.

The bulls, which were selected for sacrifice by lot, were twins which had grown up together. But while Elijah brought his bull quickly to the place of sacrifice, the 450 priests of Baal labored in vain to induce the other to move a step. The animal even began to speak, complaining that while it was his twin brother's glorious privilege to be offered upon the altar of God, he was to be offered to Baal. Only after the prophet had convinced him that his sacrifice would also be for the glorification of God could the priests of Baal lead him to the altar (Tan., ed. Buber, iv. 165). They then commenced to cry "Baal! Baal!" but there was no response. In order to confound them utterly, "God made the whole world keep silent as if it were void and waste"; so that the priests of Baal might not claim that the voice of Baal had been heard (Ex. R. xxix., end). These proceedings consumed much time, and Elijah found it necessary to make the sun stand still: "Under Joshua thou stoodst still for Israel's sake; do it now that God's name be glorified!" (Aggadat Bereshit, lxxvi.). Toward evening Elijah called his disciple Elisha and made him pour water over his hands. Then a miracle took place: water commenced to flow from the fingers of Elijah as from a fountain, so that the ditch around the altar became full (Tanna debe Eliyahu R. xvii.). The prophet prayed to God that He would send fire down upon the altar, and that the people might see the miracle in its proper light and not regard it as sorcery (Ber. 9b). In his prayer he spoke of his mission as the precursor of the Messiah, and petitioned God to grant his request that he might be believed in future (Midr. Shir ha-Shirim, ed. Grünhuth, 25a; Aggadat Bereshit, lxxvi.).

Elijah's Zeal for God.

In spite of Elijah's many miracles the great mass of the Jewish people remained as godless as before; they even abolished the sign of the covenant, and the prophet had to appear as Israel's accuser before God (Pirḳe R. El. xxix.). In the same cave where God once appeared to Moses and revealed Himself as gracious and merciful, Elijah was summoned to appear before God. By this summons he perceived that he should have appealed to God's mercy instead of becoming Israel's accuser. The prophet, however, remained relentless in his zeal and severity, so that God commanded him to appoint his successor (Tanna debe Eliyahu Zuṭa viii.). The vision in which God revealed Himself to Elijah gave him at the same time a picture of the destinies of man, who has to pass through "four worlds." This world was shown to the prophet in the form of the wind, since it disappears as the wind; storm (רעיש) is the day of death, before which man trembles (רעש); fire is the judgment in Gehenna, and the stillness is the last day (Tan., Peḳude, p. 128, Vienna ed.). Three years after this vision (Seder 'Olam R. xvii.) Elijah was "translated." Concerning the place to which Elijah was transferred, opinions differ among Jews and Christians, but the old view was that Elijah was received among the heavenly inhabitants, where he records the deeds of men (Ḳid. 70; Ber. R. xxxiv. 8), a task which according to the apocalyptic literature is entrusted to Enoch. But as early as the middle of the second century, when the notion of translation to heaven was abused by Christian theologians, the assertion was made that Elijah never entered into heaven proper (Suk. 5a; compare also Ratner on Seder 'Olam R. xvii.); in later literature paradise is generally designated as the abode of Elijah (compare Pirḳe R. El. xvi.), but since the location of paradise is itself uncertain, the last two statements may be identical.

It is one of the duties of Elijah to stand at the cross roads of paradise and to lead the pious to their proper places, to bring the souls of the impious out of hell at the beginning of the Sabbath, to lead them back again at the end of the Sabbath, and after they have suffered for their sins, to bring them to paradise forever (Pirḳe R. El. *l.c.*). In mystic literature Elijah is an angel, whose life on earth is conceived of as a merely apparitional one, and who is identified with SANDALFON. The cabalists speak also of the struggle between Elijah and the Angel of Death, who asserts his right to all children of men, and who endeavored to prevent Elijah from entering heaven (Zohar Ruth, beginning, ed. Warsaw, 1885, 76a). The taking of Elijah into heaven or supramundane regions did not mean his severance from this world; on the contrary, his real activity then began. From Biblical times there is his letter to Jehoram, written seven years after his translation (Seder 'Olam R. xvii.; compare, however, Josephus, "Ant." ix. 5, § 2), and his interference in favor of the Jews after Haman had planned their extinction (see ḤARBONA; MORDECAI). But it is mainly in post-Biblical times that Elijah's interest in earthly events was most frequently manifested, and to such an extent that the Haggadah calls him "the bird of heaven" (Ps. viii. 9, Hebr.), because like a bird he flies through the world and appears where a sudden divine interference is necessary (Midr. Teh. *ad loc.*; see also Ber. 4b; Targ. on Eccles. x. 20). His appearing among men is so frequent that even the irrational animals feel it: the joyous barking of the dogs is nothing else than an indication that Elijah is in the neighborhood (B. Ḳ. 60b). To men he appears in different forms, sometimes while they are dreaming, sometimes while they are awake, and this in such a way that the pious frequently know who is before them. Thus he once appeared to a Roman officer in a dream and admonished him not to be lavish of his inherited riches (Gen. R. lxxxiii.). Once a man came into a strange city shortly before the beginning of the Sabbath, and not knowing to whom to entrust his money (which he was not allowed to carry on the Sabbath), he went to the synagogue, where he saw some one with phylacteries on his forehead, praying. To this man he gave all that he had for keeping, but when he asked for its return at the end of the Sabbath, he found that he had to deal with a hypocrite and impostor. When the poor man fell asleep Elijah appeared to him, and showed him how to obtain his money from the wife of the swindler. When he awoke he followed the advice of Elijah, and not only received his money back, but also unmasked the hypocrite (Pesiḳ. R. xxii.; Yer. Ber. ii.).

Elijah appeared to many while they were awake, and this in various ways. He often elected to appear in the guise of an Arab (ערבי) or, more exactly, in that of an Arab of the desert טעייא (see ARABIA IN RABBINICAL LITERATURE). In this manner he once appeared to a poor but pious man, and asked him whether he wished to enjoy the six good years which were appointed him now, or at the end of his life. The pious man took him for a sorcerer, and made no reply. But when Elijah came the third time, the man consulted his wife as to what he should do. They concluded to tell the Arab that they wished to enjoy the good years at once; they had hardly

Elijah in the Guise of an Arab.

expressed their wish when their children found a great treasure. The pious couple made good use of their riches, and spent much money for benevolent purposes. After six years the Arab returned and told them that the end of their prosperity had come. The woman, however, said to him: "If you can find people who will use with more conscientiousness what you give unto them, then take it from us and give it to them." God, who well knew what use this pious couple had made of their wealth, left it in their hands as long as they lived (Midr. Ruth Zuṭa, ed. Buber, near end).

To the pious, Elijah is in many cases a guardian angel, for whom no place is too remote, and who leaves nothing undone to help them in their distress or to save them from misery. Thus, Nahum of Gimzo was once sent on a political mission to Rome and given certain gifts to carry to the emperor; on the way he was robbed of these, but Elijah replaced them, and procured for Nahum riches and honor (Sanh. 109a). He saved the tanna Meïr from the persecuting bailiffs. During the religious persecutions under Hadrian he saved another tanna, Eleazar ben Prata, from the Roman government, which wished to sentence him to death, by removing those who were to testify against him and by bringing him to a place 400 miles distant ('Ab. Zarah 17b). He acted as witness for the amora Shila, when he was accused of exercising jurisdiction according to Jewish law (Ber. 58a), and appeared as comforter to Akiba when the latter was in distress (Ned. 50a). As physician he helped Simi b. Ashi (Shab. 109b), and R. Judah I., whose awful and incessant pains he stopped by laying his hand upon him. This healing had at the same time the effect of reconciling Rabbi with Ḥiyyah, for Elijah appeared to Rabbi in the form of Ḥiyyah, and caused him thereby to hold Ḥiyyah in great respect (Yer. Kil. ix. 32b). Elijah was a daily guest in the academy of Rabbi, and on one occasion he even disclosed a great celestial mystery, for which he was severely punished in heaven (B. M. 85b). Elijah, however, is not only the helper in distress and the peacemaker, but he acted also as teacher of Eleazar ben Simon, whom he taught for thirteen years (Pesiḳ., ed. Buber, x. 92b; see Akiba ben Joseph in Legend).

The following is an Elijah story which was very widely circulated, and which was even given a place in the liturgy: To a pious but very poor man Elijah once appeared and offered himself as servant. The man, at first refusing, finally took him. He did not keep him long, however, for the king needed a skilful builder for a palace which he was about to build; Elijah offered his services, and the pious man received a high price for his servant. Elijah did not disappoint his new master, but prayed to God, whereupon suddenly the palace of the king stood there in readiness. Elijah disappeared (Rabb. Nissim, "Ḥibbur Yafeh meha-Yeshu'ah," near end). This story has been beautifully worked over in the piyyuṭ "Ish Ḥasid," which is sung, according to the German-Polish ritual, on Sabbath evening.

Elijah the Friend of the Pious.

In olden times there were a number of select ones with whom Elijah had intercourse as with his equals, they being at the time aware of his identity. In Talmudic-Midrashic literature are the following stories: Eliezer ben Hyrcanus was brought by Elijah to Jerusalem to receive instruction there from Johanan ben Zakkai (Pirḳe R. El. i.). In the great controversy between this teacher and his colleagues, Elijah communicated to Rabbi Nathan what the opinion concerning this controversy was in heaven (B. M. 59b). The same Nathan was also instructed by him with reference to the right measure in eating and drinking (Giṭ. 70a). A special pet of Elijah seems to have been Nehorai, whom he instructed with reference to Biblical passages, and explained to him also some of the phenomena of nature (Yer. Ber. ix. 13c; Ruth R. iv.). Another teacher, called "Jose" (probably not Jose b. Ḥalafta), was so familiar with Elijah that he was not afraid to declare openly that Elijah had a rough temper (Sanh. 113a). The words of Elijah to Judah, the brother of Salla the Pious, read: "Be not angry, and you will not sin; drink not, and you will not sin" (Ber. 29b). Besides this friendly advice the pious Judah received important instructions from Elijah (Yoma 19b; Sanh. 97b). Rabbah ben Shila (Ḥag. 15b), Rabbah ben Abbahu (Ḥag. 15b; B. M. 114b), Abiathar (Giṭ. 6b), Kahana (Ḳid. 41a), Bar He He (Ḥag. 9b), are also mentioned as among the pious who personally communicated with Elijah. Besides these, some others whose names are not given are mentioned as having been in friendly relations with Elijah (B. B. 7b; Yer. Ter. i. 40d; see also Ket. 61a). What kind of people Elijah selected may be seen from the following: Of two pious brothers, one allowed his servants to partake only of the first course at meals, whereas the other allowed them to partake of every course. Elijah did not visit the first, whereas he frequently visited the latter. In like manner he treated two brothers, one of whom served himself first, and then his guests, whereas the other cared for his guests first (Ket. *l.c.*). The demands of Elijah upon his friends were very strict, and the least mistake alienated him. One of his friends built a vestibule, whereby the poor were at a disadvantage in that their petitioning voices could be heard in the house only with great difficulty; as a result Elijah never came to him again (B. B. 7b).

Very characteristic of Elijah is his relation to the Babylonian amora Anan. A man brought Anan some small fish as a present, which he would not accept, because the man wished to submit to him a law case for decision. The petitioner, however, sooner than have the rabbi refuse his gift, decided to take his case elsewhere, and requested Anan to direct him to another rabbi; this Anan did. The rabbi before whom the case was tried showed himself very friendly toward the man because he had been recommended to him by Anan, and decided in his favor. Elijah, till then Anan's teacher and friend, deserted him from that moment, because, through his carelessness, judgment had been biased (Ket. 105b). The Midrash Tanna debe Eliyahu, in which Elijah often speaks of himself in the first person, recounting his experiences and teaching many lessons, is likewise associated with Anan, who is said to have compiled the work from Elijah's own discourses.

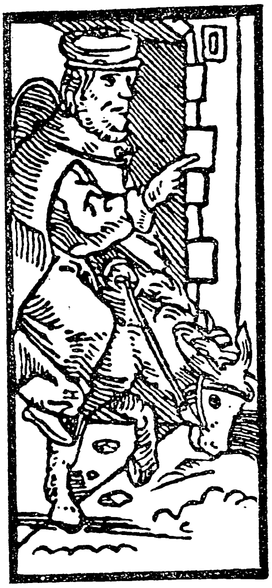
None of the pious could boast of such a close relation to Elijah as could Joshua b. Levi, to fulfil whose wishes Elijah was always ready, although he sometimes showed himself very severe toward him (Yer. Ter. viii. 4b; Yer. Sheb. ix. 31a; Mak. 11a). Elijah once brought about an interview between Joshua and the Messiah (Sanh. 98a), and he also showed Joshua the precious stones which, according to the words of the prophet (Isa. liv. 11, 12), shall replace the sun in giving light to Jerusalem (Pesiḳ. xviii. 136a).

Joshua b. Levi and Elijah.

But more precious than these sacred revelations were the lessons which Joshua received from Elijah, especially the doctrine of the theodicy, which Elijah tried to explain to his friend by means of illustrations. Joshua once asked Elijah to take him along on his journeys through the world. To this the prophet yielded on condition that Joshua should never question him concerning the causes of his actions, strange as they might appear; should this condition be violated, the prophet would be obliged to part from him. Both set out upon their journey. The first halt was at the house of a poor man who owned only a cow, but who, with his wife, received the strangers most kindly, and entertained them to the best of his ability. Before they continued their journey next morning, the rabbi heard Elijah pray that God might destroy the poor man's cow, and before they had left the hospitable house the cow was dead. Joshua could not contain himself, but in great excitement said to Elijah: "Is this the reward which the poor man receives for his hospitality toward us?" The prophet reminded him of the condition upon which they had undertaken the journey, and silently they continued on their way. Toward evening they came to the house of a rich man who did not even look at them, so that they had to pass the night without food and drink. In the morning when they left the inhospitable house, Joshua heard Elijah pray that God would build up a wall which had fallen in one of the rich man's houses. At once the wall stood erect. This increased the agitation of the rabbi still more; but remembering the condition which had been imposed upon him, he kept silent. On the next evening they came to a synagogue adorned with silver and gold, none of whose rich members showed any concern for the poor travelers, but dismissed them with bread and water. Upon leaving the place Joshua heard Elijah pray that God would make them all leaders ("heads"). Joshua was about to break his promise, but forced himself to go on in silence again. In the next city they met very generous people who vied with one another in performing acts of kindness toward the strangers. Great, then, was the surprise of Joshua when, upon leaving the place, he heard the prophet pray that God might give them only "one head."

Joshua could not refrain any longer, and asked Elijah to explain to him his strange actions, although he knew that by asking he would forfeit the prophet's companionship. Elijah answered: "The poor but generous man lost his cow because of my prayer, for I knew that his wife was about to die, and I asked God to take the life of the cow instead of that of the wife. My prayer for the heartless rich man was because under the fallen wall was a great treasure which would have come into the hands of this unworthy man had he undertaken to rebuild it. It was also no blessing which I pronounced upon the unfriendly synagogue, for a 'place which has many heads will not be of long duration'; on the other hand, I wished for the others, the good people, 'one head,' that union and peace may always be among them." This is a widely circulated legend, first found in Nissim ben Jacob's "Ḥibbur Yafeh," 1886, pp. 9-12, and reprinted in Jellinek's "Bet ha-Midrash," v. 133-135 (vi. 131-133 gives another version). For Judæo-German and other renderings of this legend see Zunz, "G. V." 2d ed., p. 138. The antiquity of the legend may be seen from the fact that Mohammed mentions it in the Koran, sura xviii. 59-82; compare also "R. E. J." viii. 69-73.

Elijah Explains His Actions.

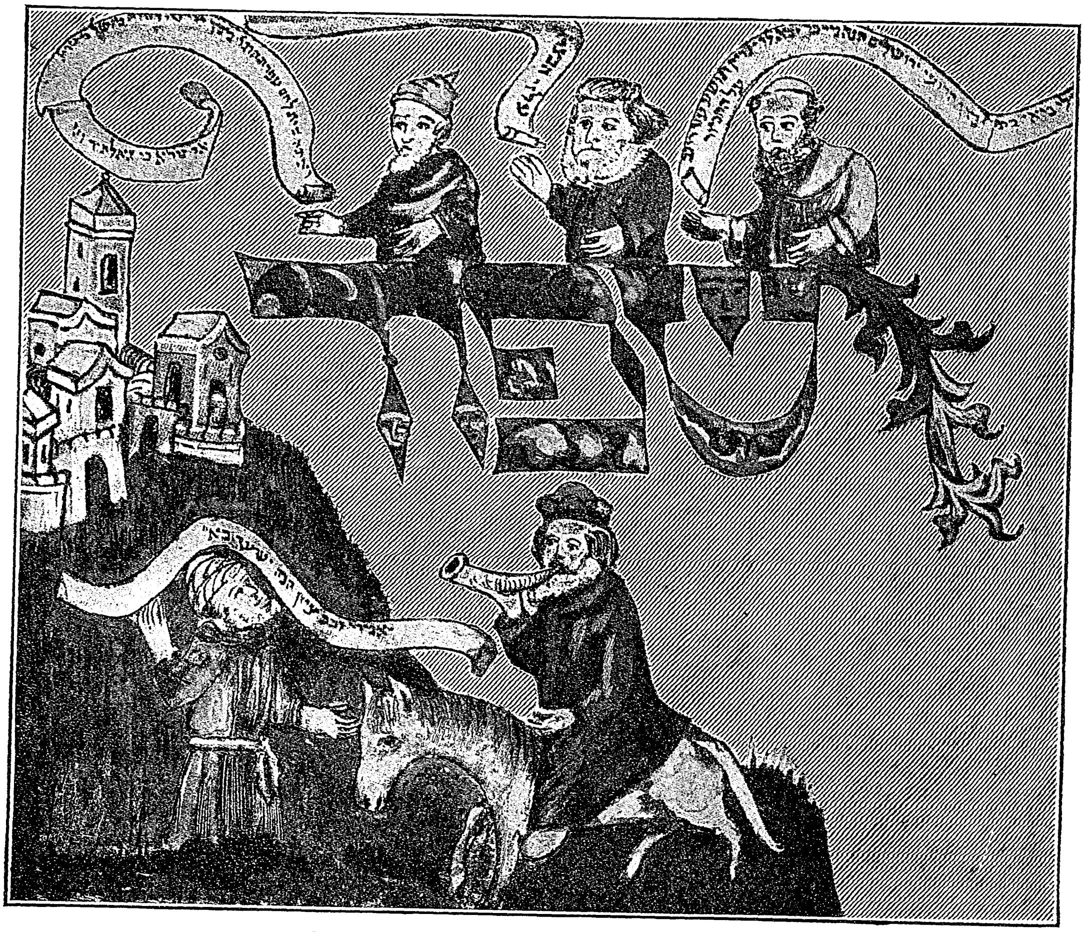


The Prophet Elijah.

(From a printed Passover Haggadah, Prague, 1526.)

Besides Joshua ben Levi, Elijah showed another rabbi, Baroka by name, that things must not be judged from outward appearances. Once they were in a lively street of a great city, when the rabbi asked Elijah whether there were any in the multitude who would have a place in the world to come. The prophet could give an affirmative answer in regard to three men only: a jailer and two jesters — the first, because he saw to it that chastity and morality prevailed among the inmates of the prison; the latter, because they tried by their jests to banish all anxious thoughts from the people (Ta'an. 22a).

The Tannaim and Amoraim are not the only ones who could boast of the special favor of Elijah. The mystics and cabalists of all times frequently appealed to Elijah as their patron. Among them was the gaon Joseph, of whom it was said that Elijah was a daily visitor at his academy (First Epistle of Sherira, ed. Neubauer, p. 32). The introduction of the Cabala to Provence is traced directly to Elijah, who revealed the secret doctrine to Jacob ha-Nozer. Similarly Abraham b. Isaac and Abraham ben David of Posquières are mentioned as privileged ones, to whom Elijah appeared (see Jellinek, "Auswahl Kabbalistischer Mystik," pp. 4, 5). The pseudonymous author of the "Ḳanah" asserted that he had received his teachings directly from Elijah. In the Zohar, Simon ben Yoḥai and his son Eleazar are mentioned as among those who enjoyed the special friendship of Elijah. This work, as well as the Tiḳḳun Zohar and the Zohar Ḥadash, contains much that is ascribed to Elijah (compare Friedmann, "Seder Eliyahu Rabba we-Seder Eliyahu Zuṭa," pp. 38-41). When, toward the middle of the fourteenth century, the Cabala received new prominence in Palestine, Elijah again took a leading part. Joseph de la Regna asks Elijah's advice in his combat with Satan. The father of the new cabalistic school, Isaac Luria, was visited by Elijah before his son was born. In like manner, the father of Israel Ba'al Shem-Ṭob received the good news from Elijah that a son would be born unto him, "who would be a light in Israel" ("Ma'asiyyot Peliot," pp. 24, 25, Cracow, 1896, which contains an interesting narrative of Elijah's meeting with the father of Ba'al Shem-Ṭob).



ELIJAH ANNOUNCING THE COMING OF THE MESSIAH.
(From an illuminated Maḥzor in the town hall of Frankfort-on-the-Main.)

Elijah as the Forerunner of the Messiah.

The climax of Elijah's activity is his appearance shortly before the Messianic time. "He is appointed to lead aright the coming ages, to restore the tribes of Jacob," says Ben Sira of him (Ecclus. [Sirach] xlviii. 10, 11). In the second half of the first Christian century it was expected that Elijah would appear shortly before the coming of the Messiah, to restore to families the purity which in the course of time had become doubtful ('Eduy. viii. 7; this is the opinion of Johanan b. Zakkai). A century later the notion prevailed that Elijah's office was "to bring peace and adjust all differences" (*ib.*). It was expected that all controversies and legal disputes which had accumulated in the course of time would be adjusted by him, and that difficult ritual questions and passages of Scripture seemingly conflicting with each other would be explained, so that no difference of opinion would exist concerning anything (Men. 45b; Ab. R. N. xxxiv.; Num. R. iii., near the end; compare also Jew. Encyc. i. 637a). The office of interpreter of the Law he will retain forever, and in the world to come his relation to Moses will be the same as Aaron's once was (Zohar, Ẓaw, iii. 27, bottom). But the notion which prevailed at the time of the origin of Christianity, that Elijah's mission as forerunner of the Messiah consisted mainly in changing the mind of the people and leading them to repentance, is not unknown to rabbinical literature (Pirḳe R. El. xliii., xlvii.). His real Messianic activity—in some passages he is even called "go'el" (="redeemer"; compare Friedmann, *l.c.* pp. 25, 26)—will commence three days before the coming of the Messiah. On the first day he will lament over the devastation of Palestine, but will close with the words: "Peace will now come over the earth"; on the second and third days he will speak words of comfort (Pesiḳ. R. xxxv. 161; Elijah as the "good messenger of salvation" is a frequent figure in the apocalyptic midrashim). When the archangel Michael blows the trumpet, Elijah will appear with the Messiah, whom he will present to the Jews ("Otot ha-Mashiaḥ," in Jellinek, "B. H." ii. 62, 125; see Eschatology). They will ask of Elijah, as an attestation of his mission, that he raise the dead before their eyes and revive such of the dead as they personally knew (Shir ha-Shirim Zuṭa, ed. Buber, 38, end; compare also Syriac Apocalypse of Baruch; Bousset, "The Antichrist Legend," p. 203).

The Seven Miracles.

But he will do more than this, in that he will perform seven miracles before the eyes of the people: (1) He will bring before them Moses and the generation of the wilderness; (2) he will cause Korah and his company to rise out of the earth; (3) he will revive the Messiah, the son of Joseph; (4) he will show them again the three mysteriously lost sacred utensils of the Temple, namely, the Ark, the vessel of manna, and the vessel of sacred oil (see Antichrist); (5) he will show the scepter which he received from God; (6) he will crush mountains like straw; (7) he will reveal the great mystery (Jellinek, *l.c.* iii. 72). At the bidding of the Messiah, Elijah will sound the trumpet, and at the first blast the primitive light will appear; at the second, the dead will rise; and at the third, the Divine Majesty will appear (Jellinek, *l.c.* v. 128). During the Messianic reign Elijah will be one of the eight princes (Micah v. 4), and even on the Last Day he will not give up his activity. He will implore God's mercy for the wicked who are in hell, while their innocent children who died in infancy on account of the sins of their fathers, are in paradise. Thus he will complete his mission, in that God, moved by his prayer, will bring the sinful fathers to their children in paradise (Eccl. R. iv. 1). He will bring to an end his glorious career by killing Samael at the behest of God, and thus destroy all evil (Yalḳuṭ Ḥadash, ed. Radawil, 58a). Compare Elijah's Chair.

S. S. L. G.

—**In Mohammedan Literature:** Elijah is mentioned in the Koran as a prophet together with Zechariah, John, and Jesus (sura vi. 85); while in sura xxxvii. 123-130 it is said: "Verily, Elijah [Ilyas] was of the prophets, when he said to his people, 'Will ye call upon Baal and leave the best of creators, God, your Lord?'" In verse 130 he is called "Ilyasin": "Peace upon Ilyasin, thus do we reward those who do well."

According to Baiḍawi, the people to whom Elijah was sent were the inhabitants of Baalbek in Cœle-Syria. When Elijah made his appearance as a prophet the king (Ibn al-Athir says that the king's name was Ahab, but places him after Ezekiel) believed in him, though the people did not. The king made Elijah his vizier, and both worshiped God. But the king soon apostatized, and Elijah separated from him. The prophet then afflicted the country with famine, and no one save himself had bread to eat; so that if one noticed the odor of bread he said: "Elijah must have passed this way."

One day Elijah came into the house of an old woman who had a paralytic child named Elisha ibn Ukhṭub. Elijah cured the child, who remained with the prophet, and, after Elijah's translation, became his successor.

The Jewish tradition that Elijah is identical with Phinehas is current among the Moslems also. They have, moreover, another tradition borrowed from the Jews. Elijah, they say, will appear on the last day, and either he or one of his descendants will await, in the interior of a mountain, the second coming of the Messiah.

Certain Islamic authorities confound Elijah with Al-Khiḍr (= "the green" or "fresh one"), famous in Mohammedan literature on account of his having discovered the fountain of perpetual youth. Even their names have been combined in "Khiḍr-Ilyas" or "Khiḍralas." Other authorities, among them the author of the "Ta'rikh Muntaḥab," distinguish Elijah from Al-Khiḍr, whom they identify with Elisha. They believe that, while the latter is the guardian of the sea, Elijah is the guardian of the desert (the idea originating, doubtless, in the fact that Elijah hid himself in the desert; I Kings xix. 4).

Elijah's translation is thus described by the Moslems: God had told Elijah in a vision to go out of the town and to mount anything which he might see before him. He departed with his disciple Elisha, and, seeing a horse, mounted it. God covered him with feathers, enveloped him with fire, took away from him the desire of eating and drinking, and joined him to His angels. According to Ibn al-Athir, God made Elijah of a twofold nature: man and angel, earthly and heavenly.

E. G. H. M. Sel.

—**In Medieval Folk-Lore:** Owing to his ubiquitousness and to the universal belief that he remained after his departure from the earth the ever-ready helper of the Jew, Elijah the prophet became the prototype of the Wandering Jew. Many characteristics of wandering deities and heroes like those of Buddha, of Zeus, and of Thor and Wodan who were believed to wander about the earth to test the piety and hospitality of the people, hence also those of Khiḍr, the Arabic legendary hero, were incorporated in the history of Elijah. He was accordingly expected to appear from time to time, especially on solemn occasions, as "the angel of the covenant," the genius of Jewish home sanctity who keeps a record of every mésalliance (Ḳid. 70a). He was believed to be present as the angel of the covenant at the circumcision (see Elijah's Chair), or to appear as a guest at the Seder and as protector of the Jewish household whenever the door was opened on that night. Every Saturday evening his blessed intervention was invoked for the work of the new week; hence the many mystic formulas in the cabalistic liturgy for the close of the Sabbath.

He was often identified with other heroes of Jewish legend to whom immortality was attributed, such as Melchizedek, who had no father or mother, and Enoch-Meṭaṭron, who is said to have been a shoemaker by profession (Yalḳ. Reubeni, Bereshit, 27a and 9d), and this seems to explain the original story of the Wandering Jew.

Sources.

——**Critical View:** The stories of Elijah are not all derived from the same author. This is evident, first, from the fact that the longer form of the name (אליהו) is used (about sixty times) everywhere except in II Kings i. 3-12 and (in reference to other persons of the name) in I Chron. viii. 27; Ezra x. 21, 26. Then, too, there is a significant disagreement between I Kings xix. 15 *et seq.*, where Elijah is commissioned to anoint Kings Hazael and Jehu, and II Kings viii. 7 *et seq.*, ix. 1 *et seq.*, where it is said that these two kings were appointed by Elisha. Neither of these stories, however, bears marks of exilic or post-exilic origin, for the compound prepositions עד ל׳ (I Kings xviii. 19) or מלפני (xxi. 29) are not a proof of such origin, although the latter preposition is often used by preference in the post-exilic period. It is also obvious that the mention of the sacrifice (I Kings xviii. 36) does not stamp the story as post-exilic (contrary to G. Rösch, "Der Prophet Elia," in "Theologische Studien und Kritiken," 1892, pp. 557 *et seq.*; comp. Ed. König, "Einleitung ins Alte Testament," p. 264).

Many scholars, nevertheless, consider the stories legendary; and, although something extraordinary must have happened at Mt. Carmel, it can not be denied that the miraculous incidents of the prophet's career may have been magnified as they passed on from generation to generation. The account of the destruction of the two captains and their soldiers may be taken as an example of this; and, indeed, the fact that the shorter form of the prophet's name is used proves the account to be undoubtedly of later origin.

Some modern scholars regard the stories as mythological—Hugo Winckler, for instance, in his "Geschichte Israels" (1900, ii. 273).

Three other persons by the name of Elijah are mentioned in the Old Testament: a Benjamite who lived before the time of Saul (I Chron. viii. 27), and two persons of the post-exilic period (Ezra x. 21, 26).

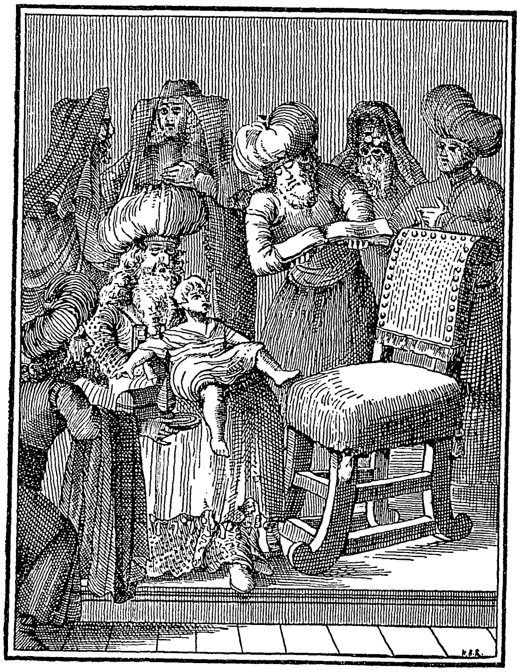
ELIJAH, APOCALYPSE OF. See Apocalyptic Literature.

ELIJAH'S CHAIR: At every circumcision Elijah, "the angel of the covenant," as he is called in Malachi (iii. 1), is supposed to be seated at the right hand of the sandek, upon a chair richly carved and ornamented with embroideries ("kisse shel Eliyahu"). Even in the salutation to the child to be circumcised (ברוך הבא) is read the invitation to Elijah (הנה בא אליהו = הבא).

When, under the influence of Jezebel, circumcision in the northern kingdom was about to be abolished, Elijah is said to have retired to a cave. There he prayed to God (I Kings xix. 10), and complained that Israel had forsaken the covenant of the Lord; whereupon God ordained that no circumcision should take place except in the presence of Elijah. Some consider this to be a commendation of Elijah for his zeal; others, again, take it to be a measure of protection for Israel, in that Elijah is in every instance to be satisfied that the covenant is not being broken. Accordingly, the Shulḥan 'Aruk, Milah, 265, 11 (comp. Kol Bo, 73), orders that a distinct seat upon the bench, or a separate chair, be reserved for Elijah. To this the circumciser (mohel) refers in the prayer preceding the circumcision, as well as in the piyyuṭ for the Sabbath on which a circumcision occurs. When the chair of Elijah is made ready, the words "This is the chair of Elijah" (זהו כסא אליהו) must be said in a loud voice. Before the circumcision takes place the child is placed upon the chair. The chair is left in position for three days, not, as said by some, to give Elijah, the wanderer, time for rest, but because the first three days after circumcision are a period of danger for the child.

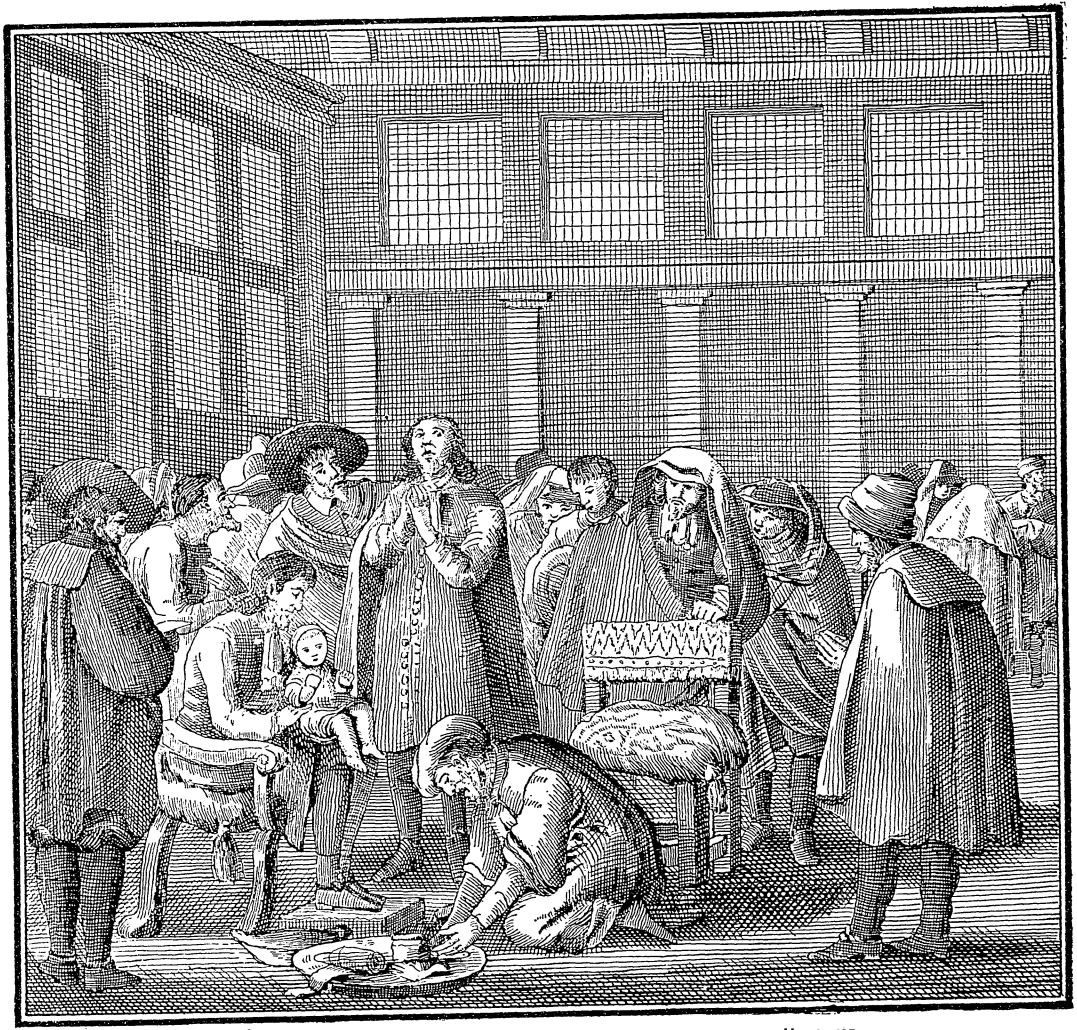


Elijah's Chair.

(After Leusden, "Philologus Hebræo Mixtus," 1657.)

Elijah being the guardian of the little ones, is represented as such in the amulet for the lying-in chamber, and, indeed, it is in this capacity that he is invited to the circumcision.

In Regensburg R. Judah the Pious was once entrusted with the office of sandek. The child was brought in and greeted by all with the customary formula, but Judah remained silent. Being questioned, he said: "I do not see Elijah seated at my side." As he said this a venerable old man appeared at the window, and to him he referred the questioners. To them the old man declared that Elijah refused to come because the child would one day abandon the faith of his forefathers. The prophecy was fulfilled.



Elijah's Chair, as used in the Ceremony of Circumcision in Holland.

(After Leo de Modena's "Riti," Amsterdam, 1725.)

Lipman of Mühlhausen, in his "Niẓẓaḥon," deals with the objection that Elijah could not possibly be present at different circumcisions at the same time. As the sunlight and the Angel of Death are omnipresent, so can Elijah be. The precept that the formula "Zeh ha-kisse' shel Eliyahu zakur le-ṭob" or "zeh ha-kisse' shel Eliyahu ha-nabi' zakur le-ṭob" must be cried aloud (Meïr ben Gabbai, "Tola'at Ya'aḳob") is also found in the Zohar (Lek Leka; comp. Wayiggash, and Terumah, 169a).

In some of the representations of the circumcision ceremony (as in Kirchner and Leusden) Elijah's chair is incorrectly placed at the left of the sandek; in others (as in Buxtorf's "Synagoga," the Amsterdam Pesaḥ Haggadah, etc.), it is not pictured at all. See Godfather.

ELIJAH BEN ABRAHAM: Karaite scholar of the twelfth century. He was the author of a work entitled "Ḥaluḳḳot ha-Ḳara'im weha-Rabbanim," on the controversy between Karaites and Rabbinites (published by Pinsker in his "Liḳḳuṭe Ḳadmoniyyot," Supplement, pp. 99-106). Elijah was the only Karaite who quoted a work of Saadia's—the "Kitab al-Rudd 'ala 'Anan," according to Pinsker (*ib.* p. 19). That Elijah lived not later than the twelfth century is shown by the fact that the last Karaite scholar quoted by him was Japheth ben ha-Maskil, a contemporary of Judah Ḥadassi. Pinsker identifies Elijah ben Abraham with Elijah b. Judah Tishbi, supposing that he was only the copyist, not the author, of the "Ḥaluḳḳot."

Bibliography: Pinsker, *Liḳḳuṭe Ḳadmoniyyot*, pp. 19, 225; Steinschneider, *Jewish Literature*, p. 312, note 21; idem, *Hebr. Bibl.* v. 52–53; Gottlober, *Biḳḳoret le-Toledot ha-Ḳara'im*, p. 157.

ELIJAH ALAMANNUS: Spanish physician and diplomat of the fifteenth century, and court physician of the Duke of Bourbon (probably Louis II. of France). Alfonso V., King of Aragon, confided to him a mission to Pope Martin V. He went to Rome in charge of a letter to the pope (Sept. 8, 1420), under safe-conduct for a year. A few years later "Magister Elijah," while at Avignon, had a bull, issued in favor of the Spanish Jews, legalized by the notary of the Curia.

ELIJAH BA'AL SHEM OF CHELM: Polish rabbi; born in 1550; died at Chelm. About 1565 he entered the yeshibah of Rabbi Solomon Luria of Lublin, and, after receiving the rabbinical ordination, became rabbi of Chelm, which position he held until his death. Elijah Ba'al Shem was one of the most eminent Talmudists of his generation. Together with his teacher he signed the "pisḳe dinim" (laws) relative to the 'Agunah. He also studied Cabala, and, according to his grandson Ẓebi Ashkenazi, he was able to create a golem by means of Cabalistic agencies.

ELIJAH BE'ER (FONTE) B. SHABBETHAI (Elijah di Sabbato; also known as **Elihe Saby** and **Elia Giudeo):** Italian physician; born in Germany at the end of the fourteenth century. He settled in Italy, where the Senate accorded him citizen's rights in Viterbo, and, in 1405, in Rome; confirmed by Pope Innocent VII. Feb. 6, 1406. He was exempted from toll, from forced service, and from wearing the Jewish garb, and was allowed to carry arms. Pope Martin V. made him his private physician, which position he retained under Martin's successor, Eugene IV., who (1433) confirmed his citizenship and pension. Elijah was among those who signed (Dec., 1443) an agreement between the pope and the Italian Jews concerning their religious freedom.

ELIJAH BEN BENJAMIN HA-LEVI: Turkish rabbi; flourished in Constantinople in the sixteenth century. He succeeded one of his teachers, Elijah Mizraḥi, as rabbi in Constantinople (1526). Elijah made the first collection of prayers for the Maḥzor Romania (editio princeps, Constantinople, 1510), to which he added many poems of his own. He wrote: "Tanna debe Eliyahu," containing 451 responsa, of which only a part have been published, under the title "Zeḳan Aharon" (Constantinople, 1734); "Ma'amar Kol Dai," an asmakta, published in Benjamin Motal's "Tummat Yesharim" (Venice, 1622); "Liwyat Ḥen," "Me Zahab," "Shebeṭ Musar," "Tokaḥat Megullah," still unpublished; and a collection of poems. Berliner ascribes to him a commentary which accompanies various piyyuṭim in the Maḥzor Romania.

ELIJAH OF FERRARA: Italian Talmudist and traveler of the earlier part of the fifteenth century. He was engaged in 1437 as lecturer and teacher in Jerusalem, where he arrived after a stormy voyage, during which he lost his son and grandson. He wrote several letters to his wife and children, whom he had left behind in Ferrara; only one of these epistles, dated 1438, has been preserved. This "Iggeret," written in rimed prose, has been published in the collection "Dibre Ḥakamim," Metz, 1853, and translated by Carmoly ("Itinéraires," pp. 331–337) under the title "Ahabat Ẓiyyon." In this he gives a description of Jerusalem, recounts the legends current about the "children of Israel," the Ten Tribes, and the River Sambation, and states his intention to visit other parts of Palestine and to send a description of what he sees there. A fragment of another letter has survived, published by Isaac Akrish in his "Ḳol Mebasser" (Constantinople, 1577). From remarks contained in the latter in reference to medical practise in Jerusalem it may be inferred that Elijah was also a physician.

Bibliography: Steinschneider, *Cat. Bodl.* col. 929; Luncz, *Jerusalem*, iii. 48; Munk, *Palestine*, p. 643; Carmoly, *Itinéraires*, pp. 329–337; Grätz, *Gesch.* 2d ed., viii. 277.

ELIJAH BEN ISAAC OF CARCASSONNE: French Talmudist; flourished in the first half of the thirteenth century; progenitor of the De Latas, or Lattes, family. He took the name of the city in which he was living, his son Jacob afterward adopting the name of "Lattes." Isaac b. Jacob Lattes, the author of "Sha'are Ẓiyyon," speaks of these two ancestors of his, and ascribes to one of them, in a somewhat obscure reference, the authorship of several works. Michael and Zunz think that Isaac intended to designate Elijah as the author, while Gross says that he meant Jacob.

ELIJAH MAGISTRATUS. See Genazzano, Elijah Ḥayyim.

ELIJAH BEN MENAHEM HA-ZAḲEN: French liturgical poet; flourished at Le Mans in the eleventh century. According to Solomon Luria (Responsa, No. 29), he was the son-in-law of Sherira Gaon. Fürst doubts that Elijah was of Le Mans, taking the name מנש to be the popular name of his father, Menahem. Elijah was the pupil of Rabbenu Gershon, and companion of Joseph Ṭob-'Elem (Bonfils), with whom he discussed the recitation of the "Ḳerobah" between the first three of the eighteen benedictions ("Shibbole ha-Loḳeṭ," No. 11). He wrote: (1) "Azharot," a poem on the 613 commandments, containing 176 four-line strophes. This poem may be divided into several smaller poems, giving together with the acrostic "Eliyahu Ḥazaḳ," in one instance an acrostic of אב"גד, in another one of תש"רק. These "azharot" were known to the Tosafists and are quoted in several places (Suk. 49a; Yoma 8a; B. B. 145b; Mak. 3b; Niddah 30a). (2) "Seder ha-Ma'arakah," Biblical passages arranged for recitation on each day of the week in the same manner as the "Ma'amadot" (MSS. Offenbach, No. 38). Jellinek ("Orient, Lit." xii. 546) identifies the author of the "Azharot" with the cabalist Elijah ha-Zaḳen, who is frequently quoted by Moses Botarel in his commentary to the "Sefer Yeẓirah."

ELIJAH MIZRAḤI. See Mizraḥi, Elijah.

ELIJAH BEN MORDECAI: Payyeṭan of the eleventh century, possibly a native of Italy. Of his poetic productions a "ḳerobah" for the Minḥah of the Day of Atonement (איתן הכיר אמונתך) is extant in the German-Polish liturgy. Eliezer ben Nathan wrote a commentary on Elijah's piyyuṭim.

Bibliography: Zunz, *Literaturgesch.* p. 142; Landshuth, *'Ammude ha-'Abodah*, p. 15; Michael, *Or ha-Ḥayyim*, p. 182.

G. H. B.

ELIJAH BEN MOSES GERSHON: Eighteenth-century Polish physician, mathematician, and Talmudist; lived at Pinczow, government of Kielce, Russian Poland. He wrote: "Meleket Maḥshebet," in two parts: the first called "'Ir Ḥeshbon," on arithmetic and algebra; the second, "Berure Middot," on geometry (Zolkiev, 1758; Frankfort-on-the-Oder, part i., and Berlin, part ii., 1765; Ostrog, 1806); "Ma'aneh Eliyahu," novellæ on Baba Meẓi'a and Beẓah, decisions, and responsa (Zolkiev, 1758); "Hadrat Eliyahu," ten homilies on Talmudic subjects (Prague, 1786); "Nibḥar me-Ḥaruẓ," a compendium of Joseph Albo's "'Iḳḳarim," in the form of dialogues. He edited "She'elot u-Teshubot Geone Batra'e," a collection of responsa of R. Yom-Ṭob Lippmann Heller, Joel Sirkes, Joshua Falk, and others (Sudilkov, 1795).

ELIJAH BEN MOSES ISRAEL: Palestinian rabbi; born at Jerusalem; died at Alexandria Jan. 7, 1786. In 1763 he became rabbi of Rhodes, and was later offered the chief rabbinate of Alexandria. Though a prolific writer, few of his works have been published. Among these are: "Ḳol Eliyahu," responsa, arranged in the order of the four Ṭurim, and containing some responsa of his brother Abraham Israel and of his son Moses Israel (Leghorn, 1792); "Kisse Eliyahu," glosses and novellæ on the Shulḥan 'Aruk, Oraḥ Ḥayyim, fragments of which appear at the end of Azulai's "Wa'ad la-Ḥakamim"; "'Uggat Eliyahu," responsa (Leghorn, 1830); "Shene Eliyahu," twenty-five homilies (*ib.* 1806); "Ar'a de-Yisrael," on the methodology of the Talmud, printed, together with "Debar ha-Melek," a commentary on Maimonides, at the end of the "Sha'ar Asher" of Asher Covo (Vienna, 1821). Besides these Elijah left in manuscript eight other works on Talmudic-rabbinic literature.

Bibliography: Michael, *Or ha-Ḥayyim*, pp. 185-186; Ḥazan, *Ha-Ma'alot li-Shelomoh*, p. 4b.

L. G. M. Sel.

ELIJAH B. MOSES DE VIDAS: Cabalist at Safed in the sixteenth century; pupil of R. Moses Cordovero. He went to Poland, but returned to Palestine, and died at Hebron. He is the author of "Reshit Ḥokmah," a book on morals divided into five parts ("she'arim"): fear of God; love for God; repentance; holiness; humbleness (Venice, 1578, 1593; Cracow, 1593; Berlin, 1703, etc.). In this book are gathered all the moral sentences scattered through the Talmud, Midrashim, and Zohar; to these he added five chapters of the "Menorat ha-Ma'or" of Israel ben Joseph Alnaqua; "Ḥuppat Eliyahu Rabbah," and "Seder Eliyahu Rabbah," moral sayings and admonitions; "Or 'Olam," the first chapter containing all the moral sayings of the Talmud beginning with the word "le'olam," the second those beginning with "gadol" or "gedolah." He later abridged the "Reshit Ḥokmah" under the title of "Toẓe'ot Ḥayyim" (Prague, Cracow [n. d.]; Amsterdam, 1650). Another abridgment was made by Jacob b. Mordecai Pavicti ("Ḳiẓẓur Reshit Ḥokmah," Venice, 1600). David de Lara translated into Spanish the "Sha'ar ha-Yir'ah," treating of the fear of God (Amsterdam, 1633).

Bibliography: Fürst, *Bibl. Jud.* iii. 477; Steinschneider, *Cat. Bodl.* col. 950; Fuenn, *Keneset Yisrael*, p. 106; Azulai, *Shem ha-Gedolim*, p. 11; Zedner, *Cat. Hebr. Books Brit. Mus.* pp. 230, 231; Michael, *Or ha-Ḥayyim*, p. 184.

G. M. Sel.

ELIJAH OF PESARO: Italian Talmudist and philosopher of the sixteenth century. After a long residence in Venice as Talmudic teacher, he started for Palestine (1563). Arrived at Famagusta, in Cyprus, he heard that the cholera was devastating the Holy Land and decided to go no farther. He wrote a number of works which are preserved in the Bibliothèque Nationale at Paris (MS. No. 24). They comprise a commentary on Job, an allegorical explanation of the Song of Songs, a philosophical treatise on the Talmud and Midrashim, a funeral oration on the death of R. Mordecai Kunavoti, a fragment of his commentary on Jonah, a number of sermons, and a letter written from Famagusta to his relatives at Venice in which he described his journey to the former place. It has been translated into German by Jost ("Jahrbuch für die Geschichte der Juden," 1861) and into French by Moïse Schwab ("Revue de Géographie," 1877).

Bibliography: S. J. Fuenn, *Keneset Yisrael*, p. 118; Carmoly, in *Revue Orientale*, i. 92; Steinschneider, *Jewish Literature*, p. 257; *Orient, Lit.* ii. 444.

L. G. M. Sel.

ELIJAH RABBENU (BEN JUDAH TISHBI): Karaite scholar; died about 1584. He wrote in 1579 at Constantinople a work called "Pe'er" (="Perush Eliyahu Rabbenu"), a supercommentary on the first part of Aaron ben Joseph's Biblical commentary "Ha-Mibḥar." Moses of Zurudi, Elijah's son-in-law, revised this work in 1585. One copy is found in Leyden (No. 54) and another in Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2352).

Bibliography: Pinsker, *Liḳḳuṭe Ḳadmoniyyot*, p. 199; Gottlober, *Biḳḳoret le-Toledot ha-Ḳara'im*, p. 156; Steinschneider, *Jewish Literature*, p. 121; idem, *Hebr. Bibl.* xi. 9.

K. M. Sel.

ELIJAH B. SAMUEL OF LUBLIN: Polish rabbi; died at Hebron, Palestine, 1735. He became rabbi of Byala, and later, after residing for some time at Brest-Litovsk, of Eibenschütz, Moravia. In old age he removed to Hebron. Elijah was the author of "Yad Eliyahu," responsa, Amsterdam, 1712.

Bibliography: Michael, *Or ha-Ḥayyim*, p. 196; Azulai, *Shem ha-Gedolim*, i. 22, ii. 59, 127; Levenstein, *Dor Dor we-Dorshaw*, p. 17; E. L. Rabbinowicz, *'Ir Tehillah*, pp. 32, 186.

L. G. N. T. L.

ELIJAH BEN SAMUEL BEN PARNES OF STEPHANOW: Bulgarian exegete and poet: lived in the second half of the fifteenth century, probably first at Widdin, and later at Constantinople. He maintained a correspondence on scientific subjects with Moses Capsali, Elijah Mizraḥi, and other Talmudical authorities. Joseph Colon mentions him as having lived at Constantinople (Responsa, No. 83). Elijah wrote in 1469 a grammatical and allegorical commentary on the Pentateuch, entitled "Sefer ha-Zikkaron" (Book of Memory) (Neubauer, "Cat. Bodl. Hebr. MSS." No. 251). The commentary is followed by poetical pieces composed by the author, twelve of which are liturgical poems.

Bibliography: Zunz, *Literaturgesch.* p. 387; Michael, *Or ha-Ḥayyim*, No. 411.

G. I. Br.

ELIJAH BEN SHEMAIAH: Italian rabbi and liturgical poet; lived at Bari in the twelfth century. He was one of the teachers of Samuel b. Naṭronai; and his signature, with those of many other rabbis, is appended to a responsum found in Samuel's novellæ on Maimonides ("Yad," Ishut, xxiii. 14). Elijah b. Shemaiah is especially known as a composer of hymns. Besides a "reshut" to Johanan's "Ḳerobot" for Yom Kippur, Elijah composed a great number of seliḥot. Zunz ("Literaturgesch." pp. 244–246) enumerates no less than thirty-six, arranged either in the alphabetical or in the reversed alphabetical order, and giving the acrostic of his name.

Bibliography: Zunz, *Literaturgesch.* pp. 139, 244–246; idem, *G. V.* p. 393; idem, *S. P.* p. 206; Michael, *Or ha-Ḥayyim*, No. 412; Landshuth, *'Ammude ha-'Abodah*, p. 17.

K. M. Sel.

ELIJAH BEN SOLOMON (also called **Elijah Wilna, Elijah Gaon,** and **Der Wilner Gaon**): Lithuanian Talmudist, cabalist, grammarian, and mathematician; born at Wilna April 23, 1720; died there Oct. 9, 1797. He gave evidence of the possession of extraordinary talents while still a child. At the age of seven he was taught Talmud by Moses Margalit, rabbi of Kaidan and the author of a commentary to the Jerusalem Talmud, and was supposed to know several of the treatises by heart. From the age of ten he continued his studies without the aid of a teacher. When he reached a more mature age Elijah wandered in various parts of Poland and Germany, as was the custom of the Talmudists of the time. He returned to his native town in 1748, having even then acquired considerable renown; for when he was hardly twenty years old many rabbis submitted their halakic difficulties to him for decision. Since Elijah had never studied at any yeshibah, he had this advantage, that his mind was never biased by prejudice or by the perverted methods of study then in vogue. He thus escaped casuistry, his mind remaining open to the plain and simple peshaṭ.

His Methods of Study.

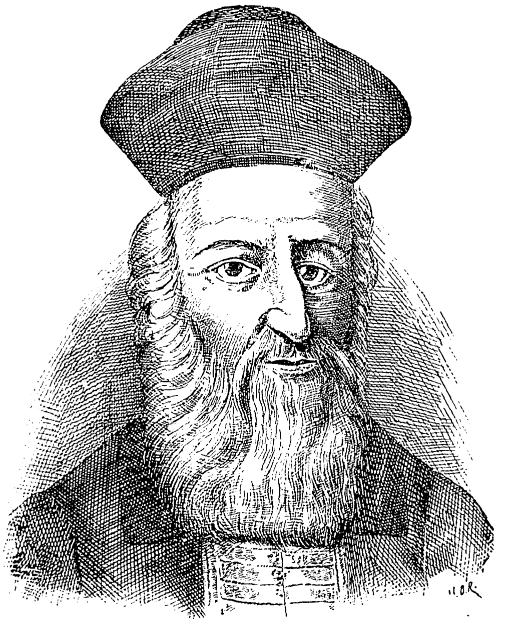
Elijah's chief merit consisted in this fact, that he applied to the Talmud and the cognate literature proper philological methods. He even made an attempt toward a critical examination of the text; and thus, very often with a single reference to a parallel passage, or with a textual emendation, he overthrew all the castles in the air erected by his predecessors. But, besides the two Talmuds and the other branches of rabbinic literature which he had very soon committed to memory, he devoted much time to the study of the Bible and Hebrew grammar, as well as to the secular sciences, enriching the latter by his original contributions. His pupils and friends had to pursue the same plain and simple methods of study that he followed. He also exhorted them not to neglect the secular sciences, maintaining that Judaism could only gain by studying them. Elijah was also attracted to the study of the Cabala; but from his controversy with the Ḥasidim it would seem that he was not prepared to follow the mystics to the full extent of their teachings.

Elijah was very modest and disinterested; and he declined to accept the office of rabbi, though it was often offered to him on the most flattering terms. In his later years he also refused to give approbations, though this was the privilege of great rabbis; he thought too humbly of himself to assume such authority. He led a retired life, only lecturing from time to time to a few chosen pupils. But in spite of his desire to avoid publicity his fame was soon widely spread, and in 1755, when Elijah was only thirty-five, Jonathan Eybeschütz, then sixty-five years old, applied to Elijah for an examination of and decision concerning his amulets, which were a subject of discord between himself and Jacob Emden. Elijah, in a letter to Eybeschütz, stated that, while in full sympathy with him, he did not believe that words coming from a stranger like himself, who had not even the advantage of old age, would be of any weight with the contending parties.

The only occasion upon which Elijah threw off his reserve and made his authority felt was the appearance of the Ḥasidim on the stage of Jewish history. When the latter became more audacious, and even began to make proselytes in his native town, which had always remained proof against all kinds of innovation, Elijah, joining the rabbis and heads of

His Antagonism to the Ḥasidim.

the Polish communities, took the necessary steps to check the Ḥasidic influence. In 1777 the first excommunication was launched at Wilna against the Ḥasidim, while a letter was also addressed to all the large communities, exhorting them to deal with the Ḥasidim after the example of Wilna, and to watch them until they had recanted. The letter was acted upon by several communities; and in Brody, during the fair, the excommunication was pronounced against the Ḥasidim. In 1781, when the Ḥasidim renewed their proselytizing work under the leadership of their rabbi, Shneor Salman of Liadi, Elijah excommunicated them again, declaring them to be heretics with whom no pious Jew might intermarry. Elijah also accused Shneor Salman and his adherents of having accepted a pantheistic system. After this, Elijah went into retirement again, and the Ḥasidim seized the opportunity to spread a rumor that Elijah sided with them and that he repented of having persecuted them. Elijah then sent two of his pupils (1796) with letters to all the communities of Poland, declaring that he had not changed his attitude in the matter, and that the assertions of the Ḥasidim were pure inventions. Still, Elijah had seen beforehand that all the excommunications would be of no avail, and that they would not stop the tide of Ḥasidism.



Elijah ben Solomon of Wilna.
(From a traditional portrait.)

Except in this instance, Elijah never took part in public affairs; and, so far as is known, he did not preside over any great school in Wilna. He was satisfied, as has been already stated, with lecturing in his bet ha-midrash to a few chosen pupils, whom he initiated into his scientific methods. He taught them Hebrew grammar, Bible, and Mishnah—subjects which were largely neglected by the Talmudists of that time. He was especially anxious to introduce them to the study of the pre-Talmudic literature—the Sifra, Sifre, Mekilta, Tosefta, Seder 'Olam, and the minor treatises—which were very little known by the scholars of his time. He laid special stress on the study of the Jerusalem Talmud, which had been almost entirely neglected for centuries. Being convinced that the study of the Torah is the very life of Judaism, and that this study must be conducted in a scientific and not in a merely scholastic manner, he encouraged his chief pupil, Rabbi Ḥayyim, to found a college in which rabbinic literature should be taught according to his master's method. Ḥayyim did not carry out the injunction of his master until some years after the death of the latter. The college was opened at Volozhin in 1803 (see Ḥayyim b. Solomon and Volozhin).

His Ascetic Life.

Elijah led an ascetic life. He interpreted literally the words of the ancient rabbis, that the Torah can be acquired only by abandoning all pleasures and by cheerfully accepting suffering; and as he lived up to this principle, he was revered by his countrymen as a saint, being called by some of his contemporaries "the Ḥasid." Elijah once started on a trip to the Holy Land, but did not get beyond Germany. While at Königsberg he wrote to his family a letter which was published under the title "'Alim li-Terufah," Minsk, 1836. Various reasons were assigned for his change of mind, the most probable one being the impossibility on board ship of observing strictly the dietary laws. Elijah was a voluminous author; and there is hardly an ancient Hebrew book of any importance to which he did not write a commentary, or at least provide marginal glosses and notes, which were mostly dictated to his pupils; but nothing of his was published in his lifetime. His works may be best classified according to the different branches:

Biblical.

Adderet Eliyahu, a commentary on the Pentateuch, in which he endeavored to give the exact meaning of the verses, showing that there is not a single superfluous letter. Dubrovna, 1804.

Commentary to the Prophets and Hagiographa. The only parts published were Proverbs (Sklow, 1798); the portion of Joshua containing the description of Palestine and that of Ezekiel containing the description of the Temple, under the title of "Ẓurat ha-Areẓ" (*ib.* 1802); Jonah (Wilna, 1800); Isaiah i.-xiii.; Habakkuk and Chronicles (*ib.* 1820); the Song of Songs (Warsaw, 1842); and Job i.-vii. (*ib.* 1854).

Mishnaic.

Shenot Eliyahu, long and short commentaries on Zera'im, revised by his pupil Ḥayyim of Volozhin. Lemberg, 1799.

Eliyahu Rabbah, on Ṭohorot, compiled by his pupil Meïr of Wilna. Brünn, 1802.

Commentary on Abot. Sklow, 1804.

Commentary on Ḳodashim and a mystical commentary on the Biblical passages quoted in the Mishnah, both extant in manuscript.

Efat Ẓedeḳ, glosses to the Mekilta. Wilna, 1844.

Commentary and glosses to the Sifra.

Glosses to the Sifre.

Ṭohorat ha-Ḳodesh (also called "Zer Zohab"), commentary on Tosef., Ṭohorot. Zolkiev, 1804.

Glosses to Tosef., Zera'im, Mo'ed, and Nashim. Wilna, 1837.

Yerushalmi.

Commentary on the order Zera'im.

Mishnat Eliyahu, glosses to the treatise Sheḳalim, printed in the "Taḳlin Ḥadtin" of his pupil Israel of Sklow. Minsk, 1812.

Babli.

Hagahot ha-GeRA (ha-Gaon Rabbenu Eliyahu), being a selection from glosses to the whole Talmud written by Elijah; published in the Vienna edition of the Talmud. 1806.

Glosses to Abot de-Rabbi Natan and to the small treatises; printed with his commentary to Abot. Sklow, 1804.

Novellæ on eight treatises of the Talmud.

Halakic.

Commentary on the four parts of the Shulḥan 'Aruk, namely: Oraḥ Ḥayyim, Sklow, 1803; Yoreh De'ah, Grodno, 1806; Eben ha-'Ezer, Wilna, 1819; Ḥoshen Mishpaṭ, Königsberg, 1856–58.

Collectanea on Maimonides.

Novellæ on Asheri.

Haggadic.

Glosses to Pirḳe Rabbi Eliezer. Warsaw, 1832.

Commentary and glosses to the Seder 'Olam Rabbah and Seder 'Olam Zuṭa. Sklow, 1801.

Glosses to the Pesiḳta.

Cabalistic.

Commentary to the Sefer Yeẓirah. Grodno, 1806.

Commentary to the Sifra di-Ẓeni'uta. Wilna, 1820.

Commentary to the Zohar in eleven volumes, of which only a small part was published. *Ib.* 1810. This commentary is a critical one; he made many corrections in the text and indicated the sources which served the later cabalists.

Commentary on the Tiḳḳune Zohar. 5 vols.

Commentary on the Hekalot. 2 vols.

Commentary on Ra'ya Mehemna. 4 vols.

Commentary on both Idrot.

Commentary on the Midrash ha-Ne'elam.

Commentary on the Zohar Ḥadash.

Hadrat Ḳodesh, cabalistic collectanea.

Cabalistic commentary to the Pesaḥ Haggadah. Grodno, 1806.

Science and Grammar.

Ayil Meshullash, a treatise on trigonometry, geometry, and some principles of astronomy and algebra; containing 400 rules. Wilna, 1834.

Treatise on astronomy.

Treatises on the teḳufot and moladot.

Diḳduḳ Eliyahu, a short Hebrew grammar. *Ib.* 1833.

Ma'aseh Toreh, a collection of notes on different subjects.

S. S.

ELIJAH BEN SOLOMON ABRAHAM HA-KOHEN: Dayyan of Smyrna; almoner and preacher; died 1729. Elijah produced over thirty works, of which the principal, according to Wunderbar ("Orient, Lit." p. 579), are as follows: "Midrash Eliyahu," eleven funeral sermons and a commentary on the Talmudic sayings relative to the Roll of Esther (Constantinople, 1693); "Midrash ha-Izmiri," homilies (*ib.* 1695); "Midrash Talpiyyot," glosses and comments taken from three hundred works and containing 926 (the numerical value of the word "Talpiyyot") paragraphs in alphabetical order: only the first part, from "alef" to "kaf," was published (Amsterdam, 1698); "Me'il Ẓedaḳah," a treatise on charity (*ib.* 1704); "Shebeṭ Musar," on ethics, the best known of his works, divided into fifty-two chapters corresponding to the weeks of the year, and taken for the most part from the "Or Ḳadmon" of Moses Ḥagis, the "Tokaḥot" of the Spanish poets, the "Orḥot Ḥayyim," and the "Roḳeaḥ" of Eleazar of Worms (Constantinople, 1712); "Megalleh Ẓefunot," cabalistic treatises (Porizk, 1785), "She'elot u-Teshubot," responsa (Sudilkov, 1796); "Minḥat Eliyahu," sermons (Salonica, 1824); "Semukim le-'Ad," homiletic treatise on the parashiyyot (*ib.* 1826); "We-Lo 'Od Ella," a treatise on the Talmudic and Midrashic passages beginning with these words (Smyrna, 1853).

Elijah's other works are not yet published. They include: a commentary to the Psalms; "Ezor Eliyahu," a commentary to Abot and to the Pesaḥ Haggadah; "Ṭa'ame ha-Miẓwot," a treatise on the 613 commandments; "Sheloshah Mahadurot," a commentary to the Pentateuch; "Shiṭṭah," on the 'Abodah Zarah; a commentary on the difficult passages in the Ta'anit, a commentary to the Hafṭarot; "Ḥiddushim Nifradim", "Yado ba-Kol," comprising commentaries to the Song of Songs, Ruth, and Esther, each under a different title; mystical glosses to the Song of Songs and Esther; a commentary to Lamentations; commentaries to Pirḳe Rabbi Eliezer, Otiyyot de-Rabbi Aḳiba, Kallah, Semaḥot, Derek Ereẓ Rabbah and Zuṭa, Tanna debe Eliyahu, and Tiḳḳune ha-'Aberot; one treatise and three sermons on repentance; a commentary to various prayers; a commentary to the Haggadah of the Jerusalem Talmud.

Bibliography: Azulai, *Shem ha-Gedolim*, i. 22; Michael, *Or ha-Ḥayyim*, No. 407; Jellinek, *B. H.* i. 16, Preface; Steinschneider, *Cat. Bodl.* col. 932; Fürst, *Bibl. Jud.* i. 238; Friedenstein, *'Ir Gibborim.*

M. Sel.

K.

ELIJAH WILNA. See Elijah b. Solomon.

ELIJAH OF YORK (also known as **Rabbenu Elijah the Saint**): Tosafist; supposed to have been killed in the York massacre of 1190. In Tosef., Yoma, 27a, he is called Elijah of איבריוק, and in Tosef., Zeb. 14b, of אברוויקא, which Gross ("Gallia Judaica," p. 22) identifies with "Everwic" (Latin, "Eboracum"), the medieval name of York. The word "ha-Ḳadosh" (the Saint), which follows his name (Tosef., Zeb. 14b), being generally the designation of a martyr, the supposition is that he was one of those who were killed in 1190. Elijah was a pupil of the tosafist R. Isaac ha-Zaḳen, and, according to Zunz ("Z. G." p. 49), also of R. Samuel b. Solomon, known as Sir Morel of Falaise.

Bibliography: Michael, *Or ha-Ḥayyim*, p. 159; Jacobs, *Jews of Angevin England*, p. 116; Renan-Neubauer, *Les Rabbins Français*, pp. 446, 736.

M. Sel.

J.

ELIM: The second camping-place of the Israelites on the march from Egypt. It had twelve springs and seventy palm-trees (Ex. xv. 27, xvi. 1; Num. xxxiii. 9, 10). It is usually, but by no means with certainty, located in Wadi Gharandal.

Bibliography: Dillmann-Ryssel, Commentary to *Ex. xv. 27*; Gall, *Altisraelitische Cultstätten*, p. 23; Hommel, *Aufsätze und Abhandlungen*, p. 293.

F. Bu.

E. G. H.

ELIMELECH (אלימלך = [my] "God is King"): A man of the tribe of Judah, living in Bethlehem-judah at the time of the Judges (Ruth i. 2). Scarcity of food compelled him to emigrate with his family to Moab, where he died, and where one of his sons married Ruth (*ib.* i. 3, 4). As a relative of Boaz (*ib.* ii. 1, iv. 3), he was of the family of the Hezronites. But according to Rab (B. B. 91a), Elimelech, Salmon (the father of Boaz), Peloni-Almoni, and the father of Naomi were the sons of Nahshon ben Aminadab. R. Simon b. Yoḥai contends (*ib.*) that Elimelech was one of the chiefs of Israel, and that his premature death was his punishment for having left the Holy Land and having settled in the land of Moab.

E. G. H. M. SEL.

ELIPHAZ: The first of the three visitors of Job (Job ii. 11), surnamed "the Temanite"; supposed to have come from Teman, an important city of Edom (Amos i. 12; Obad. 9; Jer. xlix. 20). Thus Eliphaz appears as the representative of the wisdom of the Edomites, which, according to Obad. 8, Jer. xlix. 7, and Baruch iii. 22, was famous in antiquity.

The name "Eliphaz" for the spokesman of Edomite wisdom may have been suggested to the author of Job by the tradition which gave this name to Esau's son, the father of Theman (Gen. xxxvi. 11; I Chron. i. 35, 36). In the arguments that pass between Job and his friends, it is Eliphaz that opens each of the three series of discussions. His one thought is that the righteous can not perish; the wicked alone suffer, and in measure as they have sinned (Job iv. 7-9). See JOB.

Later tradition makes Eliphaz King of Yemen; *e.g.*, the additions to the Arabic translation of the Book of Job (comp. Michaelis, "Einleitung in die Göttliche Schrift des Alten Testaments," p. 18).

E. K.—E. G. H.

ELIPHELET ("God is deliverance"): **1.** The last of the eleven sons born to David in Jerusalem (II Sam. v. 16). In I Chron. iii. 6, 8; xiv. 5, 7, two sons of this name (A. V. "Elpalet" and "Eliphalet"; R. V. "Elpelet" and "Eliphelet") are mentioned, together with a son named Nogah, making the total thirteen.

2. The son of Ahasbai (II Sam.. xxiii. 34), identical with Eliphal, the son of Ur (I Chron. xi. 35), one of David's "thirty" warriors.

3. The third son of Eshek, a descendant of Jonathan (I Chron. viii. 39).

4. One of the clan of Adonikam, who returned from the Exile (Ezra viii. 13 = "Eliphalet," I Esd. viii. 39).

5. A Hashumite, married to a foreign woman (Ezra x. 33; I Esd. ix. 33).

E. G. H. E. I. N.

ELISEUS or **ELISSEUS** ('Ελισσαῖος): Learned Jew at the court of Murad I. at Brusa and Adrianople during the second half of the fourteenth century. After a time he lost favor with the sultan, and was disgraced and exiled. He is identified by Franz Delitzsch with the author of the "Græcus Venetus" (see JEW. ENCYC. iii. 188). His contemporary, Gennadius, complains that he was an unbeliever (Zoroastrian), probably because of his philosophical bent. Eliseus was the teacher of Georgios Gemistus Pletho (b. 1355), the teacher of Cardinal Bessarion, who presented the manuscript of the "Græcus Venetus" to the city of Venice.

BIBLIOGRAPHY: Delitzsch, in preface to *Græcus Venetus*, ed. Gebhardt, Leipsic, 1875; Swete, *Introduction to the Septuagint*, p. 56; P. F. Frankl, in *Monatsschrift*, xxiv. 424, suggests that the author was a Christian.

G.

ELISHA.—Biblical Data: Successor to the prophet Elijah. The name (in the LXX. 'Ελισά, 'Ελισαιέ; in Luke iv. 27 'Ελισ[σ]αῖος) seems to denote "God is salvation," corresponding to the Sabean אלעת, and thus be in meaning identical with "Elishua" (II Sam. v. 15); though the latter name may also be interpreted as "God is opulence," which significance König prefers for "Elisha."

The son of Shaphat, a wealthy landowner in Abel-meholah, Elisha grew up on the farm until he, though not one of the "sons of the Prophets," was summoned from the plow by Elijah. Thereupon, after kissing his father and mother, and making a sacrificial feast of his oxen for the people, he followed Elijah, his "master" and "father," upon whose hands he poured water (I Kings xix. 16, 19-21; II Kings iii. 11), *i.e.*, as a servant.

Succeeds Elijah.

By the other followers or disciples of Elijah he was soon acknowledged as the successor of the departed master, who in fact had designated Elisha as such by leaving his mantle with him (II Kings ii. 13-15), so that his wish for "a double portion" of the older prophet's spirit (*ib.* ii. 9), in allusion to the preference shown the first-born son in the division of the father's estate (Deut. xxi. 17), had been fulfilled. Elisha's activity was exhibited in political matters as well as in private life, as the following facts show:

In the expedition against Mesha, King of Moab (II Kings iii. 4), the Israelitish army was saved through Elisha's advice from perishing by thirst; and Moab, mistaking, under the glare of the sun, the water in the trenches for blood, was lured to an ill-conceived attack and defeated.

During the Syrian war (*ib.* vi. 8 *et seq.*), Elisha's counsel defeated the strategy of the hostile king, who, desirous to capture the prophet, sent out horse and foot against him, only to find that the would-be captors were themselves tricked to accompany their expected captive into Samaria.

Samaria, besieged by the Syrians and in dire distress from famine, was cheered by his prediction of the raising of the siege (*ib.* vii. 1-2). Elisha, by announcing to Hazael his impending succession to the throne, was perhaps the innocent cause of Benhadad's assassination (*ib.* viii. 7 *et seq.*). By his direction one of the sons of the prophets anointed Jehu as king, with the purpose of dethroning Joram and of destroying Ahab's dynasty. His last act was his prediction to King Joash, who visited him when on his deathbed, that he would be victorious over the Syrians (*ib.* xiii. 14-19).

Of miracles which he performed by virtue of his prophetic power, the following are recorded:

Miracles.

The healing of the waters at Jericho (*ib.* ii. 19); the cursing of the little children at Beth-el because they had mockingly called after him "Baldhead!" whereupon two she-bears fell upon the little ones and tore forty-two of them (*ib.* ii. 23); the filling of the poor widow's vessels with oil (*ib.* iv. 4); the reviving of the Shunammite woman's son whose birth he had predicted as a reward for her hospitality to him (*ib.* iv. 8); the rendering innocuous of the wild gourds (*ib.* iv. 38); the feeding of a multitude on an insufficient quantity of food, much being left over after their hunger had been satisfied (*ib.* iv. 42); the healing of Naaman, the Syrian captain, of leprosy (*ib.* v.); the punishing of Gehazi for covetousness; and the raising of the iron ax which had fallen into the water (*ib.* vi. 1-7). After his death the very touch of his bones revived a man buried by accident in the prophet's sepulcher (II Kings xiii. 20, 21; compare Ecclesiasticus [Sirach] xlviii. 13-15).

Elisha resided for the most part in Samaria, paying Jericho and Bethel, where the prophetic settlements were, an occasional visit (*ib.* ii. 25, v. 3).

——**In Rabbinical Literature:** Elisha having received a double portion of the prophetic spirit, is held to have worked twice as many miracles (16) as Elijah (Ḳimḥi to II Kings ii. 14). While Elijah restored one person from death, Elisha restored two—the son of the Shunammite woman, and Naaman, who, being a leper, was considered as one dead (Ḥul. 7b; Sanh. 46a). From the incidents of Elisha's life a number of halakic precepts are derived. Indeed, both Elijah and Elisha are considered great rabbinical masters. Thus, on their last journey together they held converse, according to one rabbi, on the Shema'; according to another rabbi, on the consolations for Jerusalem. Others assert that their conversation concerned the mysteries of creation; the majority maintain that they were discussing the mysteries of the chariot (Yer. Ber. 8d; comp. Soṭah 49a). This was in due observance of the rabbinical dictum that "two students who walk together without discussing the Torah deserve to be burned" (Soṭah 49a). Indeed, an angel had been sent to destroy master and pupil, but finding them occupied in the study of the Torah, the Prophets, the Hagiographa, the Mishnah, the Halakah, and the Haggadah, he lost his mastery over them (Tanna debe Eliyahu, v.

Anger deprives a prophet of his divine gift, as Elisha experienced (II Kings iii. 14, 15). God's spirit rests only upon those who are in a peaceful and joyful mood (Pes. 66a, 117a; Yer. Suk. 55a, bottom). The harp that induced Elisha's inspiration played, it would seem, without the touch of the musician (Pesiḳ. R., ed. Friedmann, p. 86a). From Elisha's refusal to receive the King of Israel it is deduced that one should not look upon the face of a wicked man (Yalḳ. to II Kings iii.; Meg. 28b). His having "poured water upon Elijah's hands" is made the text for enlarging on the benefits derived by disciples from ministering to great masters (Ber. 7b). The hospitality of the Shunammite woman is referred to as typical (Cant. R. ii. 5), and as showing that a woman always knows the character of a guest better than a man does (Ber. 10b). The Rabbis take pains to account for his calling the bears to devour the children, by ascribing the coming of the bears and the appearance of the woods which had not been seen before to his miracle-working power (Soṭah 46b, 47a, Yalḳ. to II Kings ii. 21). The offenders were not children, but were called so ("ne'arim") because they lacked ("meno'arin") all religion (Soṭah 46b). The number (42) rent by the bears corresponds to the number of the sacrifices (42) offered by Balak. Had the Bethlehemites shown him due courtesy by sending him on his way attended in a manner befitting his dignity, this incident would not have occurred (Soṭah 46a). Yet Elisha was punished for this act as well as for his rude treatment of Gehazi (Sanh. 107b). The man whom he revived from death, according to some, did not live for more than one hour; this was to show that the wicked should not be buried with the righteous (Sanh. 47b; Pirḳe R. El. xxxiii.). Shalom ben Tiḳwah was the name of the man revived by Elisha's bones; according to some he did not die immediately after, but lived (II Kings xxii. 14) and begot a son, Hanameel (Jer. xxii. 7). Elisha was a prophet for over sixty years, according to Seder 'Olam xix. and Yalḳ. to II Kings xiii. 20.

Pirḳe R. El. (*l.c.*) reports, in the name of R. Joshua ben Ḳarḥah, that any woman who saw Elisha would die. The Shunammite was the sister of Abishag, the wife of Iddo, the prophet. When she repaired to Mount Carmel to seek the intervention of the prophet in behalf of her son, Gehazi, struck by her beauty, took undue liberties with her. Elisha sent his servant with his staff bidding him not to speak with any one; but Gehazi, being a skeptic and a scoffer, disobeyed the injunction.

Inconsistencies of Elisha Cycle.

——**Critical View:** As in the case of Elijah, the critical school holds that the account of Elisha's life and activity is taken from an old cycle of Elisha stories current in various versions before incorporated into the Books of Samuel-Kings. The contents are characteristic not of a book of history, but of one of legends, miracles being the main preoccupation of the prophet. The purpose of some of the accounts is clearly that of exalting the authority of the prophetic order and of inculcating obedience to and respect for it. The Elisha cycle is a clear imitation of the Elijah book. The miracles performed by Elisha have the appearance of being duplicates of those which are credited to his master, with obvious efforts at heightening them. Of this kind are the widow's oil, the revival of the child, and the anointing of Hazael and Jehu. Even from a literary point of view the Elisha biography reveals the hands of imitators. Each of the prophets is ostentatiously designated as the "man of God"; the names of the kings are mentioned only incidentally; and in the few cases where they are found, it is probable that they were inserted later. This is characteristic of legends: names are always secondary considerations. The Elisha cycle is a bundle of anecdotes loosely strung together. Contradictions therefore occur, as might be expected; *e.g.*, II Kings v. 1 contradicts *ib.* vi. 8. Peace is said to be between Israel and Damascus in the former, war in the latter passage; v. 27 makes Gehazi a leper; nevertheless in viii. 1 he appears without any further ado before the king. The shifting of Elisha's places of residence points in the same direction, and so does the circumstance that Gehazi is now a very important personage (iv. 8, viii. 1), and now of little consequence (iv. 8, v. 1). Again, some of the stories are altogether without historical material, while others, notwithstanding their legendary character, give historical notes of value (iii. 1, vi. 24, viii. 7, ix. 1). This Elisha cycle, therefore, can not be considered as a coherent production of one author. Such anecdotes arise spontaneously among the people, and are later compiled, without great care to harmonize the discrepancies. Further, the redactor of Kings may have drawn from two or more versions of Elisha's doings.

To regard them as historical is chronologically impossible also. The events almost all take place under Joram. But between II Kings iv. 16 and iv. 18 an interval of at least seven to eight years is presupposed; then follows the famine, continuing for another seven years. Joram, however, reigned only twelve years (iii. 1). To distribute the happenings over the reigns of Joram, Jehu, Jehoahaz, and Joash might be admissible, but the story itself nowhere gives a definite clue as to time, legend being as indifferent to accuracy in dates as it is to definiteness of places and names.

E. K.—E. G. H.

ELISHA BEN ABRAHAM: Hebraist and Talmudist; flourished at the end of the fifteenth century. He was the author of "Magen Dawid," a vindication of David Ḳimḥi's grammar against the strictures of Efodi and David ben Yaḥya (Constantinople, 1517). The book is prefaced by an acrostic poem, giving the author's name.

L. G. M. SEL.

ELISHA BEN ABRAHAM BEN JUDAH: Russian rabbi; died at Grodno July 1, 1749. He was rabbi and chief of the yeshibah of Lucicz, Volhynia, Russia. Elisha was the author of "Ḳab we-Naḳi," a short commentary on the Mishnah (Amsterdam, 1697), and he annotated and published, under the title "Pi Shenayim" (Altona, 1735), Asheri's commentary on the Mishnah of Zera'im. According to Benjacob ("Oẓar ha-Sefarim," p. 382, No. 2489), the first edition of the "Ḳab we-Naḳi" was published in 1664; from this fact it may be concluded that Elisha lived to be more than a hundred years old.

K. M. SEL.

ELISHA BEN ABUYAH (called also by the Rabbis **Aḥer,** "the other"): Born in Jerusalem before 70; flourished in Palestine at the end of the first century and the beginning of the second. At one time the Rabbis were proud to recognize him as of their number; but later their opposition to him grew so intense that they even refrained from pronouncing his name, and referred to him in terms used to designate some vile object ("dabar aḥer," lit. "another thing"). For this reason it is almost impossible to derive from rabbinical sources a clear picture of his personality, and modern historians have differed greatly in their estimate of him. According to Grätz, he was a Karpotian Gnostic; according to Siegfried, a follower of Philo; according to Dubsch, a Christian; according to Smolenskin and Weiss, a victim of the inquisitor Akiba.

Youth and Activity.

Of Elisha's youth and of his activity as a teacher of the Law very little is known. He was the son of an esteemed and rich citizen of Jerusalem, and was trained for the career of a scholar. His praise of this method of education is the only saying that the Mishnah has found worth perpetuating. According to Abot iv. 25, his favorite saying was, "Learning in youth is like writing upon new paper, but learning in old age is like writing upon paper which has already been used." Elisha was a student of Greek; as the Talmud expresses it, "Aḥer's tongue was never tired of singing Greek songs" (Yer. Meg. i. 9), which, according to some, caused his apostasy (Ḥag. 16b, below). Bacher has very properly remarked that the similes which Elisha is reported to have used (Ab. R. N. xxix.) show that he was a man of the world, acquainted with wine, horses, and architecture. He must have acquired a reputation as an authority in questions of religious practise, since in Mo'ed Ḳaṭan 20b one of his halakic decisions is recorded—the only one in his name, though there may be others under the names of different teachers. The Babylonian Talmud asserts that Elisha, while a teacher in the bet ha-midrash, kept forbidden books ("sifre minim") hidden in his clothes. This statement is not found in the Jerusalem Talmud, and if at all historical, may possibly mean that he also studied the writings of the Sadducees, who, owing to changes made by the censors, are sometimes called "minim."

The oldest and most striking reference to the views of Elisha is found in the following baraita (Ḥag. 14b; Yer. ii. 1):

> "Four [sages] entered paradise—Ben 'Azzai, Ben Zoma, Aḥer, and Akiba. Ben 'Azzai looked and died; Ben Zoma went mad; Aḥer destroyed the plants; Akiba alone came out unhurt."

The Four Who Entered Paradise.

There can be no doubt that the journey of the "four" to paradise, like the ascension of Enoch (in the pre-Christian books of Enoch) and of so many other pious men, is to be taken literally and not allegorically. This conception of the baraita is supported by the use of the phrase נכנס לפרדס ("entered paradise"), since נכנס לג"ע ("entered the Garden of Eden"=paradise) was a common expression (Derek Ereẓ Zuṭa i.; Ab. R. N. xxv.). It means that Elisha, like Paul, in a moment of ecstasy beheld the interior of heaven—in the former's case, however, with the effect that he destroyed the plants of the heavenly garden.

The Talmud gives two different interpretations of this last phrase. The Babylonian Talmud says:

> "What is the meaning of 'Aḥer destroyed the plants'? Scripture refers to him (Eccl. v. 5 [A. V. 6]) when it says: 'Suffer not thy mouth to cause thy flesh to sin.' What does this signify? In heaven Aḥer saw Meṭaṭron seated while he wrote down the merits of Israel. Whereupon Aḥer said: 'We have been taught to believe that no one sits in heaven, . . . or are there perhaps two supreme powers?' Then a heavenly voice was heard: 'Turn, O backsliding children (Jer. iii. 14), with the exception of Aḥer.'"

The Talmudic Explanation.

The dualism with which the Talmud charges him has led some scholars to see here Persian, Gnostic, or even Philonian dualism. They forget that the reference here to Meṭaṭron—a specifically Babylonian idea, which would probably be unknown to Palestinian rabbis even five hundred years after Elisha—robs the passage of all historical worth. The story is of late origin, as is seen from the introductory words, which stand in no connection with the context, as they do in the parallel passage in the Jerusalem Talmud. This latter makes no mention of Elisha's dualism; but it relates that in the critical period following the rebellion of Bar Kokba, Elisha visited the schools and attempted to entice the students from the study of the Torah, in order to direct their energies to some more practical occupation; and it is to him, therefore, that the verse "Suffer not thy mouth to cause thy flesh to sin" (Eccl. v. 5) is to be applied. In connection with this the Biblical quotation is quite intelligible, as according to another haggadah (Shab. 34b; Eccl. R. v. 5) "flesh" here means children—spiritual children, pupils—whom Elisha killed with his mouth by luring them from the study of the Torah. The Babylonia amoraim must have known this story, from which they took the concluding part and attached it to another legend. The Jerusalem Talmud is also the authority for the statement that Elisha played the part of an informer during the Hadrianic persecutions, when the Jews were ordered to violate the laws of the Torah. As evidence of this it is related that when the Jews were ordered to do work on the Sabbath, they tried to perform it in a way which could be considered as not profaning the Sabbath. But Elisha betrayed the Pharisees to the Roman authorities. Thus it is probable that the antipathy of Elisha was not directed against Judaism in general, but only against Pharisaism. The reason given for his apostasy is also characteristic. He saw how one man had lost his life while fulfilling a law for the observance of which the Torah promised a long life (Deut. xxii. 7), whereas another man who broke the same law was not hurt in the least. This practical demonstration, as well as the frightful sufferings of the martyrs during the Hadrianic persecutions, strengthened his conviction that there was no reward for virtue in this life or the next. These statements of the Jerusalem Talmud are no doubt based on reliable tradition, as they are also confirmed by the Babylonian Talmud (Ḳid. 39b). Bearing in mind what is said about Elisha, there can be little doubt that he was a Sadducee.

Elisha an "Epicurean"

The harsh treatment he received from the Pharisees was due to his having deserted their ranks at such a critical time. Quite in harmony with this supposition are the other sins laid to his charge; namely, that he rode in an ostentatious manner through the streets of Jerusalem on a Day of Atonement which fell upon a Sabbath, and that he was bold enough to overstep the "teḥum" (the limits of the Sabbath-day journey). Both the Jerusalem and the Babylonian Talmuds agree here, and cite this as proof that Elisha turned from Pharisaism to heresy. It was just such non-observance of customs that excited the anger of Akiba (Soṭah 27b). The mention of the "Holy of Holies" in this passage is not an anachronism, as Grätz thinks. For while it is true that Eliezer and Joshua were present as *the* geonim par excellence at Elisha's circumcision—which must, therefore, have occurred after the death of Johanan ben Zakkai (80 c.e.)—it is also true that the "Holy of Holies" is likewise mentioned in connection with Rabbi Akiba (Mak., end); indeed, the use of this expression is due to the fact that the Rabbis held holiness to be inherent in the place, not in the building (Yeb. 6b).

The same passage from the Jerusalem Talmud refers to Elisha as being alive when his pupil R. Meïr had become a renowned teacher. According to the assumption made above, he must have reached his seventieth year at that time. If Elisha were a Sadducee, the friendship constantly shown him by R. Meïr could be understood. This friendship would have been impossible had Elisha been an apostate or a man of loose morals, as has been asserted. Sadducees and Pharisees, however, lived in friendly intercourse with one another (for example, Rabban Gamaliel with Sadducees; 'Er. 77b). For legends concerning Elisha see Johanan ben Nappaḥa; Meïr; compare also Gnosticism.

L. G.

ELISHAH: Name occurring in the so-called table of generations, Gen. x. 4 (comp. I Chron. i. 7) and in Ezek. xxvii. 7. In Gen. x. 4 Elishah is one of the four sons of Javan; therefore a people or a country related to the Ionians. In Ezek. xxvii. 7 the name designates a region in the Mediterranean Sea, whence Tyre is reported to have imported purple. Various explanations and identifications have been proposed. Halévy ("R. E. J." xiii. 14) and others regard it as the Peloponnesus, which in fact was celebrated for its purple murex, the name being an echo of "Elis," if not of "Hellas." An old tradition (Josephus, "Ant." i. 6, § 2) regards Elishah as Æolis (see Yer. Targ. to Gen. x. 4). H. Derenbourg ("Nouveaux Mélanges Orientaux," pp. 236 *et seq.*; English transl. in "Hebraica," Oct., 1897, p. 7), Lenormant ("Les Origines de l'Histoire d'après la Bible," etc., ii. 2, 34), Dillmann (Commentary, Gen. x. 4), and Lagarde ("Mittheilungen," ii. 261) regard it as denoting Sicily or the lower part of Italy, which view is supported by the Targum to Ezek. (מדינת איטליא). Carthage, the city founded by Princess Elissa, has been suggested as identical with this Biblical Elishah (Ed. Meyer, "Geschichte des Altertums," i. 282; Stade, "De Populo Javano," pp. 8 *et seq.*). This latter view, declared to be very attractive in Gesenius, "Th." *s.v.*, is exposed to the objection that the Carthaginians never called their city by the name of the Princess Elissa. Of all these suggestions, that which identifies it with Sicily has the strongest element of probability. "Javan" in the table, and elsewhere in the Old Testament, stands for the mainland of Greece. His "sons," therefore, are Greek colonies. Elishah is named with Tarshish (southwest coast of Spain), Kittim, and Dodanim (Cyprus and Rhodes), and thus must have been another Greek colony, that namely, in the south of Italy or Sicily. The Hebrews, through Phenician sources, had certainly heard of this region, as they had heard of the much more remote Tarshish.

ELIZABETHGRAD. See Yelisavetgrad.

ELIZABETHPOL. See Yelisavetpol.

ELIZAPHAN ("God has protected"): Son of Uzziel; prince of the Kohathites who bore the sanctuary and its furniture during the wandering in the wilderness (Num. iii. 30, 31). His descendants helped to bring the Ark to the city of David (I Chron. xv. 8), and aided in the cleansing of the Temple for Hezekiah (II Chron. xxix. 13).

E. G. H. E. I. N.

ELKAN, MEÏR. See Fürth, Meïr b. Elhanan.

ELKAN, MOSES: Russian physician and Hebrew scholar; born at Tulchin, government of Podolsk; died at St. Petersburg Jan. 31, 1822. He wrote: a "shir," a hymn in Hebrew and French, addressed to Czar Alexander I., Munich, 1811; and a manual, in German, of the history of the Jews, accompanied by a geographical sketch of Palestine, for the use of Jewish schools, later translated into Russian by Z. Minor, Moscow, 1880.

Bibliography: *Voskhod*, 1881, ii. 41; Zeitlin, *Bibl. Post-Mendels.* p. 77.

H. R. M. Sel.

ELKANAH: Father of Samuel, living at Ramah (I Sam. i. 19, ii. 11; comp. xxviii. 3), in the district of Zuph. Hence in I Sam. i. 1 his ancestral line is carried back to Zuph (comp. I Sam. ix. 5 *et seq.*). The word צופים in I Sam. i. 1 should be emended to הצופי ("the Zuphite"), the final mem being a dittogram of that with which the next word, מהר, begins; as the LXX. has it, *Σειφὰ*. Elkanah is also represented in I Sam. i. 1 as hailing from the mountains of Ephraim, the word אפרתי here denoting this (comp. Judges xii. 5; I Kings xi. 26)—if indeed אפרתי is not a corruption for "Ephraimite"—and not, as in Judges i. 2 and I Sam. xvii. 12, an inhabitant of Ephrata (see LXX.). His genealogy is also found in a pedigree of the Kohathites (I Chron. vi. 3-15) and in that of Heman, his great-grandson (*ib.* vi. 18-22). According to the genealogical tables, Elkanah was a Levite, a fact otherwise not mentioned in the books of Samuel. The fact that Elkanah, a Levite, was denominated an Ephraimite is analogous to the designation of a Levite belonging to Judah (Judges xvii. 7).

E. G. H. E. K.

ELKIN, BENJAMIN: Prominent reformer in the London community; born at Portsea, England, Jan. 9, 1783; died in London Jan., 1848. At the age of twenty-one he emigrated to Barbados, where he plied his trade as a watchmaker.

After a visit to England in 1810, he abandoned his occupation for that of a general merchant. In a few years he became one of the most opulent merchants in Barbados. Elkin then devoted himself to the improvement of the internal affairs of the Barbados congregation.

In 1830 Elkin returned with his family to England, and joined the Great Synagogue. He joined heartily in the movement for the establishment of a new synagogue in the metropolis, with new features tending toward greater decorum in the service, and wrote some able pamphlets in its defense; and his "Rejected Letters" had considerable influence on the Reform movement. His action, however, in publishing a translation of "Eighteen Treatises of the Mishnah" without revision or consent of the translators was repudiated by them. Elkin published a pamphlet on the subject, disclaiming any intention of offense.

The synagogue was consecrated in Jan., 1842; but Elkin was not excluded from his membership of the Great Synagogue, in spite of the decree of excommunication which had been issued against the Reformers.

J. G. L.

ELKIND, ARKADI DANILOWICH: Russian physician and anthropologist; born in Mohilev-on-the-Dnieper in 1869; graduated (M.D.) from Moscow University in 1893. Having paid particular attention to anthropology, the Society of Friends of Natural Science, Anthropology, and Ethnography delegated him to investigate the physical anthropology of the inhabitants of Russian Poland, and he has produced the following works as a result of his investigations: "Privislyanskie Polyaki. Antropologicheski i Kraniologicheski Ocherk," in "Trudy Antropologicheskavo Otdyela," xviii., 1896; "Yevrei," *ib.* xxi., Moscow, 1903. The latter is the largest and most comprehensive work ever published on the anthropology of any section of Jews.

H. R. M. Fi.

ELKOSHITE (האלקשי): Obscure ethnic or patronymic name of the prophet Nahum (Nahum i. 1). According to Jerome, Elkosh, the birthplace of the prophet, was the name of a village in Galilee; according to others, of a village to the east of the Jordan. Peiser ("Zeitschrift für die Alttestamentliche Wissenschaft," vii. 349) thinks the name is derived from "Ḳosh," name of an Assyrian divinity. Ḳimḥi and Ibn Ezra explained it as being either ethnic or patronymic; in the latter case "Elkosh" may be compared with "Kish," the father of Saul (I Sam. ix. 1).

E. G. H. M. Sel.

ELLES (ELIS), ISAAC BEN MOSES: Polish rabbi of the sixteenth century; author of "Yesod Emunah," a treatise on the dogmas of Judaism, Cracow, 1582. He also wrote "Yesod ha-Teshubah," on repentance, extracts from other works, and chiefly from the "Yoreh Ḥaṭṭa'im" of Eleazar b. Judah of Worms, *ib.* 1582.

ELLINGER, MORITZ: American journalist; born in Fürth, Bavaria, Oct. 17, 1830. Emigrating to the United States in 1854, he became interested in in American municipal and communal affairs. In 1866 he received a congressional nomination. From 1873 to 1876 he was appointment clerk in the finance department of the city of New York; from 1876 to 1881 he held the office of coroner; and from 1888 to the present time (1903) has been record clerk and interpreter.

Ellinger has been prominently identified with the I.O.B.B.; he has held the position of secretary of its executive committee (1869-79), and for many years he edited its organ, "The Menorah." He also edited "The Jewish Times." Ellinger is a member of the Society of American Authors. A.

ELLINGER (ELLINGEN), NATHAN (נטע or נתן) BAR YOSPA (יוסף): German rabbi; born 1772; died July 4, 1839, at Bingen-on-the-Rhine. According to the archives of Mayence, he and his brother Löb were rabbis of Mayence in 1808. From 1809 to 1821 Nathan was director of the Talmud school at Hamburg; and from 1821 till his death, rabbi at Bingen (see Löwenstein, "Geschichte der Juden in der Kurpfalz," p. 172, note 2). Several Talmudic manuscripts written by Ellinger are in the Bodleian Library, Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 528–532, 862, 966). In the Memorbuch of the community of Bingen (No. 673) he is called "ha-ḳadosh weha-ṭahor," although otherwise only martyrs are mentioned as ḳadosh.

Ellinger's brother, **Löb Ellinger,** rabbi of Mayence, was born in 1770; he died 9th Ab, 1847. He is called "Löb Schnadig" (from "Schneittach") in the obituary of the Memorbuch of Mayence. Carmoly has written his biography.

There are also Ellingers in Frankfort-on-the-Main, who came originally from Fürth (see Horowitz, "Inschriften," Nos. 1884, 2934, 3041, 5648). The Mayence register of 1763 mentions a Moyses Löw Ellinger, designating him as "neuer angänger [*i.e.*, a newcomer] who was placed under protection." The "Guide de la Ville de Mayence" of the year IX. of the French Republic mentions various members of the Ellinger family.

S. M. Gr.

ELLIS, SIR BARROW HELBERT: Indian statesman; born in London Jan. 24, 1823; died at Savoy June 20, 1887; son of S. H. Ellis, for some time treasurer of the Great Synagogue, London. After matriculating at the University of London in 1839, he had a distinguished career at Haileybury College, and then entered the civil service of the Bombay presidency, in which he remained for thirty-three years, being employed mainly in the revenue branch of the administration.

His various appointments culminated in his being nominated in 1862 an additional member, and in 1865 an ordinary member, of the Bombay council. Five years later he was promoted to the viceroy's council. In 1875 Ellis returned to England and was made K.C.S.I. and a member of the Indian council in London, from which he retired in 1885. On his return he was likewise elected a vice-president of the Anglo-Jewish Association, chairman and later vice-president of the council of Jews' College, and vice-president of the United Synagogue.

J. G. L.

ELLOJI SHAHIR ("Elijah, the Ballad-Singer"): Beni-Israel poet of the eighteenth century; born and lived at Bombay, British India; his natal name was "Elloji Nagawkar." He was of the class of the Kalgiwallas, which is privileged to carry a plume or crest in the turban. It is said that he improvised many religious and moral poems, both in Mahrati and Hindustani, in the form of ballads, some of which are still extant, and that he was invited to the court of the Peshwa at Poona to exhibit his talents.

J. J. Hy.

ELLSTÄTTER, MORITZ: Minister of finance of the grand duchy of Baden; born March 11, 1827, at Carlsruhe, where his father was a furniture-manufacturer. From 1845 to 1850 he studied at Heidelberg and Bonn, devoting himself mainly to law. In 1854 he was made "Referendar," and after preparing for the position of "Anwalt" (counselor at law) went to Berlin (1856) and entered a banking-house. Here he became known to Mathy, subsequently minister of finance. In 1859 he began to practise law in Durlach, and soon came to the front. The last barriers which had kept Jews from the higher public offices being removed (1862), he was appointed district court assessor in Mannheim (1864). In the following year he was made counselor of the district court ("Kreisgerichtsrath"). In 1866 Mathy became minister of finance, and at once appointed Ellstätter as legal referee, entrusting him with the control of important financial matters. On Feb. 12, 1868, after the death of Mathy, Ellstätter was entrusted with the affairs of the ministry of finance, despite the racial prejudice which still existed. He controlled Baden's financial policy during the difficult years that followed the Franco-German war, and his wise system of taxation is still followed.

In 1871 Ellstätter became a member of the Bundesrath, in which position he drew up the reports of the committee on the proposed legislation of the coinage system. He became councilor of state in 1872; privy councilor of the first rank in 1876; and director of railways in 1881, when the railroads came under the supervision of the finance department; and received the title of minister of finance in 1888. As director of railways he rejected many useless schemes originated by interested deputies. He retired from public life in 1893 on account of illness. Ellstätter has taken little interest in Jewish affairs.

S. A. Blum.

ELMALEH, JOSEPH DE AARON: Honorary chief rabbi of Mogador, Morocco; born at Rabat in 1809; died in London Jan. 9, 1886. He removed to Mogador at the age of seventeen, and, devoting himself to theological study, was elected in 1840 chief rabbi of the community. In 1881 he added to his clerical functions the calling of a merchant. He also held the honorary post of Austrian vice-consul, and in 1873 was decorated by the Emperor of Austria with the Order of Francis Joseph. His influential position enabled him to render valuable services in mitigating the persecution endured by the Jews. Elmaleh was a valued correspondent of the Anglo-Jewish Association, and the establishment of a Jewish girls' school at Mogador was due to his perseverance.

Elmaleh was the author of "Toḳpo shel Yosef," a treatise on Jewish legislation. He introduced into Gibraltar the "Importa Nacional," an annual tax paid by Jews for the benefit of the poor, and levied on trade at the rate of 1 per cent.

ELMIRA: City in the state of New York. The first settlement of Jews dates from about 1851. In 1860 twelve families organized a congregation under the name "Children of Israel," the services being conducted by Jacob Stahl. In 1885 Dr. Adolph M. Radin became rabbi, and introduced the Jastrow prayer-book. In 1886 a new synagogue was dedicated. The successors of Dr. Radin were Rabbis Kopfstein, Poseman, and Jacob Marcus: the last-named is the present (1902) incumbent. The congre-

ELKAN, MEÏR. See Fürth, Meïr b. Elhanan.

ELKAN, MOSES: Russian physician and Hebrew scholar; born at Tulchin, government of Podolsk; died at St. Petersburg Jan. 31, 1822. He wrote: a "shir," a hymn in Hebrew and French, addressed to Czar Alexander I., Munich, 1811; and a manual, in German, of the history of the Jews, accompanied by a geographical sketch of Palestine, for the use of Jewish schools, later translated into Russian by Z. Minor, Moscow, 1880.

H. R. M. Sel.

ELKANAH: Father of Samuel, living at Ramah (I Sam. i. 19, ii. 11; comp. xxviii. 3), in the district of Zuph. Hence in I Sam. i. 1 his ancestral line is carried back to Zuph (comp. I Sam. ix. 5 *et seq.*). The word צופים in I Sam. i. 1 should be emended to הצופי ("the Zuphite"), the final mem being a dittogram of that with which the next word, מהר, begins; as the LXX. has it, Σειφὰ. Elkanah is also represented in I Sam. i. 1 as hailing from the mountains of Ephraim, the word אפרתי here denoting this (comp. Judges xii. 5; I Kings xi. 26)—if indeed אפרתי is not a corruption for "Ephraimite"—and not, as in Judges i. 2 and I Sam. xvii. 12, an inhabitant of Ephrata (see LXX.). His genealogy is also found in a pedigree of the Kohathites (I Chron. vi. 3–15) and in that of Heman, his great-grandson (*ib.* vi. 18–22). According to the genealogical tables, Elkanah was a Levite, a fact otherwise not mentioned in the books of Samuel. The fact that Elkanah, a Levite, was denominated an Ephraimite is analogous to the designation of a Levite belonging to Judah (Judges xvii. 7).

E. G. H. E. K.

ELKIN, BENJAMIN: Prominent reformer in the London community; born at Portsea, England, Jan. 9, 1783; died in London Jan., 1848. At the age of twenty-one he emigrated to Barbados, where he plied his trade as a watchmaker.

After a visit to England in 1810, he abandoned his occupation for that of a general merchant. In a few years he became one of the most opulent merchants in Barbados. Elkin then devoted himself to the improvement of the internal affairs of the Barbados congregation.

In 1830 Elkin returned with his family to England, and joined the Great Synagogue. He joined heartily in the movement for the establishment of a new synagogue in the metropolis, with new features tending toward greater decorum in the service, and wrote some able pamphlets in its defense; and his "Rejected Letters" had considerable influence on the Reform movement. His action, however, in publishing a translation of "Eighteen Treatises of the Mishnah" without revision or consent of the translators was repudiated by them. Elkin published a pamphlet on the subject, disclaiming any intention of offense.

The synagogue was consecrated in Jan., 1842; but Elkin was not excluded from his membership of the Great Synagogue, in spite of the decree of excommunication which had been issued against the Reformers.

ELKIND, ARKADI DANILOWICH: Russian physician and anthropologist; born in Mohilev-on-the-Dnieper in 1869; graduated (M.D.) from Moscow University in 1893. Having paid particular attention to anthropology, the Society of Friends of Natural Science, Anthropology, and Ethnography delegated him to investigate the physical anthropology of the inhabitants of Russian Poland, and he has produced the following works as a result of his investigations: "Privislyanskie Polyaki. Antropologicheski i Kraniologicheski Ocherk," in "Trudy Antropologicheskavo Otdyela," xviii., 1896; "Yevrei," *ib.* xxi., Moscow, 1903. The latter is the largest and most comprehensive work ever published on the anthropology of any section of Jews.

H. R. M. Fi.

ELKOSHITE (האלקשי): Obscure ethnic or patronymic name of the prophet Nahum (Nahum i. 1). According to Jerome, Elkosh, the birthplace of the prophet, was the name of a village in Galilee; according to others, of a village to the east of the Jordan. Peiser ("Zeitschrift für die Alttestamentliche Wissenschaft," vii. 349) thinks the name is derived from "Ḳosh," name of an Assyrian divinity. Ḳimḥi and Ibn Ezra explained it as being either ethnic or patronymic; in the latter case "Elkosh" may be compared with "Kish," the father of Saul (I Sam. ix. 1).

E. G. H. M. Sel.

ELLES (ELIS), ISAAC BEN MOSES: Polish rabbi of the sixteenth century; author of "Yesod Emunah," a treatise on the dogmas of Judaism, Cracow, 1582. He also wrote "Yesod ha-Teshubah," on repentance, extracts from other works, and chiefly from the "Yoreh Ḥaṭṭa'im" of Eleazar b. Judah of Worms, *ib.* 1582.

ELMIRA: City in the state of New York. The first settlement of Jews dates from about 1851. In 1860 twelve families organized a congregation under the name "Children of Israel," the services being conducted by Jacob Stahl. In 1885 Dr. Adolph M. Radin became rabbi, and introduced the Jastrow prayer-book. In 1886 a new synagogue was dedicated. The successors of Dr. Radin were Rabbis Kopfstein, Poseman, and Jacob Marcus; the last-named is the present (1902) incumbent. The congregation now includes about sixty families. Since 1881 Russian Jews have settled in Elmira and have formed two Orthodox congregations: Shomre Hadath, founded 1883, and the Chevra Talmud Torah, organized 1888. Elmira has a branch of the Council of Jewish Women, lodges of the Order of the B'nai B'rith and B'rith Abraham, and several benevolent societies. The Jewish population is about 1,200. Jacob Schwartz, who died in 1891, aged 38, was the leading lawyer of the city. A. Anhalt is the overseer of the poor, and Dr. Jonas Jacobs the city physician.

The New York State Reformatory at Elmira has (1902) 180 Jewish inmates. They are between the ages of 16 and 29, are taught trades, reading, and writing, and may regain their liberty in twelve months by good behavior. A small Jewish library is provided for them, and Jewish services are conducted at the Reformatory every other Sunday and on Jewish holidays. Twenty-four Jewish Confederate prisoners are buried in Woodlawn Cemetery.

A. J. M.

ELNATHAN ("God has given"): **1.** An inhabitant of Jerusalem, and the maternal grandfather of Jehoiachin (II Kings xxiv. 8), probably identical with the son of Achbor, who was sent to conduct the offending prophet Urijah back from Egypt, and who entreated Jehoiachin not to "burn the roll" (Jer. xxvi. 22; xxxvi. 12, 25).

2. Three men of this name are mentioned in the list of those sent for by Ezra (Ezra viii. 16) when he encamped near Ahava on his journey to Jerusalem. Two are "chieftains" (ראשים), and the third is one of the מבינים ("teachers"); I Esd. viii. 44 names only two.

E. G. H. E. I. N.

ELOHIM. See God.

ELOHIST: Assumed author of those parts of the Hexateuch characterized by the use of the Hebrew word "Elohim" (= "God"). The term is employed by the critical school to designate one (or two) of the component parts of the Hexateuch. Jean Astruc (d. 1766), in his "Conjectures sur les Mémoires Originaux" (Brussels, 1753), was the first to call attention to the occurrence in Genesis and in Ex. i. and ii. of two names for the Deity, "Elohim" and "Yhwh," and to base upon this fact a theory concerning the composite character of the first Mosaic book. His hypothesis was developed by Johannes Gottfried Eichhorn ("Einleitung in das Alte Testament," 1780-83), and again elaborated by Karl David Ilgen ("Die Urkunden des Jerusalemischen Tempelarchivs," 1798), who coined the term "Elohist," applying it to two sources in which the Deity was consistently designated by "Elohim," distinct from a third in which "Yhwh" was used. This theory was adopted by Hupfeld ("Die Quellen der Genesis," 1853), whose acceptance of "Elohist" as a recognized term was followed by almost all subsequent writers on the Hexateuch from the critical point of view, though the connotation of the term was not definitely fixed at first. In earlier Hexateuchal analysis "Elohist" appears for the "Grundschrift" attributed to the first Elohist, and subsequently called the "Priestly Code" (Riehm, "Die Gesetzgebung Mosis im Lande Moab," 1854; Nöldeke, "Untersuchungen zur Kritik des Alten Testaments," 1869; Dillmann, "Hexateuch Kommentar," 1875); but after Graf (taking up the suggestions of De Wette, Ed. Reuss, Wilhelm Vatke, and J. F. George), Julius Wellhausen and Kuenen, the symbol E (Elohist) has come to designate certain historical portions of the Hexateuch, while the so-called "Grundschrift" is referred to by the symbol P (Priestly Code).

Peculiarities of E.

In the views of the critical school E forms part of the "prophetic strata" (Kuenen) of the Hexateuch, which, known collectively as JE, are held to be derived from two originally independent histories, with only occasional references to legal matters; the symbol J (= Jahvist) applying to passages in which the name "Yhwh" is predominant. The work of E has not been preserved as extensively as that of J; in many parts of JE only fragments of E are extant, while J on the whole presents a well-connected narrative. It is a moot point whether E originally contained the story of Creation; but it seems certain that a goodly portion of the Elohistic patriarchal history has been lost, the first large section from E being Gen. xx., which clearly supposes some preceding account of Abraham's career. In the biography of Moses, E again is used very sparsely. It is apparent from Ex. xxxiii. 6-11 that E must have given an account of the events at Horeb, though Josh. xxiv., which seems to be a summary of E, makes no allusion to them. E names Aaron and Miriam along with Moses, and to a certain extent assigns to the two former the position of opponents. Joshua in E is preeminently the servant of Moses. As such he commands the military forces, and is also Moses' house-mate (Ex. xvii., xxiv.). It is clear that E regards Moses as the priest of the oracle and Joshua as his predestined successor. Aaron plays a subsidiary part throughout. Whether E regards Moses as the lawgiver depends upon whether the Book of the Covenant (Ex. xx.-xxiv.) formed a part of E or not. The more recent critics incline to the opinion that it did not (see Holzinger, "Der Hexateuch," pp. 176-177, Leipsic, 1893).

Linguistic Characteristics.

The use of "Elohim" for "God" is the most notable characteristic of E. "Adonai" and "El" occur occasionally (Gen. xx. 4, xxx. 20, xxxv. 7, xliii. 14). "Yhwh" was unknown before Moses (Ex. vi.). E loves such combinations as "Elohe abi," "Elohe abika," and also employs "ha-Elohim" and "Elohim" as a *nomen proprium* even after, according to its own theory, "Yhwh" had been revealed as the proper appellation (comp. Gen. xxxi. 5, 29, 42; xlvi. 1, 3; Ex. xviii. 4). The aboriginal population of Canaan is designated as "Emori" (Gen. xlviii. 22; Num. xiii. 29). "Kena'ani" never occurs in E (see E. Meyer in Stade's "Zeitschrift," i. 139). "Horeb" is the name for the "mountain of God" (Ex. iii. 1, xviii. 5). Jacob, not Israel, stands for the third patriarch; "Jethro" and "Jether" for Moses' father-in-law. "Ha-ish Mosheh" is peculiar to E. Other linguistic peculiarities are: the use of "amah" (maid) where J has "shifḥah"; "ba'al" in its various significations; "gadol" and "ḳaṭon" in the meaning "older" and "younger" respectively; "dibber" with the preposition ב (to talk against: Num. xii. 1, 8; xxi. 5, 7); "dabar" as object of dispute (Ex. xviii. 16–19, 26; xxii. 8); "dor dor" (Ex. iii. 15); "derek nashim" where J has "oraḥ nashim"; "hennah" (hither); "zud" (to act arrogantly); "ḥizzaḳ leb"; "hokiaḥ" and "nokaḥ" as a judicial procedure; "yeled" (boy, child); "lebab"; "luḥat ha-eben"; "mush"; "maḥaneh" for temporary camp; "maẓa'" (to meet, to encounter); "nizme zahab"; "nokri" for stranger; "nissah"; "niẓẓel" (to take away and injure); "natan" (to allow); "ha'aleh" (to bring the people out [of Egypt]); "paga'" (to meet one); "hitpallel"; "panim el panim"; "paḥad Yiẓḥaḳ." Other expressions in addition to these have been urged as distinctive of E's vocabulary. For a complete list see Holzinger, *l.c.* pp. 183–190. Certain grammatical peculiarities are also ascribed to E, *e.g.*, the infinitives "halok"; "de'ah"; "redah" (רדה for רדת); "re'oh"; full forms of the suffixes, *e.g.*, "kullanah" (Gen. xlii. 36); "lebaddanah" (Gen. xxi. 29). The style of E is loose, disjointed; such forms as "wa-yehi ba'et ha-hi'" (Gen. xxi. 22), "wa-yehi aḥar (aḥare) ha-debarim ha-elleh" (often), indicate this. E also indulges in long formulas of address. The name of the person addressed is repeated (Gen. xxii. 11, xlvi. 2; Ex. iii. 4). Stereotyped introductions of dreams occur rather frequently ("ba-ḥalomi we-hinneh"; Gen. xl. 9, 16; xli. 17, 22). E compared with J is prosaic; but he introduces poetic quotations (Ex. xv.; Num. xxi. 14, 27). Secondary details mark his descriptions; for example, he uses names of no particular consequence to the narrative (Gen. xv. 2, xxxv. 8; Ex. i. 15); likewise learned glosses (*e.g.*, in Gen. xxxi. 20, 24, "the Aramean"; in Ex. i. 11, "Pithom and Rameses"); and fragments of Egyptian speech ("Abrek," "Ẓofnat Pa'neaḥ," Gen. xli. 43, 45). Chronological schemes are affected by E: "three days," (Gen. xl. 12–19; Josh. i. 11, ix. 16; Ex. iii. 18, v. 3, viii. 23, x. 22, xv. 22). E also displays a certain theological bias, in illustration of which may be noted the consistency with which "YHWH" is avoided before "Moses."

General Characteristics of E.

The work of E is popular in character. It takes no exception to the popular notion that the localities involved in the patriarchal biographies are places of worship. "Ha-maḳom" is one of E's special terms for such sacred places (Gen. xxviii. 11). God is without hesitation anthropomorphized (Ex. xxv. 1, 9–11; xxxi. 18; xxxii. 16; xxxiii. 7–11; Num. xii. 8; Ex. iv. 17–20; vii. 17; ix. 22; x. 12; xiv. 16; xvii. 5, 9; Num. xx. 8, 11). E speaks of matters pertaining to the cultus in a very naive way (sacrificial meals with non-Israelites: Gen. xxxi. 54; Ex. xviii. 12, xxiv. 11). "Maẓebot" are very frequently mentioned as though legitimate. Idols are known, and Rachel steals those of her father. Holy trees are recognized (Gen. xxxv. 4; Josh. xxiv. 26). The "neḥushtan" (brazen serpent) is connected with Moses (Num. xxi. 4–9). E maintains a sympathetic attitude toward popular religion. Still the making of the golden calf is clearly reproved (Ex. xxxii.). Human sacrifice is condemned (Gen. xxii.). Notwithstanding these leanings toward popular conceptions, the Elohist takes the view of the early (literary) prophets. YHWH is explained as "ehyeh asher ehyeh" (Ex. iii. 14). Providential purpose is assumed in the course of human affairs, as happenings, for instance, in Joseph's experience (Gen. xlv. 6–8, l. 20). God is with the fathers even in a strange land (Gen. xxxi. 13).

In the miracles as related by E a certain supernaturalism is unmistakable. The plagues are signs to accredit Moses as God's agent. They are to a large extent wrought by the staff of Moses, without the intervention of natural forces as in J (Ex. xvii. 9 *et seq.*). The rôle ascribed to the Ark in E partakes also of the miraculous (Num. xi. 33), and the conquest of the land is accomplished not so much by the bravery of the tribes as by the miraculous designs and devices of God (Josh. xxiv. 12; Ex. xxiii. 28; comp. Josh. x.). The relations between Israel and God are of a moral character. The sinful nation forfeits God's good will (Ex. xxxiii. 3b). God's revelations are in E transmitted in dreams and visions (Gen. xv. 1; Num. xii. 6). God's angel, the usual medium in J, speaks, in E, from heaven (Gen. xxi. 17, xxii. 11). The superhuman conception of the Deity is thus accentuated. Moses alone was dignified by direct divine communications (Num. xii. 6 *et seq.*). The chiefs of Israel in E are pictured by preference as prophets. Abraham is a "nabi" (Gen. xx. 7). Moses is the "'ebed Adonai" par excellence (Num. xii. 7); he is the "man of God" (Josh. xiv. 6). He mediates between the people and God (Num. xi. 2, xxi. 7). Justice and morality are highly valued in E (see the Decalogue and the Book of the Covenant). The elders are repeatedly mentioned as guardians of the right (Ex. iii. 16, 18; iv. 29; xvii. 5; xviii. 12; xix. 7; xxiv. 1–14). In E, however, sympathetic interest in sacerdotal institutions is also manifest (Ex. xxxiii. 7–11; Num. xii. 4). Tithes are historically accredited (Gen. xxviii. 22).

Locality and Epoch of E.

E belongs to the Northern Kingdom. Patriarchal biography is localized in the northern districts. Reuben is the magnanimous brother of Joseph (Gen. xxxvii. 22, 29; xlii. 37). Shechem plays a prominent rôle (Gen. xxxv. 4; Josh. xxiv.). Beth-el is recognized as a sanctuary (Gen. xxviii. 22). Some Aramaic expressions (חרות, Ex. xxxii. 16; חדה, Ex. xviii. 9; רפא, comp. Hosea v. 13, vi. 1, vii. 1) confirm the impression. Kuenen and Cornill distinguish a North-Israelitish Elohist and another of Judaic tendencies (E^1 and E^2; see Kuenen, "Historisch-Critisch Onderzoek," etc., § 13; Holzinger, *l.c.* p. 214; Cornill, "Einleitung in das Alte Testament," pp. 47–49).

By the earlier critics E was considered to antedate J; but after Wellhausen ("Gesch. Israels," i. 370 *et seq.*) had pleaded for the contrary view, his opinion was accepted by E. Meyer, Stade, and Holzinger, while Dillmann and Kittel continued to defend the former position. The date of E is thus variously given. E. Schrader makes him older than Hosea and later than Solomon and the building of the Temple. Dillmann assigns him to a period prior to the decline of the Northern Kingdom, that is, to the first half of the ninth century B.C. Kittel is virtually of the same opinion.

Kuenen assigns what he calls E^1 to 750 B.C.; E^2 to 650 B.C. Stade ("Geschichte des Volkes Israel," i. 58, 583) holds that E can not be older than 750 B.C. Lagarde regards 732 B.C. as the earliest possible date; but, following Steindorff's arguments based upon the Egyptian phrase "Ẓofnat Pa'neaḥ" (forms not occurring in Egyptian before the twenty-second dynasty, and becoming usual only after 663 and 609 B.C.), suggests 650 as the more nearly correct date. Cornill gives for E^2 650 B.C., and for E^1 750 B.C., the same as Kuenen.

J. E. G. H.

ELON. 1.—**Biblical Data:** The tenth judge of Israel. He was a Zebulonite, and succeeded Ibzan as judge. He judged Israel for ten years, when he died and was buried in Aijalon in the country of Zebulun (Judges xii. 11, 12). "Elon" (אֵילֹן) and "Aijalon" (אַיָּלֹן) differ merely in their vowels, and it is generally thought that they should be considered the same. The Septuagint renders both *Αἰλώμ*.

J. JR. C. J. M.

——**Critical View:** Elon is one of the five minor judges whose names are given together with a few statistics about them, but who are connected with no historical exploits. The others are Tola, Jair, Ibzan, and Abdon. Elon is, in Gen. xlvi. 14 and Num. xxvi. 26, a clan of the tribe of Zebulun. Since Tola and Jair are also clans; since Ibzan and Abdon, from the number of their posterity, are probably likewise; and since the narratives of the minor judges are late additions to the Book of Judges, it is probable that Elon is a personified clan and never had historical existence as a judge (compare Moore, "Commentary on Judges," pp. 270 *et seq.*, 310 *et seq.*, and Budde's Commentary to Judges, p. 78).

J. JR. G. A. B.

2. A Hittite; father of Esau's wife, Bashemath or Adah (Gen. xxvi. 34, xxxvi. 2).

3. One of the three sons of Zebulun; he was the ancestor of the Elonites (Gen. xlvi. 14; Num. xxvi. 26).

4. A city on the border of Dan (Josh. xix. 43). The place has not yet been positively identified. Some consider it the same as Elon-beth-hanan (I Kings iv. 9), which is mentioned as belonging to the second taxing district of Solomon, and according to Schick (in "Zeitschrift des Deutschen Palästina Vereins," x. 137), is identical with Khirbat Wadi Alin, east of 'Ain Shams. Elon-beth-hanan, on the other hand, is sometimes taken as representing two places (compare LXX. and Vulgate: the former has *καὶ 'Ελὼν ἕως Βηθανάν*; the latter, "et in Elon et in Bethanan"). In Josh. xix. 42 "Aijalon" (A. V. "Ajalon") occurs, and perhaps "Elon" in the next verse is a dittography, the two words having the same consonants (compare ELON, 1).

EL-PARAN. See ELATH.

ELSENBERG, JACOB: Polish teacher; born in 1817; died at Warsaw July 10, 1886. He was educated at the rabbinical seminary of Warsaw. Elsenberg devoted all of his time to the education of Jewish children, and he published many textbooks for beginners, which were introduced into the public and private schools of Warsaw. He was the first one to write in Polish a catechism of the Jewish religion and a prayer-book. He held the positions of secretary of the curator of the Warsaw public schools and of the trustees of the Reform synagogue of Warsaw.

H. R.

ELTEKEH or **ELTEKE:** One of the towns allotted to Dan, mentioned twice in Joshua—אלתקה (xix. 44) and אלתקא (xxi. 23). Eltekeh with its suburbs was given as a residence to the Kohathite Levites. This town, called in Assyrian "Al-ta-ḳu-u," was destroyed by Sennacherib on his way to Timnah and Ekron, after his defeat of the Egyptians (see Prism Inscription in Schrader's "K. A. T." 2d ed., pp. 171, 289, 292).

E. G. H. M. SEL.

ELVIRA: The ancient Illiberis; capital of the province of the same name, situated on a hill north-west of Granada, Spain, and now in ruins. It was the cradle of Spanish Christianity, and the seat of the celebrated Illiberian Council which first raised a barrier between Jew and Christian. This council, held not about 320, as Grätz thinks, but at the time of the persecutions under Diocletian, in 303 or 304, forbade Christians, on pain of excommunication, to intermarry with Jews or to have the produce of their fields blessed by Jews, to the end "that the blessing of the Church might not seem void or useless." They were also forbidden to eat or have any intercourse with Jews.

G. M. K.

ELYAS OF LONDON (also known as **Elyas le Evesk**): Presbyter of the Jews of England 1237-1257; died in London 1284. He succeeded AARON OF YORK, represented London at the so-called "Jewish Parliament" at Worcester in 1240, and in 1249 was allowed to have Abraham fil Aaron as his assistant. Henry III. exacted from him no less a sum than £10,000, besides £100 a year for a period of four years.

Elyas headed the deputation which asked the king's permission to leave the country in 1253. In 1255 he was imprisoned as a surety for the tallage of the Jews, and two years later he was deposed from office, being succeeded by his brother Hagin (Ḥayyim). In 1259, according to Matthew Paris, he was said to have been converted, and confessed to having prepared poison for certain of the English nobles; but in 1266 he was again treated as a Jew, and compensation to the amount of £50 was granted him for losses he had incurred during the Barons' war. He still remained one of the most important

Jews of London in 1277, being one of the few who were granted permission to trade as merchants though they were not members of the Gild Merchant. He appears to have been a physician of some note, for his aid was invoked by Jean d'Aresnes, Count of Hainault, in 1280, and he obtained permission to visit the count in that year ("R. E. J." xviii. 256 *et seq.*).

At Elyas' death an inquest made upon his estate declared him to be possessed of personal property to the value of 400 marks, and of houses of the yearly rental of 100 shillings. These his widow, Fluria, was permitted to retain on payment to the king of 400 marks. One of his houses appears to have been located on Sporier street, near the Tower, and at the expulsion in 1290 was granted to the prior of Chicksand.

Elyas was an expert in Jewish law, being summoned before the king to decide questions ("Select Pleas," etc., p. 86). A responsum of his is quoted in one of the manuscripts of the "Mordekai" (see A. Berliner, "Hebräische Poesien Meïrs aus Norwich," p. 3, London, 1887).

G. J.

ELYMAIS ('Ελυμαίς): Generally denoting the Persian province of Elam (עילם). It occurs in two places (I Macc. vi. 1; Josephus, "Ant." xii. 9, § 1) as the name of a rich city besieged by Antiochus Epiphanes. But the other historians who relate this event do not mention any town of this name. The existence of such a town has been denied, the name in I Macc. vi. 1 being explained (see Vaihinger in Herzog's "Real-Encyc." iii. 749) as a mistranslation of an original "be-'Elam ha-Medinah" (comp. Syriac and Arabic versions). On the Talmudical עלמין, identified with Elymais, see Neubauer, "Géographie du Talmud," p. 381.

E. G. H. M. Sel.

'ELYON. See God.

ELZAS, ABRAHAM: Minister and author; born in Elbergen, Holland, in 1835; died at Hull, England, 1880. He was educated in Holland, and went to England from Russia about 1867. He traveled extensively, visiting for scholastic purposes many parts of the world. In 1871 he removed from Leeds to Hull, and there became master of the Hebrew school, and for some years filled the post of minister to the congregation. Owing to failing health he was obliged to resign his positions in 1877. For some years previous to his death he was occupied in literary as well as scholastic pursuits; and he published translations of several books of the Bible, including "Proverbs," 1871; "The Book of Job," 1872; "Minor Prophets," 1873-80, with critical notes.

Bibliography: *Jewish World* (London), Aug. 6, 1880; *Hull and Lincolnshire Times*, Aug., 1880; Jacobs and Wolf, *Bibliotheca Anglo-Judaica*, Nos. 1957, 1960, 1963, London, 1888.

J. G. L.

ELZAS, BARNETT ABRAHAM: American rabbi; born at Eydtkuhnen, Germany, 1867; educated at Jews' College (1880-90), University College, London ("Hollier Scholar," 1886), and at London University (B.A., 1885). Elzas moved to Toronto, Canada (1890), where he entered the university and graduated (1893). He entered the Medical College of the State of South Carolina (1896), and graduated in medicine and pharmacy (1900-01).

His first ministerial charge was over the Holy Blossom synagogue, Toronto, Canada (1890); thence he went to Sacramento, Cal. (1893). In 1894 he accepted the call of the Beth Elohim congregation of Charleston, S. C., of which he is still the incumbent. Elzas published "The Sabbath-School Companion" (1895-96), to which he contributed a number of articles, which have been collected and reprinted under the title "Judaism: an Exposition," Charleston, 1896. He has recently (1903) printed pamphlets on "The History of K. K. Beth Elohim of Charleston" and "The Jews of South Carolina."

A. F. H. V.

EMADABUN (A. V. **Madiabun**): A Levite, and one of the overseers at the restoration of the Temple (I Esd. v. 58). Probably a mere doublet of "Eliadun," the name is omitted in the Vulgate and in the parallel passage (Ezra iii. 9).

E. G. H. E. I. N.

EMANATION (Hebrew, שפע, השפעה; in cabalistic literature, אצילות): The doctrine that all existing things have been produced not by any creative power, but as successive outflowings from the Godhead, so that all finite creatures are part and parcel of the Divine Being. This pantheistic doctrine, which was the basis of many Oriental religions and was professed by the Gnostics, attained its highest development in the Alexandrian Neoplatonic schools. By it the Neoplatonists endeavored to surmount the threefold difficulties involved in the idea of creation: (1) the act of creation involves the assumption of a change in the unchangeable being of God; (2) it is incomprehensible that the absolutely infinite and perfect could have produced imperfect and finite beings; (3) "creatio ex nihilo" is unimaginable. Avicenna introduced the doctrine of emanation into Arabic philosophy, and Jewish thinkers of the eleventh century, of whom the most authoritative representative was Ibn Gabirol, made it the basis of their speculations (see Ibn Gabirol).

According to Baḥya.

Baḥya, in his "Ma'ani al-Nafs," adopts a scale of emanation: the creating spirit; the universal soul, which moves the heavenly sphere; nature; darkness, which at the beginning was but a capacity for receiving form; the celestial spheres; the heavenly bodies; fire; air; water; earth ("Torat ha-Nefesh," ed. Broydé, pp. 70, 75; see Jew. Encyc. ii. 454, *s.v.* Baḥya ben Joseph.

With the development in the twelfth century of the pure Aristotelian Peripateticism the doctrine of emanation was abandoned by the Jewish philosophers. It was opposed not only by Judah ha-Levi, who was adverse to all philosophical speculations ("Cuzari," v. 14), but also by Abraham ibn Da'ud, who professed an unbounded admiration for the theories of Avicenna ("Emunah Ramah," p. 62). Maimonides, too, though attributing it to Aristotle, set forth many objections to it, and showed that it does not solve the difficulties inherent in the idea of creation.

Views of Maimonides.

"Aristotle holds that the first Intelligence is the cause of the second, the second of the third, and so on to the thousandth, if we assume a series of that number. Now, the first Intelligence is undoubtedly simple. How then can the complexity of existing things come from such an Intelligence by fixed laws of nature, as Aristotle assumes? We admit all he said concerning the Intelligences, that the farther they are away from the first the greater is their complexity, in consequence of the greater number of the things comprehended by each successive Intelligence; but even after admitting this, the question remains: By what law of nature did the spheres emanate from them?" ("Moreh," ii. 22).

But while rejected by Jewish philosophy, the doctrine of emanation became the corner-stone of the Cabala. The motive which led the cabalists to adopt it seems to have been, in addition to that furnished by the Neoplatonic conception of God, the necessity of assigning a definite place for the Sefirot in the production of the world, for in the "creatio ex nihilo" hypothesis they are superfluous. As early as the twelfth century appeared the cabalistic "Masseket Aẓilut," in which the doctrine was outlined. It was considerably developed in the thirteenth century by the Baḥirists, especially by Azriel. After having given the Neoplatonic reasons why the world could not have proceeded directly from God but must have been produced by intermediary agents, he expounds his doctrine of emanation, which differs from that of the Neoplatonists in that, instead of Intelligences, the Sefirot are the intermediaries between the intellectual and material world. The first Sefirah was latent in the En Sof (cabalistic term for "God") as a dynamic force; then the second Sefirah emanated as a substratum for the intellectual world; afterward the other Sefirot emanated, forming the intellectual, material, and natural worlds. The Sefirot are thus divided, according to their order of emanation, into three groups: the first three formed the world of thought; the next three the world of the soul; the last four the world of corporeality.

Isaac ibn Laṭif, although upholding the principle of the beginning of the world, still professes the doctrine of emanation of the Sefirot. The first immediate divine emanation is, according to him, the "first created," an absolutely simple Being, the all-containing substance of everything that is. A new element was introduced into the doctrine of emanation by the Ma'areket group. It was the principle of a double emanation. From the three superior spiritual Sefirot, which mark the transition from the purely spiritual to the material, proceed a positive and a negative emanation. All that is good comes from the positive; all that is evil has its source in the negative. This theory is highly developed in the Zohar.

EMANU-EL:

A weekly journal published in San Francisco, Cal. The first number was issued in May, 1895. Jacob Voorsanger is the editor. It is devoted especially to the interests of Jews and Judaism on the Pacific coast.

A. M. F.

G.

EMANUEL, LEWIS:

Secretary and solicitor to the Board of Deputies of British Jews; born at Portsmouth May 14, 1832; died in London June 19, 1898. He was educated at Ramsgate, and in 1853 was admitted to practise as a solicitor. He was a commissioner for oaths and affidavits for South Australia, New Zealand, and British Columbia, and in 1881 published a pamphlet on "Corrupt Practises at Parliamentary Elections."

His legal ability and communal zeal secured his election as secretary to the Board of Deputies in Jan., 1869. In the course of the thirty years during which he served the board he came to be completely identified with its interests. For nearly twenty years he took an active part in the work of the Jewish Board of Guardians, and was a member of the council of the Anglo-Jewish Association and of the committee of the Maccabæans' Club.

In politics Emanuel was a Liberal, was a member of the council of the Liberal Unionist Association, and took a leading part in the London Municipal Reform League.

J.

EMBDEN (EMDEN):

A family deriving its name, perhaps, from Emden, Germany. **Carl Adam Emden**, privy councilor and high bailiff of Prince Salm-Salm, was ennobled in 1791. It is probable that **Eleazar Solomon von Embden** (who lived in London about 1817) was a descendant of this family. Henry (Hertz) Heine (1774–1855) married Henriette Embden (1787–1868). See Heine; Schiff. The recent descendants of the family are as follows:

Moritz Embden (1790–1866) = in 1822 Charlotte Heine (1800–99), sister of the poet, daughter of Samson Heine (1764–1828) and Bette Heine, *née* van Geldern (1771–1859)
- Marie Embden (b. 1834) = in 1854 Michael, Prince de la Rocca d'Aspro (1827–89)
  - Carlo Maria, Prince de la Rocca (b. 1856) = 1890 Ida de le Torre-Lombardini
    - Michael Christoforo (b. 1891)
    - Maria Yvonne (b. 1896)
- ....Hirsch = Helen Embden
- Ludwig, Freiherr von Embden

In Paris there lives at present **Louis K. Emden**, who married Miss Van der Heym. There are also Von, or Van, Embdens to be found in Surinam, heirs of **J. G. van Embden** (**E.** and **A. J. van Embden**, wealthy planters: "Surinaamsche Almanak," 1899, 1900). The following were students at Leyden, Holland:

1609. **Philip ab Embden**, 25 years, jurisprudence.

Johannes Lævinus ab Embden, 21 years, jurisprudence.

1771. **Solomon von Embden,** 25 years, medicine. This is undoubtedly the above-mentioned Eleazar Solomon von Embden, who, therefore, must have been born in 1746.

There is also a family of the name of Emden in Frankfort-on-the-Main.

EMBDEN, CHARLOTTE. See HEINE, HEINRICH.

EMBDEN, ELEAZAR SOLOMON VON (Eliezer Leser Levi): German physician and traveler; born at Emrich, near Cleves, between 1770 and 1780; graduated at Frankfort-on-the-Oder in 1800. From 1804 to 1816 he lived in England; he then settled in Hamburg, and in 1838 returned to England. After amassing considerable wealth in Brazil he returned to Europe, and took up his residence in Altona. He was a contributor to Hufeland's "Journal of Practical Medicine," and published "The Continental Medical Repository" (Hamburg, 1817). With Isaac Metz he compiled a catalogue in Latin and Hebrew of the celebrated Oppenheim collection, under the title "Collectio Davidis" (Hamburg, 1826), to which Embden contributed the Latin part.

J. G. L.

EMBEZZLEMENT: The fraudulent conversion to one's own use of goods or money entrusted to one's care and control. The offense differs from theft in that in the latter the possession itself is unlawful.

The Mosaic law provides a penalty for embezzlement in a very restricted case. Lev. v. 20–26 (A. V. vi. 2–7) deals with several forms of dishonesty; *e.g.*, where a man denies to his neighbor goods or money entrusted to him, or something robbed or wrongfully withheld, or goods lost by his neighbor and found by him, and where he has, moreover, taken an oath to his false denial. He is then required to make restoration in full, to add one-fifth in value to the principal, and to bring, moreover, a ram without blemish as a guilt-offering to the priest, who thereupon shall make atonement, and the sin shall be forgiven.

The Mishnah treats this subject in Shebu. viii. It lays down these principles: (1) That where the voluntary or hired keeper, hirer, or borrower swears to an untrue statement as to the loss of the article, but is not liable on other grounds, he can not be punished in this way for the false oath. (2) That where he swears to a mode of loss which would exonerate him, but he has consumed the deposit (*e.g.*, eaten an ox), and this is established by witnesses, he is liable for the single value; but if he confesses, he pays the principal, with one-fifth in addition, and brings his guilt-offering. It is supposed that he confesses willingly, although it costs him more, in order to gain the promised forgiveness of his sin. (3) When the voluntary keeper swears to a cause of loss which would excuse him, and witnesses show that he stole the thing himself, he pays double as a thief; but if he confesses, he pays only the principal, with one-fifth in addition, and makes the guilt-offering. It must here be remarked that when the voluntary keeper seeks to excuse himself on the ground that the deposit has been stolen from him, and he is shown to have kept it for himself, he is treated as the thief, and is held to double payment, under Ex. xxii. 6. This is a case in which embezzlement is punished like theft. (4) When he swears to a cause of loss which would excuse him, and the loss arose from a cause which makes him liable, he pays the principal and one-fifth in addition, and makes the guilt-offering. (5) If he denies outright the loan or deposit under oath, he pays in like manner, though the loss may have arisen from a justifying cause. The matter is finally condensed in this form: He who changes (in his oath) from liability to liability, from excuse to excuse, or from excuse to liability, is free; but he who changes from liability to excuse is punishable. See BAILMENTS, for the modes of loss which excuse a bailee of one or the other kind, and for what losses he is liable.

S. S. L. N. D.

EMBROIDERY: Ornamental needlework on cloth, more frequently on linen, often executed in variegated colors and designs. Among the Egyptians and Assyro-Babylonians this art was highly developed, and Biblical texts make mention of the fact. The mantle that tempted Achan (Josh. vii. 21, 24) was of Babylonian make, *i.e.*, according to Josephus ("Ant." v. 1, § 10), embroidered in gold. Ezekiel speaks of embroidered byssus from Egypt (Ezek. xxvii. 7). If the chapters of Exodus relating the preparations for the Tabernacle and its erection are contemporaneous with the events narrated, proof is established that the Hebrews at an early period of their history had attained a high degree of skill in the embroiderer's craft. Wilkinson ("Manners and Customs of the Ancient Egyptians," ii. 166) sees adaptations of Egyptian models in the hangings of the Tabernacle (Ex. xxvi. 36, xxvii. 16, xxxvi. 37, xxxviii. 18) and in Aaron's coat and girdle (Ex. xxviii. 39, xxxix. 29). On the other hand, Delitzsch ("Babel und Bibel"), among others, assumes that in this and many other things the Babylonians must be regarded as the teachers of the Hebrews. At all events, in the early days of the Israelitish invasion and occupation of Canaan, embroidered cloth was valuable because rare enough to be coveted as booty in war (Judges v. 30).

In Hebrew three words are employed to connote the craft and the finished product: (1) "Tashbeẓ" and its derivative forms are used exclusively in Exodus (xxviii. 4) in connection with sacerdotal garments (A. V. "broidered"; R. V. "checkered"). The root also occurs in the description of the princess' dress, Ps. xlv. 14, where the R. V. has "inwrought with gold." In the Mishnah the root stands for smoothing and ornamenting wood or metal (Ḥul. 25a, b). (2) "Raḳam" (whence "riḳmah" and "roḳem") means to embroider in colors with the needle; to variegate (Judges v. 30; Ezek. xvi. 10, 13, 18; xxvi. 16; xxvii. 7, 16 [comp. Cornill, "Ezekiel," text]; Ps. xlv. 15). It is used also of the colors of feathers (Ezek. xvii. 3) and of stones

(I Chron. xxix. 2). In the Targum the derivative noun רקמתא stands for colored dots; while in Syriac תרקמתא means "freckles." "Roḳem" is the name of the craftsman (Ex. xxvi. 36), generally associated with (3) "ḥashab" (whence "ḥosheb"; R. V. "the cunning workman"). According to Yoma 72b, "ḥosheb" designates the designer of the colored pattern, which the roḳem followed and executed with the needle. But R. Nehemiah is probably more exact in saying that the roḳem works with the needle, and hence variegates only one side of the fabric; while the ḥosheb is a weaver who works his pattern on both sides (see Ḳimḥi to Judges v. 30; *idem*, in "Sefer ha-Shorashim," *s.v.* רקמה; Moore, "Judges," p. 171, with reference to Judges v. 30).

Figuratively, "raḳam" is used both in the Bible (Ps. cxxxix. 15) and in later Hebrew (Yer. Beẓah i. 60a; Lev. R. xxix.; Niddah 24b) for the forming of the embryo, undoubtedly because the veins and arteries give it the appearance of an embroidered pattern.

E. G. H.

EMBRON FAMILY, THE. See AMBRON.

EMBRYO (עובר): The young of a mammal while still connected with the body of its mother. The child "en ventre sa mere" of English law was a subject of dispute between the ancient and the new Halakah, the former considering it a separate living being, and the latter as only a part or a limb of its mother. The view of the ancient Halakah was subsequently followed by the Samaritans and Karaites, while the new Halakah was represented mostly by the Pharisees and Rabbinites, though there is reason to believe that the school of Shammai, known for its conservative tendencies, tried to carry out the tradition of the old Halakah. But apparently even the Rabbinites were not always consistent. This controversy concerned mostly ritual questions, as, for instance, whether the embryo is qualified as permitted food in the slaughtering of the cow. According to the ancient Halakah, which considers it as an independent being by itself, it would require special slaughtering, and, as this is impossible, all embryos are therefore forbidden for food. The point would also concern the criminal law, as in the case of a man causing the death of the embryo by injuring its mother. According to the old Halakah he would be considered as a murderer; according to the new he would only be treated as a man injuring a limb. Another instance would be the execution of a pregnant woman condemned to death by the court. According to the first view the execution could not take place until the child was born; according to the latter, the embryo, as part of her being, has to suffer by the death of the mother. With regard to civil questions it is considered as a living child in some cases, but not in all.

The still-born child does not inherit from its mother, so as to transmit her inheritance to its brothers on the father's side. But if the child lives but an hour after the mother, it does transmit her inheritance.

It is doubtful whether a gift or legacy to an unborn child can be made valid at all. It is admitted that if the words of the gift or legacy are "in præsenti" it does not take effect, as the child "en ventre" is incapable of receiving a benefit; if the words are: "When such a woman gives birth, I give to the child," it is still disputable, unless the embryo is the child of the giver himself, in which case the gift or legacy is valid.

The child unborn at the father's death, but coming to life afterward, does not diminish the share of the first-born son. This position of the Talmud (B. B. 142a, b) is illustrated by Rashbam (who here takes Rashi's place) thus: If Jacob, dying, leaves 120 minas of silver and two sons—Reuben (first) and Simeon (second)—and his wife is afterward delivered of a third son, Levi, Reuben gets one-third of the whole (= 40 minas) and one-third of the remainder; that is, he receives altogether 66⅔ minas; the remaining 53⅓ minas are divided equally between Simeon and Levi, who each receive 26⅔ minas. Should Levi die afterward, Reuben would get one, third of the whole (= 40 minas) plus one-half the remainder; that is, Reuben and Simeon would have respectively 80 and 40 minas, just as if Levi had not been born.

As has been mentioned under AGNATES, a posthumous first-born son does not receive a double share.

S. S. L. N. D.

EMDEN: Prussian maritime town in the province of Hanover. It is not known when Jews first settled there. In the sixteenth century David Gans mentions ("Ẓemaḥ Dawid," 1581, ii.) Jews at Emden. In the letter of complaints (March 9, 1590) against Count Edzard I. and "the magistrate," addressed by the citizens of Emden to the imperial commissioners, who had come to Emden to settle the difficulties between the sovereign and his subjects, the citizens included as a grievance the fact that the Jews were permitted the public exercise of their religion, and that they wore no distinctive badge. The commissioners dismissed this complaint, and the Jews continued in the city as heretofore. Enno's son, Ulrich II., received Jews at his court; and once a Jewish couple was married by a rabbi in the presence of the whole court. This aroused the ire of a zealous Lutheran clergyman, Walther, who expressed himself as follows: "In the presence of 100 devils one pair of devils has been coupled by an elderly devil; people have no regard either for God or for myself." In the memoirs of Glückel of HAMELN (1645–1719) mention is made of a rabbi of Frisia, of David Hanau, and of other Jews of Emden. In 1744 Emden, with East Friesland, became part of Prussia, and the Jews in these districts came under Prussian regulations. At that time the yearly sum paid for protection by the Jews of East Friesland amounted to 776 thalers; in Emden itself the regularly protected Jew had the right to bequeath this protection to one son, on payment of 80 thalers.

On May 30, 1762, there was an uprising against the Jews of Emden, who were accused of having caused the depreciation of the coinage; and the magistrate did not succeed in dispersing the mob until the houses of four of the most wealthy Jews had been destroyed, though not sacked. After the peace of Tilsit, in 1807, Napoleon incorporated East Friesland with the kingdom of Holland, under his brother Louis Bonaparte, who freed the Jews from their restrictions and granted them (Feb. 23, 1808) the same rights and privileges as the Jews of France—that is, equal citizenship. Heavy payments for protection were no longer exacted.

Under French Protection.

At that time there were about 1,364 Jews in the Emden arrondissement. Of that number there were not more than 500 in the city of Emden, and of these about 100 were in indigent circumstances. After the consistorial organization of the six new districts under the central consistory of Paris in 1811, Emden became the seat of the synagogue for the departmental localities of Oester-Ems (1,500 Jews), Wesermündungen (1,129), and Oberems (1,076).

After the wars of liberation, Emden came under the dominion of the kings of Hanover, and the Jews were thrown back under former conditions, from which they were not liberated until 1842. Since 1866 Emden, with Hanover, has belonged to Prussia. The community of Emden numbered in 1902 about 900.

Emden has been for centuries the home of famous rabbis. The following may be mentioned: Menahem b. Jacob ha-Kohen; Moses Simon b. Nathan ha-Kohen (d. 1668); Simon ha-Kohen (d. 1725); Jacob Emden; Abraham b. Jacob (d. 1758); Abraham Moses Kelmy ha-Levi; Baruch Köslin; Meïr Glogau b. Aaron (d. 1809); Abraham b. Aryeh Löb b. Ḥayyim Löwenstamm; Samson Raphael Hirsch (1841–47); Hermann Hamburger (d. 1870); P. Buchholz (d. 1892); Dr. Löb, district rabbi of Emden, in 1902.

A magistrate of Emden is credited with granting, in 1649, privileges to Portuguese Jews, which were renewed in 1703, and in virtue of which they became full citizens. Among the Portuguese at Emden may be mentioned the physician Abraham German (1752), formerly living at Amsterdam; Isaac van der Hock (1753); Isaac de Lemos (1765); and Isaac Aletrino (1782). They were favorably received in the town, because, as the magistrate declared, "People of this kind are useful, and even indispensable, for carrying on the West-Indian trade." Four Jews of Emden are mentioned among those who attended the fair at Leipsic in 1690, and a larger number are mentioned in the responsa of Jacob Emden (Responsa, ii., Nos. 24 *et seq.*) and in his autobiography ("Megillat Sefer," ed. Kahana, pp. 219 *et seq.*).

D. A. Lew.

EMDEN, HERMANN SELIGMANN: German engraver and photographer; born at Frankfort-on-the-Main Oct. 18, 1815; died there Sept. 6, 1875. Early evincing a love for art and unable to afford an academic education, he entered an engraving and lithographic establishment as an apprentice, endeavoring especially to perfect himself in the artistic side of his work. In 1833 he left Frankfort and went to Hersfeld, Darmstadt, and Bonn. His portrait-engraving of Pope Pius IX. and his views of Caub, Bornhofen, and the Maxburg belong to this period. He also turned his attention to photography, then in its infancy, and was one of the first to establish a studio at Frankfort-on-the-Main. He made his reputation as photographer by the work "Der Dom zu Mainz und Seine Denkmäler in 36 Originalphotographien," to which Lübke refers several times in his "History of Art." Emden was the first to compose artistic photographic groups ("Die Rastatter Dragoner," "Die Saarbrücker Ulanen," etc.), and was also among the first to utilize photography for the study of natural science.

S. A. W.

EMDEN, JACOB ISRAEL BEN ẒEBI ASHKENAZI (Ya'ABeẒ); officially called **JACOB HERSCHEL**: German Talmudist and anti-Shabbethaian; born at Altona June 4, 1697; died there April 19, 1776. Until seventeen Emden studied Talmud under his father, known as "Ḥakam Ẓebi," first at Altona, then (1710–14) at Amsterdam. In 1715 he married the daughter of Mordecai ben Naphtali Kohen, rabbi of Ungarish-Brod, Moravia, and continued his studies in his father-in-law's yeshibah. Emden became well versed in all branches of Talmudic literature; later he studied philosophy, Cabala, and grammar, and made an effort to acquire the Latin and Dutch languages, in which, however, he was seriously hindered by his belief that a Jew should occupy himself with secular sciences only during the hour of twilight. He was also opposed to philosophy, and maintained that the "Moreh" could not have been written by Maimonides ("Mitpaḥat Sefarim"). He spent three years at Ungarish-Brod, where he held the office of private lecturer in Talmud. Then he became a dealer in jewelry and other articles, which occupation compelled him to travel. He generally declined to accept the office of rabbi, though in 1728 he was induced to accept the rabbinate of Emden, from which place he took his name.

In 1733 he returned to Altona, where he obtained the permission of the Jewish community to possess a private synagogue. Emden was at first on friendly terms with Moses Ḥagis, the head of the Portuguese community at Altona, who was afterward turned against Emden by some calumny. His relations with Ezekiel Katzenellenbogen, the chief rabbi of the German community, were strained from the very beginning. Emden seems to have considered every successor of his father as an intruder. A few years later Emden obtained from the King of Denmark the privilege of establishing at Altona a printing-press. He was soon attacked for his publication of the "Siddur 'Ammude Shamayim," being accused of having dealt arbitrarily with the text. His opponents did not cease denouncing him even after he had obtained for his work the approbation of the chief rabbi of the German communities.

Emden-Eybeschütz Controversy.

Emden is especially known for his controversial activities, his attacks being generally directed against the adherents, or those he supposed to be adherents, of Shabbethai Ẓebi. Of these controversies the most celebrated was that with Jonathan Eybeschütz, who in Emden's eyes was a convicted Shabbethaian. The controversy lasted several years, continuing even after Eybeschütz's death. Emden's assertion of the heresy of his antagonist was chiefly based on the interpretation of some amulets prepared by Eybeschütz, in which Emden professed to see Shabbethaian allusions (see Eybeschütz, Jonathan). Hostilities began before Eybeschütz left Prague; when Eybeschütz was named chief rabbi of the three communities of Altona, Hamburg, and Wandsbeck (1751), the controversy reached the stage of intense and bitter antagonism. Emden maintained that he was at first prevented by threats from publishing anything against Eybeschütz. He solemnly declared in his synagogue the writer of the amulets to be a Shabbethaian heretic and deserving of excommunication.

The majority of the community favoring Eybeschütz, the council condemned Emden as a calumniator. People were ordered, under pain of excommunication, not to attend Emden's synagogue, and he himself was forbidden to issue anything from his press. As Emden still continued his philippics against Eybeschütz, he was ordered by the council of the three communities to leave Altona. This he refused to do, relying on the strength of the king's charter, and he was, as he maintained, relentlessly persecuted. His life seeming to be in actual danger, he left the town and took refuge in Amsterdam (May, 1751), where he had many friends and where he joined the household of his brother-in-law, Aryeh Löb b. Saul, rabbi of the Ashkenazic community. Emden's cause was subsequently taken up by the court of King Frederick of Denmark, and on June 3, 1752, a judgment was given in favor of Emden, severely censuring the council of the three communities and condemning them to a fine of one hundred thalers. Emden then returned to Altona and took possession of his synagogue and printing-establishment, though he was forbidden to continue his agitation against Eybeschütz. The latter's partizans, however, did not desist from their warfare against Emden. They accused him before the authorities of continuing to publish denunciations against his opponent. One Friday evening (July 8, 1755) his house was broken into and his papers seized and turned over to the "Ober-Präsident," Von Kwalen. Six months later Von Kwalen appointed a commission of three scholars, who, after a close examination, found nothing which could inculpate Emden.

Emden was undoubtedly very quick-tempered and of a jealous disposition. The truth or falsity of his denunciations against Eybeschütz can not be proved, but the fact remains that he quarreled with almost all his contemporaries. He considered that every man who was not for him was against him, and attacked him accordingly. Still, he seems to have enjoyed a certain authority, even among the Polish rabbis, the majority of whom sided with Eybeschütz, and had once even excommunicated Emden upon the initiative of Ḥayyim of Lublin (1751). Thus in 1756 the members of the Synod of Constantinov applied to Emden to aid in repressing the Shabbethaian movement. As the Shabbethaians referred much to the Zohar, Emden thought it wise to examine that book, and after a careful study he concluded that a great part of the Zohar was the production of an impostor (see "Miṭpaḥat Sefarim").

Emden's works show him to have been possessed of critical powers rarely found among his contemporaries, who generally took things for granted. He was strictly Orthodox, never deviating the least from tradition, even when the difference in time and circumstance might have fairly been regarded as warranting a deviation from the old custom. In 1772 the Duke of Mecklenburg-Schwerin having issued a decree forbidding burial on the day of death, the Jews in his territories approached Emden with the request that he demonstrate from the Talmud that a longer exposure of a corpse would be against the Law. Emden referred them to Mendelssohn, who had great influence with Christian authorities; but as Mendelssohn agreed with the ducal order, Emden wrote to him and urged the desirability of opposing the duke if only to remove the suspicion of irreligiousness he (Mendelssohn) had aroused by his associations.

Emden was a very prolific writer; his works fall into two classes, polemical and rabbinical. Among the former are:

Torat ha-Ḳena'ot, a biography of Shabbethai Ẓebi, and criticisms of Nehemiah Ḥayyon, Jonathan Eybeschütz, and others. Amsterdam, 1752.

His Works.

'Edut be-Ya'aḳob, on the supposed heresy of Eybeschütz, and including Iggeret Shum, a letter to the rabbis of the "Four Lands." Altona, 1756.

Shimmush, comprising three smaller works: Shoṭ la-Sus and Meteg la-Hamor, on the growing influence of the Shabbethaians, and Shebeṭ le-Gew Kesilim, a refutation of heretical demonstrations. Amsterdam, 1758-62.

Shebirat Luḥot ha-Awen, a refutation of Eybeschütz's "Luḥot 'Edut." Altona, 1759.

Seḥoḳ ha-Kesil, Yeḳeb Ze'eb, and Gat Derukah, three polemical works published in the "Hit'abbeḳut" of one of his pupils. Altona, 1762.

Ḥereb Pifiyyot, Iggeret Purim, Teshubot ha-Minim, and Zikkaron be-Sefer, on money-changers and bankers (unpublished).

His rabbinical works include:

Leḥem Shamayim, a commentary on the Mishnah, with a treatise in two parts, on Maimonides' "Yad," Bet ha-Beḥirah. Altona, 1728; Wandsbeck, 1733.

Iggeret Biḳḳoret, responsa. Altona, 1733.

She'elat Ya'abeẓ, a collection of 372 responsa. Altona, 1739-59.

Siddur Tefillah, an edition of the ritual with a commentary, grammatical notes, ritual laws, and various treatises, in three parts: Bet-El, Sha'ar ha-Shamayim, and Migdal 'Oz. It also includes a treatise entitled Eben Boḥan, and a criticism on Menahem di Lonzano's "'Abodat Miḳdash," entitled Seder Abodah. Altona, 1745-48.

'Eẓ Abot, a commentary to Abot, with Leḥem Neḳudim, grammatical notes. Amsterdam, 1751.

Sha'agat Aryeh, a sermon, also included in his Ḳishshurim le-Ya'aḳob. Amsterdam, 1755.

Seder 'Olam Rabbah we-Zuṭa, the two Seder 'Olam and the Megillat Ta'anit, edited with critical notes. Hamburg, 1757.

Mor u-Ḳeẓi'ah, novellæ on the Oraḥ Ḥayyim, in two parts: the first part, Miṭpaḥat Sefarim, being an expurgation of the Zohar; the second, a criticism on "Emunat Ḥakamim" and "Mishnat Ḥakamim," and polemical letters addressed to the rabbi of Königsberg. Altona, 1761-68.

Ẓiẓim u-Feraḥim, a collection of cabalistic articles arranged in alphabetical order. Altona, 1768.

Luaḥ Eresh, grammatical notes on the prayers, and a criticism of Solomon Hena's "Sha'are Tefillah." Altona, 1769.

Sha'are 'Azarah. Altona, 1776.
Dibre Emet u-Mishpaṭ Shalom (n. d. and n. p.).

His unpublished rabbinical writings are the following:

Ḳishshurim le-Ya'aḳob, collection of sermons.
Ẓa'aḳat Damim, refutation of the blood accusation in Poland.
Halakah Pesuḳah.
Hilketa li-Meshiḥa, responsum to R. Israel Lipschütz.
Mada'ah Rabbah.
Gal-'Ed, commentary to Rashi and to the Targum of the Pentateuch.
Em la-Binah, commentary to the whole Bible.
Em la-Miḳra we la-Masoret, also a commentary to the Bible.
Marginal novellæ on the Talmud of Babylon.
Megillat Sefer, containing biographies of himself and of his father.

Emden also annotated the following works: Saadia Gaon's "Sefer ha-Pedut we ha-Purḳan"; Elijah Levita's "Meturgeman"; Estori Farḥi's "Kaftor u-Feraḥ"; Caro's "Kereti u-Feleti"; Isaac b. Judah ha-Levi's "Pa'aneaḥ Raza"; Isaac Abravanel's "Rosh Amanah"; Maimonides' "Iggerot"; Moses Graf's "Wayaḳhel Mosheh"; Benjamin Musafia's "Musaf he-'Aruk." Wagenaar, in his "Toledot Ya'abeẓ" attributes to Emden the cabalistic "Maḥnayim."

EMERALD. See Gems.

EMET WE-YAẒẒIB: The initial words of the morning benediction following the Shema' and closing with the Ge'ullah ("Redemption"). Recited by the priests after the Shema' in the morning service in the Temple hall, "lishkat ha-gazit" (Tamid v. 1), it has retained its place in the service ever since, and the rule afterward was made not to interrupt the connection between the last two words of the third portion of the Shema', the chapter on ẓiẓit, and "emet," as if the words, "the Lord your God"—"is true," formed one sentence (comp. Jer. x. 10; Ber. ii. 2; 14a, b). Zunz ("G. V." p. 383) thinks the original benediction contained only forty-five words, but the fact that it had the name "Emet we-Yaẓẓib" in the earliest times upsets his theory of the original simplicity of the benediction. The first sentence, "True and firm, established and enduring, right and faithful, beloved and precious, desirable and pleasant, revered and mighty, well ordered and acceptable, good and beautiful [a strange mixture of Hebrew and Aramean words], is Thy word unto us forever and ever," refers to the Shema' as a solemn profession of the unity of God. This is followed by two other sentences, beginning with "Emet," referring possibly to the two other sections of the Shema', while the other sentences beginning with "Emet"—the German liturgy has three, the Sephardic five—are addressed to God, and lead on to the idea of God as Redeemer.

That the "Emet we-Yaẓẓib" should contain references to God's kingdom, to the redemption of Israel from Egypt, and to the wonders of the Red Sea, is a rule made as early as the tannaitic time (Tosef., Ber. ii. 1; Yer. Ber. i. 3d). Zunz (*l.c.*) assigns the latter part, describing in poetic and partly alphabetic-acrostic form the wonders of divine redemption, to payyeṭanim of the geonic age. The tone, however, of exuberant joy at Israel's redemption, the accentuation of the "humble," and the special reference to the Song of Moses as the hymn of "great rejoicing," indicate a Ḥasidean origin (comp. Philo, "De Vita Contemplativa"; Rev. xv. 3). Still, the concluding formula was not fixed before the geonic time (see Zunz, *l.c.*; Rapoport, "Kalir," p. 146; Liturgy).

EMIGRATION. See Migration.

EMIM ("terrible ones"): A name applied (Deut. ii. 10) to the original inhabitants of Moab, though the Septuagint reads for it 'Ομμίν. The name is used (Gen. xiv. 5) to designate also the inhabitants of the plain of Kirjathaim. Here the Septuagint calls them 'Ομμᾶιοι, but in both passages the Vulgate supports the Hebrew text.

They are described (Deut. *l.c.*) as the former possessors of the land, and are said to be "a people great, and many, and tall, as the Anakim, which also were accounted Rephaim" (A. V. "giants").

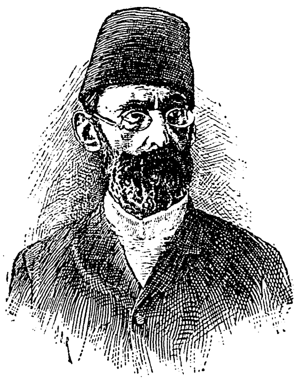
Kirjathaim, with which they are connected in Gen. *l.c.*, was north of the Arnon, among the towns taken by the tribe of Reuben (Num. xxxii. 37; Josh. xiii. 19; and G. A. Smith, "Historical Geography of the Holy Land," pp. 567, note 1; 568, note 1). It is now called "Ḳureyat."

The name "Emim" was probably given in consequence of the terror inspired by these better-nourished inhabitants, who, to the underfed, undersized men of the desert, seemed giants.

J. JR. G. A. B.

EMIN PASHA (EDUARD CARL OSCAR THEODOR SCHNITZER): German explorer; born at Oppeln, Prussian Silesia, March 28, 1840; killed at Kinena Station, Kongo Free State, Oct. 23 or 24, 1892. When he was only two years old his parents moved to Neisse, where in 1846 the boy was baptized into the Protestant Church. After finishing his studies at the Neisse gymnasium, he studied medicine at Breslau, Königsberg, and Berlin, passing the M.D. examination in 1864. From childhood it was his ambition to travel. This desire had such a strong hold on him that he left the university in 1864 before passing his state examination, and went to England, then to Italy, and finally to Turkey. In 1865 he was appointed quarantine medical officer at Antivari near Constantinople, which position he held for four years. In 1870 he became physician to Hakki Ismail Pasha, after whose death he paid (1874) a brief visit to his home, and, traveling through Germany, Austria, and Italy, went to Egypt. He arrived in Khartum Dec. 3, 1875, joined Gordon Pasha, then governor of the Equatorial Provinces, at Lado, became his physician, taking the name of "Emin," and was often entrusted with responsible political and administrative duties. When Gordon became governor-general of the Sudan, he appointed Emin Bey governor of the Equatorial Provinces (1878).

Emin explored and inspected his province with indefatigable zeal. In the meantime the Mahdi uprising had begun, and Rauf Pasha, the successor of Gordon, had himself been succeeded by Abd el-Kader in 1882. In the spring of that year Emin Bey went to Khartum. Returning to Lado, he found that the rebellion had spread to his province. He had endeavored to keep control of Equatoria, but the successes of the Mahdi made it increasingly difficult. In 1883 the last steamer with merchandise and news arrived from Khartum. In 1885 Khartum fell and Gordon was slain. Emin was forced to retire to Wadelai. Rebellion broke out in his own camp, and in 1886 he received the news officially that the Egyptian government had abandoned the Sudan. Emin Pasha was given "unlimited freedom of action, and permission to retreat upon English territory, if necessary." For the following two years news from Emin was scanty, but he still held his province and cared for it as best he could.



Emin Pasha.

After Gordon's death, interest in the Mahdi uprising centered around Emin Pasha, and men like Wilhelm Junker, Karl Peters, Dr. Schweinfurth, and Stanley projected relief expeditions. In 1887 Stanley was sent out from England. After many dangerous adventures he met Emin Pasha at the southwest corner of the Albert Nyanza on April 29, 1888. A German relief expedition under Karl Peters had been started, but was abandoned when the news from Stanley was received. Stanley's arrival in Africa had changed Emin Pasha's position greatly. Emin himself had no intention of leaving his province and being relieved. When the news of Stanley reached Emin's soldiers, an uprising took place, and the pasha was made a prisoner by his own men, who did not wish to leave Equatoria, or to be left without their chief. Finally, Emin consented to follow Stanley. On Dec. 4, 1889, he arrived at Bagamoyo and was received with great honor, but had the misfortune to meet with an accident which changed his plans entirely. In March, 1890, he entered the German service to conduct an exploring expedition to the Victoria Nyanza. The expedition was not very successful. Emin Pasha disobeyed instructions, and was therefore recalled by the German governor Wissmann. Emin, however, pushed onward, leaving German territory and marching upon the territory of the Kongo Free State. He entered his old province, but, turning southwest, marched through the Kongo Free State toward the Kongo. Again the news from Emin became scanty, till in October, 1892, Arabs brought information to the coast that the pasha had been assassinated.

Emin was an accomplished linguist, a scientific explorer, and an able organizer and diplomat. He added greatly to the knowledge then existing of the ornithology, ethnography, and meteorology of equatorial Africa.

Emin has left several well-kept diaries, and he contributed to various journals and periodicals.

EMISSARY. See AGENCY, LAW OF; ATTORNEY.

EMMANUEL. See IMMANUEL.

EMMAUS (Ἐμμαῦς, Ἀμμαῦς, Ἐμμαῦμ; probably transcriptions of חמת = "warm [springs]"): Name of three places in Palestine. **1.** A town, or place, memorable for the defeat of Gorgias by Judas Maccabeus (I Macc. iii. 40), situated in southern Judea, 22 miles, or 176 stadia, from Jerusalem. Its inhabitants were sold as slaves by Cassius (Josephus, "Ant." xiv. 11, § 2; "B. J." i. 11, § 2); but, through the exertions of Hyrcanus, they were freed by Marcus Antonius ("Ant." xiv. 12, § 2). Afterward Emmaus became a Jewish toparchy, the general of which was John the Essene ("B. J." ii. 20, § 4). Burned (*c.* 4 C.E.) by the Roman general Varus, it was rebuilt about 220 by Julius Africanus, receiving the name of "Nicopolis." It is known at present as "Amwas," south-southeast from Lydda. Emmaus is frequently mentioned in the Talmud and Midrash. The spelling varies—אמאום, עמאום, עמים, עמאום, and אמאום. It is stated (Eccl. R. vii. 7) that after the death of R. Johanan b. Zakkai all his disciples remained at Jabneh, with the exception of Eleazar b. 'Arak, who went to Emmaus because it was a healthful place with fresh water. Certain Talmudic doctors held discussions there (Mak. 13a; Ker. 15a). Two noble families are mentioned at Emmaus, whose daughters were married to priests ('Ar. ii. 5).

2. A small place in Galilee, between Tiberias and Gadara, the Talmudic חמה, חמתה, חמתן דטבריה, and חמתן דגדר, once written עמתן (Yer. 'Er. v. 22d; Tosef., 'Er. p. 146, 5; M. Ḳ. iii. 82; Sheb. ix. 38). It is spoken of by Josephus ("Ant." xviii. 2, § 3) as Ἀμμαθοῦς, and ("B. J." iv. 1, § 3) as being colonized by Vespasian.

3. A village 7½ miles, or 60 stadia, from Jerusalem; mentioned by Luke (xxiv. 13); it has been identified by Eusebius and Jerome with Emmaus-Nicopolis.

EMPEDOCLES OF AGRIGENTUM: Greek philosopher and disciple of Pythagoras; flourished in the fifth century B.C.

Empedocles' system, modified by the Neoplatonic school, entered into Arabic philosophy, and found exponents among the Jewish philosophers of Spain of the eleventh and twelfth centuries. A certain Mohammed ben Abdallah ibn Masarrah, at the beginning of the tenth century, brought from the Orient to Spain divers works wrongly attributed to Empedocles.

The most renowned representative of the pseudo-Empedocles' system among Jewish philosophers was Ibn Gabirol. Universal matter, embracing all simple and composite substances, to which the immediate action of the will of God was confined, forms the basis of his "Meḳor Ḥayyim"; and Shem-Ṭob, its Hebrew translator, expressly says that Gabirol expounded therein the theories contained in Empedocles' "On the Quintessence" (Munk, "Mélanges de Philosophie Juive et Arabe," p. 3). Moses ibn Ezra, in his "'Arugat ha-Bosem" ("Zion," ii. 134), cites the opinion of Empedocles to the effect that attributes can not be ascribed to God. Judah ha-Levi, in the "Cuzari" (iv. 358, v. 406), mentions several times the school of Empedocles, which he criticizes, as he does also those of the other philosophers. Joseph ibn Ẓaddiḳ ("'Olam Ḳaṭan," p. 52) recommends the works of Empedocles on the primal will; while Maimonides ("Pe'er ha-Dor," p. 28b), as a pure Aristotelian, advises Ibn Tibbon not to waste his time on the works of Empedocles.

Many traces of Empedocles' teachings are found in the Cabala. The divine principle of love, which plays so great a part in his system, is emphasized in the Zohar. "In love," says the Zohar, "is found the secret of divine unity; it is love that unites the higher and lower stages, raising the lower to the level of the higher, where all must be one" (Zohar, Wayaḳhel, ii. 216a; see Jew. Encyc. iii. 476, *s.v.* Cabala).

EMPEREUR, CONSTANTIN L', OF OPPIJCK: Professor of theology and Oriental languages; born at Bremen July, 1591; died at Leyden July 1, 1648. His father, Antonius Cæsar, driven from his native country by religious persecution, went to Holland. Constantin graduated in 1619, and in the same year became professor of theology and Oriental languages at the University of Harderwijk, where he remained for eight years.

In 1627 he was called to the University of Leyden, where a chair of Christian polemics had been established under the title "controversarium Judaicarum professor." In instituting this chair the university had two aims in view: to defend the Christian religion against the attacks of the Jews, and to convert Jews to Christianity. Constantin discharged his duties, which were rather those of a missionary than of a professor, with much tact and moderation, always avoiding aggressiveness.

Constantin published the following works: "Erpenii Grammatica Chaldæica, Syra et Æthiopica; Talmudis Babylonici Codex Middoth," Amsterdam, 1628; "Sjomari Lyra Davidis," Leyden, 1628; "Tractatus Middot, sive de Mesura Templi," *ib.* 1630; "Abrabanelis et Aliorum Commentatio in Jesaicum" (Hebrew and Latin), *ib.* 1631; "Moses Kimchi Introductio ad Scientiam," etc., *ib.* 1631; "Josephi Jachiadæ Paraphrasis in Danielem," Amsterdam, 1633; "Itinerarium Benjaminis a Tudela" (Hebrew and Latin), Leyden, 1633; "Clavis Talmudica, Completens Formulas, Loca Dialectica et Rhetorica Priscorum Judæorum," *ib.* 1634; "De Legibus Ebræorum Forensibus," *ib.* 1637; "Disputationes Theologicæ Hardervicenæ sive Systema Theologicum," *ib.* 1648; "B. C. Bertramus, de Republica Ebræorum," *ib.* 1651.

EMPLOYER AND EMPLOYEE. See Master and Servant.

EMRICH, SOLOMON BEN GUMPEL: Dayyan of Prague in the second half of the eighteenth century. He was the author of a work called "Shishshah Zir'one 'Arugah," six discussions in regard to ritual laws, one of them being with Ezekiel Landau about the law of "ḥaliẓah" (Prague, 1789). The three initials of the title of this work, שז"ע, are also the initials of the author's name, "Shelomoh Zalman Emrich."

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 612; Fürst, *Bibl. Jud.* i. 245.

K. M. Sel.

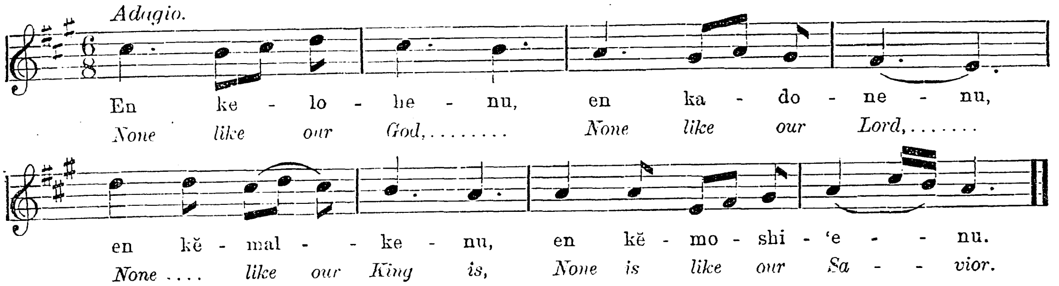
EN KELOHENU (אין כאלהינו): Ancient hymn, familiar from its occurrence in immediate succession to the Additional Service (Musaf) at festivals, and in many liturgies on Sabbaths also. To the four titles, "our God," "our Lord," "our King," "our Savior," are successively prefixed, with the necessary particles, words the initials of which spell out the acrostic אמן ("Amen"). Two succeeding verses commence similarly with the words "Baruk" (Blessed) and "Attah" (Thou), which are the beginning of the formula of every benediction (compare Jewish Encyclopedia, iii. 10). To make up an even number of verses there is added by the Sephardim a Biblical reference to desolate Zion; by the Ashkenazim, a reference to the incense, which is the subject of the Talmudical reading following the hymn.

A parallel to the "En Kelohenu" is found in the "Sefer Hekalot," whence it was probably taken (compare Jellinek, "Bet ha-Midrash," ii. 74 and iii. 86). It seems that originally the hymn began with "Mi Kelohenu," as found in Siddur R. Amram. It had its present form, however, as early as the time of Rashi, who pointed out the existence of the acrostics "Amen," "Baruk," "Attah" ("Shibbole ha-Leḳeṭ," pp. 1a and 31a, also "Roḳeaḥ," § 319).

For the reasons alluded to in the case of the hymn Adon 'Olam, every composer of synagogal melody has prepared settings of "En Kelohenu." Among the Ashkenazim, however, it is often read silently by the congregation. The Sephardim employ the traditional melody (A) given on p. 155; as in the case of others of their old tunes, it is utilized also for the Hallel.

"En Kelohenu" was often employed as a table-hymn (Zemirah) to be sung before the grace after meals on the Sabbath and festivals. A quaint example of this usage is preserved in "Der Jude" of the convert Gottfried Selig (1769), where (ii. 98) it is given as "an instance of the Jewish mode of singing." Birnbaum concludes that this expression can not be taken literally, since the melody as transcribed contains notes much too high for accurate rendering in the average domestic circle. It is here transposed to a more reasonable pitch. In some Palestinian and other Oriental congregations the hymn is similarly sung first in Hebrew and afterward in Spanish.

EN KELOHENU (A)



Adagio.

EN-MISHPAT (עין משפט): Another name for Kadesh (Gen. xiv. 7, R. V.), probably Kadesh-barnea, the place where Chedorlaomer with his three companions slew the Amalekites and the Amorites.

E. G. H. M. Sel.

EN SOF ("boundless"; "endless"): Cabalistic term for the Deity prior to His self-manifestation in the production of the world, probably derived from Ibn Gabirol's term, "the Endless One" (she-en lo tiklah). It was first used by Azriel ben Menahem, who, sharing the Neoplatonic view that God can have no desire, thought, word, or action, emphasized by it the negation of any attribute. The Zohar explains the term "En Sof" as follows: "Before He gave any shape to the world, before He produced any form, He was alone, without form and without resemblance to anything else. Who then can comprehend how He was before the Creation? Hence it is forbidden to lend Him any form or similitude, or even to call Him by His sacred name, or to indicate Him by a single letter or a single point. . . . But after He created the form of the Heavenly Man [אדם עלאה], He used him as a chariot [מרכבה] wherein to descend, and He wishes to be called after His form, which is the sacred name 'Yhwh'" (part ii., section "Bo," 42b). In other words, "En Sof" signifies "the nameless being."

In another passage the Zohar reduces the term to "En" (non-existent), because God so transcends human understanding as to be practically non-existent (*ib.* part iii. 288b). The three letters composing the word "En" (אין) indicate the first three purely spiritual Sefirot ("Shoshan Sodot," 1b). Judah Ḥayyaṭ, in his commentary "Minḥat Yehudah" on the "Ma'areket Elahut," gives the following explanation of the term "En Sof": "Any name of God which is found in the Bible can not be applied to the Deity prior to His self-manifestation in the Creation, because the letters of those names were produced only after the emanation. . . . Moreover, a name implies a limitation in its bearer; and this is impossible in connection with the 'En Sof.'"

K. I. BR.

'ENA, RAB: Babylonian scholar of the third amoraic generation (third century); contemporary of Rab Judah b. Ezekiel. The two were known as "sabe de Pumbedita" (elders of Pumbedita, Sanh. 17b; 'Er. 79b *et seq.*).

'Ena once pronounced at the house of the exilarch a halakic discourse which greatly displeased his younger contemporary Rabbah, and the latter declared his statement to be astounding and himself to deserve degradation by the removal of his "meturgeman" (Ḥul. 84b; see Rashi *ad loc.*).

Rab Naḥman, however, had a better opinion of 'Ena's learning. Twice 'Ena opposed Naḥman's views (Pes. 88a; Meg. 14b); and both times Naḥman, familiarly addressing him as "'Ena Saba" (Old 'Ena) or, according to some versions, "'Anya Saba" (="Poor Old Man"; a play on his name, "'Ena"), points out that 'Ena's views as well as his own are right, their respective applications depending on circumstances. Both times he prefaces this with the remark, "From me and from thee will the tradition bear its name."

S. S. S. M.

ENCHANTMENT. See DIVINATION.

ENCYCLOPEDIA: A work containing information on all subjects, or exhaustive of one subject, arranged in systematic, usually alphabetical, order. Such works were not unknown in the Orient. Among Greek and Syriac Christians they were based upon homilies dealing with the six days of Creation. Mohammedan writers developed in course of time a large literature of both general and special encyclopedias, the earliest of which seems to be the "Mafatiḥ al-'Ulum" of Mohammed ibn Aḥmad al-Khawarizmi (975-997). The first Hebrew work of this kind known to us is the mathematical encyclopedia of Abraham bar Ḥiyyah of Barcelona (*c.* 1150); and it is acknowledged that it was written upon Arabic models. It was entitled "Yesode ha-Tebunah we-Migdol ha-Emunah," and treated of arithmetic, geometry, optics, astronomy, and music; only fragments of it are extant. A century later a more extensive encyclopedia was published by Gershon ben Solomon Catalan of Arles, under the title "Sha'ar ha-Shamayim" (Venice, 1547). It is divided into three parts: (1) physics, meteorology, mineralogy, natural history; (2) astronomy; (3) theology, or metaphysics. Judah ben Solomon ha-Kohen ibn מתקה (Toledo, 1247) wrote a similar work, but in Arabic, which he translated into Hebrew ("Midrash ha-Ḥokmah"). It treated of logic, physics, metaphysics, mathematics, and the mystical sciences. As in Mohammedan works, the first three divisions closely followed Aristotle. The "Shebile Emunah" of Meïr ibn Aldabi (fourteenth century) went even further, comprising more of Jewish theology and practical ethics than other works of this class; but it is largely a compilation, especially from the "Sha'ar ha-Shamayim" of Gershon b. Solomon.

A Turkish scholar of the sixteenth century, Solomon ben Jacob ALMOLI, undertook the publication of an encyclopedia under the title "Me'assef le-Kol ha-Maḥanot," but nothing further than the plan and prospectus appeared (Constantinople, 1530-32). Jacob Ẓahalon, rabbi and physician at Ferrara in the seventeenth century, produced an encyclopedia under the title "Oẓar ha-Ḥokmot." It was divided into three volumes, of which only the third, entitled "Oẓar ha-Ḥayyim" (Venice, 1683), and treating of medicine, has been preserved and published. A general encyclopedia was planned by Jair Ḥayyim Bacharach (*c.* 1650), arranged according to subject-matter. Only one volume, containing the index of subjects, has come down to us. A work of the same kind was published (Venice, 1707-08) by the physician Tobiah of Metz, under the title "Ma'aseh Ṭobiyyah." It also was divided into three parts, dealing with: (1) metaphysics, theology, astronomy, cosmography, elements; (2) medicine; (3) botany and zoology. As was the case with their Arabic prototypes, none of these works was arranged in alphabetical order.

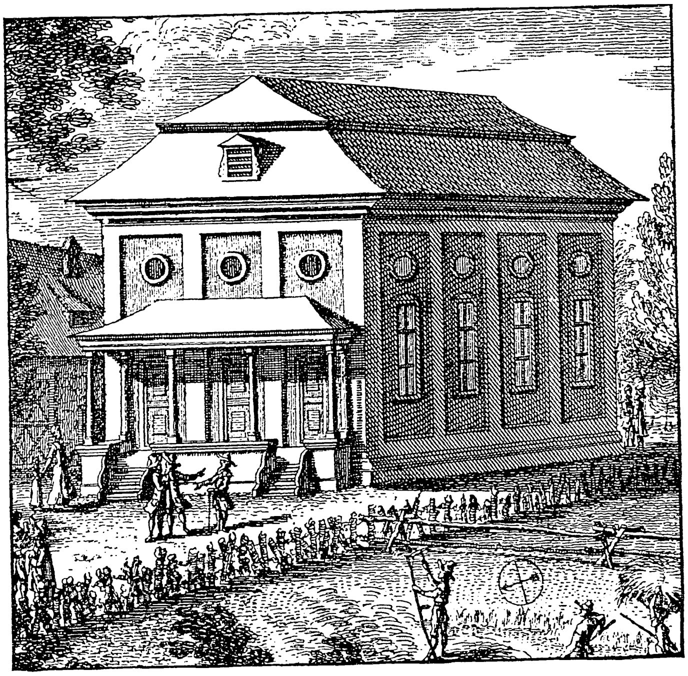
Talmudic Encyclopedias.

The scarcity of secular encyclopedias is compensated by the abundance of those devoted to Talmudic and Midrashic literature. To these belong the "'Aruk" of Nathan ben Jehiel of Rome (twelfth century), which is as much a Talmudic encyclopedia as a lexicon. The various "Yalḳutim," the "'En Ya'aḳob" of Jacob Ḥabib, etc., are rather collections of Talmudic and Midrashic lore. The first complete rabbinical encyclopedia was composed by Isaac Lampronti, rabbi at Ferrara (1679-1757). His "Paḥad Yiẓḥaḳ" is arranged in alphabetical order, and contains a large mass of somewhat undigested material, covering the whole ground of rabbinic literature down to the writer's own day (12 vols., Venice, 1750-1813; the second half was published by the Meḳiẓe Nirdamim Society 1864-88). Similar works, but of lesser importance, covering certain departments only of Talmudic or rabbinic literature, have been published at various periods. Among these is the "Torah we-Ḥayyim" of Ḥayyim Palagi (Salonica, 1846), dealing with the ethical part of the Talmud; the "Nifla'im Ma'aseka" of Abraham Shalom Hai חמוי (Leghorn, 1881), embracing the haggadic portions of the Talmud; the "Abbi'ah Ḥidot," by the same author as the preceding (*ib.*); the "Or 'Enayim" of Isaac Judah of

Kamarna (Kamarna, 1882), an encyclopedia of the Cabala; the "Kerub Mimshaḥ" of Solomon Ḥazzan of Alexandria (Alexandria, 1895), on the haggadic portions of the Talmud.

Modern Attempts.

To the nineteenth century belong the first attempts to produce an encyclopedia dealing with Jewish life and literature. In 1840 an essay was made in Russia which was voiced in Jost's "Annalen," and for which the editor promised to set apart a separate column in his journal entitled "Encyclopädie der Theologischen Literarischen Angelegenheiten"; but nothing further came of the attempt ("Annalen," 1840, pp. 161, 236, 276, 378). In 1844 Steinschneider and Cassel planned a comprehensive work of this kind, and issued a "Plan der Real-Encyclopädie des Judenthums Zunächst für die Mitarbeiter" (Krotoschin). Part of this was an article on abbreviations by Steinschneider ("Hebr. Bibl." xxi. 103), which was republished in the "Archiv für Stenographie," 1877, Nos. 466, 467, and in "Die Neuzeit," Vienna, 1877 (comp. Steinschneider's "Briefe über eine Encyclopädie der Wissenschaft des Judenthums," in "Orient, Lit." 1843, pp. 465 *et seq.*). Various articles, originally written for this work, appeared elsewhere; that on "Judensteuer," by Selig (Paulus) Cassel, appeared as "Juden" in Ersch and Gruber's "Allgemeine Encyklopädie der Wissenschaft und Künste" ("J. Q. R." ix. 233); "Aderlass im Talmud," by Alois Brecher, appeared in "Prager Medicinische Wochenschrift," 1876, March 22 and 29 ("Hebr. Bibl." xviii. 94); Beer's "Abraham" was issued as a separate book—"Das Leben Abrahams" (Leipsic, 1859; see "Deutsche Lit. Zeitung," 1893, p. 1320). A few years later S. L. Rapoport projected a Hebrew encyclopedia of Talmudic and rabbinic literature. One volume only appeared, covering the letter "alef" (Prague, 1852), and entitled "Erech Millin, Opus Encyclopedicum. Alphabetico Ordine Dispositum, in Quo et Res et Voces ad Historiam, Geographiam, Archæologiam, Dignitates, Sectas Illustresque Homines Spectantes, Quæ in Utroque Talmude, Tosefta, Targumicis Midraschicisque Libris Occurrunt, Necdum Satis Explicatæ Sunt, Illustrantur."



Old Synagogue at Endingen.
(From Ulrich, "Sammlung Jüdischer Geschichten," 1768.)

Another encyclopedia in Hebrew, confined to secular science, and grouped according to subject-matter, was undertaken in 1844 by Julius Barasch, but he did not get beyond the first volume, devoted to philosophy. This was entitled "Oẓar ha-Ḥokmot, Liber Thesaurus Scientiæ in Lingua Hebraica Continens Fundamenta Omnium Scientiarum. Sectio Philosophica" (Vienna, 1856). Ezekiel Lewy, rabbi at Beuthen, followed Rapoport, but on a smaller scale, and undertook the publication of an encyclopedia, in Hebrew, of Halakah, Midrash, and Haggadah; but only the alef volume, under the title "Biḳḳoret ha-Talmud," appeared (Vienna, 1863).

J. Hamburger, rabbi of Mecklenburg-Strelitz, was the first to successfully publish a Jewish encyclopedia in German, confined, however, to Biblical and Talmudical subjects: "Real-Encyclopädie für Bibel und Talmud," in 2 vols., Leipsic, 1870–84, the first dealing with Biblical, the second with Talmudic, literature. From 1896 to 1901 the author added a third volume, containing six supplementary parts covering a portion of the literature, and the most important writers, of the early Middle Ages. A new title, "Real-Encyclopädie des Judenthums," was given to the whole. Hamburger's work, despite its disjointed character and untrustworthy citations, was a great step in advance, and is praiseworthy as the work of one man.

A publishing firm in Warsaw, J. Goldman & Company, began in 1888 to publish "Ha-Eshkol," a combined Jewish and secular encyclopedia in Hebrew; but it came to a standstill with the article אורזינם. Encyclopedias were also projected by the Central Conference of American Rabbis (see "Year-Book of Cen. Conf." 1898, p. 38; 1899, pp. 80, 97; 1900, p. 86) and by Aḥad ha-'Am in Russia, to which latter the Mæcenas Wisotzki of Moscow promised to contribute 20,000 rubles. For the history of the present Jewish Encyclopedia see preface to volume I.

I. Br.—G.

ENDINGEN: Town of Baden, near Freiburg, famous in Jewish history through the blood accusation of 1470. In that year three Jews were burned at the stake upon a charge of having murdered eight years previously a Christian family of four persons. The accused, subjected to torture, acknowledged the crime. The bones of their supposed victims are still preserved in the Church of Saint Peter, and are believed to work miracles. In consequence of this event Jews were banished from Endingen; and it was not till the time of Emperor Joseph II. that the decree of banishment was annulled (1785).

A writer of the period made the incident the subject of a drama, which was represented for the first time at Endingen April 24, 1616. Karl von Amira recently published this drama with the records of the trial under the title "Das Endinger Judenspiel." The editor in his preface proves the weakness of the case for the prosecution.

K. M. SEL.

ENDOGAMY. See MARRIAGE.

ENDOR ("spring of Dor"): Town in the territory of Issachar, allotted to Manasseh (Josh. xvii. 11). It is identified with the modern Endur, on the northern decline of little Mt. Hermon (Nabi Daḥi), a hamlet now abandoned, but which had in Roman days a large population. Cheyne, following Graetz, reads "'En Ḥarod" (see Judges vii. 1; Budde, "Richter und Samuel," p. 112).

According to the Hebrew text, the author of Ps. lxxxiii. considers Endor to have formed part of the plain of Kishon and, as such, of the battle-field of Megiddo. In I Sam. xxix. 1 the Septuagint (Manuscript A) reads 'Αενδὼρ, which is "Endor," not, as Cheyne and Klostermann propose, "'En Ḥarod." If the second half of I Sam. xxix. 1 is not to be considered as a later addition (Budde, "Die Bücher Samuel" [1902], in Marti's "Kurzer Hand-Commentar zum Alten Testament"), Endor was the place of Saul's encampment, as well as the residence of the witch whom he consulted before the battle of Gilboa (I Sam. xxviii. 7).

E. G. H.—E. I. N.

ENDOR, THE WITCH OF.—Biblical Data: A necromancer consulted by Saul in his extremity when forsaken by YHWH, and whose ordinary oracles (dreams, urim, and prophets) had failed him. The story is found in I Sam. xxviii. 4–25. After Samuel's death and burial with due mourning ceremonies in Ramah, Saul had driven all necromancers and adepts at witchcraft from the land. But the Philistines gathered their forces and encamped in Shunem, and to meet them Saul mustered his army on Gilboa. The Israelitish king, terrified at the sight of the enemy's numbers, inquired of YHWH, but received no answer. In this strait the monarch inquires for a woman בעלת אוב, "who possesses a talisman" (Smith, "Samuel," p. 240) wherewith to invoke the dead, and is informed that one is staying at Endor. Disguised, Saul repairs to the woman's lodgings at night and bids her summon for him the one whom he will name. The witch suspects a snare, and refuses to comply in view of the fate meted out to her class by royal command. Assured, however, of immunity, she summons Samuel at Saul's request. At the sight of Samuel she cries out with a loud voice, and charges the king, whom she immediately recognizes, with having deceived her. Saul allays her fears and makes her tell him what she has seen. She saw "a god ["elohim"] coming up out of the earth"; "an old man . . . wrapped in a cloak." Before the spirit (unseen) Saul prostrates himself. Samuel complains at being disturbed, but Saul pleads the extremity of his danger and his abandonment by YHWH. Samuel, however, refuses to give any counsel, but announces the impending downfall of the king and his dynasty. Saul faints, partly from physical exhaustion due to lack of food. The witch attempts to comfort him, and invites him to partake of her hospitality. Saul at first refuses, but is finally prevailed upon by the combined entreaties of the woman and his servants. He eats and departs to his fate.

Apparition of Samuel.

——**In Rabbinical Literature:** While in the Biblical account the woman remains anonymous, the rabbinical Midrash maintains that she was Zephaniah, the mother of Abner (Yalḳ., Sam. 140, from Pirḳe R. El.). That a supernatural appearance is here described is inferred from the repeated emphasis laid on the statement that Samuel had died and had been buried (I Sam. xxv. 1, xxviii. 3), by which the assumption that Samuel was still living when summoned, is discredited (Tosef., Soṭah, xi. 5). Still he was invoked during the first twelve months after his death, when, according to the Rabbis, the spirit still hovers near the body (Shab. 152b). In connection with the incidents of the story the Rabbis have developed the theory that the necromancer sees the spirit but is unable to hear his speech, while the person at whose instance the spirit is called hears the voice but fails to see; bystanders neither hear nor see (Yalḳ., *l.c.*; Redaḳ and RaLBaG's commentaries). The outcry of the woman at the sight of Samuel was due to his rising in an unusual way—upright, not, as she expected, in a horizontal position (comp. LXX. ὀρϑιον in verse 14).

——**Critical View:** The story throws light on the prevailing beliefs of primitive Israel concerning the possibility of summoning the dead and consulting them. Discussions concerning the historical veracity of this report, and attempts to reconcile its contents with natural laws by assuming that the woman palmed off some fraud on the excited king exhausted by previous fasting, miss the point of the Biblical account. The scene is really a satire on King Saul, and the summoning of the dead is introduced only incidentally. He, the destroyer of the necromancers, forsaken by Yhwh, himself repairs to a witch's house, but has only his pains for his trouble. Samuel refuses to help, and reiterates what Saul's fears had anticipated (Grüneisen, "Der Ahnenkultus und die Urreligion Israels," pp. 152–154, Halle, 1900). אוב used to be interpreted as meaning the ghost with which the witch was possessed, but this does not appear to be the ancient conception.

ENEMY, TREATMENT OF AN: Hatred of an enemy is a natural impulse of primitive peoples; willingness to forgive an enemy is a mark of advanced moral development. Jewish teaching, in Bible, Talmud, and other writings, gradually educates the people toward the latter stage. Where there are indications in the Bible of a spirit of hatred and vengeance toward the enemy (Ex. xxiii. 22; Lev. xxvi. 7, 8; Deut. vi. 19, xx. 14, xxxi. 4; Josh. x. 13; Judges v. 31; I Sam. xiv. 24; Esth. viii. 13; ix. 1, 5, 16), they are for the most part purely nationalistic expressions—hatred of the national enemy being quite compatible with an otherwise kindly spirit.

Biblical Commands and Precepts.

In the earliest collection of laws, the so-called Book of the Covenant, the command is given: "If thou meet thine enemy's ox or his ass going astray, thou shalt surely bring it back to him again. If thou see the ass of him that hateth thee lying under his burden, and thou wouldest forbear to help him, thou shalt surely help with him" (Ex. xxiii. 4, 5). The holiness chapter of Leviticus contains the command: "Thou shalt not hate thy brother in thy heart" (Lev. xix. 17). The teaching of the Book of Proverbs is: "Rejoice not when thine enemy falleth and let not thy heart be glad when he stumbleth" (xxiv. 17). This injunction is repeated as the familiar utterance of Samuel ha-Ḳaṭon (Abot iv. 26). Again, the Book of Proverbs says: "If thine enemy be hungry give him bread to eat, and if he be thirsty give him water to drink. For thus shalt thou heap coals of fire upon his head, and the Lord shall reward thee" (xxv. 21, 22). The prevailing opinion that the Jewish Bible commands hatred of the enemy rests upon the strangely misunderstood statement in the Sermon on the Mount: "Ye have heard that it hath been said, Thou shalt love thy neighbor and hate thine enemy. But I say unto you, Love your enemies and pray for them that persecute you" (Matt. v. 43, 44; see Jew. Encyc. iii. 398, *s.v.* Brotherly Love).

Joseph's treatment of his brothers is exemplary: "Fear not, for am I in the place of God? and as for you, ye meant evil against me; but God meant it for good. . . . Now therefore fear ye not; I will nourish you and your little ones; and he comforted them and spake kindly unto them" (Gen. l. 19–21). Similarly Moses prayed for the recovery of Miriam, who had spoken rebelliously against him (Num. xii. 13). Solomon is praised because, among other things, he did not ask for the life of his enemies (I Kings iii. 11; II Chron. i. 11). I Kings xx. 31 is further evidence that a loftier ethical spirit prevailed in Israel than among the surrounding nations; the servants of the defeated King of Syria urged him to throw himself upon the mercy of his triumphant foe, the King of Israel, for "we have heard that the kings of the house of Israel are merciful kings." As a final instance from the Bible the words of Job (xxxi. 29–30, R. V.) may be quoted: "If I rejoiced at the destruction of him that hated me, Or lifted up myself when evil found him; (Yea, I suffered not my mouth to sin By asking his life with a curse)."

In Apocrypha, Talmud, and Midrash.

The author of Ecclesiasticus counsels: "Forgive thy neighbor the hurt he hath done thee; and then thy sins shall be pardoned when thou prayest" (xxviii. 2). Talmudical and Midrashic literature contains many fine teachings on this subject. Mar Zuṭra prayed every evening upon retiring: "O my God, forgive all such as have wronged me" (Meg. 28a; B. B. 15b). "Be ever flexible as a reed [kindly toward all], never as inflexible as a cedar [unforgiving toward such as have harmed thee]" (Ta'an. 20b). "Even as God forgives transgressions without harboring revenge, so be it also with thee, harbor no hatred in thy heart" (Yalḳ. Lev. 613). "Why is the 'Hallel' [the psalms of praise] recited only on the first day of Passover and not on every day during the Passover week, as it is recited every day during the week of the Feast of Tabernacles? Because the Egyptians were sunk in the sea, and I have caused it to be written—'Rejoice not when thine enemy falleth'" (Yalḳ. Prov. 960). In a similar passage the angels are rebuked by God for singing at the time of the catastrophe that overtook the Egyptians: "The work of My hands sinks into the sea, and you would sing before Me?" (Sanh. 39b). Again, "If a man finds both a friend and an enemy requiring assistance he should assist his enemy first in order to subdue his evil inclination" (B. M. 32b). In the Abot de-Rabbi Natan (23) is found this passage: "Who is strong? He who converts an enemy into a friend." Talmudical teachers held that David's action in cutting off the skirt of Saul's robe, in order to present it as an evidence of magnanimity and as a reproach to Saul, was blameworthy, and robbed an otherwise noble deed of its fine flavor (Ber. 62b).

Toward Non-Jews.

Nor does Judaism, as is often claimed, inculcate unfriendly sentiments toward non-Jews. Rabbi Joshua taught: "An evil eye, the evil nature, and hatred of men put one out of the world" (Ab. ii. 15). "It is a law of peace to support the poor of all peoples as well as the poor of Israel, to assist their sick, to bury their dead" (Giṭ. 61a). "God judges the nations by their righteous members" ('Ab. Zarah 3a). Of similar import are Joshua ben Hananiah's words: "The pious ones of the nations of the world have a share in the future life." "What is the significance of the thirty coins (xi. 12) in the vision of the prophet Zechariah?" Rabbi Judah answered: "They indicate the thirty righteous men who are always to be found among the heathen, and whose merits save their peoples" (Ḥul. 92a). Samuel says: "It is forbidden to deceive any one, even a heathen" (*ib.* 94a). "Cultivate peace with thy brethren, thy neighbors, with all men, even the heathen" (Ber. 17a). Medieval teachers urged similar maxims. "Deceive none, either Jew or non-Jew," wrote Rabbi Lipman Mühlhausen in the fifteenth century (comp. Güdemann, "Geschichte des Erziehungswesens der Juden in Deutschland," p. 243), and the "Sefer Ḥasidim" enjoins: "Deceive no one intentionally, not even the non-Jew; quarrel with none, no matter what his belief" (comp. Zunz, "Z. G." p. 135). Baḥya ibn Paḳuda, in his "Ḥobot ha-Lebabot," mentions dislike of all that is hateful, as the third of the ten requirements of an exemplary life, and quotes Shabbat 88b in support of his statement: "Such as suffer ill but do it not, answer not insults, and are actuated in their conduct by love only, are referred to in the Scriptural passage: 'They who love Him are as the sun when he goeth forth in his might.'"

Modern Teachings.

Rabbi Israel Lipschütz of Danzig bade his heirs: "Do good to all men, evil to none; do good even to the non-Jew in the street, even to an enemy who has pursued you with relentless hate. If you have an opportunity for revenge, do not avail yourselves of it, but load your adversary with favors. Never refuse a favor to any person, be he non-Jew or even an enemy. If your foe is seeking your hurt you may prevent him, but you must not injure him beyond the point of making him powerless to harm you. If an opportunity offer of serving him thank God for the chance, and though he has done you the most fearful wrongs, forget the injuries you have sustained at his hands. Make yourselves wings like eagles to succor him, and refrain from reminding him by a word of his former conduct" ("J. Q. R." iii. 474). Joel Shamariah wrote in his last will and testament: "If any one did aught to injure me, yet I loved him in my heart. If I felt inclined to hate him, I at once began to utter praises, so that gradually I brought my heart to genuine love of the man who had wronged me" (*ib.*)

ENGADDI. See Engedi.

ENGAGEMENTS. See Betrothal.

ENGEDI (עין גדי): A town in the wilderness of Judah (Josh. xv. 62), on the western shore of the Dead Sea (Ezek. xlvii. 10). It was the hiding-place of David when he fled from Saul (I Sam. xxiv. 1, 2). Engedi was celebrated for its vineyards (Cant. i. 14), for its balsam (Shab. 26a; Josephus, "Ant." ix. 1, § 2), and for its palms (Pliny, "Historia Naturalis," v. 17; see also Shab. 26a), whence it was called also "Hazazon-tamar" (the pruning of the palm-tree; II Chron. xx. 2). According to Josephus ("B. J." iii. 3, § 5), Engedi was the center of a toparchy under the Romans; it was the chief seat of the Essenes, and in the fourth century it was still a large village (Eusebius, "Onomasticon," *s.v.*). It is identified with the modern 'Ain Jidi (see Robinson, "Biblical Researches," ii. 209, 211, 214).

ENGEL, GÁBOR (GABRIEL): Hungarian physician and surgeon; born at Maros-Vásárhely, Hungary, in 1852. After studying at Budapest and Leipsic, he was appointed assistant surgeon at the university hospital of Klausenburg (1880), privatdocent in obstetrics (1881), director of the Landesspital (1887), and assistant professor at the university at Klausenburg (1893). He has contributed essays to the "Centralblatt für Gynäkologie," the "Archiv für Gynäkologie," the "Wiener Medicinische Presse," and the Hungarian medical journals.

ENGEL, JOSEPH: Hungarian sculptor; born 1815; died in Budapest June 29, 1902. His father, a poor merchant, destined him for the rabbinate, and had him educated accordingly at the yeshibah of Presburg. But he soon deserted his Talmudic studies and went to Vienna, where he apprenticed himself to a wood-carver. The latter was soon convinced that the boy had great talent for wood- and bone-carving, and he helped him to enter the Academy of Art, where he remained till 1838. While a student he won two prizes. After having worked for some time in Munich and Paris, Engel went to London, where, from a simple stone-carver, he became a distinguished sculptor. His busts of Queen Victoria and Prince Consort Albert drew the attention of the Austrian ambassador at the court of St. James, Prince Paul Esterhazy, to the talented young Hungarian; and through the prince's intervention Engel entered the Academy of Sculpture, where he passed several years and won many prizes. His first work of importance was a group of statuary, "Amazons Fighting," which was bought by Prince Albert for £600. This group is now in the royal residence, Osborne House, Isle of Wight.

In 1847 Engel went to Rome, where he worked for fully twenty years. This was the most fruitful and successful epoch of his activity, the sculptures in the Vatican Museum exerting a great influence upon his studies. During the first part of his stay in Rome he modeled the "Captive Cupid" and "Innocence," besides a great many other mythological and ideal figures distinguished by grace of form and masterly execution. In 1897 he exhibited in Manchester the "Parsee," executed for his coreligionist Sir David Salomon, lord mayor of London. His "Eve Awakening to Life" won the great gold medal at the Vienna Exhibition of 1873. While in Rome he also finished the statue of the Austrian general Count Franz Nádasdy, which is now in the arsenal of Vienna. His atelier was one of the artistic centers of the Italian capital, and was visited by the King and Queen of Prussia, the Czarina of Russia, the then Prince of Wales, King Louis of Bavaria, and many other royalties whenever they came to the Eternal City.

After a sojourn of nearly thirty years abroad Engel returned in 1866 to his native country, and was then entrusted with the execution of the famous Szechenyi monument, which was unveiled in 1880.

S.

ENGELBERT, HERMANN: German rabbi; born in Gudensberg, Hessen, July 29, 1830; died at St. Gall, Switzerland, Feb. 5, 1900. He attended the Talmudic school in Würzburg and the University of Berlin, and obtained his Ph.D. degree in Marburg. He was appointed preacher to the congregation of Elberfeld, and three years later to the congregation of Munich. In 1866 he became rabbi to the newly organized community in St. Gall, where he remained until his death.

He wrote: "Das Negative Verdienst des Alten Testaments um die Unsterblichkeitslehre" (Berlin, 1857); "Ist das Schlachten der Thiere nach Jüdischem Ritus Wirklich Thierquälerei?" (reprinted from the "St. Gallen Tageblatt," 1867); "Das Schächten und die Bouterole: Denkschrift an den Grossen Rath des Kantons St. Gallen" (St. Gall, 1876); "Statistik des Judenthums im Deutschen Reiche, Ausschliesslich Preussens, und in der Schweiz" (Frankfort-on-the-Main, 1875).

ENGLAND: The southern portion of the island of Great Britain. Owing to the dominance of the capital city in England, most of the episodes of Jewish history connected with that country occurred at London, and are narrated under that heading. In the present article the more specifically historic events, those affecting the relations of the Jews to the state, will be treated, though events that affected public opinion have also been included as influencing those relations. The subject may be treated in three periods: (*a*) pre-expulsion, (*b*) intermediate, (*c*) resettlement.

The Jews Came in with the Normans.

Pre-Expulsion Period: There is no evidence of Jews residing in England before the Norman Conquest. The few references in the Anglo-Saxon Church laws either relate to Jewish practises about Easter or apply to passing visitors, the Gallo-Jewish slave-traders, who imported English slaves to the Roman market and thus brought about the Christianizing of England. William of Malmesbury ("Gesta Rerum Anglorum," ed. Duffy, p. 500) distinctly states that William the Conqueror brought the Jews from Rouen to England, and there is no reason to doubt his statement. The Conqueror's object can easily be guessed. From Domesday it is clear that his policy was to get the feudal dues paid to the royal treasury in coin rather than in kind, and for this purpose it was necessary to have a body of men scattered through the country that would supply quantities of coin.

At first the status of the Jew was not strictly determined. An attempt was made to introduce the Continental principle that he and all that was his were the king's property, and a clause to that effect was inserted under Henry I. in some manuscripts of the so-called "Laws of Edward the Confessor"; but Henry granted a charter to Rabbi Joseph, the chief Jew of London, and all his followers, under which they were permitted to move about the country without paying tolls or customs, to buy whatever was brought to them, to sell their pledges after holding them a year and a day, to be tried by their peers, and to be sworn on the Pentateuch. Special weight was attributed to the Jew's oath, which was valid against that of twelve Christians. The sixth clause of the charter was specially important: it granted to the Jews the right of moving whithersoever they would, together with their chattels, as if these were the king's own property ("sicut res propriæ nostræ").

Whatever advantage accrued to the king or to the Jews from their intimate relations was disturbed by the complete disorganization of the state under Stephen, who burned down the house of a Jew in Oxford (some accounts say with a Jew in it) because he refused to pay a contribution to the king's expenses. The Jews were equally mulcted by Empress Maud and by King Stephen. It was during the reign of the latter that the first recorded blood accusation against the Jews of any country was brought in the case of William of Norwich (1144). This was followed later in the century by similar charges brought in connection with the boys Harold (at Gloucester, 1168) and Robert (at Bury St. Edmunds, 1181). In none of these cases was any trial held.

While the crusaders in Germany were trying their swords upon the Jews, outbursts against the latter in England were, according to the Jewish chroniclers, prevented by King Stephen ("Hebräische Berichte," p. 64).

With the restoration of order under Henry II. and the withdrawal of the lawless Flemings, the Jews renewed their activity. Within five years of his accession Jews are found at London, Oxford, Cambridge, Norwich, Thetford, Bungay, Canterbury, Winchester, Newport, Stafford, Windsor, and Reading. Yet they were not permitted to bury their dead elsewhere than in London, a restriction which was not removed till 1177. Their spread throughout the country enabled the king to draw upon them as occasion demanded; he repaid them by demand notes on the sheriffs of the counties, who accounted for payments thus made in the half-yearly accounts on the pipe-rolls (see Aaron of Lincoln). But the king was soon to find that others could make use of the Jews for political purposes. Strongbow's conquest of Ireland (1170) was financed by Josce, a Jew of Gloucester; and the king accordingly fined Josce for having lent money to those under his displeasure. As a rule, however, Henry II. does not appear to have limited in any way the financial activity of the Jews; and the chroniclers of the time noticed with some dismay the favor shown to these aliens in faith and country, who amassed sufficient riches to build themselves houses of stone, a material thitherto used only for palaces, though doubtless adopted by the Jews for purposes of security. The favorable position of the English Jews was shown, among other things, by the visit of Abraham ibn Ezra in 1158, by that of Isaac of Chernigov in 1181, and by the resort to England of the Jews who were exiled from France by Philip Augustus in 1182, among them probably being Judah Sir Leon of Paris.

Yet Henry II. was only biding his time in permitting so much liberty to his Jewish subjects. As early as 1168, when concluding an alliance with Frederick Barbarossa, he had seized the chief representatives of the Jews and sent them over into Normandy, while tallaging the rest 5,000 marks (Gervase of Canterbury, ed. Stubbs, i. 205). When, however, he asked the rest of the country to pay a tithe for the crusade against Saladin in 1186, he demanded a quarter of the Jewish chattels. The tithe was reckoned at £70,000, the quarter at £60,000. In other words, the value of the personal property of the Jews was regarded as one-fourth that of the whole country. It is improbable, however, that the whole amount was paid at once, as for many years after the imposition of the tallage arrears were demanded from the recalcitrant Jews.

The king had probably been led to make this large demand upon the English Jewry by the surprising windfall which came to his treasury at the death of Aaron of Lincoln. All property obtained by usury, whether by Jew or by Christian, fell into the king's hands on the death of the usurer; and Aaron of Lincoln's estate included no less than £15,000 of debts owed to him by members of the baronage throughout the country. Besides this, a large treasure came into the king's hands, which, however, was lost on being sent over to Normandy. A special branch of the treasury, constituted in order to deal with this large account, was known as "Aaron's Exchequer" (see Aaron of Lincoln).

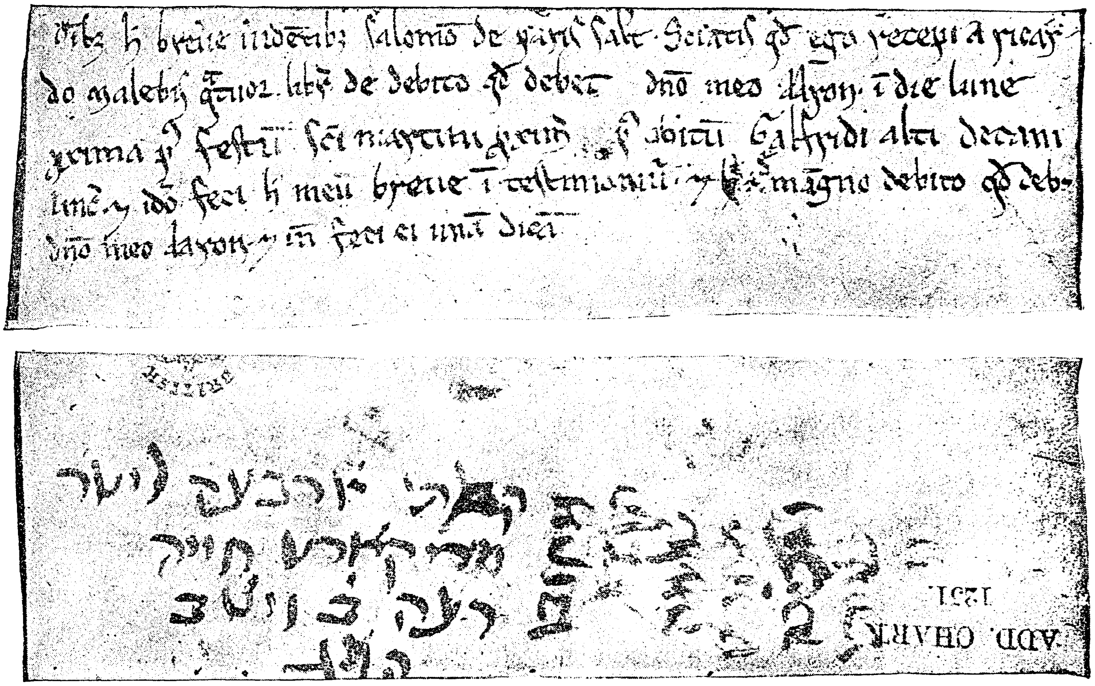
Apart from these exactions and a prohibition against the carrying of arms in the Assize of Arms in 1181, the English Jews had little to complain of in their treatment by Henry II., who was indeed accused by the contemporary chroniclers of unduly favoring those "enemies of Christ." They lived on excellent terms with their neighbors, including the clergy; they entered churches freely, and took refuge in the abbeys in times of commotion. There is even a record of two Cistercian monks having been converted to Judaism; and there is evidence that the Jews freely criticized the more assailable sides of Catholicism, the performing of miracles and the worship of images. Meanwhile they themselves lived in ostentatious opulence in houses resembling palaces, and helped to build a large number of the abbeys and monasteries of the country. By the end of Henry's reign they had incurred the ill will of the upper classes, with whom they mostly came in contact. The rise of the crusading spirit in the latter part of the reign of Henry spread the disaffection throughout the nation, as was shown with disastrous results at the accession of his son Richard.

Massacres at London and York.

Richard I. had taken the cross before his coronation (Sept. 3, 1189). A number of the principal Jews of England presented themselves to do homage at Westminster; but there appears to have been a superstition against Hebrews being admitted to such a holy ceremony, and they were repulsed during the banquet which followed the coronation. The rumor spread from Westminster to London that the king had ordered a massacre of the

Jews; and a mob in Old Jewry, after vainly attacking throughout the day the strong stone houses of the Jews, set them on fire at night, killing those within who attempted to escape. The king was enraged at this insult to his royal dignity, but took no steps to punish the offenders, owing to their large numbers. After his departure on the crusade, riots with loss of life occurred at Lynn, where the Jews attempted to attack a baptized coreligionist who had taken refuge in a church. The seafaring population rose against them, fired their houses, and put them to the sword. So, too, at Stamford fair, on March 7, 1190, many were slain, and on March 18 fifty-seven were slaughtered at Bury St. Edmunds. The Jews of Lincoln saved themselves only by taking refuge in a castle.

Isolated attacks on Jews occurred also at Colchester, Thetford, and Ospringe, but the most striking incident occurred at York on the night of March 16-17, 1190. Alarmed by the preceding massacres and by the setting on fire of several of their houses by the mob of crusaders preparing to follow the king, the Jews of York with their leader Josce asked the warden of the king's castle at York to receive them with their wives and children. When, however, the warden attempted to reenter Clifford Tower, which he had handed over to the Jews, the latter refused to receive him; and he called in the aid of the sheriff of the county, John Marshall, to recover the tower. The county militia and a number of York nobles, headed by Richard Malebys, who was deeply in debt to the Jews, besieged the tower, and the rage of the mob was kept alive by the exhortation of a Premonstrant monk, who celebrated mass every morning in his white robe before the walls of the tower till, by accident or design, he was struck by a stone as he approached too near and was crushed. The death of the monk enraged the mob to the highest degree, and the imprisoned Jews saw no hopes of escaping death by hunger except by baptism. Their religious leader, Rabbi Yom-Ṭob of Joigny, exhorted them to slay themselves rather than adopt either alternative, and the president, Josce, began the self-immolation by slaying his wife Anna and his two children. Finally Josce was slain by Yom-Ṭob himself. The few who had refused to follow their example appealed in vain for pity to the Christians, who entered at daybreak and slew them. Finding that the deeds proving the indebtedness of the rioters to the Jews were not in the tower, the mob rushed to the cathedral, and there took possession of them and burned them. The chancellor Longchamp attempted to punish the offenders, mainly some of the smaller barons indebted to the Jews, but these had fled to Scotland. Richard Malebys was deprived of many of his fiefs, but they were soon afterward restored to him. Most of the nobles mentioned in the records were connected with various abbeys, and were influenced by religious prejudice as well as by the desire to free themselves from their indebtedness to the Jews (see York).



ADD. CHART. 1251

Starr of Aaron of Lincoln, 1181, Acknowledging Receipt of Part Payment from Richard Malebys, Afterward the Leader in the York Massacre, 1190.

(In the British Museum.)

During Richard's absence in the Holy Land and during his captivity the lot of the Jews was aggravated by the exactions of William de Longchamp; and they were called upon to contribute toward the king's ransom 5,000 marks, or more than three times as much as the contribution of the city of London. On his return Richard determined to organize the Jewry in order to insure that he should no longer be defrauded, by any such outbreaks as those that occurred after his coronation, of his just dues as universal legatee of the Jewry. He accordingly decided, in 1194, that records should be kept by royal officials of all the transactions of the Jews, which without such record should not be legal. Every debt was to be entered upon a chirograph, one part of which was to be kept by the Jewish creditor, and the other preserved in a chest to which only special officials should have access. By this means the king could at any time ascertain the property of any Jew in the land; and no destruction of the bond held by the Jew could release the creditor from his indebtedness. This "Ordinance of the Jewry" was practically the beginning of the Exchequer of the Jews, which made all the transactions of the English Jewry liable to taxation by the King of England, who thus became a sleeping partner in all the transactions of Jewish usury. The king besides demanded two bezants in the pound, that is, 10 per cent, of all sums recovered by the Jews with the aid of his courts.

"Ordinance of the Jewry."

It may perhaps be appropriate at this point to determine as accurately as possible the exact status which Jews had acquired in England at the end of the twelfth century. They could not be regarded as aliens any more than could the Norman nobles with whom they had originally come over; besides, alienage could not become hereditary (Maitland and Pollock, "History of English Law"). They were not heretics, since their right to exist was recognized by the Church. They were usurers for the most part, and their property, like that of all usurers, escheated to the king at their demise. But, on the other hand, their usurious debts could be recovered at law, whereas the Christian usurer could not recover more than his original loan. They were in direct relation to the king and his courts; but this did not imply any arbitrary power of the king to tax them or to take their money without repayment, as is frequently exemplified in the pipe-rolls. The aids, reliefs, fines, and amercements demanded from them were no other than those asked from the rest of the king's subjects, though the amount contributed by the Jews may have been larger. They were the king's "men," it is true, but no more than the barons of the time; and they had the special privilege of the baronial rank, and could move from place to place and settle anywhere without restriction. It will be seen how this privilege was afterward taken away from them. Altogether, the status of the English Jews, who partook of the nature of baron, alien, heretic, and usurer, was peculiar; but, on the whole, their lot was not an unfavorable one.

These conditions, however, were not destined to last long. As early as 1198 Pope Innocent III. had written to all Christian princes, including Richard of England, calling upon them to compel the remission of all usury demanded by Jews from Christians. This would of course render their very existence impossible. On July 15, 1205, the pope laid down the principle that Jews were doomed to perpetual servitude because they had crucified Jesus. In England the secular power soon followed the initiative of the Church. John, who had his own reasons for disliking Jews, having become indebted to them while a lad in Ireland, at first treated them with a show of forbearance. For the comparatively small charge of 4,000 marks, he confirmed the charter of Rabbi Josce and his sons, and made it apply to all the Jews of England; and he wrote a sharp remonstrance to the mayor of London against the attacks that were continually being made upon the Jews of that city, alone of all the cities of England. He reappointed one Jacob archpriest of all the English Jews (July 12, 1199).

Under John.

But with the loss of Normandy in 1205 a new spirit seems to have come over the attitude of John to his Jews. In the height of his triumph over the pope, he demanded the sum of no less than £100,000 from the religious houses of England, and 66,000 marks from the Jews (1210). One of the latter, Abraham of Bristol, who refused to pay his quota of 10,000 marks, had, by order of the king, seven of his teeth extracted, one a day, till he was willing to disgorge (Roger of Wendover, ii. 232; but see Ramsay, "Angevin Empire," p. 426, London, 1903). It is scarcely to be wondered at that in 1211 many of the English rabbis willingly joined in the Zionistic pilgrimage of Joseph ben Baruch, who, it is said, was accompanied by more than 300 English and French rabbis in his journey to the Holy Land. Yet, though John squeezed as much as he could out of the Jews, they were an important element on his side in the triangular struggle between king, barons, and municipalities which makes up the constitutional history of England during his reign and that of his son. Even in the Great Charter clauses were inserted preventing the king or his Jewish subjects from obtaining interest during the minority of an heir.

With the accession of Henry III. (1216) the position of the Jews became somewhat easier, but only for a short time. Innocent III. had in the preceding year caused the Lateran Council to pass the law enforcing the Badge upon the Jews; and in 1218 Stephen Langton, Archbishop of Canterbury, brought it into operation in England, the badge taking the form of an oblong white patch of two finger-lengths by four. At first the Jews thought of evading the restriction by leaving the land altogether, and directions were given to the wardens of the Cinque Ports to prevent any Jew from passing out of the country without the king's permission. The changed position of the Jews was strikingly indicated in 1222, when a deacon at Oxford was burned for having become a proselyte to Judaism and for having married a Jewess; whereas in the twelfth century several instances of such proselytism had occurred in England, and no punishment had followed the "crime" (Maitland, "Canon Law in England," pp. 158–179). The action of the Church was followed by similar opposition on the part of the English boroughs. Henry at his accession had found it necessary to appoint committees of twenty-four burgesses who should be responsible for the

Jews and Municipalities.

safety of the Jews of Gloucester and Hereford, while he claimed jurisdiction for his own sheriffs or constables in any causes between Jews and Christians. This was a great source of annoyance to the towns, which were beginning to escape feudal dues and exactions of the king by compounding for a lump sum known as the "ferm of the borough" ("firma burgi"). This exempted them from the king's jurisdiction; but an exception was made in matters relating to the Jewry, on pretext of which the king's officials again and again invaded the boroughs. Petitions were accordingly sent to the king in many instances to remove his Jews from the boroughs, and they were expelled from Bury St. Edmunds in 1190, Newcastle in 1234, Wycombe in 1235, Southampton in 1236, Berkhamsted in 1242, Newbury in 1244; and at last it was enacted in 1253 that Jews could freely reside in such towns only as had an Archa for the preservation of the Jews' deeds and starrs, from which the king could ascertain their capacity for further taxation. Henceforth they were restricted to some twenty-five towns in England, and they became in truth the king's chattels. Any attempt to evade the provisions of this enactment was rigidly met by expulsion, as from Winchelsea in 1273, from Bridgnorth in 1274, and from Windsor in 1283. By these restrictions it became impossible for any Jew by change of residence to evade payment of the tallage, which became the chief means of extortion under Henry III. after the beneficent rule of Hubert de Burgh had been succeeded by that of the king's favorites (see Tallage).

But there was probably another reason for limiting Jewish business with the towns, for it is likely that the king derived but very little profit from the loans of the Jews to the burgesses of the towns, for it was with the smaller barons, including the superior clergy, that the Jews transacted most of their business. The smaller barons, indeed, found themselves between the upper and the nether millstone in their borrowings from the Jews, their indebtedness to whom fell in the last resort into the hands of the king either by escheat on the death of the creditor or by collection made through the king's officials whenever the Jews were tallaged. But besides this, the higher baronage imitated the crown in making use of the Jews as catspaws to get the lands of their less powerful brethren into their possession; advancing money to the Jew, sharing with him the usury, and claiming the lands if the debt failed to be paid. Complaint was made of this as early as the Synod of Worcester in 1240 (Wilkins, "Concilia," i. 675–676), and nearly twenty years later (1259) the lesser barons petitioned the king to find some remedy for this danger of getting into the clutches of the higher nobility (Stubbs, "Select Charters," p. 365).

Jews and the Baronage.

With the outbreak of the Barons' war violent measures were adopted to remove all traces of indebtedness either to the king or to the higher barons. The Jewries of London, Canterbury, Northampton, Winchester, Cambridge, Worcester, and Lincoln were looted (1263–65), and the archæ either destroyed or deposited at the headquarters of the barons at Ely. Simon de Montfort, indeed, who had at an early stage expelled the Jews from his town of Leicester, when at the height of his power after the battle of Lewes annulled all indebtedness to the Jews. He had been accused of sharing the plunder, but issued edicts for their protection after the battle (Kingsford, "Song of Lewes," pp. 59, 80, Oxford, 1890). Both the Jewry and the king as its representative must have suffered incalculably by this general wiping out of indebtedness.

The value of the Jewry to the royal treasury had in fact become considerably lessened during the thirteenth century through two circumstances: the king's income from other sources had continually increased through the century from about £35,000 under Henry II. to £65,000 under Edward I.; and the contributions of the Jews had decreased both absolutely and relatively, the average from tallages, etc., being about £3,000 per annum in the twelfth century, and only £2,000 in the thirteenth. Besides this, the king had found other sources from which to obtain loans. Italian merchants, "pope's usurers" as they were called, supplied him with money, at times on the security of the Jewry. By the contraction of the area in which Jews were permitted to exercise their money-lending activity their means of profit were lessened, while the king by his continuous exactions prevented the automatic growth of interest. On two occasions, in 1254 and 1255, the Jews appealed vigorously to him or to his representative to be allowed to leave the kingdom before the very last penny had been forced from them. Henry's refusal only served to emphasize their entire dependence upon the royal will. By the middle of the thirteenth century the Jews of England, like those of the Continent, had become chattels of the king. There appeared to be no limit to the exactions he could impose upon them, though it was obviously against his own interest to deprive them entirely of capital, without which they could not gain for him usurious interest.

Further prejudice had been raised against the Jews just about this time by the revival of the charge of ritual murder. The king had sold the Jewry to his brother Richard of Cornwall in Feb., 1255, for 5,000 marks, and had lost all rights over it for a year. But in the following August a number of the chief Jews who had assembled at Lincoln to celebrate the marriage of a daughter of Berechiah de Nicole were seized on a charge of having murdered a boy named Hugh. Ninety-one were sent to London to the Tower, eighteen were executed for refusal to plead, and the rest were kept in prison till the expiry of Richard's control over their property (see Hugh of Lincoln).

As soon as order was restored after the death of Simon de Montfort, Edward, in whose hands was the ruling power, though he was only Prince of Wales at the time, took measures to remedy the chief complaints which had led the nobles to the outburst against the Jews. In 1269 Walter de Merton, the king's counselor, who was himself indebted to the Jews, drew up a measure denying to the latter all right to landed property which might fall into their hands as a result of their money-lending. They were not to lend on the security of landed property; all existing bonds on real estate were declared null and void; and any attempt to sell such bonds to Christians was made a capital offense. But, though the barons could no longer alienate their property as security for loans, they could still sell to the Jews; and with this sale there might fall into Jewish hands the feudal right of tutelage and the ecclesiastical right to advowson, both of which were indissolubly connected with the seizin of land in fief. In 1271 the Jews as a desperate measure attempted to force from the king's council explicit permission to hold land with all its privileges; but a Franciscan friar made a protest against the "impious insolence" of the Jews in claiming such rights, and, he being supported by the bishops present as well as by Prince Edward, who presided, the demands of the Jews were repudiated, and they were furthermore precluded from enjoying freehold in tenures of any kind. They were even forbidden to increase their holdings in London, as this might diminish the tithes of the Church ("De Antiquis Legibus Liber," pp. 234 *et seq.*). Deprived thus of all security for large loan, the Jews were almost automatically prevented from obtaining new business; and indeed, as soon as the enactment of 1271 was passed, Henry III., or Edward acting in his name, sold the whole revenue of the Jewry to Richard of Cornwall for as small a sum as 2,000 marks (Rymer, "Fœdera," i. 489).

The "Statutum de Judaismo," 1275.

Shortly after his coronation Edward I., in 1275, determined to solve by a bold experiment the Jewish question as it then existed in England. The Church laws against usury had recently been reiterated with more than usual vehemence at the Council of Lyons (1274), and Edward in the "Statutum de Judaismo" absolutely forbade Jews to lend on usury, but granted them permission to engage in commerce and handicrafts, and even to take farms for a period not exceeding ten years, though he expressly excluded them from all the feudal advantages of the possession of land. This permission, however, regarded as a means by which Jews in general could gain a livelihood, was illusory. Farming can not be taken up at a moment's notice, nor can handicrafts be acquired at once. Moreover, in England in the thirteenth century the gilds were already securing a monopoly of all skilled labor, and in the majority of markets only those could buy and sell who were members of the Gild Merchant. By depriving the Jews of a resort to usury, Edward was practically preventing them from earning a living at all under the conditions of life then existing in feudal England; and in principle the "Statute of Judaism" expelled them fifteen years before the final expulsion. Some of the Jews attempted to evade the law by resorting to the tricks of the Caursines, who lent sums and extorted bonds that included both principal and interest. Some resorted to highway robbery; others joined the Domus Conversorum (see below); while a considerable number appear to have resorted to clipping the coin as a means of securing a precarious existence. As a consequence, in 1278 the whole English Jewry was imprisoned; and no less than 293 Jews were executed at London.

Edward, having found it impossible altogether to prevent usury on the part of the Jews, was forced to permit it in a restricted form in a new statute, probably dated about 1280, allowing the Jews to receive interest on their loans for three years, or at most four. Provisions were made that all loans thus negotiated should be duly registered, so that the king might have his fair share of the usury of the Jewry ("Papers of the Anglo-Jew. Hist. Exh." pp. 219, 229). Loans arranged on these conditions could not be very secure or very lucrative, and the returns to the king in particular would be reduced to their lowest terms by the restricted form in which usury was now permitted. From any removal of these restrictions Edward was shortly afterward debarred by an act of the Church.

The Church and English Jews.

Ever since the fourth Lateran Council the papacy had become more and more embittered against the Jews, owing to the increased attractiveness of Jewish rites. As an immediate result of the council Stephen Langton had excommunicated all Christians having anything to do with Jews, and the king showed sufficient sympathy with the Church policy against the Jews to found in 1232 the Domus Conversorum for the maintenance of Jews converted to Christianity, though not until 1280 did the king cease to claim the whole of the property of a Jew who became converted. John of Peckham, Archbishop of Canterbury, closed all the synagogues in his diocese in 1282, and Edward I. issued a writ instructing his officials to assist the Dominicans by forcing the Jews to listen to their conversion sermons. The Jews had throughout been careless in showing their contempt for certain aspects of Christianity. One had seized the cross carried in front of a procession at the University of Oxford in 1268, and in 1274 a Jew was burned for blasphemy at Norwich. Edward had accordingly issued a proclamation declaring any Jew found guilty of blasphemy to be liable to the death penalty. At the end of 1286 Pope Honorius IV. addressed a special rescript to the archbishops of York and Canterbury, pointing out the evil effects on the religious life of England of free intercourse with the perfidious Jews, who studied the Talmud and its abominations, enticed the faithful to apostasy, caused their Christian servants to work on Sundays and holidays, and generally brought the Christian faith into disrepute. On this account he called upon the English state and Church to do their utmost to prevent such pernicious intercourse. The Church immediately attempted to carry out the pope's demands in a series of enactments passed by the Synod of Exeter in 1287, repeating the ordinary Church laws against commensality between Jews and Christians, and against Jews holding public office, or having Christian servants, or appearing in public at Easter; forbidding Jewish physicians to practise; and reenacting the ordinance of the Synod of Oxford held in 1222, which forbade the building of new synagogues, and denied to Jews entrance into churches.

After the experience in Jewish legislation which Edward I. had from 1269 onward, there was only one answer he could give as a true son of the Church to

The Expulsion.

these demands: If the Jews were not to have intercourse with their fellow citizens as artisans, merchants, or farmers, and were not to be allowed to take usury, the only alternative was for them to leave the country. He immediately expelled the Jews from Gascony, a province still held by England and in which he was traveling at the time; and on his return to England (July 18, 1290) he issued writs to the sheriffs of all the English counties ordering them to enforce a decree to the effect that all Jews should leave England before All Saints' Day of that year. They were allowed to carry their portable property; but their houses escheated to the king, except in the case of a few favored persons who were allowed to sell theirs before they left. Some of them were robbed by the captains who undertook to transport them to Witsand; others were drowned on their way to France. Of the 16,000 who left, about one-tenth went to Flanders, their passage being paid by the king; and a number are found a short time later in the Paris Jewry. The king's booty was not of great amount, for the total rental of the houses which fell into his hands was not more than £130, and the debts owed to the Jews, of which he could collect only the principal, did not exceed £9,000. Parliament was said to have voted one-tenth of the tithes and one-fifteenth of the personal property in gratitude for the expulsion, but this merely represents contemporary prejudice. Edward's act was not an act of grace to the nation; as has been seen, no alternative was left to him. The Church would not allow the Jews to become an integral part of the English nation, and they therefore had to leave the country.

Map of England Showing Towns Where Jews Resided Before the Expulsion in 1290.
(Capitals indicate towns where archæ were deposited; italics, towns from which Jews were expelled before 1290.)

During the two hundred and twenty years of their stay the position of the Jews had steadily grown worse. At first, treated with special favor and allowed to amass considerable wealth, they had formed a necessary part of the royal organization. Two or three of them are mentioned as physicians, and several monks are said to have been converted to Judaism. They collected books and built themselves palatial residences; but after the massacres under Richard I. and the exactions of John they gradually became serfs of the king—mere chattels which he from time to time sold to the highest bidder. Their relations to their neighbors, which were at first friendly, became more and more embittered, though occasionally they are found joining with Christians in hunting (see Colchester).

Literature.

The increasing degradation of their political status is paralleled by the scantiness of their literary output in the thirteenth century as compared with that of the twelfth. In the earlier century they were visited by such eminent authorities as Abraham ibn Ezra, Judah Sir Leon, Yom-Ṭob of Joigny, and Jacob of Orleans. A whole school of grammarians appears to have existed among them, including Moses b. Yom-Ṭob, Moses b. Isaac, and Samuel ha-Naḳdan of Bristol. Berechiah b. Naṭronai ha-Naḳdan produced in England his "Fox Fables," one of the most remarkable literary productions of the Middle Ages. In the thirteenth century, however, only a few authorities, like Moses of London, Berechiah de Nicole, Aaron of Canterbury, and Elyas of London, are known, together with Jacob b. Judah of London, author of a work on the ritual, "'Eẓ Ḥayyim," and Meïr of Norwich, a liturgical poet. Throughout they were a branch of the French Jewry, speaking French and writing French glosses, and almost up to the eve of the expulsion they wrote French in ordinary correspondence ("R. E. J." xviii. 256).

Organization; Chief Rabbis.

As has been mentioned above, the Jews were allowed to have their own jurisdiction, and there is evidence of their having a bet din with three "episcopi," or dayyanim; furthermore, reference is made to the parnas, or president, and gabbai, or treasurer, of the congregation, and to scribes and chirographers. A complete system of education seems to have been in vogue, with local schools in the provinces, and the high school in London in Ironmonger Lane. In the latter the "separated" ("perushim") were trained from the age of sixteen to twenty-three to act as masters of the Jewish law (Jacobs, "Jews of Angevin England," pp. 243-257, 342-344).

At the head of the whole Jewry was placed a chief rabbi, known as "the presbyter of all the Jews of England"; he appears to have been selected by the Jews themselves, who were granted a congé d'élire by the king. The latter claimed, however, the right of confirmation, as in the case of bishops. The Jewish presbyter was indeed in a measure a royal official, holding the position of adviser, as regards Jewish law, to the Exchequer of the Jews. For the English legal system admitted the validity of the Halakah in its proper sphere as much as it did that of the canon law. Six presbyters are known through the thirteenth century: Jacob of London, reappointed 1200; Josce, 1207; Aaron of York, 1237; Elyas of London, 1243; Hagin fil Cresse, 1257; and Cresse fil Mosse.

Intermediate Period: Between the expulsion of the Jews in 1290 and their formal return in 1655 there is no official trace of Jews as such on English soil except in connection with the Domus Conversorum, which kept a considerable number of them within its precincts up to 1551 and even later. An attempt was made to obtain a revocation of the edict of expulsion as early as 1310, but in vain. Notwithstanding, a certain number of them appear to have come back; for complaints were made to the king in 1376 that some of those trading as Lombards were Jews ("Rot. Parl." ii. 332a). Occasionally permits were given to individuals to visit England, as in the case of Dr. Elyas Sabot in 1410; but it was not until the expulsion of the Jews from Spain that any considerable number of Hebrews found refuge in England. One of these as early as 1493 attempted to recover no less a sum than 428,000 maravedis which the refugees from Spain had entrusted to Diego de Soria. In 1542 many were arrested on the suspicion of being Jews, and throughout the sixteenth century a number of persons named Lopez, possibly all of the same family, took refuge in England, the best known of them being Rodrigo Lopez, physician to Queen Elizabeth, and who is said to have been the original of Shylock. Besides certain distinguished converts like Tremellius and Philip Ferdinand, the most remarkable visitor was Joachim Gaunse, who introduced new methods of mining into England. Occasional visitors, like Alonzo de Herrera and Simon Palache in 1614, are recorded.

Maranos in England.

Resettlement Period: Toward the middle of the seventeenth century a considerable number of Marano merchants settled in London and formed there a secret congregation, at the head of which was Antonio Fernandéz Carvajal. They conducted a large business with the Levant, East and West Indies, Canary Islands, and Brazil, and above all with the Netherlands, Spain, and Portugal. They formed an important link in the network of trade spread especially throughout the Spanish and Portuguese world by the Maranos or secret Jews (see Commerce). Their position enabled them to give Cromwell and his sĕcretary, Thurloe, important information as to the plans both of Charles Stuart in Holland and of the Spaniards in the New World (see L. Wolf, "Cromwell's Secret Intelligencers"). Outwardly they passed as Spaniards and Catholics; but they held prayer-meetings at Cree Church Lane, and became known to the government as Jews by faith.

Meanwhile public opinion in England had been prepared by the Puritan movement for a sympathetic treatment of any proposal by the Judaizing sects among the extremists of the Parliamentary party for the readmission of the Jews into England. Petitions favoring readmission had been presented to the army as early as 1649 by two Baptists of Amsterdam, Johanna Cartwright and her son Ebenezer ("The Petition of the Jews for the Repealing of the Act of Parliament for Their Banishment out of England"); and suggestions looking to that end were made by men of the type of Roger Williams, Hugh Peters, and by Independents generally. Many were moved in the same direction by mystical Messianic reasons; and their views attracted the enthusiasm of Manasseh ben Israel, who in 1650 published his "Hope of Israel," in which he advocated the return as a preliminary to the appearance of the Messiah. The Messiah could not appear till Jews existed in all the lands of the earth. According to Antonio de Montesinos, the Ten Tribes had been discovered in the North-American Indians, and England was the only country from which Jews were excluded. If England admitted them, the Messianic age might be expected.

Meanwhile the commercial policy which led to the Navigation Act in Oct., 1651, made Cromwell desirous of attracting the rich Jews of Amsterdam to London so that they might transfer their important trade interests with the Spanish main from Holland to England. The mission of St. John to Amsterdam, which had previously proposed, as an alternative to the Navigation Act, a coalition between English and Dutch commercial interests, had negotiated with Manasseh ben Israel and the Amsterdam community. A pass was granted to Manasseh, but he was unable to use it on account of the war between England and Holland, which lasted from 1652 to 1654. As soon as the war ceased, Manasseh ben Israel sent his brother-in-law, David Abravanel Dormido, to London to present to the council a petition for the readmission of Jews. The council, however, refused to act. Cromwell therefore induced Manasseh himself to come over to London, which he did at the end of Sept., 1655, and there printed his "humble address" to Cromwell. As a consequence a national conference was summoned at Whitehall in the early part of December, including some of the most eminent lawyers, divines, and merchants in the kingdom. The lawyers declared there was nothing against the Jews' residing in England, but both the divines and merchants were opposed to readmission, and Cromwell stopped the discussion in order to prevent an adverse decision (see Cromwell, Oliver).

Manasseh ben Israel's Mission.

Early in the following year (1656) the question came to a practical issue through the declaration of war against Spain, which resulted in the arrest of Antonio Rodrigues Robles, and forced the Maranos of London to avow their Judaism as a means of avoiding arrest as Spaniards and the confiscation of their goods. As a final result, Cromwell appears to have given informal permission to the Jews to reside and trade in England on condition that they did not obtrude their worship on public notice and that they refrained from making proselytes. Under cover of this permission Carvajal and Simon de Caceres purchased a piece of land for a Jewish cemetery in 1657, and Solomon Dormido, a nephew of Manasseh ben Israel, was admitted to the Royal Exchange as a duly licensed broker of the city of London without taking the usual oaths involving faith in Christianity. Carvajal had previously been allowed to take out letters of denization for himself and son.

This somewhat surreptitious method of solving the Jewish question in England had the advantage of not raising anti-Semitic feeling too strongly; and it likewise enabled Charles II., on his return, to avoid taking any action on the petition of the merchants of London asking him to revoke Cromwell's concession. He had been assisted by several Jews of royalist sympathies, as Mendes da Costa and Augustine Coronel-Chacon, during his exile. In 1664 a further attempt was made by the Earl of Berkshire and Mr. Ricaut to bring about the expulsion of the Jews, but the king in council assured the latter of the continuance of former favor. Similar appeals to prejudice were made in 1673, when Jews, for meeting in Duke's Place for a religious service, were indicted on a charge of rioting, and in 1685, when thirty-seven were arrested on the Royal Exchange; but the proceedings in both cases were put a stop to by direction of the Privy Council. The status of the Jews was still very indeterminate. In 1684, in a case connected with the East India Company, it was contended that they were alien infidels, and perpetual enemies to the British crown; and even the attorney-general declared that they resided in England only under an implied license. As a matter of fact, the majority of them were still aliens and liable to all the disabilities which that condition carried with it.

William III., though it is reported that he was assisted in his descent upon England by a loan of 2,000,000 gulden from Antonio Lopez Suasso, afterward Baron Avernes de Gras, did not interfere when in 1689 some of the chief Jewish merchants of London were forced to pay the duty levied on the goods of aliens; though he refused a petition from Jamaica to expel the Jews. His tenure of the throne, however, brought about a closer connection between the London and the Amsterdam communities, and thus aided in the transfer of the center of European finance from the Dutch to the English capital. Early in the eighteenth century the Jewish community of London comprised representatives of the chief Jewish financiers of northern Europe, including the Mendez da Costas, Abudientes, Salvadors, Lopezes, Fonsecas, and Seixas. A small German contingent had arrived and established a synagogue in 1692; but they were of little consequence, and did not figure in the relations between the Jews and the government. The utility of the larger Jewish merchants was recognized. Marlborough in particular made great use of the services of Sir Solomon de Medina, and indeed was publicly charged with taking an annual subvention from him. These merchants are estimated to have brought into the country a capital of £1,500,000, which had increased by the middle of the century to £5,000,000. As early as 1723 a special act of Parliament was passed which permitted them to hold land on condition of their taking oath when registering their title; they were allowed to omit the words "upon the faith of a Christian." Some years later (1740) an act was passed permitting Jews who had resided in the British colonies for a period exceeding seven years to become naturalized (13 Geo. II., cap. 7). Shortly afterward a similar bill was introduced into the Irish Parliament, where it passed the Commons in 1745 and 1746, but failed to pass the Irish Peers in 1747; it was ultimately dropped. Meanwhile, during the Jacobite insurrection of 1745 the Jews had shown particular loyalty to the government. Their chief financier, Samson Gideon, had strengthened the stock market, and several of the younger members had volunteered in the corps raised to defend London.

The Jew Bill of 1753.

Possibly as a reward, Pelham in 1753 brought in a bill allowing Jews to become naturalized by application to Parliament. It passed the Lords without much opposition, but on being brought down to the Commons the Tory party made a great outcry against this "abandonment of Christianity," as they called it. On the other hand, it was contended that the Jews performed a very valuable function in the commercial economy of the nation, providing one-twelfth of the nation's profits and one-twentieth of its foreign trade. The Whigs, however, persisted in carrying out at least one part of their general policy of religious toleration, and the bill was passed and received the royal assent (26 Geo. II., cap. 26). Nevertheless, a great clamor was raised against it, and the lord mayor and the corporations of London petitioned Parliament for its repeal. Effigies of Jews were carried about in derision, and placards with the inscription "No Jews, no wooden shoes" were pasted up in the most prominent public resorts. The latter part of the popular cry referred to foreign Protestants, chiefly Huguenots, whom the Pelham ministry had also tried to naturalize as recently as 1751, when the bill for their relief had been petitioned against and dropped. A naturalization bill for foreign Protestants had been passed as early as 1709, but was repealed three years later; and the precedent was now followed in the case of the Jews (Lecky, "History of England in the Eighteenth Century," i. 283). In 1754 the Jew Bill was repealed, and an attempt was even made to obtain the repeal of the act of 1740 permitting the Jews in the colonies to be naturalized. It is difficult to understand the intensity of the popular outburst at the time, since the sons of the very persons whom the populace refused to allow to be naturalized became by mere place of birth subjects of the British crown.

The influence of the repeal of the bill on the Sephardic Jews of England, who were chiefly affected by it, was deplorable. Samson Gideon, the head of the community, determined to bring up his children as Christians, and his example was followed by many of the chief families during the remainder of the century. A general feeling of insecurity came over the community. With the accession of George III. a Committee of Deputados was formed as a sequel to the Committee of Diligence which had been appointed to supervise the passing of the Jew bills through the Irish Parliament. By this time the German Jews had become of sufficient importance for a certain number of them to be associated with the deputies in the address of congratulation on the accession of George III., but they did not form a regular part of the Board of Deputies, the only representative body of English Jews. The activity of the board, however, was mainly devoted to helping coreligionists abroad, the wealth of the London community attracting needy applicants from both the Old World and the New.

The Oath of Abjuration.

The deputies do not appear to have made a protest even against the Oath of Abjuration Act (6 George III., cap. 52). This fixed the status of the Jews by declaring an oath of abjuration, containing the words "upon the faith of a Christian," to be necessary for all officers, civil or military, under the crown or in the universities, and for all lawyers, voters, and members of Parliament.

At this time a number of the more prominent members of the Sephardic community, as the Bernals, Lopezes, Ricardos, Disraelis, Aguilars, Bassevis, and Samudas, gradually severed their connection with the synagogue and allowed their children to grow up either without any religion or in the Established Church, which gave them an open career in all the professions. Meanwhile the ranks of the English Jewry were being recruited from the downtrodden German and Polish communities of the Continent. While the Sephardim chiefly congregated in London as the center of international commerce, the German Jews settled for the most part in the seaports of the south and west, such as Falmouth, Plymouth, Liverpool, Bristol, etc., as pawnbrokers and small dealers. From these centers it became their custom to send out hawkers every Monday with packs to the neighboring villages; and in this way connections were made with some of the inland towns, in which they began to settle, as Canterbury, Chatham, and Cambridge, not to mention Manchester and Birmingham. Traders of this type, while not of such prominence as the larger merchants of the capital, came in closer touch with English life; and they doubtless helped to allay some of the prejudice which had been manifested so strongly during 1753.

Influence of Jewish Pugilists.

Another curious cause contributed to the same end. Jews, mainly of the Sephardic branch, became prominent in the national sport of boxing. Their light physique made it necessary for them to substitute scientific defense for the brutal displays of strength which had hitherto formed a staple of boxing-bouts. Daniel Mendoza by superior science defeated Humphreys in 1789, and became champion of England. A little later Samuel Elias, known as "Dutch Sam," invented the "upper cut" and made boxing fashionable among the upper classes. When the Englishmen of the lower classes found themselves beaten at their own peculiar sport by the heretofore despised Jew, a certain amount of sympathy was aroused; and there can be no doubt that the changed attitude of the populace toward Jews between 1753 and 1829 was due in some measure to the succession of champion Jewish boxers. Notwithstanding, there are distinct signs of deterioration shown by the Jewish population toward the end of the eighteenth century, the picture given by Colquhoun in 1800 of the London community being most unsatisfactory.

A further cause for kindlier feeling on the part of at least the middle classes of Englishmen toward the Jews was supplied by the revival of conversionist hopes at the beginning of the nineteenth century.

Misled doubtless by the tendency to desertion shown by not a few of the Sephardim, many evangelicals anticipated the conversion en masse of the Jewish population, and on the initiative of Lewis Way the London Society for the Promotion of Christianity Among the Jews was founded in 1807. This and kindred societies wasted large sums of money with indifferent results. But politically they helped to increase sympathy for the Jews among the non-conformists, who formed the bulk of their contributors and were at the same time becoming a leading factor in the formation of Liberal policy. Similarly, at a much later period the craze of Anglo-Israelism made many of the narrower Bible Christians more sympathetic toward the Jews. On the other hand, the great influence of Dr. Thomas Arnold in the Liberal ranks was ultimately directed against the Jewish hopes. The more Erastian he was, the more he desired to see the legislature exclusively Christian.

In the meanwhile the lead among the English Jews was passing from the Spanish to the German section of the community. The bankers Goldsmid acquired both influence and culture, and their efforts to raise the community were soon to be supplemented by those of Nathan Rothschild, the ablest of Mayer Rothschild's sons, who had settled first in Manchester and afterward in London. The times were in a measure propitious for a new effort to remove the civil disabilities of the Jews. The example of France had not been without its effect. The rising tide in favor of religious liberty, as applied to dissenters generally and to Roman Catholics in particular, might have been expected to carry with it more favorable conditions for the Jews; but a long struggle was to intervene before "Englishmen of the Jewish persuasion" were to have equal rights with other Englishmen.

The Struggle for Emancipation.

When in 1829 the Roman Catholics of England were freed from all their civil disabilities, the hopes of the Jews rose high; and the first step toward a similar alleviation in their case was taken in 1830 when Mr. Huskisson presented a petition signed by 2,000 merchants and others of Liverpool. This was immediately followed by a bill presented by R. Grant on April 15 of that year which was destined to engage the English legislature in one form or another for the next thirty years. At first the bill failed even to get through the House of Commons, though it is true that, against the opposition of Sir Robert Inglis, the first reading was passed by 115 to 97 votes. But the second reading, on May 17, notwithstanding a monster petition in its favor from 14,000 citizens of London, was rejected by 265 to 228 votes. The next year (1833), however, it passed its third reading in the Commons, July 22, by the large majority of 189 to 52, and was even read for the first time in the Lords. But on the second reading (Aug. 1) it was rejected by 104 to 54, though the Duke of Sussex, a constant friend to the Jews, presented a petition in its favor signed by 1,000 distinguished citizens of Westminster. In 1834 the bill underwent the same experience, being lost in the House of Lords by a majority of 92 votes. The whole force of the Tory party was against the bill, which had, besides, the personal antagonism of the bluff sailor king, William IV. In the following year it was deemed inadvisable to make the annual appeal to Parliament, as the battle for religious liberty was going on in another part of the field; but by the passing of the Sheriffs' Declaration Bill, Aug. 21, 1835, Jews were allowed to hold the ancient and important office of sheriff. In the following year the Jew Bill was introduced late in the session, and succeeded so far as to pass the first reading in the Lords on Aug. 19. It was then dropped owing to the lateness of the session.

For a time the advocates of emancipation seem to have lost heart. The chief supporters of the bill, R. Grant in the Commons, and Lord Holland in the Lords, died within a few months of each other in 1840, and during the next four years the political activity of the English Jews was concentrated on the attempt to obtain admission to municipal office. A bill to that effect got as far as a first reading in the Lords by one vote, in 1841, but was lost on a second reading. It was not until July 31, 1845, that the bill was carried. In the following year (Aug. 18, 1846) the Religious Opinions Relief Bill removed a certain number of minor disabilities which affected the Jews of England as well as other dissenters from the Established Church, and the only portal which still remained closed to the Jews was that of Parliament.

Action of Sir David Salomons.

The success with which the Jews of England had induced Parliament to admit them to the shrievalty and to municipal offices had been due to the fact that Jews had been actual candidates, and had been elected to those offices before any parliamentary relief was asked. It was now decided to adopt the same policy in regard to a seat in Parliament itself. Baron Lionel de Rothschild was elected member of Parliament for the city of London by a large majority in 1847, and the bill that was introduced on Dec. 16 of that year was intended to carry out the wishes of a definite English constituency. This passed its third reading in the Commons on May 4, 1848, by a majority of 62 votes, but was rejected in the Lords by 163 non-contents to 128 contents. The same thing happened in 1850 when Baron Lionel de Rothschild was again elected, but in the following year the struggle took on another and more dramatic form. David Salomons, who had successfully fought the battle for the shrievalty and the aldermanic chair, had been elected member for Greenwich and insisted on taking his seat, refusing to withdraw on being ordered to do so by the speaker, and adding to his seeming parliamentary offense by voting in the division on the motion for adjournment which was made to still the uproar caused by his bold course of action. The prime minister moved that Salomons be ordered to withdraw, and on that motion Salomons spoke in a dignified and forcible manner, and won the sympathy of the House, which nevertheless passed the premier's motion. The matter was then referred to the law courts, which decided that Salomons had no right to vote without having taken the oath of abjuration in the form appointed by Parliament, and mulcted him in a fine of £500 for each vote he had recorded in the Commons.

The government then brought in another bill in 1853, which was also rejected by the Lords. In 1855 the hero of the parliamentary struggles, David Salomons, was elected lord mayor of London. In the following two years bills were introduced by the government to modify the parliamentary oath, but they failed to obtain the assent of the Lords. In 1858 when the Oath Bill reached the Lords they eliminated the clause relating to Jews; but when the bill was referred again to the Commons, the lower house refused to accept it as amended, and appointed a committee to formulate its reasons, upon which committee, as if to show the absurdity of the situation, the member for the city of London, Baron Lionel de Rothschild, was appointed to serve—which he could legally do, even though he had not taken his seat. A conference was appointed between the two houses, and ultimately a compromise was reached by which either house might admit Jews by resolution, allowing them to omit the words "on the true faith of a Christian." As a consequence, on Monday, July 26, 1858, Baron Lionel de Rothschild took the oath with covered head, substituting "so help me, Jehovah" for the ordinary form of oath, and thereupon took his seat as the first Jewish member of Parliament. Two years later a more general form of oath for all members of Parliament was introduced, which freed the Jews from all cause of exclusion. In 1870 the University Test Act removed the difficulties in the way of a Jew becoming a scholar or a fellow in an English university. In 1885 Sir Nathaniel de Rothschild was raised to the upper house as Lord Rothschild, to be followed within a few years by Baron Henry de Worms as Lord Pirbright and Mr. Sydney Stern as Lord Wandsworth; while in 1890 all restrictions for every position in the British empire, except that of monarch, were removed, the offices of lord high chancellor and of lord lieutenant of Ireland being thrown open to every British subject without distinction of creed.

For some time after their admission to Parliament, the Jewish M.P.'s belonged to the party that had given them that privilege, and Sir George Jessel acted as solicitor-general in Gladstone's first ministry. But from the time of the Conservative reaction in 1874 Jewish voters and candidates showed an increasing tendency toward the Tory party; and of recent years the majority of Jewish members of the lower house have been of that political complexion. The influence of Lord Beaconsfield may have had some effect on this change, but it was in the main due to the altered politics of the middle and commercial classes, to which the Jews chiefly belonged. Baron Henry de Worms acted as under secretary of state in one of Lord Salisbury's ministries, while Sir Julian Goldsmid, a Liberal Unionist after the Home Rule policy of Gladstone was declared, made a marked impression as deputy speaker of the House of Commons.

Altogether the struggle had lasted for sixty years, though practically all that was contended for had been gained in half that period. Yet it must be remembered that complete equality was not granted to Roman Catholics and Jews until 1890. The very length of the struggle shows how thoroughly the opposition had been overcome. The many political friendships made during the process had facilitated social intercourse, which is nowhere so unrestricted as in England. (See ACTS OF PARLIAMENT.)

Organization.

The pause which occurred between 1840 and 1847 in the emancipation struggle was due in large measure to an unfortunate schism which had split the community in two and which prevented the members acting in unison for the defense of their rights. The Reform movement had reached England in a mild form under the influence of the Goldsmid family, which had been touched by the Mendelssohnian movement. In 1841 a Reform congregation was established in London, and was practically excommunicated by both the Spanish ḥaham and the German chief rabbi (see REFORM). The effect of these differences was to delay common action as regards emancipation and other affairs; and it was not until 1859 that the charity organization was put on a firm footing by the creation of the Jewish Board of Guardians. Ten years later the congregations were brought under one rule by the formation of the UNITED SYNAGOGUE (1870), in the charter of which an attempt was made to give the chief rabbi autocratic powers over the doctrines to be taught in the Jewish communities throughout the British empire. But Parliament, which had recently disestablished the Irish Church, did not feel disposed to establish the Jewish Synagogue, and the clause was stricken out. The chief rabbi's salary is paid partly out of contributions from the provincial synagogues, and this gives him a certain amount of authority over all the Jews of the empire with the exception of the 3,000 or more Sephardim, who have a separate ḥaham, and of the dwindling band of Reformers, who number about 2,000, scattered in London, Manchester, and Bradford. In 1871 the Anglo-Jewish Association was established to take the place, so far as regards the British empire, of the Alliance Israélite, which had been weakened by the Franco-German war. The Jews of England felt that they should be organized to take their proper part in Jewish affairs in general. For many years they, together with the French Jews, were the only members of the race who were unhampered by disabilities; and this enabled them to act more freely in cases where the whole body of Israel was concerned.

As early as 1840, when the blood accusation was revived with regard to the Damascus affair, and Jewish matters were for the first time treated on an international basis, the Jews of England took by far the most prominent position in the general protest of the European Jewries against the charge. Not only was the Board of Deputies at London the sole Jewish body in Europe to hold public meetings, but owing to their influence a meeting of protest was held by eminent Christians at the Mansion House, London (July 3, 1840), which formed a precedent for subsequent distinguished gatherings. Sir Moses Montefiore, after aiding the Damascus Jews by obtaining, in an interview with the sultan at Constantinople, a firman repudiating the blood accusation, visited Russia in 1846 to intercede for his coreligionists there. In 1860 he went to Rome in connection with the Mortara affair; and in 1863 he led a mission to Morocco on behalf of Jews of that country. Action was likewise taken by the chief English Jews in behalf of the unfortunate Hebrews of the Danubian principalities. Sir F. Goldsmid made an interpellation in the House of Commons with regard to the Jews of Servia (March 29, 1867), and started a debate in that assembly (April 19, 1872) on the subject of the persecutions of the Jews in Rumania. As a consequence a Rumanian committee was formed, which watched the activities of the illiberal government of that country.

When in 1881 the outburst of violence in Russia brought the position of the Russian Jews prominently before the world, it was their coreligionists in England who took the lead in organizing measures for their relief. Articles in the "Times" of Jan. 11 and 13, 1882, drew the attention of the whole world to the extent of the persecutions, and a meeting of the most prominent citizens of London was held at the Mansion House, Feb. 1, 1882 (see MANSION HOUSE MEETING). As a consequence a fund was raised amounting to more than £108,000, and a complete scheme of distributing in the United States the Russian refugees from Brody was organized by the committee of the Mansion House Fund. Similarly, when a revival of the persecutions took place in 1891, another meeting was held at the Guildhall, and a further sum of over £100,000 was collected and devoted to facilitating the westward movement of the Russian exodus. An attempt was made this time to obtain access directly to the czar by the delivery of a petition from the lord mayor and citizens of London; but this was contemptuously rejected, and the Russo-Jewish committee which carried out the work of the Mansion House Fund was obliged to confine its activity to measures outside Russia. When Baron de Hirsch formed his elaborate scheme for the amelioration of the condition of the persecuted Jews, headquarters were established by him in London, though the administration was practically directed from Paris. The immigrants being excluded from most of the cities of the Continent, the burden of receiving most of the Russian refugees moving westward fell on England.

The Result of the Russian Exodus.

The advent of such a large number of Jews, unprovided with capital, and often without a definite occupation, brought with it difficulties which taxed the entire resources of the English communities. It was only natural that the newcomers should arouse a certain amount of prejudice by their foreign habits, by the economic pressure they brought to bear upon certain trades, especially on that of clothing, and by their overcrowding in certain localities. While the Continent had seen the rise of strong anti-Semitic feeling, England had been comparatively free from any exhibition of this kind. During Lord Beaconsfield's ministry a few murmurs had been heard from the more advanced Liberals against the "Semitic" tendencies of the prime minister and his brethren in race, but as a rule social had followed political emancipation almost automatically. The Russian influx threatened to disturb this natural process, and soon after 1891 protests began to be heard against the "alien immigrants." Bills were even introduced into Parliament to check their entry into England. Nothing came of these protests, however, till the year 1902, when the question had reached such a point that it was deemed desirable to appoint a royal commission to inquire into the whole subject. This commission has heard evidence both from those favoring and from those opposed to restricted immigration. There is no evidence that the establishment of this commission implied any anti-Semitic feeling on the part of the government: it was merely a natural result of an exceptional state of overcrowding in the East End of London.

The favorable condition of the English Jews has not hitherto resulted in any very remarkable display of Jewish talent. English Jews have contributed nothing of any consequence to rabbinic scholarship or even to halakic or exegetic learning, though the commentaries of M. Kalisch on the Pentateuch are a mine of learning, and in the later volumes anticipate some of the most far-reaching results of the "higher criticism." The Hebrew chair at University College and the rabbinic readerships of the universities of Oxford and Cambridge have naturally been filled by Jewish incumbents. The libraries of England have become the receptacles of the largest collection of Hebrew manuscripts and early Hebrew books (see BIBLIOGRAPHY). In the eighteenth century two Jews, Dr. Sarmiento and E. Mendes da Costa, became members of the Royal Society. Moses Mendes was a poetaster of some repute. David Levi translated the prayers, and defended Judaism from the attacks of Dr. Priestley. Isaac D'Israeli wrote his inaccurate but entertaining "Curiosities of Literature." Rev. Solomon Lyon was Hebrew teacher at the University of Cambridge, and his daughter, Emma Lyon, was the first Anglo-Jewish authoress. Michael Josephs displayed some ability in Hebrew writing, and Arthur Lumley Davids published a Turkish grammar. Grace Aguilar wrote novels which attained some popularity, while E. H. Lindo wrote a praiseworthy history of the Jews of Spain and Portugal which has still some value. More recently Israel Zangwill has obtained more than local celebrity by his novels and sketches of Jewish life. Other Jewish novelists have been B. L. Farjeon, the late Amy Levy, and S. L. Gordon. S. L. Lee has edited the later volumes of "The Dictionary of National Biography," while I. Gollancz, besides editing the "Temple Library," has helped to found and has become secretary of the British Academy.

Literature.

In other lines of activity Jews have fully participated in the national life. Sir George Jessel was a most distinguished master of the rolls; Professor Waley, an authority on conveyancing; and Sir George Lewis is perhaps the best known living English solicitor. Dr. Ernest Hart was a leader in modern methods of sanitation. English Jews are reported to have taken more than their share in the Volunteer movement when it first sprang into existence in 1860. During the recent war in South Africa no less than 1,000 Jewish soldiers took part in the campaign. Among these the most distinguished were Colonel Goldsmid and Major Sir Matthew Nathan, the latter of whom has also held important command and has been governor of the West Coast of Africa.

Since the abolition of university tests in 1870, which was largely influenced by the success of Numa Hartog as senior wrangler at Cambridge in 1869, Jews have taken some share both as students and teachers in English university life. Joseph James Sylvester was Savilian professor of geometry at Oxford, a position due to his undoubted distinction in the world of mathematics; S. Alexander is professor of mental philosophy and E. Schuster professor of physics in the Victoria University, Manchester, and C. Waldstein was for a time Slade professor of fine arts in Cambridge University. R. Meldola is professor of chemistry at the Finsbury Technical College, while Sir Philip Magnus has been secretary and director of the London Technical Institute, and is one of the greatest English authorities on technical education generally.

In art the list of Jewish names is somewhat scanty. Solomon Hart became a Royal Academician; Simeon Solomon was one of the most promising leaders of the pre-Raffaelite movement; and S. J. Solomon is an A.R.A. Sir Julius Benedict and F. H. Cowen are the chief names in music.

The Colonies.

Jews have taken more than their due share in the colonial expansion of England. Jacob Montefiore, a cousin of Sir Moses Montefiore, was one of the chief pioneers of South Australia in 1835. Hon. Nathaniel Levi did much to develop both the coal and beet-sugar industries of Victoria. Sir Julius Vogel was premier of New Zealand for many years, and did much to promote its remarkable prosperity; while New South Wales has been represented by Sir Saul Samuel and Sir Julien Salomons as agents-general for that colony. Similarly, in South Africa the firm of Mosenthal Brothers and Jonas Bergtheil helped much toward the development of Cape Colony and Natal; while the gold and diamond industries of the Rand were chiefly in Jewish hands, notably those of Barnato Brothers, Wernher, Beit & Company, etc.

Statistics.

At the beginning of the nineteenth century the number of Jews in England was not supposed to exceed 8,000, of whom at least 6,000 were in London. The increase was comparatively slow until the Russian immigration of 1880, when there were probably about 60,000 Jews in the British Isles. At the present time it is calculated that England has a Jewish population of 148,811, as against 7,428 in Scotland, and 3,771 in Ireland, giving approximately 160,000 for the British Isles. In 1901 the British empire had in all about a quarter of a million Jews, distributed as follows:

British Isles	160,000	Hongkong	150
Aden	2,826	India	18,228
Australasia	16,678	Jamaica	2,000
Barbados	20	Malta	60
Canada and British Columbia	16,432	South Africa	20,000
Cyprus	68	Straits Settlements	535
Gibraltar	2,000	Trinidad	30
		Total	239,027

J.

ENGLÄNDER, GABRIEL HIRSCH: Austrian scholar; lived at Vienna in the first half of the nineteenth century. He wrote: "Emunah Lishene 'Afar," prayers to be recited in the cemetery, with a German translation (Vienna, 1828); "Ḳorot Yisrael," extracts from the Pentateuch, with a German translation (*ib.* 1837); "Andachtsklänge für Israel's Söhne und Töchter," prayers for special occasions (*ib.* 1843). Engländer edited Aaron ha-Levi's "Sefer ha-Ḥinnuk," on the 613 commandments, to which he added an index (*ib.* 1827).

L. G. M. Sel.

ENGLÄNDER, SIGMUND: Austrian writer; born at Vienna; died at Turin Nov. 30, 1902. After graduating from the University of Vienna he devoted himself to literary work. He was an intimate friend of the poet Friedrich Hebbel. In 1847 he edited at Vienna a monthly called "Der Salon: Mittheilungen aus den Kreisen der Litteratur, Kunst und des Lebens"; on account of the vexatious Austrian censorship, however, he was compelled, after three volumes had been issued, to discontinue its publication. During the upheaval of 1848 he was foremost among those journalists who supported the popular cause. On the surrender of Vienna to the government troops, Engländer was one of the twelve hostages whom Windischgrätz demanded should be handed over to him for punishment. Having had timely warning, he succeeded in eluding the authorities, and reached Frankfort-on-the-Main. Still pursued by the government, he went to Paris, where he published with the help of Baron de Reuter a lithographed "Correspondence" which contained extracts from newspapers.

His revolutionary tendencies brought him into conflict with the Parisian authorities, and after a term of imprisonment he was expelled from the country. He sought refuge in London, and became correspondent for several Continental papers and editor of the "Londoner Deutsche Zeitung." Among his writings is "Geschichte der Französischen Arbeiter-Associationen."

S. L. La.

ENGLISCH, BERTHOLD: Austrian chess-player; born 1851 at Hotzenplotz, Austrian Silesia; died Oct. 19, 1897, in Vienna. In 1879 he gained the first prize at the Leipsic tournament; in 1883 he was fourth in the London tourney; in 1887 in the Frankfort-on-the-Main tournament (twenty-one entries) he gained the seventh prize, winning over Alapin, Gunsberg, and Zuckertort; and in 1896 he won the first prize in the tournament arranged by Baron Rothschild.

S. A. P.

ENGRAVING AND ENGRAVERS.—Biblical Data: Engraving is the act and art of cutting letters, figures, and the like, on stone, wood, or metal. The account of the equipment of the high priest (Ex. xxviii., xxxix.) evidences that this art had been developed to a high degree among the Hebrews at an early period. To designate the skill of the worker the word חרש and its derivative חרשת are employed, while פתוח and מקלעת and מחקה denote the process and the finished result (Ex. xxviii. 11, 21, 36; xxxi. 5; xxxv. 33; xxxix. 14, 30; Zech. iii. 9; I Kings vi. 18, 19, 32, 35; vii. 31; [חרות, Ex. xxviii. 11, 21, 36, is probably a scribal error for, or a dialectic form of, חרוש]). The seal-engraver's art is cited to indicate the manner of work to be done on precious stones (Ex. xxviii. 11). Of the Phenicians it is known that they had attained proficiency in the engraving of signet-rings (Benzinger, "Hebräische Archäologie," p. 258). As the same necessity for using signet-rings (to sign contracts and other documents) existed among the Hebrews, it is reasonable to assume equal proficiency in this art among them, especially since the signet-ring is mentioned as among the usual appointments of men of standing (Gen. xxxviii. 18). As in the case of Bezalel (Ex. xxxi. 2), engravers were looked upon as endowed with a divine spirit of wisdom and understanding. Phenician artists were imported (II Sam. v. 11) at a comparatively late period.

On Precious Stones.

The precious stones in the ephod and the breastplate of the high priest, as well as the inscription on the gold plate in his head-dress (Ex. xxviii., xxxix.), are specially mentioned as specimens of the engraver's art. The ornaments on the walls of Solomon's Temple (I Kings vi. 18, 19) are products of the wood-engraver's skill (comp. II Sam. v. 11). The instrument used is known as עט, with the usual qualification הברזל ("the iron style"), tipped with a diamond point (Jer. xvii. 1), and used for engraving letters (Job xix. 24), or, more properly, as חרט, the graving-tool by which incisions were made (Ex. xxxii. 4). Both relief-engraving, as in the case of the cherubim, and intaglio-engraving, for signet-rings and gems, seem to have been known. Job xix. 24 has been construed as showing that for purposes of inscriptions lead was used. In the "pesel" (graven image) the form and figure are completely separated from the block of material used. According to Maimonides, Abraham ben David, and other Talmudic authorities (Giṭ. 20a; "Yad," Kele ha-Mikdash, ix. 2), relief-work alone (pressed out from beneath) was permissible in objects connected with sacerdotal service. For this reason, as gems could not be worked in this way, in the case of the precious stones on the ephod and the breastplate a miracle was assumed: the worm Shamir traced the letters which appeared on them (Soṭah 48b; Naḥmanides to Ex. xxv. 7).

E. G. H.

——**In Medieval and Modern Times:** Playing-cards were one of the first products of the art of wood-engraving; they were printed from wooden blocks and then colored. As the invention of "books of lots" and playing-cards, originally merely picture-cards, must be ascribed to the Jews and Saracens, it may be assumed that Jews were engaged at an early date in their manufacture; in fact, the only painter of playing-cards whose name has come down from the beginning of the sixteenth century in Germany is the Jew Meyer Chaym of Landau (1520). Contemporaneous with Chaym, the sons of the portrait-painter Moses dal Castellazzo were working at Venice as stamp-cutters; but the only thing known about them is that in 1521 they illustrated a Pentateuch after designs by their father. There may have been a number of such Jewish artists in the sixteenth century. Julius von Schlossar says, in reference to the illustrators of the Hebrew prints of this time (Haggadah of Sarajevo, p. 222, Vienna, 1898): "All the wood-cutters and engravers, as well as the printers and publishers, are Jews." Unfortunately, the names of these artists are not known; only occasionally did they add a monogram to their work. A single Jewish copper-plate engraver of this time is known by name—David Laudi, who was working at Cremona in 1550, furnishing the plates for the "Istoria di Cremona." The engraver Salom Italia of Amsterdam was probably a native of Lombardy; of his works only the portraits of Jacob Judah Leon and Manasseh ben Israel, etched respectively in 1641 and 1642, are known. The following engravers on copper were likewise working at Amsterdam in the seventeenth century: a son of Jacob Belmonte, Benjamin Senior Godines, also known as a calligrapher; B. de Almeyda; Abraham b. Jacob, who engraved a portrait of Aboab. Engravers of the eighteenth century—chiefly illustrators of Hebrew books—were: Abraham Lopez de Oliveira; Aaron Sanctroos (Santcroos); Abraham Isaac Polack, who engraved a portrait of Saul b. Isaac ha-Levi, and had a reputation for pretty "ex libris." Among the engravers at Amsterdam in the nineteenth century were two members of the Amsterdam Academy, Moritz Dessauer and Abraham Lion Zeelander (1789–1856), the latter of whom engraved in outline the gallery of Wilhelm II., and Joseph Hartogensis and Jeremias Snoek, who painted and engraved the synagogue of Rotterdam.

In Germany.

In England Jewish engravers are not mentioned before the second half of the eighteenth century, among them being Ezekiel Abraham Ezekiel (1757–1806), who engraved some portraits of famous contemporaries; Solomon Bennet (1761–1838), who engraved his own portrait; and Salomon Polak, who engraved portraits and illustrated a Pentateuch. In Germany, similarly, Jewish engravers are not mentioned until the end of the eighteenth century. I. Schnapper of Offenbach engraved a portrait of Goethe in 1786, and one of Catherine II. Johann Michael Siegfried Lowe of Königsberg (1756–1831) was also a painter; M. Abrahamson the younger lived about the same time at Berlin, the only known work by him being the portrait of Hirschel Levin. Other engravers of Berlin were B. H. Bendix, born about 1770, who engraved chiefly portraits, and the well-known brothers Henschel. Löser Leo Wolf of Hamburg (1755–1840) engraved views and portraits. The following among modern German engravers should be mentioned: Friedrich Fränkel (b. 1832) and Georg Goldberg (b. 1830), both of Nuremberg, the former engraving from Dutch, and the latter from Italian and modern, masters (Kohut, "Berühmte Israelitische Männer und Frauen," i. 304 *et seq.*); Heinrich Redlich (d. 1884): Louis Jacoby of Berlin (b. 1828, and still working in 1903); Hermann Seligman Emden (1815–75) of Frankfort-on-the-Main; Henry Lemon of London (b. 1822).

Some Jewish artists also took up lithography: Leopold Dick of Kaiserslautern (1817–54), who furnished Biblical subjects after Raffael; Abraham Neu, who engraved (1830) a view of the synagogue of Worms; David Levi Elkan (b. 1808), known for his arabesques and satirical subjects; Veit Meyer (b. 1818?) and Gustav Wolf (b. 1798), both of Dresden, the latter of whom engraved a gallery; Julius Bien of New York (b. 1826); Leo Lehmann of Hamburg, who engraved portraits. The stamp-cutter Moses was working at Offenbach in 1825. Among French engravers must be noted: F. Moyse, who chose Jewish subjects, as "La Bénédiction de l'Aïeul"; Gustave Levy, who engraved portraits in the style of the earlier Italian masters, including those of the chief rabbis Lazare Isidor and Zadoc Kahn. Among the engravers of other countries are: H. Leibowicz, a Pole who produced 165 portraits during the middle of the eighteenth century; Joel Ballin, a Dane; M. Donat (*c.* 1833), the Hungarian calligrapher and engraver on copper; Samuel Jesi (1789-1853), the Italian, a member of the French Academy; and Max Liebermann and Joseph Israels, painters and etchers. In America the Rosenthals of Philadelphia, father and son, are among the best and most prolific engravers and etchers, while Julius Bien is one of the foremost lithographers.

Jews engaged more usually, however, in stone- and metal-engraving, two of the few arts they were permitted to practise, and the knowledge of which was frequently transmitted from father to son through successive generations. It is an open question whether or not this was due to some tradition handed down from antiquity, as modern Jewish stone-engravers are, apparently, mentioned for the first time at the end of the sixteenth century, when Pedro Teixeira met some at Aleppo. Diamond-cutting, an art for a long time known only to Jews, may have been introduced by them at Amsterdam at a relatively early period, as half the diamond-cutters there to-day are Jews; two of them, Fedder and Voorzanger, cut the Kohinoor in 1852. See also Antwerp.

Diamond-Cutting.

The Jews understood the art of engraving, as well as of cutting, diamonds. The first artists in this line known by name are the court seal-engraver Michael Abraham, at the electoral court of Brandenburg, and his brother Joseph Abraham, who was also employed by the elector. After Joseph's death (1697) his son Joseph Levi (Levi b. Joseph) was appointed court seal-engraver, and cut the coat-of-arms on a diamond for Frederick I. Joseph's sons, Uri Phoebus b. Abraham b. Joseph and Joseph b. Abraham b. Joseph, were likewise seal-engravers. The latter's son, Joseph Beretz (b. 1745), is also mentioned as a stone-engraver, probably being identical with the anonymous Jewish stone-engraver who, Meusel says ("Miscellaneen Artistischen Inhalts," xvii. 260), engraved the Decalogue upon a stone less than an inch square. A Jewish engraver at Lemberg, in 1773, even engraved on the stone of a ring a prayer of eighty-seven words (Geisler, "Skizzen . . . Joseph II." 1783). Many Jewish engravers, like the Abraham family, were the recipients of princely favors on account of their art. Philipp Hirsch (b. 1784), who had acquired the art from his father, was appointed court stone-engraver at the court of Württemberg. He engraved heads chiefly, as those of the King and Crown Prince of Württemberg, the Grand Duke of Baden, Schiller, and Goethe. Philipp Aaron was called to Schwerin by Christian Ludwig II., for whom he engraved "sigilla mystica." Toward the end of the eighteenth century the court engraver M. Löser was called to Sweden by the king in order to cut a coat-of-arms. The brothers Enoch (d. 1807) and Jacob Nathansen (d. 1816?), who were the scions of an old family of engravers, were appointed by the same king court seal-engravers. Other members of this family were: Levy Enoch Nathansen (d. 1845), who engraved antique heads on stone and copper; Wolff Nathansen (d. 1899), metal- and stone-engraver; B. Nathansen, worked in Hamburg from 1823 to 1829; and Eduard Nathansen (d. 1844), metal- and stone-engraver.

There were court seal-engravers at Dresden under August III.: Michael Samuel, and Jephiel Michael (Abt), who drew a salary from the court; the latter's son, Samuel Abt, was likewise a seal-engraver. Jean Henri Simon (1752–1833), one of the foremost artists in his line, who enjoyed the favor of many princes, engraved not only portraits on stone, as those of Napoleon, Louis XVIII., Louis Philippe, and Charles X., but also medals. He transmitted his art to his son, having himself acquired it from his father, who is called by his biographer "Jacob Simon," but who is probably identical with the eminent Belgian gem-cutter Jacob Mayer Simon. The Parisian engravers, Mayer Simon and Samuel Simon, the latter (b. 1760) being engraver to the post-office, were probably brothers of Jean Henri. The following were working in Paris about the same time: David Salomon, Israel Lion, Oury Philippe Lion, Samuel Abraham, Benjamin Bodenheim, Pierre Wolf, and the stone-engravers Samuel Mayer Oppenheim and Isaac Joseph Mareli; Napoleon III.'s court engraver, Stern, came somewhat later. Among the foremost stone-engravers of his time was Aaron Jacobsen (d. 1770), who cut cameos and intaglios. His son Aaron Salomon Jacobsen (1756–*c.* 1829) cut dies and medals, and was court engraver and member of the academy at Copenhagen. Another excellent Danish stone-engraver was B. Goldfarb (*c.* 1832). L. Baruch, of an old family of engravers, and an artist of reputation, was the teacher of his nephew, the eminent medal-coiner Jacob Wiener (1815–99), who in turn taught his brothers Leopold and Karl Wiener (d. 1867), both of whom were medal-engravers and sculptors. The following earlier Jewish medal-engravers deserve notice: Jacob ABRAHAM and his son Abraham ABRAHAMSON; Abraham Aaron, engraved (1785) a medal on the accession of Friedrich Franz I.; Abraham Jacobs, a medal (1765) on the jubilee of the "Commerz-Deputation" of Hamburg; Joel b. Lipmann Levi, the medal (1735) of R. Eliezer b. Samuel Schmelka; and the Dutch I. Elion.

In the eighteenth century almost all the larger Jewish communities had seal-cutters among their members. Schudt ("Jüdische Merckwürdigkeiten," ii. 172) reports them as frequently plying their trade at fairs and markets at the beginning of the eighteenth, and Bondi ("Sulamith," i. 227) at the beginning of the nineteenth, century. The Hamburg Jews' tax-lists of the beginning of the eighteenth century mention four seal-engravers (at the end of the century there were six) who carried on their work in the open street. Von Griesheim ("Traktat . . . die Stadt Hamburg," 1757, v. 1, 227) says, "The seal-engravers of Hamburg, especially the Jews, do very good work at reasonable rates."

Modern Engravers.

The following are well-known artists of the present time: Awner Grilliches and his son (Imperial Russian Mint); Emmanuel Hanneaux, the sculptor (among other plaques that of Coralie Cahen); the Russian sculptor Beer, living at Paris (medal on the occasion of the second Zionist congress); Löwenthal of Vienna (medal of Dr. A. Hoffmann); Wilhelm Rothenstein of London; Eichel ("Jewish Confirmation at Warsaw, 1843"); I. W. Loewenbach ("Inauguration of Synagogue at Munich, 1826"); Löwenstark ("Montefiore's Centennial, 1884"); H. Oppenheim, nephew of the painter Moritz Oppenheim (Madame I. Bloc, 1886); Saphir, a clever stone-engraver, has done some work for the court of Russia; Daniel Henriques de Castro, although only an amateur, has attained to a high degree of perfection in cutting glass with the diamond-point.

Statistics concerning the number of Jewish engravers for some countries are available. In 1857 there were fifty-four in the kingdom of Poland, aside from Warsaw. In 1900, at Budapest, 321 Jews, among them eleven women, were engaged in the different branches of engraving (JEW. ENCYC. ii. 155, *s.v.* ARTISANS).

D. A. W.

ENNERY, ADOLPHE PHILIPPE D': French dramatic author; born in Paris June 17, 1811; died there Jan. 26, 1899. By turn a lawyer's clerk, painter, and journalist, in 1831 he made his début as a dramatist as part author of "Emile, ou le Fils d'un Pair de France." From that date he was sole or part author of more than 280 plays, no less than five of them having been produced upon the Paris stage at one time. He adapted his work to the taste of the public, and achieved success upon success, rapidly making a fortune. His wealth allowed him to contribute to the Société Thermale of Cabourg-Dives, of which he became acting manager. This society, which was composed in large measure of wealthy journalists and theatrical capitalists, placed him at its head.

D'Ennery wrote under the names of Adolphe d'Ennery, Philippe d'Ennery, and Eugène d'Ennery. His plays were mainly written in collaboration with others, among whom were Anicet Bourgeois, G. Lemoine, Alexandre Dumas, Eugène Grangé, Dumanoir, Mallian, Cormon, M. F. Dugué, Clairville, Hector Crémieux, Plouvier, Charles Edmond, and Lambert Thiboust. Among his earlier plays were the following: "Gaspard Hauser" (1836); "La Grâce de Dieu" (1841); "Les Pupilles de la Garde" (1841); "Halifax" and "Les Bohémiens de Paris" (1842); "Don César de Bazan" (1844); "Le Marché de Londres," "La Dame de Saint Tropez," and "Marie Jeanne, ou la Femme du Peuple" (1845); "Gastibelza, ou le Fou de Tolède" and "La Prière des Naufragés" (1847).

In 1851 D'Ennery became manager of the Théâtre Historique, but resigned his office two weeks later in order to establish a new theater, to be called the "Théâtre du Peuple," a name which he afterward altered to that of "Théâtre du Prince Impérial." It was subsequently abandoned. In 1851 he also made the difficult adaptation of Balzac's posthumous comedy "Mercadet, ou le Faiseur," which he reduced from five to three acts, and which was represented at the Gymnase in 1851, and in the repertory of the Comédie-Française in 1870.

Among D'Ennery's later plays were: "La Case de l'Oncle Tom," 1853; "Les Oiseaux de Proie," 1854; "Le Médecin des Enfants" and "Le Donjon de Vincennes," 1854; "Cartouche," 1858; "Le Lac de Glenaston" and "La Prise de Pékin," 1861; "Le Château de Pontalec," "La Chatte Merveilleuse," and "Rothomago," 1862; "Aladin, ou la Lampe Merveilleuse" and "L'Aïeule," 1863; "Les Amours de Paris," 1866; "Le Premier Jour de Bonheur," 1868; "Rêve d'Amour," 1870; "Le Centenaire," 1873; "Les Deux Orphelines," 1875, his masterpiece and enormously successful.

D'Ennery wrote the libretto for several of Auber's comic operas. He dramatized many of the writings of Jules Verne. In later years he wrote several feuilletons in "Le Petit Journal," including "Le Remords d'un Ange" and "Martyre." In 1885 he adapted the "Cid" to opera, the music being by Massenet. The last of D'Ennery's popular romances, "Seule," appeared in 1897, when he was eighty-six years of age.

D'Ennery was commander of the Legion of Honor, and possessed several foreign medals. He left a fortune of nearly 6,000,000 francs, and liberally endowed the institutions with which he had been connected. Before his death he donated to the state one of his houses, containing a collection of Chinese and Japanese vases of great value.

S. V. E.

ENNERY, JONAS: French deputy; born at Nancy Jan. 2, 1801; died at Brussels May 19, 1863. He was for twenty-six years attached to the Jewish school of Strasburg, of which he became the head. In collaboration with Hirth, he compiled a "Dictionnaire Général de Géographie Universelle" (4 vols., Strasburg, 1839–41), for which Cuvier wrote a preface. Soon afterward he published "Le Sentier d'Israel, ou Bible des Jeunes Israélites" (Paris, Metz, and Strasburg, 1843). At the request of the Société des Bons Livres he took part in the editorship of "Prières d'un Cœur Israélite," which appeared in 1848.

In 1849, despite anti-Jewish rioting in Alsace, Ennery was elected representative for the department of the Lower Rhine, and sat among the members of the "Mountain." He devoted his attention principally to scholastic questions. After the coup d'état he resisted the new order of things, and was exiled for life in 1852. He retired to Brussels, where he lived as a teacher until his death.

S. I. B.

ENNERY, MARCHAND: French rabbi; brother of Jonas Ennery; born at Nancy 1792; died at Paris Aug. 21, 1852; studied Talmud under Baruch Guggenheim and at the rabbinical school of Herz Scheuer, in Mayence. He went to Paris, became teacher in the family of a wealthy coreligionist, and in 1819 was appointed director of the new Jewish school at Nancy. At this time he published his Hebrew-French lexicon, the first of its kind to appear in France. In 1829 he became chief rabbi of Paris; in 1846 chief rabbi of the Central Consistory; in 1850 chevalier of the Legion of Honor.

ENOCH (חנוך): **1.** Son of Cain (Gen. iv. 17). A city was named after him.

2. Biblical Data: Name of the seventh progenitor of the race in the "book of the generations of Adam"; he was the son of Jared and the father of Methuselah (Gen. v.). He lived 365 years, and is described as "walking with God," his end being told in the words "and he was not; for God took him" (*ib.* 24). No further reference to Enoch is found in Hebrew Scripture, unless the ingenious emendation in Ezekiel (xiv. 14, 20; xxviii. 3) of "Daniel" into "Enoch," proposed by Halévy ("R. E. J." xiv. 20 *et seq.*) and adopted by Cheyne (Cheyne and Black, "Encyc. Bibl." ii. 1295), be accepted. In Ecclesiasticus (Sirach) xliv. 16 Enoch's "taking away" is referred to with the addition, in the recovered Hebrew text, of אות דעת לדור ודור (see Peters, "Hebräische Text des Buches Ecclesiasticus," p. 230, Freiburg, 1902); and in xlix. 14 his destiny is glorified.

E. G. H.

——**In Rabbinical Literature:** According to Targ. Pseudo-Jonathan (Gen. v. 24) Enoch was a pious worshiper of the true God, and was removed from among the dwellers on earth to heaven, receiving the names (and offices) of Metaṭron and "Safra Rabba" (Great Scribe). This view represents one and (after the complete separation of Christianity from Judaism) the prevailing rabbinical idea of Enoch's character and exaltation. Another, not quite so favorable, appears in the polemics carried on by Abbahu and others with Christian disputants (Friedländer, "Patristische und Talmudische Studien," p. 99; "R. E. J." v. 3). Enoch is held to have been inconsistent in his piety and therefore to have been removed by God before his time in order to forestall further lapses. The miraculous character of his translation is denied, his death being attributed to the plague (Gen. R. v. 24; Yalḳ., Gen. v. 24; Rashi and Ibn Ezra on the verse; comp. Wisdom iv. 10-14; Frankel, "Ueber den Einfluss der Palästinischen Exegese," etc., pp. 44, 45; Ecclus. [Sirach] xliv. 16; Zohar to Gen. v. 24; but see also Philo, "De Abrahamo," § 3). But withal Enoch is one of those that passed into Gan Eden without tasting the pangs of death (Yalḳ., Gen. v. 24).

Divergent Views of His Character.

In the development of the Enoch legends he is credited with the invention of the art of writing (Book of Jubilees, iv.; comp. Charles's notes on the chapter; Targ. Pseudo-Jonathan, Gen. v. 24). He teaches astronomy and arithmetic ("Sefer Yuḥasin," v.; comp. Eusebius, "Præparatio Evangelica," ix. 17; Bar Hebræus Chronicle, p. 5). These ascriptions, as well as the assumption that he was metatron, reflect the interpretation of his name as meaning the "initiated."

Neglected by the Jews for some time (Halévy, in "R. E. J." xiv. 21), Enoch reappears as the hero and author of several pseudepigraphic midrashim (comp. Enoch, Books of), in part elaborations of material contained in the "Sefer ha-Yashar." Of these midrashim the following are the best known: "Hekalot Rabbati," "Sefer Ḥanok," "Sefer Hekalot," and "Ḥayye Ḥanok." In the "Hekalot Rabbati" (Jellinek, "B. H." iii. 83-108) Enoch appears as Meṭaṭron, "Sar ha-Panim" (see Jew. Encyc. i. 594b, *s.v.* Angelology), revealing celestial secrets to the learned and the wise. The "Sefer Ḥanok" (Jellinek, *l.c.* ii.) relates how the earth was abandoned by God in consequence of the sins of the generation of the Deluge. Enoch is taken up to heaven, and is appointed guardian of all the celestial treasures, chief of the archangels, and the immediate attendant on God's throne. He knows all secrets and mysteries, and, while all the angels are at his beck, he fulfils of his own accord whatever comes out of the mouth of God, and executes His decrees. He teaches; he conducts souls to the place of felicity; and he is known as "Prince of God's Face," "Prince of the Torah," "Prince of Wisdom," "Prince of Reason," and "Prince of Glory." He communicates God's revelations to Moses.

In the Minor Midrashim.

The "Sefer Hekalot" (Jellinek, *l.c.* v.) contains, among other things, an account of R. Ishmael's visit to the seventh celestial hall or temple, where he meets Enoch, raised to the dignity of Meṭaṭron, Sar ha-Panim. Enoch tells him the story of his elevation as follows: In consequence of earth's corruption by the evil spirits Shamḥazai and Azael, Enoch was translated to heaven to be a witness that God was not cruel (comp. Ecclus. [Sirach] xliv. 16, Hebr. text). There all the gates of wisdom were opened unto him as Meṭaṭron; he was appointed chief of all angels; and his carnal body was changed into one of light.

The "Ḥayye Ḥanok" is of later composition, but more elaborate (Jellinek, *l.c.* iv.). Enoch appears in the rôle of a pious ascetic. Called by a voice to return to the abodes of men, he preaches repentance.

He gathers a vast concourse of disciples, and, increasing in wisdom, he finally is proclaimed king. Peace reigns on earth during the 243 years of his rule. But he hankers after solitude. He abandons his throne, appearing to men from time to time to instruct them. Finally he is summoned to leave earth and to assume rulership over the "sons of God." He ascends to heaven on a horse, after the manner of Elijah's translation, in the sight of a vast multitude, which in vain repeatedly endeavors to detain him. In Tosefot to Yeb. 16b it is denied that Enoch could have been "Sar ha-'Olam" (Prince of the World).

In some late accounts Enoch reappears as a proselyte, who, though under the obligation to observe only the seven Noachian precepts, embraces Judaism. He is a cobbler sewing together worlds; and over every seam he pronounces the benediction "Blessed be the name, the glory of His kingdom for ever and aye" (see Yalḳ., Ḥadash., 25b; Yalḳ., Reubeni, 28b, Bereshit).

S. S. E. G. H.

——**In Mohammedan Literature:** Enoch is known to the Mohammedans as "Idris" (the Instructor). In the Koran Idris is mentioned in sura xix. 57 as a man of truth and a prophet, raised by Allah to a lofty place, and in sura xxi. 85 as a model of patience. Baiḍawi, in identifying him with Enoch, explains "Idris" as indicating his knowledge of divine mysteries. He was the first man who knew how to write, and invented the sciences of astronomy and arithmetic (see above, In Rabbinical Literature). The story of his "death" is variously related. When on a visit to the Angel of Heaven he was met while in the fourth heaven by the Angel of Death, who informed him that he had orders to bring about his end. Idris then expired in the embrace (wings) of the Angel of Heaven; and remained in the fourth heaven ever after. In other versions Idris, also named "Uḥnukh," appears as in communication with the angel Gabriel, and as a student of the Books of Adam, as well as of those imparted to him by Gabriel. He had been sent as a preacher of repentance unto the corrupt descendants of Cain.

Idris was often compelled to defend his life with the sword against the depraved children of earth. He invented the balance to weigh justly. He was the first scribe and the first tailor. He longs to enter paradise. God sends Death disguised as a beautiful virgin to test him. He prays for death with the privilege of returning to life. This is granted. He dies, but returns to life at once; visits hell, where he beholds from the wall of division the horrors of Gehenna; and is then led to the gate of paradise. Refused admittance by the custodian, he lifts himself over the wall by clinging to a branch of the tree "Tuba," the tree of knowledge, which God for his benefit caused to bend over the wall. Thus Idris entered paradise while still living. It is possible that these legends contain traces of lost haggadahs. Mas'udi reports that Enoch (Uḥnukh) was the son of Lud, and is identical with Idris. He lived on earth 300 years and perhaps longer; he is credited with the invention of the needle and the art of sewing. He received from heaven thirty leaflets containing the praises of God and prayers.

Bibliography: Hughes, *Dictionary of Islam*, s.v. *Idris*; Weil, *Biblische Legenden der Muselmänner*, pp. 62 *et seq.*; Mas'udi, *Les Prairies d'Or*, i. 73.

——**Critical View:** The translation of Enoch resembles that of other heroes of popular legend. Elijah's (II Kings ii. 1-12) is the Biblical parallel, while the fate of Ganymede, Hercules, Semiramis, Xisuthrus, and the Phrygian King of Annacus presents non-Hebrew analogues (see Winer, "B. R."; Riehm, "Handwörterb." 2d ed., i. 608). Among modern critics the view prevails that Enoch corresponds to the Babylonian Emmeduranki (Greek, "Edoranchus"), the seventh king in Berosus' list of primitive monarchs. Emmeduranki was famous for his knowledge of things divine; he was the progenitor of the priesthood. These heroes probably were originally deities, reduced in course of time to human stature, but still credited with divine deathlessness. In Enoch's case attention has been called to the coincidence of the 365 years of his life with the number of days in the solar year, and it has been suggested that Enoch originally represented the deified sun (see Gunkel, "Genesis," p. 124).

E. G. H.

ENOCH, BOOKS OF (Ethiopic and Slavonic): Apocryphal works attributed to Enoch. From Gen. v. 24 ("Enoch walked with God" and "God took him") a cycle of Jewish legends about Enoch was derived, which, together with apocalyptic speculations naturally ascribed to such a man, credited with superhuman knowledge, found their literary expression in the Books of Enoch. Of this literature a collection of fragments or single, independent pieces has come down to us in the so-called "Ethiopic Enoch," whereas the Slavonic Book of Enoch gives, as it were, a résumé of most of the current oral or literary traditions about its hero, which it brings into a certain system of its own. So far as can be judged from these books, the legends of Enoch are the following: (1) He went during his lifetime to heaven, "walked" with God's angels over all heaven (or heavens) and earth, came back to his family and told them what he had seen, and finally was again taken up to heaven. (2) During his journeys he saw the secrets of heaven and earth, that is, the natural phenomena. (3) He saw what had become of the angels, "sons of God," who, according to Gen. vi. 1-4, had come to earth and sinned with the daughters of men. (4) He interceded for these fallen angels. In 3 and 4 evidently two different cycles of legends have crossed each other, but whether 3 precedes 4, or vice versa, is hard to tell. These legends, a more popular form of tradition, are, however, not preserved unimpaired, but are strongly influenced and developed by the literary traditions which deal mainly with apocalyptic ideas.

I. Ethiopic Enoch: In the old Jewish and Christian literatures (for example, in the New Testament Epistle of Jude, verse 14) a Book of Enoch is quoted, and is undoubtedly often used without special reference being made to it. But about 300 the Christian Church began to discredit the book, and after the time of the Greek fathers Syncellus and Cedrenus, who cite it (ninth century), it was entirely lost until (1773) the traveler Bruce discovered in Abyssinia two manuscripts of the book. In the nineteenth century several editions and translations were made, and many critical inquiries into its contents published. The following is a list of the various editions and translations of the Ethiopic Enoch:

Editions: Laurence, "Libri Enoch Versio Æthiopica," Oxford, 1838; Dillmann, "Liber Henoch Æthiopice," Leipsic, 1851 (from 5 MSS.); Flemming, "Das Buch Henoch," Leipsic, 1902 (from 14 MSS.); another edition, still fuller than that of Flemming, is being prepared by Professor Charles.

Translations: Laurence, "The Book of Enoch," Oxford, 1821; Hoffmann, "Das Buch Henoch," Jena, 1833-38; Dillmann, "Das Buch Henoch Uebersetzt und Urklärt," Leipsic, 1853 (standard translation for 40 years); Schodde, "The Book of Enoch Translated, with Introduction and Notes," Andover, 1882; Charles, "The Book of Enoch," Oxford, 1893; Beer, in Kautzsch, "Apokryphen und Pseudepigraphen," ii. 217-310, Tübingen, 1900; Flemming, in vol. v. of "Die Griechischen Christlichen Schriftsteller der Ersten Drei Jahrhunderte," Leipsic, 1901. There may also be mentioned here a retranslation into Hebrew (ספר חנוך) by L. Goldschmidt, Berlin, 1892, from Dillmann's German translation.

Following is an analysis of the contents:

- **Ch. i.-v.:** Introduction: Enoch relates a vision of the last days, the fate of the elect and of sinners, and urges observation of the works of God in nature.
- **Ch. vi.-cv.:** The main part of the book:
  - Ch. vi.-xxxvi.: The so-called "angelological book":
    - (*a*: vi.-xix.): The story of the fallen angels:
      - vi.-xi.: The angels on earth, their marriages and wrongdoings; announcement of their punishment.
      - xii.-xvi.: Enoch's visions concerning their punishment; he announces their destiny to them, but upon their supplication intercedes for them. In another vision he is told that his intercession is in vain; he then announces their final punishment.
      - xvii.-xix.: Enoch's journey through heaven and earth, during which he sees chiefly the fallen angels suffer the punishment which he had announced.
    - (*b*: xx.-xxxvi.): Enoch wanders, accompanied by the six (or seven) archangels, through heaven and earth, and is shown again the punishment of the angels (xxi.), Hades (xxii.), and the secrets of nature in the west (xxiii.-xxv.), in the center of the earth (xxvi.-xxvii.), in the east (xxviii.-xxxiii.), in the north (xxxiv. and xxxv. 2), and in the south (xxxvi.).
  - Ch. xxxvii.-lxxi.: The similitudes and additions:
    - (*a*: xxxvii.): Introduction.
    - (*b*: xxxviii.-xliv.): First similitude: The future kingdom of God, the dwellings of the righteous, the angels, and the secrets of nature.
    - (*c*: xlv.-lvii.): Second similitude: The Last Judgment by the Messiah, "the Son of Man," who sits with "the Head of Days." The holy and elect are rewarded; the heathen and sinners are destroyed forever.
    - (*d*: lviii.-lxix.): Third similitude (with fragments of an account of the Flood interspersed): The eternal bliss of the righteous and the sufferings of the kings and the mighty.
    - (*e*: lxx.-lxxi.): First and second appendices: Enoch's translation into paradise, and Enoch's ascension and election as "Son of Man."
  - Ch. lxxii.-lxxxii.: The Book of Celestial Physics: Theories about sun, moon, stars, intercalary days, the four quarters of the world.
  - Ch. lxxxiii.-xc.: Two dream-visions of Enoch before his marriage, which he recounts to his son Methuselah:
    - (*a*: lxxxiii.-lxxxiv.): The Flood—the first world-judgment.
    - (*b*: lxxxv.-xc.): The history of the world from Adam until the final judgment: Men are represented here as animals; the righteous are white cattle and sheep, the sinners and enemies of Israel are black cattle and wild animals (vision of the animals, or of the shepherds).
  - Ch. xci.-cv.: Admonitions and predictions of Enoch, addressed to his children:
    - (*a*: xci. 1-11, 18-19): Admonition to live a righteous life.
    - (*b*: xci. 12-17 and xciii.): The "Apocalypse of Weeks": The history of the world is outlined, divided into ten weeks.
    - (*c*: xcii., xciv.-cv.): Admonitions, predictions of the punishment of sinners, and promises of reward to the righteous.
- **Ch. cvi.-cviii.:** Appendices:
  - Ch. cvi.-cvii.: Miracles and signs at the birth of Noah.
  - Ch. cviii.: Another speech of Enoch concerning the fate of the wicked and of the righteous.

Language and Versions.

The Ethiopic Enoch was originally written in Hebrew, and then translated into Greek. From this version an Ethiopic and probably a Latin translation were made. Of the Greek version ch. i.-xxxii. are preserved in a manuscript discovered at Gizeh in 1886-87 by the French Archeological Mission, and published by Bouriant in the "Mémoires" of that mission (1892, vol. ix., fasc. i.), by Dillmann in the "Sitzungsberichte der Berliner Akademie der Wissenschaften" (1892, pp. 1079 *et seq.*), by Lods, "Le Livre d'Hénoch" (Paris, 1892), by Charles, "Book of Enoch" (1893, Appendix C), and by Swete, "The Old Testament in Greek" (2d ed., iii. 789 *et seq.*, Cambridge, 1899). Furthermore, ch. vi.-ix. 4, viii. 4-x. 14, xv. 8-xvi. 1 have come down to us through Syncellus (about 800), and lxxxix. 42-49 is found in a manuscript in the Vatican. These fragments are reproduced by Charles (1893), and again by Swete (1899). Of the Latin translation only i. 9 and cvi. 1-18 are known. The first passage occurs in Pseudo-Cyprian and Pseudo-Vigilius (see Beer, *l.c.* p. 237); the second was discovered by James in an eighth-century manuscript in the British Museum, and published by Charles, *l.c.*, Appendix E, and by James, "Apocrypha Anecdota," pp. 146-150. Whether or not the whole book was translated into Latin can not be established with certainty from these fragments. All the Greek and Latin fragments are republished in Flemming and Radermacher, "Das Buch Henoch," Leipsic, 1901.

Composition and Date.

Almost from the beginning it was recognized that Ethiopic Enoch was composed of various independent works, and it was assumed that three sources were to be distinguished: (1) the "groundwork," i.-xxxvi., lxxii.-civ.; (2) the similitudes, xxxvii.-lxxi.; (3) Noachian interpolations, chiefly to be found in the similitudes. Different scholars gave different analyses: it is not possible to enumerate all their views, nor can all their works and articles be mentioned here. The most recent ones, in which the earlier views are usually given in full (see especially Schürer, Charles, and Clemen) are:

Schürer, *Gesch.* iii. 190 *et seq.*, Leipsic, 1898; Eng. ed. div. ii., iii. 54-73; Charles, *Book of Enoch*, pp. 9 *et seq.*, 310-311; Cheyne and Black, *Encyc. Bibl.* i. 220-225; Lawlor, *Early Citations from the Book of Enoch*, in *Jour. of Philology*, 1897, xxv. 164-225; Clemen, *Die Zusammensetzung des Buches Henoch*, in *Theologische Studien und Kritiken*, 1898, pp. 212-227; Beer, in Kautzsch, *Apokryphen und Pseudepigraphen*, ii. 217-235; Bousset, *Neueste Forschungen auf dem Gebiete der Religiösen Litteratur des Spätjudentums*, in *Theologische Rundschau*, 1900, pp. 369 *et seq.*; J. van Loon, *Eschatologieën van den Hasmoneëntijd Volgens het Boek Henoch*, in *Theolog. Tijdschrift*, pp. 421-463, Leyden, 1902.

Charles definitely proved that the so-called "groundwork" was in itself not by any means uniform. Another important step in the interpretation of the book was gained by Clemen's article, in which Gunkel's theory of apocalyptic "traditions" was applied. Charles distinguished five sections (1893) or parts (1898), to which as a sixth part the Noachian and other interpolations were added: (1)

i.-xxxvi., written before 170 B.C.; (2) lxxxiii.-xc., written between 166 and 161 B.C.; (3) xci.-civ., not earlier than 134 B.C.; (4) xxxvii.-lxx., the similitudes, written between 94 and 79, or between 70 and 64 B.C.; (5) lxxii.-lxxxii., the Book of Celestial Physics, the date of which can not be determined.

Clemen arrived at the following conclusion: "The Book of Enoch is based on twelve independent traditions or groups of traditions: (1) i.-v.; (2) vi.-xi.; (3) xii.-xvi.; (4) xvii.-xix.; (5) xx. (?)-xxxvi; (6) xxxvii.-lxix.; (7) lxx.-lxxi.; (8) lxxii.-xci. 10, 18, 19; (9) xci. 12-17, xcii., xciii., xciv.-cv.; (10) cvi.-cvii.; (11) cviii.; (12) the Noachian fragments, liv. 7-lv. 2, lx., lxv.-lxix. 25. Probably No. 3, perhaps No. 6, certainly Nos. 9, 11, and 12, were taken from written sources." According to him, the date is a little doubtful, since some of the traditions may not have been written down at once. Beer in the main follows Clemen, but gives for a part a more detailed analysis. Clemen's hypothesis of traditions seems the most acceptable, as also his analysis, except that his tenth tradition should perhaps be counted as a part of his No. 12, *i. e.*, as a Noachian fragment.

Separate Strata.

Some of the apocalyptic portions, above all the similitudes, seem to have been literary tradition from the beginning. But another very difficult question arises: How and in what order were the different portions of the book put together? Probably vi.-xix., possibly vi.-xxxvi., are the stock, to which other portions, younger or perhaps in part older, were gradually added. Ch. vi.-xix. were intended to tell the story of the fallen angels and Enoch's relation to them: vi.-xi. and xii.-xvi., taken from two different cycles of legends, were united; and, in order to show the execution of the punishment of the angels, xvii.-xix., narrating the journey during which Enoch is a witness of it, were added. It was very natural to join to this portion xx.-xxxvi., another tradition concerning Enoch's journey. The next step in the composition may have been the adding either of the similitudes or of one or several of the traditions in lxxii.-civ. But it seems more probable that a redactor united vi.-xxxvi. with lxxii.-civ., and wrote the introduction, i.-v., and perhaps also the conclusion, cv. This intermediate book would then have a proper beginning and conclusion.

The redactorial changes within the different portions of lxxii.-civ. may also have been made at this time. Thirdly and lastly would have been added the similitudes, probably together with the Noachian fragments xxxix. 1, 2a, liv. 7-lv. 2, lx., lxv. 1-lxix. 25, cvi., cvii. Of the latter, cvi. *et seq.* were probably added by some one who wished to carry the story on a little farther—a very common occurrence in literary history. He may have been the redactor who added the similitudes and inserted in them several other portions from the same source from which he took cvi. *et seq.* This theory is strongly supported by evidence which has only recently been discovered; namely, the true date of the Book of Jubilees, which has been proved, mainly by Bohn and Charles, to be as early as the last third of the second century B.C. In the Book of Jubilees (iv. 17-23) writings of Enoch are mentioned, and Charles ("Book of Jubilees," 1902, p. 37) concludes that the author refers only to Ethiopic Enoch vi.-xvi., xxiii.-xxxvi., lxxii.-xc. But Book of Jubilees iv. 23 may include Enoch xvii.-xxii. as well, and iv. 18 ("recounted the weeks of the Jubilees") is perhaps an allusion to the Apocalypse of Weeks, which by many critics is considered the oldest portion of Ethiopic Enoch. Thus it is very likely that the book referred to in Jubilees was the intermediate one just mentioned. Moreover, the similitudes, which were evidently unknown to the author of Jubilees, date from the first century B.C.—that is, later than Jubilees—and the Noachian fragments also were probably added in the first century, because in the second century reference (Jubilees x. 13) seems to have been made to a complete apocalypse of Noah. Last of all, cviii. was added to Ethiopic Enoch; this may have happened long after i.-cvii. had become one book (about 60 B.C.). The whole book originated and was put into writing in Palestine.

Value.

The Ethiopic Book of Enoch is one of the most important pieces of apocalyptic literature; it furnishes extensive contributions to our knowledge of Jewish folk-lore in the last pre-Christian centuries; it shows apocalyptic literature in its beginnings, and above all it is a source of information upon the religious ideas of Judaism, especially concerning the Messiah; finally, it also pictures the feelings of the people during the time of the Hasmoneans. More details with regard to these questions are to be found in Charles, "Book of Enoch," introductions to the single sections, and in Van Loon's article, mentioned above.

II. Slavonic Enoch: A book called "The Book of the Secrets of Enoch," preserved, so far as is known, only in Slavonic, was introduced to the scientific world but a few years ago, when certain manuscripts found in Russia and Servia were edited, and subsequently translated into German and English. Following is an analysis of its contents:

Ch. i.-ii.: Introduction: Life of Enoch; his dreams, in which he is told that he will be taken up into heaven; his admonitions to his sons before he departs.

Ch. iii.-lxvi.: The main part of the book:

- Ch. iii.-xxxvi.: Enoch in heaven:
    - (*a*: iii.-vi.): The first heaven: a great sea; the elders and the rulers of the stars; the habitations of the snow; the treasuries of dew, oil, and different colors.
    - (*b*: vii.): The second heaven: the fallen angels imprisoned, awaiting the eternal judgment; they ask Enoch to intercede for them.
    - (*c*: viii.-x.): The third heaven: the Garden of Eden, with the tree of life and an "olive-tree always distilling oil"; to the north of it the place of the damned.
    - (*d*: xi.-xvii.): The fourth heaven: the courses and the gates of sun and moon; the wonderful singing creatures which wait upon the sun, namely, phenixes and chalcidri; a singing host of angels.
    - (*c*: xviii.): The fifth heaven: the watchers ("gregori" = ἐγρήγοροι), silent and mourning for their fallen brethren, who are being tormented in the second heaven.
    - (*f*: xix.): The sixth heaven: seven bands of angels who arrange and study the revolutions of sun, moon, and stars; the angels who are put over the souls of men and write down their lives and works: furthermore, seven phenixes and seven cherubim and seven six-winged creatures.
    - (*g*: xx.-xxxvi.): The seventh heaven: the Lord sitting on His throne and the ten great orders of angels standing before Him. Enoch is clothed by Michael in raiment of God's glory, and is told by the angel Vretil (Vreteel, Pravuel) all the secrets of heaven (natural phenomena) and of earth (concerning men). He is ordered to write them down in

366 books. God reveals to Enoch His own great secrets, His creation, the story of the fallen angels and of Adam; furthermore, He tells him about the seven millenniums of the earth and the eighth at the end. God also accuses the wicked, and then orders Enoch to go back to earth for thirty days to teach his children and grandchildren.

Ch. xxxvii. is probably a later addition.

Ch. xxxviii.-lxvi.: Enoch back on earth. He admonishes his sons; tells them what he has seen in the heavens; gives them his books and urges them to transmit these to others; moreover, he relates to them what God has promised to men and what He expects them to do, and asserts that there is no intercession of departed saints for sinners. In lvi. Methuselah asks a blessing from his father. In lvii. all the sons of Enoch with their families and the elders of the people are called, and Enoch gives renewed instructions as to a righteous life. In lxiv. the Lord calls Enoch, the people assemble to kiss him in Achuzan, and he addresses them for the last time.

Ch. lxvii.-lxviii.: Conclusion:

Ch. lxvii.: Enoch's translation into heaven.

Ch. lxviii.: Recapitulation of Enoch's life and doings; Methuselah and his brothers build an altar in Achuzan, and they and the people "make a great festivity, praising God who had given such a sign by means of Enoch, who had found favor with Him."

Language and Origin.

The Slavonic Enoch was written in Greek, as is shown by the derivation of Adam's name from the four quarters, *'Ανατολή, Δύσις, ῎Αρκτος, Μεσημβριά*, and by several coincidences with the Septuagint; but perhaps parts of it are based on Hebrew originals. From the Greek it was translated into Slavonic. Of this version there are five manuscripts extant, which are described in the introduction to Charles and Morfill, "The Book of the Secrets of Enoch," Oxford, 1896 (reviewed by Bonwetsch in "Theologische Literaturzeitung," 1896, cols. 153–156) and to Bonwetsch, "Das Slavische Henochbuch," in "Abhandlungen der Königlichen Gelehrten Gesellschaft zu Göttingen," 1896 (reviewed by Schürer in "Theologische Literaturzeitung," 1896, cols. 347–350).

The Slavonic Enoch seems to be an attempt to bring all the current traditions about Enoch into a certain system, which is partly furnished by the special scheme of the seven heavens. It is therefore, with the exception of a few interpolations, derived from one author. This author, according to Charles, was probably a Jew living in Egypt, since he has certain speculations in common with Philo and other Hellenistic Jews, and since several other elements in the book betray Egyptian origin.

Date and Value.

The book was probably written between 50 B.C. and 70 A.D.; the first date is given by the fact that Ethiopic Enoch, Ecclesiasticus, and Wisdom of Solomon are used; the second by the fact that the destruction of the Temple is not mentioned at all. The quotations from Slavonic Enoch in the Testaments of the Twelve Patriarchs, which Charles uses as additional evidence in establishing the date, are strongly doubted by Schürer. The Slavonic Enoch furnishes new material for the study of religious thought in Judaism about the beginning of the common era. The ideas of the millennium and of the seven heavens are the most important in this connection; both have been treated in detail by Charles in his introduction and commentary, published together with Morfill's translation. Another very interesting feature is the presence of evil in heaven—the fallen angels in the second heaven, and hell in the third. This belief, although probably at first current among the Christians also, was, together with the idea of the seven heavens, afterward rejected by the Church. The idea of hell in the third heaven may have been derived from expectations expressed in Isa. lxvi. 23, 24; that is, that the pleasures of the righteous in paradise will be enhanced by seeing the sufferings of the wicked.

G. E. Li.

ENOCH, BOOKS OF (Hebrew): See Apocalyptic Literature.

ENOCH BEN ABRAHAM: Talmudist and popular preacher; died after 1662. Enoch belonged to a famous family of scholars of the community of Posen. In 1649 he left Cracow, where he was preacher, to become rabbi at Gnesen. It is not known why he left the latter city: those districts of Poland were not affected by the Cossack rebellion. In 1652, when the community of Posen was on the point of sinking under its load of debt, Enoch was sent to Germany to raise funds, the community pledging itself to appoint him preacher for a period of three years on his return ("Communal Records of Posen," iii. 197a). Conditions in Posen, however, became such that the community could not longer pay its officials. Enoch left Poland, either for this reason or in consequence of the war between Sweden and Poland, which broke out in 1655 and devastated the communities of Greater Poland. He was appointed rabbi at Oettingen in Riess, where he was living in 1662 and where he probably died.

Enoch was the author of the following: "Wikkuah Yosef we-ha Shebatim," containing homilies, Amsterdam, 1680; a dirge on the suffering of the Jews in the Ukraine and Little Poland, appended to Jacob ben Naphtali's "Naḥalat Ya'aḳob," *ib.* 1652; "Perush 'al Shir Mizmor," a commentary to Psalm lxxxiii., Prague, 1657; "Reshit Bikkurim," homilies on the existence of God, revelation, and reward and punishment; "Ḥinnuk Bet Yehudah," responsa, published together with those of his son, *ib.* 1708.

Bibliography: Steinschneider, *Cat. Bodl.* No. 4724; Michael, *Or ha-Ḥayyim*, No. 906; Sokolow, *Gan Peraḥim*, p. 120, Warsaw, 1890.

S. S. P. B.

ENOCH BEN JUDAH LÖB: German Talmudist and rabbi of Schnaittach; flourished at the beginning of the eighteenth century. He studied with his father and with Rabbi Abraham Broda. His writings are included with those of his father and grandfather in "Reshit Bikkurim," and "Ḥinnuk Bet Yehudah," responsa (*ib.* 1708).

Bibliography: Michael, *Or ha-Ḥayyim*, p. 415; Walden, *Shem ha-Gedolim he-Ḥadash*, ii. 68; Steinschneider, *Cat. Bodl.* col. 838.

L. G. A. Pe.

ENOCH BEN MOSES: Prominent rabbi of Cordova, 950–1024. His father was one of the four scholars who, according to tradition, were taken prisoners while on a voyage and sold as slaves, and who subsequently became the founders of Talmudic schools in their new homes (see Apulia). Enoch, then a child, was with his parents. When R. Moses achieved honor in Spain and was made rabbi of Cordova, young Enoch found for a time in brilliant external conditions compensation for the sorrows of his childhood. He married into one of the most noble and prominent families in Cordova, and succeeded his father as rabbi. Though made wealthy through these connections, Enoch always led an ascetic life, depriving himself for the benefit of the poor and needy. After the death of Prince Ḥasdai ibn Shaprut, his friend and protector, Enoch entered again upon a period of adversity. A party arose to dispute his authority and position in favor of Joseph ibn Abitur. Enoch prevailed, and Ibn Abitur sought protection in foreign countries. Two of Abitur's followers, the brothers Jacob and Joseph ibn Gau, rich silk-manufacturers, gaining the favor of the calif by presents of money, were granted the privilege of appointing rabbis at Cordova. Thereupon they deposed Enoch and invited Abitur to return; the latter, however, declined, and died in exile. After Abitur's death Enoch was again recognized as rabbi, officiating until 1024, when be became the victim of an accident. On the last day of the Feast of Tabernacles, while ascending to the reading-desk, the old and rotten woodwork of the almemar broke down. The aged rabbi died of the injuries received in falling.

The best known of his pupils is said to have been the diplomat and scholar Samuel ha-Nagid. Excepting a few responsa (in the collections "Sha'are Ẓedeḳ" and "Toratan shel Rishonim," for instance), no works of his are now extant, though some of the earlier rabbinical authorities cite him in halakic decisions. He is mentioned in the preface to the Hebrew translation of Maimonides' commentary on Neziḳin. The statement that he translated the Talmud into Arabic seems to be due to his having been confounded with his opponent Joseph ibn Abitur.

Müller, *Responsen der Spanischen Lehrer*, in seventh annual report of the *Lehranstalt für die Wissenschaft des Judenthums*, Berlin, 1889; Kaminka, in Winter and Wünsche, *Die Jüdische Litteratur*, ii. 358 *et seq.*

L. G. A. K.

ENOCH, S.: German rabbi; born in Hamburg Oct. 8, 1814; died in Fulda Dec. 31, 1876; attended the Johannæum in Hamburg and the Talmudic lectures of Ḥakam Isaac Bernays, entered the University of Würzburg, and also became a pupil of R. Abraham Bing. He obtained his Ph.D. degree at Erlangen. He continued his Talmudic studies with L. Bodenheimer in Hildesheim, and R. Rohmann in Cassel; and founded in Altona a Jewish secondary school (Bürgerschule), which continued under his direction until he became (1855) rabbi of Fulda. Enoch edited for several years, beginning 1845, an Orthodox weekly entitled "Der Treue Zionswächter." He was also associated as editor with the Berlin "Jüdische Presse," which position he occupied at his death.

Bibliography: *Israelitische Wochenschrift*, viii. 40 *et seq.*

S. M. K.

ENOCH BEN SOLOMON AL-ḲUSṬANṬINI: Turkish philosopher and cabalist (according to Wolf, "Bibl. Hebr." i., No. 635, also a physician); lived at Constantinople in the fifteenth century. He wrote "Mar'ot Elohim," a philosophical explanation of the visions of Isaiah and Ezekiel (mentioned in Isa. vi. 1, 2, and Ezek. i. 1 *et seq.*) and of Zechariah's vision of the candlestick (Zech. iv. 2); each vision occupies a chapter of the work. The author founded his explanation on the philosophy of Maimonides. There exist several manuscripts of this work, one of which, belonging to Ghirondi, concludes with a supercommentary to Ibn Ezra on Genesis. Ghirondi is of opinion that this commentary also is the work of Enoch.

Bibliography: Wolf, *Bibl. Hebr.* i. 635, iii. 635; Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 108, 110; Michael, *Or ha-Ḥayyim*, p. 415.

K. M. Sel.

ENOCH ZUNDEL BEN JOSEPH: Russian Talmudist; died at Byelostok 1867. He wrote: a commentary on Midr. Rabbah of the five Megillot, in two parts (Wilna and Grodno, 1829-34; 2d ed., Wilna, 1845); a twofold commentary on Midr. Tan. (*ib.* 1833); a threefold commentary on Seder 'Olam (*ib.* 1845); a commentary on Midr. Samuel (Stettin, 1860); "Mibḥar Mi-Peninim," a commentary on the Midr. Rabbah of the Pentateuch (Warsaw, 1870); novellæ on the Haggadah of the Talmud (Wilna, 1883)—these commentaries are, in fact, compilations from other commentaries, especially those of Samuel Jafe Ashkenazi, Hellin, and Bärman Ashkenazi, to which Enoch added novellæ of his own—"'Olat ha-Ḥodesh," prayers for the new moon, with treatises on fast-days, philanthropy, etc. (*ib.* 1859); a commentary on Pesiḳ. R.; "Hoi Ariel," a funeral sermon on the death of R. Löb Katzenellenbogen of Brest (*ib.* 1838).

Bibliography: Fürst, *Bibl. Jud.* ii. 107-108, iii. 396; Fuenn, *Keneset Yisrael*, p. 312; Eliezer Kohn, *Ḳin'at Soferim*, p. 107.

L. G. N. T. L.

ENOS: Son of Seth, Adam's third son. In his time men began to call upon Yhwh (Gen. iv. 26). At the age of ninety he begat Cainan, and he died at the age of 900 years (Gen. v. 9-11; I Chron. i. 1). The name doubtless means "man," as it is equivalent to the often recurring "nomen appellativum" אנוש ("man," Deut. xxxii. 26) and the Aramaic אנש (Dan. ii. 10). Enos and the descendants of Seth in general (Gen. v. 1 *et seq.*) have been regarded by some modern scholars as simply arbitrary pendants to the Cainites (Gen. iv. 17-24); but the two series of names are very different.

Bibliography: Friedrich Delitzsch, *Wo Lag das Paradies?* p. 149; A. H. Sayce, in *The Expository Times*, 1898-99, pp. 352 *et seq.*; Hommel, *Aufsätze und Abhandlungen*, 1900, part ii., p. 222; Gunkel, *Handkommentar zur Genesis*, 1901, p. 46.

E. G. H. E. K.

ENRIQUEZ (HENRIQUEZ): Frequently recurring Spanish surname, often found combined with other surnames, as "Bueno Enriquez," "Gomez Enriquez," "Gabay Enriquez," etc. Many Maranos in Spain, Portugal, Amsterdam, London, Jamaica, Surinam, Barbados, New York, and other places, bear this name.

Aaron Mendes Enriquez, physician at Amsterdam in 1680. The "Opuscula" of De Barrios contain a letter addressed to him.

Abraham Baruch Enriquez, of Amsterdam; member of the Academy of Poets founded by Manuel de Belmonte, and a friend of the Spanish poet

Abraham Gomez Silveyra, whose "Dialogos Burlescos" he transcribed into a magnificent folio volume of 244 pages. An unknown relative in Tripoli sent him a letter, dated Oct. 29, 1668, expressing disapproval of the utterances of Isaac Cardoso and Isaac Orobio de Castro concerning the Messiah.

Abraham Nuñez Henriquez, of Amsterdam; the administrator of the charitable institution Abi Yetomim. David Nuñez Torres (1690) dedicated a sermon to him. Another **Abraham Nuñez Henriquez** owned a plantation in Jamaica in 1760. He had a relative, Moses Nuñez Henriquez, who was known in Jamaica in 1745.

Isaac Nuñez Henriquez, of Hamburg; Abraham Cohen Pimentel (1688) dedicated his "Discursos" to him. Another **Isaac Nuñez Henriquez** lived in Georgia in 1733. He was probably the Isaac Nuñez Henriquez who settled in New York in 1741. A third **Isaac Nuñez Henriquez** emigrated to Savannah, and died in Philadelphia in 1767.

Jacob Cohen Enriquez and **Jacob Gabay Enriquez** each, in 1642, inscribed a pamphlet to Manasseh ben Israel. Jacob Aboab da Fonseca dedicated (1681) his "Parafrasis" to a "Jacob Enriquez"—probably one of the foregoing.

Jacob Nuñez Enriquez, was a wealthy Amsterdam Jew who for some time held the Swedish crown-jewels as security. Daniel Levi de Barrios celebrated him in verse (1686). Another **Jacob Nuñez Enriquez** is known to have lived at Jamaica in 1744.

Many Maranos of the name of "Enriquez" fell victims to the Inquisition. In 1642 the sisters **Raphaela, Johanna, Micaela,** and **Beatriz Enriquez,** in Mexico, were arraigned by the Inquisition, and the picture of their dead mother, **Blanca Enriquez,** was burned in effigy. In 1680, a whole family, **Antonio, Violante,** and **Maria Enriquez,** with the husband of the last, was burned at the stake. **Louis Enriquez,** and the widow (sixty years of age) of another **Louis Enriquez,** together with her daughter, were sentenced to imprisonment for life. **Blanca Enriquez** of Cadiz and **Beatriz Nuñez Enriquez** of La Guarda were burned in effigy—the former at Seville, on Oct. 14, 1721, the latter at Valladolid on Jan. 26, 1727. **Josepha Enriquez,** from Chile, living in Malaga, wife of the martyr Simon de Andrade, on Nov. 30, 1721, and the aged (seventy-three years) **Katharina Enriquez,** of Seville, on Jan. 25, 1724, were burned at Granada. **Luis Enriquez,** farmer of the royal domains, was deported by the Inquisition (May 10, 1682) to Brazil, and **Gaspar Enriquez** of Cuenca was sentenced to imprisonment for life by the tribunal of Cordova (April 23, 1724).

D. M. K.

ENSHEIM, MOSES (known also as **Brisac,** and later as **Moses Metz**): French mathematician and liturgical poet; born at Metz 1750; died at Bayonne April 9, 1839. He was destined for the rabbinate by his parents, but left Metz against his father's will, and traveled in Germany. In 1782–85 he was tutor in the family of Moses Mendelssohn, having special charge over the education of Abraham Mendelssohn. His work (manuscript) on integral and differential calculus was highly praised by Lagrange and Laplace, with whom, as with Monge and Berthollet, he was personally associated. On leaving Mendelssohn's house he returned to Metz, where he struggled hard to make a living by teaching mathematics. Being a Jew, he was rejected for the position of professor of mathematics at the newly founded Ecole Centrale at Metz.

Ensheim was prominent in the movement instituted by the Meassefim. Filled with enthusiasm over the victory of revolutionary ideas, he wrote a triumphal song in Hebrew, which was sung (Oct. 21, 1793) in the synagogue at Metz, to the tune of the "Marseillaise," and printed in "Ha-Meassef." He was an intimate friend of Abbé Grégoire, whom he furnished with the documents and data necessary for his championship of the Jews. His last years were passed at Bayonne in Abraham Furtado's family, in which he had served as tutor, his leisure being devoted to Talmudical studies. Before his death he gave 12,000 francs, one-fourth of his fortune, to the Jewish elementary school of his native city.

EÖTVÖS, BARON JOSEPH: Hungarian statesman; emancipator of the Hungarian Jews; born at Ofen Sept. 13, 1813; died at Budapest Feb. 2, 1871. On the completion of his legal studies he traveled for several years in France. Influenced by the liberalism of French literature and politics, he determined to introduce the liberal institutions of western Europe into his native country. He delivered, in 1840, as a member of the Diet, his first speech in behalf of the emancipation of the Jews. In 1841 he issued a pamphlet on the same theme, which was widely read and was translated into German and Italian. Four years later he published "A Falu Jegyzöje," a novel in three volumes, with the intention of creating, by the presentation of fine Jewish characters, a favorable sentiment toward the Jews. An English translation by Otto Wenckstern appeared under the title "Village Notary" (London, 1850). After the Hungarian revolution and the subsequent agreement with Austria, Baron Eötvös was appointed minister of public worship and education (Feb., 1867); in the following December he effected the complete emancipation of the Hungarian Jews.

Not satisfied with their political enfranchisement alone, he endeavored also to secure their autonomy as religious communities. He convened a congress of Hungarian Jews (Budapest Dec. 14, 1868) which he opened with an enthusiastic speech, but he failed in his efforts to secure the adoption of a uniform communal constitution. As a result of this congress, which sat until Feb. 23, 1869, Hungarian Judaism split into three parties—Orthodox, Conservative, and status quo-ante.

EPHESUS: Capital of Ionia, Asia Minor, and later, under the Romans, capital of Asia Proconsularis. Many Jews lived in this large Greek city during the whole of the Hellenistic period. Josephus ("Contra Ap." ii. 4) traces the granting of citizenship to the Jews of Ephesus and of entire Ionia back to the Diadochi; but as the Greeks themselves, in their dispute with the Jews, ascribed the regulation of their affairs (*idem*, "Ant." xii. 3, § 2) to Antiochus II. Theos (261–246 B.C.), it is probable that the granting of equal rights to the Jews likewise dates from that period.

In 49 B.C., when the consul L. Lentulus recruited Roman citizens in Asia Minor for the legions of the party of Pompey, the Jews of Ephesus, although Roman citizens, were exempted from military service in deference to their laws ("Ant." xiv. 10, § 13); and in 43 B.C. Dolabella, at the instance of Hyrcanus II. (*ib.* § 12), granted them the same exemption. Dolabella directed the Ephesians to make this known in other cities also; and the privilege was carried into effect in Alexandria, Sardis, and throughout Asia Minor (*ib.* §§ 14–17). Another decree of the Ephesians assured to the Jews rest on the Sabbath and the observance of their laws (*ib.* § 25). Under Augustus the Ephesians demanded that, if the Jews deemed themselves the equals of the Ephesians, they should worship the gods of the Ephesians. The advocates of the Jews in this matter were Nicholas of Damascus, who later became a historian, and M. Agrippa, who at that time (10 B.C.) governed the East. Agrippa wrote to the Ephesians that the Jews throughout Asia should be permitted to send gifts to the Temple at Jerusalem and to observe the Sabbath (*ib.* xvi. 6, § 4). The proconsul C. Norbanus Flaccus (Philo, "Legatio ad Caium," § 40) and Julius Antonius ("Ant." xvi. 6, § 7) wrote in like terms to the Ephesians.

Paul preached Christianity in the synagogue of Ephesus during his first visit to that city (Acts xviii. 19); Apollos, a learned Jew from Alexandria, assisted by Priscilla and Aquila, proclaimed it in the same place (*ib.* xviii. 26). Paul, on his second visit, again preached in the synagogue; but when some Jews rejected his teaching, he went to preach in the private synagogue of a certain Tyrannus (*ib.* xix. 9).

The Jews of Ephesus were completely Hellenized, and the inscriptions on the Jewish tombs found there are written in Greek: one stone commemorates a certain "Mar Maussios," *i.e.*, Rabbi Moses; another, a leading physician. Josephus often cites a certain Menander of Ephesus, whose history seems to have included that of the Jews. The city was the scene of the dialogue which Justin held with the Jew Tryphon (Eusebius, "Ecclesiastical History," iv. 18).

Ephesus is mentioned in the rabbinical writings in Targ. to I Chron. i. 5 and Yer. Meg. 71b. The Rabbis, when referring to Asia, always mean simply Ephesus. The charming tale of the widow of Ephesus, which was known as early as the Talmud (Ḳid. 80b), is treated several times in Jewish works (Steinschneider, "Hebr. Uebers." p. 969). The so-called Ephesian script, used on amulets, seems to have been employed by the Jews also (Löw, "Gesammelte Schriften," ii. 80). The legend of the Seven Sleepers, connected with Ephesus, which has also been adopted by the Koran, is an episode in the Jewish accounts of the life of Jesus (Krauss, "Leben Jesu nach Jüdischen Quellen," p. 198).

G. S. Kr.

EPHOD.—Biblical Data: In the Old Testament this word has two meanings; in one group of passages it signifies a garment; in another, very probably an image. In the former the ephod is referred to in the priestly ordinances as a part of the official dress of the high priest, and was to be made of threads "of blue and of purple, of scarlet, and fine twined linen," and embroidered in gold thread "with cunning work" (Ex. xxviii. 4 *et seq.*, xxix. 5, xxxix. 2 *et seq.*; Lev. viii. 7). The description of the garment in these passages is not detailed enough to give a clear picture of its shape, nor does the description of Josephus do so ("B. J." v. 5, § 7; "Ant." iii. 7, § 5). All that can be gleaned from the text is the following: The ephod was held together by a girdle (חשב) of similar workmanship sewed on to it (Ex. xxviii. 8); it had two shoulder-pieces, which, as the name implies, crossed the shoulders, and were apparently fastened or sewed to the ephod in front (Ex. xxviii. 7, 27). In dressing, the shoulder-pieces were joined in the back to the two ends of the ephod. Nothing is said of the length of the garment. At the point where the shoulder-pieces were joined together in the front "above the girdle," two golden rings were sewed on, to which the breast-plate was attached (see Breastplate).

As a Garment.

In other passages from the historical books, dating back to an early period, "ephod" probably means a garment set apart for the priest. In I Sam. xxii. 18 the eighty-five priests of Nob are designated as men that "did wear a linen ephod" ("efod bad"). In this passage the Septuagint omits the word "bad," and if this omission is correct, the passage might be explained as referring to the wearing of the ephod by the priests. The word "bad" is also omitted in the Septuagint I Sam. ii. 18, where it is said that Samuel was girded with a linen ephod, and likewise of II Sam. vi. 14, which relates how David, girded only with a linen ephod, danced before the Lord. Here certainly reference must have been made to a species of garment worn only by the priest on ceremonial occasions; but even this passage gives the reader no idea of what its appearance was.

The word "ephod" has an entirely different meaning in the second group of passages, all of which belong to the historical books. It is certain that the word can not here mean a garment. This is

As an Image.

evident in Judges viii. 26–27, where it is recorded that Gideon took the golden earrings of the Midianites, weighing 1,700 shekels of gold, and made an "ephod thereof, and put it in his city, even in Ophrah," where it was worshiped by all Israel. In Judges xvii. 5 Micah made an ephod and teraphim for his sanctuary. I Sam. xxi. 9 records that an ephod stood in the sanctuary at Nob, and that Goliath's sword was kept behind it. In these passages it is clear that something other than a mantle or article of attire is meant. Even where the phrase "to carry" the ephod occurs, it is evident from the Hebrew "nasa'" that reference is made to something carried in the hand or on the shoulder (comp. I Sam. xxiii. 6).

The most natural inference from all these passages is that "ephod" here signifies an image that was set up in the sanctuary, especially since the word is cited with Teraphim, which undoubtedly refers to an image (comp. Hosea iii. 4). This assumption obtains strong confirmation from the fact that in Judges xvii. 3 *et seq.*, which is compiled from two sources, the words "pesel" and "massekah" (graven image and molten image) are used interchangeably with "ephod" and "teraphim."

Connection Between Ephod and Oracle.

The ephod is frequently mentioned in close connection with the sacred oracle. When Saul or David wished to question Yhwh through the oracle, they commanded the priest, "Bring hither the ephod" (I Sam. xiv. 18 [A. V. "ark of God"], xxiii. 9, xxx. 7). This connection between the ephod and the oracle may also be seen very clearly in the combination of Urim and Thummim with the ephod in the official robes of the high priest. It is the prerogative of the priests to carry and to question this ephod with the oracle. The sentence "Ahiah was at that time carrying the ephod before Israel" actually means that Ahiah was then the chief among the priests of Shiloh (I Sam. xiv. 3, xiv. 18 [LXX.]; compare xxiii. 6). On the oracle compare Urim and Thummim.

This juxtaposition of "ephod" and "oracle" has led to the assumption that in the last-mentioned passages "ephod" originally meant a kind of receptacle for the sacred lots, similar to the oracle pocket in the robe of the high priest (comp. Cheyne and Black, "Encyc. Bibl." and Foote in Johns Hopkins University Circulars). This assumption would harmonize all the early passages of the historical books, for if the word "bad" be omitted, the above-mentioned passages (I Sam. ii. 18, xxii. 18) may also be taken to mean that the priests "girded" this pocket about them. But this interpretation is impossible in II Sam. vi. 14, and is not very suitable in the stories concerning the ephods of Gideon and Micah. It might be adopted, however, where "ephod" is mentioned in connection with the oracle, for the image called "teraphim" is associated with the oracle in the same way (comp. Ezek. xxi. 26 [21]; Zech. x. 2). "Ephod" would then refer to a portable image, before which the lots were cast.

It can not be definitely ascertained what connection, if any, there was between the two meanings, "image" and "priestly robe." If the designation for "image" is connected with the original meaning of "ephod" as a covering or a dress, it may be inferred that these images were made of wood, clay, or some inferior metal, and covered with a "mantle" of gold or silver (comp. Isa. xxx. 22). Smend endeavors to prove an inner connection between the two meanings by assuming ("Religionsgesch." p. 41) that the image itself was originally clothed with an "ephod bad": witness the ancient custom of the Arabs of hanging garments and swords upon their idols (Wellhausen, "Skizzen," iii. 99).

E. G. H. I. Be.

——**In Rabbinical Literature:** Although the high priest in the Herodian temple wore an ephod (Ḳid. 31a), tannaitic tradition has little to say regarding its character. The material of which the ephod was made was a texture consisting of twenty-eight threads, one thread of leaf gold being spun with six threads of each of the four textures mentioned in Ex. xxviii. 6 (Yoma 71b). Rashi, closely following the Bible, describes the shape of the ephod as follows:

> "The ephod was made like a girdle which women wear in riding, and was fastened in the back, against the heart, under the arms. In breadth it was somewhat wider than the back, and in length it reached to the heels; a girdle, long enough to be used as a belt, was fastened lengthwise above. The shoulder-bands, which were fastened to this girdle, were made of the same material as the ephod, and fell in front a little below the shoulders. The 'shoham' [A. V. "onyx"] stones were then fastened to the shoulder-bands, and golden threads connected the edges of the shoham stones with the breastplate (חשן) by means of the rings on the latter" (Rashi to Ex. *l.c.*; similarly, also, Maimonides, "Yad," Kele ha-Miḳdash, ix. 9–10).

Even in the tannaitic tradition there was a difference of opinion as to the order in which the names of the twelve tribes were put on the "shoham" stones (Soṭah 36a). According to Rashi's explanation of the passage, the Tannaim differ in that according to the one opinion the names followed in the sequence of the ages of the Patriarchs, with the exception of Judah, who headed the list; while according to the other opinion, the names of Leah's sons were on the stones of the right shoulder-band, and on the left side the name of Benjamin came first, followed by those of the four sons of the concubines בני השפחות, with Joseph's name at the end. Maimonides, however, probably basing his reasons on a lost baraita, says (*l.c.*) that there were 25 letters on each side and that the sequence was as follows:

Left.	Right.
שמעון	ראובן
יהודה	לוי
זבולן	יששכר
דן	נפתלי
אשר	גד
בנימן	יהוסף

According to this opinion, if the list was read from right to left, the names were arranged in the sequence of the ages of the Patriarchs, with the exception, however, that Naphtali's name, instead of following Dan's, preceded it. That Joseph's name was spelled in the unusual form Yehosef is asserted in the Talmud (*l.c.* 36b). In conformity with the view that the garments of the high priest possessed the power of absolving from sin (compare High Priest in Rabbinical Literature), it is asserted that the ephod was used in atoning for idolatrous sins, "ephod" meaning also "the idol" (Zeb. 87b). The ephod of the high priest must be distinguished from the linen ephod which is mentioned in Scripture as a common garment of priests and of the disciples of prophets (Maimonides, *l.c.* x. 13; Ibn Ezra on Ex. *l.c.*; but compare Yer. Sanh. x. 29a). Compare Breastplate of the High Priest; Gems; Urim and Thummim.

EPHOR (lit. "superintendent"): An official in Sparta and in other parts of Greece. Officials called "ephori" were employed among the Jews: (1) in the service of the Temple at Jerusalem (Yoma 9a); (2) at Babylon (Yeb. 45b); (3) in the Byzantine empire, where an ephoros who supervised prices, weights, and measures ("Basilica," i. 42) was included in the organization of the Jewish community. Greek designations for Jewish offices are also found elsewhere in Greek countries; for instance, "didascalus" for rabbi (see "R. E. J." xii. 118), "sophoi" (*σοφοί*) for teachers (see "J. Q. R." vi. 235).

G. S. Kr.

EPHRAEM SYRUS: Church father; born at Nisibis, Syria (whence his surname "Syrus"), or at Edessa, at the beginning of the fourth century. His numerous writings include Syriac commentaries on the Pentateuch and on most of the historical and prophetical books of the Old Testament. The text used by him was the Peshiṭta; but, judging from various passages of his commentaries, he understood Hebrew and often had recourse to the original. These commentaries contain numerous haggadot. Thus, for instance, in accordance with an old midrashic saying, Ephraem explains that the earth's covering of grass at the moment of Creation looked as though it were a month old, and the trees as though they were a year old (Ephraem, "Opera," i. 15; comp. Gen. R. xiv. 2; Ḥul. 60a). Adam was endowed with a brightness which eclipsed that of the sun. This brightness disappeared when he ate the forbidden fruit (i. 26a; Gen. R. xi., xii. 2). Cain's sacrifice was not accepted because it consisted of the remnants of his meals (ii. 313c; Tan., Bereshit, 7b). Such haggadot, which show the influence of Jewish tradition on the Bible exegesis of the Church Fathers, are very numerous in Ephraem's commentaries.

Unlike other Church Fathers, Ephraem never mentions the Jews in connection with the haggadot he uses, but cites them anonymously. This is probably due to his hostility toward them; indeed, of all the Church Fathers, Ephraem nourished the most vindictive hatred against the Jews, whom he often terms "the circumcised vagabonds" (טעיא גזירא). Because of their reviling of Jesus, says he, they were driven from their country and condemned to wander. He applies Solomon's judgment (I Kings iii. 16 *et seq.*) to the Synagogue and the Church. The Synagogue, he says, is continually protesting that her son is the living child and pleasing to God. Ephraem even wrote a denunciatory hymn against the Jews, of which the following passages may be cited:

> "What is thine iniquity, O daughter of Jacob, that thy chastisement is so severe? Thou hast dishonored the King and the King's Son, thou shameless one and harlot! . . . The Father was exchanged for the calf and for sundry similitudes, and the Son also was exchanged for a thief and a blood-shedder. . . ."

Ephraem is especially embittered against the Jews for their persistency in the Messianic hope.

> "Jacob blessed Judah, saying: The scepter shall not depart from thee. . . . In this passage let the Jews that perceive not search and look if there be a scepter in Judah or an interpreter between his feet, for the things that are written have not been fulfilled, neither have they hitherto met their accomplishment. But if the scepter be done away with, and the prophet be silenced, let the people of the Jews be put to shame, however hardy in impudence they be."

Ephraem acknowledges that at his time the Jewish faith had numerous accessions from heathendom. Of course, Ephraem declares that the heathen were deluded by Jewish missionaries (see his commentary on II Kings xix. 1).

Krauss, *The Jews in the Works of the Church Fathers*, in *J. Q. R.* vi. 28-99.

J. I. Br.

EPHRAIM.—Biblical Data: 1. Son of Joseph. The name is connected with the root פרה ("to be fruitful": Gen. xli. 52). He was the younger of the two sons born to Joseph before the famine, Manasseh being the elder (Gen. xli. 51). Nevertheless, Jacob, while blessing both, confers on Ephraim the rights of the firstborn, to be unto him "as Reuben and Simeon" (Gen. xlvii. 1-20), Joseph unsuccessfully attempting to prevent the preference of the younger. This episode puts the historical fact that Ephraim and Manasseh (and Benjamin) originally constituted one tribe (see Gen. xlix. 22-26; Deut. xxxiii. 13-17) in the form of a personal experience in the family of the patriarch. From Joseph, Manasseh was first to separate: hence he is the elder; but Ephraim, increasing in importance and number, outstrips the brother clan. That the birthright of Reuben is given to Joseph's sons, as is stated in I Chron. v. 1, indicates the gradual disintegration of the tribe of Reuben, and the rise to prominence of the Joseph division. The successive development of these conditions is also reflected in the circumstance that in the enumerations of the tribes Manasseh sometimes precedes Ephraim (Num. xxvi. 34); sometimes the order is reversed (Num. i. 32).

Holzinger ("Genesis," p. 199) and Guthe ("Geschichte des Volkes Israel," 1899, pp. 2 *et seq.*) declare Ephraim to have been a later personification (compare Gunkel, "Genesis," p. 427). For arguments against this theory see Koenig, "Einleitung in das Alte Testament," pp. 183-185. While blessing, Jacob crosses (שכל) his hands in order to place his right hand upon the head of Ephraim. This verb, which occurs only in this passage, has given rise to curious rabbinical interpretations. Connecting it with "sekel" (mind, wisdom), Targum Onḳelos construes it as indicating that Jacob acted with full knowledge (see also Rashi and Ibn Ezra to the verse). According to R. Judah, שׂכל really reads "shikkel," and signifies that Jacob despoiled Manasseh in favor of Ephraim (Pesiḳ. R. 3 [ed. Friedmann, p. 12a, note 85]). R. Nehemiah claims that the expression denotes the power of Jacob to "instruct" and guide the holy spirit (*ib.*). It is of interest to note that the words of Jacob's blessing (Gen. xlviii. 16) constitute one of the "pesuḳe de raḥame," verses petitioning protection which, according to the saying of Abaye (Ber. 5a), were added to the Shema‘ recited on retiring. E. G. H.

Chief of Ephraim.

——**2.** The tribe; named after its eponym, Ephraim, the second son of Joseph (Gen. xli. 50 *et seq.*). Of its earlier history, an obscure gloss (I Chron. vii. 21, 22) preserves only a vague reminiscence of a cattle-raid in which the tribe was ingloriously beaten by the aboriginal people of Gath. At the time of the Exodus Ephraim appears to have been numerically one of the smaller tribes (40,500 warriors, while Judah is credited with 74,600, Zebulun with 57,400, Manasseh with 32,200, and Benjamin with 35,400: Num. i. 32–37). But Ephraim, Manasseh, and Benjamin, descendants of Rachel, marched together, Ephraim in the lead, and camped west of the Tabernacle (Num. ii. 18). The chief of Ephraim, who made the offerings for his brothers, was Elishama, son of Ammihud (Num. i. 10, vii. 48–53). Among the spies sent into Canaan was Hoshea of Ephraim, whose name was changed to "Joshua" (Num. xiii. 9, [R. V. 17]), and his succession to the leadership after Moses proves that by the invasion Ephraim had risen to dominant influence, though the figures of the census, which credit it with only 32,500 warriors against Manasseh's 52,700 and Benjamin's 45,600, show a loss (Num. xxvi. 34 *et seq.*).

At the apportioning of the land, Ephraim was represented among the commissioners by Kemuel, the son of Shiphtan, as well as by Joshua (Num. xxxiv. 24). From Joshua xvii. 14–18, xviii. 5, it is plain that at the conquest and settlement of the land Ephraim and Manasseh (and Benjamin: compare Ps. lxxx. 2; II Sam. xix. 20; Num. ii. 18 *et seq.*) were considered one tribe—that of Joseph. Indeed, in the old tribal poem, the so-called Blessing of Jacob (Gen. xlix. 22 *et seq.*; compare Deut. xxxiii. 13 *et seq.*; Judges i. 22), by modern critics ascribed to the early part of the period of the Judges, Joseph is named in place of Manasseh and Ephraim. In consequence of the necessity of acquiring more territory to provide for its growing numbers, this Joseph group forced its way northward through hostile territory (Josh. xvii. 14 *et seq.*). This movement resulted in the isolation of Manasseh and Ephraim (Josh. xxi. 5) though the lines of demarcation between their separate possessions were by no means consistently or continuously drawn, each having settlements in the district of the other (Josh. xvi. 9; xvii. 8, 9). The southern boundaries of the portion of Joseph, which constituted also the southern frontier of Ephraim, are these: Starting from the Jordan, near Jericho and its springs on the east, and following the desert of Beth-aven, which rises from Jericho to the hill of Beth-el, the line passed from Beth-el to Luz; thence toward the boundary of the Archites (‘Ain ‘Arik) to Ataroth, descending westward toward the frontier of the Japhletites to the border of the nether Beth-horon and to Gezer (Tell Jezer), terminating at the sea (Josh. xvi. 1–3).

Ephraim's Portion.

In Josh. xvi. 5 *et seq.*, however, the statement is made that Ephraim's border eastward ran from Ataroth-addar to Beth-horon the upper, bending westward at Michmethath on the north, and then, turning eastward to Taanath-shiloh (the modern Ta‘na), passed along it to the east of Janoah (modern Yanun), descending again to Ataroth and to Naarah (modern Khirbat Tamiyyah), finally reaching Jericho and ending at the Jordan. From Tappuah the line proceeded westward to the brook Kanah (probably the Nahr al-Faleḳ) and to the sea (the Mediterranean: Vulgate, incorrectly, "the Dead Sea"). These data are confusing and not always consistent; they prove that for many centuries the delimitations were uncertain and the traditions concerning them conflicting (see Holzinger, "Joshua," pp. 66, 67).

The district occupied by Ephraim was mountainous but very fertile (Hosea ix. 13; Gen. xlix. 22; Deut. xxxiii. 13–16; Isa. xxviii. 1). Its geographical position, midway between Dan, Benjamin, and Manasseh beyond the Jordan, contributed materially to making its possessor, Ephraim, the dominant factor in the political development of the northern tribes. The mountains afforded protection; the Jordan and the sea were within easy reach; and the natural roads of communication between the north and the south passed through it. Within its borders were the old centers of the religio-political life, Shechem, Aruma, and Shiloh, the seat of the Sanctuary.

The character imputed to Ephraim reflects the rugged configuration of its home district (Gen. xlix. 23, 24). Ephraim is equipped with "the horns of the wild ox" (Deut. xxxiii. 17).

Ephraim's Martial Character.

The deeds of the tribe reported in the Book of Judges bear out this characterization. It had a share in the expedition against Hazor and King Jabin (Judges iv. 2; Josh. xix. 36). Deborah is represented as residing in its borders (Judges iv. 5; see for modern critical views Budde, "Das Buch der Richter"). In the Song of Deborah the tribe is commended as among the first to respond to the summons to arms (Judges v. 14). Ephraim, jealous of its rivals for the leadership, has a dispute with Gideon about being neglected at the outset of his campaign against the Midianites (Judges vii. 24, viii. 1); but its displeasure is abated by a happily turned compliment about "the gleaning of the grapes of Ephraim being better than the vintage of Abiezer" (Judges viii. 2). Under Jephthah the men of Ephraim again resented a slight of this kind (xii. 1), but with dire consequences to themselves. The Gileadites, having an old grudge against them (Judges xii. 4), smote them, and the venture cost the tribe 42,000 men (*ib.* 6).

The episode is of linguistic interest, as in connection therewith the peculiar dialectic difference of the

Ephraimitic speech is recorded in the "s" pronunciation of the word "Shibboleth" (*ib.*). Abdon of Pirathon, an Ephraimite, is mentioned as one of the later judges (xii. 15), while, thanks to Abimelech, Ephraim and its capital Shechem enjoy, if only for a short time, the distinction of being the first in Israel to be under a king (ix. 6). Samuel sustained close connections with Ephraim (I Sam. i. 1, vii. 15–17). In his selection of Saul as king, the jealousies of the tribe were well considered, the new monarch being a Benjamite and therefore an ally of Ephraim. Hence, at the death of Saul, Ephraim remained loyal to his son Ishbosheth, and accepted David's (Judah's) rule only after Abner's and Ishbosheth's assassination (II Sam. ii. 9, v.); but under Solomon's successor it found the coveted opportunity, with the support of the Ephraimite prophet Ahijah, to secede and set up its own independent kingdom under Jeroboam (I Kings xi. 26, 29), with Shechem as the capital (I Kings xii. 1).

Secession of Ephraim.

Thenceforth the history of Ephraim is merged in that of the Northern Kingdom, in which it remained the dominant factor, so that, especially in figurative speech, its name came to be used for the state of the Ten Tribes (Isa. vii. 2–5, 8; Hosea v. 3, 5, 9; vi. 4, and elsewhere). In II Chron. xv. 8–11 the secession of Ephraim is denounced as a forsaking of the God of its fathers and of His laws. II Chron. xxx. 1, 10, 18 describes the irreligion of Ephraim in mocking the emissaries of Hezekiah, come to invite them to keep the Passover in Jerusalem, and concludes the account by reporting the destruction of all the idolatrous appointments by the pious celebrants, "even in Ephraim [and Manasseh]." Josiah is credited with despatching an embassy on a similar errand (II Chron. xxxiv. 6, 9).

Ephraim's rejection is spoken of in the Psalms (lxxviii. [A.V. lxxvii.] 67), though in lx. 7 Ephraim is hailed "as the defense of [God's] head" (compare cviii. 8). Ephraimites constituted an element in the formation of the new people, the Samaritans (Ezra iv. 4: "'Am ha-areẓ" [עם הארץ]; Ecclus. [Sirach] ii. 26: "That foolish people that dwell in Shechem").

E. G. H. E. K.

——**In Rabbinical Literature:** Though for seventeen years Jacob instructed Ephraim, yet when the latter came with his father Joseph and his brother Manasseh to be blessed Jacob did not recognize him, because on seeing Jeroboam and Ahab, Ephraim's descendants, the prophetic spirit left him. Joseph then addressed a fervent prayer to God, and the spirit of prophecy returned. Jacob then saw another of the descendants of Ephraim, Joshua ben Nun, and thereupon gave the precedence to Ephraim over his elder brother Manasseh by placing his right hand upon his head and by mentioning his name first (Tan. to Wayeḥi). Ephraim was thus favored with the birthright because he was modest and not selfish (Gen. R. vi.; Pesiḳ. R. 3). God, who executes the wishes of the just, confirmed Jacob's blessings, and Ephraim took precedence over Manasseh in the order of the Judges (Joshua of Ephraim coming before Gideon of Manasseh), in the order of the standards (Ephraim's preceding that of Manasseh), in the offering of the princely sacrifices (Num. vii.), and in the order of Kings (Jeroboam and Ahab coming before Jehu: Num. R. xiv.). In imparting the blessing Jacob said to Ephraim: "Ephraim, the heads of the tribes, the chiefs of the yeshibot, and the best and most prominent of my children shall be called after thy name" (Lev. R. ii.); Joshua, Deborah, Barak, Samuel, Messiah ben Joseph, and Messiah ben David were Ephraimites (Pesiḳ. R. 37 [ed. Friedmann, p. 164a]). The tribe of Ephraim miscalculated the time of the deliverance of the children of Israel from Egypt, and left the country thirty years before the appointed time. They were met by a hostile host of Philistines, who offered them battle, in which the Ephraimites lost 300,000 men (according to Pesiḳ., 180,000; according to Pirḳe R. El., 200,000). Their bones were strewn in heaps along the roads. According to the "Sefer ha-Yashar" (see Shemot), this event took place in the 180th year after the Israelites went to Egypt, when 30,000 infantry from the tribe of Ephraim left Egypt. The battle was waged near Gath. Because they rebelled against the word of God in leaving Egypt before the end of the captivity destined by God had arrived, all except ten were slain. The Philistines lost in the battle 20,000 men. The ten men who escaped from the battle returned to Egypt and related to their brethren what had happened to them. Ephraim, who was still alive, mourned over them many days. That the children of Israel might not see the bleached bones of the slain of Ephraim and return to Egypt, God led them to Canaan by circuitous ways (Ex. R. xx.). The slain Ephraimites were subsequently resuscitated by Ezekiel (Sanh. 92b). Ephraim's banner was painted black, and bore the picture of a bullock (Num. R. ii.); Moses alluded to it when he said of Joseph: "The firstling of his bullock, majesty is his" (Deut. xxxiii. 17, R. V.). In the camp Ephraim occupied the west side; from the west come the severest winds, and also heat and cold; to these Ephraim's strength is compared (Num. R. ii.). As God created the four cardinal points and placed against them the standards of four of the tribes, so He surrounded His throne with four angels, the angel to the west being Raphael ("the Healer"), who was to heal the breach wrought by Ephraim's descendant, King Jeroboam (Ex. R. vii.). See MESSIAH.

S. S. I. BR.

EPHRAIM, MOUNTAIN OF (הר אפרים; R. V. "hill country of Ephraim"): The northern part of the mountain range west of the Jordan, extending from Beer-sheba to the great plain of Esdraelon. Its southern boundary is not expressly indicated in the Old Testament, and probably never constituted a geographically defined line. It is certain, however, that the section on the north comprised a larger area than that inhabited by the tribe of Ephraim; for, according to Judges iii. 27, the Benjamites also were dwellers in the Ephraim hill country. It is further stated in Judges iv. 5 that Deborah lived between Ramah and Beth-el in Mount Ephraim. As for the extension of the hilly country on the north, the allusion in Josh. xvii. 14 *et seq.* would seem to prove that it was not taken to stretch as far as the plain of Esdraelon, unless the "wood country" (R. V. "forest") here mentioned designates, as some authorities assume, the section of the mountain range between Shechem and the plain. At any rate, the "wood country" is contrasted here with the "Har Efrayim." The whole passage, however, is not clear.

In distinction from the range in Judah, which is somewhat regular in its outline, Ephraim consists of valleys and peaks running in all directions. It also includes several plains without outlet, which in the rainy season are transformed into marshes. The great depression in which Shechem is situated divides the mountain into two halves, the southern and the northern. The southern half attains, in its northern part near Shechem, an elevation of 2,604 feet (Mount Gerizim). The northern half commences near Shechem with Mount Ebal, from which issues a ridge terminating in Ras Ibziḳ with an elevation of 2,205 feet. The promontory Carmel, at an elevation of 1,656 feet, forms the terminus on the northwest.

The hill country of Ephraim is far more fertile than that of Judah, and comprises a number of splendid valleys richly studded with orchards. The marshy plains mentioned above contain excellent soil in summer. The peaks, on the other hand, are bald, being sparsely covered with shrubbery.

EPHRAIM B. AARON NABON. See NABON, EPHRAIM B. AARON.

EPHRAIM B. GERSHON: Turkish preacher and physician of the middle of the fifteenth century; lived in Negropont and Constantinople. He was a friend of Mordecai Comtino and Samuel Bueno, for the funeral of whose sister he composed a sermon. His sermons, still extant in manuscript, are interesting as literary and historical documents. He was probably the teacher of Elijah Mizraḥi.

G. M. K.

EPHRAIM B. ISAAC OF REGENSBURG (also called **Ephraim the Great**): German tosafist and liturgical poet of the twelfth century; died in Regensburg about 1175, probably at an advanced age. He was one of the oldest pupils of R. Tam, under whom he studied in his youth, and he probably attended other yeshibot. On his return from France he settled in Regensburg, probably his birthplace, where, with Isaac b. Mordecai and Moses b. Abraham, he established a rabbinical collegium. His life was spent in that city, where also lived his son Moses, a noted scholar, and his grandson Judah, a pupil of Eleazar of Worms. Ephraim was an independent character among the German Talmudists of the twelfth century. Of remarkable keenness of perception, he refused to recognize, either in the theoretical or in the practical field, any post-Talmudic authority, and often, therefore, came into conflict with his teachers and colleagues. This was the case when he tried to introduce extensive modifications of the strict Passover regulations, or when, in spite of the remonstrances of so old an authority as Eliakim b. Joseph, he permitted pictures of lions and snakes in the synagogue. Established customs and religious regulations which had been long regarded as inviolable were abrogated by Ephraim when no reason for their existence could be found in the Talmud. With even greater recklessness did he proceed in the explanation of the Talmud. Traditional interpretations, and sometimes even traditional readings, had no authority for him. He had the courage in a letter to his teacher to characterize certain parts in the benediction recited at the Habdalah, on the evening of the festivals, as "foolish verbosity"; and to criticize the customary shofar-blowing on Rosh ha-Shanah.

In spite of the sharp rebuke which he elicited from R. Tam, who called him conceited and impertinent ("Sefer ha-Yashar," ed. Rosenthal, p. 148), Ephraim seems to have abated but little of his independence, as shown in his frequent differences with his former pupil and colleague Joel b. Isaac, and in his answer to R. Tam (*ib.* pp. 149 *et seq.*). In fact, he is known in halakic literature for his many propositions tending to modified interpretations of the Law, some of which prevailed in spite of general opposition. He would have achieved still greater success, no doubt, but for a violent temper which caused him on several occasions to leave the synagogue during the service in fierce anger on account of some usage not approved by him. As a liturgical poet he excels all his German and many of his French contemporaries. His language is concise but clear, graceful though forceful. His ingenious turns and facile expression often call to mind the Spanish piyyuṭim. Like them, he also wrote poems in strophic rime and verse measure, which, nevertheless, are easy and flowing. His piyyuṭim are filled with lamentations over the sufferings of Israel and with penitential reflections; twenty-eight of them have been preserved.

Ephraim wrote tosafot to various treatises, some portions of which may be found in the printed tosafot as well as in other works. His commentary on Abot, which in the fifteenth century was still in existence, seems to have since been lost. Some of his responsa are found in R. Tam's "Sefer ha-Yashar" and Eliezer b. Joel's "Abi ha-'Ezri." The R. Yaḳḳir who is quoted by some authorities is probably identical with Ephraim, since "Yaḳḳir" may have been a by-name for "Ephraim" (see Jer. xxxi. 20). He must not, however, be confused with Ephraim of Bonn, nor with Ephraim, the pupil of Alfasi.

L. G.

EPHRAIM B. JACOB (known also as **Ephraim of Bonn**, and **Shallum**): German Talmudist, liturgical poet, and chronographer; born in 1133; died after 1196. Ephraim belonged to a prominent family of scholars, which included Eliezer b. Nathan, to whom he addressed questions, and Leontin b. Jacob. He had two brothers, **Hillel** and **Kalonymus**, both of whom he outlived. As a boy of thirteen he witnessed the bloody persecutions to which the Jews on the Rhine were subjected, and, with many of his coreligionists, found refuge from the fury of the mob in the castle of Wolkenburg, near Königswinter, in the archbishopric of Cologne. Later he lived at Neuss, and left there for Cologne only a few days before the massacre of 1187. He lost, however, on this occasion, a large part of his fortune. He seems to have resided usually at Worms. Ephraim was one of the important German Talmudists of his time, although comparatively little is known of his work in the field of Halakah. He frequently wrote responsa in conjunction with Judah b. Kalonymus, Moses b. Mordecai, and Baruch b. Samuel; several of them are quoted in the "Mordekai"; but the "Ḥibbur" mentioned in the "Mordekai" is not by him, but by Ephraim b. Nathan.

Ephraim is better known as a liturgical poet. Zunz enumerates twenty-three of his piyyuṭim, several of which are found in German and Polish liturgies. For instance, his "Elohim Ẓiwwita Lidideka" and "Ha-Raḥman Hu Asher Ḥanan" are still recited in Germany on the occasion of a circumcision. Ephraim was, perhaps, the last German to compose poems in Aramaic for the synagogue, his seliḥah, "Ta Shema‘," being especially well known. This piyyuṭ is a mosaic containing forty-five lines, a combination of Aramaic expressions and phrases used in the Talmud. His Hebrew piyyuṭim are frequently acrostic compositions with a Talmudic phraseology, and are therefore in many cases obscure and ungraceful. He had wit and a great command of both Hebrew and Aramaic. In almost all his poems he alludes to the persecutions and to the martyrs of Judaism. He also wrote a commentary on the earlier portions of the Maḥzor, which became the chief source for the similar work of a compiler in the beginning of the fourteenth century, and which is extant in manuscript in Hamburg (Steinschneider, "Cat. der Hebräischen Handschriften in der Stadtbibliothek zu Hamburg," p. 57).

Ephraim's account of the persecutions of the Jews in Germany, France, and England, between 1146 and 1196, is of great historical value. It is in a great measure the record of his own experiences, which are related impartially, and is among the most valuable of the documents used by medieval chronographers in their history of the persecutions during the period of the Crusades. It was printed for the first time as an appendix to Wiener's German translation of Joseph b. Joshua ha-Kohen's "'Emeḳ ha-Baka" (Leipsic, 1858), and translated into German by S. Baer in "Hebräische Berichte über die Judenverfolgungen Während der Kreuzzüge" (Berlin, 1892). Scattered notices by contemporaneous Christian writers testify to the accuracy of Ephraim's descriptions.

P.* pp. 262–263 (contains a translation of a seliḥah by Ephraim); idem, *Z. G.* p. 363; compare Aronius, *Regesten*, No. 232.

K. L. G.

EPHRAIM BEN JACOB HA-KOHEN: Lithuanian Talmudist; born at Wilna 1616; died June 3, 1678, at Ofen, Hungary. Driven by the Chmielnicki persecutions from his native city, where he was dayyan, he went to Moravia. He filled the office of rabbi, first at Trebitsch and then at Ofen.

Ephraim's works include: "Sha‘ar Efrayim," responsa arranged according to the order of the Shulḥan ‘Aruk (Sulzbach, 1688); and "Maḥaneh Efrayim," notes to the Pentateuch, which he left in manuscript.

Bibliography: *Sha‘ar Efrayim*, Introduction; Fuenn, *Kiryah Ne'emanah*, p. 73, who wrongly calls Ephraim's father Aaron instead of Jacob; Emden, *Megillat Sefer*, Index, Warsaw, 1896.

L. G. A. Pe.

EPHRAIM BEN JOSEPH OF CHELM (JAMBROWER): Polish liturgist; born at Chelm, Poland, at the end of the sixteenth century; died at Wreshna, Poland, about 1650. His father, rabbi at Jambrower, Poland, entrusted his education to David ben Jacob of Szczebrszyn. After residing for some years at Cracow, Ephraim was called as rabbi to Wreshna. He wrote "Ba-Kosharot," in two parts, containing twenty-two liturgical poems, some of which are accompanied by a commentary and by halakic decisions (Cracow, 1607).

Bibliography: Zunz, *Literaturgesch.* p. 433; Steinschneider, *Cat. Bodl.* col. 904; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 241; Michael, *Or ha-Ḥayyim*, No. 508.

G. I. Br.

EPHRAIM BEN JUDAH: Liturgical poet of the twelfth century. According to Zunz ("Literaturgesch." p. 348) he lived in the northern part of France, and may be identical (*ib.* p. 495) with the Ephraim quoted by Jeroham in his "Toledot Adam we-Ḥawwah" (xv. 5, § 10). The Maḥzor of Avignon contains a piyyuṭ for the first day of Passover, beginning with "Wayehi ba-ḥaẓi ha-layelah," and bearing the name "Ephraim b. Judah," and an ancient Maḥzor of Rome contains two piyyuṭim written by an Ephraim b. Judah.

Bibliography: Zunz, *Z. G.* p. 465; idem, *Literaturgesch.* pp. 348, 495; Landshuth, *‘Ammude ha-‘Abodah*, p. 47; Fuenn, *Keneset Yisrael*, p. 152.

K. M. Sel.

EPHRAIM MAḲSHA'AH (="the Objector"): Scholar of the second century; disciple of R. Meïr. He is known only for several homiletic remarks in the name of his teacher. One accounts for the selection of Obadiah for the mission of evil tidings to the Edomites by asserting that this prophet was himself an Edomite, a proselyte to Judaism: his mission to that people illustrated the proverb, "From the woods themselves something must go into the hatchet [which is to fell the trees]" (Sanh. 39a; compare Yalḳ. to Obad. i. 1, § 545).

S. S. S. M.

EPHRAIM MOISICH. See Anbal the Jassin.

EPHRAIM B. NATHAN: German Talmudist of the thirteenth century; died before 1293. He was a pupil of Simḥah of Speyer and of Isaac b. Moses of Vienna. Under the latter he probably studied at the same time as did Meïr b. Baruch, as the names of both appear together as signatures to a responsum on an important communal question. Ephraim was the teacher of Mordecai b. Hillel, who refers to him simply as "my teacher Rabbi Ephraim." Mordecai often cites the halakic writings of Ephraim, which are sometimes called חיבור, sometimes קובץ. The exact nature of these writings is difficult to determine. To judge from Mordecai's quotations, however, they would seem to have extended over the whole Talmud, and to have contained explanations, as well as rules for religious practise. Ephraim also wrote a seliḥah for the Minḥah of the Day of Atonement, in which the initial words of its strophes form an acrostic of fourteen words.

Bibliography: Kohn, *Mordecai ben Hillel*, pp. 35-36; Zunz, *Literaturgesch.* p. 357.

L. G.

EPHRAIM SAFRA (= "the Scribe" or "Teacher"): Palestinian scholar of the third century; disciple of Simeon b. Laḳish, in whose name he reports a civil law (B. M. 119a). The same report appears elsewhere (Yer. B. M. x. 12c) without the reporter's cognomen and without any indication of his relation to Simeon. Rabbinowicz ("Diḳduḳe Soferim" to B. M. *l.c.*) cites versions of the same report, reading Ephraim Maḳsha'ah. If this be adopted, the order of author and reporter must be changed.

s. s. S. M.

EPHRAIM BEN SAMSON: Bible exegete; flourished in France in the twelfth and thirteenth centuries. He was the author of "Perush 'al ha-Torah," which consists chiefly of gematria and "notariḳon." He largely followed Eleazar of Worms. The commentary was published at Leghorn (1800), in the Pentateuch commentary "Torah Or." It would appear from a passage on Genesis (Wayeẓe) that he wrote that part at least before 1220. Parts of this commentary were utilized by Azulai in his "Naḥal Ḳedumim" (Leghorn, 1800).

Bibliography: Michael, *Or ha-Ḥayyim*, p. 251; Azulai, *Shem ha-Gedolim*, i. 32, Wilna, 1852; Zunz, *Z. G.* pp. 83, 92; Fürst, *Bibl. Jud.* i. 223; Steinschneider, *Jewish Literature*, p. 145; De Rossi, *Dizionario*, p. 102; Fuenn, *Keneset Yisrael*, p. 155.

K. M. Sel.

EPHRAIM SOLOMON BEN AARON OF LENCZIZA: Rabbi and popular preacher at Prague; born probably at Lencziza, Poland; died at Prague March 3, 1619. After having filled the office of rosh yeshibah at Lemberg, he was appointed in 1604 rabbi of Prague, and remained in this position until 1618.

Ephraim was the author of the following works: "'Ir Gibborim," in three parts, the first, entitled "Petiḥot u-She'arim," containing a rhetorical introduction and an ethical treatise, and the second and the third being homilies on the Pentateuch, Basel, 1580; "'Olelot Efrayim," ethical sermons based upon Bible and Talmud, in four parts, Lublin, 1590; "Keli Yeḳar," annotations on the Pentateuch, *ib.* 1602; "Sifte Da'at," forming the second part of the preceding work and containing homilies on the Pentateuch, Prague, 1610; "Oraḥ le-Ḥayyim," two ethical sermons, one for the Sabbath between New-Year and the Day of Atonement ("Shabbat Teshubah"), and the other for Passover, Lublin, 1595; "'Ammude Shesh," sermons, Prague, 1617; "Ribebot Efrayim," homilies on the Pentateuch (mentioned in the introduction to his work "Oraḥ le-Ḥayyim").

Ephraim was also the author of three liturgical poems celebrating Adar 2 (Feb. 15), 1611, on which date a hostile army that had entered Prague was defeated.

L. G. I. Br.

EPHRAIM OF SUDILKOV (called also **Moses Ḥayyim Ephraim**): Russian rabbi and preacher among the Ḥasidim of the Ukraine; born at Medzhibozh, Podolia, about 1750; died at Sudilkov, Volhynia, about 1799. He was the grandson of Israel Ba'al Shem-Ṭob and a twin-brother of Baruch of Tulchin. Unlike his brother, Ephraim performed no miraculous cures. He preferred a life of meditation and seclusion to the splendor of the court of a ẓaddiḳ. Preaching and writing Biblical commentaries of a mystical nature formed his only occupations. Ephraim was only twelve years old when his grandfather died, but he religiously preserved all that he had heard from him. Ephraim's sermons, which were largely commentaries on the sayings of his grandfather, were collected and published by his son under the title "Degel Maḥaneh Efrayim" (Koretz, 1810), and were approved by the best-known ẓaddiḳim of that time, Levy Isaac of Berdychev, Israel of Kozenitz, and Jacob Isaac of Lublin.

The work reflects his boundless admiration for the founder of Ḥasidism. He entertains no doubt of the thaumaturgic powers of BEShT. He tells of many prophetic messages from him to his brother-in-law in Palestine ("Degel Maḥaneh Efrayim," p. 6). The author insists that the miracles performed by Besht were due not to supernatural means or cabalistic methods, but to his simple and unswerving faith (*ib.* p. 32). He recommends as a model to the contemporary ẓaddiḳim the simple exhortation to rely upon heartfelt talks on common every-day subjects, and asserts that by such talks Besht led the people to God more effectually than by theological instruction (*ib.* pp. 36, 80). He believes firmly that when Ḥasidic teachings are professed by the entire Jewish people the national regeneration of Israel will be consummated (*ib.* p. 63).

Ephraim went to Sudilkov about 1780, but from time to time revisited his birthplace. While Ephraim was not free from the defects of Ḥasidism, he always urged simplicity and sincerity.

K. H. R.

EPHRAIM, VEITEL - HEINE: German financier; died at Berlin in 1775. The name means "Veitel, the son of Heine [German for "Ḥayyim"], the son of Ephraim." He was jeweler to the Prussian court and mint-master under Frederick William I. and Frederick the Great, by whom he was held in high esteem. By his financial operations he assisted this king in his wars, and when afterward charges of defalcation were brought against him, the king would not permit an investigation. Being the brother-in-law of David Fränkel, when the latter was elected rabbi of Berlin (1743), Ephraim pledged himself to pay annually the sum of 150 thalers into the treasury of the congregation, so that Fränkel might employ a substitute in law cases in which his relatives were involved and in which he could not act as judge (Landshuth, "Toledot Anshe Shem," p.

37, Berlin, 1884). The most important of the organizations which he founded is the Veitel-Heine Ephraim'sche Lehranstalt in Berlin, originally founded as a bet ha-midrash about 1774.

BIBLIOGRAPHY: *Ha-Maggid*, ix. 318; Fuenn, *Keneset Yisrael*, p. 153; *Wissenschaftliche Blätter aus der Veitel-Heine Ephraim'schen Lehranstalt*, Preface, Berlin, 1862; Lebrecht, *Die Rabbinische Bibliothek des Berliner Bet Hamidrasch*, Berlin, 1852.

EPHRAIM, VIDAL (known also as **Ephraim Blasom, Vidal Blasom,** and **Vidal Ephraim**): Pupil of R. Nissim of Gerona, rabbi in Palma, and teacher of Simeon Duran. He was greatly esteemed by Isaac b. Sheshet, and was noted for his mathematical attainments. He died a martyr to his faith.

BIBLIOGRAPHY: Isaac b. Sheshet, *Responsa*, Nos. 293, 309, 377; Simeon Duran, *Responsa*, i. 82b, 87a; ii. 50b; iii. 28a; Kayserling, *Gesch. der Juden in Spanien*, i. 170; Steinschneider, *Cat. Bodl.* col. 1968.

G. M. K.

EPHRATH or **EPHRATHAH** (אפרת, אפרתה): **1.** Wife of Caleb (son of Hezron) and mother of Hur (I Chron. ii. 19, 50; iv. 4). **2.** Another name for Bethlehem (Gen. xxxv. 19, xlviii. 7; Ruth i. 2, iv. 11; Ps. cxxxii. 6; Micah v. 1). The name "Ephratah" occurs once (I Chron. ii. 24) joined with "Caleb"—"Caleb-ephratah."

E. G. H. M. SEL.

EPHRATI, DAVID (TEBELE): Russian Talmudist; born in Vitebsk 1850; died in Frankfort-on-the-Main Oct. 24, 1884. Among his ancestors were: R. Liva b. Bezalel of Prague, R. Yom-Ṭob Lipman Heller, and R. Moses Kremer of Wilna. His "Toledot Anshe Shem," Warsaw, 1875, which is an attempt at the biographies and genealogies of these notables and their descendants, from a scientific point of view was not very successful (see "Ha-Shaḥar," vii. 723–726). He wrote many Talmudical works and commentaries, but only a few of them were published, viz.: "Migdal Dawid," on halakic subjects, containing also some biographies, Mayence, 1873; "Yad Dawid Tebele," Lemberg, 1880, containing addenda to his work "Dibre Dawid," which had appeared five years previously; and "Ḳohelet Dawid ha-Efrati," on Ecclesiastes, Berlin, 1884. Ephrati also published, with the assistance of Israel Hildesheimer, a periodical dealing with rabbinical questions, under the title "Eẓ Ḥayyim," of which several monthly numbers appeared in Lemberg in 1881, and a few in Berlin in 1884. Ephrati was also associated with R. Israel Lipkin (Salanter) in the publication of the periodical "Tebunah."

BIBLIOGRAPHY: *Ha-Asif*, ii. 754.

H. R. P. WI.

EPHRON (עפרון): **1.** Son of Zohar the Hittite; possessor of a field called "Machpelah," which he sold to Abraham for 400 shekels (Gen. xxiii. 8, xxv. 9, xlix. 29). The Talmudists place Ephron's conduct in a poor light, alleging that after having promised Abraham the field for nothing, he accepted from him 400 shekels in good money (Bek. 20; B. M. 87; B. B. 89).

2. One of the places won by Abijah, King of Judah, from Jeroboam, King of Israel (II Chron. xiii. 19). But the "ḳere" is "Ephrain" (עפרין).

3. Mount Ephron, a district on the northern frontier of Judah, between Naphtoah and Kirjath-jearim (Josh. xv. 9).

4. A city on the east of the Jordan, taken and destroyed by Judas Maccabeus in his expedition to Gilead (I Macc. v. 46–51; II Macc. xii. 27; Josephus, "Ant." xii. 8, § 5).

E. G. H. M. SEL.

EPIC POETRY: Though an abundance of historical reminiscence and a mass of soul-stirring legend lay in the storehouse of Jewish literature, none of it was built into a heroic poem. Religious and secular poets, it is true, often treated of such subjects as Abraham and Isaac and the sacrifice on Mount Moriah, Jacob and Joseph and the stirring story of their lives, Moses and Aaron and the departure from Egypt, Joshua and the entrance into Canaan, Jeremiah and the fall of Jerusalem, Elijah the Prophet, his disciple Elisha, Jonah, Mordecai and Esther, the post-Biblical Maccabees, the Ḥanukkah festival, the ten martyrs, the woman with her seven children. These, however, are only poems with an epic coloring; a pure epic according to the rules of art was not produced during all the centuries of the Middle Ages. The stern character of Jewish monotheism prevented the rise of hero-worship, without which real epic poetry is impossible. Solomon de Oliveira is probably one of the first of whom an epic is known ("Elat Ahabim," Amsterdam, 1665).

The first to produce anything worth notice in this direction was N. H. Wessely with his Mosaide "Shire Tif'eret" (Berlin, 1789–1802), an epic on the Exodus, of linguistic elegance, but of no very great poetic worth. The influence of a similar work by the German poet Klopstock is quite evident. Next to him stands Shalom Kohn with his "Ner Dawid," an epic poem on King David (Vienna, 1834). The influence of these two epics on the readers and poets of that time and on the later "maskilim" in Galicia was considerable. In addition the following poets may be mentioned from that and the succeeding period: Issachar Bär Schlesinger ("Ha-Ḥashmona'im," Prague, 1817); Samuel Molder ("Beruriya," Amsterdam, 1825); Süsskind Raschkow ("Ḥayye Shimshon," Breslau, 1824); Gabriel Pollak ("Ha-Keritot," Amsterdam, 1834, and "Ḳiḳayon le-Yonah," *ib.* 1853); and Hirsch Wassertrilling ("Hadrat Elisha'," Breslau, 1857, and "Nezer Ḥamodot," *ib.* 1860). The later modern Hebraists have completely neglected this branch of poetry, and a poem with merely an epic coloring has taken the place of the stately and imposing epic itself. Works of this sort have been written by M. I. Lebensohn ("Niḳmat Shimshon," "Yoel we-Sisra," etc.)—who has also translated parts of Vergil's "Æneid"—Konstantin (Abba) Schapira, Solomon Mandelkern ("Bat Sheba'" and "Shiggayon le-Dawid"), and others. Of recent Hebrew poets may be mentioned J. L. Gordon ("Ahabat Dawid u-Mikal," Wilna, 1856, and vols. iii. and iv. of his collected works, St. Petersburg, 1883), Ch. N. Bialik, and S. Tschernichowski.

EPICURUS AND EPICUREANISM. See Apiḳoros.

EPIGRAMS (חרוז; in modern Hebrew פתגם, מכתם; by way of circumlocution חץ שנון, plural חצים שנונים): Short poems with an unexpected yet pointed ending; much in favor among Jewish writers because of the play of wit which they permitted, though often rather in substance than in form. Such epigrammatic phrasings of ideas were used in birthday and wedding poems, in dirges and tombstone inscriptions, as well as in epigraphs, chapter-headings, introductions, dedications, and approbations and commendations of written or printed books. They were employed especially in scholarly disputes, and have played a prominent part in controversial literature. At times they took a serious turn, at others they were humorous and satirical: to deride man's lot on earth, or to express sentiments of love, friendship, or enmity. They were used even for fervent prayers. Hebrew epigrams take mostly the form of a witty application of some Biblical or Talmudic expression; or they contain simply an allusion to persons and objects with which the reader is supposed to be familiar.

The epigram is represented in the productions of all the Jewish poets of the Middle Ages. Typical are the didactic and ethical epigrams of Samuel ha-Nagid (see Harkavy, "Studien und Mittheilungen," i., especially some of the fragments of בן תהלים and בן משלי), the gloomy verses of Solomon ibn Gabirol, the noble, tender, and at times droll epigrams of Judah ha-Levi. Moses ibn Ezra, who was somewhat older than Judah, excels him in both breadth of thought and depth of feeling, as well as in artistic expression. Sharply pointed are the epigrams of the clever and sarcastic Abraham ibn Ezra. Ingenuity and waggishness vie with each other in the productions of Al-Ḥarizi. The Italian Immanuel may also be classed with the masters of this form of poetry. The disputes about Maimonides and his works ("Moreh" and "Madda'") occasioned a great number of epigrams, which have been collected by Steinschneider (מורה מקום המורה, ed. Meḳiẓe Nirdamim, Berlin, 1885). Some good epigrams were produced by Eleazar ben Jacob ha-Babli, Solomon da Piera, and some of the latter's contemporaries—Azariah dei Rossi, Judah de Modena, Jacob and Immanuel Frances, the three Gavisons (father, son, and grandson, especially the last), and many others. Brüll has published a number of epigrams from a sixteenth century German manuscript, the material of which, however, goes back to a much earlier date ("Jahrb." ix. 1 *et seq.*).

Among the foremost epigrammatists of modern times, beginning with the period of enlightenment in the eighteenth century, are Ephraim Luzzatto, J. L. Jeiteles, J. B. Lewinsohn, S. D. Luzzatto, Joseph Almanzi, Hirsch Sommerhausen (חצים שנונים, Amsterdam, 1840), J. A. Benjacob, whose collected epigrams (מכתמים, Leipsic, 1842) are accompanied by a treatise on the form and essence of the epigram; M. Letteris, A. B. Gottlober, and S. Mandelkern.

EPIGRAPHY. See Inscriptions.

EPILEPSY: Disease of the nervous system, manifesting itself by attacks of unconsciousness, with or without convulsions. It frequently occurs in families where there is a predisposition to neurosis, and tends to appear in the offspring of parents who suffer from syphilis or alcoholism. Consanguineous marriage, while not causing its appearance in the offspring, may aggravate it where a neurotic tendency exists.

The infrequency of alcoholism and syphilis among Jews renders them less liable than others to the disease; while the frequency of hysteria, insanity, neuralgia, etc., coupled with consanguineous marriages, intensifies any predisposition toward epilepsy.

In a discussion on the pathology of the Jews before the Academy of Medicine at Paris in 1891, Charcot stated that at the Salpêtrière, the great hospital for nervous diseases at Paris, only 39 Jewish epileptics came under observation during a period of thirteen years.

Dr. Worms, physician to the Rothschild Hospital in Paris, showed that during a period of twenty-five years (1865–90), of 25,591 Jewish patients admitted into that institution, only 77 suffered from epilepsy. Considering the fact that the Jewish population of Paris during that time was about 43,500, Dr. Worms affirmed that this was a very small proportion.

Dr. C. L. Minor of Moscow, Russia, in an analysis of his cases of nervous diseases, finds that among his 1,480 Jewish patients 36 (2.4 per cent) were epileptics, as against 60 (3.5 per cent) among his 1,734 non-Jewish patients. Among the Jewish patients 15 had suffered from epilepsy before they reached the age of fifteen. Among the non-Jewish patients only 9 had had the disease before that age.

In the Craig Colony for Epileptics, New York, 1,286 patients had been admitted up to Oct., 1902. Of these only 57 were Jews—41 men, 16 women. Thus, while the Jewish population of the state of New York is estimated to be 6 per cent of the total population, the percentage of Jewish epileptics at the Craig Colony is only 4.43.

On the whole, the figures recorded seem to imply less liability to epilepsy on the part of Jews, notwithstanding a vague impression to the contrary.

Bibliography: Lagneau, M. G. Sée, Worms, Chovet, Feré, Oser, in *Discussion sur la Pathologie de la Race Juive*, in *Bulletin de l'Académie de Médecine de Paris*, xxvi. 238–241; C. L. Minor, *Sbornik v Polsku Yevreiskikh Narodnikh Shkol*, St. Petersburg, 1898.

J. M. Fi.

EPIPHANIUS: Bishop of Constantia, Cyprus; born at Bezanduke near Eleutheropolis, Palestine, between 310 and 320 (according to Bartolocci, in 288); died at sea in 403. Epiphanius is supposed to have been born of Jewish parents and to have embraced Christianity in his sixteenth year. A legend asserts that, before his conversion, Epiphanius was adopted by a rich Jew named Tryphon, who died soon afterward, leaving his fortune to Epiphanius. After passing four years in Egypt in a monastery, Epiphanius returned to his native village, founding there a monastery of which he became abbot. In 367 he was elected Bishop of Constantia, in Cyprus, and became a zealous defender of orthodoxy, attaining celebrity on account of his opposition to Origen, whom he had condemned before two councils (399 and 401). Epiphanius was a teacher and friend of Jerome. Suspecting Chrysostom of favoring the followers of Origen, he went to Constantinople to denounce the heretical bishop, and died on his way back to Constantia.

Of especial interest to Jews, owing to the information it contains on Jewish, Gnostic, and Judæo-Christian views, is his Πανάριον, an account, written in 374–376, of eighty heretical sects. According to Epiphanius, the pre-Christian sects are based upon the following systems: Barbarism, Scythism, Hellenism, Judaism, and Samaritanism. Heresies derived from Samaritanism are the following, the order being slightly changed in his letter to Acacius and Paulus: Samaritans (ix.), Gorothæans (x.), Sebuæans (xi.), Essenes (xii.), and Dositheans (xiii.). Those emanating from Judaism are: Scribes (xiv.), Pharisees (xv.), Sadducees (xvi.), Hemerobaptists (xvii.), Ossæans (xviii.), Nazarenes (xix.), and Herodians (xx.). To these must be added the Nazarenes again (xxix.), the Ebionites (xxx.), and the Judaizing Sampsæans (liii.). Though he follows older sources, such as Hippolytus I., and though he is often wanting in perspicuity, he adds a great deal from his own observation and study. In regard to the Ebionites he is the only source for their gospel (Zahn, "Geschichte des Neutestamentlichen Kanons," ii., part 1, p. 724). His treatise on Biblical weights and measures (Περὶ Μέτρων καὶ Σταθμῶν), published by Lagarde in Greek, with a partial translation into German ("Symmicta," i. 210, ii. 150), and in Syriac ("Veteris Testamenti ab Origene Recensiti Fragmenta," etc., pp. 1 *et seq.*), is more than what its name implies. It treats of the Greek translations of the Bible (see Swete, "Introduction," p. 31) as well as of localities and the stars and heavenly bodies mentioned in Scripture.

In these works, as also in his "Lives of the Prophets" (ed. in Greek and Latin, Basel, 1529; in Syriac, Nestle, "Syriac Grammar," p. 87; comp. *idem*, "Marginalien," ii. 1893) and in his short treatise on Aaron's breastplate (ed. Dindorf, i. 141, and in many Syriac MSS.), he shows a varied acquaintance with Jewish traditions (see, *e.g.*, Ginzberg, "Die Haggada bei den Kirchenvätern," pp. 24, 40, 104, 119). That he knew Hebrew seems probable from his occasional Hebrew quotations.

EPSTEIN or **EPPSTEIN**: The surname "Eppstein" is one of the oldest Jewish family names in the Slavic countries. **Nathan ha-Levi Eppstein** and **Solomon b. Jacob ha-Levi Eppstein** are mentioned in the responsa (No. 37) of R. Moses Minz about the middle of the fifteenth century. **Meïr b. Jacob ha-Levi Eppstein** was a printer in Prague in 1522. **Meïr Eppstein** was a leader of the community of that city in 1601; and **Samuel b. Judah ha-Levi Eppstein,** a pupil of Mordecai Joffe (Lebush), flourished there about 1615. In 1635 **Abraham b. Meïr ha-Levi Eppstein,** a descendant of the above R. Nathan, was rabbi of Brest-Litovsk (see "Keneset Yisrael" for 5648, "Liḳḳuṭim," 43). **Wolf b. Jacob ha-Levi Eppstein,** who came from Kremenetz, Volhynia, was rabbi of Friedberg, 1669–81 (see Brüll's "Jahrb." vii. 46). The cabalist Israel Jeffe of Sklov mentions among the friends of his youth a certain **Aryeh Löb Epstein,** which places him about the end of the seventeenth century (see "Ha-Shaḥar," vi. 229). **Michael b. Abraham ha-Levi Epstein** flourished in Moravia 1670–80; another **Michael ha-Levi Eppstein** in 1699; and a **Judah ha-Levi Eppstein** in 1690 (Mordecai Rothenberg, Responsa, No. 14). A **Joseph b. Wolf ha-Levi Epstein** of Konitz is mentioned in the preface to "Iggeret Musar" (1713).

About the beginning of the eighteenth century **Mordecai ha-Levi Epstein,** a great-grandson of R. Abraham of Brest-Litovsk, was one of the chiefs of the Jewish community in Grodno. One of his sons, **Ẓebi Hirsch Epstein,** who died in 1772, was also a prominent leader in that city. His other son, **Aryeh Löb Epstein,** author of "Ha-Pardes," was rabbi of Königsberg. One of the latter's descendants, in his biography of the rabbi of Königsberg, collected much material for the history of the family, and according to his data the accompanying family tree may be constructed (see page 196).

The number of families named "Epstein" is very large. There are more than two hundred Epsteins in the city directory of New York (Manhattan), with a proportionate number in all the large and smaller cities of the United States where Jews live. This makes the number of the members of the Epstein families in the New World alone much larger than the combined population of the two little cities named "Eppstein," one in Bavaria and one in Hessen-Nassau, whence they are supposed to have originated. It is certain that many families assumed the name "Epstein" at a later period, while in other families the name was changed to "Ebstein," "Eppenstein," or similar forms.

The number of individual Epsteins who have achieved prominence is also correspondingly large. Among the Epsteins who merit mention are: **Jehiel Michael Epstein,** author of "Darke ha-Ḥeshbon," Wilna, 1836; **Isaac Baer Eppstein,** author of "Yesode ha-Dat ha-Yisraelit," an adaptation of Philippson's "Kurzgefasster Katechismus," Königsberg, 1849. The more important of the Epsteins are treated in separate articles below.

J. P. Wi.

Abraham Epstein: Russo-Austrian rabbinical scholar; born in Staro Constantinov, Volhynia, Dec. 19, 1841. Epstein diligently studied the works of

Levinsohn, Krochmal, and S. D. Luzzatto, and when he traveled in western Europe for the first time in 1861, he made the acquaintance of Rapoport, Frankel, and Michael Sachs. After his father's death in 1874 (see Israel Epstein's biography in "Ha-Shaḥar," vi. 699–708) Epstein took charge of his extensive business interests, but gradually wound up all his affairs, and since 1884 has devoted most of his time to travel and study. He settled in Vienna in 1876 and became an Austrian subject. He is the possessor of a large library which contains many valuable manuscripts.

Genealogical Tree of the Epstein Family.

Epstein is the author of the "Ḳadmut ha-Tanḥuma," a review of Buber's edition of the Midrash Tanḥuma (Presburg, 1886), and of "Mi-Ḳadmoniyyot ha-Yehudim," which contains (1) treatises on Jewish chronology and archeology, and (2) a revised and annotated edition of Midrash Tadshe (Vienna, 1887). He also wrote: "Bereschit-Rabbati, Dessen Verhältnisse zu Rabba," etc. (Berlin, 1888); "R. Simeon Kara und der Jalkut Schimeoni" (Cracow, 1891); "Eldad ha-Dani," a critical edition, with variations from divers manuscripts, of the well-known work of Eldad, with an introduction and notes

(Vienna, 1891); "La Lettre d'Eldad sur les Dix Tribus" (Paris, 1892; reprinted from "R. E. J." xxv.); "R. Moshe ha-Darshan mi-Narbona" (Vienna, 1891); "Dibre Biḳḳoret li-Kebod Rabbi S. L. Rapoport," a defense of Rapoport against the attacks of I. H. Weiss (Vienna, 1896); "Jüdische Alterthümer in Worms und Speier" (Breslau, 1896; reprinted from "Monatsschrift," v. 40). He wrote in addition many critical, biographical, historical, and archeological articles for the Jewish periodical press, especially for "Monatsschrift," "Revue des Etudes Juives," and "Ha-Ḥoḳer," some of which have been reprinted in book form.

Bibliography: Autobiographical sketch in Sokolow's *Sefer Zikaron*, pp. 162–166, Warsaw, 1890; Zeitlin, *Bibl. Post-Mendels.* p. 79; Lippe, *Bibliographisches Lexicon*, iii. 98–99, Vienna, 1899.

H. R. P. Wi.

Alois Epstein: Austrian pediatrist; born at Kamenitz-an-der-Linde, Bohemia, Jan. 1, 1849. He was educated at the gymnasium at Neuhaus and the University of Prague, graduating as doctor of medicine in 1873. In the same year he established himself at Prague as a physician, and in 1880 became privat-docent in pediatrics. In 1881 he was appointed physician-in-chief at the foundling hospital, and in 1884 professor at the university.

Besides numerous essays in the medical journals, Epstein has written many monographs and books, among which may be mentioned: "Ueber Blutungen im Frühesten Kindesalter," Prague, 1876; "Ueber das Systolische Schädelgeräusch der Kinder," *ib.* 1878; "Ueber die Gelbsucht bei Neugeborenen Kindern," Leipsic, 1880; "Studien zur Frage der Findelanstalten," Prague, 1882; "Beitrag zu den Bildungsfehlern des Herzens," *ib.* 1886; "Ueber das Wesen und die Behandlung der Cholera Infantum," Berlin, 1890; "Ueber Pseudodiphtheritis Septhaemischen Ursprungs," *ib.* 1894; "Vulvite, Vulvovaginite et Autres Inflammations des Organes Génitaux Externes de Petites Filles," Paris, 1897; "Ueber Angina Chronica Leptothricia bei Kindern," Prague, 1900; "Ueber Verdauungsstoerungen im Säuglingsalter," Stuttgart, 1901.

Epstein is one of the editors of the "Jahrbuch für Kinderkrankheiten."

S. F. T. H.

Aryeh (Löb) Epstein b. Mordecai (Ba'al ha-Pardes): Polish rabbi; born in Grodno 1708; died in Königsberg, Prussia, June 26, 1775. At first he refused to become a rabbi, preferring to devote himself entirely to study; but in 1739 he was forced by poverty to accept the rabbinate of Brestovech, Lithuania, and in 1745 he became rabbi of Königsberg, where he remained until his death. He corresponded with Elijah, gaon of Wilna, and with Jonathan Eybeschütz, with whom he sided in the quarrel about amulets.

He is the author of "Or ha-Shanim," on the 613 commandments (Frankfort-on-the-Oder, 1754); "Halakah Aḥaronah" and "Ḳunṭres ha-Ra'yot" (*ib.* 1754; Königsberg, 1759); "Sefer ha-Pardes," in three parts—(1) on the Shema' and the observance of Sabbath, (2) sermons, (3) funeral orations (*ib.* 1759). Several other cabalistic and halakic works from his pen are mentioned in his own works or by his biographer. A prayer which he composed on the occasion of the dedication of a new synagogue in Königsberg (*ib.* 1756) is found in the Bodleian Library. Annotations by him and by his son Abraham Meïr are published in some of the later editions of the Babylonian Talmud. He is called "Levin Marcus" in Solowicz's "Gesch. der Juden in Königsberg," Posen, 1857.

Bibliography: Epstein, *Geburot Ari*, Warsaw, 1870; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 241; Friedenstein, *'Ir Gibborim*, pp. 44, 47, Wilna, 1880.

L. G. P. Wi.

Jacob Epstein: Polish banker and philanthropist; born in Zarki, Poland, 1771; died at Warmbrunn, Prussian Silesia, Aug. 16, 1843. In early manhood he went to Warsaw, where he succeeded in amassing a large fortune and became one of the most prominent figures in the old Polish capital. He was the first Jew in Warsaw to discard the old-style Jewish garb and to dress himself and his family in European fashion. In the rebellion of 1830–31 Epstein took the part of his oppressed countrymen, and was an officer in the insurrectionary army; but later he seems to have completely regained the favor of the Russian government, as is evidenced by his appointment as banker of the treasury commission of the kingdom of Poland in 1838.

Epstein was the founder and president of the Jewish hospital at Warsaw, on which he spent large sums and which he raised to a high standard of efficiency. Emperor Nicholas I., who visited the institution, conferred on Epstein the title of "hereditary honorary citizen." The high respect in which Epstein was held by the Christian population of Warsaw is best indicated by his election to membership in the commission of charities, which consisted mostly of Polish noblemen.

Bibliography: Fuenn, *Keneset Yisrael*, p. 561; *Allgemeine Zeitung des Judenthums*, 1838, No. 97; 1840, p. 340.

H. R. P. Wi.

Jehiel N. Epstein: Son of R. Abraham Segal Epstein; flourished about the middle of the seventeenth century. He was the author of the "Ḳiẓẓur Shene Luḥot ha-Berit" (1683), written after the style of the cabalistic "Shene Luḥot ha-Berit." A second edition, with numerous additions, and containing extracts from current ethical works, was published fifteen years later at Fürth. Nothing is known of the career of Epstein.

K. S. B.

Joseph Lazar Epstein: Russian educator and author; born 1821; died in Shavli April 19, 1885. For the last twenty-four years of his life he taught at the government school of Shavli. He was a contributor to the Hebrew periodicals, and was the first to write in Hebrew an account of Abraham Lincoln's life. This biography appeared in "Ha-Karmel," 1862, Nos. 34–36, under the title "Toledot Abraham" (Generations of Abraham). He also wrote a biography of Manasseh b. Israel (after Kayserling), which appeared in the same periodical (*ib.* 1863, Nos. 8–9). His Hebrew translation of M. A. Goldschmidt's life of I. M. Jost appeared in Kohn-Ẓedeḳ's "Oẓar Ḥokmah," 1865, v. 3. Epstein was also the author of a history of Russia, entitled "Dibre ha-Yamim le-Malke Russya," and paying special regard to their influence on the condition of the Jews (Wilna, 1872).

Epstein's novel, "Miryam ha - Ḥashmona'it," Wilna, 1863, is a translation from the German of L. Philippson. A second novel, "Yad la-Zahab," Warsaw, 1884, was the last of his works. Like most Russian "maskilim," Epstein lived and died poor, and left his family in straitened circumstances.

BIBLIOGRAPHY: Zeitlin, *Bibl. Post-Mendels*, pp. 78-79; *Ha-Ẓefirah*, 1885, No. 16.

H. R. P. WI.

Joshua Ḥayyim b. Mordecai ha-Levi Epstein: Russian rabbinical scholar and communal worker; born in Wilna 1820; died there Dec. 1, 1900. He was familiarly known as "Reb Joshua Ḥayyim the Sarsur" (money-broker), and was one of the most popular and respected members of his native city. He is the author of "Ḥiddushe RiYaḤ," novellæ on the Midrash Rabbot, and "Liḳḳuṭe RiYaḤ," collectanea on the Talmud, published at Wilna, 1890, and distributed gratuitously among poor scholars. The work closes with three short treatises by his son Mordecai, entitled "Ma'amar Mordekai."

BIBLIOGRAPHY: *Ahiasaf*, 5662, pp. 224-225, Warsaw, 1901; Steinschneider, *'Ir Wilna*, p. 249.

K. P. WI.

Julius Epstein: Austrian pianist; born at Agram, Croatia, Aug. 7, 1832; pupil at Agram of the choir-director Lichtenegger, in Vienna of Rufinatscha (composition) and Halm (pianoforte). He made his début in 1852, and soon became one of the most popular pianists and teachers in Vienna.

From 1867 to 1901 Epstein was professor of piano at the Vienna Conservatorium, where Ignaz Brüll, Marcella Sembrich, and Gustav Mahler were among his pupils. Epstein edited Beethoven's "Claviersonaten"; Mendelssohn's "Sämmtliche Clavierwerke"; Schubert's "Kritisch Durchgesehene Gesammtausgabe," etc.

His two daughters **Rudolfine** (cellist) and **Eugénie** (violinist) made a concert tour through Germany and Austria during the season of 1876–1877, which was very successful. His son **Richard** is professor of piano at the Vienna Conservatorium.

S. J. SO.

Sigismund Stefan Epstein (pseudonym, **Schimon Simel**): German author; nephew of Abraham Epstein; born at Warsaw, Russia, Nov. 12, 1866. He was educated at the gymnasia of Kiev and Vienna and at the University of Vienna, where he studied natural science. He went in 1895 to Berlin, where he studied physiology under Du Bois-Reymond at the Polytechnical Institute. He is at present living in Paris, France.

Epstein is the author of "Kabbala und Naturwissenschaft," 1891; "Paul Bourget als Lyriker," 1893; "H. von Helmholtz," 1895; "Emil du Bois-Reymond," 1896; "Maupassant und der Französische Roman der Gegenwart," 1899; "Der Kampf des Menschen Gegen die Natur." In 1899 Epstein collaborated in the publication of "Hundert Jahre in Wort und Bild; Eine Kulturgeschichte des XIX Jahrhunderts," Berlin, 1902.

S. F. T. H.

ER (ער, "the watchful"): **1.** First son of Judah by Shuah the Canaanite (Gen. xxxviii. 3; Num. xxvi. 19). He died soon after marrying Tamar, because he "was wicked in the sight of the Lord" (Gen. xxxviii. 7). What his sin was is explained in Bereshit R. lxxxv. 4.

2. Son of Shelah, the son of Judah (I Chron. iv. 21).

3. Son of Jose, one of the ancestors of Jesus (Luke iii. 28).

E. G. H. M. SEL.

ERA: A historical period or reckoning of years, dating from some important event or fixed point of time. A striking event of a lasting effect is generally taken as a starting-point for a new era. The Bible contains a few instances of this kind: the Flood (Gen. xi. 10); the Exodus (Ex. xvi. 1, xix. 1, xl. 17; Num. i. 1, ix. 1, x. 11, xxxiii. 38; Deut. i. 3; I Kings vi. 1); the earthquake in the days of Uzziah (Amos i. 1); the Babylonian Exile (Ezek. xl. 1). After the return of the Jews from the Babylonian Exile they arranged their dates according to the reigns of the Persian kings, just as before the Exile they dated events according to the reigns of the kings of Judah and of Israel.

According to Lev. xxv. 8, the Israelites were commanded to count seven Sabbatical cycles of seven years each and to observe the fiftieth year as the year of jubilee. The period of fifty years is called a "jubilee." There is no record in the Bible of the actual beginning of the jubilees nor of their actual ending. Tradition relates that the fifteenth year after the entering of the Israelites into the land of Canaan was the first year of the first jubilee period. Tradition likewise states that the observance of the jubilee year was discontinued after the conquest of Samaria by Shalmaneser (Maimonides, "Yad," Shemiṭṭah we-Yobel, x. 8). But no information is given in regard to whether the counting of the jubilee periods was continued after the fall of Samaria, and, if so, in what manner it was continued (*ib.* x. 3-4). As, however, the law concerning witnesses enjoins that they must answer the question, "In what jubilee period, in what Sabbatical cycle, and in what year of the cycle did the event in question happen?" (Sanh. v. 1), it may be assumed that the counting of jubilees and Sabbatical cycles continued in practise and was generally known (see Seder 'Olam xxx.). But neither in the Bible nor in Talmudical literature is any instance given of an event dated in this way. In Neubauer's catalogue of the Hebrew manuscripts in the Bodleian Library (No. 2493) the following date is given: "1797 Sel. 3d year of the Sabbatical cycle."

Era of Jubilees.

The Jews of post-Biblical times adopted the Greek era of the Seleucids. The Greek era ("ḥeshbon ha-yewanim"), or the era of contracts ("minyan sheṭarot"), dates from the battle of Gaza in the autumn of the year 312 B.C. This was used by the Jews as early as the Book of Maccabees (I Macc. i. 11), though the author of the first Book of Maccabees

The Seleucid Era.

deals with the year as beginning with Nisan, while in the second book the beginning of the year is placed in Tishri (see the elaborate discussion in Schürer, "Geschichte," i. 36–46; and the literature mentioned on p. 46). It has even been suggested that the Feast of Trumpets was not regarded as the "New-Year" until about 130 B.C. For a time, indeed, it seemed possible that the Jews would adopt an era of their own from the period of their deliverance under the Maccabees. Several coins of Simon are dated from "the year of the salvation of Israel."

There are two eras which may properly be called "Jewish": the era of the Destruction of the Temple and the era of the Creation ('Ab. Zarah 9a). These were employed by the tannaim, while the "era of the Greeks" was used by the "safre" (scribes or clerks) in drawing up contracts or other mercantile documents. The relation of the three eras to one another may be expressed by the following equation: 1 after Destruction of Temple = 3829 A.M. = 381 Sel. = 1 Sabb. cycle = 69 C.E.

The Era of the Creation.

The present usual method among Jews of recording the date of an event is to state the number of years that have elapsed since the creation of the world. It appears to have arisen from an attempt to establish a connection between the lunar cycle of eight years and the Metonic cycle of nineteen years by which this is brought into connection with the solar year, the arrangement being made that by calculations from a fixed point the date of the new moon could always be ascertained by reckoning the number of cycles which had elapsed since the era of the Creation, determined by the mnemonic "beharad" (בה״רד), which refers both the era and the beginning of the lunar cycle to the night between Sunday and Monday, Oct. 7, 3761 B.C. at 11 h. 11⅓ m. P.M. (ב referring to the second day, ה to the fifth hour after sunset, and רד to the 204 minims after the hour). Rühl has shown that the adoption of this era must have taken place between the year 222, when Julius Africanus reports that the Jews still retained the eight-year cycle, and 276, when Anatolius makes use of the Metonic cycle to determine Easter after the manner of the Jews. It may be further conjectured that it was introduced about the year 240–241, the first year of the fifth thousand, according to this calculation, and that the tradition which associated its determination with Mar Samuel (d. about 250) is justified. The era of the Creation occurs in the Talmud (Ab. Zarah 9b), but is used for dating for the first time in Sherira Gaon's Epistle (see Azariah dei Rossi, "Me'or 'Enayim," p. 96); but this does not occur in the best manuscripts which date after the Seleucid era. The era of the Creation occurs in Shabbethai Donnolo (*c.* 946), and in Tanna debe Eliyahu (974). Maimonides used the era of the Creation as well as the Seleucid era and that of the Destruction of the Temple ("Yad," Shemiṭṭah, x. 4). The abrogation of the Seleucid era is attributed to David ibn Abi Zimrah about 1511, but it still remains in use among the Yemenite Jews, most of the manuscripts of the Midrash ha-Gadol being dated after it.

Strict Jews have an objection to using the Christian year as seemingly recognizing the founder of the era, though occasionally it occurs even in Hebrew books, as in Abulafia's "Gan Na'ul" (comp. Jellinek, "B. H." iii. 40, note 7) and in the writings of Meyer Katzenellenbogen. Modern Jews frequently use the Christian date, but rarely add the "A.D." Jews in Mohammedan countries sometimes use the era of the Hegira.

ERACH: (from the Biblical "'erek," II Kings xxiii. 35): A tax on property for communal purposes. The direct taxes which were levied by the Jewish congregations were mostly twofold: (1) on every family ("rashe bayit"), and (2) on property, both real estate and chattels, according to the sworn statement of the property-owner. The latter tax was called "erach." This is the form used in the "Memorbuch" of Worms (see Maggid, "Zur Geschichte und Genealogie der Günzburge," p. 180, St. Petersburg, 1899). It is an expression frequently used in Württemberg (see "Orient," 1844, pp. 98, 146, end; "Allg. Zeit. des Jud." 1845, p. 522).

A. D.

ERECH: The second of the four Babylonian cities founded, according to Gen. x. 10, by Nimrod.

The site of the city is now known as "Warka," on the left bank of the Euphrates, about half-way between Hilla and Korna. The mounds and ruins cover an area six miles in circumference. Inadequately explored by Loftus ("Travels in Chaldea and Susiana," pp. 162 *et seq.*), they have furnished only incomplete material for its history. The earliest inscriptions found are by Dungi, Ur-Ba'u, and Gudea, kings of Ur, who held Erech as a part of their dominions. After these come texts of Singasid, Merodach-baladan I. Great numbers of coffins, especially of the Parthian period, show that the site had become a necropolis.

The foundation of Erech is ascribed in the non-Semitic version of the Creation-story to the god Marduk, and it is the center of life and action in the Gilgamesh epic. It had many poetical names.

Earliest Mention.

ERFURT: Chief town of the district of the same name in Prussian Saxony, situated on the Gera. If the dates on the tombstones found in Erfurt are genuine, there existed in that city an organized Jewish community in the ninth century. The earliest official document, however, concerning the Erfurt Jews dates from the second half of the twelfth century. Between 1160 and 1186 Bishop Conrad I. drew up a form of oath to be used by them. On June 26, 1221, the community suffered great persecution at the hands of Friesland pilgrims, about twenty-six Jews (according to some sources eighty-six) being massacred. A fast-day was instituted in commemoration of this calamity. Twenty-one names of the victims have been preserved in the "Memorbuch" of Mayence, and several others are given in an elegy written on the occasion by the liturgical poet Solomon ben Abraham.

Great as the catastrophe seems to have been, its effects were not lasting; and the community increased considerably in the first half of the thirteenth century. For nearly forty years the prior of St. Benedict, in whose parish many Jews resided, claimed from the Jewish owners of houses the same tithes as from Christians. When the Jews protested, the bishop decided (July 20, 1240) in favor of the prior; but the Jews, upheld doubtless by the municipal council, persisted in their refusal to pay, and the matter was finally submitted to arbitration.

Protection by the Archbishop.

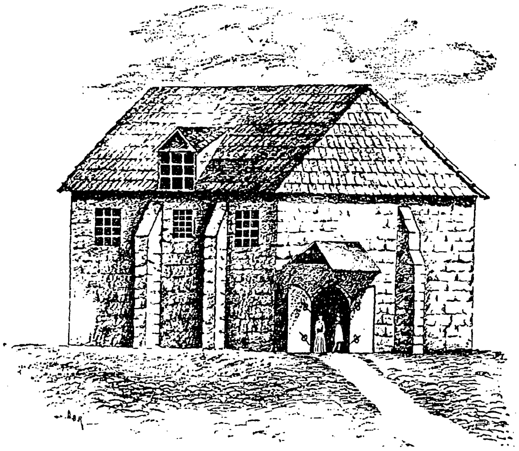
On Jan. 13, 1266, Archbishop Werner, in return for an annual payment of 100 silver marks and for a fee of 30 pfennigs for each interment, granted the Erfurt Jews a letter of protection, placing them under his own jurisdiction. From his notification of this arrangement to the city authorities it may be inferred that the Jews had suffered greatly at the hands of the municipality, which had been interdicted on this account. The archbishop's protection, however, did not shield the Jews from assault on their synagogues and cemetery; and the city was again put under interdict, the decree remaining in force until revoked in 1284 by Werner's successor, Heinrich of Basel, who, however, at the same time renewed the Jews' privileges. In 1291 Archbishop Gerhard II. pledged the Jews to the municipal council for 1,000 silver marks.

In spite of ill treatment and numerous vexations, the Jews, as attested by contemporary chroniclers, took an active part in the defense of the city against the repeated attacks of Count Friedrich in 1309. These services, however, were soon forgotten, and the chief of the council, Hugo Longus, together with the Dominicans and certain nobles who desired to be rid of their creditors, plotted the destruction of the Jews. The plague, which had raged intermittently in Erfurt since 1315, was attributed to the poisoning of wells by the Jews, and in Aug., 1348, their quarters were stormed, about 3,000 Jews perishing by fire and sword. The council benefited to the extent of 800 silver marks in addition to all movable property remaining, but the archbishop, whose interests were injured by the extinction of the Jewish community, claimed compensation. Nevertheless, he pardoned the city in the following year, and in 1350 he empowered the council to collect and to use the debts owed to the Jews by the counts of Bleichlingen.

After the Black Death.

Scarcely a year afterward a new Jewish community was formed at Erfurt, the settlers undertaking to pay the same amount of taxes as their predecessors. As the old synagogue had passed into private ownership, the council granted (1357) a certain sum for the erection of a new one. In 1373 it issued a series of ordinances concerning the Jews, who were required to wear throughout the year long gowns, boots, and hats. If capes were preferred for winter, these had to be worn over the gowns. Girdles and jewelry were prohibited. During the Christian fast-days Jews were forbidden to buy fish. The affairs of their community were to be administered by five parnasim and a rabbi.

In spite of these restrictions the Jewish population of Erfurt gradually increased. It became necessary to enlarge the old cemetery, situated near the Moritz Gate, and some adjacent ground was rented (1375) from the council for an annual payment of five shillings. In the same year an agreement concerning the taxes was entered into between the council and the Jewish community. Excepting a certain rich Jew, Elias, termed the "Judenmeister," who was specially taxed, the annual amount for the community was fixed at 850 pounds of pfennigs. Besides these regular taxes, the Jews had to contribute to the expenses of the defense of the city. Thus, in 1377 they paid for this purpose 100 pounds of pfennigs.



Erfurt Synagogue in 1357.
(After Jaraczewsky, "Geschichte der Juden in Erfurt.")

Heavy Taxation.

At the expiration of the agreement in 1380 the council compelled them to make a present to the city of 2,200 silver marks. In addition certain changes in the Jewish dress were prescribed with the view of still further humiliating its wearers. Jews were forbidden to employ Christian servants. No Jew, unless he became a citizen, for which privilege he had to pay a considerable sum, was allowed to settle in the city. To facilitate the control of the Jewish inhabitants, the parnasim were ordered to draw up a list and to deposit it with the council. In this list figured seventy-six families who were able to pay their dues to the city and twenty-six for whom their more fortunate brethren paid. In 1391 King Wenceslaus of Bohemia granted the city of Erfurt many privileges, and relieved the citizens from paying any debts to the Jews.

The history of the Jews of Erfurt from the end of the fourteenth century to 1458, in which year they were banished from the city, records a long series of sufferings of various kinds. On one side was the council, which became more and more exacting; on the other, the bishops and the German emperors,

Till the Expulsion.

to whom belonged by right one-third of the property of the Jews. Thus Sigismund in 1416 imposed upon the Jews of Erfurt the payment of 6,000 gulden, estimating this sum to be a third of the value of their possessions. In the following year he granted them a letter of protection for a period of ten years, at the expiration of which it was renewed for another term of six years; but, judging from their repeated complaints, the protection seems to have been very ineffective. In 1438 Sigismund pledged the Erfurt Jews to the knight Matthes Schlick, Burgrave of Eger, for the sum of 1,000 Rhenish gulden. In 1442 they were again compelled to pay 6,000 gulden as a coronation gift to Friedrich III. In 1454 John Capistrano visited Erfurt, and excited the mob to violence against the Jews. The latter complained to the emperor, who severely remonstrated with the council; but his remonstrances remained unheeded, and in 1450 the council succeeded in obtaining from Elector Dietrich of Mayence, in return for the payment of 450 silver marks and 4,000 gold gulden, permission to banish the Jews from the city.

In the Eighteenth Century.

Until the end of the eighteenth century Erfurt remained forbidden ground to the Jews; and the heavy poll-tax imposed by the council upon Jewish travelers gave rise to many protestations. Between 1768 and 1789 only four Jews received permission to settle at Erfurt. A little later several others took up their abode there, and although the council refused them rights of citizenship, they were allowed to live in the city unmolested. Citizens' rights were first conferred on an Erfurt Jew in 1810, the recipient being Solomon Mayer, father of the mathematician Ephraim Solomon Unger. In 1811 the Jews acquired some ground near the Brühlerthor for a cemetery. A synagogue was erected in 1840.

In the Middle Ages Erfurt was a seat of learning, and possessed an important rabbinical college. In 1399 many rabbis gathered there for a synod and settled various ritual questions. Among the most renowned rabbis and scholars of Erfurt were: Eleazar of Worms, whose wife and children fell victims to the persecutions of 1221; the Masorite Eleazar ben Kalonymus; Rabbi Wadarash (?) (d. 1285); Solomon ben Menahem ha-Levi; Simḥah ben Gershon; Alexander Süsskind (13th cent.); Isaac ha-Levi (14th cent.); R. Anshel Cohen and R. Hillel (15th cent.); and Jacob Weil. The community was administered by four parnasim, having at their head a chief called the "Judenmeister." Three names of such chiefs occur often in the official documents: Elias, referred to above; Heller; and Makir, whose son lived at Frankfort in 1398. Among the rabbis of the nineteenth century the most noteworthy were Adolph Jaraczewsky, Ezekiel (1879–82), J. Caro and Philip Kroner. Dr. Moritz Salzberger is the present incumbent. The Jewish community numbers now (1903) about 800 persons in a total population of 72,360. It has four charitable institutions; namely, the Ḥebra, the Frauenverein, the Armenkasse, and the Groschenverein.

About sixteen Hebrew manuscripts are preserved in the library of the Evangelisches Ministerium at Erfurt, some of them of great value. The Bible manuscripts, in large folio and most beautifully executed, have been used by J. H. Michaelis in his edition of 1720 and by Baer in his critical edition (see his "Liber Duodecim Prophetarum," p. vi., Leipsic, 1878). They have been described by D. J. J. Bellermann in "De Bibl. et Museis Erford," 1800–1803; by Lagarde in "Symmicta," i. 130 *et seq.*, Göttingen, 1877 (see "Hebr. Bibl." xix. 28); and in the "Katalog der Ministerial-Bibl. zu Erfurt," 1876. The Tosefta manuscript was used by Zuckermandel for his edition of that work. A manuscript of the Montefiore Library (No. 104) contains the "minhagim" of the Erfurt community (see "J. Q. R." xiv. 181).

G. I. Br.

ERGAS, JOSEPH BEN IMMANUEL: Italian rabbi and cabalist; born in Leghorn 1685; died May 19, 1730. He is frequently mentioned by Meldola in his responsa "Mayim Rabbim," by Morpurgo in his "Shemesh Ẓedaḳah," and in the "Milḥamah la-Adonai" (p. 48).

Ergas wrote: "Tokaḥat Megullah," a polemical work against Nehemiah Ḥayyun's "'Ozle-Elohim," accusing the author of Shabbethaian heresy, London, 1715; "Ha-Ẓad Naḥash," another polemic, against Ḥayyun's "Shalhebet Yah," *ib.* 1715; "Shomer Emunim," a dialogue between a philosopher and a cabalist, Amsterdam, 1736; "Mebo Petaḥim," an introduction to the "true Cabala" and a warning against "heretical Cabala," with some responsa at the end, Amsterdam, 1736; "Dibre Yosef," a collection of sixty-eight responsa, Leghorn, 1742; "Minḥat Yosef," containing ethical precepts and sayings of ancient authors, *ib.* 1827. Ergas' letters about the Cabala to his contemporaries Abraham Segré and Aryeh Löb Finzi were in the possession of Ghirondi.

K. M. Sel.

ERLANGER, CAMILLE: French composer; born at Paris May 25, 1863; studied at the Conservatoire and (1888) obtained the first Prix de Rome in the class of Léo Delibes. In 1888 he composed at Rome "St. Julien l'Hospitalier," which ranked him at once among the eminent composers of his day. Subsequently he was appointed choirmaster of the Jewish temple in the Rue des Cournelles. His principal works include: "Velleda," a lyric scene (produced at the Concerts Colonne, 1889), and "La Chasse Fantastique" (1893), a symphonic composition, which formed part of "St. Julien l'Hospitalier," a dramatic legend in three acts and seven tableaux, after Flaubert. Fragments of this work were played at the Conservatoire in 1894, and the entire composition was performed at the concerts of the Opéra in 1896. His other well-known productions are: "Kermaria," a lyric drama in three acts, in collaboration with Gheuzi, produced at the Opéra Comique, Paris, Jan., 1897; "Le Juif Polonais," a lyric drama based on the novel of Erckmann-Chatrian, also produced at the Opéra Comique, with Victor Maurel in the title-rôle; "Bar-Kokeba," a lyric drama in three acts and four tableaux, in collaboration with Catulle Mendès; "La Glu," a lyric drama based on the novel of Richepin.

ERLANGER, JULES: French composer; born at Weissenburg, Alsace, 1830; died at Brussels 1895; son of Israel Süsskind Erlanger, rabbi at Weissenburg, and brother of Michel Erlanger, of the Consistory of Paris; a graduate from the conservatory of music at Paris, and one of the founders of the Society of Authors and Dramatic Composers. From 1859 to 1861 he wrote several operettas for the Théâtre des Bouffes Parisiens—"L'Arbre de Robinson," "Les Dames de Cœur Volant," and "La Servante à Nicolas." He then, however, abandoned the musical profession and went into business, from that time composing sacred music only. Durlacher, in Paris, published in 1891 a "Recueil de Dix Morceaux Exécutés dans les Synagogues de France et de Belgique." Four collections of Erlanger's posthumous works were published in Brussels in 1903, one containing sacred music and three secular. He was one of the founders of the Alliance Israélite Universelle, and until his death president of the Alliance Committee for Belgium.

S. A. BL.

ERLANGER, MICHEL: French communal worker; born in Weissenburg, Alsace, 1828; died in Paris Sept. 27, 1892. Having received a thorough Jewish education from his father, he went to Paris in 1835. Sent by his employers to Alexandria, Egypt, to organize there a branch of their house, he became acquainted with the condition of the Jews in the East. He likewise acquired there a knowledge of the Italian and Arabic languages; in French, Hebrew, English, and German he was already proficient. He then visited Palestine, and began to take an active part in the colonization movement. As an active member of the Alliance Israélite Universelle, he assisted Charles Netter in establishing at Jaffa the agricultural school known as "Miḳweh Yisrael."

He succeeded Albert Cohn in the management of the Rothschild charities, served the Alliance Israélite Universelle, the Jewish Consistory, and the rabbinical seminary of Paris as vice-president, and became president of the Société des Etudes Juives. He was the prime mover in the founding of the Rothschild colonies in Palestine established on behalf of the Jews who were driven by the persecutions of 1882 and 1891 to leave Russia; he was assisted in his efforts by Isidore Loeb, and both were sent by the Alliance to Berlin to organize committees for the aid of Russian emigrants, which benevolent enterprise afterward received the support of Baron de Hirsch. Erlanger was strongly attracted by the life and associations of Palestine, and he was desirous of spending the last years of his life there; but his work in behalf of his coreligionists kept him in Europe to the end.

ERNESTI, JOHANN AUGUST: Protestant theologian; classical scholar; born Aug. 4, 1707, at Tennstädt, Thuringia; died 1781 at Leipsic, in the university of which city he was professor of classical literature, rhetoric, and theology. Ernesti did good service by insisting on the strict philological interpretation of the Bible. His Biblical work was mainly in the New Testament field. Though not a great Hebrew scholar, he wrote the following tracts on Jewish topics: "De Templo Herodis Magni ad Aggæi ii. 10 et Joseph. A. I. xv." Leipsic, 1752; "Programma de Vestigiis Linguæ Hebraicæ in Lingua Græca," *ib.* 1758; and "Exercitationum Flaviniarum Prima, de Fontibus Archæologiæ," *ib.* 1756, to which are added two corollaries: (1) "De Josephi Stilo"; (2) "De Odio Judæorum Veterum Adversus Literas Græcas," 1758. These were all republished in the second and third editions of his "Opuscula Philologica-Critica."

T. C. L.

ERRERA, ABRAO: Italian banker and deputy; born Dec. 8, 1791; died at Venice Dec. 25, 1860; father of Jacques Errera. His family traces its descent from Benjamin Errera, who went from Aleppo to Venice about 1700; according to a tradition the Erreras were the descendants of the Herreras who were expelled from Spain in 1492. He was a member of the Chamber of Commerce and one of the founders and presidents of the Stabilimento Mercantile, established at Venice in 1852. Errera was also for many years a member of the municipal council of Venice, and represented his city in the National Assembly (1848–49). During the siege of Venice Errera was one of the five members of the Committee of Public Safety, appointed to keep order in the stricken city. For thirty years he served as president of the Jewish community, and as a director of the Talmud Torah.

S. A. R.

ERRERA, GIORGIO: Italian chemist; born Oct. 26, 1860, at Venice; educated at the universities of Padua and Turin, from which latter place he was graduated doctor of chemistry in 1882. Errera was appointed lecturer to the philosophical faculty of his alma mater, and became assistant to the professor of chemistry. In 1892 he was appointed professor of chemistry in the University of Messina.

Errera is the author of many essays published in chemical journals, especially in the "Gazzetta Chimica Italiana," vol. xiv., and in the "Berichte der Deutschen Chemischen Gesellschaft," 1898. He wrote, besides, "Lezion di Polarimetria" (Turin, 1891).

S. F. T. H.

ERRERA, LEO-ABRAM: Belgian botanist; born at Laeken, Belgium, Sept. 4, 1858; educated at the Athénée Royal and the University of Brussels, and at the universities of Strasburg, Bonn, and Würzburg; privat-docent of botany (1883), assistant professor (1885), and professor (1890) at the University of Brussels; now (1903) also director of the Botanical Institute of Brussels. He was elected in 1887 a corresponding member of the Académie Royale des Sciences de Belgique, and full member in 1898. He is the author of "Les Juifs Russes: Extermination ou Emancipation?" to which Mommsen contributed a prefatory letter, Brussels, 1893; 2d ed., 1903 (Eng. transl. "The Russian Jews," London, 1894). In 1897 Errera published, with Emile Laurent, "Planches de Physiologie Végétale." A series of university lectures given by him at Brussels were published (1897) under the title "Existe-t-il une Force Vitale?" (2d ed. 1898, 3d ed. 1899, 6th ed. 1902). His father, **Jacques Errera,** who was born at Venice July 20, 1834, and died at Vivier d'Oye, near Brussels, Dec. 12, 1880, was a banker, and Italian consul-general in Brussels.

ERRERA, PAUL JOSEPH: Belgian barrister; born at Laeken, Belgium, July 23, 1860; educated at the University of Brussels; professor in the law department of the Ecole des Sciences Politiques et Sociales and of the University of Brussels; member of the Académie Royale d'Archéologie de Belgique; counsel of the Etat Indépendant du Congo and counsel of the Jewish Colonization Association; president of the local committee of the Alliance Israélite Universelle. He wrote: "Les Masuirs," 2 vols., Brussels, 1891; "Les Waréchaix," *ib.* 1894; "Esquisse du Cours de Droit Constitutionnel Comparé," *ib.* 1896 and 1899. Errera has contributed many essays to the law journals of Belgium and other countries.

S.

ERTER, ISAAC: Satirist; born 1792 at Janischok, Galicia; died 1851 at Brody. The first part of his life was full of struggles and hardships. After having associated for many years with the Ḥasidim, he settled at Lemberg; and through the efforts of some of his friends, such as Rapoport, Krochmal, and others, he obtained pupils whom he instructed in Hebrew subjects. This comparatively happy state lasted for only three years (1813–16). Jacob Orenstein, chief rabbi of Lemberg, having been apprised of the existence among his flock of a small band occupied with the study of secular subjects, excommunicated them all. Deprived thus of his pupils, the only means of his subsistence, he settled in the neighboring town of Brody. There he struggled for a while, until he resolved to study medicine.

Erter entered (1825) the University of Budapest, where he studied medicine for five years and passed all the prescribed examinations; he then practised his new profession in various Galician towns, including Brody, where he made himself especially popular among the poor and needy, who found in him a kindly benefactor.

He composed a number of Hebrew satires, which have procured for him a prominent place among modern Hebrew satirists. For a time he edited a Hebrew periodical entitled "He-Ḥaluẓ," which was intended chiefly to promote culture and enlightenment among the Galician Jews. The periodical also advocated the establishment in Galicia of agricultural colonies for the employment and benefit of young Jews, and received some support from Vienna.

Erter's fame rests chiefly on his satires, published under the title "Ha-Ẓofeh le-Bet Yisrael" (Vienna, 1858; *ib.* 1864), with a biography of the author and introduction by Max Letteris. They are six in number, and are admirable in form and style. Their titles are: "Mozne Mishḳal"; "Ha-Ẓofeh be-Shubo mi-Karlsbad"; "Gilgul ha-Nefesh"; "Tashlik"; "Telunat Sani we-Sanšani we-Samangaluf"; "Ḥasidut we-Ḥokmah." The most attractive of these is "Gilgul ha-Nefesh," the story of the many adventures of a soul during a long earthly career; how it frequently passed from one body into another, and how it had once left the body of an ass for that of a physician. The soul gives the author the following six rules, by observing which he might succeed in his profession:

> "(1) Powder your hair white, and keep on the table of your study a human skull and some animal skeletons. Those coming to you for medical advice will then think your hair has turned white through constant study and overwork in your profession. (2) Fill your library with large books, richly bound in red and gold. Though you never even open them people will be impressed with your wisdom. (3) Sell or pawn everything, if that is necessary, to have a carriage of your own. (4) When called to a patient pay less attention to him than to those about him. On leaving the sick-room, assume a grave face, and pronounce the case a most critical one. Should the patient die, you will be understood to have hinted at his death; if, on the other hand, he recovers, his relations and friends will naturally attribute his recovery to your skill. (5) Have as little as possible to do with the poor; as they will only send for you in hopeless and desperate cases you will gain neither honor nor reward by attending them. Let them wait outside your house, that passers may be amazed at the crowd waiting patiently to obtain your services. (6) Consider every medical practitioner as your natural enemy, and speak of him always with the utmost disparagement. If he be young, you must say he has not had sufficient experience; if he be old, you must declare that his eyesight is bad, or that he is more or less crazy, and not to be trusted in important cases. When you take part in a consultation with other physicians, you would act wisely by protesting loudly against the previous treatment of the case by your colleagues. Whatever the issue may be, you will always be on the safe side."

Erter wrote also some Hebrew verse; but this bears no comparison with his prose, which Grätz says resembles in many points that of Heinrich Heine.

T. J. Ch.

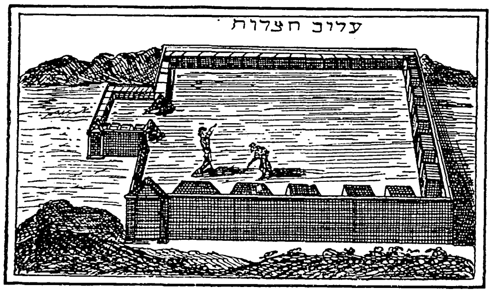
'ERUB: Mixture or amalgamation; ideal combination of things separate. There are several kinds of 'erub.

'Erub (par excellence): The law concerning the transportation of objects from one place to another on the Sabbath distinguishes several sorts of places ("reshuyot"), of which the following three may be mentioned: (1) a place or places belonging to an individual ("reshut ha-yaḥid"), such as houses and enclosed spaces, being the property of one person: (2) open spaces belonging to the public, such as highroads and thoroughfares ("reshut ha-rabbim"); (3) places such as the sides and corners of streets, and fields not enclosed, which can not be considered either as public or as private property, but have some peculiarities of both ("karmelit").

Private and Public Spaces.

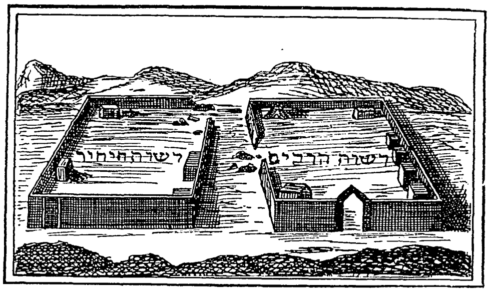
According to the traditional interpretation of Ex. xvi. 29, it is forbidden to remove on the Sabbath things from an enclosed space which is private property to an open space which is public property. Likewise it is prohibited to transport objects a distance of more than four cubits within an open space. The only space in which it is allowed to remove things freely is an enclosed space which is the property of an individual. But to modify the inconvenient consequences of the Law the 'erub was introduced, which, so to speak, converted an open space into an enclosed one. If a space is not completely enclosed, the completion of the enclosure is, under certain circumstances, effected by a single rod or wire placed across the open parts, or by a pole placed at one of the sides of the open part. Such completion may be noticed in some ancient towns and villages in which there is a Jewish congregation, at the ends of streets leading out of the place; and it is known by the name of "'erub."

'Erube ḥazerot ("combination among the inhabitants of courts"): The courts, being as a rule surrounded by houses or other buildings, thus satisfy one condition of reshut ha-yaḥid, inasmuch as they are an enclosed space; but as they are not the property of one individual, they partake of the nature of public property, and thus the removal of things within them on the Sabbath would be forbidden. In order to satisfy the second condition, namely, of being one person's property, the inhabitants combine and form a union, each member contributing something toward a meal and placing it in a room accessible to all of them. They thus form one family, and the court is reshut ha-yaḥid. The contributions are called "'erube ḥazerot." In the same way a street with all its courts may be turned into reshut ha-yaḥid, and the term "'erube ḥazerot" is then changed into "shittufe mebo'ot" (combination of the courts and houses in a street).



"'Erub Ḥazerot."
(After Bodenschatz, "Kirchliche Verfassung," 1748.)

'Erube teḥumin ("combination of parts of two Sabbath-day journeys"): Two thousand cubits constitute a Sabbath-day's journey; that is to say, a man, taking his dwelling-place as a center, may move on the Sabbath forward and backward as often as he wishes within a circle the radius of which is 2,000 cubits. The greatest length he may move in one line is the length of the diameter, or 4,000 cubits. If, however, a person intends to go on the Sabbath to a place lying beyond the radius, but within 4,000 cubits of his starting-point, he has to transfer his abode for the day of the Sabbath from the original center to a point in the circumference which becomes the new center, and he may walk from this point in any direction one Sabbath-day's journey. This transfer is only permissible for the purpose of performing a "miẓwah" (*e.g.*, circumcision). The transfer must be marked by placing on Friday some food in the new center for Sabbath, and the name "'erube teḥumin" is especially applied to this food. The "teḥum" of the original center is thus combined with that of the new one.



"Reshut ha-Yaḥid" and "Reshut ha-Rabbim."
(After Bodenschatz, "Kirchliche Verfassung," 1748.)

S. S. M. F.

'ERUBIN ("mingling"): The second treatise of the Mishnah Seder Mo'ed, forming an appendix to the treatise Shabbat. It contains regulations concerning three kinds of "'erub": (1) the 'erub par excellence, called also, as in the first paragraph of this treatise, "mabui" (lit. "street"), elliptically for "'erub mabui" (ch. i.-ii.); (2) "'erube teḥumin" (ch. iii.-v.); and (3) "'erube ḥazerot" (ch. vi.-vii. 5). These three sections are followed by miscellaneous laws concerning carrying things a distance of four cubits or more within the public domain, or from the public domain into the private domain (see Domain, Public), and vice versa (ch. viii. 6 to end of treatise). Extraneous matters are occasionally introduced; *e.g.*, from four things soldiers in a camp are exempt: (1) they may freely take wood for their use without becoming guilty of robbery; (2) they need not wash their hands before meals; (3) they may partake of demai; and (4) they need not prepare 'erube ḥazerot. The rules of 'erube teḥumin lead to the question whether the two days of New-Year should be treated as equally sacred, or as including one sacred and one non-sacred day. Rabbi Dosa b. Harkinas gives expression to the latter view by suggesting two different forms of prayer for the two days.

The following principles are met with in the Mishnah: (1) Whatever is done on behalf of another without his consent has legal force only if the action is of advantage to him; if not of advantage to him, it has no legal force (vi. 11). (2) That which is prohibited by the sages as a precaution against breaking any of the laws of the Sabbath and festivals is permitted in the sanctuary, because the sanctity of the place sufficiently secures strict obedience to the Law (x. 11–15).

Tosefta. The Tosefta follows, on the whole, the order of the Mishnah, but it has a different arrangement of the detailed rules. It is divided into eleven unequal chapters, viz., i., on 'erub; ii.—iii. 9, on various methods of enclosing a space in order to make it private domain; iii. 10–vii. 4, on 'erube teḥumin; vi., on measuring the "teḥum" or Sabbath-day's journey; vii. 5–ix. 17, on both 'erube teḥumin and 'erube ḥazerot; ix. 18—end, miscellaneous rules about carrying things around on Sabbath. The Tosefta introduces little extraneous matter. It concludes with the following remark on the quantitative relation between the Biblical text of certain precepts and the corresponding halakot of the Mishnah: "The halakot of Sabbath, festival sacrifice ["ḥagigah"], and trespass ["me'ilah"] are numerous; the Biblical text, short. They are like mountains suspended from a hair, having nothing to rest upon. . . . But the dinim and the halakot concerning divine service, cleanness and uncleanness, and marriage are numerous, and have a good support in the text of the Torah" (comp. Ḥag. i. 8 and Yer. 'Er. end).

The Gemara, both Babylonian and Palestinian, discusses the laws of the Mishnah, adding here and there detailed rules, or explaining their source. In one place the Gemara offers an instance of verbal criticism, where the two readings of the Mishnah are discussed, the one being "me'abberin" and the other "me'abberin."

The treatise contains numerous midrashic explanations of Biblical passages. The following refer to the study of the Torah:

Gemara. 'Er. 55a: "It [the Torah] is not in heaven" (Deut. xxx. 12); *i.e.*, knowledge of the Torah is not acquired by proud people. 54a: "For they [the words of the Torah] shall be a graceful companion to thee; hence, turn thy mind to the Torah when thou art alone on the way." 54b: "Set thee up signs" (Jer. xxi. 21); *i.e.*, make use of mnemonics and similar means of assisting thy memory in the study of the Torah. *Ib.*: "Wealth gathered in bundles shall be diminished" (Prov. xiii. 11); *i.e.*, the wealth of the Torah, if gathered in portions too large for proper digestion, is soon lost. Whereto Raba remarks, "The scholars know this rule very well, but neglect it in practise." 21b: "New and old I have treasured up" (Cant. vii. 14 [A. V. 13]); *i.e.*, words of the written as well as of the oral law I have treasured up. 22a: "Black as a raven" (*ib.* v. 11); *i.e.*, he who suffers privations for the purpose of studying the Law is sure to succeed in his study. In 53 *et seq.* advice is given to the student to be meek, to be ready to teach those who desire to learn, and to recite the lesson aloud and accurately. 65a: As to the advantage of studying at night, opinions differ. Rab Judah considers the night as intended for rest and sleep, while according to Resh Lakish it is the right time for study. 53a: "Study under one teacher, and do not wander from teacher to teacher."

Of proverbs and general rules of conduct the following may be cited:

"When the wine's in, the secret's out" (65a); "three things betray a man: his purse, his cup, and his temper" ("kiso, koso, ka'aso"; 65b). "He who lowers himself is raised by God" (13a). "Wo unto me if I displease my Maker ("Yoẓer"); wo unto me if I displease my inclination" ("yeẓer": 18a). "Part of man's praises may be said in his presence; the whole in his absence" (*ib.*). "A rule, apart from enumerated exceptions, does not necessarily apply to all cases contained in the general term" (27a). "It may be assumed for certain ["ḥazaḳah"] that a messenger carries out his mission" (31b). "It may be assumed for certain that a 'ḥaber' does not part with a thing not fully prepared for use" (32a).

In recommending meekness the Gemara points to the Hillelites as examples. For three years they were discussing certain problems with the Shammaites; in the end they prevailed because they were modest, and kindly disposed toward others, having due regard for the opinion of their opponents. An incident in the life of R. Akiba is related as an example of firmness in obedience to religious precepts. Akiba, when in prison, was attended by R. Joshua, who was daily supplied with a certain quantity of water for Akiba. One day the governor of the prison reduced the quantity by one-half. Akiba was then informed that there was not sufficient water to wash his hands before taking his meal. The rabbi insisted on having the water for washing his hands even at the risk of dying of thirst.

A few mathematical rules of an extremely elementary and imperfect character are given in the description of the Sabbath-day's journey: the relation of the diameter to the circumference = 1:3; the diagonal of the square to a side of it = 7:5; the square to the inscribed circle = 2:1, and to the circumscribed circle = 3:4 (76b).

ERUSIN. See Betrothal.

ERWIG. See Visigoths.

ESAR-HADDON (Hebrew, "Esar ḥaddon"; Assyrian, "Ashur aḥ-iddin" = "Ashur has given a brother"): King of Assyria from 680 to 668 B.C.; son and successor of Sennacherib and predecessor of Assurbanipal. He was one of the most energetic monarchs of the Assyrian empire. After ascending the throne vacated by the assassination of his father (II Kings xix. 37; Isa. xxxvii. 38), his first concern was to quell the rebellion in Nineveh, which, according to the Babylonian chronicles, he accomplished in a month and a half—from the twentieth day of Ṭebet to the second day of Adar. According to the Biblical story, the assassins fled to Armenia; the inscriptions represent Esar-haddon as leaving Nineveh in the month of Shebaṭ, probably in pursuit of his brothers (Winckler, in Schrader's "K. B." ii. 140–143). He met the rebels at Khanigalbat, near Nelid, and easily defeated them, his campaign lasting eight months, so that in the month of Kislew, 680, Esar-haddon was crowned King of Assyria. Abandoning the policy of his predecessor, Esar-haddon rebuilt Babylon, for he affected great regard for the old Babylonian deities. He also extended his empire toward the southwest to an extent never before attained, in consequence of various military expeditions primarily planned to maintain a hold upon Palestine and the Phenician seacoast. Sidon was destroyed, and in its place on the mainland the king ordered a new town to be built, with the name "Ḳar-Ashshur-aḥ-iddin" (Esar-haddon's town). In 676 his army invaded Egypt, but was repulsed with heavy losses.

After securing a better foothold in Arabia, Esar-haddon (671) led a second expedition into Egypt; his report shows a striking similarity to the description of the country in Isa. xxx. 6. Tyre was besieged; another army occupied Arabia and the territory of the tribe of Simeon, while a third marched into Egypt. Manasseh, the King of Judah, is named among the vassals that had sent auxiliary troops. In the month of Tammuz Memphis was taken, after Tirhaka, the Ethiopian King of Egypt, had thrice been defeated in open battle. This led to the withdrawal of the Ethiopian ruler from the country to beyond Thebes. In 669 the Assyrian nobility, apprehending that Esar-haddon intended neglecting Assyria in favor of Babylon, rebelled; in consequence of which Assurbanipal was appointed coregent for Assyria, while another son, Samash-shumukin, was crowned King of Babylon. In the meantime Tirhaka had returned to Lower Egypt and garrisoned Memphis (669). Esar-haddon set out to look after his dominions in Egypt, but died on the march in the month of Ḥeshwan (668), the army continuing its forward movement and defeating Tirhaka at Karbanit.

In the Bible Esar-haddon is mentioned as the ruler who sent eastern, and especially Babylonian, settlers to Samaria (Ezra iv. 2); he thus continued the policy of Sargon, the "destroyer of Samaria," and conformed to his own general practise as detailed in his inscriptions (see Schrader, "K. A. T." 2d ed., pp. 373 *et seq.*). Manasseh remained loyal to him throughout his reign, even when undoubtedly many voices must have pleaded the timeliness of a policy of resistance to Assyria (see Winckler in Schrader's "K. A. T." 3d ed., p. 275).

E. G. H.

ESAU.—Biblical Data: Jacob's elder brother (Gen. xxv. 25–34, and elsewhere; comp. Josh. xxiv. 4). The name alternates with "Edom," though only rarely applied to the inhabitants of the Edomitic region (Jer. xlix. 8–10; Obad. 6; Mal. i. 2 *et seq.*). The "sons of Esau" are mentioned as living in Seir (Deut. ii. 4, 5). The "mountain of Esau" (Obad. 8, 9, 19, 21) and the "house of Esau" (Obad. 18) are favorite expressions of Obadiah, while by others as a rule "Edom" is employed to denote the country or the people. In Genesis (xxv. 25, 30) "Edom" (red) is introduced to explain the etymology of the name. The real meaning of "Esau" is unknown, the usual explanation "densely haired" (= "wooded") being very improbable. "Usöos," in Philo of Byblos (Eusebius, "Præparatio Evangelica," i. 10, 7), has been identified with it, while Cheyne (Stade's "Zeitschrift," xvii. 189) associates it with "Usu" (Palai-Tyros).

F. Bu.

Even before birth Esau and Jacob strove one against the other (Gen. xxv. 22), which led to the prediction that the "elder shall serve the younger" (*ib.* 23). The first, coming forth "red, all over like an hairy garment," was called "Esau." He grew up to be a "cunning hunter, a man of the field" (*ib.* 27). One day coming home from the field, Esau, hungry unto death, sells his birthright to Jacob for a mess of porridge, which event is turned to account to explain his name (*ib.* 30 *et seq.*). When forty years old Esau married Judith and Bashemath, the daughters of the Hittites Beeri and Elon (Gen. xxvi. 34, 35). The favorite of Isaac, he is called to receive the father's last blessing, but Rebekah treacherously substitutes Jacob for him (Gen. xxvii. 1–24). Discovering the fraud, Esau by much weeping induces the father to bless him also (Gen. xxvii. 38–40). Hating his brother Jacob, he vows to slay him as soon as the father shall have passed away. At his mother's advice Jacob takes refuge with Laban, his departure being explained to the father as an endeavor to prevent a repetition of marital alliance with the daughters of Heth, so great a source of grief in Esau's case (Gen. xxvii. 41–46). Esau thereupon takes a daughter of Ishmael to wife (Gen. xxviii. 9). After the return of Jacob the brothers make peace, but separate again, Esau passing on to Seir (Gen. xxxiii. 1–16, xxxvi. 6–8). No mention is made of his death.

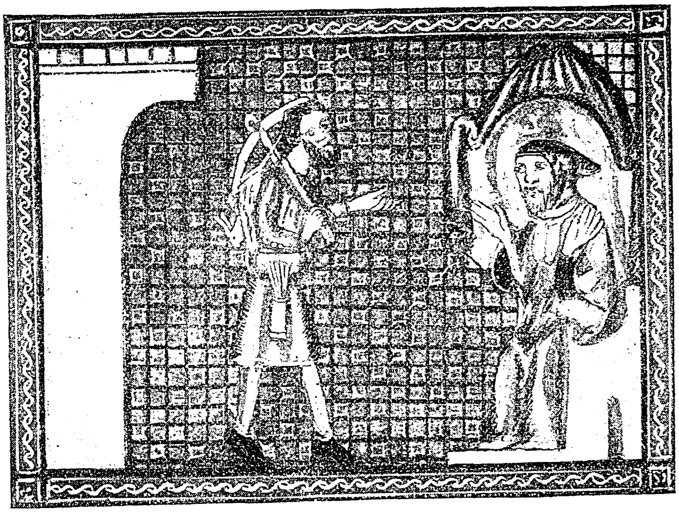
E. G. H.

——In Rabbinical Literature: Even while in his mother's womb Esau manifested his evil disposition, maltreating and injuring his twin brother (Gen. R. lxiii.). During the early years of their boyhood he and Jacob looked so much alike that they could not be distinguished. It was not till they were thirteen years of age that their radically different temperaments began to appear (Tan., Toledot, 2). Jacob was a student in the bet ha-midrash of Eber (Targ. Pseudo-Jonathan to Gen. xxv. 27), while Esau was a ne'er-do-well (*ib.*; "a true progeny of the serpent," Zohar), who insulted women and committed murder, and whose shameful conduct brought on the death of his grandfather, Abraham (Pesiḳ. R. 12). On the very day that Abraham died Esau went forth to hunt in the field, when he fell in with Nimrod, who for a long time previously had been jealous of him. Esau, lying in wait, pounced on the king, who was unaware of his proximity, and, drawing his sword, cut off the king's head. The same fate befell two attendants of Nimrod, who had, however, by their cries for help, brought the royal suite to the spot. Esau took to his heels, but carried off the garments of Nimrod—which were those of Adam (Targ. Pseudo-Jon. to Gen. xxvii. 15)—and concealed them in his father's house. It was when exhausted from running that he chanced upon Jacob, who cunningly took up a casual remark of his about the uselessness of the birthright, and trapped him into selling the latter as well as his share in the field of Machpelah, making and keeping a properly witnessed and sealed record of the transaction ("Sefer ha-Yashar," vi.).

His Vicious Character.

According to Targ. Pseudo-Jon. to Gen. xxv. 29 and Pirḳe R. El. xxxv., the sale of the birthright took place while Jacob was preparing for his father the dish of lentils which was the usual meal offered to mourners, and over which words of comfort used to be said (comp. N. Brüll in Kobak's "Jeschurun,"

viii. 30; B. B. 16b). Esau requested to eat thereof, and then sold his birthright; indulging in blasphemous speeches (Gen. R. lxiii.; Pes. 22b) and in denials of immortality (Targ. Pseudo-Jon. *l.c.*) and of God and the resurrection; so that he figures in tradition as one of the three great atheists (Tan., Toledot, 24; Sanh. 101b). Jacob's conduct toward his brother is accounted for by the fact that Esau had always refused to share his sumptuous repasts with him (Pirḳe R. El. *l.c.*).



Esau Seeking Isaac's Blessing.

(From the Sarajevo Haggadah, fourteenth century.)

Esau had won the affection of his father by lying words (Targ. Pseudo-Jon. to Gen. xxv. 28). Hypocrite that he was, he played the good son; never ministering to his father unless tricked out in Nimrod's garments, and asking questions concerning the duty of tithing straw (Pesiḳ. 199). Crafty at home, he was equally so abroad (Gen. R. lxiii.). Outrageous vices are charged against him (Gen. R. xxxvii., lxiii.). Rebekah, reading his character aright, and knowing by mysterious foresight what degraded peoples were to descend from him (Midr. Teh. to Ps. ix. 16), resorted to justifiable strategy in order to circumvent his receiving the blessing. The detection of the true character of Esau reconciled Isaac to the fact that he had bestowed the blessing on Jacob (Gen. R. lxvii.). It was on the eve of Pesaḥ that Isaac asked his son to prepare for him a meal of his favorite venison (Pirḳe R. El. xxxii.; Targ. Pseudo-Jon. to Gen. xxvii. 1). Esau was not successful in the chase that day; he had left behind him his Nimrod cloak, wearing which a man could at will capture wild animals (Targ. Yer. to Gen. xxvii. 31). Further, whenever Esau had taken an animal, God Himself had intervened, and an angel had surreptitiously unbound it (Gen. R. lxvii.), so as to give Rebekah time to carry out her scheme. As Esau threatened to avenge the deception, Jacob had to take refuge with Eber, the son of Shem, with whom he stayed fourteen years. Esau's fury increased to such an extent at Jacob's escape that he left Hebron and went to Seir, where he took several wives, one of them being Bashemath, whom he called "Adah." After six months he returned to Hebron, bringing his godless wives with him. Eliphaz was born unto him during this time ("Sefer ha-Yashar," *l.c.*). Grief at the idolatrous practises of Esau's wives caused Isaac's blindness, according to Tan., Toledot, while others hold the expression מראות ("from seeing"; Gen. xxvii. 1, Hebr.) to imply that Isaac had lost his sight previously from the effort not to see Esau's evil deeds (Pesiḳ. R. 12; Meg. 28a; Gen. R. lxv.). Esau was aware of the obnoxious character of his wives. He would not trust his garments to their care (Gen. R. *l.c.*); hence Rebekah was able to put them on Jacob. Esau spent most of his days visiting the shrines of idols, which vexed his father still more than his mother, who had not been reared in Abraham's family (Gen. R. lxiii.), and was thus not quite so much shocked at idol-worship.

Is the Cause of Isaac's Blindness.

At the end of fourteen years Jacob returns to Hebron. This inflames Esau once more, and he tries to kill him, causing Rebekah to send Jacob to Laban. Esau thereupon commissions his son Eliphaz to lie in wait for Jacob on the road and to kill him. He and ten men of his mother's clan meet Jacob, who, by giving them all he has, bribes them to spare his life. Esau is much vexed at the action of his son, but appropriates to himself all the gold and silver purloined from Jacob ("Sefer ha-Yashar," *l.c.*). In Gen. R. lxviii. Esau himself is said to have attacked Jacob, dispersing his escort. Having heard the parental injunction to his brother not to marry one of the daughters of Canaan, Esau, to reestablish himself in his parents' graces, now takes to wife Mahalath ("Sefer ha-Yashar," *l.c.*; comp. Gen. R. lxviii., a play on the name, to indicate that she eased Esau's conscience).

Increasing in wealth, Esau and his children have feuds with the inhabitants of Canaan. This induces him to locate at Seir ("Sefer ha-Yashar," *l.c.*). Laban, vexed at Jacob's departure, treacherously incites Esau to attack his brother on his way home. But Rebekah, apprised of Esau's intention, warns Jacob of the danger, and sends seventy-two of his father's servants to Mahanaim to his aid, with the advice that he should enter into peaceful relations with Esau. Messengers are despatched to Esau, who repulses them, vowing vengeance. Jacob beseeches God for help. Four angels are sent by God to appear each in turn before Esau "like 2,000 men, in four bands under four captains, riding on horses and armed with all sorts of weapons." Esau and his men flee and plead for mercy. He resolves to go and meet Jacob, who at his brother's approach is greatly troubled, but, noticing the greater alarm of the others, receives Esau with brotherly affection

His Murderous Intentions Toward Jacob.

("Sefer ha-Yashar," *l.c.*). The kiss they exchange and the tears they shed at this meeting have been differently construed. The word וישקהו (Gen. xxxiii. 4), being dotted in the Masoretic text, indicates, according to some, that Esau really repented; while others maintain that even in this scene he acted the hypocrite (comp. Judas' kiss; Sifre, Num. ix. 10; Gen. R. lxxviii.; Ab. R. N. 34; Ex. R. v.). The latter view obtains in Targ. Pseudo-Jonathan to the verse: Jacob wept on account of the pain in his neck, which had been bitten by Esau; and Esau shed tears because his teeth hurt him, Jacob's neck having been turned into smooth stone or ivory (see Rashi *ad loc.*; Gen. R. lxxi.). Jacob was aware of the hypocrisy of Esau (Pirḳe R. El. xxxvii.), as appears from the latter's explanation offered to God when reproved for having profaned holy things by his gifts and address to Jacob. Esau had planned to kill his brother "not with arrows and bow but by [my] mouth" (Pirḳe R. El. *l.c.*) "and sucking his blood"; but the fact that Jacob's neck turned into ivory thwarted his intention.

Esau had, as stated above, previously plotted against Jacob's life. Remembering the failure of his son Eliphaz on that occasion, Esau resolves to lie in wait for Jacob at a spot on the road where he can not escape. Jacob, however, having a presentiment of evil, does not take that road, but turns toward the Jordan, praying to God, who works a miracle in his behalf, and gives him a staff whereby he smites and divides the river. Seeing this, Esau pursues and gets in front of him, when God causes Jacob to enter a place ("ba'arah") that has the appearance of a bath-house (like that at Tiberias). Esau stands guard over the door so that Jacob can not leave, but will have to perish inside. Jacob takes a bath, and God saves him (see Epstein, "Mi-Ḳadmoniyyot ha-Yehudim," pp. 107, 108, Vienna, 1887). Nevertheless, Jacob and Esau meet peaceably at their father's house (Pirḳe R. El. xxxviii.), and both sons at the death of Isaac vie in showing filial piety (*ib.*). At the division of Isaac's property Esau claims as the first-born the right to choose. On the advice of Ishmael he appropriates all the personal property, but agrees to Jacob's taking title to the land of Israel and the cave of Machpelah. A written instrument of this cession is made, whereupon Jacob orders Esau to leave the country. Esau withdraws (Gen. xxxvi.), and is compensated by one hundred districts in Seir (Pirḳe R. El. xxxviii.).

In the "Sefer ha-Yashar" Esau returns to Canaan from Seir (whither he had emigrated) upon hearing that Isaac is dying. Jacob also repairs thither from Hebron. Jacob and Esau with their respective sons bury Isaac in Machpelah. The division of the property is made on the proposal of Jacob, who leaves Esau to determine which he will take, the personal riches or the land. Nebajoth, Ishmael's son, urges Esau to take the movable property, since the land is in the hands of the sons of Canaan. This he does, leaving "nothing unto Jacob," who writes all particulars of the transaction in a book of sale, Esau returning with his wealth to Seir. In Gen. R. lxxxii. and lxxxiv. Esau is represented as emigrating from Canaan from shame at his former conduct.

Esau's Death.

Esau's death is not mentioned in the Bible. The Rabbis supply the information that it was brought about in an altercation with Jacob's sons over their right to bury their father in the cave of Machpelah (Soṭah 13a). The "Sefer ha-Yashar" gives full details of the dispute. Joseph invokes the "bill of sale" witnessed between Esau and Jacob after Isaac's death, and sends Naphtali to Egypt to fetch the document. Before quick-footed Naphtali returns, Esau unsuccessfully resorts to war, and is slain by Dan's deaf and dumb son, Hushim, who, though assigned to protect the women and children at Jacob's bier, upon seeing the commotion rushes on Esau, smites him with the sword and cuts off his head; whereupon Jacob is buried in the cave.

The Rabbis emphasize the fact that Esau's "hairy" appearance marked him a sinner (Gen. R. lxv.) and his "red" ("edom") color indicated his bloodthirsty propensities ("dam" = "blood"; Gen. R. lxiii.); they make him out to have been a misshapen dwarf (Gen. R. lxv.; Cant. R. ii. 15; Agadat Bereshit xl.) and the type of a shameless robber, displaying his booty even on the holy "bimah" (Midr. Teh. to Ps. lxxx. 6); but his filial piety is nevertheless praised by them (Tan., Ḳedoshim, 15, where his tears are referred to; *ib.*, Toledot, 24, where the fact that he married at forty, in imitation of his father, is mentioned approvingly).

"Esau" (= Edom) later represents Rome.

S. S. E. G. H.

——**Critical View:** Esau is assumed to be the progenitor of the Edomites. His character reflects the disposition of this warlike people. The stories in Genesis purpose to account for their relations with the Israelites (Gen. xxv. 27, xxxii. 4, xxxiii. 1 *et seq.*), as well as to throw light on the fact that the "younger brother"—that is, the tribe or tribes that gained a foothold in the country at a later date—crowded out the "older," and thus acquired the "birthright" (Gen. xxv. 29 *et seq.*, xxvii. 28 *et seq.*). These narratives belong to both the Elohist and the Jahvist writers, as does Gen. xxxvi., which reflects, in the form of a genealogy, the historical fact of Esau's mixture with Canaanites (Hittites) and Ishmaelites. To the priestly writer is due the statement that Esau's marriage, distasteful to his parents, leads to Jacob's being sent away (Gen. xxvi. 34, 35). The same authority is partly responsible for other names connected with Esau in Gen. xxxvi. 2, 3; xxvii. 46; xxviii. 1 *et seq.* Esau, according to this source (P), remains with his parents (Gen. xxxv. 29), and, after Jacob's return, leaves only because of the lack of room (Gen. xxxvi. 6, 7). ESCALONA: City of Castile; said to have been named after Ascalon in Palestine. Jews were living there at a very early date. The fuero or charter granted to the city in 1130 by D. Alfonso VII. decreed that neither a Jew nor a Moor might sit in judgment against a Christian, and that the murder of a Jew should be punished by a fine of 300 sueldos. In 1391 many of the Jews of Escalona were killed, and others forced to accept baptism. The ghetto of the city existed until the general expulsion; as late as 1474 it paid a tax of 1,000 maravedis.

G. M. K.

ESCAPA (איסקאפה, also אישקאפה), JOSEPH BEN SAUL: Rabbi of Smyrna; flourished in the first half of the seventeenth century; probably born at Uskup, European Turkey, after which place he is named. At first rabbi and chief of the yeshibah at Salonica, he later filled the same offices at Smyrna, where at the beginning he shared the rabbinate with Joshua Ashkenazi Azariah. When differences of opinion arose between them in regard to matters of ritual, they appealed to the rabbis of Salonica for arbitration. After his colleague's death, Escapa remained sole rabbi of Smyrna until the end of his life. David Conforte says he saw Escapa when the latter was about one hundred years old. Escapa was especially known for having been the teacher of Shabbethai Ẓebi and for having afterward excommunicated him. Escapa wrote an important work called "Rosh Yosef," a detailed commentary and novellæ on the four Ṭurim of R. Jacob b. Asher. Part one, which has been published, contains a portion of the Ṭur Oraḥ Ḥayyim (Smyrna, 1658); part two, on Ḥoshen Mishpaṭ, has been published up to ch. 76 (Smyrna, 1659). He also wrote responsa; some were published under the title of "Teshubot Rosh Yosef" (Frankfort-on-the-Oder, 1709).

ESCHATOLOGY (from *τὰ ἔσχατα* = אחרית הימים, "the end of days": Gen. xlix. 1; comp. Gen. R. xcviii., הקץ, "the Messianic end"; Isa. ii. 1; also **אחרית**, "the end," Deut. xxxii. 20; Ps. lxxiii. 17; Ben Sira vii. 36, xxviii. 6; comp. "Didache," xvi. 3): The doctrine of the "last things." Jewish eschatology deals primarily and principally with the final destiny of the Jewish nation and the world in general, and only secondarily with the future of the individual; the main concern of Hebrew legislator, prophet, and apocalyptic writer being Israel as the people of God and the victory of His truth and justice on earth. The eschatological view, that is, the expectation of the greater things to come in the future, underlies the whole construction of the history of both Israel and mankind in the Bible. The patriarchal history teems with such prophecies (Gen. xii. 3, 16; xv. 14; xviii. 18; xxii. 18; xxvi. 4); the Mosaic legislation has more or less explicitly in view the relation of Israel to the nations and the final victory of the former (Ex. xix. 5; Lev. xxvi. 45; Num. xxiii. 10, xxiv. 17-24; Deut. iv. 6; vii. 6 *et seq.*; xxviii. 1, 10; xxx. 3 *et seq.*; xxxii. 43; xxxiii. 29). But it was chiefly the Prophets who dwelt with great emphasis upon the Day of the Lord as the future Day of Judgment. Originally spoken of as the day when Yhwh as the God of heaven visits the earth with all His terrible powers of devastation (comp. Gen. xix. 24; Ex. ix. 23, xi. 4, xii. 12; Josh. x. 11), the term was employed by the Prophets in an eschatological sense and invested with a double character: on the one hand, as the time of the manifestation of God's punitive powers of justice directed against all that provokes His wrath, and, on the other hand, as the time of the vindication and salvation of the righteous. In the popular mind the Day of the Lord brought disaster only to the enemies of Israel; to His people it brought victory. But this is contradicted by the prophet Amos (iii. 2, v. 20). For Isaiah, likewise, the Day of the Lord brings terror and ruin to Judah and Israel (Isa. ii. 12, x. 3, xxii. 5; comp. Micah i. 3) as well as to other nations (Isa. xiv. 25, xxiv.-xxv.). In the same measure, however, as Israel suffers defeat at the hand of the great world-powers, the Day of the Lord in the prophetic conception becomes a day of wrath for the heathen world and of triumph for Israel. In Zeph. i.-iii. it is a universal day of doom for all idolaters, including the inhabitants of Judea, but it ends with the glory of the remnant of Israel, while the assembled heathen powers are annihilated (iii. 8-12). This feature of the final destruction, before the city of Jerusalem, of the heathen world-empires becomes prominent and typical in all later prophecies (Ezek. xxxviii., the defeat of Gog and Magog; Isa. xiii. 6-9, Babel's fall; Zech. xii. 2 *et seq.*, xiv. 1 *et seq.*; Hag. i. 6; Joel iv. [iii.] 2 *et seq.*; Isa. lxvi. 15 *et seq.*), the Day of the Lord being said to come as "a fire which refines the silver" (Mal. iii. 2 *et seq.*, 9; comp. Isa. xxxiii. 14 *et seq.*). Especially strong is the contrast between the fate which awaits the heathen and the salvation promised Israel in Isa. xxxiv.-xxxv., whereas other prophecies accentuate rather the final conversion of the heathen nations to the belief in the Lord (Isa. ii. 1 *et seq.*, xlix. 6, lxvi. 6-21; Zech. viii. 21 *et seq.*, xiv. 16 *et seq.*).

The Day of the Lord.

Resurrection of the Dead.

In addition to this conception of the Day of the Lord, the Prophets developed the hope of an ideal Messianic future through the reign of a son of the house of David—the golden age of paradisiacal bliss, of which the traditions of all the ancient nations spoke (see Dillmann's commentary to Gen. ii.-iii., p. 46). It would come in the form of a world of perfect peace and harmony among all creatures, the angelic state of man before his sin (Isa. xi. 1-10, lxv. 17-25: "new heavens and a new earth"). It was only a step further to predict the visitation of all the kingdoms of the earth, to be followed by the swallowing up of death forever and a resurrection of the dead in Israel, so that all the people of the Lord might witness the glorious salvation (Isa. xxiv. 21-xxv. 8, xxvi. 19). The hope of resurrection had been expressed by Ezekiel only with reference to the Jewish nation as such (Ezek. xxxvii.). Under Persian influence, however, the doctrine of resurrection underwent a change, and was made part of the Day of Judgment; hence in Dan. xii. 2 the resurrection is extended to both the wicked and the righteous: the latter "shall awake to everlasting life," the former "to shame and everlasting horror" (A. V. "contempt").

It is certainly incorrect to speak of an eschatological system of the Bible, in which there is no trace of an established belief in the future life. Both Ben Sira and Tobit still adhere to the ancient view of Sheol as the land of the shades (see Sheol).

The Formation of an Eschatological System.

It was the future destiny of the nation which concerned the Prophets and the people; and the hope voiced by prophet, psalmist, and liturgical poet was simply that the Lord as the Only One will establish His kingdom over the whole earth (Ex. xv. 18; Micah ii. 13, iv. 7; Obad. 21; Zech. xiv. 9; Isa. xxiv. 23; Ps. xciii. 1, xcvi. 10, xcvii. 1, xcix. 1). This implied not only the reunion of the twelve tribes (Ezek. xxxvii. 16 *et seq.*; Zeph. iii. 20), but the conversion of the heathen surviving the divine day of wrath as well as the downfall of the heathen powers (Zeph. iii. 8-9; Zech. xiv. 9-19; Isa. lvi. 6, lxiii. 1-6; Ps. ii. 8-12). It seems that, because of the tribulation which the house of Zerubbabel had to undergo—not, as Dalman ("Die Worte Jesu," p. 243) thinks, "because the Messiah was not an essential part of the national hope"—the expectation of a Messiah from the house of David was kept in the background, and the prophet Elijah, as the forerunner of the great Day of the Lord who would reassemble all the tribes of Israel, was placed in the foreground (Ecclus. [Sirach] xlviii. 10; I Macc. xiv. 41). See Elijah.

The "Kingdom of God."

It is difficult to say how far the Sadducees or the ruling house of Zadok shared in the Messianic hope of the people (see Sadducees). It was the class of the Ḥasidim and their successors, the Essenes, who made a special study of the prophetical writings in order to learn the future destiny of Israel and mankind (Dan. ix. 2; Josephus, "B. J." ii. 8, §§ 6, 12; *idem*, "Ant." xiii. 5, § 9, where the term εἱμαρμένη is to be taken eschatologically). While announcing the coming events in visions and apocalyptic writings concealed from the multitude (see Apocalyptic Literature), they based their calculations upon unfulfilled prophecies such as Jeremiah's seventy years (Jer. xxv. 11, xxix. 10), and accordingly tried to fix "the end of days" (Dan. ix. 25 *et seq.*; Enoch, lxxxix. 59). The Talmud reproachingly calls these men, who frequently brought disappointment and wo upon the people, "maḥshebe ḳeẓim" (calculators of the [Messianic] ends: Sanh. 97b; comp. 92b, 99a; Ket. 111a; Shab. 138b; 'Eduy. ii. 9-10; for the expression קץ הימין, see Dan. xii. 4, 13; Assumptio Mosis, i. 18, xii. 4; II Esd. iii. 14; Syriac Apoc. Baruch, xxvii. 15; Matt. xiii. 39, xxiv. 3). It can not be denied, however, that these Ḥasidean or apocalyptic writers took a sublime view of the entire history of the world in dividing it into great world-epochs counted either after empires or millenniums, and in seeing its consummation in the establishment of "the kingdom of the Lord," called also, in order to avoid the use of the Sacred Name, מלכות שמים ("the kingdom of heaven"). This prophetic goal of human history at once lent to all struggle and suffering of the people of God a higher meaning and purpose, and from this point of view new comfort was offered to the saints in their trials. This is the idea underlying the contrast between the "kingdoms of the powers of the earth" and "the kingdom of God" which is to be delivered over at the end of time to the saints, the people of Israel (Dan. ii. 44; vii. 14, 27). It is, however, utterly erroneous to assert, as do Schürer ("Geschichte," ii. 504 *et seq.*) and Bousset ("Religion des Judenthums," pp. 202 *et seq.*), that this kingdom of God meant a political triumph of the Jewish people and the annihilation of all other nations. As may be learned from Tobit xiii. 11 *et seq.*, xiv. 6, quoted by Schürer (*l.c.* ii. 507), and from the ancient New-Year's liturgy (see also 'Alenu), "the conversion of all creatures to become one single band to do God's will" is the foremost object of Israel's Messianic hope; only the removal of "the kingdom of violence" must precede the establishment of God's kingdom. This hope for the coming of the kingdom of God is expressed also in the Ḳaddish (comp. Lord's Prayer) and in the eleventh benediction of the "Shemoneh 'Esreh," whereas the destruction of the kingdom of wickedness first found expression in the added (nineteenth) benediction (afterward directed chiefly against obnoxious informers and heretics; see Liturgy), and was in the Hellenistic propaganda literature, the Sibyllines (iii. 47, 767 *et al.*), emphasized especially with a view to the conversion of the heathen.

World-Epochs.

In contrasting the future kingdom of God with the kingdom of the heathen powers of the world the apocalyptic writers were undoubtedly influenced by Parsism, which saw the world divided between Ahuramazda and Angro-mainyush, who battle with each other until finally the latter, at the end of the fourth period of the twelve world-millenniums, is defeated by the former after a great crisis in which the bad principle seems to win the upper hand (see Plutarch, "On Isis and Osiris," ch. 47; Bundahis, xxxiv. 1; "Bahman Yasht," i. 5, ii. 22 *et seq.*; "S. B. E." v. 149, 193 *et seq.*; Stade, "Ueber den Einfluss des Parsismus auf das Judenthum," 1898, pp. 145 *et seq.*). The idea of four world-empires succeeding one another and represented by the four metals (Dan. ii., vii.), which also has its parallel in Parsism ("Bahman Yasht," i. 3), and in Hindu, Greek, and Roman traditions ("Laws of Manes," i. 71 *et seq.*; Hesiod, "Works and Days," pp. 109 *et seq.*; Ovid, "Metamorphoses," i. 89), seems to rest upon an ancient tradition which goes back to Babylonia (see Gunkel's commentary on Genesis, 1902, p. 241). Gunkel finds in the twelve millenniums of Persian belief an astronomical world-year with four seasons, and sees the four Babylonian world-epochs reproduced in the four successive periods of Adam, Noah, Abraham, and Moses. The four periods occur again in Enoch, lxxxix. *et seq.* (see Kautzsch, "Pseudepigraphen," p. 294) and Rev. vi. 1; also in Zech. ii. 1 (A. V. i. 18), vi. 1; and Dan. viii. 22; and the four undivided animals in the vision of Abraham (Gen. xv. 9) were by the early haggadists (Johanan b. Zakkai, in Gen. R. xliv.; Apoc. Abraham, xv., xxviii.) referred to the four world-empires in an eschatological sense.

The Perso-Babylonian world-year of twelve millenniums, however, was transformed in Jewish es-

A World-Week.

chatology into a world-week of seven millenniums corresponding with the week of Creation, the verse "A thousand years in thy sight are but as yesterday" (Ps. xc. 5 [A.V. 4]) having suggested the idea that the present world of toil ("'olam ha-zeh") is to be followed by a Sabbatical millennium, "the world to come" ("'olam ha-ba'": Tamid vii. 4; R. H. 31a; Sanh. 97a; Ab. R. N. i., ed. Schechter, p. 5; Enoch, xxiii. 1; II Esdras vii. 30, 43; Testament of Abraham, A. xix., B. vii.; Vita Adæ et Evæ, 42; Rev. xx. 1; II Peter iii. 8; Epistle of Barnabas, xv.; Irenæus, v. 28, 3). Of these the six millenniums were again divided, as in Parsism, into three periods: the first 2,000 years devoid of the Law; the next 2,000 years under the rule of the Law; and the last 2,000 years preparing amid struggles and through catastrophes for the rule of the Messiah (Sanh. 97a; 'Ab. Zarah 9a; Midr. Teh. xc. 17); the Messianic era is said to begin 4,291 years after Creation (comp. the 5,500 years after Creation, after the lapse of which the Messiah is expected, in Vita Adæ et Evæ, 42; also Assumptio Mosis, x. 12). On a probably similar calculation, which placed the destruction of the Second Temple at 3828 (Sanh. *l.c.*), rests also the division of the world into twelve epochs of 400 years, nine and a half of which epochs had passed at the time of the destruction of the Temple (II Esdras xiv. 11; comp. vii. 28). Twelve periods occur also in the Syriac Apocalypse of Baruch (xxvii., liii.) and the Apocalypse of Abraham (xxix.); the ten millenniums of Enoch xxi. 6, however, appear to be identical with the ten weeks in ch. xciii., that is, 10 x 700 years. As a matter of course, Biblical chronology was always so construed as to bring the six millenniums into accord with the Messianic expectations of the time; only by special favor would the mystery of the end, known only to God, be revealed to His saints (Dan. xii. 9; II Esd. iv. 37, xi. 44; Syriac Apoc. Baruch, liv. 1, lxxxi. 4; Matt. xxiv. 36; Pes. 54b). The end was believed to be brought about by the merit of a certain number of saints or martyrs (Enoch, xlvii. 4; II Esd. iv. 36; Rev. vii. 4), or by the completion of the number of human souls sent from their heavenly abode to the earth, the number of created souls being fixed (Syriac Apoc. Baruch, xxiii. 4; 'Ab. Zarah 5a; Yeb. 63b). Finally, it was taught that "he who announces the Messianic time based on calculation forfeits his own share in the future" (R. Jose, in Derek Ereẓ R. xi.) and that "the advent of the Messiah is dependent upon general repentance brought about by the prophet Elijah" (Sanh. 97b; Pirḳe R. El. xliii.; Assumptio Mosis, i. 18).

Travail of the Messianic Time.

There prevails a singular harmony among the apocalyptic writings and traditions, especially regarding the successive stages of the eschatological drama. The first of these is the "travail" of the Messianic time (חבלו של משיח; literally, "the suffering of the Messiah"; comp. Pesiḳ. R. 21, 34; Shab. 118a; Pes. 118a; Sanh. 98b; Mek., Beshallaḥ, Wayassa', 4, 5; or חבלי המשיח, Matt. xxiv. 8; Mark xiii. 9, taken from Hosea xiii. 13). The idea that the great redemption shall be preceded by great distress, darkness, and moral decline seems to be based on such prophetic passages as Hosea xiii. 13 *et seq.*; Joel ii. 10 *et seq.*; Micah vii. 1–6; Zech. xiv. 6 *et seq.*; Dan. xii. 1. The view itself, however, is not that of the Prophets, whose outlook is altogether optimistic and eudemonistic (Isa. xi. 1–9, lxv. 17–25), but more in accordance with the older non-Jewish belief in a constant decline of the world, from the golden and silver to the brass and iron age, until it ends in a final cataclysm or conflagration, contemplated alike by old Teuton and Greek legend. It was particularly owing to Persian influence that the contrast between this world, in which evil, death, and sin prevail, and the future world, "which is altogether good" (Tamid *l.c.*), was so strongly emphasized, and the view prevailed that the transition from the one to the other could be brought about only through a great crisis, the signs of decay of a dying world and the birth-throes of a new one to be ushered into existence. Persian eschatology had no difficulty in utilizing old mythological and cosmological material from Babylonia in picturing the distress and disorder of the last days of the world (Bundahis, xxx. 18 *et seq.*; Plutarch, *l.c.* 47; Bahman, *l.c.* ii. 23 *et seq.*, iii. 60); Jewish eschatology had to borrow the same elsewhere or give Biblical terms and passages a new meaning so as to make all terrestrial and celestial powers appear as participants in the final catastrophe. This world, owing to the sin of the first man (II Esd. iv. 30), or through the fall of the angels (Enoch, vi.–xi.), has been laden with curses and is under the sway of the power of evil, and the end will accordingly be a combat of God with these powers of evil either in the heavens above or on earth (Isa. xxiv. 21 *et seq.*, xxv. 7, xxvii. 1; Dan. vii. 11, viii. 9; Book of Jubilees, xxiii. 29; Test. Patr., Asher, 7, Dan. 5; Assumptio Mosis, x. 1; Psalms of Solomon, ii. 25 *et seq.*; and see Gunkel, "Schöpfung und Chaos," pp. 171–398). The whole world, then, appears as in a state of rebellion before its downfall. A description of these Messianic woes is given in the Book of Jubilees, xx. 11–25; Sibyllines, ii. 154 *et seq.*, iii. 796 *et seq.*; Enoch, xcix. 4 *et seq.*, c. 1 *et seq.*; II Esd. v.–vi.; Syriac Apoc. Baruch xxv.-xxvii., xlviii. 31 *et seq.*, lxx.; Matt. xxiv. 6–29; Rev. vi.–ix.; Soṭah ix. 15; Derek Ereẓ Zuṭa x.; Sanh. 96b–97a. "A third part of all the world's woes will come in the generation of the Messiah" (Midr. Teh. Ps. ii. 9). In all these passages evil portents are predicted, such as visions of swords, of blood, and of warfare in the sky (Sibyllines, iii. 795; comp. Luke xxi. 21; Josephus, "B. J." vi. 5, § 3), disorder in the whole celestial system (Enoch, lxxx. 4–7; II Esd. v. 4; comp. Amos viii. 9; Joel ii. 10), in the produce of the earth (Enoch, lxxx. 2; Book of Jubilees, xxiii. 18; II Esd. vi. 22; Sibyllines, iii. 539), and in human progeny (Book of Jubilees, xxiii. 25; Sibyllines, ii. 154 *et seq.*; II Esd. v. 8, vi. 21). Birds and beasts, trees, stones, and wells will cease to act in harmony with nature (II Esd. v. 6–8, vi. 24).

Particularly prominent among the plagues of the time, of which Baruch xxviii. 2-3 counts twelve, will be "the sword, famine, earthquake, and fire"; according to Book of Jubilees, xxiii. 13, "illness and pain, frost and fever, famine and death, sword and captivity"; but greater than the terror and havoc caused by the elements will be the moral corruption and perversion, the wickedness and unchastity anticipated in prophetic visions, and the power of evil spirits (Syriac Apoc. Baruch, *l.c.* and lxx. 2–8; Book of Jubilees, xxiii. 13–19). This view of the prevalence of the spirit of evil and seduction to sin in the last days received special emphasis in the Ḥasidean schools; hence the striking resemblance between the tannaitic and the apocalyptic picture of the time preceding the Messianic advent: "In the last days false prophets [pseudo-Messiahs] and corrupters will increase and sheep be turned into wolves, love into hatred; lawlessness [see BELIAL] will prevail, causing men to hate, persecute, and deliver up each other; and Satan, 'the world-deceiver' (see ANTICHRIST), will in the guise of the Son of God perform miracles, and as ruler of the earth commit unheard-of crimes" ("Didache," xvi. 3 *et seq.*; Sibyllines, ii. 165 *et seq.*, iii. 63; Matt. xxiv. 5–12; II Tim. iii. 1 *et seq.*). The rabbinic description is similar: "The footsteps of the Messiah [עקבות משיח, taken from Ps. lxxxix. 52; comp. the term עקב עשו, "the last days of the rule of Esau"="Edom—Rome"; II Esd. vi. 8–10; comp. Gen. R. lxiii.; Yalḳut and Midrash ha-Gadol, ed. Schechter, on Gen. xxv. 26; Pirḳe R. El. xxxii.] are seen in the turning of the schoolhouse into a brothel, the desolation of Galilee and Gaulanitis, the going about of the scribes and saints as despised beggars, the insolence and lawlessness of the people, the disrespect of the younger generation toward the older, and the turning of the rulers to heresy" (Soṭah ix. 15; Derek Ereẓ Zuṭa x.; Sanh. 97b; Cant. R. ii. 13; Ket. 112b; in these passages amoraim of the second and third centuries are often credited with the views of tannaim of the first; comp. also Shab. 118a with Mek., Beshallaḥ, *l.c.*). Simon ben Yoḥai (comp. Derek Ereẓ Zuṭa x. with Sanh. *l.c.*) counts seven periods of tribulation preceding the advent of the son of David. The Abraham Apocalypse (xxx.) mentions ten plagues as being prepared for the heathen of the time: (1) distress; (2) conflagration; (3) pestilence among beasts; (4) famine; (5) earthquakes and wars; (6) hail and frost; (7) wild beasts; (8) pestilence and death among men; (9) destruction and flight (comp. Isa. xxvi. 20; Zech. xiv. 5); and (10) noises and rumblings (comp. קולות in the sixth period of Simon b. Yoḥai; comp. Test. Patr., Levi, 17, where also seven periods precede the kingdom of God).

The War of Gog and Magog.

An important part in the eschatological drama is assigned to Israel's final combat with the combined forces of the heathen nations under the leadership of Gog and Magog, barbarian tribes of the North (Ezek. xxxviii.–xxxix.; see GOG AND MAGOG). Assembled for a fierce attack upon Israel in the mountains near Jerusalem, they will suffer a terrible and crushing defeat, and Israel's land will thenceforth forever remain the seat of God's kingdom. Whether originally identical or identified only afterward by Biblical interpretation with the battle in the valley of Jehoshaphat (Joel iv. [A.V. iii.] 12; comp. Zech. xiv. 2 and Isa. xxv. 6, where the great warfare against heathen armies is spoken of), the warfare against Gog and Magog formed the indispensable prelude to the Messianic era in every apocalyptic vision (Sibyllines, iii. 319 *et seq.*, 512 *et seq.*, 632 *et seq.*; v. 101; Rev. xx. 8; Enoch, lvi. 5 *et seq.*, where the place of Gog and Magog is taken by the Parthians and Medes; II Esd. xiii. 5, "a multitude of men without number from the four winds of the earth"; Syriac Apoc. Baruch, LXX. 7–10; Targ. Yer. to Num. xi. 26, xxiv. 17, Ex. xl. 11, Deut. xxxii. 39, and Isa. xxxiii. 25; comp. Num. xxiv. 7 [Septuagint, Γὼγ for "Agag"]; see ELDAD AND MEDAD).

R. Eliezer (Mek., Beshallaḥ, *l.c.*) mentions the Gog and Magog war together with the Messianic woes and the Last Judgment as the three modes of divine chastisement preceding the millennium. R. Akiba assigns both to the Gog and Magog war and to the Last Judgment a duration of twelve months ('Eduy. ii. 10); Lev. R. xix. has seven years instead, in accordance with Ezek. xxxix. 9; Ps. ii. 1–9 is referred to the war of Gog and Magog ('Ab. Zarah 3b; Ber. 7b; Pesiḳ. ix. 79a; Tan., Noah, ed. Buber, 24; Midr. Teh. Ps. ii.).

The destruction of Gog and Magog's army implies not, as falsely stated by Weber ("Altsynagogale Theologie," 1880, p. 369), followed by Bousset ("Religion des Judenthums," p. 222), the extermination of the Gentile world at the close of the Messianic reign, but the annihilation of the heathen powers who oppose the kingdom of God and the establishing of the Messianic reign (see Enoch, lvi.–lvii., according to which the tribes of Israel are gathered and brought to the Holy Land after the destruction of the heathen hosts; Sifre, Deut. 343; and Targ. Yer. to Num. xi. 26).

The Gentiles who submit to the Law are expected to survive (Syriac Apoc. Baruch, lxxii. 4; Apoc. Abraham, xxxi.); and those nations that did not subjugate Israel will be admitted by the Messiah into the kingdom of God (Pesiḳ. R. 1, after Isa. lxvi. 23). The Messiah is called "Hadrach" (Zech. ix. 1), as the one who leads the heathen world to repentance (הדריך), though he is tender to Israel and harsh toward the Gentiles (חד ורך: Cant. R. vii. 5). The loyalty of the latter will be severely tested ('Ab. Zarah 2b *et seq.*), while during the established reign of the Messiah the probation time of the heathen will have passed over (Yeb. 24b). "A third part of the heathen world alone will survive" (Sibyllines, iii. 544 *et seq.*, v. 103, after Zech. xiii. 8; in Tan., Shofeṭim, ed. Buber, 10, this third part is referred to Israel, which alone, as the descendants of the three patriarchs, will escape the fire of Gehenna). According to Syriac Apoc. Baruch, xl. 1, 2, it is the leader of the Gog and Magog hosts who will alone survive, to be brought bound before the Messiah on Mount Zion and judged and slain. According to II Esd. xiii. 9 *et seq.*, fire will issue forth from the mouth of the Messiah and consume the whole army. This indicates an identification of Gog and Magog with "the wicked one" of Isa. xi. 4, interpreted as the personification of wickedness, Angro-mainyush (see ARMILUS). In Midrash Wayosha' (Jellinek, "B. H." i. 56) Gog is the leader of the seventy-two nations of the world, minus one (Israel), and makes war against the Most High; he is smitten down by God. Armilus rises as the last enemy of God and Israel.

The great event preparatory to the reign of the Messiah is the gathering of the exiles, "ḳibbuẓ

Gathering of the Exiles.

galiyyot." This hope, voiced in Deut. xxx. 3; Isa. xi. 12; Micah iv. 6, vii. 11; Ezek. xxxix. 27; Zech. xi. 10–12 and Isa. xxxv. 8, is made especially impressive by the description in Isa. xxvii. 13 of the return of all the strayed ones from Assyria and Egypt, and by the announcement that "the Gentiles themselves shall carry Israel's sons and daughters on their arms to Jerusalem with presents for the Lord" (Isa. xlix. 22, lx. 4–9, lxvi. 20). It was accordingly dwelt upon as a miraculous act in the synagogal liturgy and song (Shemoneh 'Esreh; Meg. 17a; Cant. xi. 1, xvii. 31), as well as in apocalyptic visions (Apoc. Abraham, xxxi.; II Esd. xiii. 13; Matt. xxiv. 31). God shall bring them back from the East and the West (Baruch, iv. 37, v. 5 *et seq.*; Ecclus. [Sirach] xxxvi. 13; Tobit xiii. 13); Elijah shall gather them and the Messiah summon them together (Ecclus. [Sirach] xlviii. 10; Sibyllines, ii. 171–187; Cant. xvii. 26; Targ. Yer. to Ex. vi. 18, xl. 9–10, Num. xxiv. 7, Deut. xxx. 4, Jer. xxxiii. 13). In wagons carried by the winds the exiles shall be borne along with a mighty noise (Enoch, lvii. 1 *et seq.*; Zeb. 116a; Cant. R. and Haggadat Shir ha-Shirim to Cant. iv. 16; Midr. Teh. to Ps. lxxxvii. 6), and a pillar of light shall lead them (Philo, "De Execrationibus," 8–9). The Lost Ten Tribes shall be miraculously brought back across the mighty waters of the River Euphrates (II Esd. xiii. 39–47; Syriac Apoc. Baruch, lxxvii.; Sanh. x. 13; Tan., Miḳḳez and Shelaḥ, i. 203, iii. 79, ed. Buber, after Isa. xi. 15; see ARZARETH; SAMBATION; TEN TRIBES).

The Days of the Messiah.

The central place in the eschatological system is, as a matter of course, occupied by the advent of the Messiah. Nevertheless the days of the Messiah ("yemot ha-Mashiaḥ"), the time when the prophetic predictions regarding the reign of the descendant of David find their fulfilment, do not form the end of the world's history, but are merely the necessary preparatory stage to the kingdom of God ("malkut shamayim"), which, when once established, will last forever (Dan. vii. 27; Sibyllines, iii. 47 *et seq.*, 767 *et seq.*; Mek., Beshallaḥ, 'Amaleḳ, end). The Messiah is merely "the chosen one" (Enoch, xlv. 3, xlix. 2, li. 3 *et seq.*); he causes the people to seek the Lord (Hosea iii. 5; Isa. xi. 9; Zech. xii. 8; Ezek. xxxiv. 24, xxxvii. 24 *et seq.*), and, as "the Son of God," causes the nations to worship Him (Enoch, cv. 2; II Esd. viii. 28 *et seq.*, xiii. 32–52, xiv. 9, after Ps. ii. 7, lxxxix. 27 *et seq.*). The time of his kingdom is therefore limited according to some to three generations (Mek., *l.c.*, after Ex. xvii. 16, מדר דר); according to others, to 40 or 70, to 365 or 400 years, or to 1,000, 2,000, 4,000, or 7,000 years (Sanh. 99a, 97b; Pesiḳ. R. 1, end; Midr. Teh. xc. 17); the number 400, however, based upon a combination of Gen. xv. 13 and Ps. xc. 15 (see Pesiḳ. R. 1), is supported by II Esd. vii. 28 *et seq.*, where it is positively stated that after his 400 years' reign the Messiah will die to rise again, after the lapse of a week, with the rest of the righteous in the world's regeneration. It is probably to emphasize his human character that the Messiah is frequently called the "Son of Man" (Dan. viii. 13; Enoch, xlvi. 2 *et seq.*, xlviii. 2, lxii. 7; see MAN, SON OF). For it is in order to fulfil the designs of God for Israel and the whole race of man that he is to appear as the triumphant warrior-king to subjugate the nations (Sibyllines, iii. 653–655), to lead in the war against Gog and Magog (II Esd. xiii. 32; Targ. Yer. to Num. xxiv. 17, 20), to annihilate all the powers of wickedness and idolatry, cleanse the Holy Land and city from all heathen elements, build the new house of the Lord "pure and holy," and become the Redeemer of Israel (Syriac Apoc. Baruch, xxxix. 7 *et seq.*, lxxii. 2; Cant. xvii. 21–30; Targ. Yer. to Gen. xlix. 11, Ex. xl. 9, Num. xi. 16, Isa. x. 27; comp. Philo, "De Præmiis et Pœnis," with reference to Num. xxiv. 7): "he is to redeem the entire creation by chastising the evil-doers and making the nations from all the ends of the world see the glory of God" (II Esd. xiii. 26–38; Cant. xvii. 31). "Free from sin, from desire for wealth or power, a pure, wise, and holy king imbued with the spirit of God, he will lead all to righteousness and holiness (Cant. xvii. 32–43; Sibyllines, iii. 49, v. 414 *et seq.*; Test. Patr., Levi, 18; Midr. Teh. lxxii. 12; Targ. Yer. to Gen. xlix. 12, and Isa. xi. 2, xli. 1).

Time of Universal Peace.

The Messianic time, accordingly, means first of all the cessation of all subjection of Israel by other powers (שיעבוד מלכיות, Ber. 34b; Sanh. 91b), while the kingdoms and nations will bring tributes to the Messiah (Pes. 118b; Gen. R. lxxviii.; Tan., Yelamdenu, Shofeṭim; Sibyllines, iii. 350, iv. 145, all based upon Ps. lxxii. 10 and lxviii. 32); furthermore, it will be a time of conversion of the heathen world to monotheism (Tobit xiv. 6; Sibyllines, iii. 616, 624, 716 *et seq.*; Enoch, xlviii. 4 *et seq.*; 'Ab. Zarah 24a, after Zeph. iii. 9), though the Holy Land itself will not be inhabited by strangers (Cant. xvii. 28; Sibyllines, v. 264; Book of Jubilees, l. 5). Both earth and man will be blessed with wondrous fertility and vigor (Enoch, x. 17–19, "They will live until they have a thousand children"; Sibyllines, iii. 620 *et seq.*, 743; Syriac Apoc. Baruch, xxix. 5; comp. Papias' description of the millennium given as coming directly from Jesus, in Irenæus, "Adversus Hæreses," v. 33, 3–4; Ket. 111b; Shab. 30b, "The earth will produce new fruits daily, women will bear children daily, and the land will yield loaves of bread and garments of silk," all with reference to Ps. lxxii. 16; Deut. xxxii. 1; Gen. xlix. 11; comp. Targ. Yer.). The days of the youth of the earth will be renewed; people will again reach the age of 1,000 years (Book of Jubilees, xxx. 27; comp. Isa. lxv. 20); the birth of children will be free from pain (Syriac Apoc. Baruch, lxxiii. 60, after Isa. xiii. 8; Philo, "De Præmiis et Pœnis," 15 *et seq.*); there will no longer be strife and illness, plague or trouble, but peace, health, and joy (Enoch, x. 16–22; Sibyllines, iii. 371; Syriac Apoc. Baruch, lxxiii. 1–5). All physical ailments and defects will be healed (Gen. R. xcv.; Pesiḳ. R. 42 [ed. Friedmann, p. 177, note]; Midr. Teh. cxlvi. 8; Eccl. R. i. 9, after Isa. xxxv. 6; comp. Matt. xi. 5). A spiritual regeneration will also take place, and Israel's sons and daughters will prophesy (Num. R. xv., after Joel iii. 1 [A. V. ii. 28], a passage which contradicts the statement of Bousset, *l.c.* p. 229).

Renewal of the Time of Moses.

The Messiah will furthermore win the heathen by the spirit of wisdom and righteousness which rests upon him (Sibyllines, iii. 780; Test. Patr., Levi, 18; Judah, 24; Targ. Yer. to Gen. xlix. 12 and Isa. xli. 1). He will teach the nations the Noachian laws of humanity and make all men disciples of the Lord (Midr. Teh. xxi.). The wonders of the time of Moses will be repeated on a larger scale in the time of the Messiah (Mek., Beshallaḥ, Shirah, 8, after Micah vii. 15; comp. Hosea ii. 17; Targ.; Tan., Bo, ed. Buber, 6). What Moses, the first redeemer, did is typical of what the Messiah as the last redeemer will do (Eccl. R. i. 9). The redemption will be in the same month of Nisan and in the same night (Mek., Bo, 14); the same pillar of cloud will lead Israel (Philo, "De Execrationibus," 8; Targ. Yer. to Isa. xxxv. 10): the same plagues will be sent upon Israel's foes (Tan., Wa'era, ed. Buber, 15; Bo, 6, 19; Midr. Wayosha'; Jellinek, "B. H." i. 45); the redeemer will ride on an ass (Zech. ix. 9; comp. Ex. iv. 20); manna will again be sent down from heaven (Ps. lxxii. 16; comp. Ps. lxxviii. 24; Syriac Apoc. Baruch, xxix. 8); and water rise from beneath by miraculous power (Joel iv. [A. V. iii.] 18; comp. Ps. lxxviii. 15 *et seq.*; Eccl. R. i. 9). Like Moses, the Messiah will disappear for 90 or 45 days after his appearance (Pesiḳ. R. 15; Pesiḳ. v. 49b, after Hosea v. 15). The same number of people will be redeemed (Sanh. 111a) and the Song of Moses be replaced by another song (Mek., Beshallaḥ, Shirah, 1; Rev. xv. 3). But, like Moses, the Messiah will die (II Esd. *l.c.*); the opinion that the Messiah will not taste death (Midr. Teh. lxxii. 17) seems to be of later origin, and will be discussed in connection with the account of the Messiah from the tribe of Joseph or Ephraim (see below).

The Cosmic Characters of the Messianic Time.

Jewish theology always insisted on drawing a sharp line between the Messianic days and the final days of God's sole kingdom. Hence the characteristic baraita counting ten world-rulers, beginning with God before Creation, then naming Nimrod, Joseph, Solomon, Ahab, Nebuchadnezzar, Cyrus, Alexander the Great, the Messiah, and ending with God last as He was the first (Pirḳe R. El. xi.; Meg. 11a is incomplete). There are, however, in the personality of the Messiah supernatural elements adopted from the Persian Soshians ("Savior") which lent to the whole Messianic age a specifically cosmic character. An offspring of Zoroaster, born miraculously by a virgin of a seed hidden in a lake for thousands of years, Soshians is, together with a number of associates, six, or seven, or thirty, to bring about the resurrection, slay Angro-mainyush and his hosts of demons, judge the risen dead, giving each his due reward, and finally renew the whole world (Bundahis, xxx.; Windischmann, "Zoroastrische Studien," 1863, pp. 231 *et seq.*; Böcklen, "Die Verwandtschaft der Jüdischchristlichen mit der Parsischen Eschatologie," 1902, pp. 91 *et seq.*). Similarly, the Messiah is a being existing from before Creation (Gen. R. i.; Pesiḳ. R. 33; Pirḳe R. El. iii.; Pes. 54a, based on Ps. lxxii. 17), and kept hidden for thousands of years (Enoch, xlvi. 2 *et seq.*, xlviii. 6, lxii. 7; II Esd. xii. 32, xiii. 26; Syriac Apoc. Baruch, xxix.; Midr. Teh. xxi.; Targ. to Micah iv. 8). He comes "from a strange seed" (מזרע אחר: Gen. R. xxiii., with reference to Gen. iv. 25; Gen. R. li., with reference to Gen. xix. 34; Gen. R. lxxxv.; Tan., Wayesheb, ed. Buber, 13, with reference to Gen. xxxviii. 29; comp. Matt. i. 3); or from the North (צפון, which may also mean "concealment": Lev. R. ix.; Num. R. xiii., after Isa. xli. 25; comp. John vii. 27).

The Messiah's immortal companions reappear with him (II Esd. xiii. 52, xiv. 9; comp. vi. 26). Derek Ereẓ Zuṭa i. mentions nine immortals (see Kohler, in "J. Q. R." v. 407–419, and comp. the transposed [hidden] righteous ones in Mandæan lore; Brand, "Die Mandäische Religion," 1889, p. 38). They are probably identical with "the righteous who raise the dead in the Messianic time" (Pes. 68a). Prominent among the companions of the Messiah are: (1) Elijah the prophet (see Elijah in Rabbinical Literature), who is expected as high priest to anoint the Messiah (Justin, "Dialogus cum Tryphone," viii., xlix.; comp. Targ. to Ex. xl. 10; John i. 21); to bring about Israel's repentance (Pirḳe R. El. xliii.) and reunion (Targ. Yer. to Deut. xxx. 4; Sibyllines, v. 187 *et seq.*), and finally the resurrection of the dead (Yer. Shab. i. 5–3c; Sheḳ. iii. 47c; Agadat Shir ha-Shirim, ed. Schechter, to Cant. vii. 14); he will also bring to light again the hidden vessels of Moses' time (Mek., Beshallaḥ, Wayassa', 5; Syriac Apoc. Baruch, vi. 8; comp., however, Num. R. xviii.: "the Messiah will disclose these"); (2) Moses, who will reappear with Elijah (Deut. R. iii.; Targ. Yer. to Ex. xii. 42; comp. Ex. R. xviii. and Luke ix. 30); (3) Jeremiah (II Macc. xv. 14; Matt. xvi. 14); (4) Isaiah (II Esd. ii. 18); (5) Baruch (Syriac Apoc. Baruch, vi. 8, xiii. 3, xxv. 1, xlvi. 2); (6) Ezra (II Esd. xiv. 9); (7) Enoch (Enoch, xc. 31; Evangelium Nicodemi, xxv.), and others (Luke ix. 8; comp. also Septuagint to Job, end). The "four smiths" in the vision of Zech. ii. 3 (i. 20, R. V.) were referred by the Rabbis to the four chiefs, or associates, of the Messianic time; Elijah and the Messiah, Melchizedek and the "Anointed for the War" (Messiah ben Joseph: Pesiḳ. v. 51a; comp. Suk. 55b). The "seven shepherds and the eight princes" (Micah v. 4 [A. V. 5]) are taken to be: Adam, Seth, Methuselah (Enoch was stricken from the list of the saints in post-Christian times), Abraham, Jacob, and Moses, with David in the middle, forming the set of "shepherds"; Jesse, Saul, Samuel (?), Amos (?), Ḥezekiah, Zedekiah, Elijah, and the Messiah, forming the set of "princes" (Suk. 52b). These, fifteen in number, correspond to the fifteen men and women in the company of the Persian Soshians. The Coptic Elias Apocalypse (xxxvii., translated by Steindorf), speaks of sixty companions of the Messiah (see Bousset, *l.c.* p. 221).

The origin and character of the Messiah of the tribe of Joseph, or Ephraim, are rather obscure. It seems that the assumed superhuman character of the Messiah appeared to be in conflict with the tradition that spoke of his death, and therefore the figure of a Messiah who would come from the tribe of Joseph, or Ephraim, instead of from Judah, and who would willingly undergo suffering for his nation and fall as victim in the Gog and Magog war, was created

The Messiah of the Tribe of Joseph.

by the haggadists (see Pesik. R. 37; comp. 34.). To him was referred the passage, "They shall look unto him whom they have pierced and mourn for him" (Zech. xii. 10, Hebr.; Suk. 52a), as well as the fifty-third chapter of Isaiah (see Justin, "Dialogus cum Tryphone," lxviii. and xc.; comp. Sanh. 98b, "the Messiah's name is 'The Leper' ['ḥiwwara'; comp. Isa. liii. 4]; the passage quoted in Martini, "Pugio Fidei," p. 417, cited by Gfrörer [*l.c.* 267] and others, is scarcely genuine; see Eppstein, "Bereshit Rabbati," 1888, p. 26). The older haggadah referred also "the wild ox" who with his horns will "push the people to the ends of the earth" (Deut. xxxiii. 17, Hebr.) to the Ephraimite Messiah (Gen. R. lxxv.; comp. Num. R. xiv.). The Messiah from the tribe of Ephraim falls in the battle with Gog and Magog, whereas the Messiah from the house of David kills the superhuman hostile leader (Angro-mainyush) with the breath of his mouth; then he is universally recognized as king (Suk. 52a; comp. Targ. Yer. to Ex. xl. 9, 11; Targ. to Isa. xi. 4, Cant. iv. 5; Sefer Zerubbabel, in Jellinek, "B. H." ii. 56, where he is introduced with the name of Nehemiah b. Ḥushiel; comp. *l.c.* 60 *et seq.*, iii. 80 *et seq.*).

"Great will be the suffering the Messiah of the tribe of Ephraim has to undergo for seven years at the hand of the nations, who lay iron beams upon him to crush him so that his cries reach heaven; but he willingly submits for the sake of his people, not only those living, but also the dead, for all those who died since Adam; and God places the four beasts of the heavenly throne-chariot at his disposal to bring about the great work of resurrection and regeneration against all the celestial antagonists" (Pesiḳ. R. 36). The Patriarchs will rise from their graves in Nisan and pay homage to his greatness as the suffering Messiah, and when the nations (104 kingdoms) put him in shackles in the prison-house and make sport of him, as is described in Ps. xxii. 8-16, God will address him with the words "Ephraim, My dear son, child of My comfort, I have great compassion on thee" (Jer. xxxi. 20, Hebr.), assuring him that "with the breath of his mouth he shall slay the wicked one" (Isa. xi. 4); and He will surround him with a sevenfold canopy of precious stones, place streams of wine, honey, milk, and balsam at his feet, fan him with all the fragrant breezes of paradise, and then tell the saints that admire and pity him that he has not gone through half the suffering imposed upon him from the world's beginning (Pesiḳ. R. 37). The haggadists, however, did not always clearly discriminate between the Ephraimite Messiah, who falls a victim, and the son of David, who is glorified as victor and receives the tributes of the nations (Midr. Teh. xviii. 5, where the former is meant as being the one "insulted" according to Ps. lxxxix. 51 [A. V. 52]; comp. Targ. Yer. to Num. xi. 26, and Midr. Teh. lxxxvii. 6, where the two Messiahs are mentioned together). According to Tan. Yelamdenu, Shofeṭim (end), the nations will first bring tributes to the Messiah; then, seized by a spirit of confusion ("ruaḥ tezazit"), they will rebel and make war against him; but he will burn them with the breath of his mouth and none but Israel will remain (that is, on the battle-field: this is misunderstood by Weber, *l.c.*; comp. II Esd. xiii. 9).

In the later apocalyptic literature the Ephraimite Messiah is introduced by the name of Nehemiah ben Ḥushiel, and the victorious Messiah as Menahem ben 'Ammi El ("Comforter, son of the people of God": Jellinek, "B. H." ii. 56, 60 *et al.*). It appears that the eschatologists were anxious to discriminate between the fourth heathen power personified in Edom (Rome) the wicked, over whom the Ephraimite Messiah alone is destined to carry victory (Pesiḳ. R. 12; Gen. R. lxxiii.; B. B. 123b), and the Gog and Magog army, over which the son of David was to triumph while the son of Ephraim fell (see Otot ha-Mashiaḥ, Jellinek, *l.c.*). While the fall of the wicked kingdom (Rome) was taken to be the beginning of the rise of the kingdom of God (Pesiḳ. v. 51a), the belief was that between the fall of the empire of Edom = Rome and the defeat of the Gog and Magog army there would be a long interval (see Pesiḳ. xxii. 148a; comp. Pesiḳ. R. 37 [ed. Friedmann, 163b, note]).

According to R. Eliezer of Modin (Mek., Beshallaḥ, Wayassa', 4 [ed. Weiss, p. 58b, note]), the Messiah is simply to restore the reign of the Davidic dynasty ("malkut bet Dawid"; comp. Maimonides, Commentary to Sanh. xi.: "The Messiah, the son of David, will die, and his son and grandson will follow him"; on the other hand, Baḥya ben Joseph in his commentary to Gen. xi. 11 says: "The Messiah will not die"); also "the Aaronitic priesthood and Levitic service."

The New Jerusalem.

The apocalyptic writers and many rabbis who took a less sober view of the Messianic future expected a new Jerusalem built of sapphire, gold, and precious stones, with gates, walls, and towers of wondrous size and splendor (Tobit xiii. 15, xiv. 4; Rev. xxi. 9-21; Sibyllines, iii. 657 *et seq.*, v. 250 *et seq.*, 420 *et seq.*; B. B. 75a; Pes. 50a; Pesiḳ. xx. 143a; Pesiḳ. R. 32; Midr. Teh. lxxxvii., in accordance with Isa. liv. 11 *et seq.*, lx. 10; Hag. ii. 7; Zech. ii. 8). The "new" or "upper Jerusalem" (ירושלים של מעלה; Ta'an 5a; Ḥag. 12b; Test. Patr., Dan. 5; Rev. xxi. 2, 10; Gal. iv. 26; Heb. xii. 22) seen in visions by Adam, Abraham, and Moses (Syriac Apoc. Baruch, iv. 2-6) will in the days of the Messiah appear in all its splendor (II Esd. vii. 26, x. 50 *et seq.*; Syriac Apoc. Baruch, xxxii. 4); it will be reared upon the top of all the mountains of the earth piled one upon the other (Pesiḳ. xxi. 144b, after Isa. ii. 2).

This expectation of course includes a "heavenly temple," "miḳdash shel ma'alah" (Enoch, xc. 29 *et seq.*; comp. Ḥag. *l.c.*; Pes. 54, after Jer. xvii. 12). The more sober view is that the Messiah will replace the polluted temple with a pure and holy one (Enoch, liii. 6, xc. 28, xci. 13; Sibyllines, iii. 776; Psalms of Solomon xvii. 30; comp. Lev. R. ix.: "Coming from the North, the Messiah will erect the temple in the South"). The sacred vessels of the Tabernacle of Moses' time, hidden ever since, are expected to reappear (II Macc. ii. 4-8; Syriac Apoc. Baruch, vi. 7-10; Tosef., Soṭah, xiii. 1; apocryphical Masseket Kelim; Yoma 52b; Tan., Wayeḥi, ed. Buber, 3; comp. Josephus, "Ant." xviii. 4, § 1). There will be no sin any more, for "the Lord will shake the land of Israel and cleanse it from all impurity" (Pirḳe R. El. xxxiv. 21, after Job xxxviii. 13). "The Messianic time will be without merit ["zekut"] and without guilt ["ḥobah"] (Shab. 151b). Yet "only the select ones will be allowed to go up to the new Jerusalem" (B. B. 75b).

A New Law.

Whereas the Babylonian schools took it for granted that the Mosaic law, and particularly the sacrificial and priestly laws, will be fully observed in the Messianic time (Yoma 5b *et al.*), the view that a new Law of God will be proclaimed by the Messiah is occasionally expressed (Eccl. R. ii. 1; Lev. R. xiii., according to Jer. xxxi. 32)—"the thirty commandments" which comprise the Law of humanity (Gen. R. xcviii.). "Ye will receive a new Law from the Elect One of the righteous" (Targ. to Isa. xii. 3). The Holy One will expound the new Law to be given by the Messiah (Yalḳ. ii. 296, to Isa. xxvi.); according to Pes. xii. 107a, He will only infuse new ideas ("ḥiddush debarim"); or the Messiah will take upon himself the kingdom of the Law and make many zealous followers thereof (Targ. to Isa. ix. 5 *et seq.*, and liii. 11–12). "There will be a new covenant which shall not be broken" (Sifra, Beḥuḳḳotai, ii., after Jer. xxxi. 32). The dietary and purity laws will no longer be in force (Lev. R. xxii.; Midr. Teh. cxlvii., ed. Buber, note; R. Joseph said: "All ceremonial laws will be abrogated in the future" [Nid. 61b]; this, however, refers to the time of the Resurrection).

Resurrection formed part of the Messianic hope (Isa. xxiv. 19; Dan. xii. 2). Martyrs for the Law were specially expected to share in the future glory of Israel (II Macc. vii. 6, 9, 23; Book of Jubilees, xxiii. 30), the term for having a share in the future life being "to inherit the land" (Ḳid. i. 10). The Resurrection was therefore believed to take place solely in the Holy Land (Pesiḳ. R. 1; the "land of the living" in Ps. cxvi. 9 means "the land where the dead live again"). Jerusalem alone is the city whose dead will blossom forth as the grass, for those buried elsewhere will be compelled to creep through holes in the ground to the Holy Land (Ket. 3b; Pesiḳ. R. *l.c.*). From this point of view the Resurrection is accorded only to Israel (Gen. R. xiii.). The great trumpet blown to gather the tribes of Israel (Isa. xxvii. 13) will also rouse the dead (Ber. 15b; Targ. Yer. to Ex. xx. 15; II Esd. iv. 23 *et seq.*; I Cor. xv. 52; I Thess. iv. 16).

The Last Judgment precedes the Resurrection. Judged by the Messiah, the nations with their guardian angels and stars shall be cast into Gehenna. According to Rabbi Eleazar of Modi'im, in answer to the protests of the princes of the seventy-two nations, God will say, "Let each nation go through the fire together with its guardian deity," when Israel alone will be saved (Cant. R. ii. 1). This gave rise to the idea adopted by Christianity, that the Messiah would pass through Hades (Test. Patr., Benjamin, 9; Yalḳ., Isa. 359; see Eppstein, "Bereshit Rabbati," 1888, p. 31). The end of the judgment of the heathen is the establishment of the kingdom of God (Mek., Beshallaḥ, 'Amaleḳ). The Messiah will cast Satan into Gehenna, and death and sorrow flee forever (Pesiḳ. R. 36; see also ANTICHRIST; ARMILUS; BELIAL).

In later times the belief in a universal Resurrection became general. "All men as they are born and die are to rise again," says Eliezer ben Ḳappar (Abot iv.). The Resurrection will occur at the close of the Messianic era (Enoch, xcviii. 10). Death will befall the Messiah after his four hundred years' reign, and all mankind and the world will lapse into primeval silence for seven days, after which the renewed earth will give forth its dead and God will judge the world and assign the evil-doers to the pit of hell and the righteous to paradise, which is on the opposite side (II Esd. vii. 26–36). All evil-doers meet with everlasting punishment. It was a matter of dispute between the Shammaite R. Eliezer and the Hillelite R. Joshua whether the righteous among the heathen had a share in the future world or not (Tosef., Sanh. xiii. 2), the dispute hinging on the verse "the wicked shall return to Sheol, and all the Gentiles that forget God" (Ps. ix. 18 [A. V. 17], Hebr.). The doctrine "All Israelites have a share in the world to come" (Sanh. xi. 1) is based upon Isa. lx. 21: "Thy people, all of them righteous, shall inherit the land" (Hebr.). At first resurrection was regarded as a miraculous boon granted only to the righteous (Test. Patr., Simeon, 6; Luke xiv. 14), but afterward it was considered to be universal in application and connected with the Last Judgment (Slavonic Enoch, lxvi. 5; comp. second blessing of the "Shemoneh 'Esreh"). Whether the process of the formation of the body at the Resurrection is the same as at birth is a matter of dispute between the Hillelites and Shammaites (Gen. R. xiv.; Lev. R. xiv.). For the state of the soul during the death of the body see IMMORTALITY and SOUL.

Regeneration of the World.

Owing to the gradual evolution of eschatological conceptions, the Rabbis used the terms, "'olam ha-ba" (the world to come), "le-'atid la-bo" (in the coming time), and "yemot ha-Mashiaḥ" (the Messianic days) promiscuously or often without clear distinction (see Geiger, "Lesestücke aus der Mischnah," p. 41; *idem*, "Jüd. Zeit." iii. 159, iv. 124). Thus, for instance, the question is discussed whether there will be death for the Gentiles "in the coming time" or not (Gen. R. xxvi.). R. Eleazar of Modi'im, of the second century (Mek., Beshallaḥ, Wayassa', ed. Weiss, p. 59, note) distinguishes between the Messianic time ("malkut bet Dawid"), the "'olam ha-ba" (the future world), which is that of the souls, and the time of the Resurrection, which he calls "'olam ḥadash" (the new world, or world of regeneration). This term, used also in the "Ḳaddish" prayer "Le-Ḥadata 'Alma" (The Renewal of the World), is found in Matt. xix. 28 under the Greek name *παλινγένεσις*: "In the regeneration when the Son of Man shall sit on the throne of his glory" and judge the world in common with the twelve Apostles (for the last words see the twelve judges for the twelve tribes of Israel in Testament of Abraham, A. 13, and compare the seventy elders around the seat of God in heaven in Lev. R. xi.)

Concerning this regeneration of the world Pirḳe R. El. i. says, with reference to Isa. xxxiv. 4, li. 6, lxv. 17; Hosea vi. 2: "Heaven and earth, as well as Israel, shall be renewed; the former shall be folded together like a book or a garment and then unfolded, and Israel, after having tasted death, shall rise again on the third day." "All the beauty of the world which vanished owing to Adam's sin, will be restored in the time of the Messiah, the descendant of Perez [Gen. R. xii.]—the fertility of the earth, the wondrous size of man [Sifra, Beḥuḳḳotai, 1–2], the splendor of sun and moon" (Isa. xxx. 26; Targ. to II Sam. xxiii. 4; comp. Apoc. Mosis, 36). Ten things shall be renewed (according to Ex. R. xv.; comp. Tan., Wayiggash, ed. Buber, 9): The sun and moon shall regain their splendor, the former endowed with healing powers (Mal. iii. 20 [A. V. iv. 2]); the fountains of Jerusalem shall flow, and the trees grow (Ezek. xlvii. 12); desolate cities like Sodom shall rise from their ruins (Ezek. xvi. 55); Jerusalem, rebuilt of precious stones, shall shine like the sun (Isa. liv. 11 *et seq.*); peace shall reign among the beasts (Isa. xi. 7); and between them and Israel (Hosea ii. 20 [A. V. 18]); weeping and death shall cease (Isa. lxv. 19, xxv. 8–10); joy only shall reign (Isa. xxxv. 10); the "yeẓer ha-ra'" (evil desire) shall be slain by God (Suk. 52a). This regeneration of the world is to be brought about by a world-conflagration ("mabbul shel esh" = "a floor of fire" = ἐκπύρωσις: Sibyllines, iii. 542, 689; iv. 174; ii. 296; Hippolytus, "Refutatio Omnium Hæresium," ix. 30). This view, borrowed from the Stoics, is based upon Isa. xxxiv. 4 (comp. Bousset, "Der Antichrist," p. 159). In this world-conflagration Belial himself will be consumed (Sibyllines, iii. 73; compare the burning up of the primeval serpent Gohithar in Bundahis, xxx. 31). Thus the fire of Gehenna which consumes the wicked angels and the stars (Enoch, xc. 24 *et seq.*, *et al.*) was turned into a cosmic force bringing about the world's renewal.

The Last Judgment.

The Messianic kingdom, being at best of mere earthly splendor, could not form the end, and so the Great Judgment was placed at its close and following the Resurrection. Those that would not accept the belief in bodily resurrection probably dwelt with greater emphasis on the judgment of the souls after death (see Abraham, Testament of; Philo; Sadducees; Wisdom, Book of). Jewish eschatology combined the Resurrection with the Last Judgment: "God summons the soul from heaven and couples it again on earth with the body to bring man to judgment" (Sanh. 91b, after Ps. l. 4). In the tenth week, that is, the seventh millennium, in the seventh part, that is, after the Messianic reign, there will be the great eternal judgment, to be followed by a new heaven with the celestial powers in sevenfold splendor (Enoch, xci. 15; comp. lxxxiv. 4, xciv. 9, xcviii. 10, civ. 5). On "the day of the Great Judgment" angels and men alike will be judged, and the books opened in which the deeds of men are recorded (lxxxi. 4, lxxxix. 70 *et seq.*, xc. 20, ciii. 3 *et seq.*, civ. 1, cviii. 3) for life or for death; books in which all sins are written down, and the treasures of righteousness for the righteous, will be opened on that day (Syriac Apoc. Baruch, xxiv. 1). "All the secret thoughts of men will then be brought to light." "Not long-suffering and mercy, but rigid justice, will prevail in this Last Judgment"; Gehenna and Paradise will appear opposite each other for the one or the other to enter (II Esd. vii. 33 *et seq.*).

This end will come "through no one but God alone" (*ib.* vi. 6). "No longer will time be granted for repentance, or for prayer and intercession by saints and prophets, but the Only One will give decision according to His One Law, whether for life or for everlasting destruction" (Syriac Apoc. Baruch, lxxxv. 9–12). The righteous ones will be recorded in the Book of Life (Book of Jubilees, xxx. 22, xxxvi. 10; Abot ii. 1; "Shepherd of Hermas," i. 32; Luke x. 20; Rev. iii. 5, xiii. 8, xx. 15). The righteous deeds and the sins will be weighed against each other in the scales of justice (Pesiḳ. R. 20; Ḳid. 40b). According to the Testament of Abraham (A. xiii.), there are two angels, one on either side: one writes down the merits, the other the demerits, while Doḳiel, the archangel, weighs the two kinds against each other in a balance; and another, Pyroel ("angel of fire"), tries the works of men by fire, whether they are consumed or not; then the just souls are carried among the saved ones; those found unjust, among those who will meet their punishment. Those whose merits and demerits are equal remain in a middle state, and the intercession of meritorious men such as Abraham saves them and brings them into paradise (Testament of Abraham, A. xiv.). According to the sterner doctrine of the Shammaites, these souls must undergo a process of purgation by fire; "they enter Gehenna, swing themselves up again, and are healed." This view, based upon Zech. xiii. 9, seems to be something like the Christian purgatory. According to the Hillelites, "He who is plenteous in mercy inclines the scale of justice toward mercy"—a view which shows (against Gunkel, "Der Prophet Ezra," 1900, p. 15) that Judaism believed in divine mercy independently of the Pauline faith (Tosef., Sanh. xiii. 3). As recorder of the deeds of men in the heavenly books, "Enoch, the scribe of righteousness," is mentioned in Testament of Abraham, xi.; Lev. R. xiv. has Elijah and the Messiah as heavenly recorders, a survival of the national Jewish eschatology.

Gehenna.

There is no Scriptural basis for the belief in retribution for the soul after death; this was supplied by the Babylonians and Persians, and received a Jewish coloring from the word "Gehinnom" (the valley of Hinnom), made detestable by the fires of the Moloch sacrifices of Manasseh (II Kings xxiii. 10). According to 'Er. 19a, the smoke from subterranean fires came up through the earth in this place; "there are cast the spirits of sinners and blasphemers and of those who work wickedness and pervert the words of the Prophets" (Enoch, cviii. 6). Gehinnom has a double purpose, annihilation (Enoch, xciv. 1 *et seq.*) and eternal pain (II Esd. vii. 36 *et seq.*). Gehinnom has seven names: "Sheol," "Abbadon," "Pit of Corruption," "Horrible Pit," "Mire of Clay," "Shadow of Death," and "Nether Parts of the Earth" (Jonah ii. 3; Ps. lxxxviii. 12 [A. V. 11], xvi. 10, xl. 3 [A. V. 2], cvii. 14; Ezek. xxvi. 20). It is also called "Tophet" (Isa. xxx. 33). It has seven departments, one beneath the other (Soṭah 10b). There are seven kinds of pains (II Esd. vii. 81 *et seq.*). According to rabbinical tradition, thieves are condemned to fill an unfillable tank; the impure sink into a quagmire; those that sinned with the tongue are suspended thereby; some are suspended by the feet, hair, or eyelids; others eat hot coals and sand; others are devoured by worms, or placed alternately in snow and fire. On Sabbath they are respited (see Dumah). These conceptions, ascribed chiefly to Joshua ben Levi, have their parallel in the apocalyptic literature appropriated by the Christian Church (see Gehenna). The punishment of the wicked endures twelve months, according to R. Akiba; the generation of the Flood will in time be released (Gen. R. xxviii.), but the punishment of those who have led others into heresy or dealt treacherously against the Law will never cease (Tosef., Sanh. xiii. 5).

Gan 'Eden.

The Garden of Eden is called the "Garden of Righteousness" (Enoch, xxxii. 3), being no longer an earthly paradise (*ib.* lx. 8, lxi. 12, lxx. 3). It is above the earth, and its inhabitants are "clothed with garments of light and eternal life, and eat of the tree of life" (*ib.* lviii. 3) in the company of the Lord and His anointed. In Slavonic Enoch its place is in the third heaven; its four streams pour out honey and milk, oil and wine (compare Sibyllines, ii. 318). It is prepared for the "righteous who suffer innocently, who do works of benevolence and walk without blame before God." It has been created since the beginning of the world, and will appear suddenly at the Judgment Day in all its glory (II Esd. vi.; comp. Pes. 54a). The righteous dwell in those heights where they enjoy the sight of the heavenly "ḥayyot" that carry God's throne (Syriac Apoc. Baruch, li. 11). As the wicked have a sevenfold pain the righteous have a sevenfold joy (II Esd. vii. 88 *et seq.*). There are seven divisions for the righteous, which shine like the sun (Judges v. 31; comp. Matt. xiii. 43), the moon (Ps. lxxxix. 37), the firmament (Dan. xii. 3), lightnings, torches (Nahum ii. 5 [A. V. 4]), and lilies (Ps. xlv. 1, Hebr.). Each of these divisions is placed differently before the face of God. Each of the righteous will have a mansion, and God will walk with them and lead them in a dance (Yer. Meg. ii. 73b). See Eden, Garden of.

The Banquet.

According to Ascensio Isaiæ, viii. 26, ix. 18, xi. 40, the righteous on the arrival of the Messiah receive in the seventh heaven garments of light as well as crowns and thrones. No small part in the future bliss is played by the eating of the heavenly bread or manna (Sibyllines, Prooemium, 87; Ḥag. 12b; Tan., Beshallaḥ, ed. Buber, p. 21; comp. "the mysterious food," II Esd. ix. 19), the ambrosial milk and honey (Sibyllines, ii. 318, iii. 746), and, according to R. Joshua b. Levi, "the wine prepared from the beginning of the world" (Ber. 34b; comp. Matt. xxvi. 29). The very name for the highest bliss of the future is "the banquet" (Abot iii. 16), which is the same as "sitting at the table of the Messiah" (Rev. xix. 9; Luke xiii. 28-29, xxii. 30, *et al.*). It is called in rabbinical literature "se'uddat ha-liwyatan" (the banquet of the leviathan), that is to say, in accordance with Job xl. 30 (A. V. xli. 6) the "ha-barim, or pious ones, shall hold their meal over it" (see Leviathan). It seems that the Persian ox, "hadhayos," whose marrow imparts immortality to the eater (Bundahis, xxx. 25), gave rise to the idea of the behemoth and leviathan meal which is dwelt on in Enoch, lx. 7 *et seq.*; Syriac Apoc. Baruch, xxix. 4; II Esd. vi. 52; Targ. Yer. to Num. xi. 26, Ps. civ. 26; B. B. 74b; Tan., Beshallaḥ, at end.

But while this eudemonistic view is the popular one, based upon Isa. lxv. 13 and Ps. xxiii. 5 (Num. R. xxi.), there is also the higher and more spiritual view taught by Rab: "In the world to come there is neither eating, drinking, nor procreation, neither barter nor envy, neither hatred nor strife; but the righteous sit with their crowns on their heads and enjoy the splendor of the Shekinah; for it is said: 'And they saw God and did eat and drink'; that is, their seeing God was meat and drink to them" (Ber. 17a). More characteristic still is the view of Rab's Palestinian contemporary R. Johanan: All the bliss for the future promised by the Prophets refers only to the Messianic time, whereas in regard to that which is in store for the righteous in the world to come it is said: "No eye hath seen it beside thee, O God" (Isa. lxiv. 3 [A. V. 4]; Ber. 34b; comp., however, Ex. R. xlv., at end, according to which God showed to Moses all the treasures in store for the doers of benevolent works). The New Testament sentence, "Many shall be last [there] that are first [here], and first [there] that are last [here]" (Matt. xix. 30, Greek), finds its explanation in the saying of a son of R. Joshua b. Levi: "A contrary order of things I have seen in the world beyond: the high in station are low there, the lowly are placed on high" (Ber. 50a).

Only in the esoteric Essene circles whence the apocalyptic literature emanated were attempted all the elaborate descriptions of paradise that found their way into the Midrash Konen, the Ma'aseh Gan 'Eden, and similar midrashim of the geonic time given in Jellinek's "B. H." ii. 28, 52 *et seq.*; iii. 131, 191 *et seq.*; but these descriptions can be traced through early Christian back to Jewish sources (see "J. Q. R." vii. 595). Mystics like Naḥmanides in his "Sha'ar ha-Gemul" adopted these views; Maimonides and his school rejected them. The whole eschatological system of retribution through paradise and hell never assumed in Judaism the character of a dogmatic belief, and Talmudic Judaism boldly transferred the scene of the heavenly judgment from the hereafter to the annual Day of Judgment at the beginning of the year (R. H. 16b; see New-Year). For Samaritan eschatology see Samaritans.

The account above deals only with the early stages of the Jewish eschatological views, roughly speaking, down to the end of the Talmudic period. For later development and present-day views see Immortality; Judgment, Day of; Messiah; Resurrection.

K.

ESCUDERO, LORENÇO (ABRAHAM ISRAEL; identical with ABRAHAM GHER-PEREGRINO): Spanish poet; born at Cordova of Marano parentage; died about 1683. After his conversion to Judaism he lived in great poverty in Amsterdam. The Marquis of Caracena, then governor of Flanders, urged him to return to Christianity; but, though tempted by the offer of rewards, he steadily refused. After his death he was eulogized by De Barrios in verse. Escudero is supposed to be the author of the apologetic "Fortaleza del Judaismo, y Confusion del Estraño" (without date or place), of which a poor Italian translation entitled "Fortezza dell' Ebraismo, e Confusione dell' Estraneo," and a Hebrew translation by Mordecai Luzzatto of Triest, under the title "Ẓeriaḥ Bet-El," are extant in manuscript.

Plain of Esdraelon, with Mount Tabor in the Distance.

(From a photograph by Bonfils.)

ESDRAELON (ESRELON): The later Greek form of the more ancient Jezreel, and the name of the boundary-plain between the Ephraimitic and the Galilean mountain-chain (Judith i. 8). It is frequently spoken of as "the great valley"—a designation, however, not supported by Old Testament usage. In the latter it is referred to as "the land of the valley" (Josh. xvii. 16) or as "the valley" (Judges v. 15; I Sam. xxxi. 7; I Chron. x. 7). The central portion of the plain was called "the valley of Jezreel" (Josh. xvii. 16; Judges vi. 33; Hosea i. 5); and the portion on the south, "the valley of Megiddon" (Zech. xii. 11; II Chron. xxxv. 22). Its present name is Marj ibn-ʿAmr. The plain is bounded on the south by the mountains of Samaria, on the north by the Galilean mountain, and on the east by a low mountain-range. To the westward it is 25 meters above sea-level; to the eastward, 120 meters.

ESDRAS, BOOKS OF: Apocryphal writings ascribed to Ezra.

Name and Versions.

I Esdras: The apocryphal Book of Ezra, or, better, the "Greek Ezra" (Esdræ Græcus), is called 'Εσδρας α' in the Greek Bible, where it precedes the canonical books of Ezra and Nehemiah, counted there as one book, 'Εσδρας β'. In the old Latin Bible it was I Esdras; but after Jerome, with his strong preference for the books preserved in Hebrew, had rejected it from the canon, it was usually counted as III Esdras: then either Ezra was I Esdras, and Nehemiah was II Esdras; or Ezra-Nehemiah was I Esdras, and ch. 1, 2 of the Apocalypse of Esdras was II Esdras. Sometimes, however, the Greek Ezra is called II Esdras: then Ezra-Nehemiah is I Esdras, and the Apocalypse is III Esdras; or, as in the Ethiopic Bible, the latter is I Esdras, and Ezra–Nehemiah follows as III Esdras or as III and IV

Esdras. In the English Bible it is again entitled I Esdras; here the canonical book retained the Hebrew form of its name, that is, "Ezra," whereas the two apocryphal books, ascribed to the same author, received the title in its Græco-Latin form—"Esdras." In the ancient Latin version I Esdras has the subscription "De Templi Restitutione." Two Latin translations were made: the "Vetus Latina" (Itala) and the "Vulgate." In Syriac the book is found only in the Syro-Hexaplar of Paul, Bishop of Tella (616–617), not in the older Peshiṭta. There are also an Ethiopic and an Armenian version.

I Esdras may be divided into ten sections, eight of which are only excerpts from certain parts of II Chronicles, Ezra, and Nehemiah:

Contents.

Ch. i. = II Chronicles xxxv. 1–xxxvi. 21: Josiah's Passover; his death; the history of Judah until the destruction of Jerusalem. Verses 21–22, however, are not found elsewhere, and are probably an addition of the compiler.

Ch. ii. 1–14 = Ezra i. 1–11: The edict of Cyrus.

Ch. ii. 15–26 = Ezra iv. 7–24: First attempt to rebuild the Temple; intervention of the Samaritans.

Ch. iii. 1–v. 3 = ——: Dispute of the three courtiers of Darius: the victory of the Jewish youth; decree of Darius that the Jews might return and that the Temple and the cult be restored.

Ch. v. 4–6 = ——: Beginning of a list of exiles who returned with Zerubbabel.

Ch. v. 7–73 = Ezra ii. 1–iv. 5: List of exiles who returned with Zerubbabel; work on the Temple; its interruption until the time of Darius.

Ch. vi.–vii. 9 = Ezra v. 1–vi. 18: Correspondence between Sisinnes and Darius concerning the building of the Temple; completion of the Temple.

Ch. vii. 10–15 = Ezra vi. 19–22: Celebration of the Passover by the Jews "of the Captivity" and those who had stayed in the land.

Ch. viii. 1–ix. 36 = Ezra vii. 1–x. 44: Return of exiles under Ezra; abolishment of mixed marriages.

Ch. ix. 37–55 = Nehemiah vii. 73–viii. 12: The reading of the Law.

It is evident that the compiler of I Esdras chose as a center the tale, commonly called the "Dispute of the Courtiers," of the contest among the three pages in waiting, and that he grouped around this tale several extracts from other writings with the intention of giving it its historical environment. The results of the contest were the restoration of the Temple and of the Jewish cult and community; and this is, indeed, the leading thought of the entire work. The events that led to the destruction of the Temple are therefore given as an introduction, and after the restoration the doings of Ezra, of vital importance in the development of Judaism, are related.

Purpose and Origin.

There are several discrepancies to be noted in the different parts of the book, first of all in the central episode. The story is that three pages of King Darius each agree to write "one thing that shall be strongest," and to let King Darius bestow great honor on him whose answer is the wisest. The first writes "Wine"; the second, "The king"; the third, "Women, but above all things truth." Then they explain their answers. The third, the victor, asks as reward the return of the Jews. His name is given as "Zerubbabel" in iv. 13 and as "Joakim the son of Zerubbabel" in v. 5. The latter seems to be the original; at the same time the second part of his answer, "truth," seems to be an addition to the original story. Other discrepancies are found in the style of the different pieces and in their relative value for the textual criticism of the originals. These facts indicate that several individuals must have worked over the book before it received its final shape.

Date and Value.

Since Josephus (*c.* 100 C.E.) made use of I Esdras, and since it is very likely that I Esdras iii. 1–2 was influenced by Esth. i. 1–4, the book was probably compiled in the last century before, or the first century of, the common era. It has no historical value, because it bears every mark of a true midrash, in which the facts are warped to suit the purpose of the writer. The extracts from other Old Testament writings, however, are valuable as witnesses of an old Greek translation of the Hebrew text, made probably before the Septuagint (see Guthe in Kautzsch, "Die Apokryphen," i. 1 *et seq.*, and P. Volz in Cheyne and Black, "Encyc. Bibl." ii. 1488–94).

Name and Versions.

II Esdras: One of the most interesting and the profoundest of all Jewish and Christian apocalypses is known in the Latin Bible as "Esdræ Quartus." The number, which usually is a part of the name, depends upon the method of counting the canonical Ezra-Nehemiah and the Greek Ezra: the book is called "I Esdras" in the Ethiopic, "II Esdras" in late Latin manuscripts and in the English Bible, "III Esdras" in other Latin manuscripts. There is another division in Latin Bibles, separating II Esdras into three parts, each with a separate number, of which the main part is "Esdræ Quartus." Greek Fathers quote it as *Ἔσδρας ὁ Προφήτης* or *Ἀποκάλυψις Ἔσδρα*. The most common modern name is "IV Esdras." Only ch. iii.–xiv., the original apocalypse, will be discussed here. The original was written in Hebrew, and then translated into Greek, as has been proved by Wellhausen, Charles, and finally by Gunkel; but neither the Hebrew nor the Greek text is extant. From the Greek were made the following versions: (1) Latin, which is the basis of the English version; (2) Syriac; (3) Ethiopic; (4) and (5) two independent Arabic versions; (6) Georgian. The Armenian version differs from the others; whether it was made from the Syriac or from a separate Greek version has not yet been decided.

Contents.

The book consists of seven sections, called "visions" since Volkmar (1863): 1–3 treat chiefly of religious problems; 4–6 consist mainly of eschatological visions; 7 tells of Ezra's literary activity and death.

First Vision (iii.–v. 19): "In the thirtieth year of the ruin of the city, I, Salathiel (the same is Esdras), was in Babylon, and lay troubled upon my bed." Esdras asks God how the misery of Israel can be in keeping with divine justice. The answer is given by Uriel: God's ways are unsearchable and the human mind can not grasp them; everything will be clear after the end of this world, which will soon come to pass. Then follows a description of the signs of the end.

Second Vision (v. 20–vi. 34): Why is Israel delivered up to the heathen? The answer is similar to that of the first vision: Man can not solve the problem; the end is near. Its signs are again revealed.

Third Vision (vi. 35–ix. 25): Why does Israel not yet possess the world? Answer: The present state is a necessary transition to the future. Then follows a detailed description of the fate of the wicked and the righteous: few will be saved; Esdras intercedes for the sinners, but he is told that nobody will escape his destiny.

Fourth Vision (ix. 26–x. 59): Vision of a woman mourning for her only son. Esdras pictures to her the desolation of Zion.

Suddenly instead of the woman appears a "builded city." Uriel explains that the woman represents Zion.

Fifth Vision (xi., xii.): Vision of an eagle which has three heads, twelve wings, and eight smaller wings "over against them," and which is rebuked by a lion and then burned. The eagle is the fourth kingdom seen by Daniel; the lion is the Messiah.

Sixth Vision (xiii.): Vision of a man who burns the multitude assaulting him, and then calls to himself another but peaceable multitude. The man is the Messiah; the first multitude are the sinners; the second are the Lost Tribes of Israel.

Seventh Vision (xiv.): The restoration of the Scripture. Esdras, sitting under an oak, is addressed by God from a bush and told that he will soon be translated; he asks for the restoration of the Law; God commands him to procure many tablets and five scribes and to tell the people to stay away for forty days. Esdras does so, and, after having received a wondrous drink, begins to dictate. Within forty days are written ninety-four books, of which twenty-four, that is, the Hebrew canon, are to be published and seventy to be kept secret. Esdras' translation is found only in the Oriental versions; in the Latin it has been omitted, because ch. xv. and xvi. were added.

Purpose and Origin.

The author wishes to console himself and his people in a time of great distress. He struggles with the deepest religious problems: What is the origin of suffering and evil in the world? Why does the All-Righteous create men, who He knows will suffer, or will do wrong and therefore perish? Why does man possess the mind or reason which makes him conscious of these things? Throughout these struggles the writer strives for assurance of salvation. Since this is reserved for some future era, he lays much stress on eschatology. Confidence in God's justice underlies all his thoughts.

It has been questioned whether this apocalypse was written by one author. Kalisch ("Das 4te Buch Esra," Göttingen, 1889) tried to prove that it had five different sources; his views were largely adopted by De Faye and by Charles. But Gunkel rightly calls attention to the fact that the uniform character of the book forbids its reduction to several independent documents, and that its repetitions and slight discrepancies are a peculiarity of the author in dealing with his complicated problems. Closely akin to this book is the Apocalypse of BARUCH; it has therefore been suggested that both might have been written by the same author. Although this can not be proved, it is at least certain that both books were composed at about the same time, and that one of them was the prototype of the other.

Date and Value.

Since the eagle in the fifth vision undoubtedly represents the Roman empire, most critics agreeing that the three heads are Vespasian, Titus, and Domitian, and since the destruction of Jerusalem so often referred to must be that by Titus in 70 C.E., the book must date from the last quarter of the first century—probably between 90 and 96.

II Esdras is a characteristic example of the growth of apocalyptic literature: the misery of the present world leads to the seeking of compensation in the happiness of the future. But besides its historical value, this book is an unusually important monument of religious literature for all times.

Additions: Ch. i. and ii. of the Latin and English versions are of Christian origin (probably second century), and describe the rejection of the Jews in favor of the Christians. Ch. xv. and xvi., which predict wars and rebuke sinners at length, may be Jewish; they date from the middle or the second half of the third century.

E. LI.

G.

The author of II Esdras, also called "the prophet Ezra," in all probability, as shown by Wellhausen ("Skizzen und Vorarbeiten," vi. 248 *et seq.*), had before him the Baruch Apocalypse, written under the impression of the destruction of the Temple by the Romans; he reasons more on the general problems of sin and death and on the design of God regarding the few that are saved than on the national problem of Israel's adversity and the prosperity of the heathen. In the controversy between the schools of Shammai and of Hillel as to whether, in view of the prevalence of sin and sorrow, "it is good for man to be born or not" (טוב לאדם שנברא משלא נברא; 'Er. 13b), the author sides with the pessimistic view of the former: "It would be better if we were not born than to live in sin and suffer, not knowing why" (II Esd. iv. 12). In the same light he views the final judgment of man by God. "The germ of evil sown into man by the first sin of Adam" (זוהמה של נחש; 'Ab. Zarah 22b) results in sin and damnation for the great majority of men—indeed, there is no man who sinneth not—and makes the human destiny far inferior to that of the animal, which needs not fear the great Judgment Day (II Esd. vii. 45 [R. V. 115] *et seq.*; viii. 35). The author recognizes God's love for all His creatures (viii. 47), in spite of the fact that greater is the number of those lost than of those that are saved (ix. 15), but for him the end must be unrelenting justice and no mercy nor any intercession of saints; truth and righteousness alone must prevail (vii. 32-38 [R. V. 102-115]). Here, too, the author differs from the Hillelites, who teach that those souls whose merits and demerits are equal are saved by the mercy of God (who inclines the scale toward mercy), and sides with the Shammaites, who claim that these souls must go through the purgatory of the Gehenna fire before they are admitted into paradise (Sanh. xiii. 4; R. H. 16b). In another respect II Esdras (see iii. 30, ix. 22 *et seq.*, xii. 34, xiii. 37 *et seq.*) manifests the spirit of the Shammaites in finding Messianic salvation granted only to the remnant of Israel, for it is Eliezer the Shammaite who, in opposition to the school of Hillel, denies all Gentiles a share in the world to come (Tosef., Sanh. xiii. 2).

In regard to the return of the Lost Ten Tribes, also, the author shares the view of Eliezer, in opposition to Akiba, that they will take part in the Messianic redemption, and the very name for the land of the exile of the Ten Tribes used by him, but obviously misunderstood by the translator, rests on the same Biblical words referred to by the two tannaim—"ereẓ aḥeret" (another land; Deut. xxix. 27; II Esd. xiii. 45, comp. 40; Sanh. x. 3; see ARZARETH).

The length of the Messianic time is stated to be 400 years (II Esd. vii. 28: this is based upon Ps. xc. 15 and Gen. x. 13; comp. Sanh. 99a; Pesiḳ. R. 1). Especially significant is the apocalyptic sign for the Messianic era taken from Gen. xxv. 26, R. V. ("His [Jacob's] hand had hold on Esau's heel"), which is interpreted: "The end of Esau's [Edom's] reign will form the beginning of Jacob's—that is, the Messiah's—kingdom" (II Esd. vi. 8, exactly as in Gen. R. lxiii.; comp. Yalḳ.). For other parallels to rabbinical sayings of the first century see Rosenthal, "Vier Apocryphische Bücher aus der Zeit und Schule R. Akiba's," 1885, pp. 39–71. Rosenthal also thinks (*ib.* p. 40) that the five sages who during forty days put into writing the twenty-four canonical and seventy hidden (apocryphal) books dictated by Ezra under inspiration (II Esd. xiv. 23–46) reflect the work of the five disciples of Johanan ben Zakkai.

K.

ESHCOL: 1. Brother of Mamre and Aner. The three brothers were princes of the Amorites and allies of Abraham (Gen. xiv. 13), whom they supported in his expedition against Chedorlaomer.

2. The valley from which the spies cut the large cluster of grapes which they carried back to the camp of the Israelites as a proof of the fruitfulness of the land (Num. xiii. 23 *et seq.*, xxxii. 9; Deut. i. 24). They entered this valley from Hebron; hence it lay in the vicinity of that city. To the north of the present El-Khalil there is a Wadi Tuffah, which is still famous for the size of its grapes. In Num. xiii. 24 it is said that at the time of Moses the valley received the name of "Eshcol" (grape) because of the cluster which had been found there.

ESHTAOL (אשתאול): A town in the lowland of Judah (Josh. xv. 33), generally mentioned in company with Zoreah, both towns being allotted to Dan out of Judah (*ib.* xix. 41). Between these two towns there was a place named "Mahaneh-dan," the scene of Samson's boyhood and place where the "Spirit of the Lord began to move him at times" (Judges xiii. 25).

E. G. H. M. Sel.

ESHTEMOA or **ESHTEMOH (אשתמוע, אשתמה):** A town in Judah allotted with its suburbs to the priests (Josh. xv. 50, xxi. 14; I Chron. vi. 57). David frequented this place during his wanderings (I Sam. xxx. 28). It is known now under the name of "Al-Samu'a," a village seven miles south of Hebron (Robinson, "Biblical Researches in Palestine," ii. 626). In I Chron. iv. 17 "Eshtemoa" may be taken either for a person or for a city, but in verse 19 "Eshtemoa" certainly represents a person.

ESKELES, BERNHARD, FREIHERR VON: Austrian financier; born at Vienna 1753; died at Hietzing, near Vienna, Aug. 7, 1839. He was the posthumous son of Rabbi Berush Eskeles. At an early age he went to Amsterdam, where he entered a commercial house, of which he became manager at the age of seventeen, but met with reverses, and lost the fortune which his father had left to him.

In 1774 he returned to Vienna, married a daughter of Daniel Itzig of Berlin, and entered the business of his brother-in-law Arnstein, with whom he established the banking-house of Arnstein and Eskeles, which came into great prominence during the Congress of Vienna. At this period Eskeles' drawing-room was the rendezvous of men like Talleyrand, Wellington, Castlereagh, Hardenberg, and Theodor Körner. Eskeles' name is often mentioned in the memoirs of this time. His advice in financial matters was frequently sought by Joseph II., and later by Francis I., who entrusted him with many important missions to foreign countries. He was sent to Paris and Holland in 1810. Eskeles was the founder of the Austrian National Bank (1816), and its director for twenty-three years. He was raised to the Austrian nobility in 1797, and became a knight in 1811, and a baron in 1822.

Eskeles took little interest in Jewish affairs, and during his short term of office as representative of the Jewish community new and vexatious measures were introduced which, according to his contemporaries, he might have prevented had he used his influence. He was, however, the founder of several charitable institutions. He also established, with an initial contribution of 50,000 gulden, a fund for the maintenance of poor students. His two children, a son, Denis, Baron de Eskeles (1803–1876), and a daughter, Countess of Wimpfen, deserted the Jewish faith. Denis, who succeeded his father in the management of the banking-house, married Wilhelmina, Baroness Brentano-Cimaroli, and by his death the male line of the house became extinct.

S. D.

ESKELES, GABRIEL BEN JUDAH LÖW (also known as Gabriel of Cracow): Polish rabbi; died at Nikolsburg, Moravia, Feb. 2, 1718. At first dayyan at Cracow during the rabbinate of his teacher, Aaron Samuel Kaidanower (1671), Eskeles successively occupied the rabbinates of Olkusz, government of Kielce, Russian Poland (1684–93), Prague (1693–98), Metz (1698–1709), and Nikolsburg (1709–1718). In 1698 Eskeles was a delegate of the district of Posen to the Council of Four Lands held at the fair of Jaroslav. Considered one of the greatest Talmudists of his time, he was widely consulted on halakic questions, but nearly all his responsa have been lost. One is quoted by Meïr Eisenstadt in the "Panim Me'irot" (ii., No. 47). He is also quoted by Jacob b. Benjamin ha-Kohen in his "Shab Ya'aḳob." The following works of Gabriel Eskeles still exist in manuscript: a commentary on Abot; novellæ on Shabbat; homilies.

ESKELES, ISSACHAR BERUSH: Austrian rabbi and financier; born 1692; died at Vienna March 2, 1753; son of Gabriel Eskeles and son-in-law of Samson Wertheimer. Eskeles called himself "Issachar Berush of Cracow," although at the time of his birth his father was rabbi of Olkusz, Poland. Owing to his family connections, Eskeles was named rabbi of Kremsir in 1710, when he was only eighteen years old; but as he had to absent himself very often on account of business affairs, he had in his house a substitute rabbi to attend to rabbinical matters. According to Frankl-Grün ("Geschichte der Juden in Kremsier," i. 84), Eskeles was rabbi at Kremsir from 1710 till 1719, but it seems from other sources that he settled at Vienna before 1719. In 1718 he succeeded his father in the rabbinate of Nikolsburg, without, however, leaving his residence in Vienna, where he was associated with his father-in-law in the banking business. At the same time Eskeles was the "Landesrabbiner" of Moravia. On Sept. 10, 1725, the emperor, Charles VI., named Eskeles "Landesrabbiner" of Hungary, a position which had been occupied by his deceased father-in-law. Like the latter, Eskeles presided at Vienna over the rabbinical court of Hungary, which dealt with the affairs of the Hungarian communities. In a decision of 1725 Eskeles signed himself "Issachar Bär of Cracow, rabbi of Nikolsburg and Moravia, Eisenstadt, and Hungary, and of the district of Mayence." From Vienna Eskeles could work to greater advantage in behalf of the Jews. When in 1742 a heavy tax was imposed upon the Jews of Moravia, the exertions of Eskeles and Baron d'Aguilar secured its annulment by Maria Theresa. Another decree, banishing in midwinter of 1744–45 the Jews of Bohemia and Moravia because they were suspected of Prussian leanings, was revoked upon the intercession of Eskeles and D'Aguilar. Eskeles has written novellæ on Berakot, as yet unpublished.

K. M. SEL.

ESPERANSSA, GABRIEL: Rabbi at Safed contemporaneously with Jonathan Galante (middle of seventeenth century). It is supposed that he was received as an orphan into the house of a woman by the name of Esperanssa, who adopted and educated him, and whose name he assumed. Esperanssa was contentious and dogmatic; but was a thorough Talmudic scholar. He left several works, but only the collectanea to the Pentateuch have been published (Ḥayyim Abulafia, "'Eẓ Ḥayyim," p. 137).

ESPINA, ALFONSO D'. See SPINA, ALFONSO DE.

ESPINOSA, BENJAMIN: Italian Hebraist of the eighteenth century; member of the rabbinical college at Leghorn. He published "Peri 'Eẓ Hadar," a ritual for certain special occasions, Leghorn, 1762, and "Yefeh Nof," containing seven didactic poems and notes on the chapter in Maimonides' code dealing with the implements of the sanctuary, printed in Isaac Nuñes Vaez's "Siaḥ Yiẓḥaḳ," *ib.* 1766. A number of Espinosa's works exist in manuscript; as, for instance, "Bet ha-'Ezer," a supercommentary on Abraham ibn Ezra's commentary on the Prophets and the Hagiographa; "Ḳonteros Yesod ha-Ḳiyyum," in which he defends the traditional text of the prayers, Altona, 1768 (see Benjacob, "Oẓar ha-Sefarim," No. 503); "Sha'ar Binyamin," rimed rules for the writing of a Pentateuch-scroll, with a commentary; and "Neweh Ḳodesh," on the architecture of the Second Temple.

ESRA, ELIA: Philanthropist; born at Calcutta Feb. 20, 1830; son of David Joseph Esra; died March, 1886. He was one of the wealthiest merchants of India, and was generally known as "the Indian Rothschild." It is said that he distributed 10,000 francs among the poor every month. Esra built a large synagogue at Calcutta, which he called, after his father, "Magen Dawid." In his will he directed that a large Talmudic school should be built at Jerusalem at the expense of his estate.

ESSEK: Fortified town in Austria-Hungary, the second largest of Croatia; situated on the Drave. It has a population of about 18,000, including 1,600 Jews. Jews did not enjoy the privilege of residence there until 1792. They were, however, permitted a stay of twenty-four hours for the purpose of trading. As traders they appeared as early as 1757, although decried as "pestilent and mangy sheep." In 1830 their number, though small, nevertheless permitted of religious services; and in 1847 they organized a regular congregation, with a membership of forty and a budget of 663 gulden. In 1856 Dr. Samuel Spitzer became the first rabbi and the principal of the congregational school, which had obtained the privilege of incorporation; in 1864 the ḥebra ḳaddisha was established; and in 1867, the membership having increased to one hundred and sixty, a temple was built. The successor of Dr. Spitzer was Dr. Armand Kaminka (1897–99); the present rabbi of Essek is Dr. Simon Ungar of the Budapest Seminary.

D. G. S.

ESSEN: City in the Prussian district of Düsseldorf with 96,000 inhabitants (1895), including about 2,000 Jews. It developed from the convent of Essen, and until 1802 was under the rule of its abbesses. The presence of Jews in Essen is first shown in a document of Jan. 18, 1291, in which the chapter at Essen cedes the right of an esquire of the district to Count Eberhard von der Mark, the abbess Bertha II. expressly reserving for herself all rights over the Jews. This reservation was regularly made on the selection of new esquires. In 1349–50, under the abbess Katharina, the Jews were expelled from the city under the charge of poisoning the wells. In 1399 Jews are found on the tax-list, one of whom was the first Jew to be admitted (1491) to the neighboring city of Steele.

As the city's struggle against chapter and abbess became more and more successful, the Jews fell under the jurisdiction of the city, which gradually reduced the number of Jewish residents to two families, who were subjected, especially in regard to money matters, to severe and irksome ordinances. Of the Jewish families excluded from Essen, some went to Emden, some to Halberstadt and Deutz. The "Memorbuch" of Halberstadt mentions Elijah the Great ha-Levi of Essen (d. 1690). He was the father of R. Moses Kosmann and Judah Lehmann, and grandfather of the court agent Behrend Lehmann at Halberstadt. At the beginning of the eighteenth century there were seven Jewish houses in the city; at its end there were twelve. The last patent of protection, covering nineteen Jewish families in Essen, and drawn up (1803) by King Frederick William III. of Prussia, to whose kingdom the district was annexed in 1802, is in the possession of Isaac Hirschland, president of the community. At present (1903) the community numbers 350 families (about 2,000 individuals).

In the Middle Ages the community worshiped in a hall. The first synagogue was dedicated in 1808 during the French occupation. Synagogue and school prospered under the labors (1841–94) of the able pedagogue and preacher Moses Blumenfeld, the author of several school-books. Blumenfeld rendered valuable service to the city, and on his death (1902) his name was given to one of the city's streets (comp. "Allg. Zeit. des Jud." 1902, p. 88). Since 1894 Dr. Samuel has acted as rabbi. The institutions include a Jewish elementary school, a literary club, a library, an I.O.B.B. lodge, and three charitable societies. There are also nine charitable foundations, including the Karl Beer Fund for the promotion of handicrafts.

D. S. Sam.

ESSENES (etymology doubtful; probably two words are represented, "Essenes" and "Essæi": Essenes = 'Εσσηνοὶ = צנועים, "the modest," "humble," or "pious ones" [so Josephus in most passages; Pliny, in "Historia Naturalis," v. 17, used "Esseni"]; Essæi = 'Εσσαῖον = חשאים, the "silent" or "reticent" ones [so at times Josephus, and regularly Philo; 'Οσσαῖοι in Epiphanius]; others, with less probability, derive the name from the Syriac "ḥase," pl. "ḥasen," status emphaticus "ḥasaya" [the pious; this explanation was suggested by De Sacy and adopted by Ewald, Wellhausen, and Schürer]; from the Aramaic "asa" [= "to heal," or "the healers"; so Bellermann, Herzfeld, Geiger]; from "'asah" [= "to do," with reference to the "'anshe ma'aseh," the men of wondrous practise: Suk. v. 4]; from a town by the obscure name of "Essa" [Josephus, "Ant." xiii. 15, § 3; so Hilgenfeld]; from "ḥaza" [= "to see," "seers"]; from "'ashen" [= "strong"]; from "seḥa" [= "to bathe"; so Graetz]):

A branch of the Pharisees who conformed to the most rigid rules of Levitical purity while aspiring to the highest degree of holiness. They lived solely by the work of their hands and in a state of communism, devoted their time to study and devotion and to the practise of benevolence, and refrained as far as feasible from conjugal intercourse and sensual pleasures, in order to be initiated into the highest mysteries of heaven and cause the expected Messianic time to come ('Ab. Zarah ix. 15; Luke ii. 25, 38; xxiii. 51). The strangest reports were spread about this mysterious class of Jews. Pliny (*l.c.*), speaking of the Essene community in the neighborhood of the Dead Sea, calls it the marvel of the world, and characterizes it as a race continuing its existence for thousands of centuries without either wives and children, or money for support, and with only the palm-trees for companions in its retreat from the storms of the world. Philo, who calls the Essenes "the holy ones," after the Greek ὅσιοι, says in one place (as quoted by Eusebius, "Præparatio Evangelica," viii. 11) that ten thousand of them had been initiated by Moses into the mysteries of the sect, which, consisting of men of advanced years having neither wives nor children, practised the virtues of love and holiness and inhabited many cities and villages of Judea, living in communism as tillers of the soil or as mechanics according to common rules of simplicity and abstinence. In another passage ("Quod Omnis Probus Liber," 12 *et seq.*) he speaks of only four thousand Essenes, who lived as farmers and artisans apart from the cities and in a perfect state of communism, and who condemned slavery, avoided sacrifice, abstained from swearing, strove for holiness, and were particularly scrupulous regarding the Sabbath, which day was devoted to the reading and allegorical interpretation of the Law. Josephus ("Ant." xv. 10, § 4; xviii. 1, § 5; "B. J." ii. 8, §§ 2–13) describes them partly as a philosophical school like the Pythagoreans, and mystifies the reader by representing them as a kind of monastic order with semi-pagan rites. Accordingly, the strangest theories have been advanced by non-Jewish writers, men like Zeller, Hilgenfeld, and Schürer, who found in Essenism a mixture of Jewish and pagan ideas and customs, taking it for granted that a class of Jews of this kind could have existed for centuries without leaving a trace in rabbinical literature, and, besides, ignoring the fact that Josephus describes the Pharisees and Sadducees also as philosophical schools after Greek models.

The Essenes in History.

The Essenes, as they appear in history, were far from being either philosophers or recluses. They were, says Josephus ("Ant." xv. 10, §§ 4–5), regarded by King Herod as endowed with higher powers, and their principle of avoiding taking an oath was not infringed upon. Herod's favor was due to the fact that Menahem, one of their number who, excelling in virtuous conduct and preaching righteousness, piety, and love for humanity, possessed the divine gift of prophecy, had predicted Herod's rise to royalty. Whether Sameas and Pollio, the leaders of the academy (Abot i. 11), who also refused to take an oath ("Ant." xv. 10, § 4), belonged to the Essenes, is not clear. Menahem is known in rabbinical literature as a predecessor of Shammai (Ḥag. ii. 2). Of Judas the Essene Josephus relates ("Ant." xiii. 11, § 2; "B. J." i. 3, § 5) that he once sat in the Temple surrounded by his disciples, whom he initiated into the (apocalyptic) art of foretelling the future, when Antigonus passed by. Judas prophesied a sudden death for him, and after a while his prediction came true, like every other one he made. A similar prophecy is ascribed to Simon the Essene ("Ant." xvii. 13, § 3; "B. J." ii. 7, § 4), who is possibly identical with the Simon in Luke ii. 25. Add to these John the Essene, a general in the time of the Roman war ("B. J." ii. 20, § 4; iii. 2, § 1), and it becomes clear that the Essenes, or at least many of them, were men of intense patriotic sentiment; it is probable that from their ranks emanated much of the apocalyptic literature. Of one only, by the name of Banus (probably one of the Banna'im; see below), does Josephus ("Vita," § 2) relate that he led the life of a hermit and ascetic, maintaining by frequent ablutions a high state of holiness; he probably, however, had other imitators besides Josephus.

Origin of the Essenes.

To arrive at a better understanding of the Essenes, the start must be made from the Ḥasidim of the pre-Maccabean time (I Macc. ii. 42, vii. 13; II Macc. xiv. 6), of whom both the Pharisees and the Essenes are offshoots (Wellhausen, "Israelitische und Jüdische Geschichte," 1894, p. 261). Such "overrighteous ones," who would not bring voluntary sacrifices nor take an oath, are alluded to in Eccl. vii. 16, ix. 2, while the avoidance of marriage by the pious seems to be alluded to in Wisdom iii. 13–iv. 1 (comp. II Macc. xiv. 6, 25). The avoidance of swearing became also to a certain extent a Pharisaic rule based on Ex. xx. 7 (see Targ.; Ned. 8b; Yer. Ned. iii. 38a; Soṭah 9b; Ber. 33a); and the rule (Matt. v. 37, R. V.) "Let your speech be, Yea, yea; Nay, nay," is also Talmudic (B. M. 49a). As a matter of fact, the line of distinction between Pharisees ("Perushim") and Essenes was never very clearly drawn (see "Perishut" in Abot iii. 13; Soṭah iii. 4, xi. 15; Tosef., Soṭah, xv. 11; Ṭoh. iv. 12; B. B. 60b).

Thus the more than six thousand Pharisees who claimed to be "highly favored by God" and to possess by "divine inspiration foreknowledge of things to come," and who refused to take an oath of fealty to Herod, predicting his downfall while promising children to Bagoas, the eunuch (Josephus, "Ant." xvii. 2, § 4), were scarcely different from those elsewhere called "Essenes" ("Ant." xv. 10, § 4).

"The Ancient Ḥasidim."

About the organization of the ancient Ḥasidim little is known; but each Pharisee had to be admitted by certain rites to membership in the association ("ḥeber" or "ḥaburah"), receiving the name "ḥaber" therefrom (Dem. ii. 3; Tosef., Dem. ii. 2; Bek. 30b); these fraternities assembled not only for worship but also for meals (see Geiger, "Urschrift," pp. 122 *et seq.*). The Pharisaic and Essene system of organization appears to have been at the outset the same, a fact which implies a common origin. A remnant of this Ḥasidean brotherhood seems to have been the "Neḳiyye ha-Da‘at" (the pure-minded) of Jerusalem, who would neither sit at the table or in court, nor sign a document, with persons not of their own circle (Giṭ. ix. 8; Sanh. 23a). They paid special reverence to the scroll of the Law in the synagogue (Masseket Soferim, xiv. 14).

But tradition has preserved certain peculiarities of these "ancient Ḥasidim" (Ḥasidim ha-rishonim) which cast some light on their mode of life. (1) In order to render their prayer a real communion with God as their Father in heaven, they spent an hour in silent meditation before offering their morning prayer (comp. Didascalia in Jew. Encyc. iv. 593), and neither the duty of saluting the king nor imminent peril, as, for instance, from a serpent close to their heels, could cause them to interrupt their prayer (Ber. v. 1; Tosef., Ber. iii. 20; Ber. 32b). (2) They were so scrupulous regarding the observance of the Sabbath that they refrained from sexual intercourse on all days of the week except Wednesday, lest in accordance with their singular calculation of the time of pregnancy the birth of a child might take place on a Sabbath and thereby cause the violation of the sacred day (Niddah 38a, b). Peril of life could not induce them to wage even a war of defense on the Sabbath (I Macc. ii. 38; II Macc. v. 25, xv. 4). (3) They guarded against the very possibility of being the indirect cause of injuring their fellow men through carelessness (Tosef., B. Ḳ. ii. 6; B. Ḳ. 30a, 50b; comp. Giṭ. 7a: "No injury is ever caused through the righteous"). (4) Their scrupulousness concerning "ẓiẓit" (Men. 40b) is probably only one instance of their strict observance of all the commandments. (5) Through their solicitude to avoid sin (whence also their name "Yire'e Ḥeṭ" = "fearers of sin": Sheḳ. vi. 6; Soṭah ix. 15) they had no occasion for bringing sin-offerings, wherefore, according to R. Judah, they made Nazarite vows to enable them to bring offerings of their own; according to R. Simeon, however, they refrained from bringing such offerings, as they were understood by them to be "an atoning sacrifice for the sins committed against the soul" (Num. vi. 11, Hebr.). This aversion to the Nazarite vow seems to have been the prevailing attitude, as it was shared by Simeon the Just (Sifre, Num. 22; Ned. 10a). (6) Especially rigorous were they in regard to Levitical purity (‘Eduy. viii. 4; Tosef., Oh. iv. 6, 13, where "zeḳenim ha-rishonim" [the ancient elders] is only another name for "Ḥasidim ha-rishonim"; see Weiss, "Dor," i. 110); they were particularly careful that women in the menstrual state should keep apart from the household, perform no household duties, and avoid attractiveness in appearance (Sifra, Meẓora‘, end; Shab. 64b; Ab. R. N. ii.; "Baraita di Masseket Niddah," in Horowitz's "Uralte Tosefta," 1890, i. 5, p. 16, iii. 2–3, pp. 24–27; "Pitḥe Niddah," pp. 54 *et seq.*). (7) This, however, forms only part of the general Ḥasidean rule, which was to observe the same degree of Levitical purity as did the priest who partook of the holy things of the Temple ("okel ḥullin be-ṭohorat ḳodesh"); and there were three or four degrees of holiness, of which the Pharisees, or "ḥaberim," observed only the first, the Ḥasidim the higher ones (Ḥag. ii. 6–7; Tosef., Dem. ii. 2). The reason for the observance of such a high degree of holiness must be sought in the fact that Levites who ate "ma‘aser" and priests who ate "terumah" and portions of the various sacrifices had their meals in common with the rest of the people and had to be guarded against defilement.

Upon the observance of the highest state of purity and holiness depended also the granting of the privilege, accorded only to the élite of the priesthood, of being initiated into the mysteries of the Holy

The "Zenu'im," or Chaste Ones.

Name and other secret lore. "The Name of twelve letters [see God, Names of] was, after the Hellenistic apostasy, entrusted only to the 'Ẓenu'im' [the chaste ones] among the priesthood. The Name of forty-two letters was entrusted only to the 'Ẓanua'' and ''Anaw' [the chaste and the humble] after they had passed the zenith of life and had given assurance of preserving it [the Name] in perfect purity" (Ḳid. 71a; Eccl. R. iii. 11; Yer. Yoma 39d, 40a). There was a twofold principle underlying the necessity of perfect chastity. When God revealed Himself to Moses and to the people of Israel they were enjoined to abstain from sexual intercourse, Israel for the time being, Moses for all time (Shab. 87a; Pes. 87b; Ab. R. N. ii., based upon Ex. xix. 15; Deut. v. 27). Those in hope of a divine revelation consequently refrained from sexual intercourse as well as other impurity (comp. Rev. xiv. 4; Enoch, lxxxiii. 2).

But there was another test of chastity which seems to have been the chief reason for the name of "Ẓenu'im" (Essenes): the Law (Deut. xxiii. 10-15; comp. Targ. Yer. *ad loc.*; Sifra, 258; Ber. 62a) enjoins modesty in regard to the covering of the body lest the Shekinah be driven away by immodest exposure. Prayer was prohibited in presence of the nude (Ber. 24b), and according to the Book of Jubilees (iii. 30 *et seq.*, vii. 20) it was a law given to Adam and Noah "not to uncover as the Gentiles do." The chastity ("ẓeni'ut") shown in this respect by King Saul and his daughter (I Sam. xxiv. 4; II Sam. vi. 16) gave him and his household a place in rabbinical tradition as typical Essenes, who would also observe the law of holiness regarding diet and distribute their wealth among the (poor) people (Pesiḳ. R. 15; Midr. Teh. vii.; Num. R. xi.; Meg. 13b; Yer. Suk. v. 55c). Every devotee of the Law was expected to be a "ẓanua'" (Abot vi. 1; Niddah 12a; Derek Ereẓ Zuṭa vii.), such as were Rachel and Esther (Meg. 13b), Ḥanan ha-Neḥba, the grandson of Onias the Saint (Ta'an. 23b), R. Akiba (Ket. 62b), and Judah ha-Nasi (Yer. Meg. i. 72b).

The "Hashsha'im," or Secret Ones.

The name "Ẓenu'im," which is replaced or explained by "Kesherim" (the blameless ones), another name for "Ḥasidim" (Yer. Dem. vi. 25d; Yer. Yoma iii. 40d; comp. Tosef., Dem. vi. 6; Ned. i. 1; Ab. R. N., text B, iv., ed. Schechter, p. 14, and comp. note on p. 15), is also applied, like the term "Ḥashsha'im" (see below), to those reticent ones to whom a secret may be confided; *e.g.*, secret scrolls concerning the Temple service were entrusted to them (Tosef., Yoma, ii. 7; Yer. Yoma iii. 41a). It is not always clear, however, whether the name denotes the Essenes or simply the modest ones as a class (see Dem. vi. 6; Ma'as. Sh. v. 1; Tosef., Soṭah, xiii. 6). R. Simeon the Ẓanua', who, while disregarding the Temple practise, shows a certain contempt for the high priest (Tosef., Kelim B. B. i. 6), appears on all accounts to have been an Essene priest. In an old Armenian version of Philo's dictionary of Hebrew names "Essene" is explained as "in silence" (Philo, "De Vita Contemplativa," ed. Conybeare, p. 247). The suggestion may be made that the Ḥashsha'im, "the observers of secrecy," designated also "the sin-fearing," who "had a chamber called 'lishkat ḥashsha'im' in the Temple, where they deposited their gifts of charity in secret and whence the respectable poor drew their support in secrecy," were the same Essenes from whom "the Gate of the Essenes" in Jerusalem (Josephus, "B. J." v. 42) derived its name. According to Tosef., Sheḳ. ii. 16, these Ḥashsha'im had in every city a special chamber for their charity-box, so that money could be deposited and taken in secret, a thing that could only be done upon the presumption that the money belonged to all alike; and since each city had its administrative body consisting of its best men, who took charge of the collection and distribution of charity (Tosef., Peah, iv. 6, 16; Tosef., Sheb. vii. 9), it is probable that these Essene-like ascetics ("Ẓenu'im": Tosef., Peah, ii. 18) followed their own traditions, though they probably also came under the general administration.

The explanation of 'Εσσάιοι given by Suidas (= θεωρήτικοι = "men of contemplation," or "mystics") suggests that the name "Ḥashsha'im," like "Ẓenu'im," denoted men entrusted with the secret lore "given in a whisper" (Ḥag. 13a, 14a; Gen. R. iii.).

"Watikim" and "Holy Ones."

Another name denoting a class of pietistic extremists showing points of contact with the Essenes is "Watiḳim" (men of firm principles: Sifre, Num. 92; Sifre, Deut. 13; Müller, "Masseket Soferim," 1878, p. 257, who identifies them with the Essenes). "The Watiḳim so arranged their morning prayer as to finish the Shema' exactly at the time when the sun came out in radiance" (Ber. 9b; comp. Wisdom xvi. 28; II Macc. x. 28); the Watiḳim closed the prayers "Malkiyyot, Shofarot" and "Zikronot" with Pentateuch verses (R. H. 32b). As holders of ancient traditions, they placed their own custom above the universally accepted halakah (Masseket Soferim, xiv. 18). Still another name which deserves special consideration is "ḳadosh" (saint). "Such is he called who sanctifies himself, like the 'Nazir,' by abstaining from enjoyments otherwise permissible" (Ta'an. 11a, b; Yeb. 20a; comp. Niddah 12a, where the word "Ẓanu'a" is used instead). Menahem bar Simai is called "son of the saints" because he would not even look at a coin which bore the image of the emperor or pass under the shadow of an idol (Pes. 104a; Yer. 'Ab. Zarah iii. 42c, 43b, where he is called "Nahum, the most holy one"). In Jerusalem there existed down to the second century a community by the name of "The Holy Congregation" ('Edah Ḳedoshah, or Ḳehala Ḳaddisha), which insisted on each member practising a trade and devoting a third part of the day to the study of the Torah, a third to devotion, and a third to work: probably a survival of an Essene community (Eccl. R. ix. 9; Ber. 9b; Tamid 27b).

In this connection mention should also be made of the "Banna'im" (builders: Miḳ. ix. 6; Shab. 114a), whom Frankel ("Zeitschrift für die Religiösen Interessen des Judenthums," 1846, p. 455) with great plausibility identifies with the Essenes. Originally applied to a gild of builders belonging to the Essenes (see "Polistes," below; comp. Abba Ḳolon "the Builder," Cant. R. i. 6; Abba Joseph the Builder, Ex. R. xiii.; the "Bannai" [Builder] in the company of R. Gamaliel, who was to hide in the walls the Targum to Job, Tosef., Shab. xiii. 2), their name was given the meaning of builders of a higher world and afterward applied to the Rabbis in general (Ber. 64a; Yer. Yoma iii. 40; Yer. Giṭ. vii. 48d; Ex. R. xxiii.; comp. *οἰκοδομεῖν* in the "Didascalia" and the Pauline writings). Each hermit built his house himself; hence the names "Banus" and "Bannaia," adopted by men whose type was the legendary Benaiah ben Jehoiada (Ber. 4a; 18a, b).

Survivals of the Hasidim.

The name of the Ḥasidim of olden times is coupled with that of the "Anshe Ma'aseh" (men of miraculous deeds: Suk. v. 4), a fact which shows that both belonged to the same class. Ḥanina b. Dosa is called the last of "the miracle-workers" (Soṭah ix. 15). But the Ḥasidim remained wonder-workers in Talmudic times (Ber. 18b; Lev. R. xxii., where "ish ha-ma'aseh" is translated into "'asḳan bi-debarim"). In fact, there existed books containing miraculous stories of the Ḥasidim, a considerable number of which were adopted by Talmud and Midrash (see Eccl. R. ix. 10), just as there existed secret scrolls ("Megillot Setarim") and ethical rules of the Ḥasidim ("Mishnat" or "Megillat Ḥasidim") to which allusion is made here and there in the Talmud (Yer. Ter. viii. 46b; Yer. Ber. ix. 14d), and the contents of which have found their way into the pseudepigraphic and early non-Talmudic literature (see Horowitz, *l.c.*). The Ḥasidim mentioned in old baraitas like Temurah (15b) and Soṭah (ix. 15), and in Abot de-Rabbi Natan (viii.), who spent their time on works of charity, are none other but survivals of the ancient Ḥasidim. The Ḥasidean traditions may, therefore, be traced from Jose ben Joezer, the martyr-saint and Ḥasidean leader of the Maccabean time (II Macc. xiv. 37, where "Razis" is a corruption of the name; Gen. R. lxv.; Frankel, in "Monatsschrift," lii. 406 [1851], down to Phinehas b. Jair, who was both in theory and in practise a disciple of the Ḥasidim (see Bacher, "Ag. Tan." ii. 594 *et seq.*); indeed, there is little in Essene life which does not find its explanation in rabbinical sources.

Viewed in the light of these facts, the description of the Essenes given by Philo and Josephus will be better understood and appreciated. Philo describes them in his earlier work, "Quod Omnis Probus Liber," § 12, as

Philo's Account of the Essenes.

> "a number of men living in Syria and Palestine, over 4,000 according to my judgment, called 'Essæi' (ὅσιοι) from their saintliness (though not exactly after the meaning of the Greek language), they being eminently worshipers of God (θεραπευταὶ Θεοῦ)—not in the sense that they sacrifice living animals (like the priests in the Temple), but that they are anxious to keep their minds in a priestly state of holiness. They prefer to live in villages and avoid cities on account of the habitual wickedness of those who inhabit them, knowing, as they do, that just as foul air breeds disease, so there is danger of contracting an incurable disease of the soul from such bad associations" (comp. Ex. R. xii.: "Moses should not pray to God in a city full of idols").

This fear of contamination is given a different meaning by Philo ("De Vita Contemplativa," ed. Conybeare, pp. 53, 206). Speaking of their occupations, he says:

> "Some cultivate the soil, others pursue peaceful arts, toiling only for the provision of their necessary wants. . . . Among all men they alone are without money and without possession, but nevertheless they are the richest of all, because to have few wants and live frugally they regard as riches [comp. Abot iv. 1: "Who is rich? Who is contented with his lot? for it is said: 'When thou eatest the labor of thy hands happy art thou and it shall be well with thee'" (Ps. cxxviii. 2, Hebr.)]. Among them there is no maker of any weapon of war [comp. Shab. vi. 4], nor any trader, whether huckster or dealer in large merchandise on land or sea, nor do they follow any occupation that leads to injustice or to covetousness" (comp. Ḳid. iv. 11; Tosef., Ḳid. v. 15; Masseket Soferim, xv. 10; all these passages being evidences of the same spirit pervading the Pharisaic schools).
>
> "There is not a single slave among them, but they are all free, serving one another; they condemn masters, not only as representing a principle of unrighteousness in opposition to that of equality, but as personifications of wickedness in that they violate the law of nature which made us all brethren, created alike." [This means that, so far from keeping slaves, the Essenes, or Ḥasidim, made it their special object to ransom captives (see Ab. R. N. viii.; Ta'an. 22a; Ḥul. 7a); they emancipated slaves and taught them the Law, which says: "They are My servants (Lev. xxv. 42), but should not be servants of servants, and should not wear the yoke of flesh and blood" (Targ. Yer. to Deut. xxiii. 16–17; Tosef., B. Ḳ. vii. 5; Ḳid. 22b.; comp. 38b; Abot i. 10: "Hate mastership!" Abot vi. 2. In regard to their practise of mutual service comp. Ḳid. 32b; Luke xxii. 27; John xiii. 1 *et seq.*).]

Study of the Law.

> "Of natural philosophy . . . they study only that which pertains to the existence of God and the beginning of all things ["ma'ase merkabah" and "ma'aseh bereshit"], otherwise they devote all their attention to ethics, using as instructors the laws of their fathers, which, without the outpouring of the divine spirit ["ruaḥ ha-ḳodesh"], the human mind could not have devised. These are especially taught on the seventh day, when, abstaining from all other work, they assemble in their holy places, called synagogues, sitting in rows according to their age, the younger ones listening with becoming attention at the feet of the elder ones. One takes up the holy book and reads aloud, another one from among the most learned comes forward and explains whatever may not have been understood—for, following their ancient traditions, they obtain their philosophy by means of allegorical interpretation" (comp. the name of "doreshe reshumot," allegorists, B. Ḳ. 82a).
>
> "Thus they are taught piety, holiness, righteousness, the mode of governing private and social affairs, and the knowledge of what is conducive or harmful or indifferent to truth, so that they may choose the one and shun the other, their main rule and maxim being a threefold one: love of God, love of manhood (self-control), and love of man. Of the love of God they exhibit myriads of examples, inasmuch as they strive for a continued, uninterrupted life of purity and holiness; they avoid swearing and falsehood, and they declare that God causes only good and no evil whatsoever [comp. "kol de-'abed Raḥmana le-ṭab 'abed," "What the Merciful does is for the good," Ber. 60b]. Their love of virtue is proved by their freedom from love of money, of high station, and of pleasure, by their temperance and endurance, by their having few wants, by their simplicity and mild temper, by their lack of pride, by their obedience to the Law, by their equanimity, and the like. Of their love for man they give proof by their good will and pleasant conduct toward all alike [comp. Abot i. 15, iii. 12: "Receive every man with a pleasant countenance!"], and by their fellowship, which is beautiful beyond description.

Their Communism.

> "No one possesses a house absolutely his own, one which does not at the same time belong to all; for in addition to living together in companies ["ḥaburot"] their houses are open also to their adherents coming from other quarters [comp. Abot i. 5]. They have one storehouse for all, and the same diet; their garments belong to all in common, and their meals are taken in common. . . . Whatever they receive for their wages after having worked the whole day they do not keep as their own, but bring into the common treasury for the use of all; nor do they neglect the sick who are unable to contribute their share, as they have in their treasury ample means to offer relief to those in need. [One of the two Ḥasidean and rabbinical terms for renouncing all claim to one's property in order to deliver it over to common use is "hefker" (declaring a thing ownerless; comp. Sanh. 49a); Joab, as the type of an Essene, made his house like the wilderness—that is, ownerless and free from the very possibility of tempting men to theft and sexual sin—and he supported the poor of the city with the most delicate food. Similarly, King Saul declared his whole property free for use in warfare (Yalḳ.,

Sam. i. 138). The other term is "heḳdesh nekasim" (consecrating one's goods; comp. 'Ar. vi.; Pes. 57: "The owners of the mulberry-trees consecrated them to God"; Ta'an. 24a: "Eliezer of Beeroth consecrated to charity the money intended for his daughter's dowry, saying to his daughter, 'Thou shalt have no more claim upon it than any of the poor in Israel.'" Jose ben Joezer, because he had an unworthy son, consecrated his goods to God (B. B. 133b). Formerly men used to take all they had and give it to the poor (Luke xviii. 22); in Usha the rabbis decreed that no one should give away more than the fifth part of his property ('Ar. 28a; Tosef., 'Ar. iv. 23; Ket. 50a).] They pay respect and honor to, and bestow care upon, their elders, acting toward them as children act toward their parents, and supporting them unstintingly by their handiwork and in other ways" (comp. B. M. ii. 11).

Not even the most cruel tyrants, continues Philo, possibly with reference to King Herod, have ever been able to bring any charge against these holy Essenes, but all have been compelled to regard them as truly free men. In Philo's larger work on the Jews, of which only fragments have been preserved in Eusebius' "Præparatio Evangelica" (viii.), the following description of the Essenes is given (ch. xi.):

The Essenes Advanced in Years.

"Our lawgiver, Moses, has trained thousands of disciples who, on account of their saintliness, I believe, are honored with the name of Essæi. They inhabit many cities and villages, and large and populous quarters of Judea. Their institution is not based upon family connections, which are not matters of free choice, but upon zeal for virtue and philanthropy. There exist no new-born children, and no youth just entering upon manhood, in the Essene community, since the dispositions of such youth are unstable on account of their immaturity; but all are full-grown men, already declining toward old age [compare the meaning of "zeḳenim"], such as are no longer carried away by the vehemence of the flesh nor under the influence of their passions, but are in the enjoyment of genuine and true liberty." [This is the most essential feature of Essenism (comp. Pliny, *l.c.*), and has been almost entirely ignored. The divine command to marry and preserve the race is supposed to have been obeyed by every young man before the close of his twentieth year (Ḳid. 29b), and he has not discharged his obligation until he has been the father of at least two children, two sons according to the Shammaites, according to the Hillelites one son and one daughter (Yeb. vi. 6). It was therefore only at an advanced age that it was considered an act of extreme piety "to leave children, wife, and friends behind in order to lead a life of contemplation in solitude" (Philo, "De Vita Contemplativa," ed. Conybeare, p. 49).]

Philo says here also that the Essenes have no property of their own, not house or slave or farm, nor flocks and herds, but hold in common everything they have or obtain; that they either pursue agriculture, or tend to their sheep and cattle, or beehives, or practise some handicraft. Their earnings, he continues, are given in charge of an elected steward, who at once buys the food for their meals and whatever is necessary for life. Every day they have their meals together; they are contented with the same food because they love frugality and despise extravagance as a disease of body and soul. They also have their dress in common, a thick cloak in winter and a light mantle in summer, each one being allowed to take whichever he chooses. If any one be sick, he is cured by medcines from the common stock, receiving the care of all. Old men, if they happen to be childless, end their lives as if they were blessed with many and well-trained children, and in the most happy state, being treated with a respect which springs from spontaneous attachment rather than from kinship. Especially do they reject that which would dissolve their fellowship, namely, marriage, while they practise continence in an eminent degree, for no one of the Essæi takes a wife. (What follows regarding the character of women probably reflects the misogynous opinion of the writer, not of the Essenes.) Philo concludes with a repetition of the remark that mighty kings have admired and venerated these men and conferred honors upon them.

Josephus' Account.

In his "Antiquities" (xiii. 5, § 9), Josephus speaks of the Essenes as a sect which had existed in the time of the Maccabees, contemporaneously with the Pharisees and Sadducees, and which teaches that all things are determined by destiny (*εἱμαρμένη*), and that nothing befalls men which has not been foreordained; whereas the Pharisees make allowance for free will, and the Sadducees deny destiny altogether. This refers not so much to the more or less absolute belief in Providence (comp. the saying, "Ha-kol bi-yede shamayim" = "All is in the hands of God": Ket. 30a; Ber. 33b; and R. Akiba's words, "Everything is foreseen, but free will is given," Abot iii. 15), which the Sadducees scarcely denied, as to the foreknowledge of future (political) events, which the Essenes claimed (comp. Josephus, "Ant." xv. 10, § 5, *et al.*); the Pharisees were more discreet, and the Sadducees treated such prophecies with contempt. In "Ant." xviii. 1, §§ 2–6, Josephus dwells at somewhat greater length on what he assumes to be the three Jewish philosophical schools. Of the Essenes he says that they ascribe all things to God, that they teach the immortality of the soul, and that the reward of righteousness must be fought for (by martyrdom).

"When they send gifts to the Temple they do not offer sacrifices because of the different degrees of purity and holiness they claim; therefore they keep themselves away from the common court of the Temple and bring offerings [vegetable sacrifices] of their own. [This certainly does not mean that they opposed animal sacrifices on principle, but that they brought no free-will offerings for reasons of their own; see above.] They excel all men in conduct, and devote themselves altogether to agriculture. Especially admirable is their practise of righteousness, which, while the like may have existed among Greeks or barbarians for a little while, has been kept up by them from ancient days [ἐκ παλαιοῦ]; for they, like the Spartans of old and others, have still all things in common, and a rich man has no more enjoyment of his property than he who never possessed anything. There are about 4,000 men who live in such manner. They neither marry, nor do they desire to keep slaves, as they think the latter practise leads to injustice [comp. Abot ii. 7: "Many men servants, much theft"], and the former brings about quarrels; but, living to themselves, they serve one another. They elect good men ["ṭobim"; see CHARITY] to receive the wages of their labor and the produce of the soil, and priests for the preparation [consecration?] of their bread and meat. They all live alike, and resemble most the [holy unmarried] city-builders [pioneers] of the Dacæ" (comp. Strabo, vii. 33).

The chief information concerning the Essenes is given in "De Bello Judaico" (ii. 8, §§ 2–13). But this account seems to have been taken from another source and worked over, as the description preserved in Hippolytus' "Refutatio Omnium Hæresium" (ix. 18–28) presents a version which, unobserved by most writers, differs in many respects from that of Josephus, being far more genuinely Jewish, and showing greater accuracy in detail and none of the coloring peculiar to Josephus (see Duncker's ed., Göttingen, 1859, p. 472, note). The following is Hippolytus' version, the variations in Josephus' being indicated by brackets with the letter J:

Hippolytus' Description Compared with Josephus'.

"There are three divisions [sects, *αἱρετίσται* = "philosophical divisions"] among them [the Jews]: the Pharisees and Sadducees and the Essenes. These [last] practise a holier life [J: "Jews by birth"] in their display of love for one another and of continence [comp. Ẓenu'im, above]; they abstain from every act of covetousness [J: "pleasure as an evil deed"] and avoid even listening to conversation concerning such things. They renounce matrimony, but they take children of strangers [J: "when they are still easily instructed"; but comp. Abraham in Gen. R. xxxix. and Targ. Yer. to Deut. xxiii. 17], and treat them as their own, training them in their own customs; but they do not forbid them to marry. Women, however, though they may be inclined to join the same mode of life, they do not admit, as they by no means place the same confidence in women." [This refers simply to questions of Levitical holiness and to the mysteries entrusted to the Ẓenu'im. Josephus has this sentence twisted into the following crude and unjust statement: "They do not forbid marriage and the procreation of children, but they guard against the lasciviousness of women and are persuaded that none preserves fidelity to one man."] Hippolytus continues: "They despise wealth, and do not refrain from sharing what they have with those in need; in fact, none among them is richer than the other; for the law with them is that whosoever joins their order must sell his possessions and hand the proceeds over to the common stock [Josephus adds here remarks of his own]; and the head [archon] distributes it to all according to their need. The overseers who provide for the common wants are elected by them. They do not use oil, as they regard anointing as a defilement, probably from fear that the oil was not kept perfectly pure. They always dress in white garments" (comp. Eccl. ix. 8).

Essenes Travel Constantly.

"They have no special city of their own, but live in large numbers in different cities, and if any of their followers comes from a strange city everything they have is considered as belonging equally to the newcomer; those who were never known before are received as kindred and friends." "They traverse their native land [as "sheluḥe miẓwah," sent for charitable and for politico-religious purposes (comp. APOSTLES)], and whenever they go on a journey they carry nothing except arms. They find in every city an administrator of the collective funds, who procures clothing and food for them.

Prayers and Meals.

"Their way of dressing and their general appearance are decorous; but they possess neither two cloaks nor two pairs of shoes [comp. Matt. x. 10, and parallels]. At early dawn they rise for devotion and prayer, and speak not a word to one another until they have praised God in hymns. [Josephus has here: "They speak not a word about profane things before the rising of the sun, but they offer up the prayers they have received from their fathers facing the sun as if praying for its rising"; comp. the Watiḳim, above.] Thus they go forth, each to his work until the fifth hour, when, having put on linen aprons to conceal their privy parts [comp. Ber. 24b], they bathe in cold water and then proceed to breakfast, none being allowed to enter the house who does not share their view or mode of holiness [see Ḥag. iii. 2]. Then, having taken their seats in order amid silence, each takes a sufficient portion of bread and some additional food; but none eats before the benediction has been offered by the priest, who also recites the grace after the meal; both at the beginning and at the close they praise God in hymns [comp. Ber. 21a, 35a, in regard to the saying of grace; see M. Ḳ. 28b; Meg. 28a]. After this they lay aside their sacred linen garments used at their meal, put on their working garments left in the vestibule, and betake themselves to their labor until the evening, when they take supper.

The Law and the Prophets.

"There are no loud noise and vociferation heard [at their assembly]; they speak gently and allow the discourse to flow with grace and dignity, so that the stillness within impresses outsiders with a sense of mystery. They observe sobriety and moderation in eating and drinking. All pay due attention to the president, and whatever he orders they obey as law. Especial zeal they manifest in offering sympathy and succor to those in distress. [Josephus here adds a sentence of his own.] Above all they refrain from all forms of passion and anger as leading to mischief [see ANGER]. No one among them swears; a word is regarded as more binding than an oath; and one who swears is despised as one not deserving of confidence. They are very solicitous in regard to the reading aloud of the Law and the Prophets [J: "the writings of the ancient ones"], and of any [apocalyptic?] scroll they have of the Faithful Ones [comp. Tan., Wa'era, ed. Buber, 4; and ESCHATOLOGY; J: "and they select such as are for the salvation of soul and body"]. Especially do they investigate the magic powers of plants and stones [comp. Wisdom vii. 20].

"To those desirous of becoming disciples they do not deliver their traditions [παραδόσεις; comp. CABALA] until they have tested them. Accordingly they set before the aspirant the same kind of food, outside the main hall, where he remains for a whole year after having received a mattock, a linen apron, and a white robe [as symbols of Ẓeni'ut (Essene, modesty and purity)]. After having given proof of self-control during this period, he is advanced and his ablutions are of a higher degree of purity, but he is not allowed to partake of the common meal until, after a trial of two years more, he has proved worthy to be admitted into membership. Then oaths of an awful character are administered to him: he swears to treat with reverence whatever is related to the Divinity [compare BLASPHEMY and GOD, NAMES OF]; that he will observe righteousness toward men and do injustice to none; that he will not hate any one who has done him injustice, but will pray for his enemies [comp. Matt. v. 45]; that he will always side with the righteous in their contests [this proves, if anything, that the Essenes were fighters rather than mere quietists]; that he will show fidelity to all and particularly to those in authority; for, say they, without God's decree no one is given power to rule [this refers not to political rulers, as has been claimed with reference to "Ant." xv. 10, § 5, but to the head of the order, whose election is not made without the guidance of the Holy Spirit (Sifre, Num. 92; Ber. 58a, "min ha-shamayim"; comp. DIDASCALIA, IN JEW. ENCYC. iv. 590a)]; that, if himself appointed to be ruler, he will not abuse his authority, nor refuse to submit to the rules, nor ornament himself beyond what is customary; that he will ever love the truth and reprove him who is guilty of falsehood; that he will neither steal nor pollute his conscience for the sake of gain; that he will neither conceal anything from the members of the order nor disclose anything to outsiders, even though tortured to death. He swears besides that he will not communicate the doctrines differently from the manner in which he received them himself. [Here Josephus has two conditions omitted in Hippolytus: "that he will abstain from robbery" (which in this connection probably refers to the teachings which might be misappropriated and claimed for oneself; the rabbinical rule, which has, therefore, an Essene coloring, being: "He who tells a saying in the name of the author brings about the redemption," Abot vi. 6, based upon Esth. ii. 22), and "that he will with equal care guard the books of the order and the names of the angels." These oaths give a better insight into the character and purpose of the Essene brotherhood than any other description, as will be shown later.]

Discipline of the Essene Order.

"If any of them be condemned for any transgression, he is expelled from the order, and at times such a one dies a terrible death [see ANATHEMA and DIDASCALIA], for inasmuch as he is bound by the oaths taken and by the rites adopted, he is no longer at liberty to partake of the food in use among others. [Here Josephus: "and being compelled to eat herbs, he famishes his body until he perishes."] Occasionally they pity those exposed to dissolution ["shammata"], considering punishment unto death sufficient. In their judicial decisions they are most accurate and just; they do not pass sentence unless in company with one hundred persons [this is possibly a combination of the higher court of seventy-two ("Sanhedrin gedolah") and the smaller court of twenty-three ("Sanhedrin ḳeṭannah")], and what has been decided by them is unalterable. After God they pay the highest homage to the legislator (that is to say, to the Law of Moses), and if any one is guilty of blasphemy against him (that is, against the Law), he is punished [J: "with death"]. They are taught to obey the rulers and elders [J: "the majority"].

Sabbath Observance.

"When ten [the number necessary to constitute a holy congregation; see MINYAN] sit together deliberating, no one speaks without permission of the rest [the rabbinical term is "reshut"; see the Talmudic dictionaries, *s.v.* רשות]. They avoid spitting into the midst of them [Ḥag. 5a; Ber. 62b], or toward the right [the right hand is used for swearing; see Brand, "Mandäische Religion," 1889, pp. 110 *et seq.*]. "In regard to Sabbath rest they are more scrupulous than other Jews, for they not only prepare their meals one day previously so as not to touch fire, but they do not even remove any utensil [rabbinical term, "muḳẓah"; see SABBATH]; nor do they turn aside to ease nature. Some do not even rise from their couch [comp. Targ. to Ex. xvi. 27; Mek., Beshallaḥ, 5], while on other days they observe the law in Deut. xxiii. 13. After the easement they wash themselves, considering the excrement as defiling [comp. Yoma iii. 3]. They are divided, according to their degree of holy exercises, into four classes."

The following paragraph, omitted by Josephus, is alluded to, in his "Ant." xviii. 1, § 6, as "the philosophy of a fourth sect founded by Judas the Galilean."

Zealots Also Essenes.

"For some of these observe a still more rigid practise in not handling or looking at a coin which has an image, nor will they even enter a city at the gates of which statues are erected [comp. Yer. 'Ab. Zarah iii. 42b, 43b]. Others again threaten to slay any Gentile taking part in a discourse about God and His Law if he refuses to be circumcised [comp. Sanh. 59a, Ex.

R. xxxiii.]. From this they were called 'Zealots' [Ḳanna'im] by some. 'Sicarii' by others. Others again will call no one lord except God, even though they be tortured or killed.

"Those of a lower degree of discipline [holiness] are so inferior to those of the higher degree that the latter at once undergo ablution when touched by the former, as if touched by a Gentile. [These are the four degrees of holiness mentioned in Ḥag. ii. 7: "ma'aser," "terumah," "ṭohorot," and "ḥaṭṭat," or "most holy." Another division is: *κοινόβια* = כנפים = "common meal," and "ṭohorot" = "priestly meal": Tosef., Dem. ii. 11.] Most of them enjoy longevity; many attain an age of more than a hundred years. They declare that this is owing to their extreme piety [comp. the frequent question: "Ba-meh ha'arakta yamim" (By what merit didst thou attain an old age? Meg. 27b, 28)] and to their constant exercise of self-control. [Josephus instead rationalizes.] They despise death, rejoicing when they can finish their course with a good conscience; they willingly undergo torment or death rather than speak ill of the Law or eat what has been offered to an idol." (Here Josephus adds something of his own experience in the Roman war.)

This leads Hippolytus, exactly as in the "Didascalia," to the Essene view of the future life, a view in which, contrary to the romantic picture given by Josephus, the belief in Resurrection is accentuated:

Essene View of Resurrection.

"Particularly firm is their doctrine of Resurrection; they believe that the flesh will rise again and then be immortal like the soul, which, they say, when separated from the body, enters a place of fragrant air and radiant light, there to enjoy rest – a place called by the Greeks who heard [of this doctrine] the 'Isles of the Blest.' But," continues the writer, in a passage characteristically omitted by Josephus, "there are other doctrines besides, which many Greeks have appropriated and given out as their own opinions. For their disciplinary life [ἄσκησις] in connection with the things divine is of greater antiquity than that of any other nation, so that it can be shown that all those who made assertions concerning God and Creation derived their principles from no other source than the Jewish legislation. [This refers to the Ḥasidean "ma'aseh merkabah" and "ma'aseh bereshit."] Among those who borrowed from the Essenes were especially Pythagoras and the Stoics; their disciples while returning from Egypt did likewise [this casts new light on Josephus' identification of the Essenes with the Pythagoreans: "Ant." xv. 10, § 4]; for they affirm that there will be a Judgment Day and a burning up of the world, and that the wicked will be eternally punished.

"Also prophecy and the foretelling of future events are practised by them. [Josephus has in addition: "For this purpose they are trained in the use of holy writings, in various rites of purification, and in prophetic (apocalyptic?) utterances; and they seldom make mistakes in their predictions."] Then there is a section of the Essenes who, while agreeing in their mode of life, differ in regard to marriage, declaring that those who abstain from marrying commit an awful crime, as it leads to the extinction of the human race. But they take wives only after having, during three years' observation of their course of life, been convinced of their power of child-bearing, and avoid intercourse during pregnancy, as they marry merely for the sake of offspring. The women when undergoing ablutions are arrayed in linen garments like the men in order not to expose their bodies to the light of day" (comp. Horwitz, "Baraita di Nidda," i. 2).

Purpose of the Essene Brotherhood.

A careful survey of all the facts here presented shows the Essenes to have been simply the rigorists among the Pharisees, whose constant fear of becoming contaminated by either social or sexual intercourse led them to lead an ascetic life, but whose insistence on maintaining the highest possible standard of purity and holiness had for its object to make them worthy of being participants of "the Holy Spirit," or recipients of divine revelations, and of being initiated into the mysteries of God and the future. "Wo to the wives of these men!" exclaimed Zipporah, the wife of Moses, when she heard that Eldad and Medad had become prophets, for this meant cessation of conjugal intercourse (Sifre, Num. 99). Abstinence from whatever may imply the use of unrighteous Mammon was another condition of initiation into the mystery of the Holy Name (Yer. Yoma iii. 40d; comp. Ḥul. 7b; Phinehas b. Jair; Midr. Teh. xxiv. 4, cxxviii. 2; Ḥul. 44b, with reference to Prov. xv. 27). The purpose of their ablutions before every meal as well as before morning prayers, which practise gave them the name of "Ṭobele Shaḥarit" (= Morning Baptists, Ἡμεροβαπτισταῖ), was to insure the pronunciation of the Name and the eating of holy things in a state of purity (Tosef., Yad. ii. 20; Ber. 2b, 22a). The existence of large numbers of Levites (Yeb. xv. 7) and Aaronites, the original teachers of the Law, whose holy food had to be eaten in holiness, was instrumental in the creation of a state of communism such as the Law prescribes for each seventh year (Peah vi. 1). Fear of defilement led Judas Maccabeus as Ḥasidean leader to live only on herbs (II Macc. v. 27).

A glance at the Essene oath of initiation confirms the statement of Philo that love of God, or reverence for His Name, love of man, or pursuit of righteousness and benevolence, and love of virtue, or humility and chastity, were the chief aims of the Essene brotherhood. Successors to the ancient Ḥasidim who instituted the liturgy (Midr. Teh. xvii. 4: "ḥasidim ha-rishonim"), they laid all possible stress on prayer and devotion, opposing the priesthood in the Temple out of mistrust as to their state of holiness and purity rather than out of aversion to sacrifice (Tosef., Ned. i. 1; Ker. 25a). They claimed to possess by tradition from the founders of the Synagogue ("anshe keneset ha-gedolah") the correct pronunciation and the magic spell of the Holy Name (Midr. Teh. xxxvi. 8, xci. 8), and with it they achieved miracles like the men of old (Midr. Teh. lxxviii. 12, xci. 2). They taught Jews and Gentiles alike to cleanse themselves in living streams from their impurity of sin, and return to God in repentance and prayer (Sibyllines, iv. 164; Luke iii. 3; comp. Tan., ed. Buber, Introduction, 153). Ever alert and restless while in hope of the Messianic time, they formed a strong political organization scattered through the Holy Land; and, in constant touch with one another, they traveled far and wide to organize Jewish communities and provide them with the three elements of Judaism: instruction, worship, and charity (Abot i. 2); and they were especially assiduous in pursuit of benevolent work (Ab. R. N. iii., viii.). Each community had its seven good men, called "the Good Brotherhood of the Town" (Ḥeber 'Ir be-Ṭobah: "Ant." iv. 8, § 14; Meg. 27a; Tosef., Peah, iv. 16; Sheb. vii. 9).

Standing under the direction of the "mishmar," or "ma'amad" (the district authority: Tosef., Peah, iv. 7), the Essenes claimed, as direct successors to the Ḥasidim, Mosaic origin for their brotherhood (see Philo and Josephus, *l.c.*, in reference to Ex. xviii. 21; comp. Targ. Yer.; B. M. 30b; Mek., Yitro, 2). Whatever their real connection with the RECHABITES (Jer. xxxv.) was, they beheld in Jonadab, the founder of the sect of the "Water-Drinkers," as well as in Jabez (I Chron. ii. 55, iv. 10; see Targ.) and in Jethro the Kenite, prototypes, and possibly founders, of the Jericho colony (Mek., Yitro, 2; Sifre, Num. 78; Sheḳ. v. 48c; Nilus, "De Monastica Ex-

Types of Essenes.

ercitatione," iii.; "J. Q. R." v. 418); likewise in Jesse, the father of David, regarded as sinless and deathless in their tradition (Shab. 55b; Derek Ereẓ Zuṭa i.); and in Obed, Boaz, and his father Salma (Tan., Wayeḥi, ed. Buber, 4; Targ. to I Chron. ii. 54 *et seq.*, iv. 22 *et seq.*). In this manner Ahijah and Ahithophel became types of Essenes (Midr. Teh. v. 8), as well as King Saul, as mentioned above; but, above all, the Patriarchs and protoplasts. Other Essenic types were Abraham, called "Watiḳ," the prototype of the Anawim and Ḥasidim because "he rose early" for prayer (Ber. 6b, after Gen. xix. 27; Shab. 105a; Gen. R. liii.); Shem-Melchizedek as teacher of benevolence and true worshiper of God (Midr. Teh. xxxvii. 1, lxxvi. 3); Job as philanthropist and as teacher of mystic lore (B. B. 15a, b; see Kohler, "Testament of Job," in Kohut Memorial Volume, pp. 265 *et seq.*); Enoch (see Enoch, Books of); and Adam ('Er. 78b; Pirḳe R. El. xx.). A passage in the Tanḥuma reads: "Only when Abraham separated from Lot and Jacob from Laban did God communicate with them as perushim" (Wayeẓe, ed. Buber, 21). The claim of antiquity for Essene tradition is, accordingly, not the invention of Pliny or Philo; it is essential to the Essene traditional lore. In truth, Abraham, as "'Anaw" (= "the humble one"), and all doers of works of benevolence, learned it from God, "their Father in heaven" (see Yalḳ. Mekiri to Ps. xviii. 36; Yalḳ. to II Sam. xxii. 36; comp. Sifre, Deut. 49). They are "the lovers of God" (B. B. 8b; Yoma 28a). God unites with the brotherhoods of the humble ("ḥaburot ha-nemukin": Tan., Wa'era, ed. Buber, 3). He provides each day's food for them as He provided the manna for Israel (Mek., Beshallaḥ, 2, ed. Weiss, pp. 56 [note] *et seq.*; Sifre, Deut. 42; Ḳid. 82b; Matt. vi. 25). "When men ceased to hate men's gifts [the Essene] longevity ceased" (Soṭah 47b, based on Prov. xv. 27).

In regard to Sabbath observance the rabbinical tradition traced the more rigid laws, comprising even the removal of utensils, to Nehemiah's time, that is, to the ancient Ḥasidim (Shab. 123b), and the Book of Jubilees (l. 8-12) confirms the antiquity of the Essene view. As the best characteristic of the Essene view the saying of Phinchas ben Jair, the last Essene of note, may be quoted: "The Torah leads to conscientiousness; this to alertness ["zerizut"] for holy work; this to blamelessness ["neḳiyyut"]; this to 'perishut' [Pharisaic separation from common things]; this to purity; this to 'ḥasidut' [Essene piety?]; this to humbleness; this to fear of sin; this to holiness, or to the possession of the Holy Spirit; and this finally to the time of the Resurrection; but ḥasidut is the highest grade" ('Ab. Zarah 20b).

Traces of Essenism and Anti-Essenism.

Essenism as well as Ḥasidism represents that stage of religion which is called "otherworldliness." It had no regard for the comfort of home life; woman typified only the feebleness and impurity of man. In their efforts to make domestic and social life comfortable and cheerful, the Pharisees characterized the Essene as "a fool who destroys the world" (Soṭah iii. 4), and their ethics assumed an anti-Essene character (see Ethics). Exceptionally, some tannaim, such as R. Eliezer b. Hyrcanus (Shab. 153a; Ned. 20b) and Jose ben Ḥalafta (Shab. 118b), favored the ascetic view in regard to conjugal life, while some amoraim and tannaim gave evidence of Essene practise or special Essene knowledge (see Frankel in "Monatsschrift," ii. 72 *et seq.*). Traces of Esseneism, or of tendencies identical with it, are found throughout the apocryphal and especially the apocalyptic literature (see Kohler, "Pre-Talmudic Haggada," in "J. Q. R." v. 403 *et seq.*; Jellinek, "B. H." ii., Introduction, vii., xviii., *et al.*), but are especially noticeable in the Tanna debe Eliyahu, above all in the Targum Yerushalmi, where the Essenic colonies of Jericho and of the City of Palms are mentioned as inhabited by the disciples of Elijah and Elisha (Deut. xxxiv. 3); the sons of Levi are singled out as forming brotherhoods for the service of God (Gen. xxix. 34); Joseph, Kohath, Amram, and Aaron, as well as the Patriarchs, are called "Ḥasidim" (Targ. Yer. on Gen. xxix. 13, xlix. 22; Ex. vi. 18, 20; Num. xxi. 1); priest-like and angelic holiness is enjoined upon Israel (Ex. xxii. 30; Lev. xx. 7; Num. xvi. 40); angels are expelled from heaven for having disclosed divine mysteries (Gen. xxvii. 12); the Holy Name and the Holy Spirit play throughout a prominent rôle; and God's own time, like that of the Essenes, appears as divided between studying the Law, sitting in judgment, and providing for the world's support and for the maintenance of the race (Deut. xxxii. 4).

The Essenes seem to have originally consisted, on the one hand, of rigorous Zealots, such as the Book of Jubilees looks for, and such as were under the leadership of men like Abba Taḥna Ḥasida and Abba Sicara (Eccl. R. ix. 7); and, on the other hand, of mild-tempered devotees of the Law, such as were the Essenes at En Gedi (Yer. Soṭah ix. 24c; Pliny, *l.c.*) and the Therapeutæ of Egypt. Rabbinical tradition knows only that under the persecution of Rome (Edom) the Essenes wandered to the south (Darom: Gen. R. lxxvi.; comp. Pes. 70b; Yeb. 62b; Midr. Teh. xix. 2), and occasionally mention is made of "the brethren" ("ḥabbarayya"), with reference to the Essene brotherhood (Lam. R. iv. 1; see also Levy, "Neuhebr. Wörterb." *s.v.* חברא, חבורא and חבורה; Geiger's "Jüd. Zeit." vi. 279; Brüll's "Jahrb." i. 25, 44). It is as charitable brotherhoods that the Essenic organization survived the destruction of the nation.

Relation of Essenism to Christianity.

John the Baptist seems to have belonged to the Essenes, but in appealing to sinners to be regenerated by baptism, he inaugurated a new movement, which led to the rise of Christianity. The silence of the New Testament about the Essenes is perhaps the best proof that they furnished the new sect with its main elements both as regards personnel and views. The similarity in many respects between Christianity and Essenism is striking: There were the same communism (Acts iv. 34-35); the same belief in baptism or bathing, and in the power of prophecy; the same aversion to marriage, enhanced by firmer belief in the Messianic advent; the same system of organization, and the same rules for the traveling brethren delegated to charity-work (see Apostle and Apostleship); and, above all, the same love-feasts or brotherly meals (comp. Agape; Didascalia). Also, between the ethical and the apocalyptic teachings of the Gospels and the Epistles and the teachings of the Essenes of the time, as given in Philo, in Hippolytus, and in the Ethiopic and Slavonic Books of Enoch, as well as in the rabbinic literature, the resemblance is such that the influence of the latter upon the former can scarcely be denied. Nevertheless, the attitude of Jesus and his disciples is altogether anti-Essene, a denunciation and disavowal of Essene rigor and asceticism; but, singularly enough, while the Roman war appealed to men of action such as the Zealots, men of a more peaceful and visionary nature, who had previously become Essenes, were more and more attracted by Christianity, and thereby gave the Church its otherworldly character; while Judaism took a more practical and worldly view of things, and allowed Essenism to live only in tradition and secret lore (see Clementina; Ebionites; Gnosticism).

K.

ESTELLA or **STELLA** (אשטילה, אשתילייא, שטיללה): Capital of a district of the same name in Navarre. Its Jewish community dates as far back as those of Tudela and Pamplona. In 1144 its synagogue was turned over to the bishop by King Garcia Ramirez, and transformed into the Church of S. Maria. Twenty years later the legal status of Estella Jews was established in a way favorable to them (see the "Fuero" in Kayserling's "Geschichte der Juden in Spanien," i. 198).

Under Philip the Fair of France the Jews of Estella suffered greatly. They were obliged to forego all interest on loans to Christians and to accept repayments of the capital by instalments extending over eight years. Louis Hutin, the successor of Philip, was more just. When in 1308 the seneschal of Estella caused the arrest of certain Jews, the king removed the seneschal from his office, set the prisoners at liberty, and placed them under the protection of the seneschal of Pamplona. Nevertheless, the situation of the Jews soon became desperate. Many popular uprisings occurred against them, fomented by the tax-collector Juan Garcia and the Franciscan Pedro Olligoyen.

Shortly after the death of Charles I. (March 5, 1328) the long-impending storm of persecution came upon them. The Jews of Estella, together with many from outside who happened to be there on business, united and defended themselves valiantly from within the walls of their Juderia. But, reenforced by peasants from the surrounding districts, the enraged inhabitants stormed the walls and forced their way into the Jewish houses. The whole Jewish quarter was burned to the ground and its residents were put to the sword, only a few escaping slaughter. Menahem ben Zerah, the author of "Ẓedah la-Derek," was among the survivors, though his family perished. Philip III. instituted an inquiry, and, in order to preserve the semblance of justice, imposed a fine of 10,000 livres on the city. This, however, was remitted, even Pedro Olligoyen, the chief instigator, going unpunished.

On one side of the Estella Juderia was the Castle Belmelcher, and on the other a flour-mill called "la Tintura." The "aljama" had a special magistracy, composed of two directors and twenty "regidores," or administrators, retiring members being replaced by election. The aljama was privileged to introduce new measures, impose fines, and to ban and expel from the community, etc.

The Jews of Estella were engaged principally in commerce and finance. Several of them, like Judah Levi, Abraham Euxoeb (Euxep), Abraham, Joseph, Isaac, and Moses Medellim, were tax-farmers. The Jewish population of Estella in 1366 numbered eighty-five families, and, like their brethren throughout Navarre, bore a heavy burden of taxation. In 1375 they paid nearly 120 florins monthly. Two years later the king levied a distress upon them for refusing to pay the balance of a sum which had been imposed upon them unjustly.

The restrictions to their trade were steadily increased, and many were driven to leave the country. The edict of 1498 drove the Jews out of Navarre; most of those in Estella emigrated; a small remnant embraced Christianity.

Several well-known medieval scholars came from Estella. Among them were Sento Saprut and Abraham ben Isaac (sentenced to death and their goods confiscated "por sus ecsesos" in 1413); Rabbi Menahem ben Zerah, son-in-law of Benjamen Abez (Abaz); David ben Samuel, author of "Ḳiryat Sefer"; and Judah ben Joseph ibn Bulat, whose grandfather, Joseph ibn Bulat, was president of the aljama of Estella in 1358.

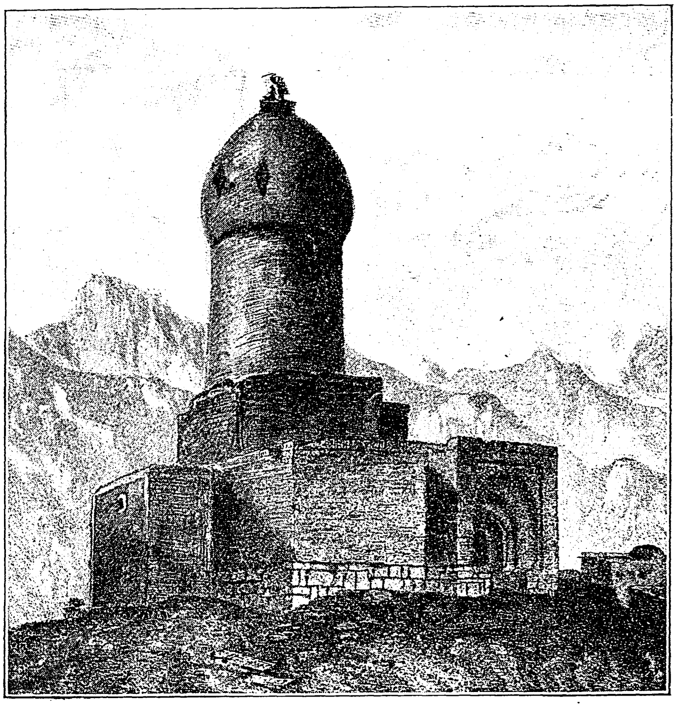
ESTHER (Hebrew, אסתר; Greek, Εσθήρ): Name of the chief character in the Book of Esther, derived, according to some authorities, from the Persian "stara" (star); but regarded by others as a modification of "Ishtar," the name of the Babylonian goddess (see below).

——**Biblical Data:** The story of Esther, as given in the book bearing her name, is as follows: The King of Persia, Ahasuerus, had deposed his queen Vashti because she refused, during a festival, to show at his command her charms before the assembled princes of the realm (i. 10). Many beautiful maidens were then brought before the king in order that he might choose a successor to the unruly Vashti. He selected Esther as by far the most comely. The heroine is represented as an orphan daughter of the tribe of Benjamin, who had spent her life among the Jewish exiles in Persia (ii. 5), where she lived under the protection of her cousin Mordecai. The grand vizier, Haman the Agagite, commanded Mordecai to do obeisance to him. Upon Mordecai's refusal to prostrate himself, Haman informed the king that the Jews were a useless and turbulent people and inclined to disloyalty, and he promised to pay 10,000 silver talents into the royal treasury for the permission to pillage and exterminate this alien race. The king then issued a proclamation ordering the confiscation of Jewish property and a general extermination of all the Jews within the empire. Haman set by lot the day for this outrage (iii. 6), but Mordecai persuaded Esther to undertake the deliverance of her compatriots.



Traditional Tomb of Esther and Mordecai.
(From Flandin and Coste, "Voyage en Perse.")

After a three days' fast observed by the entire Jewish community, the queen, at great personal risk, decided to go before the king and beg him to rescind his decree (iv. 16). Ahasuerus, delighted with her appearance, held out to her his scepter in token of clemency, and promised to dine with her in her own apartments on two successive nights (v. 2–8). On the night before the second banquet, when Esther intended to make her petition, the king, being sleepless, commanded that the national records be read to him. The part which was read touched upon the valuable services of Mordecai (vi. 1 *et seq.*), who some time before had discovered and revealed to the queen a plot against the king's life devised by two of the chamberlains (ii. 23). For this, by some unexplained oversight, Mordecai had received no reward.

Haman and Mordecai.

In the meantime the queen had invited the grand vizier to the banquet. When Haman, who was much pleased at the unusual honor shown him by the queen, appeared before the king to ask permission to execute Mordecai at once, Ahasuerus asked him, "What shall be done to the man whom the king delighteth to honor?" Haman, thinking that the allusion was to himself, suggested a magnificent pageant, at which one of the great nobles should serve as attendant (vi. 9). The king immediately adopted the suggestion, and ordered Haman to act as chief follower in a procession in honor of Mordecai (vi. 10).

The next day at the banquet, when Esther preferred her request, both the king and the grand vizier learned for the first time that the queen was a Jewess. Ahasuerus granted her petition at once and ordered that Haman be hanged on the gibbet which the latter had prepared for his adversary Mordecai (vii.). Mordecai was then made grand vizier, and through his and Esther's intervention another edict was issued granting to the Jews the power to pillage and to slay their enemies.

Before the day set for the slaughter arrived a great number of persons, in order to avoid the impending disaster, became Jewish proselytes, and a great terror of the Jews spread all over Persia (viii. 17).

The Jews, assisted by the royal officers, who feared the king, were eminently successful in slaying their enemies (ix. 11), but refused to avail themselves of their right to plunder (ix. 16). The queen, not content with a single day's slaughter, then requested the king to grant to her people a second day of vengeance, and begged that the bodies of Haman's ten sons, who had been slain in the fray, be hanged on the gibbet (ix. 13). Esther and Mordecai, acting with "all authority" (ix. 29), then founded the yearly feast of PURIM, held on the fourteenth and fifteenth of Adar as a joyous commemoration of the deliverance of their race.

E. G. H. J. D. P.

——In **Rabbinical Literature**: The story of Esther—typical in many regards of the perennial fate of the Jews, and recalled even more vividly by their daily experience than by the annual reading of the

Megillah at Purim—invited, both by the brevity of some parts of the narrative and by the associations of its events with the bitter lot of Israel, amplifications readily supplied by popular fancy and the artificial interpretation of Biblical verse. The additions to Esther in the (Greek) Apocrypha have their counterparts in the post-Biblical literature of the Jews, and while it is certain that the old assumption of a Hebrew original for the additions in the Greek Book of Esther is not tenable (see Kautzsch, "Die Apocryphen und Pseudepigraphen des Alten Testaments," i. 194), it is not clear that the later Jewish amplifications are adaptations of Greek originals.

The following post-Biblical writings have to be considered:

(1) The first Targum. The Antwerp and Paris polyglots give a different and longer text than the London. The best edition is by De Lagarde (reprinted from the first Venice Bible) in "Hagiographa Chaldaice," Leipsic, 1873. The date of the first Targum is about 700 (see S. Posner, "Das Targum Rishon," Breslau, 1896).

(2) Targum Sheni (the second; date about 800), containing material not germane to the Esther story. This may be characterized as a genuine and exuberant midrash. Edited by De Lagarde (in "Hagiographa Chaldaice," Berlin, 1873) and by P. Cassel ("Aus Literatur und Geschichte," Berlin and Leipsic, 1885, and "Das Buch Esther," Berlin, 1891, Ger. transl.).

(3) Babylonian Talmud, Meg. 10b-14a.

(4) Pirḳe R. El. 49a, 50 (8th cent.).

(5) Yosippon (beginning of 10th cent.; see Zunz, "G. V." pp. 264 *et seq.*).

(6) Midr. R. to Esther (probably 11th cent.).

(7) Midr. Leḳaḥ Ṭob (Buber, "Sifre di-Agadta," Wilna, 1880).

(8) Midr. Abba Gorion (Buber, *l.c.*; Jellinek, "B. H." i. 1-18).

(9) Midr. Teh. to Ps. xxii.

(10) Midr. Megillat Esther (ed. by Horwitz in his "Sammlung Kleiner Midrashim," Berlin, 1881).

(11) Ḥelma de Mordekai (Aramaic: Jellinek, "B. H." v. 1-8; De Lagarde, *l.c.* pp. 362-365; Ad. Merx, "Chrestomathia Targumica," 1888, pp. 154 *et seq.*).

(12) Yalḳ. Shim'oni to Esther.

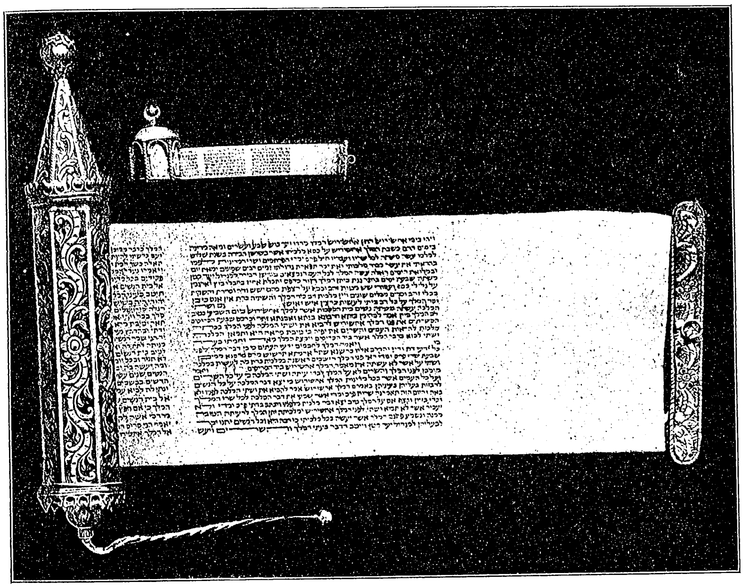
The Rabbinic Account.

With the omission of what more properly belongs under Ahasuerus, Haman, and Mordecai, the following is briefly the story of Esther's life as elaborated by these various midrashim: A foundling or an orphan, her father dying before her birth, her mother at her birth, Esther was reared in the house of Mordecai, her cousin, to whom, according to some accounts, she was even married (the word לבת, Esth. ii. 7, being equal to לבית = "house," which is frequently used for "wife" in rabbinic literature). Her original name was "Hadassah" (myrtle), that of "Esther" being given her by the star-worshipers, as reflecting her sweet character and the comeliness of her person. When the edict of the king was promulgated, and his eunuchs scoured the country in search of a new wife for the monarch, Esther, acting on her own judgment or upon the order of Mordecai, hid herself so as not to be seen of men, and remained in seclusion for four years, until even God's voice urged her to repair to the king's palace, where her absence had been noticed. Her appearance among the candidates for the queen's vacant place causes a commotion, all feeling that with her charms none can compete; her rivals even make haste to adorn her. She spurns the usual resources for enhancing her beauty, so that the keeper of the harem becomes alarmed lest he be accused of neglect. He therefore showers attentions upon her, and places at her disposal riches never given to others. But she will not be tempted to use the king's goods, nor will she eat of the king's food, being a faithful Jewess; together with her maids (seven, according to the number of the week-days and of the planets) she continues her modest mode of living. When her turn comes to be ushered into the royal presence, Median and Persian women flank her on both sides, but her beauty is such that the decision in her favor is at once assured. The king has been in the habit of comparing the charms of the applicants with a picture of Vashti suspended over his couch, and up to the time when Esther approaches him none has eclipsed the beauty of his beheaded spouse. But at the sight of Esther he at once removes the picture. Esther, true to Mordecai's injunction, conceals her birth from her royal consort. Mordecai was prompted to give her this command by the desire not to win favors as Esther's cousin. The king, of course, is very desirous of learning all about her antecedents, but Esther, after vouchsafing him the information that she, too, is of princely blood, turns the conversation, by a few happy counter-questions regarding Vashti, in a way to leave the king's curiosity unsatisfied.

Mordecai and Esther.

Still Ahasuerus will not be baffled. Consulting Mordecai, he endeavors to arouse Esther's jealousy—thinking that this will loosen her tongue—by again gathering maidens in his courtyard, as though he is ready to mete out to her the fate of her unfortunate predecessor. But even under this provocation Esther preserves her silence. Mordecai's daily visits to the courtyard are for the purpose of ascertaining whether Esther has remained true to the precepts of her religion. She had not eaten forbidden food, preferring a diet of vegetables, and had otherwise scrupulously observed the Law. When the crisis came Mordecai—who had, by his refusal to bow to Haman or, rather, to the image of an idol ostentatiously displayed on his breast (Pirḳe R. El. lxix.), brought calamity upon the Jews—appeared in his mourning garments, and Esther, frightened, gave birth to a still-born child. To avoid gossip she sent Hatach instead of going herself to ascertain the cause of the trouble. This Hatach was afterward met by Haman and slain. Still Mordecai had been able to tell Hatach his dream, that Esther would be the little rill of water separating the two fighting monsters, and that the rill would grow to be a large stream flooding the earth—a dream he had often related to her in her youth.

Mordecai called upon her to pray for her people and then intercede with the king. Though Pesaḥ was near, and the provision of Megillat Ta'anit forbidding fasting during this time could not be observed without disregarding Mordecai's plea, she overcame her cousin's scruples by a very apt counter-question, and at her request all the Jews "that had on that day already partaken of food" observed a rigid fast, in spite of (Esth. iv. 17) the feast-day (Pesaḥ), while Mordecai prayed and summoned the children and obliged even them to abstain from food, so that they cried out with loud voices. Esther in the meantime put aside her jewels and rich dresses, loosened



Scrolls of Esther in Silver Cases.

Esther Before Ahasuerus.

her hair, fasted, and prayed that she might be successful in her dangerous errand. On the third day, with serene mien she passed on to the inner court, arraying herself (or arrayed by the "Holy Ghost," Esth. Rabbah) in her best, and taking her two maids, upon one of whom, according to court etiquette, she leaned, while the other carried her train. As soon as she came abreast with the idols (perhaps an anti-Christian insinuation) the "Holy Ghost" departed from her, so that she exclaimed, "My God, my God, why hast thou forsaken me?" (Ps. xxii. 1); thereupon, repenting having called the enemy "dog," she now named him "lion," and was accompanied by three angels to the king. Ahasuerus attempted to ignore her, and turned his face away, but an angel forced him to look at her. She, however, fainted at the sight of his flushed face and burning eyes, and leaned her head on her handmaid, expecting to hear her doom pronounced; but God increased her beauty to such an extent that Ahasuerus could not resist. An angel lengthened the scepter so that Esther might touch it: she invited the king to her banquet. Why Haman was invited the Rabbis explain in various ways. She desired to make the king jealous by playing the lover to Haman, which she did at the feast, planning to have him killed even though she should share his fate. At the supreme moment, when she denounced Haman, it was an angel that threw Haman on the couch, though he intended to kneel before the queen; so that the king, suspecting an attempt upon the virtue and life of his queen, forthwith ordered him to be hanged.

To the Rabbis Esther is one of the four most beautiful women ever created. She remained eternally young; when she married Ahasuerus she was at least forty years of age, or even, according to some, eighty years (ה = 5, ס = 60, ד = 4, ה = 5 = 74 years; hence her name "Hadassah"). She is also counted among the prophetesses of Israel.

s. s. E. G. H.

——**Critical View:** As to the historical value of the foregoing data, opinions differ. Comparatively few modern scholars of note consider the narrative of Esther to rest on an historical foundation. The most important names among the more recent defenders of the historicity of the book are perhaps Hävernick, Keil, Oppert, and Orelli. The vast majority of modern expositors have reached the conclusion that the book is a piece of pure fiction, although some writers qualify their criticism by an attempt to treat it as a historical romance. The following are the chief arguments showing the impossibility of the story of Esther:

Improbabilities of the Story.

1. It is now generally recognized that the Ahasuerus (אחשורוש), mentioned in Esther, in Ezra iv. 6, and in Dan. ix. 1, is identical with the Persian king known as Xerxes (Ξέρξης, "Khshayarha"), who reigned from 485 to 464 B.C.; but it is impossible to find any historical parallel for a Jewish consort to this king. Some critics formerly identified Esther with Amastris (Ionic, "Amestris"), who is mentioned by Herodotus (viii. 114, ix. 110; compare Ctesias, 20) as the queen of Xerxes at the time when Esther, according to Esth. ii. 6, became the wife of Ahasuerus. Amastris, however, was the daughter of a Persian general and, therefore, not a Jewess. Furthermore, the facts of Amastris' reign do not agree with the Biblical story of Esther. Besides all this, it is impossible to connect the two names etymologically. M'Clymont (Hastings, "Dict. Bible," i. 772) thinks it possible that Esther and Vashti may have been merely the chief favorites of the harem, and are consequently not mentioned in parallel historical accounts.

It is very doubtful whether the haughty Persian aristocracy, always highly influential with the monarch, would have tolerated the choice of a Jewish queen and a Jewish prime minister (Mordecai), to the exclusion of their own class—not to speak of the improbability of the prime ministry of Haman the Agagite, who preceded Mordecai. "Agagite" can only be interpreted here as synonymous with "Amalekite" (compare "Agag," king of the Amalekites, the foe of Saul, I Sam. xv. 8, 20, 32; Num. xxiv. 7; see AGAG). Oppert's attempt to connect the term "Agagite" with "Agaz," a Median tribe mentioned by Sargon, can not be taken seriously. The term, as applied to Haman, is a gross anachronism; and the author of Esther no doubt used it intentionally as a fitting name for an enemy of Israel. In the Greek version of Esther, Haman is called a Macedonian.

2. Perhaps the most striking point against the historical value of the Book of Esther is the remarkable decree permitting the Jews to massacre their enemies and fellow subjects during a period of two days. If such an extraordinary event had actually taken place, should not some confirmation of the Biblical account have been found in other records? Again, could the king have withstood the attitude of the native nobles, who would hardly have looked upon such an occurrence without offering armed resistance to their feeble and capricious sovereign? A similar objection may be made against the probability of the first edict permitting Haman the Amalekite to massacre all the Jews. Would there not be some confirmation of it in parallel records? This whole section bears the stamp of free invention.

3. Extraordinary also is the statement that Esther did not reveal her Jewish origin when she was chosen queen (ii. 10), although it was known that she came from the house of Mordecai, who was a professing Jew (iii. 4), and that she maintained a constant communication with him from the harem (iv. 4–17).

4. Hardly less striking is the description of the Jews by Haman as being "dispersed among the people in all provinces of thy kingdom" and as disobedient "to the king's laws" (iii. 8). This certainly applies more to the Greek than to the Persian period, in which the Diaspora had not yet begun and during which there is no record of rebellious tendencies on the part of the Jews against the royal authority.

5. Finally, in this connection, the author's knowledge of Persian customs is not in keeping with contemporary records. The chief conflicting points are as follows: (*a*) Mordecai was permitted free access to his cousin in the harem, a state of affairs wholly at variance with Oriental usage, both ancient and modern. (*b*) The queen could not send a message to her own husband (!). (*c*) The division of the empire into 127 provinces contrasts strangely with the twenty historical Persian satrapies. (*d*) The fact that Haman tolerated for a long time Mordecai's refusal to do obeisance is hardly in accordance with the customs of the East. Any native venturing to stand in the presence of a Turkish grand vizier would certainly be severely dealt with without delay. (*e*) This very refusal of Mordecai to prostrate himself belongs rather to the Greek than to the earlier Oriental period, when such an act would have involved no personal degradation (compare Gen. xxiii. 7, xxxiii. 3; Herodotus, vii. 136). (*f*) Most of the proper names in Esther which are given as Persian appear to be rather of Semitic than of Iranian origin, in spite of Oppert's attempt to explain many of them from the Persian (compare, however, Scheftelowitz, "Arisches im Alten Testament," 1901, i.).

Probable Date.

In view of all the evidence the authority of the Book of Esther as a historical record must be definitely rejected. Its position in the canon among the Hagiographa or "Ketubim" is the only thing which has induced Orthodox scholars to defend its historical character at all. Even the Jews of the first and second centuries of the common era questioned its right to be included among the canonical books of the Bible (compare Meg. 7a). The author makes no mention whatever of God, to whom, in all the other books of the Old Testament, the deliverance of Israel is ascribed. The only allusion in Esther to religion is the mention of fasting (iv. 16, ix. 31). All this agrees with the theory of a late origin for the book, as it is known, for example, from Ecclesiastes, that the religious spirit had degenerated even in Judea in the Greek period, to which Esther, like Daniel, in all probability belongs.

Esther could hardly have been written by a contemporary of the Persian empire, because (1) of the exaggerated way in which not only the splendor of the court, but all the events described, are treated (compare the twelve months spent by the maidens in adorning themselves for the king; the feasts of 187 days, etc., all of which point rather to the past than to a contemporary state of affairs); (2) the uncomplimentary details given about a great Persian king, who is mentioned by name, would not have appeared during his dynasty.

It is difficult to go so far as Grätz, who assigns

Esther to an adherent of the Maccabean party in the reign of Antiochus Epiphanes. The vast difference in religious and moral tone between Esther and Daniel—the latter a true product of Antiochus' reign—seems to make such a theory impossible. Nor is the view of Jensen, followed by Nöldeke, more convincing to the unprejudiced mind. He endeavors to prove that the origin of the whole story lies in a Babylonian-Elamitic myth. He identifies Esther with the Babylonian goddess Ishtar (Aphrodite); Mordecai with Marduk, the tutelary deity of Babylon; and Haman with Hamman or Humman, the chief god of the Elamites, in whose capital, Susa, the scene is laid; while Vashti is also supposed to be an Elamite deity. Jensen considers that the Feast of Purim, which is the climax of the book, may have been adapted from a similar Babylonian festival by the Jews, who Hebraized the original Babylonian legend regarding the origin of the ceremonies. The great objection to such a theory is that no Babylonian festival corresponding with the full moon of the twelfth month is known.

The object of Esther is undoubtedly to give an explanation of and to exalt the Feast of Purim, of whose real origin little or nothing is known. See MEGILLAH; PURIM.

E. G. H. J. D. P.

ESTHER, APOCRYPHAL BOOK OF: The canonical Book of Esther undoubtedly presents the oldest extant form of the Esther story. In times of oppression the Jews found comfort in this narrative, for it presented an example of sudden divine salvation in the days of distress (Esth. ix. 22, 28), and it strengthened their hope of being liberated from their desperate condition, especially in the days of the Maccabees. Naturally, the Jews' well-known skill in transforming and enriching traditional narratives was applied especially to those incidents which were touched but lightly in the Biblical Book of Esther. Such variations and additions have been preserved in Greek, but the assumption that they were based on a Hebrew original has been proved erroneous (comp. Scholz, "Kommentar über das Buch Esther mit Seinen Zusätzen," 1892, pp. 21 *et seq.*), the difficulty of translating many of these additions into Hebrew being especially significant (Fritzsche, "Kurzgefasstes Exegetisches Handbuch zu den Apokryphen des Alten Testaments," 1851, p. 71; Wace, "The Apocrypha," in "The Speaker's Commentary," i. 361-365). The additions were probably made in the time of the Maccabees, when the people were hoping for another sudden liberation by divine intervention. They aimed chiefly to supply the religious element signally lacking in the canonical book (comp. Reuss, "Geschichte der Heiligen Schriften des Alten Testaments," 2d ed., §§ 470 *et seq.*; Bleek-Wellhausen, "Einleitung in das Alte Testament," 5th ed., § 120; J. S. Bloch, "Hellenistische Bestandtheile im Bibl. Schriftum," 2d ed., p. 8; Ryssel, in Kautzsch, "Die Apocryphen und Pseudepigraphen des Alten Testaments," i. 197). Fritzsche (*l.c.* p. 73) has pointed out linguistic similarities between the additions and the second Book of the Maccabees.

The latest date that can be given to the additions is the year 30 B.C., when the Ptolemaic rule came to an end (comp. B. Jacob in Stade's "Zeitschrift," 1890, p. 290). These additions are contained in the uncial manuscript of the Codex Sinaiticus (Sin.), Codex Vaticanus (B), and Codex Alexandrinus (A). Among the printed editions may be mentioned those of R. Holmes and J. Parsons, Oxford, 1798-1827; E. Nestle, "Vet. Test. Græce Juxta LXX. Interpretum," Leipsic, 1850; H. B. Swete, "The Old Testament in Greek," 2d ed., Cambridge, 1895-99; O. F. Fritzsche, "Libr. Apoc. V. T. Græce," 1871.

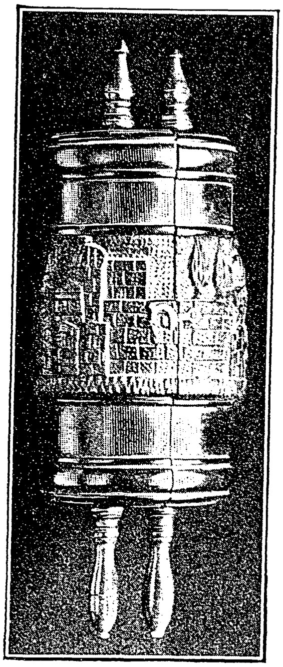
Editions and Critical Helps.

The text of the additions has been preserved in two forms, namely, that of the Septuagint, and that revised by Lucian, the martyr of Antioch (comp. B. Jacob, *l.c.* pp. 258-262). Lagarde has published both texts with complete critical annotations in his "Librorum Veteris Testamenti Canonicorum," 1883, i. 504-541; and later on A. Scholz ("Kommentar über das Buch Esther," pp. 2-99, Würzburg and Vienna, 1892) published a small edition in four parallel columns, showing side by side the Hebrew text of the canonical book, the two Greek texts, and Josephus' text (comp. Ryssel in Kautzsch, *l.c.* pp. 198, 199).

For textual criticism there are, also, the two Latin translations; not so much the Vulgate—in which Jerome translated very freely, and in part arbitrarily—as the Old Latin, which, in spite of its arbitrariness and incompleteness, and its additions, probably made in part by Christians, has preserved a few good readings of the Codex Vaticanus (comp. Fritzsche, *l.c.* pp. 74 *et seq.*; Ryssel, in Kautzsch, *l.c.* p. 199; B. Jacob, *l.c.* pp. 249-258). On the forthcoming new edition of pre-Jerome texts of Esther, comp. Ph. Thielmann, "Bericht über das Gesammelte Handschriftliche Material zu einer Kritischen Ausgabe der Lateinischen Uebersetzung Biblischer Bücher des A. T." Munich, 1900; "Sitzungsberichte der Königlichen Bayerischen Academie der Wissenschaften," ii. 205-247. For an explanation of the Greek additions to the Book of Esther see Fritzsche, *l.c.* (the older interpreters, p. 76; the later, pp. 69-108); F. O. Bissel, "The Apocrypha of Old Testament," New York, 1880; Fuller-Wace, *l.c.* i. 361-402; O. Zöckler, "Die Apocryphen des Alten Testaments," Munich, 1891; Ball, "The Ecclesiastical, or Deuterocanonical, Books of the Old Testament," London, 1892; V. Ryssel, in Kautzsch, *l.c.* i. 193-212.

The Dream of Mordecai.

The dream of Mordecai precedes in the Septuagint, as i. 11-17, the canonical story of Esther, and corresponds in the Vulgate to xi. 2-12 and xii. (Swete, "The Old Testament in Greek," ii. 755 *et seq.*). This version contradicts the account in the canonical book, for, according to the apocryphal version (i. 2), Mordecai is already in the service of King Artaxerxes, and has this dream in the second year of that king's reign, whereas in the canonical version (ii. 16) Esther was not taken into the royal house until the seventh year of his reign, and Mordecai did not sit "in the king's gate"—that is, enter the king's service—until after that event (ii. 19–20). The author of the apocryphal Esther speaks of two conspiracies against Artaxerxes, and says that Mordecai preceded Esther in coming to court. His account is as follows: Mordecai as a servant in the palace sleeps with the courtiers Gabatha and Tharra (Esth. ii. 21, "Bigthan" and "Teresh"; Vulg. "Bagatha" [whence "Gabatha"] and "Thara"), and overhears their plot against the king. He denounces the conspirators, who are arrested and confess. The king and Mordecai write down the occurrence, and Mordecai is rewarded. As the conspirators are condemned to death (according to B. Jacob in Stade's "Zeitschrift," x. 298, the words of Codex B, *διότι ἀνῃρέθησαν*, are to be added here; comp. Jerome: "qui fuerant interfecti"), Haman, who evidently was in league with them, plans to take vengeance on Mordecai (Apocr. Esth. ii. 12–17).



Olive-Wood Case for Scroll of Esther, from Jerusalem.
(In the U. S. National Museum, Washington, D. C.)

There is a second conspiracy after Esther has been made queen, in the seventh year of the king's reign (Esth. ii. 21 *et seq.*). Mordecai in his dream (Apocr. Esth. i. 4–11) sees two dragons coming to fight each other (representing Mordecai and Haman, *ib.* vi. 4); the nations make ready to destroy the "people of the righteous," but the tears of the righteous well up in a little spring that grows into a mighty stream (comp. Ezek. xlvii. 3–12; according to Apocr. Esth. vi. 3, the spring symbolizes Esther, who rose from a poor Jewess to be a Persian queen). The sun now rises, and those who had hitherto been suppressed "devoured those who till then had been honored" (comp. Esth. ix. 1–17).

The Destruction of the Jews Decreed.

The second addition contains an edict of Artaxerxes for the destruction of all the Jews, to be carried out by Haman (Apocr. Esth. ii. 1–7; it follows Esth. iii. 13; comp. Swete, *l.c.* pp. 762 *et seq.*). The mere mention of the fact that an edict for the destruction of the Jews had gone forth, was a temptation to enlarge upon it. The "great king" (verse 1), as in Esth. i. 1, sends a letter to the governors of the one hundred and twenty-seven provinces of his kingdom—that extends from India even unto Ethiopia—saying that although personally he is inclined toward clemency, he is bound to look to the security of his kingdom.

In a conference on the matter, he said, Haman, the councilor ranking next to him in the kingdom, had pointed out that there was one evilly disposed class of people in his realm, which, by its laws, placed itself in opposition to all the other classes, persisted in disregarding the royal ordinances, and made a unified government impossible. Under these circumstances, he said, nothing remained but to adopt the suggestion of Haman, who, having been placed in charge of the affairs of the state, could in a sense be called the second father of the king; this suggestion was to destroy by the sword of the other nations, on the fourteenth day of Adar (thirteenth of Adar in Esth. iii. 13, viii. 12, ix, 1), all those designated as Jews, together with their wives and children. After these disturbers of the peace had been put out of the way, the king believed the business of the realm could again be conducted in peace.

The remaining additions are closely connected with this affair. The next in order is Mordecai's prayer for help (Apocr. Esth. iii. 1–11; Vulg. xiii. 8–18); in the Septuagint it is added to iv. 17 (Swete, *l.c.* pp. 765 *et seq.*). It follows the story of Esth. iv. 1–16, according to which Esther commanded Mordecai to assemble all the Jews for a three-days' fast before she herself interceded for them before the king. The prayer begins with the usual praise of divine omnipotence. Heaven and earth are a paraphrase for the idea *τὸ πᾶν* (verse 2; comp. Gen. i. 1;

Scroll of Esther as Fixed in Olive-Wood Case.
(In the U. S. National Museum, Washington, D. C.)

Mordecai's Prayer.

Isa. xlv. 18). The plight of the Jews was occasioned by the refusal to kiss Haman's feet (comp. Esth. iii. 2–5), a refusal caused not by pride, but because honor as high as that which such an act implied belongs to God alone (comp. the refusal of the *προσκύνησις* of the Greek ambassadors to Darius). "This scrupulousness is characteristic of post-exilic Judaism; in ancient Israel the honor was unhesitatingly accorded to every nobleman (I Sam. xxv. 23 *et seq.*; II Sam. xviii. 21, 28): even Judith (x. 23 [21]) honored Holofernes in this way in order to allay his suspicions.

But, Mordecai continues, this refusal was merely a pretext to destroy God's chosen people (*κληρονομία*, verse 8; comp. Apocr. Esth. iv. 20; vii. 9 = Hebr. נחלה; Ps. xxviii. 9, xciv. 5, etc.; *μερίς*, verse 9; comp. LXX. on Deut. xxxii. 9; *κλῆρος*, verse 10 = נחלה, Deut. iv. 20), and he implores God to protect them now as He had their fathers in Egypt (comp. פדית in Deut. ix. 26). The prayer closes with the supplication to save His people and turn their mourning into gladness (really "feasting"; comp. vi. 22 *et seq.*; see also Esth. ix. 17–19, where the prayer also ends in feasting and in the sending of gifts of food to one another). Here, as in Ps. vi. 6 (A. V. 5), xxx. 10 [9], cxv. 17; and Ecclus. (Sirach) xvii. 25, the reason for harkening to the prayer is the desire ascribed to YHWH of hearing songs of praise and thanks, which only the living can offer (verse 10, where the reading *στόμα* is preferable to *αἷμα*; Swete, *l.c.* p. 765). Finally, emphasis is laid on the people's loud calling and crying to God (*ἐξ ἰσχύος αὐτῶν . . . ἐκέκραξεν*; comp. Dan. iii. 4, קרא בחיל; Isa. lviii. 1, הרים קול) when they stood face to face with death (*ἐν ὀφθαλμοῖς αὐτῶν*).

The Prayer of Esther.

Closely connected with this is the prayer of Esther (Apocr. Esth. iii. 12–30; Septuagint, xiii. 8–18, xiv. 1–19; Swete, *l.c.* pp. 766 *et seq.*; Vulg. xiv. 1–19): she takes off her royal garments (*τὰ ἱμάτια τῆς δόξης αὐτῆς* [in Esth. i. 11, ii. 17 only the royal crown is mentioned]), and, putting on mourning-robes (שק, Judges viii. 5 [6]; Neh. ix. 1), strews ashes on her head (comp. Isa. iii. 24; Mal. ii. 3; II Sam. xiii. 19, commonly ישב באפר; Job ii. 9). She winds her hair about her (verse 13) and takes off all adornments (*ἐταπείνωσεν*; comp. ענה נפש, Lev. xvi. 29, 31; Isa. lviii. 3). In this way the pity of God would be aroused and His anger allayed (I Kings xxi. 21–29).

The prayer refers to the threatening danger (comp. iii. 11): as God once released Israel's ancestors from the Egyptian yoke (verse 16), so Esther beseeches him now to save the Jews from their impending fate, though they deserve it for having participated in Persian idolatry (verses 17, 18 refer to this, and not to the preexilic idolatry; comp. II Kings xvii. 29–33, 41). Following Lagarde and Ryssel, the reading in verse 19 is *ἔθηκαν τὰς χεῖρας αὐτῶν επῖ τὰς χεῖρας τῶν εἰδώλων* ("they put their hands in the hands of the idols"; on נתן יד, to confirm an agreement by clasping of hands, see Ezra x. 19). This means: "The Persian oppressors have vowed to their gods [verse 19] to make vain the divine promise, to destroy Israel [*i.e.*, the divine heritage], to close the mouths of those that praise God, and to extinguish the glory of the house and the altar of God [verse 20]. Furthermore, they swear that the mouth of the heathen will be opened in praise of their impotent [gods], and their mortal king [the Persian] will be for ever admired" (verse 21). Hence God is besought not to give His scepter into the hands of the "non-existing" (*τοῖς μὴ οὖσιν*; comp. I Cor. viii. 4), and not to make the Jews a laughing-stock to the heathen, but to let the plans of the latter turn against themselves. "Mark him [*παραδιγμάτισον*; comp. Heb. vi. 6] who began [to act] against us."

In verse 24 Esther adds a prayer for the success of the petition which, according to Esth. iv. 16, she intends to make to the king. "Put orderly speech into my mouth in face of the lion" (the Persian king is thus called also in the Aramaic version of Mordecai's dream; see Merx, "Chrestomathia Targumica," p. 164, 3; comp. Ecclus. [Sirach] xxv. 16, 19). The object of her petition—to turn the anger of the king against Israel's persecutors—anticipates the events of Esth. vii. 9. She prays God to help her, the desolate one (*τῇ μόνῃ*; corresponding to יחיד in Ps. xxv. 17 [A. V. 16], where it occurs next to עני, "lonely and deserted," differing from verse 14, *σὺ εἶ μόνος*, referring to the singleness of YHWH), who has no one else to turn to (verse 25). She refers to the fact that YHWH knows the splendor of her royal position did not tempt her to yield to the king (in Esth. ii. 7–20 this is not mentioned), but that she submitted to the force of circumstances (verse 25). She continues by affirming that she hates the glitter of the lawless ones (*δόξαν ἀνόμων*; the *ἀνόμων* here are the heathen; their *δόξα* is their power), and abhors the bed of the uncircumcised (verse 26). YHWH, she says, knows her distress in being forced to be the king's wife. She abhors the symbol of pride on her head (*i.e.*, the royal crown she wears in public); she abhors it like a filthy rag (*ὡς ῥάκος καταμηνίων* = וכבגד עדים; Isa. lxiv. 5 [A. V. 6]), and does not wear it when sitting quietly at home (verse 17). Finally, she has not sat at table in Haman's house, nor graced by her presence the banquet of the king (according to the canonical version [ii. 18], Esther kept her own feast); nor did she drink any of the sacrificial wine of the heathen gods (*οἶνον σπονδῶν*; comp. LXX. Deut. xxxii. 38; Fuller, in Wace, *l.c.* p. 390, verse 28). Since her arrival there, God, she says, has been her sole joy. The phrase *ἀφ' ἡμέρας μεταβολῆς* refers to the change in her dwelling-place (comp. Merx, "Chrestomathia Targumica," p. 163, 11 [Ryssel]), not to the day of her reception into the royal palace (Esth. ii. 16), as Zöckler and Fuller (in Wace, *l.c.* p. 390) have it. The prayer closes with a petition for a confirmation of faith and a release from all fear (comp. Judith ix. 11).

Esther Before the King.

Esther's reception by the king (iv. 1–15; Swete, *l.c.* pp. 767 *et seq.*) follows in the Septuagint immediately upon the prayer (xv. 4–19; Vulg. xv. 1–19). Here the events told in Esth. v. 1, 2 are amplified. In xv. 1 (Septuagint) the "third day" corresponds to Esth. v. 1. According to Septuagint v. 1 she took off the garments she had worn at divine service; in the apocryphal version (iii. 13) she had put them on. Divine service consisted in fasting, according to Esth. iv. 16; in praying, according to Apocryphal Esther iii. 12. In iv. 1 (Apocr. Esth.) she puts on her royal apparel, to which the crown probably belongs, according to ii. 17. After a supplication to God, she appears (iv. 1) accompanied by two handmaidens (ἅβραι = "favorite slaves"; comp. Judith viii. 33); according to Esth. ii. 9, she had seven handmaids. In Apocryphal Esther iv. 2 it is said she was escorted to the king by two maidens, "and upon the one she leaned, as carrying herself daintily" (verse 3: ὡς τρυφερευομένη); "and the other followed, bearing up her train.". In the canonical Book of Esther no mention is made of this escort.

iv. (Apocr. Esth.) describes the impression her beauty produced: she was ruddy through the perfection of her beauty, and her countenance was cheerful and love-kindling; but her heart was heavy with fear of the danger of appearing uncalled before the king (comp. Esth. iv. 11). Having passed through all the doors, she stood before the king, who sat upon his throne clothed in the robes of majesty (see Fuller in Wace, *l.c.*; compare the representation of the king on his throne in the picture of Persepolis according to Rawlinson). Verse 7: Then, lifting up his countenance (that shone with majesty), he looked very fiercely upon her; and the queen fell down, and was pale, and fainted; after she had regained consciousness she bowed herself upon the head of the maid that went before her. Verse 8: Then God changed the spirit of the king into mildness. In concern he leaped from his throne, and took her in his arms till she recovered her composure, comforting her with loving words. In Verse 9 he asks: "Esther, what is the matter? I am thy brother," thereby placing her on the same level with him. In verses 10 *et seq.* he assures her that the death penalty is meant to apply only to the unauthorized entrance of the king's subjects (comp. Esth. iv. 11), and that it does not apply to her: "Thou shalt not die. . . ." Touching her neck with his golden scepter, he embraced her, and said, "Speak unto me." Then said she unto him, "I saw thee, my lord, as an angel of God [comp. Ezek. viii. 2], and my heart was troubled for fear of thy majesty." And as she was speaking, she fell down for faintness. Verse 16: Then the king was troubled, and all his servants comforted her.

The New Edict.

The king now issues an edict canceling the former edict, and decreeing protection to the Jews (Apocr. Esth. v. 1-24; Vulg. xvi. 1-24; Septuagint addition to viii. 12; comp. Swete, *l.c.* pp. 773-775, the amplification of the edict mentioned in Esth. viii. 13). The first edict against the Jews is revoked; its instigator, Haman, is accused of conspiracy against the king; and every aid is ordered to be given to the Jews. Verses 2-4: "Many, the more often they are honored with the great bounty of their gracious princes, the more proud they are waxen, and endeavor to hurt not our subjects only, but, not being able to bear abundance, do take in hand to practise also against those that do them good, and take not only thankfulness away from among men, but also, lifted up with the glorious words of lewd persons that were never good, they think to escape the justice of God, that seeth all things, and hateth evil." Verses 5-6: "Oftentimes, also, fair speech of those that are put in trust to manage their friends' affairs [comp. Jacob in Stade, *l.c.* x. 283, note 2] hath caused many that are in authority to be partakers of innocent blood, and hath enwrapped them in remediless calamities [comp. I Sam. xxv. 26; II Sam. xvi. 4], beguiling with the falsehood and deceit of their lewd disposition the innocency and goodness of princes." Verse 7: "Now ye may see this, as we have declared, not so much by ancient histories, as by observing what hath wickedly been done of late through the pestilent behavior of them that are unworthily placed in authority." Verses 8-9: "We must take care for the time to come that our kingdom may be quiet and peaceable for all men, by changing our purposes and always judging things that are evident with more equal proceeding." Verses 10-14: The king had accorded this gentle treatment to Haman, but had been bitterly deceived by him, and was therefore compelled to revoke his former edict. (According to Dan. vi. 9, 13 this was inadmissible, but Fuller, *l.c.* pp. 397 *et seq.*, cites a number of cases in which it was done. Verse 10 is about Haman, called in i. 17 "the Agagite," here "the Macedonian"; in verse 14 he is accused of having betrayed the Persian empire to the Macedonians.) "For Aman, a Macedonian, the son of Amadatha, being indeed a stranger to the Persian blood [comp. Vulg. "et animo et gente Macedo"], and far distant from our goodness, and a stranger received of us, had so far obtained the favor that we show toward every nation that he was called our 'father,' and was continually honored of all men, as the next person unto the king. He had also been bowed down to [comp. Esth. iii. 2-6]. But he, not bearing his great dignity, went about to deprive us of our kingdom and life; having, by manifold and cunning deceits, sought of us the destruction, as well of Mordecai, who saved our life, and continually procured our good, as of blameless Esther, partaker of our kingdom with the whole nation. For by these means he thought, finding us destitute of friends, to have translated the kingdom of the Persians to the Macedonians." According to these verses Haman was guilty of a threefold sin, since he tried to wrest from the king wife, kingdom, and life.

v. 15-16, 18-19: "But we find that the Jews, whom this wicked wretch hath delivered to utter destruction, are no evil-doers, but live by most just laws; and that they are children of the Most High and Most Mighty God, who hath ordered the kingdom both unto us and to our progenitors in the most excellent manner. Therefore, ye shall do well not to put in execution the letters sent unto you by Aman, the son of Amadatha; for he that was the worker of these things is hanged [ἐσταυρῶσθαι = "impaled"] at the gates of Susa with all his family [according to Esth. vii. 10, viii. 7, Haman alone was hanged; according to Esth. ix. 10, the Jews killed his ten sons; in Dan. vi. 25 the wives and children were thrown into the lions' den], God, who ruleth all things, speedily rendering vengeance to him according to deserts. Therefore he shall publish the copy of this letter in all places [ἐκτιθέναι; Stade, *l.c.* x. 282, a phrase used in the promulgation of royal commands], that the Jews may live after their own laws" (comp. Ezra vii. 25 *et seq.*; Josephus, "Ant." xii. 3, § 3, xvi. 6, § 2).

v. 20-24: "Ye shall aid them, that even the same day, being the 13th day of the 12th month Adar, they may be avenged on them who in the time of their affliction shall set upon them [comp. Esth. ix. 1; but see above Apocr. Esth. ii. 6, where the 14th day is fixed upon; according to Esth. iii. 13, Haman had appointed the thirteenth day for exterminating the Jews]. For Almighty hath turned to joy unto them the day wherein the chosen people should have perished. Ye shall therefore, among your solemn feasts, keep it an high day with all feasting [following Grotius, Fritzsche, and Ryssel κλήρων (sc. ἡμέραν) is to be added after; according to this the Persian king instituted the Jewish Feast of Purim, as a day to be celebrated also by the Persians], that both now and hereafter there may be safety to us [the reading here should be ὑμῖν instead of ἡμῖν] and the well-affected Persians, and that it may be, to those which do conspire against us, a memorial of destruction. Therefore every city and country whatsoever which shall not do according to these things, shall be destroyed without mercy with fire and sword, and shall be made not only impassable for men, but also most hateful for wild beasts and fowls forever."

Interpretation of Mordecai's Dream.

In the Septuagint the interpretation of Mordecai's dream is separated from the dream itself, which forms the beginning of the additions, and constitutes the end of the whole apocryphon (vi. 1-10), with verse 11 as subscription (Swete, *l.c.* pp. 779 *et seq.*). In the Vulgate the passage stands at the end of the canonical Book of Ezra (x. 4-11), preceding all other apocryphal additions as well as the dream itself, which here occupies xi. 2-11. Neither dream nor interpretation is found in Josephus. The expression "God hath done these things" (comp. Matt. xxi. 42) refers to the whole story of the Book of Esther. Verse 2 refers to the dream told in the beginning of the book, which has been fulfilled in every respect. "The little fountain that became a river" (vi. 3) signifies the elevation of Esther (see i. 9), who became a stream when the king married her and made her queen. The light and the sun (see i. 10) signify the salvation and joy that Esther brought to the Jews (comp. Esth. viii. 16). The two dragons are Mordecai and Haman. The nations that assembled to destroy the name of the Jews (see i. 6) are the heathen (comp. Esth. iii. 6-8). "And my nation is this Israel, which cried to God and were saved" (vi. 6; comp. iii. 11). "Therefore hath he made two lots, one for the people of God, and another for all the Gentiles" (vi. 7; comp. Esth. iii. 7). "And the two lots were drawn [ἤλθον; lit. "they came, sprang out at the right time"]: one for his people [Fritzsche and Ryssel add τῷ λαῷ αὐτοῦ], the other for all the other peoples." "So God remembered his people and justified [decided in its favor; compare Deut. xxv. 1; I Kings viii. 32; Ecclus. (Sirach) xiii. 22; Vulg. freely rendered, "misertus est"; compare old Latin "salvavit"] his inheritance" (vi. 9). "Therefore those days shall be unto them in the month of Adar, the fourteenth and fifteenth day of the same month, with an assembly, and joy, and with gladness before God, according to the generations forever among his people" (vi. 10; comp. Esth. ix. 18, 21). In II Macc. xv. 36 the fourteenth day is called ἡ Μαρδοχαικὴ ἡμέρα.

The subscription, verse 11 (in Swete, ii. 780, inserted in the German Bible between Esther's reception by the king and Ahasuerus' second edict), refers to the whole Book of Esther together with the apocryphal additions, as does also the expression τὴν προκειμένην ἐπιστολὴν τῶν φρουραί (Swete), meaning "the above letter on Purim" (compare Esth. ix. 20, 29).

This letter was taken to Egypt by Dositheus—who called himself a priest and Levite (?)—and his son Ptolemy, who maintained that it was the original (Apocr. Esther). Lysimachus, Ptolemy's son, an inhabitant of Jerusalem, translated the letter in the fourth year of the reign of Ptolemy and Cleopatra (according to some in 455; see Fritzsche, *l.c.* pp. 72 *et seq.*). Four Ptolemies had wives by the name of Cleopatra (Epiphanes, Philometor, Physkon, and Soter). Soter II. lived about that time; but all these notices are untrustworthy; compare, on the date of the letter, Jacob in Stade's "Zeitschrift," x. 274-290, especially p. 279.

E. G. H. C. S.

ESTHER, FEAST OF. See PURIM.

ESTHER RABBAH: Midrash to the Book of Esther in the current Midrash editions. From its plan and scope it is apparently an incomplete collection from the rich haggadic material furnished by the comments on the roll of Esther, which has been read since early times at the public service on Purim. Except in the Wilna and Warsaw editions with their modern and arbitrary divisions, this Midrash consists of six "parashiyyot" (chapters, sections) introduced by one or more proems; these chapters begin respectively at Esth. i. 1, i. 4, i. 9, i. 13, ii. 1, ii. 5; and in the Venice edition of 1545 each has at the end the words "selika parashata. . . ." This division was probably based on the sections of the Esther roll, as indicated by the closed paragraphs (סתומות); such paragraphs existing in the present text to i. 9, i. 13, i. 16, ii. 1, ii. 5, etc. The beginning of i. 4, as well as the lack of a beginning to i. 16, may be due to differences in the division of the text. It may furthermore be assumed that a new parashah began with the section Esth. iii. 1, where several proems precede the comment of the Midrash. From this point onward there is hardly a trace of further division into chapters. There is no new parashah even to Esth. vi. 1, the climax of the Biblical drama. As the division into parashiyyot has not been carried out throughout the work, so the comment accompanying the Biblical text, verse by verse, is much reduced in ch. vii. and viii., and is discontinued entirely at the end of ch. viii. The various paragraphs that follow chapter viii. seem to have been merely tacked on.

The Book of Esther early became the subject of comment in the schoolhouses, as may be seen from Meg. 10b *et seq.*, where long haggadic passages are joined to single verses. The Midrash under consideration is variously connected with these passages. The author of Esther Rabbah often draws directly upon Yerushalmi, Bereshit Rabbah, Wayikra Rabbah, Pirke R. El., Targumim, and other ancient sources. Bereshit Rabbah or Wayikra Rabbah may also have furnished the long passage in parashah i., in connection with the explanation of the first word (ויהי). Parashah vi. shows several traces of a later period: especially remarkable here (ed. Venice, 45c, d; ed. Wilna, 14a, b) is the literal borrowing from Yosippon, where Mordecai's dream, Mordecai's and Esther's prayers, and the appearance of Mordecai and Esther before the king are recounted (compare also the additions in LXX. to Esth. i. 1 and iv. 17). These borrowings, which even Azariah dei Rossi in his "Me'or 'Enayim" (ed. Wilna, p. 231) designated as later interpolations, do not justify one in assigning to the Midrash, as Buber does, a date later than Yosippon—that is to say, the middle of the tenth century.

This Midrash may be considered older and more original than the Midr. Abba Gorion to the Book of Esther. Yalkut quotes many passages from the latter Midrash, as well as from another haggadic commentary (edited by Buber in the collection "Sammlung Agadischer Commentare zum Buche Esther," Wilna, 1886). The Midrash here considered is entitled "Midrash Megillat Esther" in the Venice edition. Naḥmanides quotes it as the Haggadah to the Esther roll. It may be assumed with certainty that it is of Palestinian origin.

ESTHONIA: Government of Russia; one of the three BALTIC PROVINCES. It has a total population (1897) of 404,709, of whom 1,468 are Jews. Not until the last quarter of the nineteenth century did Jewish artisans, and others specially privileged, begin to settle in the province, which is outside of the Pale of Settlement.

H. R. V. R.

ESTIMATE (ערכין): Estimate differs greatly from APPRAISEMENT. The latter is a valuation put upon land or upon some commodity by men acting in a judicial capacity; the former is a sort of valuation made by the Mosaic law itself, mostly independent of the actual value, and oftener upon persons than on things. While appraisement is always a matter of jurisprudence, estimates, in the technical sense of the word, belong in the category of sacerdotal laws.

The estimates for persons of either sex and of any age, and for fields, are given in the traditional law on the subject, which is elaborated in the treatise 'Arakin of the Mishnah and in the two Talmuds thereto.

The text in Leviticus provides that where a man by his vow consecrates a person to the Lord, the estimate shall be: for a male from one month to five years, five shekels; from five to twenty years, twenty shekels of silver; from twenty to sixty years, fifty shekels; over sixty years, fifteen shekels; for a female of like ages, three, fifteen, thirty, and ten shekels respectively. If the person who made the vow is poor, the priest is allowed to lower the regular estimate.

Estimates of Animals.

The consecration of a clean beast must be carried out literally. An unclean beast is estimated by the priest: it is here a real valuation. One-fifth is to be added by the master in redeeming. The same applies to a house. A field of a man's possession (that is, descended to him in his tribe) is estimated at fifty shekels for each omer of barley-seed it requires; but if some years have expired since the jubilee, the estimate is lessened in proportion. One-fifth is added on redemption. A "bought" field is similarly estimated according to the number of years to the jubilee, but in any case then goes back to the former owner. The shekel is that of the sanctuary, and is therefore equal in value to twenty gerahs.

One who is in his last gasp, or about to be executed, can be estimated; for the price is fixed. The estimate to be paid by a poor man can not be lessened below one shekel; but if he has more money about him, he must give it all up to the limit (R. Meïr dissents). The estimate of inherited land is wholly aside from the value. "The parks or pleasure-gardens of Sebaste are redeemed at the same figure as the worn-out space round the city wall" ('Ar. iii. 2).

The difference between the field of possession and a bought field is this: one-fifth must be added in redeeming the former, but not in redeeming the latter. Speaking generally, if a rich person consecrates a poor one, he must pay the full, or rich man's, estimate; but the poor man, even though he consecrates a rich man, need pay only the poor man's estimate.

Special Cases.

Passing by the definitions which the treatise 'Arakin gives of various vows, some special consecrations engage notice: "I owe the estimate of my hand or of my foot," means nothing; "I owe the estimate of my head," or of "my liver," is the same as "my estimate" simply; for a man can not live without head or liver. "I owe half my estimate," means paying half. "I owe the estimate of half of myself," means the full sum; for one can not live with half his body. The law does not allow the redemption of consecrated land to be made in yearly instalments, but the whole amount must be paid at one time.

The treasurer of the sanctuary may distrain the goods of the person causing the estimate for the amount; but the same exemptions must be set aside to him as are set aside to other debtors. In fact, the passage in 'Arakin (Mishnah vi. 3), which sets forth what is exempt from the treasurer's distraint, is the source of the exemption law found in the codes. The sanctuary may also, like a bond creditor, pursue the lands of the obligor in the hands of his heirs.

A distinction is found in 'Arakin between "vowing" a person and causing him to be estimated: the former implies the price which the particular person would bring if sold as a slave, which may be more or less than the estimate. One may consecrate, and thus cause to be estimated, either himself or some one else. Only minors, deaf-mutes, and lunatics can not consecrate; all but children less than a month old may be consecrated. A heathen, according to the prevailing opinion, may consecrate, but can not be estimated.

According to Lev. xxvii. 21, as construed in the Mishnah (vii. 3), the vows which are redeemable in estimates go to the priesthood as an organized whole. Hence the whole system fell into disuse with the destruction of the Temple. It is therefore not touched upon in the modern codes (Arba' Ṭurim and Shulḥan 'Aruk); Maimonides, however, aiming here as he does elsewhere to cover the whole traditional law, has his hilkot 'Arakin wa-Ḥaramin. It is needless to follow the subject into further details.

ESTRUMSA (ESTRUMZA, STRUMZA, or **ESTROSA):** Oriental Jewish family which has produced several rabbinical authors; takes its name from "Strumnitza" in Macedonia.

Daniel Estrumsa: Rabbi and Talmudist; died at Salonica (?) in 1654. A pupil of Rabbi Mordecai Ḳala'i, he became a rabbi of Salonica and chief of the Portuguese yeshibah there. He wrote: "Magen Gibborim," responsa, arranged in the order of the Shulḥan 'Aruk, and published by his grandson, Daniel b. Isaac Estrumsa (Salonica, 1753); Talmudical notes on the "Kol ha-Ẓelamim" of the 'Abodah Zarah, included in the "Ben le-Abraham" of Ḥayyim Abraham Estrumsa (1826); Responsa, included in Solomon ibn Ḥason's "Bet Shelomoh" (1719); "Shemot Giṭṭin," on the spelling of proper nouns in divorce bills, included in Ḥayyim Abraham Estrumsa's "Yerek Abraham"; a collection of marginal notes on Ṭur Ḥoshen Mishpaṭ, included in the "Doresh Mishpaṭ" of Solomon b. Samuel Florentin (1655).

From Estrumsa's yeshibah a number of well-known Eastern rabbis graduated, among them being David Conforte, author of "Ḳore ha-Dorot."

"A - rise, and of - fer him to Me an.... of - f'ring." Dal Segno.

'ET SHA'ARE RAẒON (עת שערי רצון): A long poem on the binding of Isaac upon the altar ('AKEDAH), written by Judah ben Samuel ibn Abbas, a twelfth-century rabbi of Fez, for chanting before the sounding of the shofar, and so utilized in the Sephardic liturgy of the New-Year. It is associated there with a very old Morisco chant, which is characteristic of its origin in the southern cities of Spain, and which well exhibits the general mechanism of the older chants, and the tonal construction of the intonations traditional in the Sephardic congregations. Particularly is this the case in the prominence of the third and fifth degrees of the scale, and in the combination and repetition of brief phrases in sentences of different lengths.

ETAM (עיטם): **1.** Village of the tribe of Simeon (I Chron. iv. 32), not found in the parallel list of localities in Joshua.

2. Place in Judah, near Bethlehem, fortified and garrisoned by Rehoboam (II Chron. xi. 6).

3. A rock, also in Judah, to which Samson retired after the slaughter of the Philistines (Judges xv. 8, 11), and near which place was the fountain En-hakkore. It is mentioned in the Talmud (Zeb. 54b) as "the fountain of Etam" (עין עיטם), the most elevated place in Palestine. Josephus ("Ant." viii. 7, § 3) places this fountain sixty stadia south of Jerusalem, and mentions that the water was brought to that city by means of aqueducts, the remains of which were still visible in his time. A village called "Etam" occurs in the Mishnah (Yeb. xii. 7), and is, perhaps, identical in site with the fountain of that name (see Robinson, "Biblical Researches," i. 515, ii. 168).

4. In I Chron. iv. 3 "Etam" may be either a person or a place; if the latter, it must be identical with the Etam of Judah.

E. G. H. M. Sel.

ETAMPES (Hebr. איטנפש or אטונפש): Capital of the arrondissement of the department of Seine-et-Oise, France. The origin of the Jewish community of Etampes seems to go back to the twelfth century. King Louis VII. appointed a provost in this city, who alone had the right to enforce the payment of debts to the Jews, and who was forbidden to arrest debtors during the fair. Philip Augustus expelled the Jews in 1181, and transformed their synagogue into the Church of the Holy Cross, for which the pope claimed the privileges which the synagogue had enjoyed. On their readmission the Count of Etampes was appointed guardian of the privileges of the Jews.

The rabbis of Etampes took part in the Synod of Troyes (1160). Toward the end of the twelfth century R. Nathan, son of R. Meshullam ben Nathan of Melun, lived at Etampes.

ETERNAL LIFE. See Eschatology.

ETERNAL PUNISHMENT. See Eschatology.

ETHAN: 1. A man famous for his wisdom (I Kings iv. 31); it is said that Solomon was wiser than he, although it is not clear from this passage whether he was Solomon's contemporary or whether he lived before that king. The matter is settled, however, in I Chron. ii. 6, 8, where he is mentioned as the representative of the third generation after Judah. There are no grounds for identifying this Ethan with the "Etana" of the Babylonian mythology (comp. M. Jastrow, "Religion of Babylonia and Assyria," p. 519), since Etana was not famous for his wisdom. On Ethan as the author of Ps. lxxxix. (verse 1) see Ezrahite.

2. Descendant of Levi's eldest son, Gershom; he was the ancestor of the celebrated Asaph, and the grandfather of a man named Zerah (I Chron. vi. 42).

3. One of the descendants of Levi's third son, Merari (I Chron. vi. 29), and a son of Rishi or Kushaiah (I Chron. *ib.*; xv. 17). This third Ethan was one of the famous triad of musicians, Heman, Asaph, and Ethan (elsewhere called "Jeduthun"), appointed by David (*ib.* xv. 16-19). This Ethan-Jeduthun probably composed the music to Psalm xxxix., in the superscription to which he bears the title "menaẓẓeaḥ" (prefect, or conductor). Descendants of Jeduthun are mentioned (II Chron. xxix. 14) as living at the time of Hezekiah, and also after the Exile (Neh. xi. 17). Ethan-Jeduthun has a still higher office, however, in I Chron. xxv. 1, where he is one of the prophets of the second class, found in the so-called schools of the prophets (I Sam. x. 5). In his songs he reproduced the utterances of the real prophets, and, having been commissioned by the king, he was called the "king's seer" (II Chron. xxxv. 15). The same title is given to Heman (I Chron. xxv. 5) and also to Asaph (II Chron. xxix. 30).

E. G. H. E. K.

ETHAUSEN, ALEXANDER BEN MOSES: German scholar; lived at Fulda in the seventeenth century. He was the author of a Judæo-German work in two parts: the first, "Bet Yisrael," a history of the Jews up to the destruction of the Second Temple; and the second, "Bet ha-Beḥirah," in twenty-four chapters, a description of Jerusalem and of both temples (Offenbach, 1719).

D. M. Sel.

ETHER (עתר): One of the cities in the lowland of Judah allotted to Simeon (Josh. xv. 42, xix. 7).

E. G. H. M. Sel.

ETHICAL CULTURE, SOCIETY FOR: A non-sectarian, ethicoreligious society founded at New York by Prof. Felix Adler in 1876. The society assumed the motto "Deed, not Creed," and adopted as the one condition of membership a positive desire to uphold by example and precept the highest ideals of living, and to aid the weaker to attain those ideals. The aims of the society are stated as follows: "To teach the supremacy of the moral ends above all human ends and interests; to teach that the moral law has an immediate authority not contingent on the truth of religious beliefs or of philosophical theories; to advance the science and art of right living." The members of the society are free to follow and profess whatever system of religion they choose, the society confining its attention to the moral problems of life. It has given practical expression to its aims by establishing the Workingman's School, a model school for general and technical education, in which the use of the kindergarten method in the higher branches of study is a distinctive feature. Each of its teachers is a specialist as well as an enthusiast in his subject; the Socratic method is followed. The majority of the pupils are of non-Jewish parentage. Pupils over seven are instructed in the use of tools. The society has also established a system of district-nursing among the poor, and a family home for neglected children.

Branch societies have been formed in Chicago, Philadelphia, St. Louis, Cambridge (England), and London, and a similar movement was started in Berlin. While originally agnostic in feeling, the society has gradually developed into a simple, human brotherhood, united by ethical purpose, and has, as such, acquired a strong influence in distinctively Christian circles in some parts of Europe. The only approach to a religious service is a Sunday address on topics of the day, preceded and followed by music. Its chief supporters in New York and Philadelphia are Jews, as is its founder and leader, though the society does not in any degree bear the stamp of Judaism. It has recently erected an elaborate building in New York. A society on similar lines exists at Frankfort-on-the-Main. E. W. B.

ETHICS (ἦϑος = "habit," "character"): The science of morals, or of human duty; the systematic presentation of the fundamental principles of human conduct and of the obligations and duties deducible therefrom. It includes, therefore, also the exposition of the virtues and their opposites which characterize human conduct in proportion to the extent to which man is under the consecration of the sense of obligation to realize the fundamental concepts of right conduct. Ethics may be divided into general, or theoretical, and particular, or applied. Theoretical ethics deals with the principles, aims, and ideas regulating, and the virtues characterizing, conduct—the nature, origin, and development of conscience, as attending and judging human action. Applied ethics presents a scheme of action applicable to the various relations of human life and labor, and sets forth what the rights and duties are which are involved in these relations. Ethics may also be treated descriptively; this method includes a historical examination, based upon data collected by observation, of the actual conduct, individual or collective, of man, and is thus distinct from ethics as dynamic and normative, as demanding compliance with a certain standard resulting from certain fundamental principles and ultimate aims. Philosophical ethics embraces the systematic development of ethical theory and practise out of a preceding construction (materialistic or idealistic) of life and its meaning (optimistic or pessimistic). Religious ethics finds the principles and aims of life in the teachings of religion, and proceeds to develop therefrom the demands and duties which the devotee of religion must fulfil.

Jewish ethics is based on the fundamental concepts and teachings of Judaism. These are contained, though not in systematized formulas, in Jewish literature. As it is the concern of Jewish theology to collect the data scattered throughout this vast literature, and construe therefrom the underlying system of belief and thought, so it is that of Jewish ethics to extract from the life of the Jews and the literature of Judaism the principles recognized as obligatory and actually regulating the conduct of the adherents of Judaism, as well as the ultimate aims apprehended by the consciousness of the Jew as the ideal and destiny set before man and humanity (see Lazarus, "Die Ethik des Judenthums," pp. 9 *et seq.*). This entails resort to both methods, the descriptive and the dynamic. Jewish ethics shows how the Jew has acted, as well as how he ought to act, under the consecration of the principles and precepts of his religion. Jewish ethics may be divided into (1) Biblical, (2) Apocryphal, (3) rabbinical, (4) philosophical, (5) modern; under the last will be discussed the concordant, or discordant, relation of Jewish ethics to ethical doctrine as derived from the theories advanced by the various modern philosophical schools.

——**Biblical Data:** The books forming the canon are the sources whence information concerning the ethics of Bible times may be drawn. These writings, covering a period of many centuries, reflect a rich variety of conditions and beliefs, ranging from the culture and cult of rude nomadic shepherd tribes to the refinement of life and law of a sedentary urban population, from primitive clan henotheism to the ethical monotheism of the Prophets. The writings further represent two distinct types, the sacerdotal theocracy of the Priestly Code and the universalism of the Wisdom series—perhaps also the apocalyptic Messianism of eschatological visions. It would thus seem an unwarranted assumption to treat the ethics of the Bible as a unit, as flowing from one dominant principle and flowering in the recognition of certain definite lines of conduct and obligation. Instead of one system of ethics, many would have to be recognized and expounded in the light of the documents; for instance, one under the obsession of distinctively tribal conceptions, according to which insult and injury entail the obligation to take revenge (Gen. iv. 23, 24; Judges xix.-xx.), and which does not acknowledge the right of hospitality (Gen. xix.; Judges xix.); another under the domination of national ambitions (Num. xxxi. 2 *et seq.*), with a decidedly non-humane tinge (Deut. xx. 13, 14, 16, 17). But it must be remembered that the ultimate outcome of this evolution was ethical monotheism, and that under the ideas involved in it Biblical literature was finally canonized, many books being worked over in accordance with the later religious conviction, so that only a few fragmentary indications remain of former ethical concepts, which were at variance with those sprung from a nobler and purer apprehension of Israel's relation to its God and His nature.

The critical school, in thus conceding that the canon was collected when ethical monotheism had obliterated all previous religious conceptions, is virtually at one, so far as the evidential character of the books concerning the final ethical positions of the Bible comes into play, with the traditional school, according to which the monotheism of the Bible is due to divine revelation, from which the various phases of popular polytheism are wilful backslidings. It is therefore permissible in the presentation of Biblical ethics to neglect the indications of anterior divergences, while treating it as a unit, regardless of the questions when and whether its ideal was fully realized in actuality. The treatment is more difficult on account of the character of the Biblical writings. They are not systematic treatises. The material which they contain must often be recast, and principles must be deduced from the context that are not explicitly stated in the text.

With these cautions and qualifications kept in view, it is safe to hold that the principle underlying the ethical concepts of the Bible and from which the positive duties and virtues are derived is the unity and holiness of God, in whose image man was created, and as whose priest-people among the nations Israel was appointed. A life exponential of the divine in the human is the "summum bonum," the purpose of purposes, according to the ethical doctrine of the Biblical books. This life is a possi-

Autonomous in Sanction.

bility and an obligation involved in the humanity of every man. For every man is created in the image of God (Gen. i. 26). By virtue of this, man is appointed ruler over all that is on earth (Gen. i. 28). But man is free to choose whether he will or will not live so as to fulfil these obligations. From the stories in Genesis it is apparent that the Bible does in no way regard morality as contingent upon an antecedent and authoritative proclamation of the divine will and law. The "moral law" rests on the nature of man as God's likeness, and is expressive thereof. It is therefore autonomous, not heteronomous. From this concept of human life flows and follows necessarily its ethical quality as being under obligation to fulfil the divine intention which is in reality its own intention. Enoch, Noah, Abraham, and other heroes of tradition, representing generations that lived before the Sinaitic revelation of the Law, are conceived of as leading a virtuous life; while, on the other hand, Cain's murder and Sodom's vices illustrate the thought that righteousness and its reverse are not wilful creations and distinctions of a divinely proclaimed will, but are inherent in human nature. But Israel, being the people with whom God had made His covenant because of the Patriarchs who loved Him and were accordingly loved by Him—having no other claim to exceptional distinction than this—is under the obligation to be *the* people of God (עם סגלה, Ex. xix. 5 *et seq.*) that is to illustrate and carry out in all the relations of human life, individual and social, the implications of man's godlikeness. Hence, for Israel the aim and end, the "summum bonum," both in its individuals and as a whole, is "to be holy." Israel is a holy people (Ex. xix. 6; Deut. xiv. 2, 21; xxvi. 19; xxviii. 9), for "God is holy" (Lev. xix. 2, *et al.*). Thus the moral law corresponds to Israel's own historic intention, expressing what Israel knows to be its own innermost destiny and duty.

Israel and God are two factors of one equation. The divine law results from Israel's own divinity. It is only in the seeming, and not in the real, that this law is of extraneous origin. It is the necessary complement of Israel's own historical identity.

God is the Lawgiver because He is the only ruler of Israel and its Judge and Helper (Isa. xxxiii. 22). Israel true to itself can not be untrue to God's law. Therefore God's law is Israel's own highest life. The statutory character of Old Testament ethics is only the formal element, not its essential distinction. For this God, who requires that Israel "shall fear him and walk in all his ways and shall love and serve him with all its heart and all its soul" (Deut. x. 12, Hebr.), is Himself the highest manifestation of ethical qualities (Ex. xxxiv. 6, 7). To walk in His ways, therefore, entails the obligation to be, like Him, merciful, etc. This holy God is Himself He that "regardeth not persons, nor taketh reward: He doth execute the judgment of the fatherless and widow, and loveth the stranger" (Deut. x. 17–18), qualities which Israel, as exponential of His unity and power and love, must exhibit as the very innermost ambitions of its own historical distinctness (Deut. x. 19 *et seq.*).

Family Ethics.

Hence great stress is laid on reverence for parents (Ex. xx. 12; Lev. xix. 3). Central to the social organism is the family. Its head is the father; yet the mother as his equal is with him entitled to honor and respect at the hands of sons and daughters. Monogamy is the ideal (Gen. ii. 24). Marriage within certain degrees of consanguinity or in relations arising from previous conjugal unions is forbidden (Lev. xviii. 6 *et seq.*); chastity is regarded as of highest moment (Ex. xx. 14; Lev. xviii. 18–20); and abominations to which the Canaanites were addicted are especially loathed. The unruly and disrespectful son (Ex. xxi. 17) is regarded as the incarnation of wickedness. As virtue and righteousness flow from the recognition of the holy God, idolatry is the progenitor of vice and oppression (Ex. xxiii. 24 *et seq.*). For this judgment history has furnished ample proof. Hence the ethics of the Pentateuch shows no tolerance to either idols or their worshipers. Both being sources of contamination and corruption, they had to be torn out by the roots (Lev. xix. 4; Ex. xx. 3 *et seq.*; Deut. iv. 15–25 *et seq.*). Marriages with the aboriginal tribes were therefore prohibited (Deut. vii. 3), for Israel was to be a "holy" people. To the family belonged also the slaves (Deut. xvi. 14). While slavery in a certain sense was recognized, the moral spirit of the Pentateuchal legislation had modified this universal institution of antiquity (see Cruelty; Slavery). The Hebrew slave's term of service was limited; the female slave enjoyed certain immunities. Injuries led to manumission (Ex. xxi. 2–7, 20, 26). Man-stealing (slave-hunting) entailed death (Ex. xxi. 16). The stranger, too, was within the covenant of ethical considerations (Ex. xxii. 20 [A.V, 21]; Lev. xix. 33). "Thou shalt love him as thyself," a law the phraseology of which proves that in the preceding "thou shalt love thy neighbor as thyself" (Lev. xix. 18) "neighbor" does not connote an Israelite exclusively. There was to be one law for the native and the stranger (Lev. xix. 34; comp. Ex. xii. 49). As was the stranger (Ex. xxiii. 9), so were the poor, the widow, the orphan, commended to the special solicitude of the righteous (see Interest; Poor Laws; Usury; Lev. xix. 9 *et seq.*; Ex. xxii. 24 *et seq.*, xxiii. 6).

Altruistic Virtues.

In dealings with men honesty and truthfulness are absolutely prerequisite. Stealing, flattery, falsehood, perjury and false swearing, oppression, even if only in holding back overnight the hired man's earnings, are under the ban; the coarser cruelties and dishonesties are forbidden, but so are the refined ones; and deafness and blindness entitled to gentle consideration him who was afflicted by either of these infirmities (Lev. xix. 11–14). The reputation of a fellow man was regarded as sacred (Ex. xxiii. 1). Tale-bearing and unkind insinuations were proscribed, as was hatred of one's brother in one's heart (Lev. xix. 17). A revengeful, relentless disposition is unethical; reverence for old age is inculcated; justice shall be done; right weight and just measure are demanded; poverty and riches shall not be regarded by the judge (Lev. xix. 15, 18, 32, 36; Ex. xxiii. 3). The dumb animal has claims upon the kindly help of man (Ex. xxiii. 4), even though it belongs to one's enemy. This epitome of the positive commandments and prohibitions, easily enlarged, will suffice to show the scope of the ethical relations considered by the Law. As a holy nation, Israel's public and private life was under consecration; justice, truthfulness, solicitude for the weak, obedience and reverence to those in authority, regard for the rights of others, strong and weak, a forgiving and candid spirit, love for fellow man and mercy for the beast, and chastity appear as the virtues flowering forth from Pentateuchal righteousness.

Motive of Morality.

It has often been urged that the motive of ethical action in the Pentateuch is the desire for material prosperity and the anxiety to escape disaster. This view confounds description of fact with suggestion of motive. The Pentateuchal lawgiver addresses himself always to the nation, not to the individual. In his system Israel is under divine discipline, intended to make it in ever greater measure worthy and fit to be a holy nation exponential of the holy God. The physical and political disasters which, from the point of view of modern critics, were actual experiences in the time of the Deuteronomist, were consequences of Israel's disloyalty. Only repentance of its evil ways and adoption of ways concordant with its inner historic duty would put an end to the divinely appointed and necessary punitive discipline. The motive of Israel's ethical self-realization as the "holy people," nevertheless, is not desire for prosperity or fear of disaster. It is to be true to its appointment as the priest-people. From this historical relation of Israel to God flows, without ulterior rewards or penalties, the limpid stream of Pentateuchal morality.

Prophetic Ethics.

For the Prophets, too, the distinct character of Israel is basic, as is the obligation of all men to lead a righteous life. The ritual elements and sacerdotal institutions incidental to Israel's appointment are regarded as secondary by the preexilic prophets, while the intensely human side is emphasized (Isa. i. 11 *et seq.*, lviii. 2 *et seq.*). Israel is chosen, not on account of any merit of its own, but as having been "alone singled out" by God; its conduct is under more rigid scrutiny than any other people's (Amos iii. 1-2). Israel is the "wife" (Hosea), the "bride" (Jer. ii. 2-3). This covenant is one of love (Hosea vi. 7); it is sealed by righteousness and loyalty (Hosea ii. 21-22). Idolatry is adulterous abandoning of God. From this infidelity proceed all manner of vice, oppression, untruthfulness. Fidelity, on the other hand, leads to "doing justly and loving mercy" (Micah vi. 8). Dissolution of the bonds of confidence and disregard of the obligation to keep faith each man with his fellow characterize the worst times (Micah vii. 5). Falsehood, deceitfulness, the shedding of blood, are the horrors attending upon periods of iniquity (Isa. lix. 3-6; Jer. ix. 2-5). Truth and peace shall men love (Zech. viii. 16-17). Adultery and lying are castigated; pride is deprecated; ill-gotten wealth is condemned (Jer. xxiii. 14, ix. 22-23, xvii. 11; Hab. ii. 9-11). Gluttony and intemperance, greed and frivolity, are abhorred (Isa. v. 22; Jer. xxi. 13-14; Amos vi. 1, 4-7). The presumptuous and the scoffers are menaced with destruction (Isa. xxix. 20-21; Ezek. xiii. 18-19, 22). But kindness to the needy, benevolence, justice, pity to the suffering, a peace-loving disposition, a truly humble and contrite spirit, are the virtues which the Prophets hold up for emulation. Civic loyalty, even to a foreign ruler, is urged as a duty (Jer. xxix. 7). "Learn to do good" is the key-note of the prophetic appeal (Isa. i. 17); thus the end-time will be one of peace and righteousness; war will be no more (Isa. ii. 2 *et seq.*; see Messiah).

In Psalms and Wisdom Literature.

In the Psalms and the Wisdom books the national emphasis is reduced to a minimum. The good man is not so much a Jew as a man (Ps. i.). The universal character of the Biblical ethics is thus verified. Job indicates the conduct and principles of the true man. All men are made by God (Job xxix. 12-17, xxxi. 15). The picture of a despicable man is that given in Prov. vi. 12-15, and the catalogue of those whom God hates enumerates the proud, the deceitful, the shedder of innocent blood, a heart filled with intrigues, and feet running to do evil; a liar, a false witness, and he who brings men to quarrel (Prov. vi. 16-19). The ideal of woman is pictured in the song of the true housewife (Prov. xxxi. 8 *et seq.*), while Psalms xv. and xxiv. sketch the type of man Israel's ethics will produce. He walketh uprightly, worketh righteousness, speaketh truth in his heart. He backbiteth not. The motive of such a life is to be permitted "to dwell in God's tabernacle," in modern phraseology to be in accord with the divine within oneself. The priesthood of Israel's One God is open to all that walk in His ways. The ethics of the Bible is not national nor legalistic. Its principle is the holiness of the truly human; this holiness, attainable by and obligatory upon all men, is, however, to be illustrated and realized by and in Israel as the holy people of the one holy God.

The temper of the ethics of the Bible is not ascetic. The shadow of sin is not over earth and man. Joy, the joy of doing what "God asks," and what the law of man's very being demands, willingly and out of the full liberty of his own adaptation to this inner law of his, is the clear note of the Old Testament's ethical valuation of life. The world is good and life is precious, for both have their center and origin in God. He leads men according to His purposes, which come to pass with and without the cooperation of men. It is man's privilege to range himself on the side of the divine. If found there, strength is his; he can not fall nor stumble; for righteousness is central in all. But if he fails to be true to the law of his life, if he endeavors to ignore it or to supersede it by the law of selfishness, which is the law of sin, he will fail. "The way of the wicked He turneth upside down" (Ps. i.). Ethics reaches thus beyond the human and earthly, and is related to the eternal. Ethics and religion are in the Bible one and inseparable.

K.

——**In Apocryphal Literature:** Ethics in systematic form and apart from religious belief is as little found in apocryphal or Judæo-Hellenistic literature as in the Bible, though Greek philosophy has greatly influenced Alexandrian writers such as the authors of IV Maccabees and the Book of Wisdom (see CARDINAL VIRTUES), and, above all, PHILO. Nevertheless decided progress is noticeable both in the conception and in the accentuation of theoretical ethics from the time the Jews came into closer contact with the Hellenic world. Before that period the Wisdom literature shows a tendency to dwell solely on the moral obligations and problems of life as appealing to man as an individual, leaving out of consideration the ceremonial and other laws which concern only the Jewish nation. From this point of view Ben Sira's collection of sayings and monitions was written, translated into Greek, and circulated as a practical guide (παιδαγωγός: Clemens Alexandrinus, "Pædagogus," ii. 10, 99 *et seq.*), giving instructions from a matter-of-fact or utilitarian standpoint on the various relations of man to man in the domestic and social sphere of activity. The book contains popular ethics in proverbial form as the result of everyday life experience, without higher philosophical or religious principles and ideals; also in regard to charity (*ib.* iv. 1 *et seq.*, vii. 32 *et seq.*) the author takes a popular view (see SIRA, BEN). It is possible that other books of a similar nature existed in the pre-Maccabean era and were lost (see AḤIḲAR).

Of a higher character are the ethical teachings which emanated from Ḥasidean circles in the Maccabean time, such as are contained in TOBIT, especially in ch. iv.; here the first ethical will or testament ("ẓawwa'ah") is found, giving a summary of moral teachings, with the Golden Rule, "Do that to no man which thou hatest!" as the leading maxim. There are even more elaborate ethical teachings in the Testaments of the Twelve Patriarchs, in which each of the twelve sons of Jacob, in his last words to his children and children's children, reviews his life and gives them moral lessons, either warning them against a certain vice he had been guilty of, so that they may avoid divine punishment, or recommending them to cultivate a certain virtue he had practised during life, so that they may win God's favor. The chief virtues recommended are: love for one's fellow man; industry, especially in agricultural pursuits; simplicity; sobriety; benevolence toward the poor; compassion even for the brute (Issachar, 5; Reuben, 1; Zebulun, 5-8; Dan, 5; Gad, 6; Benjamin, 3), and avoidance of all passion, pride, and hatred. Similar ethical farewell monitions are attributed to Enoch in the Ethiopic Enoch (xciv. *et seq.*) and the Slavonic Enoch (lviii. *et seq.*), and to the three patriarchs (see Barnes, "The Testaments of Abraham, Isaac, and Jacob," in "Texts and Studies," ii. 144, Cambridge, 1892).

The Hellenistic propaganda literature, of which the didactic poem under the pseudonym of PHOCYLIDES is the most characteristic, made the propagation of Jewish ethics taken from the Bible its main object for the sake of winning the pagan world to pure monotheism. It was owing to this endeavor that certain ethical principles were laid down as guiding maxims for the Gentiles; first of all the three capital sins, idolatry, murder, and incest, were prohibited (see Sibyllines, iii. 38, 761; iv. 30 *et seq.*; comp. Targ. Yer. Gen. xiii 13, *et al.*); then these so-called NOACHIAN LAWS were gradually developed into six, seven, and ten, or thirty laws of ethics binding upon every human being (Sanh. 56a, b; see also COMMANDMENTS). Regarding the ethical literature for converts see DIDACHE.

——**Rabbinical:** The whole rabbinical system of ethics is based upon humanitarian laws of righteousness. "Rather than commit any one of the three capital sins—idolatry, adultery, murder—man (even the Gentile) should give up his life" (Sanh. 74a, b); by disregard of this prohibition the heathen forfeits his claim upon human compassion and love ('Ab. Zarah 2b; Sanh. 108a), while the solemn acceptance of it secures him the claim to love and support (Sifra, Behar, vi. 5; Pes. 21b). It was with reference to the Gentile world that the Golden Rule was pronounced by Hillel as the cardinal principle of the Jewish law (Shab. 31a; Ab. R. N., text B, xxvi.; ed. Schechter, p. 53). Akiba is more explicit: "Whatever thou hatest to have done unto thee do not unto thy neighbor; wherefore do not hurt him; do not speak ill of him; do not reveal his secrets to others; let his honor and his property be as dear to thee as thine own" (Ab. R. N., text B, xxvi., xxix., xxx., xxxiii.).

The scope of Jewish ethics embraces not only the Jew, but man, the fellow creature (see CREATURE). This is strongly emphasized by Ben Azzai when he says: "The Torah, by beginning with the book of the generations of man [Gen. v. 1], laid down the great rule for the application of the Law: Love thy neighbor as thyself" (Lev. xix. 18; Gen. R. xxiv., end). "Love the creature!" is therefore Hillel's maxim (Abot i. 12), and "hatred of the creature" is denounced by R. Joshua (*ib.* ii. 11).

Ideal and Motive.

The source and ideal of all morality is God, in whose ways man is to walk (Deut. xi. 22). As He is merciful and gracious so man should be (Sifra, Deut. 49; Mek., Beshallah, to Ex. xv. 2; Soṭah 14a, with reference to Deut. xiii. 5). This is in accordance with Abraham's being singled out "to command his children and his house after him, to observe the way of the Lord, to do righteousness and justice" (Gen. xviii. 19, Hebr.). The motive of moral action should be pure love of God (Sifra, Deut. 48, after xi. 22), or fear of God, and not desire for recompense. "Be not like the servants that serve their master for the sake of getting a share, but let the fear of God be upon you" (Abot i. 3).

The cardinal principle of rabbinical ethics is that the very essence of God and His law is moral perfection; hence the saying of R. Simlai (see COMMANDMENTS): "Six hundred and thirteen commandments were given to Moses; then David came and reduced them to eleven in Psalm xv.; Isaiah (xxxiii. 15), to six; Micah (vi. 8), to three; Isaiah again (lvi. 1), to two; and Habakkuk (ii. 4), to one: 'The just lives by his faithfulness'" (A.V. "faith"; Mak. 23b). "The heathen nations, lacking the belief in a divine ideal of morality, refused to accept the law of Sinai enjoining the sacredness of life, of marriage, and of property" (Mek., Yitro, 5).

Religion and ethics are, therefore, intimately interwoven, for it is the motive which decides the moral value, the good or evil character of the action. "The words 'I am the Lord thy God,' following a Biblical command, express the idea that God judges men by the motive which springs from the heart and which escapes the notice of man" (Sifra, Ḳedoshim, iii. 2; B. M. 58b; comp. "God desires the heart": Sanh. 106b; Men. xiii. 11). "An evil deed done from a good motive is better than a good deed inspired by an evil [selfish] motive" (Naz. 23b; Yer. Peah i. 15c); hence "the resolve to sin is of greater consequence than the sin itself" (Yoma 29a). Every good act must therefore be done for the sake of God—"le-shem shamayim"—or of His law—"lishmah" (Abot ii. 12; Ber. 16a). Man has a free will (Abot iii. 15): "Do His will as if it were thy will, that He may do thy will as if it were His; annul thy will before His will, that He may annul other men's will before thine" (Abot ii. 4). "The righteous have their desires in their power; the wicked are in the power of their desires" (Ber. 61b).

Rabbinical ethics, the ethics of the Pharisees, while adopting the rigorous views of the Ḥasidim in principle, modified them by paying due regard to the whole of life and opposing the ascetic tendencies of the Essenes, and greatly deepened and enlarged the sense and the scope of morality and duty by infusing new ethical ideas and motives into both the laws and the stories of the Bible, lifting the letter of the Law to a high standard of spirituality. The fine ethical types created by the Ḥasidim out of the lives of the Patriarchs and of the ancient leaders of Israel became traditional prototypes and models, and each Mosaic law, having been greatly amplified in Ḥasidean practise, received a deeper meaning in the sphere of duty and responsibility. On the other hand, the Essene contempt for woman and home and the comforts of life was strongly opposed by the Pharisees, and consequently rabbinical ethics developed a healthy, practical, and vigorous spirit of morality which has nothing of the sentimentalism and otherworldliness of other systems, and is not absorbed by mere socialistic or altruistic concepts of life. Its character is best described by Hillel's maxim: "If I am not for myself, who is for me? and, being only for myself, what am I? and if not now, when?" (Abot i. 15).

Duty of Self-Assertion.

Man as child of God has first of all duties in regard to his own self. "He who subjects himself to needless self-castigations and fasting, or even denies himself the enjoyment of wine, is a sinner" (Ta'an. 11a, 22b). Man has to give account for every lawful enjoyment he refuses (Yer. Ḳid. iv. 66d). Man is in duty bound to preserve his life (Ber. 32b, after Deut. iv. 9; Sifra, Aḥare Mot, xiii.) and his health (B. Ḳ. 91b; Shab. 82a). Foods dangerous to health are more to be guarded against than those ritually forbidden (Ḥul. 10a). He should show self-respect in regard to both his body, "honoring it as the [sanctuary of the] image of God" (Hillel: Lev. R. xxxiv.), and his garments (Shab. 113b; Ned. 81a). He must perfect himself by the study of the Law, which must be of primary importance (Sifre, Deut. 34). "The third question God asks man at the Last Judgment is whether he studied the Law" (Shab. 31a). But study must be combined with work (Abot ii. 2; Ber. 35b). "Greater is the merit of labor than of idle piety" (Midr. Teh. cxxviii. 2). "Love labor" (Abot i. 10); "it honors man" (Ned. 49b; see Labor). One must remove every cause for suspicion in order to appear blameless before men as well as before God (Yoma 38a). Man is enjoined to take a wife and obtain posterity (Yeb. 63b; Mek., Yitro, 8). "He who lives without a wife lives without joy and blessing, without protection and peace"; he is "not a complete man" (Yeb. 62a, 63a), and for it he has to give reckoning at the great Judgment Day (Shab. 31a). For this accentuation of the dignity and sanctity of domestic life see Woman.

Social ethics is best defined by R. Simeon b. Gamaliel's words: "The world rests on three things: justice, truth, and peace" (Abot i. 18).

Justice and Righteousness.

Justice ("din," corresponding to the Biblical "mishpaṭ") being "God's" (Deut. i. 17), it must, according to the Rabbis as well as Mosaism (Ex. xxiii. 3), be vindicated at all costs, whether the object be of great or small value (Sanh. 8a). "Let justice pierce the mountain" is the characteristic maxim attributed to Moses (Sanh. 6b). They that blame and ridicule Talmudism for its hair-splitting minutiæ overlook the important ethical principles underlying its entire judicial code. It denounces as fraud every mode of taking advantage of a man's ignorance, whether he be Jew or Gentile; every fraudulent dealing, every gain obtained by betting or gambling or by raising the price of breadstuffs through speculation, is theft (Tosef., B. Ḳ. vii. 8-13; Tosef., B. M. iii. 25-27; B. B. 90b; Sanh. 25b; Ḥul. 94a); every advantage derived from loans of money or of victuals is usury (B. M. v.; Tosef., B. M. iv.); every breach of promise in commerce is a sin provoking God's punishment (B. M. iv. 2); every act of carelessness which exposes men or things to danger and damage is a culpable transgression (B. Ḳ. i.-vi.). It extends far beyond the Biblical statutes responsibility for every object given into custody of a person or found by him (B. M. ii. and iii.). It is not merely New Testament (Matt. v. 22), but Pharisaic, ethics which places insulting, nicknaming, or putting one's fellow man to shame, in the same category as murder (B. M. 58b), and which brands as calumny the spreading of evil reports even when true, or the listening to slanderous gossip, or the causing of suspicion, or the provoking of unfavorable remarks about a neighbor (Pes. 118a; B. M. 58b; 'Ar. 16a).

"The first question man is asked at the Last Judgment is whether he has dealt justly with his neighbor" (Shab. 31a). Nor is the mammon of unrighteousness to be placated for charitable or religious purposes (B. Ḳ. 94b; comp. Didascalia in Jew. Encyc. iv. 592; Suk. iii. 1), the Jewish principle being, "A good deed ["miẓwah"] brought about by an evil deed ["'aberah"] is an evil deed" (Suk. 30a). The Jewish idea of righteousness ("ẓedaḳah") includes benevolence (see Charity), inasmuch as the owner of property has no right to withhold from the poor their share. If he does, he acts like Sodom (Abot v. 10; comp. Ezek. xvi. 49); like an idolater (Tosef., Peah, iv. 20); or like a thief (Num. R. v., after Prov. xxii. 20). On the other hand, the Rabbis decreed, against Essene practise, that no one had a right to give more than the fifth of his possessions to charity (Ket. 50a; 'Ar. 28a; Yer. Peah i. 15b). The twin sister of righteousness is truth, and here too the Ḥasidim were the first to insist that swearing should not be resorted to, but that a man's yea should be yea, and his nay, nay (Ruth R. iii. 18; see ESSENES). "God shall punish him who does not abide by his word" (B. M. iv. 2). "He who prevaricates is as one who worships an idol instead of the God of truth" (Sanh. 92a). One should be careful not to deviate from the truth even in conventionalities or in fun, was the teaching of Shammai (Ket. 17a; Suk. 46b). "Teach thy tongue to say, 'I do not know,' lest thou be entangled in some untruth" (Ber. 4a). "God hates him who speaks with his tongue what he does not mean in his heart." "It was the father of the Canaanites who taught them to speak untruth" (Pes. 113b). "Truth is the signet of God" (Yer. Sanh. i. 18a; see TRUTH).

Truth and Peace.

While peace is everywhere recommended and urged as the highest boon of man (Num. R. xi.; Pes. i. 1; 'Uḳ. iii. 12), hatred, quarrelsomeness, and anger are condemned as leading to murder (Derek Ereẓ Rabbah, xi.; Yoma 9b; Yer. Peah i. 16a). The highest principle of ethics, rabbinical as well as Biblical, is holiness, that is, separation from, and elevation above, everything sensual and profane (*i.e.*, everything in animal life that is contaminating or degrading). The words which stand at the head of the principal chapter on ethics in the Mosaic law, "Ye shall be holy: for I the Lord your God am holy" (Lev. xix.2), are explained (Sifra, Ḳedoshim, i.) as: "Be separated ["perushim"] from a world that is addicted to the appetites and passions of the flesh, in order to sanctify Me by emulating My ways." "Keep away from everything leading to impurity" (Lev. R. xxiv.). "God's holiness is manifested in His punitive righteousness, which consumes wrong and sin" (Tan., Ḳedoshim, ed. Buber, 1, 4). From this principle emanated the necessity of a people consecrated to the service of a holy God (Tan. *l.c.*; Ex. xxii. 3; Lev. xx. 26; Deut. xiv. 2; comp. Mekilta, Sifra, Sifre, and Rabbot on the passages), and the whole Mosaic legislation, with its hygienic and marriage laws, gave a high ethical meaning and purpose to the entire life of the Jew. Similarly the Sabbath holiness (Ex. xx. 8; Mek.; see Pesiḳ. R. 23) lifted domestic and social life to a higher ethical level. The very minute precepts of rabbinical law spiritualized every part of life. So when washing of the hands before and after each meal was made obligatory, it was "to sanctify" the body and the table of the Jew (see ABLUTION). The Sabbath joy was also to be "hallowed" by wine (see ḲIDDUSH).

From the thought of a holy God emanated these four virtues: (a) The virtue of CHASTITY ("ẓeni'ut" = "bashfulness"; Deut. xxiii. 14; Ned. 20a, after Ex. xx. 20), which shuts the eye against unseemly sights and the heart against impure thoughts (Sifre, Shelaḥ Leka, to Num. xv. 14). Hence R. Meïr's maxim (Ber. 17a): "Keep thy mouth from sin, thy body from wrong, and I [God] will be with thee." (b) The virtue of humility. As God's greatness consists in His condescension (Meg. 31a), so does the Shekinah rest only upon the humble (Mek., Yitro, 9; Ned. 38), whereas the proud is like one who worships another god and drives God away (Soṭah 4b). (c) Truthfulness. "Liars, mockers, hypocrites, and slanderers can not appear before God's face" (Soṭah 42a). (d) Reverence for God. "Fear of God leads to fear of sin" (Ber. 28b), and includes reverence for parents and teachers (Ḳid. 31d; Pes. 22b).

Ḳiddush and Ḥillul ha-Shem.

Thus the idea of God's holiness became in rabbinical ethics one of the most powerful incentives to pure and noble conduct. "Thou shalt love the Lord thy God" (Deut. vi. 5) is explained (Sifre, Deut. 32; Yoma 86a) to mean "Act in such a manner that God will be beloved by all His creatures." Consequently Israel, being, as the priest-people, enjoined like the Aaronite priest to sanctify the name of God and avoid whatever tends to desecrate it (Lev. xxii. 32), is not only obliged to give his life as witness or martyr for the maintenance of the true faith (see Isa. xliii. 12, μάρτυρες; and Pesiḳ. 102b; Sifra, Emor, ix.), but so to conduct himself in every way as to prevent the name of God from being dishonored by non-Israelites. The greatest sin of fraud, therefore, is that committed against a non-Israelite, because it leads to the reviling of God's name (Tosef., B. Ḳ. x. 15). Desecration of the Holy Name is a graver sin than any other (Yer. Ned. iii. 38b; Sanh. 107a); it is an iniquity which, according to Isa. xxii. 14 (Mek. *l.c.*; Yoma. 86a)—shall never be expiated until death—a tradition strangely altered into the New Testament ("Blasphemy against the Holy Ghost shall not be forgiven unto men") Matt. xii. 31, and parallels). The desire to sanctify the name of God, on the other hand, leads men to treat adherents of other creeds with the utmost fairness and equity (see Yer. B. M. ii. 8c, and SIMEON B. SHETAḤ; and compare GOD, NAMES OF; ḲIDDUSH HA-SHEM). The fundamental idea of Jewish ethics is accordingly that of true humanity, without distinction of race or creed (comp. Sifra, Aḥare Mot, to Lev. xviii. 5). "The righteous" (not "priests, Levites, and Israelites") shall enter "the gate of the Lord" (Ps. cxviii. 20). "It is forbidden to take advantage of the ignorance of any fellow creature, even of the heathen" (Ḥul. 94a; comp. Shebu. 39a; comp. Mak. 24a: "He only dwells in God's tent who takes usury neither from Gentile nor from Jew"). "No one can be called righteous before God who is not good toward his fellow creatures" (Ḳid. 40a). Respect for one's fellow creatures is of such importance that Biblical prohibitions may be transgressed on its account (Ber. 19b). Especially do unclaimed dead require respectful burial (see BURIAL in JEW. ENCYC. iii. 432b: "met miẓwah"). Gentiles are to have a share in all the benevolent work of a township which appeals to human sympathy and on which the maintenance of peace among men depends, such as supporting the poor, burying the dead, comforting the mourners, and even visiting the sick (Tosef., Giṭ. v. 4–5; Giṭ. 64a).

Ethical Relations.

The relation between man and woman is in rabbinical ethics based upon the principle of chastity and purity which borders on holiness. It is the inheritance of the Ẓenu'im, or Ḥasidim, who strove after the highest standard of holiness (see Yer. Yeb. i. 3d; Lev. R. xxiv.; Essenes). No other vice appears to the Rabbis as detestable as obscene speech ("nibbul peh"; Shab. 33a); and of him who is not bashful they say that "his fathers were not among those who received the Law from God on Sinai" (see Woman). This idea of the holiness of the marriage relation is seen in the very name for marriage—"ḳiddushim" = "consecration" (see Frankel, "Grundlinien des Eherechts," p. xxix.; Niddah 71a; Marriage). The relations of children and parents are based upon the principle that God placed the fear and honor due to parents in the same category as those due to Himself, parents being for the child the representatives of God (Ḳid. 30b *et seq.*). The relations of the pupil to the (religious) teacher rank still higher, inasmuch as preparation of his pupil for the life eternal is involved (B. M. ii. 11). "The fear of thy teacher should be like the fear of God" (Abot iv. 12). Reverence is due likewise to all superiors in wisdom, and it should extend to the heart as well as the outward form (Sifra, Ḳedoshim, vii.; see Parents; Reverence; and Teachers).

Tender compassion is enjoined on the master in the treatment of his servant; he should not deprive him of any enjoyment, lest he may not feel that he is of like nature with his master (Sifra, Behar, vii.; Ḳid. 22a, based upon Lev. xxv. 40 and Deut. xv. 16; see Master and Servant; comp. R. Johanan's regard for his servant; Yer. B. Ḳ. viii. 6a, with reference to Job xxxi. 15). Brotherly love extends even to the culprit, who should be treated humanely (Sifre, Deut. 286; Sanh. 52a).

Friendship is highly prized in the Talmud; the very word for "associate" is "friend" ("ḥaber"). "Buy thyself a companion" (Abot i. 6). "Companionship or death" (Ta'an. 23a).

The Biblical commands regarding the treatment of the brute (Ex. xx. 10; Lev. xxii. 28; Deut. xxv. 4; Prov. xii. 10) are amplified in rabbinical ethics, and a special term is coined for Cruelty to Animals ("ẓa'ar ba'ale ḥayyim"). Not to sit down to the table before the domestic animals have been fed is a lesson derived from Deut. xi. 15 (Giṭ. 62a). Compassion for the brute is declared to have been the merit of Moses which made him the shepherd of his people (Ex. R. ii.), while Judah ha-Nasi saw in his own ailment the punishment for having once failed to show compassion for a frightened calf. Trees and other things of value also come within the scope of rabbinical ethics, as their destruction is prohibited, according to Deut. xx. 19 (Shab. 105b, 129a, 140b, *et al.*). A leading maxim of the Rabbis is not to insist on one's right, but to act kindly and fairly "beyond the line of mere justice" ("lifnim mi-shurat ha-din"), in order that "thou mayest walk in the way of good men and keep the paths of the righteous" (Prov. ii. 20; B. M. 83a; Mek., Yitro, to Ex. xviii. 20). R. Simlai summarized the Law in the words: "Its beginning is the teaching of kindness, and so is its ending" (Soṭah 14a).

Ethical Literature of the Rabbis.

In this spirit the ethical sayings of the ancient rabbis have been collected into special works, the oldest of which is the mishnaic treatise Pirke Abot, and into the Gemara-like commentary Abot de-Rabbi Natan, into Derek Ereẓ Rabbah and Derek Ereẓ Zuṭa, and into Masseket Kallah. The original part of Tanna debe Eliyahu, which appears to have contained the text and the Gemara commentary of a Mishnat Ḥasidim, belongs to the same class of ethical works of the tannaitic period as does Pirḳe di Rabbenu ha-Ḳadosh, which begins with a farewell address of Judah ha-Nasi to his children. All these are probably survivals of an ancient Ḥasidean literature, and therefore lay especial stress on the virtues of Essenism, chastity, humility, and saintliness.

It is therefore not merely accidental that the ethical works ("sifre musar") in medieval Jewish literature present the same features of extreme piety, or Ḥasidism, since they were written by German mystics who claimed to be adepts in the Essenic traditions or Cabala coming from older Oriental authorities. The oldest one among these works, belonging to the middle of the eleventh century, bears the title "Ethical Will of R. Eliezer the Great," because it starts with a farewell address of R. Eliezer b. Hyrcanus; but it is really a work of Eliezer B. Isaac of Worms entitled "Orḥot Ḥayyim." The most elaborate and popular ethical work of this kind is the "Sefer Ḥasidim" of Judah b. Samuel, the Ḥasid of Regensburg. His pupil, Eleazar b. Judah of Worms, wrote a halakic-ethical work under the title of "Roḳeaḥ." Asher ben Jehiel wrote an ethical will addressed to his children; so did his son Judah b. Asher (see Wills, Ethical). An anonymous ethical work, under the title of "Orḥot Ẓaddiḳim," which Güdemann believes to have been composed by Lippman Mülhausen, appeared in the fifteenth century in Germany. Abraham ha-Levi Horwitz's "Yesh Noḥalin," at the close of the sixteenth century, and the popular ethical work "Ḳab ha-Yashar," by Hirsh Kaidenower, at the beginning of the eighteenth century, belong to the same class of German ethical works with a tinge of Ḥasidean mysticism. More systematic, though not philosophical, are the ethical works "Menorat ha-Ma'or," by Israel Alnaqua, a large part of which has been embodied in Elijah b. Moses di Vidas' "Reshit Ḥokmah," and the popular "Menorat ha-Ma'or," by Isaac Aboab. Regarding these and other ethical works see Zunz, "Z. G." pp. 122–157, which contains examples of each; also Bäck, "Die Sittenlehrer vom 13ten bis 18ten Jahrhundert," in Winter and Wünsche, "Die Jüdische Literatur," iii. 627–651, where examples are also given; and Abrahams, "Chapters on Jewish Literature," 1899, pp. 189–199. All these medieval ethical books have one characteristic trait: they teach compassion and love for Jew and Gentile alike, and insist on pure, unselfish motives, and on love toward God and man, instead of on hope for paradise.

K.

——**Philosophical:** The term "Philosophical ethics" is here understood to mean the philosophical principles on which Jewish thinkers endeavored to base the ethics of Judaism. The first of these thinkers was Philo. The discussion of moral questions enters very largely into his writings; and although his treatment is unsystematic, his doctrines can be traced easily. Like almost all other Greek philosophers, Philo considers the end of moral conduct to be the desire for happiness. The so-called external and corporeal "goods," such as wealth, honors, and the like, are only "advantages," not in reality good ("Quod Deterius Potiori Insidiari Soleat," ed. Mangey, pp. 192–193). Happiness, then, must consist in the exercise of, and the actual living in accord with, excellence, and, naturally, in accord with the very highest excellence—namely, with that which is the best in man. This best is the soul, which, being an emanation of the Deity, finds its blessedness in the knowledge of God and in the endeavor to imitate Him as far as possible ("De Migratione Abrahami," i. 456). The opposite of this "summum bonum" is the mental self-conceit which corresponds in the moral sphere to self-love ("Fragmenta," ii. 661). It consists in ascribing the achievements in the domain of morality to man's creative intellect (*νοῦς ποιήτικος*), instead of to the universal mind (Logos). In this Philo is in direct opposition to the Stoics, whose ethical principle he otherwise follows; for according to them man is self-sufficing for the acquisition of the virtues which lead to the "summum bonum." Cain (= "possession") typifies, according to Philo, the self-conceited, who ascribes all to his own mind, while Abel (= "breath") typifies him who attributes all to the universal mind ("De Sacrificiis Abelis et Caini," i. 163). "Complete self-knowledge involves self-despair, and he who has despair of self knows the Eternal" ("De Somnis," i. 629).

Responsibility and Free Will.

In order that man may be responsible it is necessary that he should possess the knowledge of right and wrong. In fact nothing is praiseworthy even in the best actions unless they are done with understanding and reason ("De Posteritate Caini," i. 241). Man therefore was endowed with conscience, which is at the same time his accuser, judge, and adviser. Another condition which is essential to man's responsibility is freedom of choice between opposing motives ("De Posteritate Caini," i. 236). Man has a twofold mind: (1) the rational, directed toward the universal, and (2) irrational, which seeks the particular and transient ("De Opificio Mundi," i. 17). The latter, which is the real moral agent, is, in its original condition, morally neutral, and has the choice between good and evil. Therefore praise is reserved for conduct which requires some exertion of the will, and involuntary offenses are blameless and pure.

The source of evil is the body, which plots against the soul ("De Allegoriis Legum," i. 100). Closely connected with the body are the senses and their offspring, the passions, which, although, as a divine gift, they are not evil in themselves, are in antagonism to reason. The highest principle of morality is therefore that taught by Plato and the Stoics; namely, the utmost possible renunciation of sensuality and the extirpation of desire and the passions (*ib.*). This does not mean, however, the adoption of asceticism ("De Abrahamo," ii. 4, 14). Before addicting oneself to a contemplative life he must have discharged the duties toward mankind — toward relatives, friends, members of the tribe, country, and race—and even toward animals.

> "If you see any one," says Philo, "refusing to eat or drink at the customary times, or declining to wash and anoint his body, or neglecting his clothes, or sleeping on the ground in the open air, and in these ways simulating self-control, you should pity his delusions, and show him the path by which self-control may really be attained" ("De eo Quod Deterius Potiori Insidiari Soleat," i. 195).

Cardinal Virtues.

Like Plato, Philo recognizes four Cardinal Virtues and considers goodness to be the highest of them. This idea is represented by the river which watered paradise. As this river is said to have divided into four great streams, so goodness comprises four virtues; namely, prudence, fortitude, temperance, and justice ("De Allegoriis Legum," i. 56). Elsewhere Philo describes the chief virtues as piety and humanity ("Human." ii. 39) or as piety and justice ("Prœmiis et Pœnis," ii. 406). Of these piety takes the leading place. It consists in loving God as the Benefactor, or at least fearing Him as the Ruler and Lord ("De Vict. Offer." ii. 257). "A life according to God is defined by Moses as a life that loves God" ("De Post. Caini," i. 228). The virtue of temperance is of great importance. It is typified by the brazen serpent; for if the mind, having been bitten by pleasure, the serpent of Eve, is able to behold the beauty of temperance, the serpent of Moses, and through it to see God, it shall live ("De Allegoriis Legum," i. 80). Closely connected with temperance is self-control, which is also the enemy of pleasure and desire ("De Opificio Mundi," i. 39). As waging war against pleasure, Philo, in opposition to Greek philosophers, considers labor as a means of human progress ("De Sacrificiis Abelis et Caini," i. 168). Fortitude, according to Philo, does not consist in martial but in moral courage (comp. Abot iv. 1). He values prayer greatly, which is the fairest flower of piety; but it must be sincere and inward; for piety does not consist in making clean the body with baths and purifications ("Cherubim," i. 156). Those who mistake bodily mortifications for temperance, and ritual for holiness, are to be pitied ("De eo Quod Deterius Potiori Insidiari Soleat," i. 195).

Characteristics of Saintliness.

The four characteristics of a pious soul are hope (which is connected with prayer), joy, peace, and forgiveness. "Behave to your servants," says Philo, "as you pray that God may behave to you. For as we hear them so shall we be heard, and as we regard them so shall we be regarded. Let us show pity for pity so that we may receive back like for like" ("Fragmenta," ii. 672). Philo recognizes the efficacy of repentance. "Never to sin," says he, "is the peculiar quality of God, perhaps also of a divine man; to repent is the quality of a wise man" ("De Profugis," i. 569).

For the doctors of the Talmud, the Saboraim, and the Geonim of the time of Saadia the ruling princi-

No Moral Philosophy in Talmud.

ples of life were derived from the current conception of God and of the relation in which the Jewish people stood toward Him. Morality was to these Jewish philosophers the embodied will of God. Their maxim was: "It is not speculation that is essential, but practise"; and for the practise of morality the Jews had to follow the injunctions of the Bible and Talmud. Under the influence of Greek and Arabic philosophy, Jewish thinkers turned their attention to the ethical side of Judaism also, the underlying principles of which they endeavored to systematize and to bring as far as possible into accordance with the ethical teachings of the philosophers. Saadia in several passages of his religio-philosophical work "Ha-Emunot weha-De‘ot" deals with ethical questions, as those of free will, providence, and others, and devotes his last chapter to human conduct. That happiness is the result of morality is assumed by him as a fact; the only question for him is, which is the highest virtue leading thereto. Accordingly he points out thirteen different views on the highest virtue, and warns against adopting any one of them. For him the ideal order of life lies in the cooperation of all the legitimate inclinations suggested by the two ruling faculties of the soul, love and aversion, with each inclination in its due place and proportion; the third faculty of the soul, the faculty of discernment (כח הכרה) being the judge that is to control the other two. Saadia condemns complete asceticism, and disapproves of the total neglect of the world's pursuits even when such neglect is due to the desire for learning.

Ibn Gabirol's Ethics.

However, Saadia's excursion in the field of ethics was of small importance. He touches very slightly upon the qualities which result from the forces of the soul, and thus leaves his readers in the dark as to one-half of the system which he proposes to construct. A system of the principles of ethics, independent of religious dogma or belief, was given by Solomon ibn Gabirol in a special work entitled "Tikkun Meddot ha-Nefesh" (The Improvement of the Moral Qualities), in which he deals with the principles and conditions of virtue, the goal of life, and the particular circumstances, phenomena, and results of moral conduct. Man is, according to Gabirol, the final object of the visible world. He has two divine gifts in common with angels—speech and reason. Like Plato, Gabirol holds that evil is not innate in man; the immortal and rational soul comes pure from the hands of God; only the vegetative soul is the home of sensual desires, which are the source of all evil. The aim of man therefore must be to restrain his sensual desires to the indefensible minimum. This can be done by the acquisition of knowledge of his own being and of the ultimate cause, and by moral conduct. The qualities of the soul, or the virtues and vices, are ascribed by Gabirol to the five senses, which are constituted by the five humors. As the humors may be modified one by another, so can the senses be controlled, and the qualities of the soul be trained unto good or evil. The goal of human endeavor is to bring about the union of man's soul with the higher world. The more he divests himself of bodily sensuality the nearer his soul approaches to an immediate vision of the highest stages of the spiritual world. Ibn Gabirol's system has the defect of being one-sided, in that it treats only of the five physical senses and not of the intellectual senses, such as perception and understanding, which partake of the nature of the soul.

Baḥya's Ethics.

A system of ethics was propounded by Ibn Gabirol's contemporary, Baḥya ben Joseph ibn Paḳuda, in his work "Ḥobot ha-Lebabot." It has many points in common with the system of Gabirol; but it is more definitely religious in character, and deals more with the practical side of Jewish ethics. Like Ibn Gabirol, Baḥya teaches that man is the final object of this visible world, distinguished alike by his form, activity, and intellect. The aim and goal of all ethical self-discipline he declares to be the love of God. Amid all the earthly attractions and enjoyments, the soul yearns toward the fountain of its life, God, in whom alone it finds happiness and joy. Study and self-discipline are the means by which the soul is diverted from the evil passions. The standard of morality is the Law; but one must penetrate into the sentiments embodied in the 613 precepts which show the "via media," equally removed from sensuality and from contempt of the world, both of which are abnormal and injurious. Like Philo, Baḥya values hope highly, and shares the opinion of Ibn Gabirol that humility is the highest quality of the soul: it causes its possessor to be gentle toward his fellow men, to overlook their shortcomings, and to forgive injuries. The characteristic feature of Baḥya's ethical system is his tendency toward asceticism, which, although not directly advocated, may be seen in every line. He recommends fasting, withdrawal from the world, and renunciation of all that is not absolutely necessary.

Abraham bar Ḥiyya.

Abraham bar Ḥiyya followed Baḥya. In his homily in four chapters on repentance, entitled "Hegyon ha-Nefesh," he divides the laws of Moses, to correspond with the three classes of pious men, into three groups, namely: (1) the Decalogue, the first commandment of which is merely an introduction accentuating the divine origin and the eternal goal of the Law; (2) the group of laws contained in the second, third, and fourth books of Moses, intended for the people during their wandering in the desert or during the Exile, to render them a holy congregation; (3) the Deuteronomic legislation, intended for the people living in an agricultural state and forming a "kingdom of justice." All these laws are only necessary while sensuality prevails; but in the time of the Messianic redemption, when the evil spirit shall have vanished, no other laws than those given in the Decalogue will be necessary. The note of asceticism is still more accentuated in the "Hegyon ha-Nefesh" than in "Ḥobot ha-Lebabot," and Abraham bar Ḥiyya went so far as to praise celibacy, which is in direct opposition to the law of Moses. According to Ḥiyya, the non-Jew may attain as high a degree of godliness as the Jew ("Hegyon ha-Nefesh," 8a).

As the firm adversary of any kind of speculation, Judah ha-Levi is not much concerned with ethical philosophy; and when, under the influence of his time, he treats philosophically some ethical questions, such as free will, rewards, and punishment, he follows the beaten tracks of his predecessors, especially Saadia. The versatile Abraham ibn Ezra in his "Yesod Moreh" laid down the important doctrine that the fundamental moral principles which relate to all times and peoples were "known by the power of the mind before the Law was declared by Moses," or, in other words, ethical laws are universal (comp. Kant's "Categorical Imperative"). He furthermore declared that the motive leading to right acting was internal.

The Ethics of Maimonides.

A new departure in the field of ethics was taken by Maimonides. As in metaphysics, he closely follows Aristotle. Maimonides' ethical views are to be found in his introduction and commentary to Abot, in various passages of the "Sefer ha-Miẓwot," and in his "Yad ha-Ḥazaḳah," especially in the "Hilkot De'ot" and "Hilkot Teshubah." In Maimonides' opinion ethics and religion are indissolubly linked together, and all the precepts of the Law aim either directly or indirectly at morality ("Peraḳim," iv.; "Moreh Nebukim," iii. 33). The final aim of the creation of this world is man; that of man is happiness. This happiness can not consist in the activity which he has in common with other animals, but in the exercise of his intellect which leads to the cognition of truth. The highest cognition is that of God and His unity; consequently the "summum bonum" is the knowledge of God, not through religion, but through philosophy. This is in accordance with the teachings of the philosopher and, according to Maimonides, of the prophet Jeremiah, who praises (ix. 23) neither bodily perfection, nor riches, nor ethical perfection, but intellectual perfection. The first necessity in the pursuit of the "summum bonum" is to subdue sensuality and to render the body subservient to reason. In order that man should be considered the aim and end of the creation of this world he must be perfect morally and intellectually. Neither the wise lacking virtue nor the virtuous lacking knowledge can be perfect. Virtue and vice have their source in the five faculties of the soul: the nutritive, the sensitive, the imaginative, the appetitive, and the deliberative. The soul is to the intellect what matter is to form: it is susceptible to both good and evil, according to the choice made by the deliberative faculty. Human excellence is either of the appetitive faculty (moral virtues); or of the deliberative faculty (intellectual virtues).

Moral and Intellectual Virtues.

The appetitive virtues are numerous, and include courage, temperance, magnanimity, truthfulness, etc. The vices of the appetitive faculty consist in the opposites of the appetitive virtues; for instance, cowardice and rashness are the opposite extremes of courage), and both are vices. However, to make virtue deserving of praise and vice deserving of blame there must be deliberate preference. Man possesses a natural capacity for judging good and evil, and he is perfectly free in his choice (see Free-Will). Therefore the rewards or punishments promised for the observance or infraction of the precepts fall also upon him who has not been forewarned by revelation or religion. Intellectual perfection is to be reached by the study of philosophy, beginning with the preparatory study of mechanics and mathematics. Maimonides distinguishes seven degrees in the religious and intellectual development of man; the lowest being that of barbarism, the highest that of the true knowledge of God, attained only when one's intellectual energy is so predominant that all the coarser functions of the body are held in abeyance.

These are the main principles upon which Maimonides based the general ethical system of Judaism. They are essentially those of Aristotle, but clad in a Jewish garb and supported by quotations from the Bible and Talmud. In the field of personal ethics Maimonides established rules deduced from the teachings of the Bible and of the Rabbis. These rules deal with man's obligations to himself and to his fellow men. To the obligations of man to himself belong the keeping of oneself in health through leading a regular life, by seeking medical advice in sickness, by observing cleanliness of the body and of clothing, by earning a livelihood, etc. The requisites for the soundness of the soul are peace (contentment), moderation in joy and in grief. Maimonides considers as a noble characteristic of the soul the disinclination to receive presents. Pity is a generous quality of the soul. To develop this sentiment the Law forbade cruelty to animals. Mutual love and sociability are necessary for men. The sentiment of justice prescribed by the Law consists in respecting the property and honor of others even though they be one's slaves.

Shem-Ṭob Falaquera wrote four works on various ethical questions, namely: "Iggeret Hanhagat ha-Guf weha-Nefesh," on the control of the body and the soul; "Ẓeri ha-Yagon," on resignation and fortitude under misfortune; "Reshit Ḥokmah," treating of moral duties; "Sefer ha-Ma'alot," on the different degrees of human perfection. In all these works Shem-Ṭob followed closely the teachings of Maimonides.

In the Cabala.

Ethics occupies a prominent place in the Cabala. According to the cabalists, moral perfection of man influences the ideal world of the Sefirot; for although the Sefirot expect everything from the En Sof, the En Sof itself is dependent upon man: he alone can bring about the divine effusion. The dew that vivifies the universe flows from the just. By the practise of virtue, by moral perfection, man may increase the outflow of heavenly grace. Even physical life is subservient to virtue. This, says the Zohar, is indicated in the words "for the Lord God had not caused it to rain" (Gen. ii. 5), which mean that there had not yet been beneficent action in heaven because man had not yet given the impulsion.

The necessary requirements for deserving the title of "just" are love of God, love of man, truth, prayer, study, and fulfilment of the precepts of the Law. Love of God is the final object of the being of the soul. "In love is found the secret of the divine unity; it is love that unites the higher

The Virtues of the Just.

and lower stages, and that lifts everything to that stage where all must be one" (Zohar ii. 216a). The life beyond is a life of complete contemplation and complete love. Love, which by the action of the Sefirah "Grace" spreads order and harmony in the ideal world, must also bring order and harmony into the earthly world, especially into the society of man. Truth is the basis of the world. To use the very words of the cabalists, it is the great seal by which the human spirit was engraved on matter; and as an earthly king likes to see his effigy on the coins of his realm, the King of the universe likes to see the stamp of truth on man. In the act of prayer the body cooperates with the soul, and by this the union of this world with the ideal is effected. The divine wisdom which governed the creation of the world finds its expression in human knowledge. Accordingly, knowledge of the Law, in its ethical as well as religious aspects, is a means toward influencing the ideal world. Moreover, through study man escapes the seductions of evil. Evil lies in matter, and is conscious of itself; therefore it can be conquered. Evil is necessary, for without it there can be no good. The Zohar says that every man should so live that at the close of every day he can say, "I have not wasted my day" (i. 221b).

The later philosophic writers, *e. g.*, Gersonides and Albo, mainly repeat the ethical views of Maimonides till the epoch-making appearance of SPINOZA, who neither in source nor in influence is strictly Jewish.

E. C. I. BR.

——**Modern**: Under this heading it is proposed to treat of the agreements and differences between the concepts and theories and the resulting practises of Jewish ethics and those of the main ethical schools of modern times. The fundamental teachings of Judaism base ethics on the concept that the universe is under purpose and law—that is, that it constitutes a moral order, created and guided by divine will, a personal God, in whom thought, will, and being are identical and coincident, and who therefore is the All-Good, his very nature excluding evil. Man, "created in the image of God," is a free moral agent, endowed (1) with the perception which distinguishes right from wrong, right being that which harmonizes with the moral order of things and serves its purposes, wrong being that which is out of consonance with this order and would conflict with and oppose it; and (2) with the will and the power to choose and do the right and eschew and abandon the wrong.

The moral law, therefore, is autonomous; man finds it involved in his own nature. Man being composed of body and soul, or mind, moral action is not automatic or instinctive. It has to overcome the opposition arising from the animal elements (appetites, selfishness), which are intended to be under the control, and serve the purposes, of the mind and soul. Recognition of right, the resolve to do it, and the execution of this resolve, are the three moments in the moral act. The impelling motive is not what outwardly results from the act (reward or punishment), but the desire and intention to be and become what man should and may be. Man thus is a moral personality, as such able to harmonize his conduct with the purposes of the All, and through such concordance lift his individual self to the importance and value of an abiding force in the moral order of things. Every man is and may act as a moral personality; the "summum bonum" is the realization on earth of conditions in which every man may live the life consonant with his dignity as a moral personality. This state is the "Messianic kingdom" (מלכות שמים). The assurance that this kingdom will come and that right is might has roots in the apprehension of the universe and the world of man as a moral cosmos. Israel, by virtue of being the historic people whose genius flowered (1) in the recognition of the moral purposes underlying life and time and world (see GOD), and the ultimate (באחרית הימים) triumph of right over wrong, as well as (2) in the apprehension of man's dignity and destiny as a moral personality, derives from its history the right, and is therefore under obligation, to anticipate in its own life the conditions of the Messianic fulfilment, thus illustrating the possibility and potency of a life consonant with the implications of the moral order of things, and by example influencing all men to seek and find the aim of human life in the ambition to establish among men the moral harmonies resulting from the recognition that man is a moral personality, and that the forces of the universe are under moral law.

Intuitional.

I. Jewish ethics, then, differs from the Christian in insisting that man, now as in the beginning, still has the power to discern between right and wrong and to choose between them. The consciousness of sin, and the helplessness of the sinner, are not taught or recognized. Therefore Jewish ethics is not tinged with quietism or Asceticism. Resignation and submission are not among the tendencies it fosters or justifies. Resistance to evil, and its discomfiture by remedial and positive good, is the keynote of Jewish morality, individual as well as social. Pessimism and optimism alike are eliminated by a higher synthesis; the former as negative of the inherent godliness (or morally purposed creation) of the universe and the essential worthiness of human life, the latter as ignoring the place assigned to man in the economy of things, and, with its one-sided insistence that "whatever is, is right," paralyzing man's energies. Meliorism, the conscious effort at improvement, perhaps expresses the character of Jewish ethics.

II. Neither is Jewish ethics on the same plane as the common-sense moralism of Shaftesbury and Hutcheson, or that of Wolff and the school of the "Aufklärungsphilosophie." Theirs is a system of moral hedonism, which reduces the moral life to an equation in happiness, gross or refined, sensual or spiritual. The desire for happiness is not the true basis of ethics. Nor is it true, as insisted on by this school, that happiness, except in the sense of the feeling of inner harmony with the implications and obligations of human personality, attends moral action as does effect follow upon cause. Like all hedonism, that of the moralists, too, verges on utilitarianism, the theory that what is useful (to oneself, or to the greater number) is moral. In the modification of the original equation between utility and morality, which makes the "happiness of the greater number" the test of goodness and the motive of moral action, utilitarianism has virtually abandoned its main contention without explaining why, in cases of conflict between individual interest and the welfare of the greater number, the individual should forego his immediate or ultimate advantage; for the contention that egotism always is shortsighted, reaching out for immediate and cheaper pleasure at the loss of remoter but more precious advantages, virtually denies the efficiency of utilitarianism as normative of human conduct and relations. Jewish ethics does not deny that spiritual pleasure is a concomitant of moral action, nor that moral conduct leads to consequences redounding to the welfare of society. But, contrary to the doctrine of hedonism and utilitarianism, Jewish ethics does not regard these attending feelings or resulting consequences as other than morally inconsequential. They are not proposed as motives or aims. In other words, worthiness (holiness) is the aim and the test of moral conduct, according to Jewish ethical teaching.

Autonomous.

This reveals how far Jewish ethics agrees with that of Kant, who more than any other has left his impress upon modern ethical thought. Kant, in insisting that no ulterior purpose should determine human action—going even to the extreme of holding that the degree of repugnance which must be overcome, and the absence of pleasure and delight, alone attest the moral value of a deed—was moved, on the one hand, by his dissent from the shallow "hedonism" of the "moralists" (intuitionalists), and on the other by a psychology still under the influence of the Christian dogma of original sin. Nothing is good but the "good will." But man's will is not naturally good. The "good" man, therefore, must struggle against his natural inclination. The absence of gratification, the amount of the unwillingness overcome, are indicative of the goodness of the will. Christian and hedonistic predications of rewards and punishments (temporal or eternal), for good and evil conduct respectively, led Kant to the demand that purpose be eliminated altogether from the equation of moral conduct. Jewish ethics shares with Kant the insistence that consequences, temporal or eternal, shall not determine action. But the psychology upon which Jewish ethics is grounded recognizes that while pleasure and delight, or social utility, are not to be lifted into the potencies of motives, they are possible results and concomitants of moral action. As with Kant, Jewish ethics is based on the solemnity and awfulness of the moral "ought," which it regards as the categorical imperative, implied and involved in the very nature of man.

But Jewish ethics sees in this immediate fact of human consciousness and reason a relation, beyond the human, to the essential force of the universe (God). Because man is created in the image of God he has, with this consciousness of obligation, "conscience," the sense of harmony, or the reverse, of his self with this essential destiny of man. The fundamental maxim of Jewish as of Kantian ethics insists upon such action as may and should be imitated by all. But in Jewish ethics this applicability is grounded on the assurance that every man, as God's image, is a moral personality, therefore an agent, not a tool or a thing. Equally with Kant, Jewish ethics insists on the autonomy of the moral law, but it does this because this moral law is in God and through God; because it is more inclusive than man or humanity, having in itself the assurance of being the essential meaning and purpose of all that is realizable. It is not a mere "ought" which demands, but a certainty that man "can" do what he "ought to do," because all the forces of the universe are attuned to the same "ought" and are making for righteousness. This view alone gives a firm basis to the moral life. It gives it both reality and content. The categorical imperative as put by Kant is only formal. Jewish ethics fills the categorical imperative with positive content by holding that it is man's duty as determined by the ultimate destiny of the human family, and as purposed in the moral order of things, to establish on earth the Messianic kingdom, or, in Christian ethics, "the community of saints," the "kingdom of God."

III. Jewish ethics deduces and proclaims its demands from the freedom of man's will. Determinism in all its varieties denies human freedom for the following reasons:

(1) Because the "soul" is dependent upon, and therefore controlled and limited by, the body. The contention of the determinists has not been proved. The material elements are substrata of the human person; as such they are factors of his being. But the "soul" or "will" nevertheless has the power to resist and neutralize the effects of the material factors. The latter, within certain extent, hamper or help; but whether increasing the difficulties or not, which the "will" encounters in asserting itself, the material elements may be and are under the will's control, even to their destruction (*e. g.*, in suicide). The materialistic constructions have not weakened the foundations of Jewish ethics.

Free Will.

(2) Because empirically invariable regularity of human action has been established by moral statistics. At most the tables of moral statistics prove the influence of social conditions as brakes or stimuli to human will-power; but, confronted by the crucial question, Why does one individual and not another commit the (irregular) act? the theory fails ignominiously. It does not prove that social conditions are permanent. Man has changed them at his own will under deeper insight into the law of his moral rela-

tions to other men. Hence the arguments derived from moral statistics do not touch the kernel of the Jewish doctrine of the moral freedom of man.

(3) Because will is determined by motives, and these arise out of conditions fixed by heredity and environment. The utmost this contention establishes is that men are responsible for the conditions they bequeath to posterity. These conditions may render difficult or easy the assertion of the will in the choice of motives, but they can not deprive the will of the power to choose. Environment may at will be changed, and the motives arising from it thereby modified. Jewish ethics is not grounded on the doctrine of absolute free will, but on that of the freedom of choice between motives. Man acts upon motives; but education, discipline, the training of one's mind to recognize the bearing which the motives have upon action and to test them by their concordance with or dissonance from the ideal of human conduct involved in man's higher destiny, enable man to make the better choice and to eliminate all baser motives. Even conceding the utmost that the theory of determining motives establishes, Jewish ethics continues on safe ground when predicating the freedom of the human will.

(4) Because human freedom has been denied on theological grounds as incompatible with the omnipotence and prescience of God (see LUTHER; MANICHEANS; PREDESTINATION; comp. Koran, sura xvii.; D. F. Strauss, "Die Christliche Glaubenslehre," i. 363: Spinoza's "immanent" God). The difficulties of the problem have been felt also by Jewish philosophers (see Stein, "Das Problem der Willensfreiheit"). Still, the difficulties are largely of a scholastic nature. Jewish ethics gives man the liberty to range himself on the side of the divine purposes or to attempt to place himself in opposition to them. Without this freedom moral life is robbed of its morality. Man can do naught against God except work his own defeat; he can do all with God by working in harmony with the moral purpose and destiny underlying life.

Relation to Evolutionist Ethics.

IV. Jewish ethics is not weakened by the theories that evolution may be established in the history of moral ideas and practise; that the standards of right and wrong have changed; and that conscience has spoken a multitude of dialects. Even the theory of Spencer and others that conscience is only a slow accretion of impressions and experiences based upon the utility of certain acts is not fatal to the main principles of the Jewish ethical theory. Evolution at its best merely traces the development of the moral life; it offers no solution of its origin, why man has come to develop this peculiar range of judgments upon his past conduct, and evolve ideals regulative of future conduct. Human nature, then, in its constitution, must have carried potentially from the beginning all that really evolved from and through it in the slow process of time. Man thus tends toward the moralities, and these are refined and spiritualized in increasing measure. Jewish ethics is thus untouched in its core by the evolutional method of treatment of the phenomena of the moral life of man.

Based on Religion.

V. Jewish ethics and Jewish religion are inseparable. The moral life, it is true, is not dependent upon dogma; there are men who, though without positive dogmatic creeds, are intensely moral; as, on the other hand, there are men who combine religious and liturgical correctness, or religious emotionalism, with moral indifference and moral turpitude. Furthermore, the moral altitude of a people indicates that of its gods, while the reverse is not true (Melkarth, Astarte, Baal, Jupiter, reflect the morality of their worshipers). Nevertheless, religion alone lifts ethics into a certainty; the moral life under religious construction is expressive of what is central and supreme in all time and space, to which all things are subject and which all conditions serve. God is, in the Jewish conception, the source of all morality; the universe is under moral destiny. The key to all being and becoming is the moral purpose posited by the recognition that the supreme will of the highest moral personality is Creator and Author and Ruler of All. In God the moral sublimities are one. Hence the Jewish God-concept can best be interpreted in moral values (see God's thirteen MIDDOT). Righteousness, love, purity, are the only service man may offer Him. Immorality and Jewish religiosity are mutually exclusive. The moral life is a religious consecration. Ceremonies and symbols are for moral discipline and expressive of moral sanctities (see M. Lazarus, "Jüdische Ethik"). They appeal to the imagination of man in a way to deepen in him the sense of his moral dignity, and prompt him to greater sensitiveness to duty.

Religious Basis Necessary.

VI. The ethical teachings of religion alone, and especially the Jewish religion, establish the relation of man to himself, to his property, to others, on an ethical basis. Religion sets forth God as the Giver. Non-religious ethics is incompetent to develop consistently the obligations of man to live so that the measure of his life, and the value and worth of all other men, shall be increased. Why should man not be selfish? Why is Nietzsche's "overman," who is "beyond good and evil," not justified in using his strength as he lists? Religion, and it alone, or a religious interpretation of ethics makes the social bond something more comprehensive than an accidental and natural (material) compact between men, a policy, a prudential arrangement to make life less burdensome; religion alone makes benevolence and altruism something loftier than mere anticipatory speculations on possible claims for benefits when necessity shall arise, or the reflex impulse of a subjective transference of another's objective misery to oneself, so that pity always is shown only to self (Schopenhauer). Religion shows that as man is the recipient of all he is and has, he is the steward of what was given him (by God) for his use and that of all his fellow men.

On this basis Jewish ethics rests its doctrines of duty and virtue. Whatever increases the capacity of man's stewardship is ethical. Whatever use of time, talent, or treasure augments one's possibilities of human service is ethically consecrated. Judaism, therefore, inculcates as ethical the ambition to develop physical and mental powers, as enlargement of service is dependent upon the measure of the increase of man's powers. Wealth is not immoral; poverty is not moral. The desire to increase one's stores of power is moral provided it is under the consecration of the recognized responsibility for larger service. The weak are entitled to the protection of the strong. Property entails duties, which establish its rights. Charity is not a voluntary concession on the part of the well-situated. It is a right to which the less fortunate are entitled in justice (צדקה). The main concern of Jewish ethics is personality. Every human being is a person, not a thing. Economic doctrine is unethical and un-Jewish if it ignores and renders illusory this distinction. Slavery is for this reason immoral. Jewish ethics on this basis is not individualistic; it is not under the spell of other-worldliness. It is social. By consecrating every human being to the stewardship of his faculties and forces, and by regarding every human soul as a person, the ethics of Judaism offers the solution of all the perplexities of modern political, industrial, and economic life. Israel as the "pattern people" shall be exponential, among its brothers of the whole human family, of the principles and practises which are involved in, pillared upon, and demanded by, the ethical monotheism which lifts man to the dignity of God's image and consecrates him the steward of all of his life, his talent, and his treasure. In the "Messianic kingdom," ideally to be anticipated by Israel, justice will be enthroned and incarnated in institution, and this justice, the social correlative of holiness and love, is the ethical passion of modern, as it was of olden, Judaism.

K. E. G. H.

ETHICS OF THE FATHERS. See Abot.

ETHIOPIA: The translation in the Authorized Version, following the ancient versions, of a name covering three different countries and peoples, viz.: (1) Ethiopia proper; (2) parts of northern Arabia; and (3) the regions east of Babylonia. See Cush for this name and the problems involved.

The versions, beginning with the Septuagint, did not know any other country than Kûsh (Egyptian, "Ko[']sh"), that is, Nubia south of Egypt. In the Bible "Cush," the son of Ham and brother of Mizraim (Egypt; Gen. x. 6; I Chron. i. 8), evidently means the ancestor of the Nubians. Originally the Egyptians used the name Ko[']sh only of tribes living south of the second cataract, extending it after 1500 B.C. to the whole valley of the Nile south of Egypt; never, however, to the highlands of Abyssinia, which, by a late literary usurpation, and much to the confusion of modern scholars, acquired the name "Ethiopia."

The Greeks often included under the term "Ethiopians" (dusky-faced ones) all nations of eastern or central Africa, but designated as Ethiopia proper the Nile valley from Syene (compare Ezek. xxix. 10) to the modern Khartum. The inhabitants of this country were more or less pure negroes. Isa. xviii. 2 (R. V.) calls them "tall and smooth"; but it is very doubtful if that obscure description of a land "rustling with wings, which is beyond the rivers of Ethiopia" (*ib.* xviii. 1), could mean Nubia.

Those barbarous tribes were at an early period tributary to the Pharaohs who made the northern part of the country a real Egyptian province after 2000 B.C., and the southern half after 1600. The viceroys of this province became independent about 1000 B.C. Napata and Meroe were the capitals. The Ethiopian kings occupied Thebes about 800, and P'ankhy attempted to conquer the whole of Egypt some fifty years later; but actual possession could only be effected by Shabako about 700. After Shabatako, the third Ethiopian Pharaoh, Taharkô came to the throne (the Tirhaka of II Kings xix. 9 and Isa. xxxvii. 9). His meddling with Syrian affairs caused the Assyrian conquest of Egypt, which country he and his successor, Tanut-amon (Tandamani), were unable to regain permanently (compare Nahum iii.; Isa. xx. 3). Cambyses fulfilled the threat of Ezek. xxx. 4, and made Ethiopia tributary (compare Esth. i. 1, viii. 9; I Esd. iii. 2). About 210 King Ergamenes broke the power of the high priests of Amon, who, by means of their oracles had virtually been rulers until this time.

Under Augustus a violation of the Roman frontier at Syene caused the punitive expedition of Petronius and the destruction of Napata. A few miserable remnants of the kingdom and of ancient Egyptian culture existed in Meroe for a while; the wild tribes of the Nobades and Blemmyans took the place of the Ethiopians, whose language and race are usually assumed to be represented by the modern Nubas.

The Bible, furthermore, mentions Ethiopia as the type of a remote land (Ps. lxviii. 31, lxxxvii. 4; Amos ix. 7; Zeph. ii. 12, iii. 10; Dan. xi. 43). Isa. xliii. 3 seems to imply Ethiopia's wealth, probably in gold, precious stones, etc. (compare Job xxviii. 19, "the topaz of Ethiopia"; Isa. xlv. 14, "the merchandise of Ethiopia"). Ethiopian mercenaries in Egypt are mentioned in Jer. xlvi. 9. See also Cush.

E. G. H. W. M. M.

ETHNARCH (*ἐθνάρχης* = "chieftain"): In the Greco-Roman world, one that stood at the head of any community, though not an independent ruler. The Hebrew word "rosh" (ראש), especially in the Biblical works of the post-exilic time, had perhaps a meaning related to "ethnarch" (Nestle, in Stade's "Zeitschrift," xv. 288; Schrader, "K. A. T." 3d ed., p. 310). The obscure *Σαραμέλ* (I Macc. xiv. 28) is probably merely the Hebrew title of Simeon (שר עם אל = "prince of the people of God"), who bore this title in addition to that of high priest. He was called both "strategos" and "ethnarch" (*ib.* xiv. 47). The title *Σαρβὴθ Σαβαναιέλ*, given by Origen to the Book of the Maccabees, would then mean שרביט שר עם אל (= "scepter of the prince of the people of God"), referring to Judas Maccabeus, the chief hero of the book. It would follow from this that there were two ethnarchs even in this period: Judas Maccabeus and Simeon. Josephus calls the latter "ethnarch," probably following the Book of Maccabees ("Ant." xiii. 6, § 7). Yet Willrich, not without reason, considers this statement to be erroneous ("Judaica," p. 83).

The title "ethnarch" was officially given to Hyrcanus II., though Pompey refused him the crown ("Ant." xx. 10, § 4). Hyrcanus' title, as given in a document of Cæsar, was "high priest and ethnarch," and his children were to be designated in the same way (xiv. 10, § 2; xiv. 8, § 5). Herod the Great also is called *ἐθνάρχης* on a coin (Eckhel, "Doctrina

Nummorum," i., iii. 484), although Saulcy, Levy, and others, ascribe this coin to Archelaus. Herod's son Archelaus was deemed unworthy of the title of "king," and received simply that of "ethnarch" ("Ant." xvii. 11, § 4; "B. J." ii. 6, § 3).

The head of the Jewish community of Alexandria had the title of "ethnarch" (Strabo, in "Ant." xiv. 7, § 2), and was probably identical with the ALABARCH. This may be gathered from a decree of Claudius permitting the succession of ethnarchs (*ib.* xix. 5, § 2). But Philo says expressly that at the time of Augustus the gerusia took over the functions of the "genarch" ("In Flaccum," § 10), and *γενάρχης* here is doubtless equivalent to *ἐθνάρχης*. Philo must refer to some interval during which, the permission of Augustus not having been obtained, no ethnarch could be appointed. At Damascus the Nabatæan king Aretas IV. had an ethnarch at the time of the apostle Paul (II Cor. xi. 32); yet there is no reason for regarding this dignitary as at the head of the Jews of that city, as does Grätz ("Gesch." 4th ed., iii. 371), following earlier scholars, for the chieftain or sheik of some tribe of nomads is meant (Schürer, "Gesch." 3d ed., ii. 83).

In an epitaph at Smyrna the Jewish community is called "people" (ἔϑνος) of the Jews (Reinach, in "R. E. J." vii. 161–166); hence the head of this community must have had the title of "ethnarch" (comp. Suidas, *s.v.* ἔϑνος). Origen ("Epist. ad Africanum," § 14) calls the patriarch of the Jews of Palestine "ethnarch," ascribing to him great power; but this seems merely an alternative for "patriarch."

G. S. KR.

ETHNOLOGY. See BIBLICAL ETHNOLOGY.

ETIQUETTE: Rules governing intercourse in polite society. Such rules are supposed by the Rabbis to have been laid down by the Bible itself. Moses modestly uses the plural in saying to Joshua, "Choose for *us* men and go fight with Amalek" (Ex. xvii. 9, Hebr.), though he referred only to himself. The obeisance of Abraham as he "bowed himself toward the ground" and said to each of his visitors, "My lord, if now I have found favor in thy sight, pass not away, I pray thee, from thy servant," is a form of Oriental politeness, and is recorded as a model of address even when coming from a greater man to one who occupies a lesser station (Gen. xviii. 2–3). The gallantry displayed by Eliezer toward Rebekah, by Jacob toward Rachel, and by Moses to the daughters of Jethro are instances of respectful behavior toward women. The appeal of Abigail to David is an example of courtly address (I Sam. xxv.), as is also that of the "wise woman" of Tekoah (II Sam. xiv.). The suavity of Queen Esther toward Ahasuerus in her desire to counteract the influence of Haman (Esth. v.) is also distinguished by good breeding. The command is given to rise before the aged and to honor the elder (Lev. xix. 32). When a rabbi enters the bet ha-midrash or synagogue it is customary for the congregation to rise until he occupies his seat. For reverence to parents see HONOR and PARENTS.

In rabbinical literature the term "derek ereẓ" (the way of the world) comprises among other things etiquette, that is, good breeding, dignified behavior, urbanity, and politeness. A general rule is laid down by R. Eliezer: "One from whose mouth the words of the Torah do not pass can not conduct himself according to the rules of etiquette" (Kallah, ed. Coronel, 1b, Vienna, 1864).

An introduction is necessary before dining with a stranger, or sitting in judgment, or affixing a signature with another witness to a document (Sanh. 23a; comp. Derek Ereẓ Zuṭa v.).

A person to be spoken to must first be called by his name; even the Lord first "called" unto Moses and then "spake" unto him (Yoma 4b). But a parent or a teacher must not be called by name. Gehazi was visited with leprosy for naming Elisha (Sanh. 100a; comp. II Kings viii. 5). The principle "ladies first" has Biblical authority according to the Rabbis. The most important message of Moses to prepare the Israelites for the reception of the Torah on Mount Sinai was addressed first to the women and then to the men ("Thus shalt thou say to the house of Jacob [women], and tell the children of Israel [men]": Ex. xix. 3, according to Mekilta, *ib.* 2 [ed. Friedmann, p. 62b]).

Modes of Address.

Written communications usually begin "With the help of God," giving the week-day, day of the month, and year from Creation. Letters are addressed in the choicest terms of endearment, honor, or respect. Religious questions were sent to Hai Gaon addressed "our lord"; a letter to a representative rabbi styled him "the king among the rabbis," "the prince in Israel," "the commander in Law," "the famous governor," or "the great light." To women were applied such forms as "to the virtuous woman"; "the crown of her husband"; "blessed shall she be above the women of the tent" (Judges v. 24; see TITLES). The personal name generally follows the titles, even in case of a parent or a teacher. After the name is added "may his light ever shine" or "long may he live."

Letters written in the third person became the proper form in the eighteenth century among the German Jews. The addressee is referred to as "his highness," "his honor," or "the honor of his learning." The communication concludes with an expression of affection and respect, and a wish for the addressee's good health, peace, and prosperity. A rabbinic signature is sometimes preceded with the words "the little" or "who rests here among the holy congregation." A letter of introduction begins with "The deliverer of this writing" (המוכ"ז). One must be careful not to blot his writing, and should answer his correspondents promptly ("Reshit Ḥokmah," ed. Constantinople, 1736, p. 300a).

Regular visiting was not generally indulged in except in the case of some worthy object; but it was a duty to visit the sick and to console the bereaved. The Rabbis visited one another very often for the purpose of learning. The custom of visiting the prophet on every new moon, or even on every Sabbath, is adduced from the question asked the Shunammite (II Kings iv. 23). Hence a scholar should visit his teacher every holiday (R. H. 16b). Johanan, when he visited his master R. Ḥanina, used to make a stir (by ringing a bell) before he entered, in compliance with the Scriptural injunction, "his sound shall be heard when he goeth in unto the holy place" (Ex. xxviii. 35; Lev. R. xxi.; see Rashi to Ps. 112a). The answer "yes" to a knock on the door does not mean "enter," but "wait" (B. Ḳ. 33a). Ben Sira is quoted in the Talmud as saying, "One must not suddenly enter his neighbor's house"; to which R. Johanan added, "not even his own house" (Niddah 16b; comp. Ecclus. [Sirach] xxi. 22).

Meals.

There are numerous regulations for etiquette at meals. Moses fixed the hours for dinner and breakfast: "This shall be when the Lord shall give you in the evening flesh to eat, and in the morning bread to the full" (Ex. xvi. 8; Yoma 75b). One who eats in the street is like a dog, and some say is incapacitated as a witness (Ḳid. 40b). One shall not bite off a piece of bread and offer the rest to his neighbor, nor offer his neighbor a drink from the cup from which he has drunk first. Not even shall a teacher let his pupil drink water out of the vessel which has just been touched by his own lips, until he has spilled some of the water from the top (Tamid 27b).

Anything that causes expectoration or an odor should not be eaten in company (Ket. 40a). Once Rabbi ha-Nasi, lecturing before his disciples, smelled garlic and requested the offender to leave. R. Ḥiyya, however, rather than put the transgressor to shame, caused the session to be suspended (Sanh. 11a). Etiquette prohibits eating the last morsel on the table or platter, but the pot may be emptied (*ib.* 92a; 'Er. 53b). Ben Sira teaches to "Eat as becometh a man. . . . And eat not greedily. . . . Be first to leave off for manners' sake; . . . and if thou sittest among many, reach not out thy hand before them" (Ecclus. [Sirach] xxxi. 16–18).

Banquets; Toasts.

Invitations, as to a feast, were extended to even slight acquaintances by special messengers. In some instances the messenger mistook the name and called on the wrong person. Thus Bar Kamẓa was mistaken for Kamẓa, which error, it is claimed in the Talmud, was the original cause of the destruction of Jerusalem (Giṭ. 55b). In later times the beadle acted as the messenger, and usually invited every member of the congregation. The evil effect of such wholesale receptions was to make entertainment very expensive. The congregation of the expelled Spanish Jews (1492) who settled in Fez adopted in 1613 stringent measures to check excessive feasting ("Kerem Ḥamar, ii. § 94, Leghorn, 1169), "One guest must not invite another" (B. B. 98b; Derek Ereẓ Zuṭa viii.; comp. Ben Sira xxxi.).

The custom of appointing one as the head of a feast (probably as toast-master) is mentioned by Ben Sira: "Have they made thee ruler of a feast? Be not lifted up; be thou among them as one of them" (Ecclus. in [Sirach] xxxii. 1). The guests drank wine to one another's health. "Wine and health to the lips of the rabbis and their disciples" was the formula of the toast for rabbis; in ordinary gatherings, "Le-ḥayyim" (To your health). After saying grace, toasts were given in honor of the host, his parents, wife, and children, or on other occasions in honor of the bride and groom or the "ba'al berit," always beginning with "The Merciful shall bless the host," etc. A person who drains his cup in one draft is a glutton; in three drafts, a cad; the proper way is to take it in two (Beẓah 25b).

Personal Appearance.

Personal appearance is of vital importance: "Cleanliness promotes holiness" ('Ab. Zarah 20b). The washing of the hands before and after meals, bathing for the Sabbath and the holidays, the paring of the nails on Friday, and hair-cutting once a month are part of Jewish etiquette. When bathing, one must not dive or plunge into the bath (Kallah, ed. Coronel, 18b). For other rules of etiquette in the bathing-place see Derek Ereẓ, ix.

Women must not ride astride like men, except in cases of emergency or from the fear of falling off (Pes. 3a).

Artificial beautifying of the person by means of hair-dye is restricted to women. Garments distinctive of one sex must not be worn by the other (Deut. xxii. 5).

R. Johanan called his garments "my honor." The priest was ordered to change his garments when removing the ashes from the altar (Lev. vi. 4). Thus, says R. Ishmael, the Torah taught as a lesson in etiquette, that the servant waiting at the table should not wear the garments in which he did the cooking (Sanh. 94a). The Sabbath garment must be distinguished from every-day apparel (Shab. 113a). A scholar whose garment is soiled by grease almost deserves death, as he disgraces the honor of the Law (*ib.* 114a). "This cleanliness in person and speech . . . was a direct consequence of the religion. . . . Cleanly habits were in fact codified . . . the medieval code-books of the Jewish religion contain a systematized scheme of etiquette, of cleanly custom, and of good taste" (Abraham, "Jewish Life in the Middle Ages," p. 16).

Proposals.

In matrimony the man, not the woman, shall propose, as it is written "if any man take a wife" (Deut. xxii. 13). The Talmud declares that since usually the one who loses an article looks for it, the man must look for his lost rib (Ḳid. 2b). The bride is accompanied by a chaperon, who brings her and introduces her to the groom under the canopy, as "the Lord God . . . brought her [Eve] unto the man" (Gen. ii. 22; Ber. 61a).

Another rule in etiquette demands the use of euphemisms: "Keep aloof from what is ugly and whatever resembles it" (Ḥul. 44b; comp. Derek Ereẓ Zuṭa viii.). R. Joshua b. Levi said: "Never use an indecent expression, even if you have to employ many more words to complete the sentence." Noah was ordered to provide the ark with clean beasts and with "beasts that are not clean" (Gen. vii. 2), a long negative being used in preference to a short positive expression of "contamination" (Pes. 3a). Otherwise conversations should be precise and concise, especially when speaking to a woman (Ab. i. 5; 'Er 53b). See EUPHEMISMS; GREETINGS; PRECEDENCE.

S. S. J. D. E.

ETOILE (Old French, **Estoile** or **Estelle**; Hebrew, כוכב): Town in the ancient province of Dauphiné, France. It must not be confounded with Estella (Latin, *Stella*), Spain. In the fourteenth century there were living in Dijon Jews who had originally come from "Estoile" (Simmonet, "Juifs et Lombards," in the "Mémoires de l'Académie des Sciences et Belles-Lettres de Dijon," 1865, p. 186); and in the sixteenth century Jews from "Estelle" went to Carpentras ("R. E. J." xii. 160, 200, 204).

Among the scholars of Etoile may be mentioned: Abba Mari ben Joseph and his son Judah, who, at Moras in 1333, copied a portion of the "Halakot" of Alfasi (Gross, "Gallia Judaica," p. 52); Meïr Kokabi ("star"), author of a commentary on the Pentateuch (1313); Samuel Kokabi, commentator on a work on the calendar, written about 1402 (*ib.* p. 53); David ben Samuel of Estelle, member of the rabbinical college of Avignon in 1305 (doubtless identical with the celebrated scholar David ben Samuel Kokabi, the author of "Migdal Dawid" and "Ḳiryat Sefer"; comp. "R. E. J." ix. 214, 230); Jacob ben Moses of Bagnols, author of an important work on ethics and casuistics, written about 1357–61 (*ib.* ix. 51).

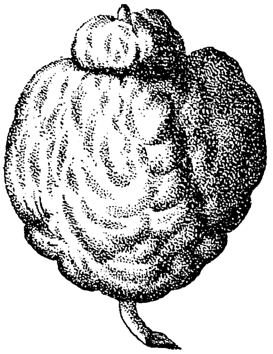
Citron-Tree with Etrogim.

(From a photograph.)

ETROG (אתרוג, אתרוגא, and אתרונגא in Ḳid. 70a; תרוג in Targ. Yer. to Lev. xxiii. 40; compare the Arabic "turujjah"): The citron (*κίτρον, κίτριον*); fruit of a tree of the orange and lemon family. It is oblong in shape, and sometimes as much as six inches in length. The skin is thick, somewhat hard, fragrant, and covered with protuberances; the pulp is white and subacid. Modern naturalists assume the north of India to be its native home; but it passed to the countries of the Mediterranean from Media or Persia; hence the name of the tree, "Citrus medica," and of the fruit, "Malum medica," or "Malum Persica" (compare Pliny, "Historia Naturalis," ii. 3; *μῆλον Μηδικόν*, Josephus, *l.c.* iii. 10, § 4: *μ. τῆς Περσέας*). It is therefore possible that the Jews brought the tree with them from Babylonia to Palestine on their return from the Captivity.

The etrog is used with the "lulab" at the Feast of Booths, or Sukkot. Of the four species of plants enumerated in Lev. xxiii. 40 (R. V.), on which the carrying of the lulab is based, tradition takes "the fruit of the goodly tree" (פרי עץ הדר, properly "the fruit of a fair or noble tree") to designate the citron. For the haggadic justification of this interpretation see Suk. 35a, and for a further discussion of the subject see Lulab. It is evident from Josephus and the Talmud that the custom of carrying the lulab and the etrog was well established in the time of the Maccabees. Josephus ("Ant." xiii. 13, § 5) relates that once, while Alexander Jannæus was ministering at the altar on the Feast of Booths, the people pelted him with their citrons, reproaching him with being the son of a captive woman and therefore debarred from the priesthood. In Suk. 48b the episode of being pelted with etrogs is related of an unnamed Sadducee who wrongly poured out the water-libation at the foot of the altar.

The etrog is also called "Adam's apple," or "paradise apple," and in Gen. R. xv. 7 among other fruits the etrog is suggested as having been the forbidden fruit of which Adam and Eve ate in the Garden of Eden; "for it is said, 'the tree was good for food' (Gen. iii. 6). Which is the tree whose wood can be eaten as well as its fruit? It is the etrog."



Etrog.
(From Kirchner, "Jüdisches Ceremoniel," 1726.)

To see an etrog in a dream is regarded as an assurance that one is "precious [הדר] before his Maker" (Ber. 57a). It is a wide-spread, popular belief that a pregnant woman who bites into an etrog will bear a male child.

In modern times, especially since the anti-Jewish demonstrations of 1891 at Corfu, a movement was inaugurated to boycott the etrog-growers of that island and to buy etrogim raised in the agricultural colonies of Palestine. Isaac Elhanan Spector favored the Palestinian fruit ("Almanach Achiasaf," iv. 293), while others contended that the etrogim of Palestine, being raised on grafted trees, were prohibited ("Peri 'Eẓ Hadar," ed. Solomon Marcus, Cracow, 1900).

The etrog was occasionally the object of special taxation. Empress Maria Theresa demanded from the Jews of the kingdom of Bohemia July 17, 1744, an annual tax of 40,000 florins ($16,000) for the right of importing their etrogim, which tax was later on reduced to 12,000 florins ("Oest. Wochenschrift," 1901, p. 727). Some Galician Jews in 1797 offered to pay 150,000 florins for the privilege of levying a tax on etrogim, but Emperor Francis II., in 1800, refused to interfere with a religious practise ("Israel. Familienblatt," Hamburg, Oct. 10, 1901).

ETTHAUSEN, ISAAC SECKEL BEN MENAHEM: German rabbi; flourished in the first half of the eighteenth century, officiating as rabbi in various German towns during a period of fifty-five years. He was the author of "Or Ne'elam," a collection of fifty-eight responsa relating to subjects he had discussed with Baruch Rapoport, Jonathan Eybeschütz, and others; and "Ur Lo be-Ẓiyyon," novellæ on Berakot and Halakot Ḳeṭannot. Both works were published after his death by his son, Judah Löb Etthausen (Carlsruhe, 1765).

K. M. Sel.

ETTING: Name of an American family, prominent in national and civic affairs, whose history is associated with the states of Maryland and Pennsylvania, chiefly with the cities of Baltimore and Philadelphia, though some of its members are connected with the history of New York and Connecticut. Of the following members of the family little is known: **Benjamin Etting:** Resident of New York; made a freeman in 1769; fled with other patriots at the time of the capture of the city by the British, and went to Norwalk, Conn., where he died in 1778 ("Pub. Am. Jew. Hist. Soc." ii. 66, vi. 102). **Moses Etting:** Resident at Easton, Pa.; died during the early part of 1778 (*ib.* ii. 66). **Reuben Etting:** Joined the Revolutionary army when nineteen years of age; was taken prisoner at Charlestown; died shortly after his release (*ib.* ii. 66). **Solomon Etting:** Mentioned in a subscription list as being in Baltimore in 1773 (*ib.* vi. 155).

Silver Box for Etrog.
(In the possession of J. D. Eisenstein.)

The history of the following members of the family is known more fully:

Charles Edward Etting: American general officer; born in Philadelphia Feb. 5, 1844; served with distinction as a volunteer in the army during the Civil war. He entered the Federal service as a member of the One Hundred and Twenty-first Regiment, with the grade of second lieutenant of Company D, and was promoted in turn to first lieutenant, captain, and adjutant. Assigned to the third division of the Army of the Potomac (1861), he took part in the operations at Sharpsburg (Sept. 29, 1862) and in the battles of Fredericksburg (Dec. 13, 1862), Chancellorsville (May 1-4, 1863), and Gettysburg (July 1-3, 1863), acting as staff-officer and aide-de-camp throughout the campaign. Subsequently he took an active part in organizing new regiments in his state (1864), and retired from military service June 2, 1865. At the close of the war Etting returned to Philadelphia and engaged in commerce.

Elijah Gratz Etting: Son of Reuben Etting; born in Baltimore July 14, 1795; died in Philadelphia May 25, 1849. He was educated at the University of Pennsylvania, graduating in 1812. He studied law in Pennsylvania, and was admitted to the bar in 1816. On his return to Maryland he was elected district attorney for Cecil county in that state.

Frank Marx Etting: American army officer; son of Henry Etting; born Dec. 17, 1833; died in Philadelphia June 4, 1890. After studying for the legal profession he commenced practising at the bar of Philadelphia Oct. 10, 1857. Abandoning law some years later, he entered the army, and was appointed paymaster, with the rank of major, in 1861. Continuing in office throughout the Civil war, he became chief paymaster to the forces (1864-67). On the expiration of his term of office he was brevetted lieutenant-colonel (of Volunteers, March 13, 1865; of Regulars, 1868). In 1868 he was appointed to the staff of Gen. Irwin McDowell as chief paymaster for disbursing the Reconstruction Fund. At the opening of the Centennial Exposition in 1876 Etting was elected chief historian of the Department of the Exposition. He was the author of a "History of Independence Hall," and at one time during his public career served as director of public schools. Other representative members of this family in Philadelphia were **Benjamin Etting** and **Edward J. Etting,** the latter of whom had two sons, Theodore Minis and Charles Edward.

Henry Etting: American naval officer; born in Baltimore May 20, 1799; died at Portsmouth, N. H., July 10, 1876. He commenced his career Jan. 1, 1818, as midshipman, and by Nov. 7, 1826, attained the rank of purser. Four years later he was appointed paymaster, with the rank of commander (Nov. 7, 1830), and retired from the navy with the rank of captain Dec. 21, 1861. Throughout the Civil war Etting held at New York the office of purser and fiscal agent of the Navy Department. After fifty-three years of active service he was finally placed on the retired list as pay-director, with the rank of commodore (March 3, 1871).

Reuben Etting: Citizen of Baltimore; born at York, Pa., 1762; died in Philadelphia 1848. He chose a military career, and was commissioned (1798) first captain of the Independent Blues. In 1801 he was appointed United States marshal for Maryland by Thomas Jefferson.

Solomon Etting: Born in York, Pa., 1764; died in Baltimore, Md., 1847. He was one of those American citizens who opposed a treaty with Great Britain in 1795. He afterward removed to Baltimore, where he was elected to the city council (1825), ultimately becoming president of that body.

Theodore Minis Etting: American naval officer; born in Philadelphia May 25, 1846. During the Civil war he volunteered, and received the appointment of acting midshipman Nov. 28, 1862, being promoted to full grade June 2, 1868. In turn he advanced through the grades of ensign (April 19, 1869) and master (July 12, 1870), attaining that of lieutenant (March 3, 1874). Etting resigned July 1, 1877, and immediately took up the study of law under Henry B. Edmunds of Philadelphia. He commenced to practise as a marine and corporation lawyer in 1879, and was the author of a treatise on "Admiralty Jurisdiction." Elected to represent the eighth ward as member of the Select Council in 1885, Etting from that time on has taken an active part in the municipal affairs of his native city, and has been reelected repeatedly. He held also the chairmanship of the municipal committee on law.

A. F. H. V.

ETTINGER (OETTINGER): Family name derived from the city of Oettingen in Bavaria, and found all over Europe among Ashkenazim families. The Galician and Russian family of Ettingers contains many rabbis and writers of some distinction. The best-known members are:

Ḥayyim Judah Löb Ettinger: Austrian rabbi; died in 1739; son of Eliezer ha-Levi Lichtenstein Ettinger. He succeeded his father in the rabbinate of Holleschau and in the directorate of its Talmudical school, which was at that time one of the most important in Moravia, and at which his brother, the author of "'Edut be-Yosef" (Sulzbach, 1761), was a pupil. In 1717 Ḥayyim was appointed head of the Talmudical school of Lemberg, and in 1730 succeeded the author of the "Pene Yehoshua'" in the rabbinate of that place. Although Ettinger wrote several works and numerous responsa, nothing was published under his own name. Only in the works of others, as, for instance, in those of his brother-in-law, Ḥayyim Cohen Rapaport, rabbi of Lemberg, may there be found a few scattered responsa and notes of Ettinger's, which give but slight indication of his Talmudical knowledge.

Isaac Aaron Ettinger (also called **Reb Itzsche**): Galician rabbi and scholar; son of Mordecai Ze'eb Ettinger; born at Lemberg 1827; died there Jan. 16, 1891. Distinguished for his intellectual activity and industry, he was invited by several communities of Galicia to assume a rabbinate, but, being wealthy, he declined until, in 1868, he was persuaded to accept the rabbinate of Przemysl. He had occupied this position less than two years, when the pressure of his private affairs compelled him to relinquish it and retire to Lemberg. His responsa exerted considerable influence; Mitnaggedim and Ḥasidim submitted to him questions of ritual; the thaumaturgic rabbis of Sadagora referred questions of inheritance to his decision; and he was regarded even by the government as the leader of the Galician Jews. He was officially recognized by the Austrian minister of the interior as Nasi of Palestine, and as such he sent annually to Palestine about 50,000 gulden. When Ẓebi Hirsch Ornstein died in 1888, Ettinger was chosen rabbi of Lemberg, an office which he filled until his death. A highly cultured man, his influence was felt also by the Reform party. He often appeared in the Polish city council to uphold his opinions. Some of his responsa were posthumously published by his children under the title ש"ות מהרי"א הלוי (Lemberg, 1892).

BIBLIOGRAPHY: Buber, *Anshe Shem*, p. 123, Cracow, 1895.

Mordecai Ze'eb Ettinger: Father of Isaac Aaron; born 1804; died June 30, 1863, at Lemberg. He published in collaboration with his brother-in-law, Joseph Saul Nathanson, the following: "Mefareshe ha-Yam" (Lemberg, 1827), a commentary to the work of his uncle, Moses Joshua Heschel, rabbi at Tarnogrod, who had published a work on Baba Ḳamma under the title "Yam ha-Talmud"; "Me'irat 'Enayim" (Wilna, 1839; Zolkiev, 1842); "Magen Gibborim," on the Shulḥan 'Aruk, Oraḥ Ḥayyim (part 1, Lemberg, 1834; part 2, Zolkiev, 1839); "Haggahot 'al ha-Shas" (printed in the Wilna Talmud ed.); "Ner Ma'arabi," annotations to the Jerusalem Talmud (printed in the Jitomir ed.); "Ma'aseh Alfas," on the רי"ף.

After a collaboration of twenty-five years a difference arose between the two brothers-in-law, which was brought to a crisis by Rabbi Solomon Klüger's "Moda'ah le-Bet Yisrael" in reference to the baking of maẓẓot by machinery, Rabbi Joseph Saul's answer, "Biṭṭul Moda'ah" (1859), not meeting with Ettinger's approval. Ettinger even before this had commenced to work alone, publishing "Ma'amar Mordekai" to the Shulḥan 'Aruk (Lemberg, 1852), and writing much that is still in manuscript.

K. M. W. R.

Solomon Ettinger: Physician and Yiddish poet; died about 1855. He studied medicine in Lemberg, Galicia; and, after graduating, settled in Zamoscz, Russian Poland, which probably was his native place. A. B. Gottlober, who met him there in 1837, relates that Ettinger was prohibited from practising under his foreign diploma, and that he afterward joined an agricultural colony. Failing to succeed as a colonist, he settled in Odessa. He is the author of a Yiddish drama entitled "Serkele" (Johannisberg, 1861; 2d ed., Warsaw, 1874), which is still considered one of the best literary productions in that dialect. Some of his songs and fables were published by his friend and fellow townsman A. Zederbaum, in the periodicals "Kol Mebasser" and "Jüdisches Volksblatt." A collection of his fables and songs was published by his family (St. Petersburg, 1889 [?]). An excellent parody of Heine's "Zwei Grenadiere," which appeared in J. L. Gordon's "Siḥat Ḥullin," is also attributed to Ettinger. His song "Das Licht" ("Jüdisches Volksblatt," vol. vi.) is an imitation of Schiller's "Glocke."

S. P. WI.

ETTLINGER, JACOB: German rabbi and author, and one of the leaders of modern Orthodoxy; born at Carlsruhe March 17, 1798; died at Altona Dec. 7, 1871. He received his early education from his father Aaron, who was "Klausrabbiner" at Carlsruhe, continuing his studies under Abraham Bing at Würzburg, where he also attended the university. He was thus among the earliest German rabbis who possessed academic training. In 1826 he was appointed "Kreisrabbiner" of Ladenburg, with his seat in Mannheim, where he was at the same time chief prebendary ("Klausprimator"). This position he held until he was called as chief rabbi to Altona, where he officiated from 1836 until his death. In this position he became one of the most prominent representatives of German Orthodoxy, which stood for the union of secular learning with strict adherence to the tenets and practises of traditional Judaism. A typical story is reported by Abraham Geiger, who formed Ettlinger's acquaintance as a student in 1829. At a school examination a teacher said that Joseph's brothers had acted in an unbrotherly fashion, whereupon Ettlinger rebuked him indignantly for speaking ill of "the twelve tribes of Israel" (Abraham Geiger, "Leben in Briefen," p. 17, Berlin, 1878). His views can be judged from his first work, "Bikkure Ya'aḳob," in the preface of which he says that he chose this title because it had the numerical value of Jacob and Rachel, who are mystically represented in the law of the Sukkah, with which the book deals. A similar belief in the doctrines of the Cabala is expressed in a sermon in which he urged early burial, because as long as the body remains unburied the evil spirits ("ḥiẓonim") have power over it ("Allg. Zeit. des Jud." 1845, p. 193). In his will he left the request that the four capital punishments should be performed symbolically on his body.

Ettlinger became one of the strongest opponents of the Reform movement, and headed the protest of the one hundred and seventy-three rabbis against the Brunswick Conference of 1844 (see CONFERENCES, RABBINICAL). In the following year he established the first organ of Orthodox Judaism, "Der Zionswächter, Organ zur Wahrung der Interessen des Gesetzestreuen Judenthums," with a Hebrew supplement, "Shomer Ẓiyyon ha-Ne'eman," edited by S. J. Enoch. His school was attended by a great many students preparing for the ministry, and many of them became leaders of Orthodoxy. Samson Raphael Hirsch was his disciple in Mannheim, and Israel Hildesheimer in Altona. Four of his sons-in-law became prominent Orthodox rabbis—Isaacsohn of Rotterdam, Solomon Cohn of Schwerin, Freymann of Ostrowo, and M. L. Bamberger of Kissingen. He was the last German rabbi who acted as civil judge. Much against his will the Danish government, to which Altona then belonged, abolished this right of the Altona rabbi in 1863. The purity of his character and the sincerity of his religious views were acknowledged even by his opponents. He provided in his will that nobody should call him "ẓaddiḳ" (righteous), and that the inscription on his tombstone should contain merely the titles of his works and a statement of the number of years during which he was rabbi of Altona. The congregation obtained permission from the government to bury him in the old cemetery of Altona, which had been closed a year before.

His published works are: "Bikkure Ya'aḳob," on the laws of Sukkot, Altona, 1836 (2d ed. with the addition of "Tosefot Bikkurim," *ib.* 1858); "'Aruk la-Ner," glosses on various Talmudic treatises (on

Yebamot, Altona, 1850; on Makkot and Keritot, *ib.* 1855; on Sukkah, *ib.* 1858; on Niddah, *ib.* 1864; on Rosh ha-Shanah and Sanhedrin, Warsaw, 1873); "Binyan Ẓiyyon," responsa, Altona, 1868; "She'elot u-Teshubot Binyan Ẓiyyon ha-Ḥadashot," Wilna, 1874 (a continuation of the preceding); "Minḥat 'Ani," homilies, Altona, 1874. He published various sermons in German, among them "Antrittsrede, Gehalten in der Grossen Synagoge zu Altona," Altona, 1836; "Rede beim Trauergottesdienst beim Ableben Friedrich III," *ib.*, 1840; and numerous articles in the "Zionswächter," a collection of which was published by L. M. Bamberger under the title "Abhandlungen und Reden," Schildberg, 1899.

Bibliography: *Ha-Maggid*, 1870, p. 118, and 1871, pp. 379, 386; *Der Israelit*, pp. 940-943 *et seq.*, Mayence, 1871.

EUCHEL, ISAAC ABRAHAM: Hebrew author; born at Copenhagen 1758; died at Berlin (June?) 14, 1804. He studied at the University of Königsberg under Immanuel Kant, and acquired a fine Hebrew style from Moses Mendelssohn and Naphtali Wessely. A proposal to appoint him professor of Oriental languages at the University of Königsberg was resisted by Kant, as dean of the faculty of philosophy, on the ground that "it is hardly possible for a Jewish teacher of the Hebrew language to abstain from the rabbinic expositions to which he has been accustomed from his youth." Euchel was one of the founders of the periodical "Ha-Meassef" (1783), the organ of the Biurists. For some time subsequently he was bookkeeper in the establishment of Meyer Warburg in Berlin. In the winter of 1791 he founded, with other young scholars, like Joseph Mendelssohn, E. Wolfssohn, and N. Oppenheimer, the Gesellschaft der Freunde in Berlin.

Euchel's' chief works are: "Gebete der Deutsch-Polnischen Juden" (translated from the Hebrew, with notes, Ratisbon, 1786-88; Vienna, 1790-98); "Die Sprüche Salomos" (translated from Hebrew, with Hebrew commentary, Berlin, 1789-98; Offenbach, 1805-08); "Ist nach Jüdischen Gesetzen das Uebernachten der Todten Wirklich Verboten?" (Breslau, 1797-98); "Mose Maimuni's 'More Nebuchim,' mit einem Kommentar von Mose Narboni und einem Kommentar von S. Maimon" (Berlin, 1791; Sulzbach, 1829). The most brilliant example of Euchel's Hebrew style is found in his biography of Moses Mendelssohn, entitled "Toledot Rambeman: Lebensgeschichte Mos. Mendelssohns, mit Excerpten aus Seinem 'Jerusalem'" (Berlin, 1789; Vienna, 1804).

EUCLID (Heb. אקלידם, אקלידים, also אקלידום and אוקלידים): Greek geometer; flourished in the fourth century B.C. He is mentioned, perhaps for the first time in Hebrew literature, by Rabbi Abraham bar Ḥiyya (d. 1136). Jacob ben Nissim also speaks of אקלידם פילוסופום.

Most of the oldest Hebrew manuscript now extant are translations of Euclid strikingly similar in style and method, and are apparently the work of the same man, Moses ibn Tibbon. As he usually dated his works, it is learned that the first translation of Euclid's Στοιχεῖα ("Elements") was made in Elul, 5030 (= 1270). Another translation, called "Yesodot" or "Shorashim" (*c.* 1273), and including Hypsicles' books, is commonly supposed to have been made by Jacob ben Makir (died about 1306), though some attribute it to Moses ibn Tibbon.

The "Elements."

Not only was the text itself translated into Hebrew, but also the commentaries on it by Arabic scientists. Those made by Al-Farabi and by Ibn Ḥaitham (known as "Alhazen") were rendered anonymously, probably by Moses ibn Tibbon. Kalonymus ben Kalonymus, the assumed translator of part of book xiv., according to Simplicius' commentary (Feb. 2, 1309), also rendered Ibn Ḥaitham's commentary on the introduction to book x. (Sept. 9, 1314; Berlin MS. No. 204). Other commentaries, original and adapted, are by a pupil of Jacob b. Makir, by Abba Mari (*c.* 1324; Munich MS. No. 91) on the introduction to book i., by R. Levi ben Gershon (d. 1344) on the propositions of books i., iii., iv., v. (MSS. Jews' Coll., No. 138, 4; D. Guenzburg, St. Petersburg, No. 340), and by Abraham ben Solomon Yarḥi Ẓarfati. According to Joseph Delmedigo, there was also an original commentary to the entire Euclid by Elijah Mizraḥi (d. 1526).

Commentaries.

The "Elements" are usually divided into books ("ma'amarim"). An annotated translation of book i. and part of book ii., belonging to the sixteenth century, is still extant (Paris MS. No. 1015).

Euclid's "Data" was rendered into Hebrew (*c.* 1272) by Jacob ben Makir, and called by him "Sefer ha-Mattanot" (Book of the Gifts), from the Arabic of Ḥunain ibn Isḥaḳ ("Kitab al-Mu'ṭayat") as revised by Thabit ibn Ḳurrah. Tibbon, however, speaks of Ḥunain ibn Isḥaḳ without reference to the reviser. Ḥunain's version of Euclid's "Optic," as revised by Thabit ibn Ḳurrah, was translated into Hebrew by Jacob ben Makir and called "Ḥilluf ha-Mabbaṭim" (The Variety of Aspects).

At the end of the eighteenth century the study of Euclid, which had been neglected for several centuries, was resumed among Jews in Germany, and especially in Poland. Three new translations were made between 1775 and 1875. A new edition with four plates was published by Abraham Joseph (ben Simon) Minz, and annotated by Meïr of Fürth, the title being ראשית למודים הוא ספר אקלידם (Berlin, 1775). The learned Baruch Schick, usually known as "Baruch of Sklow," published five years later a new translation of the first six books of the "Elements," illustrated with 140 geometrical figures on three plates (The Hague, 1780). A hundred years later Naḥman Hirsch Linder translated books xi. and xii., with notes and explanations, and with illustrations on two plates (Jitomir, 1875).

Later Translations.

G. J. S. R.

EULENBURG, ALBERT: German neuropathist and electrotherapist; born Aug. 10, 1840, in Berlin; son of the physician Moritz Michael Eulenburg (1811–87). He received his education at the gymnasium of Berlin and the universities at Bonn, Zurich, and Berlin, and received his doctorate in 1861.

From 1863 to 1866 Eulenburg was assistant and later chief physician of the hospital of the university at Greifswald, where he was also admitted as privat-docent in 1864. As army surgeon he took part in the campaigns of 1866 and 1870–71, receiving the Iron Cross for non-combatants. From 1867 to 1873 he practised in Berlin, being attached to the clinical staff of the university hospital from 1869–71. In 1874 he was appointed professor at the university of Greifswald and director of the pharmacological institution, which positions he resigned in 1882, when he moved to Berlin, where he opened a private hospital for nervous diseases. In 1890 he became assistant professor at the university of Berlin, and in 1896 he received the title of "Geheimer Medizinalrath."

Eulenburg is an authority on nervous diseases. He is the editor of the well-known "Realencyklopädie der Gesammten Heilkunde," a standard work which was published in 15 vols. by Urban und Schwarzenberg, Vienna, 1880–83 (2d ed. 1885–90, 22 vols.; 3d ed. 1893–1901, in 27 vols.); a supplementary volume, entitled "Encyklopädische Jahrbücher," appears annually. Besides this great work, Eulenburg has written: "Die Hypodermatische Injection der Arzneimittel," Berlin, 1864; 3d ed. 1875; "Lehrbuch der Nervenkrankheiten auf Physiologischer Basis," *ib.* 1871; 2d ed. 1878; together with Paul Guttmann, "Die Physiologie und Pathologie des Sympathicus," *ib.* 1873, a work which, republished in London in 1879, received the Astley-Cooper prize; "Die Hydroelectrischen Bäder," Vienna, 1883; "Sexuale Neuropathie," Leipsic, 1895.

He is also the editor of the "Handbuch der Allgemeinen Therapie und der Therapeutischen Methodie," Berlin and Vienna, 1898–99, and, since the death of Samuel Guttmann in 1895, joint editor, with J. Schwalbe, of the "Deutsche Medizinische Wochenschrift."

EULOGY. See Invocations.

EUNUCH (Hebrew, סריס; Greek, εὐνοῦχος). **—Biblical Data:** As throughout the Orient in very ancient times, and more especially in Egypt and Assyria, where they seem to have held the most important offices, there were eunuchs in the kingdom of Israel. The reference to them in I Sam. viii. 15 (Hebr.) is general; but in other passages they are mentioned as attendants of the kings; for instance, Ahab (I Kings xxii. 9, Hebr.) and Jehoram (II Kings viii. 6; comp. ix. 32). No allusion to eunuchs in the kingdom of Judah occurs before the time of Josiah (comp. II Kings xxiv. 12, 15, Hebr.; Jer. xxix. 2, xxxiv. 19, xxxviii. 7, xli. 16). In II Kings xxv. 19, Hebr; Jer. lii. 25, a military officer taken captive at the conquest of Jerusalem is called a eunuch. Among the Jews, as among others, the existence of eunuchs was connected with polygamy, for in passages like II Kings xxiv. 15; Jer. xli. 16 (comp. II Kings ix. 32), they are expressly mentioned when reference is made to the women of the king's harem. Consequently there is no reason to interpret "saris" as applying to all royal offices in general.

It is questionable whether the eunuchs were Jews. A passage in Jeremiah (xxxviii. 7), in which the eunuch is an Ethiopian, indicates that they were not always natives of Judea, and it is probable that they were usually non-Jews, since in Deut. xxiii. 1 castration was forbidden the Israelites; that is, castrates might "not enter into the congregation of the Lord." Later regulations were milder, and the author of Isaiah (lvi. 3 *et seq.*) did not consider the fact of being a eunuch a reason for exclusion from the congregation. Eunuchs were more expensive than ordinary slaves, but there was no difficulty in obtaining them.

Josephus shows that eunuchs were important members of a regal household, especially under Herod the Great, the care of whose drink was entrusted to one, the bringing of his supper to another, and the putting of him to bed to a third, "who also managed the principal affairs of the government" ("Ant." xvi. 8, § 1). Herod's favorite wife, Mariamne, was attended by a eunuch ("Ant." xv. 7, § 4).

E. G. H. W. N.

——In Rabbinical Literature: The Rabbis distinguished two kinds of eunuchs: (1) "seris adam," a eunuch made by man; (2) "seris ḥamma," a eunuch made by the sun; that is to say, one born incapable of reproduction, so that the sun never shone on him as on a man. According to the Shulḥan 'Aruk, "seris ḥamma" means "castrated in consequence of fever." The Talmud gives various criteria by which the eunuch of the second kind may be recognized, and refers to various disabilities due to the state, especially as regards Ḥaliẓah.

A seris adam is not allowed to enter into the assembly of the Lord (Yeb. 70a), as it is written (Deut. xxiii. 2 [A.V. 1]): "He who is wounded in the stones . . . shall not enter into the congregation of the Lord"; that is to say, shall not marry an Israelitish wife. Removal of or defect in either or both of the testicles disqualifies for admission to the assembly of the Lord.

A eunuch of either kind is not to be judged as a rebellious son (see Deut. xxi. 18) because he is not considered as a man (Yeb. 80b). As every Israelite is commanded to perpetuate his race, it is a sin liable to severe punishment to cause one to become a eunuch (Shab. 111a). Still there is a difference whether one castrates another with his own hands or causes him to be castrated. In the first case the punishment is "malḳot," that is, thirty-nine stripes; in the second an indefinite number of stripes may be inflicted.

Finally, one whose only son is a eunuch has not accomplished the commandment to perpetuate the race.

EUPATORIA: Town in the government of Taurida; on the western coast of the Crimea. It was formerly called by the Tatars "Gezelew" (in Hebrew גוזלאוו), pronounced "Kozlow" by the Russians; but on its annexation to Russia in 1784 it received its present name. Eupatoria is the spiritual center of the Karaites of the Crimea, and an important Karaite community has existed there for many centuries. The community, which counts now about 1,500 persons, is administered by a bet din consisting of three persons: the ḥakam, the ḥazzan, and the shammash (beadle). The authority of the bet din in religious matters is recognized by the Russian government, and its decisions have legal force for all the Karaite communities of the Crimea. Eupatoria possesses the finest Karaite synagogue of the Crimea; to it is annexed a library containing many valuable books and manuscripts on Karaite history and theology. A printing-office for Karaite religious books was established there in 1833, and many interesting works, like the "Eshkol" of Hadassi and the "Aderet Eliyahu" of Bashyazi, were issued from its presses.

Besides the Karaite community, there exist a small Rabbinite one, consisting of several families of the old Jewish settlers called "Krimchaki," and about 150 persons newly established. The Jews of Eupatoria are mostly artisans and wine-dressers. A Rabbinite synagogue was built there in 1841.

H. R. I. Br.

EUPHEMISM (*εὐφημισμός*): A figure of speech by which a softened, indirect expression is substituted for a word or phrase offensive to delicate ears though more accurately expressive of what is meant. Instances of euphemisms are found in the Bible; and in the Talmud they are frequent, having been used whenever it was necessary to avoid unsuitable expressions. "Man should always express himself in fitting terms" (Sanh. viii. 1; Pes. 3a) was a favorite saying of the Rabbis. The technical expressions for "euphemism" in Talmudic literature are: לשון נקיה, לשון כבוד, לשנא מעליא (lit. "pure expression," "expression of honor," "beautiful expression"). In post-Talmudic writings it is called also לישון סגיא נהור ("expression of much light").

Euphemisms were used in deference to considerations of taste and delicacy. The ancients also had a strong belief in the power of ill-omened words to inflict misfortune, and generally avoided them by substituting euphemisms (לעולם אל יפתח פיו לשטן: "man should never open his mouth for Satan"; Ber. 19a). The following are some examples from the Old Testament:

For dying: איננו כי לקח אתו אלהים ("he was not, for God took him"; Gen. v. 24); שכב עם אבתיו or את אבתיו ("he rested with his fathers"; Gen. xlvii. 30; II Sam. vii. 12; comp. *κοιμᾶσθαι*, "requiescere"); נאסף ("to be joined" or "united"; more often with various additions, as "to his people," "tribe," or "forefathers," or to his "grave"; comp. the Latin "abire ad plures" and "illuc, quo priores abiere"); הלך בדרך כל הארץ ("he went the way of all the earth;" Kings ii. 2; comp. Job xvi. 22 and אורחא דעלמא; Targ. Yer. to Gen. xxxv.); ישן שנת עולם ("sleep the eternal sleep"; Jer. li. 39, 57); ירד שאלה ("go down to She'ol" Gen. xxxvii. 35). The dead are called שוכני עפר ("that dwell in the dust"; Isa. xxvi. 19,17) and ישני אדמת עפר ("that sleep in the dust of the earth"; Dan. xii. 2). For urinating: הסך את רגליו (lit. "to cover one's feet"; Judges iii. 24; I Sam. xxiv. 4; also in the Talmud, as in Yeb. 103a, according to Rashi). For coition: ידע ("know"; Gen. iv. 1); שכב ("lie," generally with עם); בא ("enter," with אל); נגש אל אשה ("come near to a woman"; Ex. xix. 15); likewise קרב, with the preposition אל ("approach"; Gen. xx. 4). For menstruation: ארח כנשים (*ib.* xviii. 11) and דרך נשים ("the way of women"; *ib.* xxxi. 35; comp. Niddah 16a, 64b, and the play on words there). For cursing: ברך (with an import directly opposite to the original one of "blessing"; I Kings xxi. 10, 13; Job i. 5, 11; ii. 5; perhaps, also, Ps. x. 3; further, in the later literature, as Sanh. 56a, where ברכת השם occurs).

In the O. T.

A peculiar kind of euphemism is that occurring in the "ḳeri," as against that in "ketib." Thus, the verb שגל (Deut. xxviii. 30) is always replaced by the synonym שכב; the disease termed עפלים (Deut. xxviii. 27), by טהורים. These and similar cases are treated in the closing part of Tosef., Meg., as also in Meg. 25b.

From the later literature, especially the Talmudic, many examples may be cited. For "to die" the following phrases occur: נפטר ("depart"), common in Neo-Hebrew; also with the addition מן העולם ("from the world") or לגן עדן ("to the Garden of Eden"; B. B. 16b; Tem. 16a); נעקר מן העולם ("be rooted out from the world"; Suk. 45b); יצאה נשמתו ("his spirit departed"; Ber. 61b; Shab. 88b; Aramaic, נפקת נשמתה; Meg. 16b); similarly, פרח רוחו (Ket. 62b); פרחה נשמתו (Gen. R. xciii. 8; compare with these phrases "animam exspirare," *ἀποψύχειν*, *ἐκπνεῖν*); נח נפשה ("his soul rested"; M. Ḳ. 25a, b; Ket. 104a). In modern times the expressions הלך לעולמו (lit. "he went to his eternity"); שבק חיים לכל חי; נתבקש למרום; נתבקש לישיבה של מעלה ("he was called to the dwelling on high") are used.

For death: פטירה ("departure"; 'Ab. Zarah 20b); יציאת נשמה ("going out of the soul"; M. Ḳ. 25a; with מן הגוף, "from the body," *ib.* 28b); הליכה ("departure"; Soṭah 12b); גויה and אסיפה ("departure" and "being gathered"; B. B. 16b); קץ ("end"; Ned. 41a; comp. Gen. vi. 13); נשיקה (said of an easy death, lit. "kiss"; Ber. 8a; M. Ḳ. 28a).

For a cemetery (in the old popular parlance, "the good place"): בית החיים ("house of life"); בית עולם, בית עולמים, and בית עלמין ("eternal house"; see Eccl. xii. 5); בית מנוח and בית מנוחה ("house of rest"); בית כבוד ("house of honor"). The Talmudic treatise on funeral ceremonies is called euphemistically מסכת שמחות ("Treatise on Joy"), instead of אבל רבתי (probably with reference to Ps. xvi. 11).

For sicknesses: Besides epilepsy, whose victims are referred to as נכפה ("overcome" by a demon; *e.g.*, Bek. vii. 6; Giṭ. 70a), and concerning which in the classic languages a series of peculiar euphemisms occur, there are many other infirmities, especially those frequently encountered in the Orient, *e.g.*, blindness and leprosy, which are indicated by softened paraphrases. Euphemistic expressions for blindness and the blind, occurring also in the Arabic, are cited by Landau ("Die Gegensinnigen Wörter," etc., pp. 199 *et seq.*). The most familiar of them (for blindness) is סגי נהור or סגיא נהורא ("having much light," "seeing much"), which later was considered a typical euphemism, as was also מאור עינים ("light of the eyes"). Abdominal complaints are named concisely תחתוניות (from תחתון = "below"; Ber. 55a; Shab. 81a; Ket. 10b).

In the Talmud.

For certain organs and their functions: Instead of the more literal expressions יצא לנקביו, or צרך לנ״ (*e.g.*, Giṭ. 70a), one frequently meets with עשה צרכיו, which is also used to express the sexual relations (Ber. 62a; Ḥag. 5b; Sanh. 82b; comp. the Latin "necessaria"), and occasionally simply נצרך (Ex. R. ix. 7), פנה and נפנה ("go aside"; Ṭoh. x. 2; Shab. 140b). Urine is called מי רגלים or סילון (Ber. 25a); excrement, צואה or עמוד; a privy, בית מים (Meg. iii. 2, 27b) or בית הכסא. The expressions for sexual intercourse (בעל) are: שמש את המטה (comp. the picture of the כלי, B. M. 84b), עשה כדרך שיעשו בני אדם (Ab. R. N. xvi. 2), פקד (Yeb. 62b), נזקק (B. M. 107b; Soṭah 11b), תבע (with the object suppressed; 'Er. 100b; Ket. 65a). Compare also the expressions הפך את השלחן, and, especially of the female, אכלה (Ket. 65b; Yoma 75a; see Prov. xxx. 20, and comp. תבשיל, Ber. 62a), נסתרה and מדברת (both = נבעלה; Yeb. 11b; Ket. 13a). The respective nouns are תשמיש המטה, or תשמיש alone, or מטה alone (Kallah); ביאה, עונה (ענתא [Ex. xxi. 10], Ket. 47b); according to circumstances, דבר מצוה (B. B. 10b; Pes. 72b), and דבר עבירה (Soṭah 11b); דרך ארץ (Giṭ. 70a; Yoma 74b); ביתא (Targ. to Eccl. x. 18). For the sexual organs—masculine: אבר, איברא (B. M. 84a); עצם (Kallah; Niddah 13b); בשר; גיד; אמה; גויה (Ḳid. 25a); עבד (Tem. 30a); גיברא (Targ.) or Hebr. גבר (Bek. vii. 5, 44b); מילה (Shab. 118b; comp. זקן התחתון, Sanh. viii. 1, and מילא בישא for קרי, Yer. Yeb. ii. 4). Feminine: אותו מקום (Kallah; Ned. 20a); פתח (Ket. 9a; Pes. 87a); קבר (Sanh. 82b); עקבה (Ned. 20a; see 'Aruk, *s.v.*). For זונה, Targ. Onḳ. to Gen. xxxiv. 31 and xxxviii. 15 has נפקת ברא, for which the Hebrew equivalent (החוץ) יוצאת לחוץ is used (Kelim xxiv. 16, xxviii. 9).

Finally, in the category of euphemisms belong such general expressions as מילתא and דבר. The first is used for "bleeding" in Shab. 129a, for "mourning" in M. Ḳ. 18a (comp. Vulg. "factus" in the sense of "death"; literally, "happening"), for "magic formulas" in Ḥul. 105b; דבר in the phrase הרגל דבר, 'Ab. Zarah 17a, means the same as תשמיש. Very peculiar is the euphemistic term דבר אחר ("something else"), used in designating certain repulsive objects which one does not wish to name directly; thus it is used for "leprosy" (Pes. 76b, 112b; Shab. 129b; Giṭ. 57b, 70a); "swine" (Ber. 43b; Pes. 76b; Shab. 129b); "coition" (Ber. 8b; Beẓah 22a); "immorality" (Ket. vii. 5, 71b, 72a); "idolatry" (Men. xiii. 10, 109a; Shab. 17b).

Cacophemy.

The antonym of "euphemism" is "cacophemism," the application of expressions of contempt to desirable objects. The basis of the use of cacophemisms seems to be the wide-spread fear that too great happiness may attract envy (see Evil Eye). It was thought to avert this by giving a bad name to the thing which was in reality highly esteemed. The best-known though almost isolated example of this kind in Hebrew is כושית = "the Ethiopian woman" (Num. xii. 1), which, according to Rashi, stands for "beautiful woman," and is so translated by the Targum of Onḳelos. Abraham ibn Ezra (*ad loc.* and on Ps. vii. 1) opposes this view very energetically; and in general denies that cacophemisms ever occur in Hebrew. Instances do occur, however. Buxtorf, for instance (*s.v.* כער), quotes מכוער, "ugly," as meaning "beautiful" also.

Another motive for the use of cacophemisms is the belief that it is a practise approved by one's own religion to treat with contempt everything which is in any way connected with the worship of strangers. The general term דבר אחר, when used to denote "idolatry" (Men. 109a; Shab. 17b), may perhaps be regarded as an example of cacophemism; generally, however, some disparaging, belittling expression (comp. 'Ab. Zarah 46a; Tosef., 'Ab. Zarah, 7) was chosen. Such cases are more numerous than those previously mentioned, and to them belong the various expressions used to denote idols: גלולים (Lev. xxvi. 30, etc., and often in Ezekiel); שקוצים (Deut. xxix. 16; II Kings xxiii. 24); שקץ (I Kings xi. 7); תועבה (II Kings xxiii. 13); טעוא, טעו (properly "aberration"; often in the Targumim, as Onḳ. on Num. xxv. 2; Targ. II Chron. xxxii. 15). Other examples are: בית טעותא ("idolatrous temple"; Targ. Judges xvii. 5); זבחי מיתים (properly, "sacrifices of the dead," Ps. cvi. 28, and corresponding to the Aramaic מרזיחים, *i.e.*, "mourning-feast," Targ. Yer. Num. xxv. 2); יום נבול ("day of abuse," for "heathen festival day"; Gen. R. lxxxvii. 9; Cant. R., beginning); ניעולי עובדי כוכבים ("impurities of the Gentiles" = "their food and garbage"; 'Ab. Zarah 75b, 76a); שם טומאה, for sorcery and demoniac work (Rashi on Sanh. 91a); comp. טומאה (used in later times also for places of worship belonging to believers in other gods, just as they are popularly designated as שקצים). See Abomination.

G. S. E.

EUPHRATES (Heb. **Perat**; Babylonian, **Purattu**): The main river of nearer Asia, often mentioned in the Bible (the fourth river of paradise, Gen. ii. 14), and frequently designated as "ha-nahar" (the river). It is formed by the union of two branches, the Kur (the western Euphrates), which rises north of Erzerum, and the Murad (the eastern Euphrates), which issues from Lake Wan. It flows, with many turns and over various falls, through the Taurus range; unites—though this was not the case in antiquity—with the Tigris; and finally empties below Bassora into the Persian Gulf. Its main tributaries are the Balikh and the Khabur (see Habor).

For the surrounding country the Euphrates is of the highest importance, inasmuch as its inundations make the soil very rich. Moreover, in ancient times it served as the highroad of commerce and was navigable by large vessels as far as Babylonia (Herodotus, i. 194); while farther north it was navigable by boats and rafts.

The Euphrates is referred to as a boundary of the land of the Israelites (Gen. xv. 18; Deut. i. 7, xi. 24; Josh. i. 4; Ps. lxxii. 8; comp. I Chron. v. 9). In the Prophets the river is the symbol of the great Assyrian world-empire (Isa. vii. 20, viii. 7; Jer. ii. 18). The decisive battle between the Egyptian king Necho and Nebuchadnezzar took place on the Euphrates (II Kings xxiii. 29).

On the other hand, it is doubtful whether in Jer. xiii. 4-7 the River Euphrates is meant, especially in view of the fact that there is reference to a rocky shore. According to Marti (in "Zeitschrift des Deutschen Palästinavereins," iii. 11) and others, the correct reading in Jeremiah is "Farata," and the river in question is the Wadi Fara, northeast of Anathoth.

EUPOLEMUS: Son of John, son of Accos; envoy of Judas Maccabeus to the Romans. To secure himself against the Syrians Judas sent Eupolemus with Jason, son of Eleazar, to win the Romans as friends and allies. The Romans granted his request, and the "senatus consultum," inscribed on brass tablets and given his envoys by Rome, was set up in Jerusalem (I Macc. viii. 17-28). As the mission of Eupolemus is referred to in general terms, without any specific statement of the underlying motives (II Macc. iv. 11), and as his genealogy seems historically correct—Accos (הקוץ) is a noble family of Jerusalem (Ezra ii. 61; Neh. iii. 21)—historians like Mommsen, Mendelssohn, Grätz, Niese, and Schürer regard his mission as authentic. Niese, however, questions the genuineness of the treaty with Rome, and Willrich thinks that the whole story, as well as the similar one in connection with Simeon, is a fiction on the ground that relations between Rome and Judea began only under Hyrcanus I., to whom the above-mentioned "senatus consultum" was granted. Josephus ("Ant." xii. 10, § 6) says that the document was issued for the "high priest Judas," whom Willrich identifies with Aristobulus I., also called "Judas." These questions are connected with that of the genuineness of the documents quoted in the Books of the Maccabees and by Josephus, and do not refer to the embassy of Eupolemus, which must be regarded as historical. The assumption that this Eupolemus is identical with the Hellenistic writer of that name is not supported.

G. S. Kr.

EUROPE: I. Early Period (163 B.C. to 500 C.E.): The first settlements of Jews in Europe are obscure. There is documentary evidence only for the fact that in 163 B.C. Eupolemus, son of John, and Jason, son of Eleazar, went to Rome as ambassadors from Judas Maccabeus and sealed a compact of friendship with the republic (I Macc. viii.). Twenty-five years later other visitors to Rome are said to have made an attempt to win over wider circles to the Jewish faith (Valerius Maximus, i. 2, 3); and in the time of Cicero there was already a fairly large Jewish community in Rome (Cicero, "Pro Flacco," 28). Its numbers grew steadily; and in the year of Herod's death (4 B.C.) not fewer than 8,000 Jews of Rome supported the commission from Jerusalem to Augustus (Josephus, "B. J." ii. 6, § 1). The settlements in the provinces also increased. There were Jews at Vienne (Vienna), Gallia Celtica, in the year 6 C.E.; at Lugdunum in 39; and the apostle Paul preached in the synagogues of Athens, Corinth, and Thessalonica. The number of Jews was also augmented by converts. The communities were well organized. They had houses for prayer, and cemeteries, and, under the protection of the law, went peaceably about their business. They were farmers, artisans, and, later, merchants. They attained to Roman citizenship when Caracalla granted civil rights to all the inhabitants of the empire (212).

Christianization of Europe.

But toleration came to a sudden end when Constantine the Great bowed to the sign of the cross, and the Church established the doctrine, unheard of in pagan antiquity, that the possession of municipal and state rights is dependent on submission to certain articles of faith. At the Council of Nicæa (325) she broke the last threads which bound her to the mother religion. She declared officially that the Jews were cast off by the God of their fathers because they had refused to accept the Christian dogmas. Constantine's successors promulgated many exceptional regulations aiming to lower the Jews both socially and economically. The stream of the migration of nations set in, which shook the Roman world to its foundations. In Italy, in southern Gaul, on the Pyrenean peninsula, and in Germany these hordes found large numbers of Jews who experienced no change at the hands of their new masters.

Attitude of Church.

While thus the gradual decay of the world-empire was terrifying the unprotected Jews and scattering them still more, the ecclesiastics, and especially the holy Ambrose of Milan, endeavored to hasten the destruction of Judaism. Theodosius II., by a law dated Jan. 31, 439, took away civil rights from the Jews, set limits to the free exercise of their religion, forbade them to build synagogues, made it difficult for them to own slaves, and excluded them from holding office in the state. This law remained the basis for the contemptuous treatment of the Jews in all Christian countries during the succeeding 1,500 years.

II. Period of Many-Sided Development (500-1500): The East-Roman empire was at first affected but little by the barbarian invasion. The legislation of Justinian culminated in the principle of taking away civil rights from heretics and unbelievers and of making their existence as difficult as possible. The restrictive laws of Constantine and Theodosius were renewed with increased rigor. The public observance of their religion was forbidden the Jews. The loss of their civil rights was followed by disregard for their personal freedom. In the wars waged by the Iconoclasts (eighth and ninth centuries) the Jews especially had to suffer, and mostly at the hands of iconoclastic emperors who were suspected of being heretics with Jewish tendencies. Many Jews fled to the neighboring states of the Slavs and Tatars, which were just coming into existence, and found refuge and protection on the lower Volga and on the northern shores of the Black Sea in the realm of the Chazars.

While the East-Roman empire was prolonging its inglorious existence by perpetual warfare with neighbors who were ever growing stronger, the Western empire fell a prey to the barbarians. With the exception of the restrictive laws of the first Christian emperors, which still remained in force, the Jews were not troubled on account of their faith. Not until the beginning of the ninth century did the Church succeed in drawing all humanity within her jurisdiction, and in bringing together and definitely settling the regulations in canonical law which the authority of the Church ordained for believers and their treatment of non-believers. Intercourse with Jews was almost entirely forbidden to believers, and thereby a chasm was created between the adherents of the two religions, which could not be bridged.

Church Laws on Usury.

On the other hand, the Church found herself compelled to make the Jew a fellow citizen of the believer; for she enforced upon her own communities the Biblical prohibition against usury; and thus the only way left open to her of conducting financial operations was to seek loans at a legally determined rate of interest from the adherents of another faith. Through these peculiar conditions the Jews rapidly acquired influence. At the same time they were compelled to find their pleasures at home and in their own circles only. Their sole intellectual food came from their own literature, to which they devoted themselves with all the strength of their nature.

This was the general condition of the Jews in Western lands. Their fate in each particular country depended on the changing political conditions. In Italy they experienced dark days during the endless wars waged by the Heruli, Rugii, Ostrogoths, and Longobardi. The severe laws of the Roman emperors were in general more mildly administered than elsewhere; the Arian confession, of which the Germanic conquerors of Italy were adherents, being in contrast with the Catholic characterized by its tolerance. Among the Burgundians and Franks, who professed the Catholic faith, the ecclesiastical sentiment, fortunately for the Jews, made but slow progress, and the Merovingian rulers rendered only a listless and indifferent support to the demands of the Church, the influence of which they had no inclination to increase.

Arabs in Spain.

In the Pyrenean peninsula, from the most ancient times, Jews had lived peaceably in greater numbers than in the land of the Franks. The same modest good fortune remained to them when the Suevi, Alani, Vandals, and Visigoths occupied the land. It came to a sudden end when the Visigothic kings embraced Catholicism and wished to convert all their subjects to the same faith. Many Jews yielded to compulsion in the secret hope that the severe measures would be of short duration. But they soon bitterly repented this hasty step; for the Visigothic legislation insisted with inexorable severity that those who had been baptized by force should remain true to the Christian faith. Consequently the Jews eagerly welcomed the Arabs when the latter conquered the peninsula in 711. See Spain.

Those Jews who still wished to remain true to the faith of their fathers were protected by the Church herself from compulsory conversion. There was no change in this policy even later, when the pope called for the support of the Carolingians in protecting his ideal kingdom with their temporal power. Charlemagne, moreover, was glad to use the Church for the purpose of welding together the loosely connected elements of his kingdom when he transformed the old Roman empire into a Christian one, and united under the imperial crown all the German races at that time firmly settled. When, a few decades after his death, his world-empire fell apart (843), the rulers of Italy, France, and Germany left the Church free scope in her dealings with the Jews, and under the influence of religious zeal hatred toward the unbelievers ripened into deeds of horror.

The Crusades.

The trials which the Jews endured from time to time in the different kingdoms of the Christian West were only indications of the catastrophe which broke over them at the time of the Crusades. A wild, unrestrained throng, for which the crusade was only an excuse to indulge its rapacity, fell upon the peaceful Jews and sacrificed them to its fanaticism. In the first Crusade (1096) flourishing communities on the Rhine and the Danube were utterly destroyed. In the second Crusade (1147) the Jews in France suffered especially. Philip Augustus treated them with exceptional severity. In his days the third Crusade took place (1188); and the preparations for it proved to be momentous for the English Jews. After unspeakable trials Jews were banished from England in 1290; and 365 years passed before they were allowed to settle again in the British Isles.

False Accusations.

The justification for these deeds was found in crimes laid to the charge of the Jews. They were held responsible for the crime imputed to them a thousand years before this; and the false charge was circulated that they wished to dishonor the host which was supposed to represent Jesus' body. They were further charged with being the cause of every calamity. In 1240 the plundering raids of the Mongols were laid at their door. When, a hundred years later, the Black Death raged through Europe, the tale was invented that the Jews had poisoned the wells. The only court of appeal that regarded itself as their appointed protector, according to historical conceptions, was the "Roman emperor of the German nation." The emperor, as legal successor to Titus, who had acquired the Jews for his special property through the destruction of the

"Servi Cameræ."

Temple, claimed the rights of possession and protection over all the Jews in the former Roman empire. They thus became imperial "servi cameræ." He might present them and their possessions to princes or to cities. That the Jews were not utterly destroyed was due to two circumstances: (1) the envy, distrust, and greed of princes and peoples toward one another, and (2) the moral strength which was infused into the Jews by a suffering which was undeserved but which enabled them to resist persecution. The abilities which could find no expression in the service of country or of humanity at large, were directed with all the more zeal toward the study of the Bible and Talmud, toward ordering communal affairs, toward building up a happy family life, and toward bettering the condition of the Jewish race in general.

Expulsions.

Everywhere in the Christian Occident an equally gloomy picture was presented. The Jews, who were driven out of England in 1290, out of France in 1394, and out of numerous districts of Germany, Italy, and the Balkan peninsula between 1350 and 1450, were scattered in all directions, and fled preferably to the new Slavic kingdoms, where for the time being other confessions were still tolerated. Here they found a sure refuge under benevolent rulers and acquired a certain prosperity, in the enjoyment of which the study of the Talmud was followed with renewed vigor. Together with their faith, they took with them the German language and customs, which they have cultivated in a Slavic environment with unexampled faithfulness up to the present time.

As in Slavic countries, so also under Mohammedan rule the persecuted Jews often found a humane reception, especially from the eighth century onward in the Pyrenean peninsula. But even as early as the thirteenth century the Arabs could no longer offer a real resistance to the advancing force of Christian kings; and with the fall of political power Arabic culture declined, after having been transmitted to the Occident at about the same period, chiefly through the Jews in the north of Spain and in the south of France. At that time there was no field of learning which the Spanish Jews did not cultivate. They studied the secular sciences with the same zeal as the Bible and Talmud.

But the growing influence of the Church gradually crowded them out of this advantageous position. At first the attempt was made to win them to Christianity through writings and religious disputations; and when these attempts failed they were ever more and more restricted in the exercise of their civil rights. Soon they were obliged to live in separate quarters of the cities and to wear humiliating badges on their clothing. Thereby they were made a prey to the scorn and hatred of their fellow citizens. In 1391, when a fanatical mob killed thirty thousand Jews in Seville alone, many in their fright sought refuge in baptism. And although they often continued to observe in secret the laws of their fathers the Inquisition soon rooted out these pretended Christians or Maranos. Thousands were thrown into prison, tortured, and burned, until a project was formed to sweep all Spain clean of unbelievers. The plan matured when in 1492 the last Moorish fortress fell into the hands of the Christians. Several hundred thousand Jews were forced from the country which had been their home for 1,500 years. Many of them fled to the Balkan peninsula, where a few decades before the Crescent had won a victory over the Cross through the Osmanli Turks. These exiles have faithfully preserved the language of the country they were forced to leave; and to-day, after a lapse of more than 400 years, Spanish is still the mother tongue of their descendants.

III. Period of Decay (1500–1750): The renaissance of art and science was coeval with the death of the Byzantine empire; and the newly discovered art of printing scoffed at canonical laws which tried to enslave thought. In the same year in which Spain expelled the unbelievers the shores of America appeared above the horizon. The age of inventions and discoveries brought about an immense change in ideas. Only the Jews remained in the night of the Middle Ages. These homeless people were crowded from the west of Europe ever farther toward the east. They had to seek refuge in the realms of the Slavs and the Turks, in which a native culture was as yet unknown. Their external circumstances were not at first unfavorable. They even attained to high positions in the state, at least in Turkey. Don Joseph Nasi was made Duke of Naxos; and Solomon Ashkenazi was ambassador of the Porte to the republic of Venice.

In Poland the Jews were an indispensable link between the pomp-loving nobility and the peasant serfs; and trade and industry were entirely in their hands. Not finding a higher civilization in their new homes, their only mental nourishment came from their national literature, and they either pursued the one-sided study of the Talmud, which exercised the understanding only, or dived deep into the mysterious depths of the Cabala. The persecution of the Jews in Turkey and Poland in the middle of the seventeenth century came to the aid of the visionaries and dreamers. Especially disastrous were the trials which were brought upon the Polish and Lithuanian Jews through the Cossack hetman CHMIELNICKI (1648) and by the Swedish wars (1655). According to trustworthy reports, hundreds of thousands of them were killed in these few years. Once more fugitives and unsettled, the anxious Jews waited trustfully for the message which should announce to them that at last the deliverer had appeared in the far East.

Shabbethai Ẓebi.

Thus it came about that a talented youth from Smyrna, Shabbethai Ẓebi, succeeded in passing himself off as the promised Messiah. Numberless followers crowded about him; and these still clung to Shabbethai in their delusion even after he had adopted Islam through fear of the death penalty with which the sultan had threatened him. The incomprehensible extent of his following was due to the fact that even those Jews who enjoyed greater intellectual freedom than their brethren in Poland were yet severely oppressed and gave themselves up to cabalistic reveries.

Hebrew Books Burned.

Fugitives from Spain and Germany had come also to Italy, and founded new communities beside the existing ones. Here they greeted the dawn of the new period, and together with the Greeks—who had fled hither from Constantinople bringing the treasures of classical antiquity with them—became the leaders and guides of the humanists to the source of Jewish antiquity. The Italian Jews taught Hebrew, and learned Latin and Greek. The clergy in Italy and Germany armed itself to fight against the victoriously advancing enlightenment and civilization, and directed its attacks chiefly against Jewish literature. Jewish apostates in the pay of the Dominicans spread false calumnies concerning the Talmud. In its defense the German humanists arose in a body, not so much out of friendliness toward the Jews as out of zeal for free investigation. In these straits the Jesuits, who were the most faithful defenders of the Church, came into existence. They took up the fight against the Talmud in Italy, and as early as 1553 pyres were lighted upon which copies of it and other Hebrew books without number were burned. Guided by apostates, the Council of Trent expurgated the Talmud of all pretended objectionable passages, and the numerous spies of the Inquisition forced the educated Jews to secrecy and hypocrisy. The only study they were allowed to pursue unhindered was the Cabala, which the Jesuits erroneously believed supported Christian ideas. Thus here also the soil was prepared for belief in the dreamer Shabbethai Ẓebi.

The inclination to study esoteric doctrines spread at that time even among the Jews who had founded new communities in the Protestant states on the shores of the North Sea under Dutch and English protection. This new mysticism strongly influenced the German Jews, who in consequence of superstitious error were plunged into the deepest ignorance, and were watching for a speedy redemption after the sufferings of the Thirty Years' war. Judaism was saved only when a beam of enlightenment shone in the night of its existence. Shabbethai Ẓebi was still alive when the Jews were driven out of Vienna (1671). The elector Friedrich Wilhelm of Brandenburg allowed them to settle in Berlin, and protected them with a strong hand from injury and slander. Even here they were hampered by oppressive taxation and narrow-minded regulations; but their versatile minds could not long remain shut out from the growing enlightenment. For the third time a Moses appeared in the midst of them, to lead his people from darkness to light, from slavery to freedom.

IV. The New Period (1750 to the Present Time): Moses Mendelssohn translated the Bible into High German for his coreligionists, and thus tore down the wall that separated the German Jews from their fellow citizens. With the newly acquired possession of a mother tongue the homeless Jew acquired also the right to a fatherland. By the end of the eighteenth century the Jews were taking an active part in German education and civilization. They had their youth instructed in secular studies, and aimed at ennobling the internal affairs of the religious community. This was not accomplished without severe inner struggles. To the adherents of a radical reform like Holdheim and Geiger stood opposed the champions of tradition like Samson Raphael Hirsch, who in religious matters would not deviate a hair's breadth from the traditional observances, while Zacharias Frankel tried to pave the way for an intermediary position on a historically positive basis. The rabbinic councils (1844-46) and synods (1869-71) acquired no authoritative influence (see Conferences, Rabbinical). But the change in western Europe gradually came about of itself. To-day in every large community sermons are preached in the vernacular; the synagogue service is accompanied by a trained choir and presided over by a scientifically educated rabbi.

Political Equality.

Thus Judaism was enabled to take part in the work of civilization. North America and France showed how salutary it might be to make use of all the forces in the state. Prussia adopted the same opinion when in its years of trial it collected the weakened remnants of the fatherland and in 1812 made Jews full citizens in the land of their birth. The new ideas, then, which were prevalent in the constitutional states of Europe in the middle of the nineteenth century recognized the political equality of all citizens without regard to difference in belief.

The mental development of the Jews kept pace with their civil recognition, and the science of Judaism was developed. Its founder was Leopold Zunz (1794-1886). Berlin was again the starting-point of the new science, which succeeded in giving a firm foundation to modern Judaism.

Anti-Semitism.

Notwithstanding the fact that political equality was secured to the Jews in the revolutions of 1848, the majority of them still live outside the sphere where liberal ideas predominate. A certain relaxation of vigilance was shown in Russia during the reign of Alexander II.; but upon his death (March 13, 1881) a series of outbreaks against the Jews occurred which were followed by more systematic persecution on the part of the Russian bureaucracy, so that the state of the Russian Jews at the end of the nineteenth century was almost worse than it had been at the beginning. Similarly, in Rumania for the last quarter of a century restriction has been added to restriction till the very existence of a Jew in that country has been rendered almost impossible, notwithstanding the fact that the Berlin Congress, which gave autonomy to Rumania, did so on condition that full political rights should be granted to all Rumanian citizens without distinction of creed. Even in the European countries where political equality exists there have been certain signs of social antagonism, which gave rise to the movement known as Anti-Semitism. Beginning in 1875 in Germany, this spread to Austria, and ultimately to France, where it culminated in the Dreyfus Case. Nevertheless, its virulence has perceptibly declined, and Russia and Rumania remain the chief sources of ill will against the Jews on the continent of Europe. See also articles on the various countries of Europe.

V.—18

MAP SHOWING THE COMPARATIVE DENSITY OF JEWISH POPULATION PER 1,000 IN EUROPE, 1900.

The following table gives the official or estimated number of Jews in the different European countries at the four most recent census periods, about 1870, 1880, 1890, and 1900; the first set of figures being taken from Andree, "Volkskunde der Juden"; the second, from I. Loeb's article "Juifs," in Vivien de St. Martin, "Dictionnaire de Géographie"; the third, from J. Jacobs, "Jewish Year Book," 1900; and the last partly from I. Harris, in "Jewish Year Book," 1903. Estimates are marked with an asterisk.*

JEWS IN EUROPE.

J.

EURYDEMUS BEN JOSE: One of the sons of Tanna Jose b. Ḥalafta. His name has been transmitted in the most varying forms: "Awradimus" (אורדימוס), "Abirodimus" (אבירדימוס), "Abdimus" (אבדימוס), and "Wradimus" (ורדימוס). As a basic form Bacher assumes "Eurydemus" (compare the Biblical רחבעם), a name which occurs in Herodotus. Levy ("Neuhebr. Wörterb." i. 505a) and Kohut ("Aruch Completum," iii. 257b), on the other hand, favor the name "Eudaimon." Others, following the Palestinian sources, read all these names, "Abdimus," whom they identify with Menahem b. Jose (compare ABDIMUS BEN R. JOSE). The few remarks ascribed to Eurydemus contain admonitions to benevolence.

BIBLIOGRAPHY: Bacher, *Ag. Tan.* ii. 416-417; idem, *Ag. Bab. Amor.* p. 64, note 21.

S. S. M. SC.

EUSEBIUS: Bishop of Cæsarea and the "father of Church history"; born about 270. Though animated by zeal for the conversion of the Jews, he often gives evidence of his bitter dislike of them. In his "Demonstratio Evangelica," which is a direct attack on Judaism, he charges the Jews with serious errors in the exposition of Scripture, and advises that efforts should be made to induce them to abandon their heresies (iv. 16). His advice doubtless influenced the enactment of anti-Jewish laws by Constantine, at whose right hand Eusebius sat in the Council of Nicæa. The "Demonstratio Evangelica" is divided into twenty books, of which only ten have been preserved. Eusebius first endeavors to demonstrate that the Mosaic law had only a local character and was not intended for a universal religion. For instance, the injunction to appear "thrice in the year" before God (Ex. xxxiv. 23) can only be applicable to the inhabitants of Palestine (*ib.* i. 2). He then comments upon the Messianic prophecies of the Bible, which, according to him, were fulfilled in the appearance of Jesus.

Of great interest for Jews is Eusebius' "Præparatio Evangelica." It is divided into fifteen books, of which the last eight treat of Judaism, its religion, history, and institutions, and show its superiority over paganism. Especially valuable are books viii. and ix., in which he reproduces fragments of Jewish-Hellenic writers, such as Eupolemus, Demetrius, Artapanus, Philo, Ezekielus, and Josephus. The fragments, taken from the writings of Alexander Polyhistor, are faithfully rendered. Eusebius seems to have had a Jewish teacher, who instructed him in Hebrew, and through whom he became familiar with many haggadot and Jewish traditions; of these he made use in his works on Biblical exegesis. See CHURCH FATHERS.

J. I. BR.

EUTOLEMUS: Name borne by a number of Palestinian Jews. R. Jose quotes in reference to several halakic questions the testimony of a certain "Eutolemus," who gave a decision in the name of five elders (R. H. 15a; Suk. 40a; 'Er. 35a), and whose full name was "Eutolemus ben Reuben" (Soṭah 49b). He is quoted in the Talmud as having been permitted by the Rabbis to cut his hair in conformity with pagan custom because of his intercourse with court officials (B. Ḳ. 83a). In Hebrew the name "Eutolemus" is variously spelled אבטולם, אבטלמוס, אבטולמוס.

EVANS, SAMUEL (Young Dutch Sam): English pugilist; born in London Jan. 30, 1801; died of consumption Nov. 4, 1843. Evans' first encounter in the prize-ring took place at Knowle Hill, Maidenhead, Berkshire, July 5, 1825, when he beat Ned Stockman in seventeen rounds. His next match was with Harry Jones, whom he defeated at Sheremere, Bedfordshire, Oct. 18, 1825. These two victories were succeeded by others in 1826 and 1827. Then followed two more victories: the first, over Jack Martin, which took place at Knowle Hill, Berkshire, Nov. 4, 1828, and ended in the sixteenth round; the second, over Ned Neale, "a youth," at Ludlow, April 7, 1829, which terminated in the seventy-first round. On Jan. 18, 1831, Evans and Neale met again, Evans defeating his opponent in fourteen rounds, which occupied fifty-two minutes. His next victory was over Tom Gaynor of Bath, which took place June 24, 1834, near Andover, in the seventeenth round.

Evans' career as a pugilist is remarkable for the number of victories he achieved.

EVANSVILLE. See Indiana.

EVARISTUS: The fifth pope; consecrated about 100; died about 109. The breviary of Pope Pius V. reserves Oct. 26 to the memory of "Evaristus Græcus ex Judæo patre Trajano Imperatore Pontificatum gessit." From this it would follow that this pope was a Jew, whose father was a native of Bethlehem, and therefore, no doubt, a Roman provincial. Evaristus, then, must have been a Greek-speaking Jew, and, under the laws of the empire, a Roman subject. Of his life little is known. He died under either Trajan or Hadrian, and is said to be buried near St. Peter's body in the Vatican.

EVE (חוה).—Biblical Data: The wife of Adam. According to Gen. iii. 20, Eve was so called because she was "the mother of all living" (R. V., margin, "Life" or "Living"). On the ground that it was not "good for man to be alone" God resolved to "make him an help meet for him" (*ib.* ii. 18), first creating, with this end in view, the beasts of the field and the fowl of the air and then bringing them unto Adam. When Adam did not find among these a helpmeet for himself, Yhwh caused a deep sleep to fall upon him, and took one of his ribs, from which He made a woman, and brought her unto the man (*ib.* ii. 22). Upon seeing her, Adam welcomed her as "bone of my bones, and flesh of my flesh" (*ib.* ii. 23), declaring that she should be called "ishshah" because she was taken out of "ish" (man.)

Dwelling in the Garden of Eden with Adam, Eve is approached and tempted by the serpent. She yields to the reptile's seductive arguments, and partakes of the forbidden fruit, giving thereof to her husband, who, like her, eats of it. Both discover their nakedness and make themselves aprons of fig-leaves. When God asks for an accounting Adam puts the blame on Eve. As a punishment, the sorrows of conception and childbirth are announced to her, as well as subjection to her husband (*ib.* iii. 16). Driven out of Eden, Eve gives birth to two sons, Cain and Abel; herself naming the elder in the obscure declaration "I have gotten a man with the help of Yhwh" (*ib.* iv. 1, R. V.). Later, after the murder of Abel, she bears another son, to whom she gives the name "Seth," saying that he is given to her by Yhwh as a compensation for Abel (*ib.* iv. 25).

E. G. H.

——In Rabbinical Literature: Eve was not created simultaneously with Adam because God foreknew that later she would be a source of complaint. He therefore delayed forming her until Adam should express a desire for her (Gen. R. xvii.). Eve was created from the thirteenth rib on Adam's right side and from the flesh of his heart (Targ. Pseudo-Jonathan to Gen. ii. 21; Pirḳe R. El. xii.). Together with Eve Satan was created (Gen. R. xvii.). God adorned Eve like a bride with all the jewelry mentioned in Isa. iii. He built the nuptial chamber for her (Gen. R. xviii.). According to Pirḳe R. El. xii., as soon as Adam beheld Eve he embraced and kissed her; her name אשה, from איש, indicates that God (יה) joined them together (see also Ab. R. N. xxxviii.). Ten gorgeous "ḥuppot" (originally, "bridal chambers"; now, "bridal canopies"), studded with gems and pearls and ornamented with gold, did God erect for Eve, whom He Himself gave away in marriage, and over whom He pronounced the blessing; while the angels danced and beat timbrels and stood guard over the bridal chamber (Pirḳe R. El. xii.).

Samael, prompted by jealousy, picked out the serpent to mislead Eve (Yalḳ., Gen. xxv.; comp. Josephus, "Ant." i. 1, § 4; Ab. R. N. i.), whom it approached, knowing that women could be more easily moved than men (Pirḳe R. El. xiii.). Or, according to another legend, the serpent was induced to lead Eve to sin by desire on its part to possess her (Soṭah 9; Gen. R. xviii.), and it cast into her the taint of lust (זוהמא; Yeb. 103b; 'Ab. Zarah 22b; Shab. 146a; Yalḳ., Gen. 28, 130). Profiting by the absence of the two guardian angels (Ḥag. 16a; Ber. 60b), Satan, or the serpent, which then had almost the shape of a man (Gen. R. xix. 1), displayed great argumentative skill in explaining the selfish reasons which had prompted God's prohibition (Pirḳe R. El. *l.c.*; Gen. R. xix.; Tan., Bereshit, viii.), and convinced Eve by ocular proof that the tree could be touched (comp. Ab. R. N. i. 4) without entailing death. Eve thereupon laid hold of the tree, and at once beheld the angel of death coming toward her (Targ. Pseudo-Jon. to Gen. iii. 6). Then, reasoning that if she died and Adam continued to live he would take another wife, she made him share her own fate (Pirḳe R. El. xiii.; Gen. R. xix.); at the invitation of the serpent she had partaken of wine; and she now mixed it with Adam's drink (Num. R. x.). Nine curses together with death befell Eve in consequence of her disobedience (Pirḳe R. El. xiv.; Ab. R. N. ii. 42).

Eve became pregnant, and bore Cain and Abel on the very day of (her creation and) expulsion from Eden (Gen. R. xii.). These were born full-grown, and each had a twin sister (*ib.*). Cain's real father was not Adam, but one of the demons (Pirḳe R. El. xxi., xxii.). Seth was Eve's first child by Adam. Eve died shortly after Adam, on the completion of the six days of mourning, and was buried in the Cave of Machpelah (Pirḳe R. El. xx.). Comp. Adam, Book of.

S. S. E. G. H.

——In Arabic Literature: Eve is a fantastic figure taken from the Jewish Haggadah. In the Koran her name is not mentioned, although her person is alluded to in the command given by Allah to Adam and his "wife," to live in the garden, to eat whatever they desired, but not to approach "that tree" (suras ii. 33, vii. 18). According to Mohammedan tradition, Eve was created out of a rib of Adam's left side while he was asleep. Ridwan, the guardian of paradise, conducted them to the garden, where they were welcomed by all creatures as the father and mother of Mohammed.

Iblis, who had been forbidden to enter paradise and was jealous of Adam's prerogative, wished to entice him to sin. He asked the peacock to carry him under his wings, but, as the bird refused, he hid himself between the teeth of the serpent, and thus managed to come near Adam and Eve. He first persuaded Eve to eat of the fruit, which was a kind of wheat that grew on the most beautiful tree in the garden, and she gave some to Adam. Thereupon all their ornaments fell from their bodies, so that they stood naked. Then they were expelled from the garden. Adam was thrown to Serendib (Ceylon), and Eve to Jidda (near Mecca).

Although Adam and Eve could not see each other, they heard each other's lamentations; and their repentance restored to them God's compassion. God commanded Adam to follow a cloud which would lead him to a place opposite to the heavenly throne, where he should build a temple. The cloud guided him to Mount Arafa, near Mecca, where he found Eve. From this the mount derived its name.

Eve died a year after Adam, and was buried outside Mecca, or, according to others, in India, or at Jerusalem.

E. G. H. H. Hir.

——**Critical View**: The account of the creation of woman—she is called "Eve" only after the curse—belongs to the J narrative. It reflects the naive speculations of the ancient Hebrews on the beginnings of the human race as introductory to the history of Israel. Its tone throughout is anthropomorphic. The story was current among the people long before it took on literary form (Gunkel, "Genesis," p. 2), and it may possibly have been an adaptation of a Babylonian myth (*ib.* p. 35). Similar accounts of the creation of woman from a part of man's body are found among many races (Tuch, "Genesis," notes on ch. ii.); for instance, in the myth of Pandora. That woman is the cause of evil is another wide-spread conceit. The etymology of "ishshah" from "ish" (Gen. ii. 23) is incorrect (אשה belongs to the root אנש), but exhibits all the characteristics of folk-etymology. The name חוה, which Adam gives the woman in Gen. iii. 20, seems not to be of Hebrew origin. The similarity of sound with חי explains the popular etymology adduced in the explanatory gloss, though it is W. R. Smith's opinion ("Kinship and Marriage in Early Arabia," p. 177) that Eve represents the bond of matriarchal kinship ("ḥayy"). Nöldeke ("Z. D. M. G." xlii. 487), following Philo ("De Agricultura Noe," § 21) and the Midrash Rabbah (*ad loc.*), explains the name as meaning "serpent," preserving thus the belief that all life sprang from a primeval serpent. The narrative forms part of a culture-myth attempting to account among other things for the pangs of childbirth, which are comparatively light among primitive peoples (compare Adam; Eden, Garden of; Fall of Man). As to whether this story inculcates the divine institution of Monogamy or not, see Gunkel, "Genesis," p. 11, and Dillmann's and Holzinger's commentaries on Gen. ii. 23-24.

E. G. H.

EVE OF HOLIDAYS: Unlike the early Babylonians, whose day began with sunrise, the Jews began theirs with sunset. Some critics, Dillmann among them, attempted to find traces of the Babylonian reckoning in the early portions of the Bible, but there is no doubt that with the spread of the Law the reckoning from evening to evening became established among the Jews (see Ibn Ezra's poem on the Sabbath, in which he decries the custom of a certain sect which began the Sabbath and festivals with sunrise; Rosin's edition, ii. 78, Breslau, 1885). The eve of Jewish holidays is therefore not the evening of the festival, but the day preceding it; in conversation, the expression "'ereb yom-ṭob" is even extended to denote an indefinite period preceding the holiday. It is observed as a day on which is prepared (*παρασκευή*) such work as it is not permitted to do on the holiday or on the Sabbath.

Announcement of Beginning.

The Rabbis enjoined that the celebration of holidays should begin some time before sunset, in order "to add from the profane to the holy" (R. H. 9a; Yoma 81b). In Temple times the blowing of the trumpet thrice by the Levites on the eve of a Sabbath or holiday notified the people to cease from work (Suk. 53b; Maimonides, "Yad," Kele ha-Miḳdash, vii. 5, 6; see Trumpet). This custom was retained for a long time in Jewry, although for the trumpet a wooden mallet was substituted, with which the Shammash knocked at the doors of the shops or private dwelling-places to remind the Jews that the Sabbath or holiday had begun (Abrahams, "Jewish Life in the Middle Ages," p. 56). He who engages in regular work late in the afternoon of the eve of the Sabbath or holiday will receive no blessing upon his work (Pes. 50b). Eating late in the afternoon before Sabbath is also forbidden, because the appetite must be reserved for the evening meal (Pes. 99b; Shulḥan 'Aruk, Oraḥ Ḥayyim, 529, 1: Isserles' gloss). It was considered a commendable act to bathe on the eve of the Sabbath or holiday (Shab. 25b; Oraḥ Ḥayyim, 260, 1; 471, 3: Isserles' gloss). In the afternoon services the penitential psalm ("Taḥanun") was omitted, as it was on all holidays or festive occasions (*ib.* 131). But besides these general rules which applied to the eves of all holidays, there are certain laws and ceremonies prescribed for the eve of each holiday in particular.

As there is no restriction of work on the day of the New Moon (Rosh Ḥodesh), the eve of that day would have remained unnoticed were it not for the haggadic parallel between the Jewish nation and the moon (Ḥul. 60b). The various phases of the moon are compared to the various vicissitudes of Israel, and the last day of the month reminds the Jew of his shortcomings in the service of God, and thus becomes a day of repentance, a miniature of the Day of Atonement ("Yom Kippur Ḳaṭan"). The afternoon prayer therefore includes many penitential hymns and formulas of confession of sin ("widdui"). These, however, are recited only by the very pious, who are also accustomed to fast on that day, at least until after the afternoon service (Oraḥ Ḥayyim, 417; comp. "Magen Abraham" and "Be'er Heṭeb" *ad loc.*).

While the special additional prayers ("seliḥot") are recited before dawn during the week preceding New-Year's Day, the prayers for the day before New-Year's are much more numerous and are recited with greater contrition. The hymn commencing with the words "Zekor Berit" (Remember the Covenant) is included in these prayers, and the day is frequently designated by the initial words of that hymn. It is also customary to fast on that day, or at least until noon, although pious Jews fast the greater part of the ten penitential days (Tanḥuma, Emor, 22; Oraḥ Ḥayyim, 581, 2). It is different, however, with the eve of the Day of Atonement. Not only is it forbidden to fast on that day, but feasting is encouraged; it is said that he who eats and drinks on the eve of the Day of Atonement will be rewarded as if he has fasted both days (Yoma 81b; Oraḥ Ḥayyim, 604, 1). The early prayers for that day are also considerably reduced, and after the morning service a repast prepared by the congregation is served in the synagogue for the purpose of establishing a feeling of general fellowship. Each one begs the forgiveness of those he has wronged during the year. See also Kapparot and Malkut Schlagen.

The meal taken before sunset should consist of light dishes, easily digestible, so that the evening prayer can be recited with devotion. A certain solemnity usually prevails in every household during this meal, after which the parents bless the children and immediately repair to the synagogue. This meal should be concluded before twilight sets in (*ib.* 604-608).

In Temple times the paschal lamb was offered during the afternoon of the eve of Passover; therefore more laws and ceremonies are grouped around this day than around the eve of any other holiday. On the evening of the day preceding Passover the ceremony of searching for leaven is performed by the master of the house (Pes. 2a; see Jew. Encyc. ii. 628 *s.v.*; Bediḳat Ḥameẓ). If Passover falls on a Sunday, the searching is begun on Thursday evening. The leaven found during this examination is burned the next morning before noon (Pes. 21a). No leaven should be eaten after the fourth hour of the day, and after the sixth hour it is not permissible to derive any benefit from the leaven left over (*ib.* 28b). Work on the eve of Passover is absolutely forbidden, and the transgressor exposes himself to the danger of being excommunicated. Even in the forenoon some are accustomed to cease work, and he who lives in a community where this custom prevails must conform to it (*ib.* 50a *et seq.*; see Custom).

The male first-born fast the whole day in commemoration of the miracle performed in Egypt, when the first-born in Israel were saved while those of the Egyptians were slain (Soferim xxi. 3; comp. Yer. Pes. x. 1; see First-Born). As is the case on the eve of the Sabbath, it is forbidden to begin a meal after the tenth hour (four P.M.) of the day, so that the appetite for the evening meal be not spoiled. Some are accustomed to fast the entire day in order to be better prepared for the festival meal in the evening (Pes. 99b, 108a). It is forbidden to eat any mazzah during the day preceding Passover, so that after the fourth hour no bread, leavened or unleavened, may be eaten (Yer. Pes. x. 1; see Rosh to Pes. iii. 7; Oraḥ Ḥayyim, 468, 470, 471).

s. s. J. H. G.

EVICTION. See Ejectment.

EVIDENCE: Whenever in proceedings at law an issue arises—that is, in civil cases when a fact is asserted on one side and denied on the other—the issue is generally determined by evidence, which the party having the burden of proof must proffer; and evidence to the contrary may be brought forward by the other party. The evidence may consist either of the testimony of witnesses or of documentary writings. What here follows applies in the main to civil cases.

I. Witnesses: In order to prove a disputed fact, witnesses must fulfil the following requirements:

Number and Qualifications.

1. Two must testify to the same fact. This rule is laid down in Deut. xxv. 15 and in other passages apparently for criminal cases only, but it has been extended to civil cases as well. In civil cases, however, it is not necessary that the two witnesses should agree very closely as to time and place. Thus, if of two witnesses to a loan one should say, "A lent B a jar of oil"; the other, "He lent him a jar of wine"; or if one should say, "I was present when the money was paid at Jerusalem"; the other, "I saw it paid at Hebron"; or if one should say, "I saw it paid in the month of Nisan"; the other, "I saw it paid in Iyyar," their testimony would be void. But if one says he saw it paid in the upper, and the other in the lower, story; or if one says on the first of the month, and the other on the second of the month, such evi- is within the limit of fair mistake, and the testimony stands. Even less does a disagreement as to circumstances other than time and place affect the testimony; for instance, if one says the money was black from usage, the other that it was new, this would be regarded as an immaterial circumstance, and the testimony would stand. Where the two witnesses vary only in the matter of quantity, the lesser quantity is sufficiently proved. In criminal cases, as has been shown under Acquittal in Talmudic Law, a much closer agreement is required.

2. The witness must be an Israelite. The Talmud seems to take this for granted; though it allows some facts to stand proved upon a statement "made innocently" by a Gentile; that is, not as a witness in court. In damage cases the Mishnah (B. Ḳ. i. 3) says expressly that the witnesses must be freemen and sons of the Covenant.

3. The witness must be a man, not a woman (R. H. i. 8); of full age, that is, more than thirteen years old; not a deaf-mute or a lunatic, and, according to the better opinion, not a blind man, and not either deaf or dumb. A boy not much over thirteen, and having no understanding of business, must not testify in a cause involving title to land (B. B. 155a). Nor should a person of full age testify as to what he said or heard as a minor, except in matters of frequent observation; *e.g.*: "This is my

father's," or "my teacher's," or "my brother's handwriting"; "This woman I used to see go out walking in maidenly hair and attire"; "Such a man used to go to the bath of evenings," indicating that he was a kohen (Ket. ii. 10).

Moral Qualifications.

4. He must not be a "wicked" man; for the Law says (Ex. xxiii. 1): "put not thy hand with the wicked, to be an unrighteous witness." The Mishnah (Sanh. iii. 3) names as those incompetent the vicious rather than the wicked; dicers (משחקי קוביא), usurers, pigeon-fliers, and those who trade in the fruits of the Sabbatical year. A baraita in the Gemara on this section (*ib.* 25a, b) disqualifies also tax-collectors and shepherds as presumably dishonest, unless their good character is proved, as well as butchers who sell "ṭerefah" meat for "kasher"; and it provides that they can reinstate themselves only by quitting their unlawful trade and by giving up for charitable purposes all the unlawful gains made therein. Maimonides ("Yad," 'Edut, x. 3) draws from the Talmudic passages Sanh. 25a, b and B. Ḳ. 72b the inference that one who purposely commits a sin to which the Law attaches the punishment of death or of forty stripes, or who robs or steals, although these latter offenses are not punishable by stripes or death, is "wicked" in the sense of being an incompetent witness. The same is true of one proved to be a "plotting witness" (Sanh. 27a). But the ground of incompetency must be proved by two other witnesses; the sinning witness can not become incompetent by his own confession.

Informers, "Epicureans," and apostates are incompetent (Maimonides, *l.c.* x, end, followed by later codes). Also men who show lack of all self-respect—by eating on the street, walking about naked at their work, or living openly on the charity of Gentiles—are incompetent (Maimonides, *l.c.* xi. 6, based on Sanh. 26b). Where the incompetency arises under rabbinical provisions, the objectionable man must be publicly proclaimed incompetent (פסול) before his testimony can be excluded (*ib.*).

Where A and B are called as witnesses, and B knows that A is "wicked" (for instance, a robber), so as not to give force to the testimony of A, B should not testify (Shebu. 30b).

5. The witness must not have any interest in the litigation. The Talmud carries this doctrine so far as to state (B. B. 43a) that where some one raises a claim of title to the public bath-house or the square of the city, none of the citizens can testify or act as judge until he divests himself of all share in the title. Similarly, where the suit is on grounds common to two joint owners of land, one may not testify for his companion until he has sold his own share without warranty. In a suit for a field a tenant on shares may not testify for his landlord, for he is interested in the crop.

6. The witness must not be related to the party that calls him: in criminal cases the witnesses for either side must not be related to the accused. The degrees of consanguinity and affinity are the same as for judges, and are laid down under Agnates. The rule is derived from a rather bold interpretation of Deut. xxiv. 16, which is rendered, "Fathers shall not be put to death on [the testimony of] sons, nor sons on [the testimony of] fathers" (see Sanh. 27b); but the principle is extended from capital cases to civil suits, and far beyond the mere relationship between father and son. Relationship by marriage is at an end when the wife dies. The objection of friendship or hate that applies to judges does not hold as against witnesses.

The Geonim disqualify a man who has publicly threatened a litigant that he will ruin him by a denunciation, from testifying against him (see Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 34, 20, and Be'er Golah thereon). The later codes follow the Palestinian Talmud on Sanh. iii. in holding that witnesses akin to each other or to the judges are incompetent (Ḥoshen Mishpaṭ, 33, 17).

II. Mode of Examination: 1. Witnesses do not testify under oath, but under the sanction of the ninth commandment. The presiding judge admonishes the witnesses before they testify. All persons other than the litigants and the witness to be examined are then dismissed from the room; the same procedure applies to all following witnesses.

2. He who knows testimony of benefit to his neighbor should, under the Mosaic law (Lev. v. 1), make it known to him; and an oath may be imposed on him to say whether he knows anything and what he knows. The Talmud (B. Ḳ. 56a) points to the words "he shall bear his iniquity"; hence, he is liable only to heavenly, not to earthly, punishment. With a view to the former, the litigant may ask that a ban (the "sound of the curse" of Lev. v. 1, Hebr.) be pronounced in the synagogue against all those who know aught in his favor and will not come forward to testify. Otherwise he has no remedy, no compulsory process against witnesses, and no means to force them to answer questions. But when the court finds that the witnesses for one party are intimidated by his opponent from appearing, it may compel the latter himself to bring those witnesses into court.

3. From "the mouth of witnesses," says the text, a man shall be condemned, not upon their written statement; hence, testimony should be given by word of mouth in open court, not by way of deposition. In all criminal cases, and in all suits for penalties or damages to the person, this rule is invariably followed; but in actions on contract, especially on behalf of the defendant, depositions are admitted for good reasons, such as that the witnesses are sick or absent from the place of trial, or that one of the parties is sick, so that the trial can not be had, while the witnesses are about to depart. In all such cases notice must be given to the opposite party, and the deposition, in the nature of minutes of judicial proceedings, must be taken before a court of three judges.

In Presence of the Litigant.

4. As a rule, witnesses may be heard only in the presence of the opposing litigant, so that he may suggest to the court points on which to cross-examine them. For this reason witnesses may not be received against a minor, because he would not know how to direct the cross-examination. Later authorities maintain that the rule, "No witness without the chance of cross-examination," ap-

plies to the plaintiff's witnesses only; but the debtor may be the plaintiff, when he sues a minor heir of his creditor for the cancelation of his bond, by presenting his receipt attested by witnesses: it is held (Ḥoshen Mishpaṭ, 108, 17) that he must wait till the infant heir comes of age, as in the "parol demurrer" of the common law.

5. In civil cases, other than those for personal injury, the court is not bound to go, on its own motion, through the formal cross-questions as to time and place (see Acquittal), with a view of finding a contradiction between the two witnesses, for such a course would "close the door before borrowers"; but where the judges have reason to suspect that the claim or defense is fraudulent (מרומה; *ib.* 15) they should take all proper means to break down the testimony on that side.

6. Where the witnesses testify to an admission made by a litigant they should give, as far as they can, the very words, not their general import. Let the court decide whether the words amount to an admission, or whether they can be explained away as having been made in jest or for an ulterior purpose. The position is drawn from a section of the Mishnah and a baraita (Sanh. 29a).

7. Speaking generally, after a witness has been allowed to depart he may not retract his testimony by saying, "I was mistaken"; "I did not recollect"; etc. Even if he gives a plausible reason he is not listened to. But when other witnesses are called to attack the character of one who has testified, the latter may explain or retract (Sanh. 74b; Ket. 19b).

III. Documentary Proof: This is often spoken of as ראיה, which is the general term for "evidence" or "proof."

1. It is in general either an instrument written by an adverse party, which has to be proved by witnesses acquainted with his handwriting, or the more formal instrument, known as a "sheṭar," or Deed, attested by two witnesses, but not necessarily signed by the grantor or obligor. When a deed (a conveyance of land, or a bond, or an acquittance) is the basis of an action or defense, it ought to be regularly proved by the testimony of the attesting witnesses; but if they are absent, or refuse to testify, other men may establish the deed by proving the handwriting of the attesting witnesses (there being, of course, two witnesses to the handwriting of each attester). When this is so proved, the attesting witnesses are not allowed to attack the validity of the deed. But if the party interested in the deed must rely on the word of the attesting witnesses, these may say: "True it is, we signed the deed, but we did so from fear for our lives"; or "The obligor delivered a protest to us, showing that he acted under duress"; or "We were under age, or incompetent on other grounds"; or "The deed had a condition attached which has not been fulfilled"; and they may thus defeat the testimony given by themselves in support of the deed. But if they say the sheṭar (say, a bond) was entrusted to the obligee without consideration, or that they acted under duress of pecuniary loss, or that they were incompetent by reason of sinfulness, or that the grantor was under age, their testimony in favor of the deed stands, and their attempt to defeat it is "not listened to" (Ket. ii. 3). But the attesting witnesses are always competent to state that the grantor or obligor made a protest to them by reason of duress; for this is not incompatible with the deed (Ḥoshen Mishpaṭ, 46, 37, 38).

Establishing a Deed.

2. A method to establish a deed, more especially a bond, at the instance of the holder, is given in the Talmud (B. Ḳ. 112a; see also B. B. 40a and Ket. 21a) and is recognized by the codes ("Yad," 'Edut, vi.; Ḥoshen Mishpaṭ, 46, 3–4). The two witnesses, at the instance of the holder, come before an improvised court, made up of any three respectable Israelites; and the latter write at the bottom of the deed "A B and C D appeared before us this day and testified to their own signatures, whereupon we have approved and established this deed"; and the three "judges" sign. Being in the nature of a judgment, this must be done in the daytime; but the proceeding is wholly ex parte. A deed thus established may, without further proof, be presented upon the trial of a case. The gloss of RaMA states that one expert is as good as three laymen, and that "in these countries" (meaning those of the German "minhag") it is customary for any rabbi at the head of a school (ישיבה) to establish a deed.

Circumstantial Evidence.

IV. Effect of Evidence: 1. The sages had very little more confidence in circumstantial evidence given for the purpose of "taking money out of" the defendant's pocket than in that given for the purpose of inflicting the penalty of death or stripes. Ket. ii. 10 has been cited, according to which a witness may testify that, when a boy, he saw a woman walk about in maidenly attire; the object being to prove that she married as a maiden, not as a widow, and is therefore entitled to a greater sum for her jointure. In discussing this clause the Talmud remarks that this is only arguing from the majority of cases: for though in most cases those wearing maidens' attire are not widows, occasionally they are; and money ought not be taken out of a man's pocket on mere reasoning from the greater number of cases. In fact, circumstantial evidence was generally rejected.

2. Hearsay evidence was barred equally in civil as in criminal cases, no matter how strongly the witness might believe in what he heard, and however worthy and numerous were his informants ("Yad," 'Edut, xvii. 1).

3. The length of time between the observation of the fact and the testimony is no reason for rejecting the latter, even though the witness has to refresh his memory by looking at a written memorandum (Ket. 20a).

4. It has been shown under Alibi how a "set" of witnesses may be convicted as "plotters" by another set or sets proving an alibi on them. But the opposite party may prove an alibi on the convicting set, or in some other way show that the facts testified to by the first set were impossible or untrue. Under such circumstances a modern judge or jury would weigh the credibility of the witnesses and the probability of their stories, and decide between them accordingly. The sages did not trust themselves or their

successors with this discretion. If there were no indicia of fraud, they held that, as some one evidently was lying, they could not decide which of them it was; and that there was no evidence on the point. This would generally defeat the plaintiff's demand; for, as has been said under BURDEN OF PROOF, the burden lies on him who desires to get something from his neighbor. If there were any indicia of fraud, the judges would seek for some ground to disqualify as incompetent the witnesses who seemed at fault. Speaking broadly, the judges considered it their duty to decide the effect of the testimony as a question of law, not as one of the greatest probability; though in some matters the "lucky throw of the judge" (שורא דדיינא; *i.e.*, his decision) was held indispensable.

For the effect which the testimony of a single witness has in certain cases, short of proving the affirmation of the issue, see PROCEDURE.

EVIL EYE (Hebrew, עין הרע; Aramaic, עינא בישא): A supposed power of bewitching or harming by spiteful looks, attributed to certain persons as a natural endowment. The belief that a glance can damage life and property is wide-spread among both savage and civilized peoples (for the Chaldeans and Egyptians see Lehmann, "Aberglaube und Zauberei," p. 32, Stuttgart, 1898; Budge, "Egyptian Magic," pp. 97 *et seq.*, London, 1899; Lane, "Customs and Usages of the Egyptians of To-day" [German transl. by Zenker], ii. 66; and L. Krehl, "Der Talisman James Richardson's," p. 7, *s.v.* "Araber," Leipsic, 1865). This belief was also held by the Jews in Biblical times (see JEW. ENCYC. i. 546, *s.v.* AMULET).

Simeon ben Yoḥai and the popular amora R. Joḥanan could, with a look, transform people into a heap of bones (Pesiḳ. 90b, 137a; B. M. 84a; B. Ḳ. 11a; see Blau, "Das Altjüdische Zauberwesen," p. 50). According to R. Eliezer (Sanh. 93a), Hananiah, Mishael, and Azariah, after they had been rescued from the fiery furnace, were killed by the many eyes which were directed at them in astonishment. "When R. Eliezer ben Hyrcanus was shut out of the place of teaching, every spot upon which he turned his eye was burned up; even a grain of wheat upon which his glance fell was half burned while the other half remained untouched, and the pillars of the gathering-place of the scholars trembled" (B. M. 59b; Shab. 33b). Even over the first two tables of the Covenant, because they were given publicly, the eye had power (Grünhut, "Liḳḳuṭim," v. 128a = 'Aruk, *s.v.* פמבי). According to Rab (Yer. Shab. xiv. 14c; B. M. 107b), out of 100 people 99 die through the evil eye. Large masses of people provoke the evil eye, wherefore Joshua (Josh. xvii. 15) advised the sons of Joseph to get themselves up to the forest that the evil eye might not injure them (B. B. 118a). Jacob also said to his sons when they went down into Egypt: "Do not all enter at the same gate on account of the eye" (Gen. R. xci.). Prominent men are peculiarly susceptible to the evil eye. When the people demanded that Judah I. should come up to the pulpit from the school-bench, his father, the patriarch Simeon ben Gamaliel, said: "I have one dove among you, and do you wish to take him from me by destroying him?" meaning thereby, "If Judah I. is raised to the leader's place, the evil eye from the audience may harm him" (B. M. 84b).

To the descendants of Joseph the evil eye can do no manner of harm (Ber. 20a). Whoever is on the point of entering a city and is afraid of the evil eye, should stick his right thumb in his left hand, and his left thumb in his right, and say: "I, N. N., son of N. N., am of the seed of Joseph, whom the evil eye may not touch" (Ber. 55b). The saying is Jewish; the gesture rests on the heathenish notion that obscene gestures protect against the evil eye. The Talmud teachers, however, probably no longer knew the meaning of the gesture prescribed. A glance at the left side of the nose also protects against the evil eye (Ber. *l.c.*). In the case of a horse protection is effected by hanging between his eyes a fox's tail (Tosef., Shab. iv. 5).

Effect on Inanimate Objects.

The evil eye could also affect lifeless objects. Rab forbids standing in a neighbor's field when the corn is in the ear (B. M. 107a). A garment found should not be spread over the bed when guests are in the house, for "it will be burned by the eye" of the guests (B. M. 30a). Blessing comes only upon those things which are hidden from the eye (Ta'an. 8b).

Many a superstition owes its origin to etymology. Shab. 67a says: "If a tree lets its fruit fall, it should be painted red and loaded with stones" (comp. Pliny, "Hist. Naturalis," xviii. 86). Painting the tree red protects it from the evil eye, סקר having the meaning of both "dyeing red" and "glancing." The harm that comes from the eye is neutralized by hanging something between the eyes. The superstitions of the Middle Ages were the same as those of the Talmud period, with the exception that at the later epoch the Jews had more remedies against the influence of the evil glance (comp. Zohar, Num. xxiv.; Manasseh ben Israel, "Nishmat Ḥayyim," p. 141, Amsterdam, 1651).

The belief in the "'en ha-ra'" still prevails in Asia and eastern Europe and to a certain extent in western Europe also.

Children are especially susceptible to the influence of the evil eye. On account of their beauty they arouse the envy of the mothers of other children, who cast upon them their evil glances; but "wise women" understand how to counteract the influence which such glances may exert. R. Ḥisda says: "If the first child be a girl this is a good omen for the succeeding boys, because the evil eye is in that case not irritated."

In Slavic lands old women throw live coals into water, with which they sprinkle the four corners of the room, reciting the while certain formulas as a safeguard against the evil eye (Rubin, "Geschichte des Aberglaubens," etc., p. 164; Grunwald, "Mitteilungen," etc., v. 41, No. 88). People light the Habdalah candle and hold it before the child's open mouth, extinguishing it so as to make the smoke

In Folk-Lore.

go into the mouth (Grunwald, *l.c.* p. 40, note). This is probably an imitation of Catholic exorcism by means of incense. "A piece of bread and salt or of the maẓẓah from Passover is put into the pockets of particularly beautiful children. A piece from the garment of the person who is suspected of having exercised the charm . . . is placed on glowing coals and the smoke blown into the child's face" (Grunwald, *ib.*). Adults wear rings or beads of amber on a string around the neck as a protection against the evil eye (Rubin, *l.c.* p. 179; Grunwald, *l.c.* v. 60, No. 198, note). The bridegroom, whose conjugal happiness is envied by some one, is especially susceptible to the influence of the evil eye. He may protect himself by walking backward (Grunwald, *l.c.* i. 87, v. 33, note 42). In olden times children were not taken to the wedding-feast for fear of the evil eye in the crowd (Lev. R. xxvi. 7; Tan., Emor, 4; comp. also Grunwald, *l.c.* i. 36, 99).

K. L. B.

EVIL-MERODACH: Son of Nebuchadnezzar, and third ruler of the New Babylonian empire; reigned from 561 to 560 B.C. His name in Babylonian is "Amil-Marduk" or "Avel-Marduk" = "man," or "servant, of Marduk." No personal or historical inscriptions of his reign have been discovered, and there are only two sources of information concerning him—the Hebrew Scriptures and Berosus. According to the Bible (Jer. lii. 31; II Kings xxv. 27 *et seq.*), he released, in the year of his accession, the imprisoned king Jehoiachin, invited him to his table, clothed him with royal raiment, and elevated him above all other captive kings that were in Babylon. Tiele, Cheyne, and Hommel are of the opinion that perhaps Neriglissar, Evil-merodach's brother-in-law, who is praised for his benevolence, was instrumental in the freeing of the Judean king. Grätz, on the other hand, conjectures the influence of the Jewish eunuchs (referring to Jer. xxxix. 7 and Daniel).

Berosus, however, says that Evil-merodach ruled "unjustly and lewdly." Possibly his treatment of the exiled king was held by the priestly, or national, party to have been unlawful; or it may be that the memory of some injury rankled in the mind of the priestly writer, or writers, of his history (Winckler, "Gesch. Babyloniens und Assyriens," p. 314). Evil-merodach was unable to counteract the danger arising from Median immigration. The party opposed to him soon succeeded in dethroning him, and he was assassinated by order of Neriglissar, who succeeded him.

EVIL SPIRITS. See DEMONOLOGY.

EVOLUTION: The series of steps by which all existing beings have been developed by gradual modification; term generally applied to the theory concerning the origin of species and the descent of man connected with the names of Charles Darwin and Herbert Spencer, and defended and amplified by Ernst Haeckel and Thomas Huxley, though to a certain degree anticipated by Goethe, Lamarck, Kant, and even Heraclitus. According to this hypothesis all animal and vegetable life may be traced to one very low form of life, a minute cell, itself possibly produced by inorganic matter. This development, according to Darwin, is due to the struggle for existence, and to the transmission through natural (and sexual) selection of those qualities which enable the possessors to carry on the struggle, in which only the fittest survive. Herbert Spencer and others have applied the theory of evolution to every domain of human endeavor—civilization, religion, language, society, ethics, art, etc., tracing the line of development from the homogeneous to the heterogeneous, though recrudescences of and lapses into older forms and types (degeneration, atavism) are by no means excluded. The relation of the teachings of Judaism to this theory is not necessarily one of hostility and dissent.

Judaism and Evolution.

Evolution not only does not preclude creation, but necessarily implies it. Nor are purpose and design (teleology) eliminated from the process. Natural selection in strict construction is teleological. Mechanical design alone is precluded. In its stead the hypothesis of evolution operates with a teleology that is, both in intensity and in extent, much more adequate to the higher conceptions of God. Mechanical teleology is anthropomorphic. Jewish theism, not being anthropomorphic, does not defend mechanical teleology.

The development of life from inorganic matter, the rise of consciousness from preceding unconscious life, the origin of mind, of conscience, are not accounted for by the theory of evolution; and as at the beginning of the chain, so at these links it fails. Jewish theism, while admitting that on the whole the theory throws light on the methods pursued in the gradual rise and unfolding of life, is justified in contending that it does not eliminate the divine element and plan and purpose from the process. Evolution gives answer to the *how*, never to the *what*, and only inadequately to the *why*. Belief in miracles, in catastrophical interruptions of the continuity of nature's processes, indeed, is not compatible with the acceptance of the doctrine of evolution. The Jewish (Talmudical) view of MIRACLES, as a condition involved in the original design of nature, however, is not inherently irreconcilable with the hypothesis of evolution, while modern (Reform) Jewish theology is not concerned to defend the belief in miracles based on literal constructions of Biblical passages.

Judaism, having never taught the doctrine of the Fall of Man, is not obliged to reject the evolutional theory on the ground that it conflicts with the dogma which demands the assumption of man's original perfection, and which thus inverts the process and sequence posited by the evolutionists.

Evolution of Religion.

The theory of evolution has also been applied to the history of religion. Following the positivists, the writers on this subject from the point of view of the evolutionary school have argued that some species of animism (ancestor-worship) was the lowest form of religion, which, developing and differentiating successively into gross and then refined fetishism (totemism), nature-worship, polytheism, tribal henotheism, and national monolatry, finally flowered into universal ethical monotheism. The history of Israel's religion has also been traced from this point of view, according to which it exhibits vestiges of antecedent animism and totemism, but appears in its earlier historic forms as tribal henotheism of a largely stellar and lunar (agricultural) cast; it then grew, under the influences of environment and historical experiences (national consolidation and Canaanitish contamination), into national monolatry (Yhwhism), which gradually, under Assyro-Babylonian influences, deepened and clarified into prophetic or universal ethical monotheism, again to be contracted into sacerdotal and legalistic Judaism. This theory of the rise and development of religion in general and of that of Israel in particular conflicts with (1) the assumption of an original monotheism and the subsequent lapse of man into idolatry, which, however, is a phase of the doctrine of the Fall of Man; and with (2) the conception of revelation as an arbitrary, local, temporal, and mechanical process of communicating divine truth to man, or to Israel.

The view, however, which looks upon revelation as a continuous, growing, and deepening process, through which divine truth unfolds itself and thus leads man to an ever fuller realization of the divine purposes of human life and the higher moral law of human existence, and Israel to an ever more vital appreciation of its relations to the divine and its destiny and duty in the economy of things and purposes human, is not inherently antagonistic to the evolutional interpretation of the rhythm of religious life.

Evolution and Monotheism.

(1) Evolution confirms religion as a necessary outcome and a concomitant of the development of human life. Thus evolution negatives the theories of the rationalists that regard religion as a benevolent or as a malevolent invention. (2) Evolution does not deny the part played by the great men (prophets) in this process of developing religious consciousness and views. (3) The rise and activity of these great men evolution can not account for. (4) In the history of Israel's religion, evolution has not explained and can not explain how, from original (Kenite) Yhwhism, void of all moral content and all original, "holiness" (= "taboo" ["ḳodesh"]) ascribed to the Deity, could have sprung the ethical monotheism of the Prophets and the idea of moral holiness ("ḳadosh"). The power of origination vested in genius (prophecy) is thus not eliminated as the main factor from the factors involved in the religious evolution of Israel. Babylonian influences (Delitzsch, "Babel und Bibel") did not, among the Babylonians themselves, develop the higher monotheism. It is thus beyond the range of possibility that what failed of development among its own originators should have evolved into monotheism among the Israelites, unless Israel had a peculiar and distinctive genius for monotheism. This power of originating monotheistic ideals and transmuting other ideals into monotheistic concepts, a power which the Prophets had in a high degree, and which the nation also, as a whole, gradually displayed in the development of its national genius, is the one factor for which evolution can not account. This factor may be rightly denominated "revelation." (5) The evolution theory overthrows Renan's dictum that monotheism is "the minimum of religion." None of the essential contentions of Judaism is vitally affected by the propositions of the evolution school. The philosophy of the Reform wing within Judaism, regarding Judaism as a growth, not a fixed quantity or a rigid law, and as still in the process of developing (tradition being its vital element), has even found corroboration in the theory of evolution.

K. E. G. H.

EVORA: City in Portugal, and the seat of the rabbi of the province of Alemtejo. When the bride-elect of Don Alfonso, the only son of King John II., entered Evora (Nov. 27, 1490), the Jews of the city met her in solemn procession and presented her with gifts of cows, sheep, hens, etc. It was at Evora, in 1497, that King Manuel issued the decree commanding that all Jewish children under fourteen years of age should be forcibly taken from their parents on Easter Sunday and distributed in various parts of the country, to be educated in the Christian faith. In April, 1506, the synagogue was demolished by the populace. Many wealthy Maranos were living there when the institution of the Inquisition was solemnly proclaimed (Oct. 22, 1536). In 1542 it began its work in Evora, and one of the first to be brought to the stake was David Reubeni (see Auto da Fé; Inquisition).

D. M. K.

EVREUX (Hebrew, איברא or איורא): Capital of the department of Eure, France. In the Middle Ages it was one of the centers of Jewish learning, and its scholars are quoted in the Tosafot on Beẓah 14b, 20b, 24b; on Ḳiddushin 27b, 39a *et passim*; on Soṭah 22a *et passim*; and in the Kol Bo, Nos. 24, 114. The following rabbis are known to have lived at Evreux: **Samuel ben Shneor** (Zunz, "Z. G." p. 38, designates him erroneously "Samuel, son of R. Yom-Ṭob"), called the "Prince of Evreux" ("R. E. J." vi. 168); one of the most celebrated tosafists; **Moses of Evreux,** brother of Samuel; author of the "Tosafot of Evreux"; his name is often abbreviated to ר'ם; **Isaac of Evreux,** often abbreviated to ר'י; **Judah ben Shneor,** or **Judah the Elder,** author of liturgic poems; **Meïr ben Shneor**; **Samuel ben Judah**; **Nathan ben Jacob,** father of Jacob ben Nathan, who in 1357 copied the five Megillot with the Targum for Moses ben Samuel.

G. S. K.

EWALD, FERDINAND CHRISTOPHER: English clergyman; born near Bamberg, Bavaria, 1802; died in Norwood, London, Aug. 9, 1874; baptized at Basel when about 23 years of age; entered (1829) the service of the London Society for Propagating the Gospel Among the Jews, by which he was sent (1831) to Tunis. He labored assiduously among the Jews in North Africa till 1842, when he accompanied as chaplain Bishop Alexander to Jerusalem. Here he remained till 1849, when ill health compelled him to return to London. He was largely instrumental in founding the Wanderers' Home in London (1853), an asylum for doubting Jews and needy proselytes. In addition to reports on his missionary labors in North Africa and Jerusalem, he published a German translation of 'Abodah Zarah (1856).

J. N. D.

EWALD, GEORG HEINRICH AUGUST: Christian Biblical scholar; born at Göttingen Nov. 16, 1803; died there May 4, 1875; educated at the University of Göttingen, where he studied philology and especially Oriental languages. He became private tutor in 1824 and professor at Göttingen in 1827. Being one of the "Göttingen Seven," who in Nov., 1837, protested against the violation of the constitution by the king, Ernst August, he was removed from office. He was called to Tübingen in 1838, and returned to Göttingen in 1848, and remained there till 1867.

Ewald was an influence both through his works and through his personality; and by his vast learning and genuine piety was eminently fitted to be an expounder of the Old Testament.

Graetz writes of him ("Hist." v. 695) that whereas both the rationalists and the orthodox Christian theologians failed to arrive at a correct understanding of the sacred Scriptures of the Jews, Ewald, "a man of childlike mind, was the first to raise the veil, to comprehend the language of the Prophets and Psalmists, and to reveal the ancient history of the Jewish people in its true light." By his works "a new path was opened up for the comprehension of the Hebrew genius and people." For him and his school the people of Israel was truly "the people of God," and its history the history of true religion, though from the point of view he takes the last page of that history was written eighteen hundred years ago. Singularly enough, Ewald had only contempt for the people whom as the creators of the Old and the New Testment he glorified.

His great appreciation of the work done by medieval Jewish scholars for Biblical exegesis and Hebrew grammar and lexicography was shown by his publishing, in conjunction with Leopold Dukes, specimens of the writings of Saadia, Adonim b. Teonim, Judah ibn Ḳuraish, Menahem ben Saruḳ, Dunash b. Labrat, Judah Ḥayyuj, Jonah ibn Janaḥ, Moses Gikatilla, Judah ibn Balaam, and others, under the title "Literar-Historische Mittheilungen über die Aeltesten Hebräischen Exegeten, Gramatiker, und Lexicographen," Stuttgart, 1844.

In the domain of Old Testament science, he rendered the most effective service. He published his first work, "Die Komposition der Genesis Kritisch Untersucht," in 1823. His "Kritische Grammatik der Hebräischen Sprache," which first appeared in 1827, placed the science of Hebrew philology on a new basis. His other principal works are: "Die Dichter des Alten Bundes," 1835-39; "Die Propheten des Alten Bundes," 1840-41; the monumental "Geschichte des Volkes Israel," with the supplement "Alterthümer des Volkes Israel," 1843-48, which marks an epoch in the treatment of Israelitish history; "Jahrbücher der Biblischen Wissenschaft," 1849-1865; and "Die Lehre der Bibel von Gott, oder Theologie des Alten und Neuen Bundes," 1871-76.

Bibliography: *Allg. Deutsche Biographie*, vi. 438-442; T. Wilton Davies, *Heinrich Ewald*, London, 1903.

EWALD, JOHANN LUDWIG: German pedagogue and theologian, and advocate of the Jews; born at Hain-zur-Dreieich, grand duchy of Hesse, Sept. 16, 1747; died at Carlsruhe March 19, 1822. He held various positions as preacher and professor, and toward the end of his life was counselor to the government of Baden. As such he took great interest in the affairs of the Jews, which, after the Congress of Vienna, occupied the attention of German statesmen. He also wrote two pamphlets in defense of the Jews and in refutation of the hostile works written by Fries and Rühs: "Ideen über die Nöthige Organisation der Israeliten in Christlichen Staaten" (Carlsruhe and Baden, 1816) and "Einige Fragen und Noch Mehr Unläugbare Wahrheiten, Juden- und Menschennatur, Juden- und Menschenbildung Betreffend" (Carlsruhe, 1820). He argued that the Jews were not worse than others, that their shortcomings were the result of persecution, and that no one had a right to expect them to improve until they had been given equal rights with other citizens. He further pointed out that since the restricted emancipation which the grand duchy of Baden had conceded in 1809 the condition of the Jews had shown marked improvement.

EWE. See Sheep.

EWER, LEOPOLD: German physician; born Jan. 4, 1849, at Anklam, Pomerania. He studied from 1868 to 1873 at the University of Berlin (M.D. 1873). During the Franco-Prussian war he was assistant surgeon at the military hospitals at Berlin and Carlsruhe. In 1874 he began to practise in Berlin, where he soon became a specialist for massage and orthopedia.

Ewer has taken an active part in the political life of the German capital and in the religious development of the Jewish congregation of Berlin (1883, 1886). He is the author of: "Heinrich von Rantzau's Buch über die Erhaltung der Gesundheit," 1891; "Kursus der Massage mit Einschluss der Heilgymnastik," 1891; 2d ed., 1901; "Leibesübungen und

Wettkämpfe im Alten Griechenland und Rom," 1896; "Indikationen und Technik der Bauchmassage," 1901; "Der Bau des Menschlichen Körpers, für Masseurs Bearbeitet," 1901; "Gymnastik für Aerzte und Studirende," 1901. He has also contributed many articles to medical and pedagogical journals.

Bibliography: M. Unterweger, in *Zeitschrift für Gesundheitspflege*, Gratz, Austria, Feb. 1, 1902.

EXCHANGE, BILLS OF: Instruments, generally in duplicate, ordering persons to pay money in distant parts. According to Hallam ("Europe in the Middle Ages," iii. 339), Jews were the first to issue orders of this kind addressed to particular persons. An instance as early as 1183 is given in Capmany's "Memorias Historicas Sobre la Marina y Comercio de Barcelona" (i. 297). In 1181 Isaac of Rochester, Isaac of Russia, and Isaac of Beverley were accused of having "exchanged" ("cambivisse") in Southampton (see Jacobs, "Jews of Angevin England," p. 73). It is not clear how this could have formed a subject of offense to the royal treasury, but it makes it probable that the Jews of one country issued demand notes on those of another, the countries in this case being Russia and England. The practise appears to have begun among the Arab traders of the Levant in the eighth century, and from them passed to the Italian traders who followed the Crusades (Grasshoff, "Die Suftaga der Araber," 1901). It was also taken up by the Christians of Aragon from the Arabs of Andalusia, possibly by the intermediacy of the Jews during the course of the twelfth century, but there is little evidence that its further development was due to the Jews. No Jewish names occur in the Marseilles list of drawers of bills given by Schaube in "Jahrbücher für Nationalökonomie und Statistik" (1895), among those attached to the bills sent to the fair of Ypres in the thirteenth century, in the list given by Marez in "Mémoires Couronnés de l'Académie Royale de Belgique" (1901), or in the long list of drafts drawn by St. Louis on Italian merchants which is given by Schaube in the "Jahrbücher" for 1898. For a Jewish form of bill of exchange see "Berliner Festschrift," 1903, pp. 103–109.

A. J.

EXCHEQUER OF THE JEWS ("Scaccarium Judæorum" or "Thesauraria Judæorum"): A division of the Court of Exchequer in England (1200–90) in which the taxes and the law-cases of the Jews were recorded and regulated. It appears to have arisen out of the estate left by Aaron of Lincoln, which needed a treasurer and clerk to look after it, so that a separate "Aaron's Exchequer" was constituted. The riots following Richard I.'s accession showed the danger such property was liable to if no record was kept of the debts owing to the Jews. Accordingly Richard in 1194 ordered that duplicates should be taken of all Jewish debts and kept in this or in other central repositories. It was soon afterward found necessary to have a center for the whole of the Jewish business, and this was attached to the Exchequer of Westminster and called the "Exchequer of the Jews." The first recorded mention of this is in 1200, when four "justices of the Jews" are named, two of them being Jews, Benjamin de Talemunt and Joseph Aaron. These justices had the status of barons of the Exchequer, and were under the treasurer and chief justice. They were assisted by a clerk and escheator; Jews might hold these offices, but, excepting the two mentioned above, none ever became justice of the Jews. The justices were aided in their deliberations by the presbyter or chief rabbi, who doubtless assisted them in deciding questions of Jewish law which may have come before them (see Presbyter).

Functions.

The Exchequer of the Jews dealt with the law-cases arising between Jews and Christians, mainly with reference to the debts due the former. It claimed exclusive jurisdiction in these matters, but many exceptions occurred. In 1250, pleas of disseizin of tenements in the city of London were handed over to the mayor's court, and at times cases of this kind were brought before the ordinary justices in eyre or the hundred-court. It was before this court of the Jewish Exchequer that in 1257 the trial of Chief Rabbi Elyas of London took place. Moreover, the court assessed the contributions of the Jews to the royal treasury in reliefs (comprising one-third of the estate of a deceased Jew), escheats (forfeited to the king for capital offenses), fines (for licenses and concessions), and tallages, or general taxes applied for arbitrarily by the king (see Tallage).

In connection with the tallage, the justices periodically ordered a "scrutiny" of the lists of the debts contained in the archa or chest in which Jewish chirographs and starrs were preserved. The chests themselves, or more frequently lists of the debts contained in them, were sent up for "scrutiny" to Westminster, where the justices would report to the king as to the capability of the Jewry to bear further tallage. In the middle of the thirteenth century the number of such archæ was reduced to twenty-five (see Archa). Arrears of tallage were continually applied for, and if not paid the Jew's wife and children were often imprisoned as hostages, or he himself was sent to the Tower and his lands and chattels were distrained.

The Exchequer of the Jews was one of the means which enabled the kings to bring pressure upon the lesser baronage, who therefore claimed in 1251 the right to elect one of the justices of the Jews. These were at first men of some distinction, like Hugh Bigod, Philip Basset, and Henry de Bath. During the early reign of Henry III. the justices were mainly appointed by Hubert de Burgh, but later on they were creatures of the king's favorites, as in the case of Robert Passelewe. During Edward I.'s rule justices held their posts for a very short time, and in 1272 and 1287 they were dismissed for corruption, handsome presents having been made to them, nominally for the use of the king, in order to expedite the legal proceedings. The court did not survive the expulsion, though cases with references to the debts of the Jews occurred in the year-books up to the reign of Edward II.

The deeds entered in the Jewish Exchequer were mainly the chirographs recording and the starrs annulling indebtedness to the Jews. It has been suggested that the notorious Star Chamber received its name from being the depository for the latter class of deeds. The tax-lists for the tallages were made out by the Jewish assistants of the Exchequer, who were acquainted with the financial condition of each Jew on the list; many of these lists still exist. Various pleas entered by Jew or Christian dealt with the rate of interest, its lapse during the minority of an heir, the alleged forgeries of chirographs, and the like, and were recorded on the plea-rolls of the Exchequer. The more important of these have recently been jointly published by the Selden Society and the Jewish Historical Society of England.

EXCOMMUNICATION (Hebrew, "niddui," "ḥerem"): The highest ecclesiastical censure, the exclusion of a person from the religious community, which among the Jews meant a practical prohibition of all intercourse with society. For the etymology of the Hebrew terms used in this connection and for a clear exposition of the historical development and of the ethical significance of this institution see Anathema and Ban.

Although developed from the Biblical ban, excommunication, as employed by the Rabbis during Talmudic times and during the Middle Ages, is really a rabbinic institution, its object being to preserve the solidarity of the nation and strengthen the authority of the Synagogue by enforcing obedience to its mandates. Still, the legal instinct of the Rabbis here, as elsewhere, made it impossible for such an arbitrary institution to become dangerous, and a whole system of laws was gradually developed, by means of which this power was hedged in and controlled, so that it practically became one of the modes of legal punishment by the court. While it did not entirely lose its arbitrary character, since individuals were allowed to pronounce the ban of excommunication on particular occasions, it became chiefly a legal measure resorted to by a judicial court for certain prescribed offenses.

The Talmud speaks of twenty-four offenses punishable by excommunication (Ber. 19a; Yer. M. Ḳ. iii. 1), a round number which is not to be taken lit-

Causes of Excommunication.

erally. Later authorities enumerate the twenty-four as follows: (1) insulting a learned man, even after his death; (2) insulting a messenger of the court; (3) calling an Israelite "slave"; (4) refusing to appear before the court at the appointed time; (5) dealing lightly with any of the rabbinic or Mosaic precepts; (6) refusing to abide by the decision of the court; (7) keeping in one's possession an animal or an object that may prove injurious to others, such as a savage dog or a broken ladder; (8) selling one's real estate to a non-Jew without assuming the responsibility for any injury that the non-Jew may cause his neighbors; (9) testifying against one's Jewish neighbor in a non-Jewish court, through which the Jew is involved in a loss of money to which he would not have been condemned by a Jewish court; (10) appropriation by a priest whose business is the selling of meat, of the priestly portions of all the animals for himself; (11) violating the second day of a holiday, even though its observance is only a custom ("minhag"); (12) performing work on the afternoon of the day preceding Passover; (13) taking the name of God in vain; (14) causing others to profane the name of God ("ḥillul ha-shem"); (15) causing others to eat holy meat outside of Jerusalem; (16) making calculations for the calendar, and establishing festivals accordingly, outside of Palestine; (17) putting a stumbling-block in the way of the blind, that is to say, tempting one to sin; (18) preventing the community from performing some religious act; (19) selling forbidden ("ṭerefah") meat as permitted meat ("kasher"); (20) omission by a "shoḥeṭ" (ritual slaughterer) to show his knife to the rabbi for examination; (21) self-abuse; (22) engaging in business intercourse with one's divorced wife; (23) being made the subject of scandal (in the case of a rabbi); (24) excommunicating one unjustly (Maimonides, "Yad," Talmud Torah, vi. 14; Shulḥan 'Aruk, Yoreh De'ah, 334, 43).

Procedure.

While excommunication was pronounced by the court and was considered a legal act, the procedure was not so formal or so rigorous as in other judicial cases. Circumstantial and hearsay evidence and even incompetent witnesses were admitted, thus preserving the arbitrariness of the character of the procedure (Yoreh De'ah, *l.c.*, Isserles' gloss). This characteristic was still further emphasized in the occasional excommunications which were inflicted by individuals. These might be indefinite—as when a man laid the ban upon any one who possessed articles stolen from him (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 71, 7), or upon any one who knew of the circumstances of a case in which he was involved and did not come to court to testify (*ib.* 28, 2)—or definite, upon a particular person, as when a learned man excommunicated one who insulted him (M. Ḳ. 17a), or when a master excommunicated a pupil who decided a law in his presence (Shab. 19a) or asked him ridiculous questions (Men. 37a). Some authorities are of the opinion that a creditor, even though not a scholar, might excommunicate his debtor who refused to pay his debt (notes to Asheri, M. Ḳ. iii. 10; Yoreh De'ah, *l.c.* 46).

The Niddui.

The "niddui" was usually imposed for a period of seven days (in Palestine thirty days). If it was inflicted on account of money matters, the offender was first publicly warned ("hatra'ah") three times, on Monday, Thursday, and Monday successively, at the regular service in the synagogue. During the period of niddui, no one except the members of his immediate household was permitted to associate with the offender, or to sit within four cubits of him, or to eat in his company. He was expected to go into mourning and to refrain from bathing, cutting his hair, and wearing shoes, and he had to observe all the laws that pertained to a mourner. He could not be counted in the number necessary for the performance of a public religious function. If he died, a stone was placed on his hearse, and the relatives were not obliged to observe the ceremonies customary at the death of a kinsman, such as the tearing of garments, etc. It was in the power of the court to lessen or increase the severity of the niddui. The court might even reduce or increase the number of days, forbid all intercourse with the offender, and exclude his children from the schools and his wife from the synagogue, until he became humbled and willing to repent and obey the court's mandates. The apprehension that the offender might leave the Jewish fold on account of the severity of the excommunication did not prevent the court from adding rigor to its punishments so as to maintain its dignity and authority (Yoreh De'ah, 334, 1, Isserles' gloss; compare Ṭure Zahab and Pitḥe Teshubah, *ad loc.*).

The Ḥerem.

If the offense was in reference to monetary matters, or if the punishment was inflicted by an individual, the laws were more lenient, the chief punishment being that men might not associate with the offender. At the expiration of the period the ban was raised by the court. If, however, the excommunicate showed no sign of penitence or remorse, the niddui might be renewed once and again, and finally the "ḥerem," the most rigorous form of excommunication, might be pronounced. This extended for an indefinite period, and no one was permitted to teach the offender or work for him, or benefit him in any way, except when he was in need of the bare necessities of life.

The Nezifah.

A milder form than either niddui or ḥerem was the "nezifah." When a prominent person, such as the nasi or another learned man, rebuked one with the words, "How insolent this man is!" the latter was required to consider himself excommunicated for one day (in Palestine for seven days). During this time he dared not appear before him whom he had displeased. He had to retire to his house, speak little, refrain from business and pleasure, and manifest his regret and remorse. He was not required, however, to separate himself from society, nor was he obliged to apologize to the man whom he had insulted; for his conduct on the day of nezifah was sufficient apology (M. Ḳ. 16a; Yoreh De'ah, 334, 14). But when a scholar or prominent man actually pronounced the formal niddui on one who had slighted him, all the laws of niddui applied. This procedure was, however, much discouraged by the sages, so that it was a matter of proper pride for a rabbi to be able to say that he had never pronounced the ban of excommunication (M. Ḳ. 17a). Maimonides concludes with these words the chapter on the laws of excommunication:

> "Although the power is given to the scholar to excommunicate a man who has slighted him, it is not praiseworthy for him to employ this means too frequently. He should rather shut his ears to the words of the ignorant and pay no attention to them, as Solomon, in his wisdom, said, 'Also take no heed unto all words that are spoken' (Eccl. vii. 21). This was the custom of the early pious men, who would not answer when they heard themselves insulted, but would forgive the insolent. . . . But this humility should be practised only when the insult occurs in private; when the scholar is publicly insulted, he dares not forgive; and if he forgive he should be punished, for then it is an insult to the Torah that he must revenge until the offender humbly apologizes" ("Yad," Talmud Torah, vii. 13).

EXECUTION: Carrying into effect the decision of a court. The word also denotes the writ entrusting some officer of the law with the duty of carrying the judgment into effect. For the manner of carrying out a criminal sentence see Capital Punishment and Stripes. The present article treats of the enforcement of judgments in civil cases; another part of the subject (dealing with cases in which the judgment is satisfied by a seizure of land) is treated under Appraisement. See also Bankruptcy; Foreign Attachment; Garnishment.

Delay of Execution.

In the Shulḥan 'Aruk, Ḥoshen Mishpaṭ, the course of procedure is as follows: After judgment has been rendered for a debt, if the defendant is in the same town or within a short distance, no steps are taken to seize his property until he has been notified, so that he may have an opportunity to apply for a new trial. When the time for "opening the judgment" has expired, the court waits until another Monday, Thursday, and Monday have elapsed. On further default the court makes out a writ, known as "petiḥah" (lit. "opening"), by which the lesser ban is pronounced against the debtor for ninety days. On further default the court makes out a writ for seizure of the debtor's property—"adrakta"—and releases him from the ban; but if the debtor is within one (or two) day's journey, this is not done before a messenger has warned him. A man's property is but a surety for him (B. B. 174a), and the surety should not be the first attached. The ninety days are given (B. Ḳ. 112b) on the assumption that for thirty days the defendant will seek a loan, that in the next thirty days he will endeavor to sell the property, and that, if it be sold, the purchaser will need the last thirty days to secure the purchase-money. When the judgment is not for money, but for the restitution of goods, or for the recovery of land, the delay of ninety days is inadmissible.

Forms of Writ.

The adrakta as to "free property" (lands of the defendant not sold or encumbered) is written thus: "A B was adjudged to owe [a named sum] to C D, and not having paid voluntarily, we have written out this execution on his field described as follows" (then follow the appraisement and advertisement, as shown under Appraisement); whereupon the bond, if such has been the basis of the proceedings, is torn up.

If the debtor has several parcels of the same class of property, the choice as to which of them shall be "extended" to the creditor at an appraisement lies with him, not with the creditor (Ḥoshen Mishpaṭ, 102, 2).

When no free property can be found the adrakta is written thus: "A B was found to be in debt to C D by reason of a bond in the latter's hands. As A B did not pay voluntarily, and as we have not found any free property of his, and have already torn up the bond held by C D, and have given to said C D the power to search and seek out and lay hands on all property of A B that he can find, including all lands which A B has sold from [a named time] on, said C D has power to levy his claim on such property." A solemn oath is exacted from the creditor, following Ketubot 87a and Shebu'ot 45b, that he has not otherwise collected, nor released, nor sold his demand, in whole or in part; and, under a later institution, the debtor is called upon to take a rabbinical oath that he has no means of payment. So far the Ḥoshen Mishpaṭ, following a variant reading in the Talmud (B. B. 169a), has been followed. But in the reading used by Maimonides ("Yad," Malweh, xxii.), and followed in printed editions of the Talmud, the "ṭirpa" (tearing away) document comes first, and the adrakta afterward, the latter reciting the tearing up of the former.

The "iggeret shuma" (letter of appraisement), by which the land is turned over to the creditor or to a purchaser at execution, recites the tearing up of the last preceding document.

Case of Insolvent Debtor.

The debtor can avoid the pronouncement of the ban and other proceedings by coming forward and surrendering all his property, taking out only his exemptions. But under an institution of the Geonim he can be compelled to take a solemn oath to the effect that he has nothing beyond the property exempted, that he has nothing concealed in the hands of others, and that he has not given anything away with the understanding that it will be returned to him; and he takes an oath that he will apply his future earnings, beyond his simple wants, to the discharge of the debt (Ḥoshen Mishpaṭ, 91). The creditor has also the right to demand the proclamation of the ban against all who know, and do not inform him, of any assets belonging to the debtor (for instance, money in the hands of Gentiles; *ib.* 100, 1, on geonic authority). When the debtor is known to be poor and honest, and the judge has good reason to believe that the creditor wishes to humiliate him, or to bring pressure to bear upon him to make him surrender his wife's property or borrow the money at heavy interest from Gentiles, the court should not exact the oath (*ib.* 99, 4).

In passing from the stay of judgment to levies on land the writer has followed the Talmud and the codes. But in practise a judgment was ordinarily satisfied with very little formality out of the debtor's goods and chattels, moneys and bonds, and this before levying either on "free" or on "subject" lands. Money found by the messenger of the court would be turned over at once to the creditor toward payment of the judgment; goods would be sold without appraisement and the proceeds applied in like manner. Under the older law a man condemned for tort might insist that the creditor after judgment should pay himself out of the debtor's lands; for the Torah says, "With the best of his vineyard . . . he shall make restitution." But in the later practise, and for ordinary debts, the lender may refuse to levy on lands at all, preferring to wait till the debtor should find the money (*ib.* 101, 4). Bonds for the payment of money may be taken in execution, but they are not sold; they are appraised according to the solvency of the obligors and according to the character of their lands, and turned over to the creditor at such appraisement (*ib.* 5, based only on authorities later than the Talmud).

The presumption prevails that all goods found on the debtor's premises are his. But when third parties claim them against the execution creditor, this presumption can be overcome by witnesses, but only when the goods are of the kind it is customary to lend or hire. When the debtor is a factor engaged in selling goods such as are found on his premises, there is no longer a presumption that the goods are his (*ib.* 99, 2; no mode of trial of the right of property in the goods is indicated).

EXECUTORS. See WILL.

EXETER: County-seat of Devon, England. The first Jew mentioned as living in Exeter, about 1181, paid a fine of 10 marks for the king to take charge of his bonds. A number of Jews are mentioned as paying 10 per cent of the debts recovered through the law courts at the beginning of the reign of King John; one of these, named "Deulecresse le Eveske," appears to have lent money to the Priory of St. Nicholas in Exeter. During the latter part of the thirteenth century Exeter was one of the cities in which an archa was kept, with two Christian chirographers and two Jews. In 1275 the Jewish chirographers were accused of having forged a charter, but were acquitted. At the expulsion the king seized all the debts still owing to the Jews of Exeter, who numbered about thirty-nine families, and who were creditors to the amount of £1,058 4*s.* 2*d.*, and 542 quarters of corn worth £180 13*s.* 4*d.* A small community arose toward the end of the eighteenth century. It still exists, and worships in the synagogue in St. Mary Arches, which was founded in 1763.

J.

EXILARCH (Aramaic, ריש גלותא; Hebrew, ראש גולה or ראש גלות: see Ḥul. 92a, *et al.*): Title given to the head of the Babylonian Jews, who, from the time of the Babylonian exile, were designated by the term "golah" (see Jer. xxviii. 6, xxix. 1; Ezek. *passim*) or "galut" (Jer. xxix. 22). The chief of the golah or prince of the exiles held a position of honor which, recognized by the state, carried with it certain definite prerogatives, and was hereditary in a family that traced its descent from the royal Davidic house. The origin of this dignity is not known. The first historical documents referring to it date from the time when Babylon was part of the Parthian empire, and it was preserved uninterruptedly during the rule of the Sassanids, as well as for several centuries under the Arabs.

Traced to Jehoiachin.

A chronicle of about the year 800—the Seder 'Olam Zuṭa—fills up the gaps in the early history of the exilarch by constructing an account according to which the first exilarch was no less a person than Jehoiachin, the last king but one of the house of David, whom the exilarchs regarded as their ancestor. The captive king's advancement at Evilmerodach's court—that curious incident of the Babylonian exile with which the narrative of the Second Book of Kings closes (II Kings xxv. 27)—was apparently regarded by the author of the Seder 'Olam Zuṭa as the origin of the exilarchate. Even without any authentic genealogical tree of the family of the exilarchs, it could not have been difficult to find a genealogical connection between them and King Jehoiachin, since a list including generations of the descendants of the king is given in I Chron. iii. 17 *et seq.* A commentary to Chronicles (ed. Kirchheim, p. 16) dating from the school of Saadia quotes Judah ibn Ḳuraish to the effect that the genealogical list of the descendants of David was added to the book at the end of the period of the Second Temple, a view which was shared by the author of the list of exilarchs in Seder 'Olam Zuṭa. This list has been synchronistically connected with the history of the Second Temple, Shechaniah being mentioned as having lived at the time of the Temple's destruction. The following are enumerated as his predecessors in office: Salathiel, Zerubbabel, Meshullam, Hananiah, Berechiah, Hasadiah, Jesaiah, Obadiah, and Shemaiah, all of which names are also found in I Chron. iii. (compare the list with the variants given by Lazarus in Brüll's "Jahrb." 1890, p. 171). The names of the next two prehistoric exilarchs—if that term may be used—Hezekiah and Akkub, are also found at the end of the Davidic list in Chronicles. Then follows Nahum, with whom the authentic portion of the list probably begins, and who may, perhaps, be assigned to the time of the Hadrianic persecution (135), the period in which are found the first allusions in traditional literature to the existence of the exilarchic dignity.

First Historic Mention.

In the account referring to the attempt of a Palestinian teacher of the Law, Hananiah, nephew of Joshua b. Hananiah, to render the Babylonian Jews independent of the Palestinian authorities, a certain Ahijah is mentioned as the temporal head of the former, probably, therefore, as exilarch (Ber. 63a, b), while another source substitutes the name "Nehunyon" for "Ahijah" (Yer. Sanh. 19a). It is not improbable that this person is identical with the Nahum mentioned in the list (Lazarus, *l.c.* p. 65). The danger threatening the

Palestinian authority was fortunately averted; and about the same time R. Nathan, a member of the house of exilarchs, came to Palestine, and by virtue of his scholarship was soon classed among the foremost tannaim of the post-Hadrianic time. His Davidic origin suggested to R. Meïr the plan of making the Babylonian scholar "nasi" (prince) in place of the Hillelite Simon b. Gamaliel. But the conspiracy against the latter failed (Hor. 13b). R. Nathan was subsequently among the confidants of the patriarchal house, and in intimate relations with Simon b. Gamaliel's son Judah I. R. Meïr's attempt, however, seems to have led Judah I. to fear that the Babylonian exilarch might come to Palestine to claim the office from Hillel's descendant. He discussed the subject with the Babylonian scholar Ḥiyya, a prominent member of his school (Hor. 11b), saying that he would pay due honor to the exilarch should the latter come, but that he would not renounce the office of nasi in his favor (Yer. Kil. 32b). When the body of the exilarch Huna, who was the first incumbent of that office explicitly mentioned as such in Talmudic literature, was brought to Palestine during the time of Judah I., Ḥiyya drew upon himself Judah's deep resentment by announcing the fact to him with the words "Huna is here" (Yer. Kil. 32b). A tannaitic exposition of Gen. xlix. 10 (Sanh. 5a) which contrasts the Babylonian exilarchs, ruling by force, with Hillel's descendants, teaching in public, evidently intends to cast a reflection on the former. But Judah I. had to listen at his own table to the statement of the youthful sons of the above-mentioned Ḥiyya, in reference to the same tannaitic exposition, that "the Messiah can not appear until the exilarchate at Babylon and the patriarchate at Jerusalem shall have ceased" (Sanh. 38a).

Succession of Exilarchs.

Huna, the contemporary of Judah I., is not mentioned in the list of exilarchs in the Seder 'Olam Zuṭa, according to which Nahum was followed by his brother Johanan; then came Johanan's son Shaphat (these names also are found among the Davidians in I Chron. iii. 22, 24), who was succeeded by Anan (comp. "Anani," I Chron. iii. 24). From the standpoint of chronology the identification of Anan with the Huna of the Talmud account is not to be doubted; for at the time of his successor, Nathan 'Uḳban, occurred the fall of the Arsacids and the founding of the Sassanid dynasty (226 C.E.), which is noted as follows in Seder 'Olam Zuṭa: "In the year 166 [*c.* 234 C.E.] after the destruction of the Temple the Persians advanced upon the Romans" (on the historical value of this statement see Lazarus, *l.c.* p. 33). Nathan 'Uḳban, however, who is none other than Mar 'Uḳban, the contemporary of Rab and Samuel, also occupied a prominent position among the scholars of Babylon (see Bacher, "Ag. Bab. Amor." pp. 34-36) and, according to Sherira Gaon (who quotes Shab. 55a), was also exilarch. As 'Uḳban's successor is mentioned in the list his son Huna (Huna II.), whose chief advisers were Rab (d. 247) and Samuel (d. 254), and in whose time Papa b. Nazor destroyed Nehardea. Huna's son and successor, Nathan, whose chief advisers were Judah b. Ezekiel (d. 299) and Shesheth, was called, like his grandfather, "Mar 'Uḳban," and it is he, the second exilarch of this name, whose curious correspondence with Eleazar b. Pedat is referred to in the Talmud (Giṭ. 7a; see Bacher, *l.c.* p. 72; *idem*, "Ag. Pal. Amor." i. 9). He was succeeded by his brother (not his son, as stated in Seder 'Olam Zuṭa); his leading adviser was Shezbi. The "exilarch Nehemiah" is also mentioned in the Talmud (B. M. 91b); he is identical with "Rabbanu Nehemiah," and he and his brother "Rabbanu 'Uḳban" (Mar 'Uḳban II.) are several times mentioned in the Talmud as sons of Rab's daughter (hence Huna II. was Rab's son-in-law) and members of the house of the exilarchs (Ḥul. 92a; B. B. 51b).

The Mar 'Uḳbans.

According to Seder 'Olam Zuṭa, in Nehemiah's time, the 245th year (313 C.E.) after the destruction of the Temple, there took place a great religious persecution by the Persians, of which, however, no details are known. Nehemiah was succeeded by his son Mar 'Uḳban (III.), whose chief advisers were Rabbah b. Naḥmani (d. 323) and Adda. He is mentioned as "'Uḳban b. Nehemiah, resh galuta," in the Talmud (Shab. 56b; B. B. 55a). This Mar 'Uḳban, the third exilarch of that name, was also called "Nathan," as were the first two, and has been made the hero of a legend under the name of "Nathan di Ẓiẓuta" (see Shab. 56b). The conquest of Armenia (337) by Sapor II. is mentioned in the chronicle as a historical event occurring during the time of Mar 'Uḳban III. He was succeeded by his brother Huna Mar Huna III., whose chief advisers were Abaye (d. 338) and Raba; then followed Mar 'Uḳban's son Abba, whose chief advisers were Raba (d. 352) and Rabina. During Abba's time King Sapor conquered Nisibis. The designation of a certain Isaac as resh galuta in the time of Abaye and Raba (Yeb. 115b) is due to a clerical error (see Brüll's "Jahrb." vii. 115). Abba was succeeded first by his son Nathan and then by another son, Mar Kahana. The latter's son Huna is then mentioned as successor, being the fourth exilarch of that name; he died in 441, according to a trustworthy source, the "Seder Tannaim wa-Amoraim." Hence he was a contemporary of Ashi, the great master of Sura, who died in 427. In the Talmud, however, Huna b. Nathan is mentioned as Ashi's contemporary, and according to Sherira it was he who was Mar Kahana's successor, a statement which is also confirmed by the Talmud (Zeb. 19a). The statement of Seder 'Olam Zuṭa ought perhaps to be emended, since Huna was probably not the son of Mar Kahana, but the son of the latter's elder brother Nathan.

Huna was succeeded by his brother Mar Zuṭra, whose chief adviser was Aḥai of Diphti, the same who was defeated in 455 by Ashi's son Ṭabyomi (Mar) at the election for director of the school of Sura. Mar Zuṭra was succeeded by his son Kahana (Kahana II.), whose chief adviser was Rabina, the editor of the Babylonian Talmud (d. 499). Then followed two exilarchs by the same name: another son of Mar Zuṭra, Huna V., and a grandson of Mar Zuṭra, Huna VI., the son of Kahana. Huna V. fell a victim to the persecutions under King Peroz (Firuz), being executed, according to Sherira, in 470; Huna VI. was not installed in office until some time later, the exilarchate being vacant during the

Persecutions Under Peroz and Kobad.

persecutions under Peroz; he died in 508 (Sherira). The Seder 'Olam Zuṭa connects with the birth of his son Mar Zuṭra the legend that is elsewhere told in connection with Bostanai's birth. Mar Zuṭra, who came into office at the age of fifteen, took advantage of the confusion into which Mazdak's communistic attempts had plunged Persia, to obtain by force of arms for a short time a sort of political independence for the Jews of Babylon. King Kobad, however, punished him by crucifying him on the bridge of Maḥuza (*c.* 520). A son was born to him on the day of his death, who was also named "Mar Zuṭra." The latter did not attain to the office of exilarch, but went to Palestine, where he became head of the Academy of Tiberias, under the title of "Resh Pirḳa" (*'Αρχιφερεκίτης*), several generations of his descendants succeeding him in this office. After Mar Zuṭra's death the exilarchate of Babylon remained unocupied for some time. Mar Ahunai lived in the period succeeding Mar Zuṭra II, but for more than thirty years after the catastrophe he did not dare to appear in public, and it is not known whether even then (*c.* 550) he really acted as exilarch. At any rate the chain of succession of those who inherited the office was not broken. The names of Kafnai and his son Ḥaninai, who were exilarchs in the second half of the sixth century, have been preserved. Ḥaninai's posthumous son Bostanai was the first of the exilarchs under Arabic rule.

Bostanai was the ancestor of the exilarchs who were in office from the time when the Persian empire was conquered by the Arabs, in 642, down to the eleventh century. Through him the splendor of the office was renewed and its political position made secure. His tomb in Pumbedita was a place of worship as late as the twelfth century, according to Benjamin of Tudela. Not much is known regarding Bostanai's successors down to the time of Saadia except their names; even the name of Bostanai's son is not known. The list of the exilarchs down to the end of the ninth century is given as follows in an old document (Neubauer, "Mediæval Jewish Chronicles," i. 196): "Bostanai, Ḥanina b. Adoi, Ḥasdai I., Solomon, Isaac Iskawi I., Judah Zakkai (Babawai), Moses, Isaac Iskawi II., David b. Judah, Ḥasdai II." Ḥasdai I. was probably Bostanai's grandson. The latter's son Solomon had a deciding voice in the appointments to the gaonate of Sura in the years 733 and 759 (Sherira Gaon). Isaac Iskawi I. died very soon after Solomon. In the dispute between David's sons Anan and Hananiah regarding the succession the latter was victor; Anan then proclaimed himself anti-exilarch, was imprisoned, and founded the sect of the Karaites. His descendants were regarded by the Karaites as the true exilarchs. The following list of Karaite exilarchs, father being succeeded always by son, is given in the genealogy of one of these "Karaite princes": Anan, Saul, Josiah, Boaz, Jehoshaphat, David, Solomon, Hezekiah, Ḥasdai, Solomon (see Pinsker, "Liḳḳuṭe Ḳadmoniyyot," ii. 53). Anan's brother Hananiah is not mentioned in this list. Judah Zakkai, who is called "Zakkai b. Ahunai" by Sherira, had as rival candidate Naṭronai b. Ḥabibai, who, however, was defeated and sent West in banishment; this Naṭronai was a great scholar, and, according to tradition, while in Spain wrote the Talmud from memory. David b. Judah also had to contend with an anti-exilarch, Daniel by name. The fact that the decision in this dispute rested with the calif Al-Ma'mun (825) indicates a decline in the power of the exilarchate. David b. Judah, who carried off the victory, appointed Isaac b. Ḥiyya as gaon at Pumbedita in 833. Preceding Ḥasdai II.'s name in the list that of his father Naṭronai must be inserted. Both are designated as exilarchs in a geonic responsum (Harkavy, "Responsen der Geonim," p. 389).

Deposition of 'Uḳba.

'Uḳba is mentioned as exilarch immediately following Ḥasdai II.; he was deposed at the instigation of Kohen Ẓedeḳ, gaon of Pumbedita, but was reinstated in 918 on account of some Arabic verses with which he greeted the calif Al-Muḳtadir. He was deposed again soon afterward, and fled to Kairwan, where he was treated with great honor. After a short interregnum 'Uḳba's nephew, David b. Zakkai, became exilarch; but he had to contend for nearly two years with Kohen Ẓedeḳ before he was finally confirmed in his power (921). In consequence of Saadia's call to the gaonate of Sura and his controversy with David, the latter has become one of the best-known personages of Jewish history. Saadia had David's brother Josiah (Al-Ḥasan) elected anti-exilarch in 930, but the latter was defeated and banished to Chorasan. David b. Zakkai was the last exilarch to play an important part in history. He died a few years before Saadia; his son Judah died seven months afterward. Judah left a son (whose name is not mentioned) twelve years of age, whom Saadia took into his house and educated. His generous treatment of the grandson of his former adversary was continued until Saadia's death in 942. Only a single entry has been preserved regarding the later fortunes of the exilarchate. When Gaon Hai died in 1038, nearly a century after Saadia's death, the members of his academy could not find a more worthy successor than the exilarch Hezekiah, a descendant, perhaps a great-grandson, of David b. Zakkai; he thereafter filled both offices. But two years later, in 1040, Hezekiah, who was the last exilarch and also the last gaon, fell a victim to calumny. He was cast into prison and tortured; two of his sons fled to Spain, where they found refuge with Joseph, the son and successor of Samuel ha-Nagid. Hezekiah himself, on being liberated from prison, became head of the academy, and is mentioned as such by a contemporary in 1046 ("J. Q. R." xv. 80).

Later Traces.

The title of exilarch is found occasionally even after the Babylonian exilarchate had ceased. Abraham ibn Ezra (commentary to Zech. xii. 7) speaks of the "Davidic house" at Bagdad (before 1140), calling its members the "heads of the Exile." Benjamin of Tudela in 1170 mentions the exilarch Ḥasdai, among whose pupils was the subsequent pseudo-Messiah David Alroy, and Ḥasdai's son, the exilarch Daniel. Pethahiah of Regensburg also refers to the latter, but under the name of "Daniel b. Solomon"; hence it must be assumed that Ḥasdai was also called "Solomon." Al-Ḥarizi (after 1216) met at Mosul a descendant of the house of David, whom he calls "David, the head of the Exile." A long time previously a descendant of the ancient house of exilarchs had attempted to revive in Egypt the dignity of exilarch which had become extinct in Babylon. This was David b. Daniel; he came to Egypt at the age of twenty, in 1081, and was proclaimed exilarch by the learned Jewish authorities of that country, who wished to divert to Egypt the leadership formerly enjoyed by Babylon. A contemporary document, the Megillah of the Palestinian "gaon" Abiathar, gives an authentic account of this episode of the Egyptian exilarchate, which ended with the downfall of David b. Daniel in 1094 ("J. Q. R." xv. 80 *et seq.*). Descendants of the house of exilarchs were living in various places long after the office became extinct. A descendant of Hezekiah, "Ḥiyya" by name, with the surname Al-Da'udi, indicative of his origin, died in 1154 in Castile (Abraham ibn Da'ud). Several families, as late as the fourteenth century, traced their descent back to Josiah, the brother of David b. Zakkai who had been banished to Chorasan (see the genealogies in Lazarus, *l.c.* pp. 180 *et seq.*). The descendants of the Karaite exilarchs have been referred to above.

Development and Organization.

The history of the exilarchate falls naturally into two periods, which are separated from each other by the beginning of the Arabic rule in Babylonia. As shown above, the first period is not accessible to the light of historical research before the middle of the second Christian century. There are no data whatever for a working hypothesis regarding the beginnings of the office. It can merely be said in general that the golah, the Jews living in compact masses in various parts of Babylon, tended gradually to unite and effect an organization, and that this tendency, together with the high regard in which the descendants of the house of David living in Babylon were held, brought it about that a member of this house was recognized as "head of the golah." The dignity became hereditary in this house, and was finally recognized by the state, and hence became an established political institution, first of the Arsacid and then of the Sassanid empire. Such was the exilarchate as it appears in Talmudic literature, the chief source for its history during the first period, and from which come the only data regarding the rights and functions of the exilarchate. For the second, the Arabic, period, there is a very important and trustworthy description of the institution of the exilarchate, which will be translated further on; this description is also important for the first period, because many of the details may be regarded as survivals from it. The characteristics of the first period of the exilarchate, as gathered from significant passages of Talmudic literature, will first be noted.

In accordance with the character of Talmudic tradition it is the relation of the exilarchs to the heads and members of the schools that is especially referred to in Talmudic literature. The Seder 'Olam Zuṭa, the chronicle of the exilarchs that is the most important and in many cases the only source of information concerning their succession, has also preserved chiefly the names of those scholars who had certain official relations with the respective exilarchs. The phrase used in this connection ("ḥakamim debaruhu," the scholars directed him) is the stereotyped phrase used also in connection with the fictitious exilarchs of the century of the Second Temple; in the latter case, however, it occurs without the specific mention of names—a fact in favor of the historicalness of those names that are given for the succeeding centuries. The authenticity of the names of the amoraim designated as the scholars "guiding" the several exilarchs, is, in the case of those passages in which the text is beyond dispute, supported by internal chronological evidence also. Some of the Babylonian amoraim were closely related to the house of the exilarchs, as, for example, Rabba b. Abuha, whom Gaon Sherira, claiming Davidian descent, named as his ancestor. Naḥman b. Jacob (d. 320) also became closely connected with the house of the exilarchs through his marriage with Rabba b. Abuha's daughter, the proud Yaltha; and he owed to this connection perhaps his office of chief judge of the Babylonian Jews. Huna, the head of the school of Sura, recognized Naḥman b. Jacob's superior knowledge of the Law by saying that Naḥman was very close to the "gate of the exilarch" ("baba di resh galuta"), where many cases were decided (B. B. 65b). The term "dayyane di baba" (judges of the gate), which was applied in the post-Talmudic time to the members of the court of the exilarch, is derived from the phrase just quoted (comp. Harkavy, *l.c.*). Two details of Naḥman b. Jacob's life cast light on his position at the court of the exilarch: he received the two scholars Ḥisda and Rabba b. Huna, who had come to pay their respects to the exilarch (Suk. 10b); and when the exilarch was building a new house he asked Naḥman to take charge of the placing of the mezuzah according to the Law (Men. 33a).

Relations with the Academies.

Retinue of the Exilarch.

The scholars who formed part of the retinue of the exilarch were called "scholars of the house of the exilarch" ("rabbanan di-be resh galuta"). A remark of Samuel, the head of the school of Nehardea, shows that they wore certain badges on their garments to indicate their position (Shab. 58a). Once a woman came to Naḥman b. Jacob, complaining that the exilarch and the scholars of his court sat at the festival in a stolen booth (Suk. 31a), the material for it having been taken from her. There are many anecdotes of the annoyances and indignities the scholars had to suffer at the hands of the exilarchs' servants (Giṭ. 67b, the case of Amram the Pious; 'Ab. Zarah 38b, of Ḥiyya of Parwa; Shab. 121b, of Abba b. Marta). The modification of ritual requirements granted to the exilarchs and their households in certain concrete cases is characteristic of their relation to the religious law (see Pes. 76b, Levi b. Sisi; Ḥul. 59a, Rab; 'Ab. Zarah 72b, Rabba b. Huna; 'Er. 11b, Naḥman versus Sheshet; 'Er. 39b, similarly; M. Ḳ. 12a, Ḥanan; Pes. 40b, Pappai). Once when certain preparations which the exilarch was making in his park for alleviating the strictness of the Sabbath law were interrupted by Raba and his pupils, he exclaimed, in the words of Jer. iv. 22, "They are wise to do evil, but to do good they have no knowledge" (‘Er. 26a). There are frequent references to questions, partly halakic and exegetical in nature, which the exilarch laid before his scholars (to Huna, Giṭ. 7a; Yeb. 61a; Sanh. 44a; to Rabba b. Huna, Shab. 115b; to Hamnuna, Shab. 119a). Details are sometimes given of lectures that were delivered "at the entrance to the house of the exilarch" ("pitḥa di-be resh galuta"; see Ḥul. 84b; Beẓah 23a; Shab. 126a; M. Ḳ. 24a). These lectures were probably delivered at the time of the assemblies, which brought many representatives of Babylonian Judaism to the court of the exilarch after the autumnal festivals (on Sabbath Lek Leka, as Sherira says; comp. ‘Er. 59a).

Etiquette of the Resh Galuta's Court.

The luxurious banquets at the court of the exilarch were well known. An old anecdote was repeated in Palestine concerning a splendid feast which the exilarch once gave to the tanna Judah b. Bathyra at Nisibis on the eve of the Day of Atonement (Lam. R. iii. 16). Another story told in Palestine (Yer. Meg. 74b) relates that an exilarch had music in his house morning and evening, and that Mar ‘Uḳba, who subsequently became exilarch, sent him as a warning this sentence from Hosea: "Rejoice not, O Israel, for joy, as other people." The exilarch Nehemiah is said to have dressed entirely in silk (Shab. 20b, according to the correct reading; see Rabbinowicz, "Diḳduḳe Soferim").

The Talmud says almost nothing in regard to the personal relations of the exilarchs to the royal court. One passage relates merely that Huna b. Nathan appeared before Yezdegerd I., who with his own hands girded him with the belt which was the sign of the exilarch's office. There are also two allusions dating from an earlier time, one by Ḥiyya, a Babylonian living in Palestine (Yer. Ber. 5a), and the other by Adda b. Ahaba, one of Rab's earlier pupils (Sheb. 6b; Yer. Sheb. 32d), from which it seems that the exilarch occupied a foremost position among the high dignitaries of the state when he appeared at the court first of the Arsacids, then of the Sassanids. An Arabic writer of the ninth century records the fact that the exilarch presented a gift of 4,000 dirhems on the Persian feast of Nauruz (see "R. E. J." viii. 122). Regarding the functions of the exilarch as the chief tax-collector for the Jewish population, there is the curious statement, preserved only in the Palestinian Talmud (Yer. Soṭah 20b, bottom), that once, in the time of Huna, the head of the school of Sura, the exilarch was commanded to furnish as much grain as would fill a room of 40 square ells.

Juridical Functions.

The most important function of the exilarch was the appointment of the judge. Both Rab and Samuel said (Sanh. 5a) that the judge who did not wish to be held personally responsible in case of an error of judgment, would have to accept his appointment from the house of the exilarch. When Rab went from Palestine to Nehardea he was appointed overseer of the market by the exilarch (Yer. B. B. 15b, top). The exilarch had jurisdiction in criminal cases also. Aḥa b. Jacob, a contemporary of Rab (comp. Giṭ. 31b), was commissioned by the exilarch to take charge of a murder case (Sanh. 27a, b). The story found in B. Ḳ. 59a is an interesting example of the police jurisdiction exercised by the followers of the exilarch in the time of Samuel. From the same time dates a curious dispute regarding the etiquette of precedence among the scholars greeting the exilarch (Yer. Ta‘an. 68a). The exilarch had certain privileges regarding real property (B. Ḳ. 102b; B. B. 36a). It is a specially noteworthy fact that in certain cases the exilarch judged according to the Persian law (B. Ḳ. 58b); and it was the exilarch ‘Uḳba b. Nehemiah who communicated to the head of the school of Pumbedita, Rabbah b. Naḥmai, three Persian statutes which Samuel recognized as binding (B. B. 55a).

A synagogal prerogative of the exilarch was mentioned in Palestine as a curiosity (Yer. Soṭah 22a): The Torah roll was carried to the exilarch, while every one else had to go to the Torah to read from it. This prerogative is referred to also in the account of the installation of the exilarch in the Arabic period, and this gives color to the assumption that the ceremonies, as recounted in this document, were based in part on usages taken over from the Persian time. The account of the installation of the exilarch is supplemented by further details in regard to the exilarchate which are of great historical value. Following is a translation of a portion of this account, written by Nathan ha-Babli in the tenth century, and included in Abraham Zacuto's "Yuḥasin" and in Neubauer's "Mediæval Jewish Chronicles," ii. 83 *et seq.*:

Installation Ceremonies.

"The members of the two academies [Sura and Pumbedita], led by the two heads [the geonim] as well as by the leaders of the community, assemble in the house of an especially prominent man before the Sabbath on which the installation of the exilarch is to take place. The first homage is paid on Thursday in the synagogue, the event being announced by trumpets, and every one sends presents to the exilarch according to his means. The leaders of the community and the wealthy send handsome garments, jewelry, and gold and silver vessels. On Thursday and Friday the exilarch gives great banquets. On the morning of the Sabbath the nobles of the community call for him and accompany him to the synagogue. Here a wooden platform covered entirely with costly cloth has been erected, under which a picked choir of sweet-voiced youths well versed in the liturgy has been placed. This choir responds to the leader in prayer, who begins the service with 'Baruk she-amar.' After the morning prayer the exilarch, who until now has been standing in a covered place, appears; the whole congregation rises and remains standing until he has taken his place on the platform, and the two geonim, the one from Sura preceding, have taken seats to his right and left, each making an obeisance.

"A costly canopy has been erected over the seat of the exilarch. Then the leader in prayer steps in front of the platform and, in a low voice audible only to those close by, and accompanied by the 'Amen' of the choir, addresses the exilarch with a benediction, prepared long beforehand. Then the exilarch delivers a sermon on the text of the week or commissions the gaon of Sura to do so. After the discourse the leader in prayer recites the Ḳaddish, and when he reaches the words 'during your life and in your days,' he adds the words 'and during the life of our prince, the exilarch.' After the Ḳaddish he blesses the exilarch, the two heads of the schools, and the several provinces that contribute to the support of the academies, as well as the individuals who have been of especial service in this direction. Then the Torah is read. When the 'Kohen' and 'Levi' have finished reading, the leader in prayer carries the Torah roll to the exilarch, the whole congregation rising; the exilarch takes the roll in his hands and reads from it while standing. The two heads of the schools also rise, and the gaon of Sura recites the targum to the passage read by the exilarch. When the reading of the Torah is completed, a blessing is pronounced upon the exilarch. After the 'Musaf' prayer the exilarch leaves the synagogue, and all, singing, accompany him to his house. After that the exilarch rarely goes beyond the gate of his house, where services for the community are held on the Sabbaths and feast-days. When it becomes necessary for him to leave his house, he does so only in a carriage of state, accompanied by a large retinue. If the exilarch desires to pay his respects to the king, he first asks permission to do so. As he enters the palace the king's servants hasten to meet him, among whom he liberally distributes gold coin, for which provision has been made beforehand. When led before the king his seat is assigned to him. The king then asks what he desires. He begins with carefully prepared words of praise and blessing, reminds the king of the customs of his fathers, gains the favor of the king with appropriate words, and receives written consent to his demands; thereupon, rejoiced, he takes leave of the king."

Income and Privileges.

In regard to Nathan ha-Babli's additional account as to the income and the functions of the exilarch (which refers, however, only to the time of the narrator), it may be noted that he received taxes, amounting altogether to 700 gold denarii a year, chiefly from the provinces Nahrawan, Farsistan, and Holwan.

The Mohammedan author of the ninth century, Al-Jaḥiz, who has been referred to above, makes special mention of the shofar, the wind-instrument which was used when the exilarch ("ras al-jalut") excommunicated any one. The punishment of excommunication, continues the author, is the only one which in Mohammedan countries the exilarch of the Jews and the catholicos of the Christians may pronounce, for they are deprived of the right of inflicting punishment by imprisonment or flogging ("R. E. J." viii. 122 *et seq.*). Another Mohammedan author reports a conversation that took place in the eighth century between a follower of Islam and the exilarch, in which the latter boasted: "Seventy generations have passed between me and King David, yet the Jews still recognize the prerogatives of my royal descent, and regard it as their duty to protect me; but you have slain the grandson [Ḥusain] of your prophet after one single generation" (*ib.* p. 125). The son of a previous exilarch said to another Mohammedan author: "I formerly never rode by Kerbela, the place where Ḥusain was martyred, without spurring on my horse, for an old tradition said that on this spot the descendant of a prophet would be killed; only since Ḥusain has been slain there and the prophecy has thus been fulfilled do I pass leisurely by the place" (*ib.* p. 123). This last story indicates that the resh galuta had by that time become the subject of Mohammedan legend, other examples also being cited by Goldziher. That the personage of the exilarch was familiar to Mohammedan circles is also shown by the fact that the Rabbinite Jews were called "Jaluti," that is, those belonging to the exilarch, in contradistinction to the Karaites (*ib.*). In the first quarter of the eleventh century, not long before the extinction of the exilarchate, Ibn Ḥazam, a fanatic polemicist, made the following remark in regard to the dignity: "The ras al-jalut has no power whatever over the Jews or over other persons; he has merely a title, to which is attached neither authority nor prerogatives of any kind" (*ib.* p. 125).

Curiously enough the exilarchs are still mentioned in the Sabbath services of the Ashkenazim ritual. The Aramaic prayer "Yeḳum Purḳan," which was used once in Babylon in pronouncing the blessing upon the leaders there, including the "reshe galwata" (the exilarchs), is still recited in most synagogues. The Jews of the Sephardic ritual have not preserved this anachronism, nor was it retained in most of the Reform synagogues of the nineteenth century.

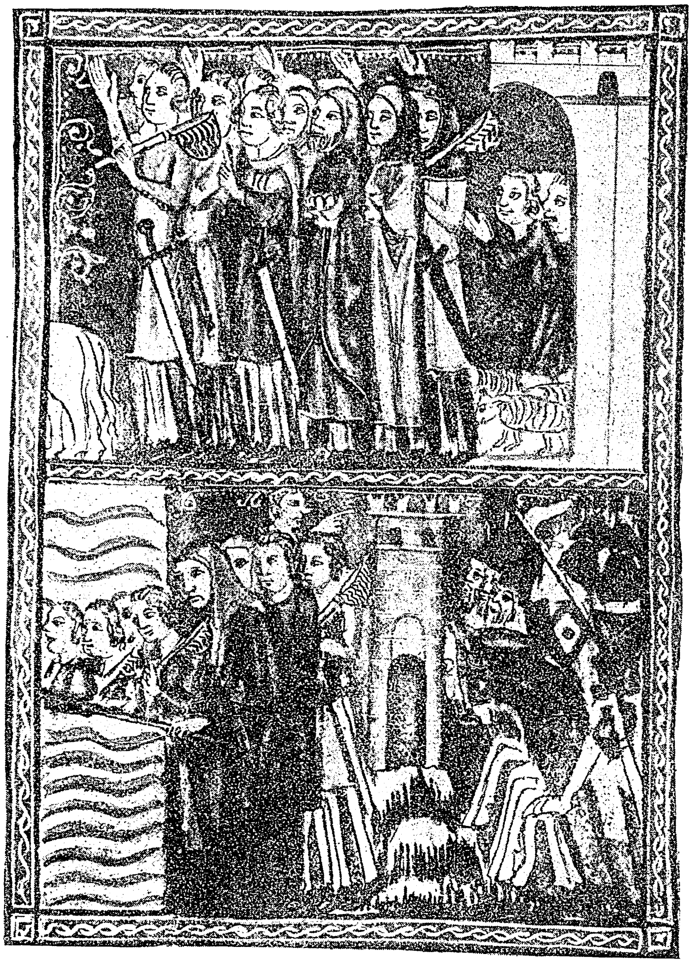
EXODUS (Ἔξοδος, lit. "way out"): The departure, under the leadership of Moses, of the Israelites from the land of Egypt.—**Biblical Data:** Having multiplied in the land of Goshen, the Israelites were enslaved and oppressed in various ways by a "new king" who "knew not Joseph." Alarmed at their increase, he determined to prevent their becoming strong enough to act decisively against Egypt in case of war. Moses, who after various vicissitudes had been summoned from Midian to demand his people's freedom "to depart and serve YHWH," and had brought ten PLAGUES upon the king and his people, was finally bidden by Pharaoh to lead the Hebrews out of the death-ridden land. More than six hundred thousand able-bodied men, not counting women and children and the "mixed multitude," with their cattle and other property, marched out in one night from RAMESES in the direction of Succoth (Ex. xii. 37, 38; xxxviii. 26; Num. i. 46, ii. 32, xi. 21, xii. 37, xxvi. 51); then, leaving this latter station, they encamped at Etham, at the edge of the desert. For God had resolved not to conduct them along the nearer route, "the road of the Philistine" (Ex. xiii. 17, Hebr.), fearing they might regret and retreat to Egypt when war (against the Philistines) became necessary. So YHWH commanded Moses to lead them back and encamp before PI-HAHIROTH, "between MIGDOL and the [Red] sea" (Ex. xiv. 2). This retrogressive movement would encourage Pharaoh to pursue the fugitives. The Egyptian king, in fact, starts out with horse and 600 chariots and a vast army to recapture the Israelites. He comes upon them "at Pi-hahiroth before Baal-zephon" (Ex. xiv. 9). Terrified, the Israelites cry out to YHWH, and reproach Moses for having brought them there to die, though graves in plenty might have been found in Egypt. Then the help of YHWH is miraculously manifested. They pass dry-shod over the sea, which divided at the lifting of Moses' staff and the blowing of a strong east wind. The Egyptians, thrown into confusion by a change in the position of the "angel of God," pursue after them, but the returning waters sweep their king and all his hosts to a watery grave (Ex. xiv., xv.).

——**Critical View:** That the events narrated in Exodus can not be historical in all their details has been generally conceded. The numbers are certainly fanciful: 600,000 men would represent a total of at least two million souls. Where these could have found room and subsistence in the land of Goshen, granted even that many of them lived in Pharaoh's capital, or in the district of Rameses (Gen. xlv. 10, 18; xlvii. 11), and how so vast an unorganized host could have crossed the Red Sea in one night are questions that have not been explained (Colenso, "The Pentateuch," i. 1867; Kuenen, "Historisch-Kritische Einleitung in die Bücher des Alten Testaments," i. 1, 44 *et seq.*). The Exodus must have been a movement of a much smaller body of men. To doubt, as has been done by Winckler, for instance ("Gesch. Israels in Einzeldarstellungen," i. 55), the historical possibility of such a movement on the assumption that a confusion has arisen in Hebrew traditions between "Miẓraim" (Egypt) and the "Muẓri," a North-Arabian tribe, is not reasonable. In view of the central character of the Exodus in all later Hebrew theology, such a denial is inadmissible. Egyptian monuments show that Semitic shepherd tribes settled in Egypt at various periods. Though the theory that the Hebrews are identical with the equestrian clan of the Aper is not tenable (Brugsch, "Gesch. Aegyptens Unter den Pharaonen," pp. 582–583), and though the Israelites are nowhere named on the Egyptian monuments as sojourning in Egypt, the historical character of their own traditions on their stay in the country can not well be questioned. But it is probable that only a part of the twelve tribes, the Joseph group (see the Joseph story in Genesis), had pushed so far south, while related clans (the Judah group) never left the Sinaitic peninsula (Stade, "Gesch. des Volkes Israels," pp. 128 *et seq.*; idem, "Die Entstehung des Volkes Israel," 1897, p. 12). Oppressed and compelled to help build the frontier garrison cities devised to keep them in check and their kinsmen across the frontier at bay, the Israelites invoked and received aid from their free brethren, who banded themselves into a confederation and, under the leadership of a great man (Moses), succeeded in their patriotic enterprise.

Relations of Joseph and Judah.



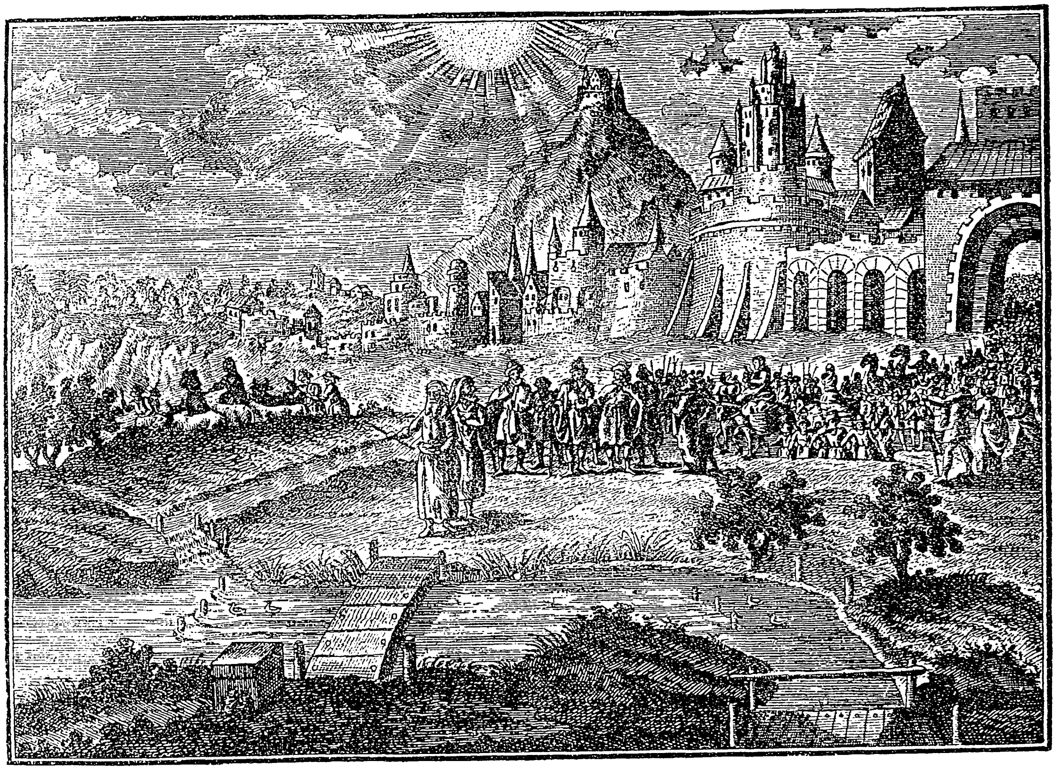
The Israelites Leaving Egypt and Crossing the Red Sea.

(From the Sarajevo Haggadah, fourteenth century.)

Like all old races, the Israelites regarded their national struggle as a combat between their God and the god or gods of their enemies. In their victory they beheld the triumph of their all-powerful God, "a warrior" (Ex. xv. 3, Hebr.), over Pharaoh. This stupendous struggle, which must have lasted for a long time, gave the first permanent impulse toward the welding of all the sons of Israel into a nation, which YHWH had brought out of Egypt to be His people (Ex. xv. 16). The total destruction of the Egyptian army with its king is also an exaggerated statement of the fact that the Egyptian frontier garrisons were defeated in the attempt to recapture the Israelites or impede their onward march. The "crossing of the Red Sea" has invited much rationalizing about ebbing tides and the effect of the east wind upon the waters. Some natural phenomenon probably underlies the account, as also that of the ten plagues. But this phenomenon is the remote material of an old mythology, and it is rather the mythological construction of the phenomenon than the phenomenon itself that has been elaborated in the Biblical narratives (compare RAHAB and Tehom [Tiamat; see ABYSS], and the like). The song (Ex. xv.) is certainly older than the various prose accounts of the crossing. The story of the Exodus is not by one hand: both JE and P are distinguishable (see EXODUS, BOOK OF).

Crossing the Red Sea.

Ancient Non-Jewish Statements Concerning the Exodus: Manetho (Josephus, "Contra Ap." i. 26-29) relates that a certain King Amenophis had banished a leprous and impure people to do hard labor in the quarries in eastern Egypt. Later, settled in the city of Avaris, they chose for their chief a Heliopolitan priest by the name of "Osarsiph," subsequently called "Moses." Rising in rebellion against Egypt, they were defeated by an Egyptian-Ethiopic army, the fugitives finding safety in the Arabian desert. Charemon (cited *ibid.* i. 32), with some variations, reiterates the foregoing account. According to Lysimachus (cited *ibid.* i. 34), King Bocchoris drowned those of the Jews that were afflicted with leprosy and scabies, and drove the rest into the desert. These non-Jewish accounts are plainly inspired by hatred of the Jews, and display a strange mixture of blurred Biblical facts and free fiction. They are without value for fixing the date of the Exodus.



THE EXODUS.

(From a Passover Haggadah, Vienna, 1823, in the possession of J. D. Eisenstein.)

Rameses II.

Up to within a very recent period the view which identified the Hebrews with the HYKSOS (*l.c.* i. 14; Eusebius, "Hist. Eccl." i. 226 *et seq.*), the shepherd kings of Aramean stock who held Egypt in subjection for some time (1800-1600 B.C.), a view which Josephus was the first to urge, had been almost entirely abandoned. Most scholars identify with the Pharaoh of the oppression Rameses II., son of Seti, who ruled over Egypt for sixty-seven years. He is known to have built in Lower Egypt many structures of a character similar to those indicated by Ex. i. 11. One of the two Biblical "store [frontier] cities" (R. V.) recalls his name ("Ra'amses" in Hebr.), and the inference is that it and Pithom, if not founded by him, were enlarged and beautified in his reign, especially if the Hebrew designation "'are miskenot" means "Temple cities" (Brugsch, *l.c.* p. 549). Merneptah II., his son, would then be the Pharaoh of the Exodus, who, indeed, is reported to have had trouble with the hostile shepherd tribes across the border (the Shasu = Hyksos, the princes of the Shasu), and might thus well have attempted to prevent the contingency feared in Ex. i. 10, that the Israelites would "join also unto our [Egypt's] enemies." Still it has been argued that under the reign of Merneptah II. Egypt was too well organized for the rebellion of the Israelites to have been successful. His successor, Seti II., therefore, under whom a general administrative disintegration set in, is suggested as the ruler who was forced to acquiesce in the demands of the Hebrews (so Maspero in Ger. ed. of his history, p. 258, Leipsic, 1877). The dates given in the Bible, though involved in much confusion (see CHRONOLOGY), lend strong probability to the assumption that the Exodus took place under a king of the nineteenth dynasty (about 1500–1300 B.C.). I Kings vi. 1 fixes the interval between the Exodus and the building of the Temple at over 480 years. Rehoboam—forty-one years after the building of the Temple (I Kings xiv. 25; see Herzog-Hauck, "Real-Encyc." i. 207)—is contemporaneous with Shishak, the first king of the twenty-second dynasty (*c.* 950 B.C.). This would give about 1470 B.C. for the Exodus (Brugsch, *l.c.* pp. 768 *et seq.*).

The finding by Flinders Petrie (1896) of an inscription by Merneptaḥ I., in which for the first time "Isir'l" occurs in an Egyptian text, as well as the contents of the El-Amarna tablets, has corroborated the virtual correctness of the date given above. The Thebes inscription with "Isir'l" proves that under Merneptaḥ I. Israel was settled in Palestine. Israel may have been identical with the Ḥabiri that, according to the El-Amarna tablets, invaded Palestine during the eighteenth dynasty and were restricted in their freedom by Seti I. (nineteenth dynasty). This would likewise suggest, especially if the Ḥabiri are identical with the Shasu (W. M. Müller, "Asien und Europa nach Altägyptischen Denkmälern," p. 131), for the Exodus the decade 1480–1470 B.C. (see Steindorff in Herzog-Hauck, *l.c.* i. 211; Beer in Guthe, "Kurzes Bibelwörterb." 1903, p. 58).

The stations named in JE do not all coincide with those in P, as the following table shows:

JE.	P.
Goshen (Gen. xlv. 10; Ex. xiii. 18), not the route to the land of the Philistines, but the route to the desert and to the sea (Ex. xiii. 17).	Rameses (Gen. xlvii. 11) or Egypt (Ex. i. 7, xii. 13). Rameses and Succoth (Ex. xii. 37). Etham (Ex. xiii. 20). Return to Pi-hahiroth (Ex. xiv. 2). Before Baal-zephon (Ex. xiv. 9).
Crossing the Sea (Ex. xiv.).	
Desert of Shur (Ex. xv. 22).	
Marah (Ex. xv. 23).	
Elim (Ex. xv. 27).	Elim (Ex. xvi. 1).

The Route.

The two roads named in JE are easily determined. The "road to the land of the Philistines" runs in a northeasterly direction to the Red Sea, and then along the shore to Gaza. The route is still used by the caravans which cross the Suez Canal at Ḳanṭarat al-Khasnah. The "road to the desert" from Egypt is reached by the western gulf of the Red Sea, that is, not our modern Suez, but the eastern terminus of the modern Wadi Ṭumilat, the district of Tell al-Maskhutah. Here Naville's excavations (1883–85) have established the position of Pithom and the (Greek) Heronpolis. This road (Ex. xiii. 17) from Goshen ran in an easterly direction through the Wadi Ṭumilat to the (then) northern point of the Red Sea, and thence between the modern Balaḥ and Timsaḥ lakes into the desert of Shur. This shows that JE thought the route taken by Israel to have been in an easterly direction toward Horeb.

P assumes Rameses as the starting-point; thence the Israelites march through Succoth to Etham, whence they retrace their steps and reach Egyptian territory again. Of the three stations only Migdol is definitely known as a north-frontier town of Egypt. But this would be on the "road to the land of the Philistines," which, according to Ex. xiii. 17, the fugitives were not to take. P speaks only of the "sea," never of the "Yam Suf" ("red" weedy sea). Brugsch (*l.c.*) and Schleiden ("Landenge von Suez," 1858) have argued that the road taken lay across the narrow strip of sand between the Serbonian Lake and the sea. But this route does not lead to Horeb (see Brugsch, "L'Exode et les Monuments Egyptiens," 1875; Guthe, in "Zeitschrift des Deutschen Palästina-Vereins," viii. 216–232). The Rameses of the Exodus has also been variously identified. Ebers ("Durch Goschen zum Sinai," p. 501) does not identify it with the above-named Tell al-Mashkutah, which is believed to be Pithom, but with Zoan (Tanis), the modern San. Here black bricks (Ex. v. 7) have been found in abundance among the ruins. That the point of the Gulf of Suez lay in the time of the Exodus somewhat more to the north than now has been pointed out in defense of the theory that the crossing took place at Suez. It is impossible to trace the route definitely from the conflicting data of Exodus. E. G. H.

EXODUS, BOOK OF.—Biblical Data: The second book of the Torah or Pentateuch is called by the Jews ואלה שמות, from the opening words, or briefly שמות. The Greek name is Ἔξοδος (in Philo also Ἐξαγωγή), that is, "departure"; the Latin, "[Liber] Exodus." It contains, according to the Masorah, 1,209 (?) verses in 164 sections ("parashiyyot"), 69 ending in the middle of the line ("petuḥot" = "open"), and 95 with a space in the middle of the line ("setumot" = "closed"), in 29 chapters ("sedarim"), and 14 sections ("pisḳot"), for reading on the Sabbath, in 11 lessons. The common division into 40 chapters is taken from the Vulgate.

Name and Contents.

The second book of the Torah is the organic continuation of the first book. It narrates the departure of the descendants of the Patriarchs, increased to a people, from servitude in Egypt, their journey to Sinai, and the revelations and laws which they received there. It is a well-planned and well-arranged work, displaying much literary skill in the command over great masses of material as well as in the marshaling of the facts. It is homogeneous in its views, and is not encumbered by unnecessary repetitions, though the sequel to it is found only in the following books. It is divided into two principal sections: (1) ch. i.–xviii., recounting Israel's deliverance from Egypt; (2) ch. xix.–xl., the promulgation of the Law. These may again be divided into subsections.

Ch. i.–iv.: The Call of Moses. The Israelites living in Egypt are oppressed by forced labor, imposed upon them by a new Pharaoh who desires to destroy them (i.). The exposed male infant of a Levitic family (whose name, in order not to divert interest from the main story, is not given here), is found by Pharaoh's daughter, who calls him "Moses" and adopts him. Moses, grown to man's estate, sympathizes with his suffering brethren, and flees the country because he has slain an Egyptian overseer. He goes to Midian, becomes shepherd to the priest Jethro, and marries the latter's daughter Zipporah (ii.). As he is feeding the sheep on Mount Horeb, he has a marvelous experience. God appears to him from a thorn-bush which, though burning, is not consumed. He reveals Himself as the God of the Fathers of Israel, and orders Moses to go before Pharaoh and demand the release of his brethren. God overcomes Moses' reluctance by His promises of supreme aid, and appoints his brother Aaron to be his assistant. Moses then returns to Egypt.

Ch. v., vi.: The Preparation. As Pharaoh not only refuses Moses' request, but oppresses the people still further, Moses complains to God, who thereupon announces to him that He will now display His power and will surely liberate Israel. At this point the genealogy of Moses and his family is inserted, in order that it may not later interrupt or weaken in any way the story which follows.

Ch. vii.-x.: The Plagues: the proofs of God's power. After God has assigned their tasks to Moses and Aaron, and predicted Pharaoh's obduracy, and after they have attested their commission by working a miracle before Pharaoh (vii. 1-13), God sends nine plagues over Pharaoh and his land: (1) the changing of the waters of the Nile into blood (דם, vii. 14–25); (2) frogs (צפרדע, vii. 28–viii. 11); (3) vermin (כנים, viii. 12–15); (4) noxious animals (ערב, viii. 16–28); (5) death of the cattle (דבר, ix. 1–7); (6) boils upon men and beasts (שחין, ix. 9–12); (7) storms, killing men and beasts (ברד, ix. 13–35); (8) locusts that devour all vegetation (ארבה, x. 1–20); (9) deep darkness for three days (חשך, x. 21–29). These plagues, which give evidence of God's power over nature, are increasingly obnoxious and dangerous, and are so arranged that every third plague (hence narrated more briefly) confirms the two preceding ones (narrated more in detail), and each group follows naturally upon the preceding one. The story displays a skilful climax, rhythm, and variety. Pharaoh, however, is untouched by the first plague, which his magicians can imitate; after the second plague, which they can reproduce, but not check, he begins to supplicate; after the third plague he allows his magicians to comfort him; from the third on he makes fresh promises after each plague, but recalls them when the danger is past, and remains obdurate.

Ch. xi.-xiii. 16: The Departure. The last, decisive blow, namely, the death of all the first-born of the Egyptians (מכת בכורות), and the departure are announced. For the protection of their homes the Israelites are commanded to kill a lamb (פסח) and to eat it quickly with unleavened bread (מצה) and bitter herbs (מרורים), on the 14th of the first month, and to be ready for immediate departure. The first-born of all the Egyptians die. Pharaoh dismisses the Israelites. To the number of 600,000 men, not including women and children, they leave the country, after a sojourn of 430 years, carrying with them rich gifts from benevolent Egyptians. They go first from Rameses to Succoth. Chap. xii. 43—xiii. 16 contain supplementary regulations regarding the future observance of the Passover.

Ch. xiii. 17-xv. 21: Pharaoh's Death. Repenting his clemency, Pharaoh, with chariots and horsemen, pursues the Israelites, who have reached the shores of the Red Sea (ים סוף), divinely guided by day by a pillar of cloud, and by night by a pillar of fire. The Israelites pass dry-shod through the waters, which marvelously recede before them while engulfing Pharaoh and his entire army. Moses and his people sing a song of praise to God.

Ch. xv. 22-xviii.: The March to Sinai. The Israelites journey into the desert of Shur, to Mara. The people, complaining of lack of water, are satisfied. They reach Elim. In the desert of Sin they complain of lack of food. God sends them quails, and from this time on, except on the Sabbath, sends them a daily shower of manna. Upon arrival at Rephidim the people again complain of lack of water. God gives them water from a rock ("Massah and Meribah" = "place of temptation and quarrels"; xvii. 7). Amalek attacks Israel and is vanquished by Joshua. God commands eternal war against Amalek. Moses' father-in-law, Jethro, having heard of Israel's deliverance, visits Moses, bringing him his wife Zipporah and their two children, whom Moses had left behind at home. On Jethro's advice Moses appoints subordinate judges.

Ch. xix.-xx.: Israel's Call: the promulgation of the Ten Commandments on Mount Sinai. In the third month the Israelites arrive in the desert of Sinai and encamp at the mountain. God announces to them through Moses that, having by His power liberated them, He will now constitute them His people, making them a nation of priests and a holy people. The Israelites accept this call with one accord, and after they have prepared themselves worthily, God, through Moses' mediation, and with thunder and lightning, clouds of smoke and noise of trumpets, reveals Himself to them on Mount Sinai and pronounces the ten fundamental commands of religion and morals, which are followed by a command regarding the altar.

Ch. xxi.-xxiv.: The Law and the Covenant. The Ten Commandments, formally declaring the divine will regarding man's attitude to God and to all His creatures, are followed by enactments relating to civil law: (1) indemnifications for injuries done to a fellow man; (2) duties toward persons who have no actual claims, though they are dependent on the good will of others. In conclusion there are the promise of the land of Canaan as the reward of obedience, and the warning against the pagan inhabitants. God then enters into a solemn covenant with the people, through Moses. He calls Moses up into the mountain to receive the stone tablets of the Law and further instructions.

Ch. xxv.-xxxi.: The Sanctuary and the Priests. In order that God may dwell permanently among the Israelites, they are given instructions for erecting a sanctuary. The directions provide for: (1) a wooden ark, gilded inside and outside, for the Tables of the Covenant, with a cover similarly gilded as "mercy seat" for the Divine Presence; (2) a gilt table for the so-called "shewbread" (לחם פנים); (3) a golden candlestick for a light never to be extinguished; (4) the dwelling, including the curtains for the roof, the walls made of boards resting on silver feet and held together by wooden bolts, the purple curtain veiling the Holy of Holies, the table and candlestick, and the outer curtain; (5) a sacrificial altar made of bronzed boards; (6) the outer court formed by pillars resting on bronze pedestals and connected by hooks and crossbars of silver, with embroidered curtains; (7) preparation of the oil for the candlestick. Then follow directions for the garments of the priests: (1) a shoulder-band (ephod) with two onyx stones, on each of which are engraved the names of six of the tribes of Israel, also golden chains for holding the breastplate ("ḥoshen") set with twelve precious stones, in four rows; (2) a robe for the ephod, with bells and pomegranates around the seam; (3) a golden miter plate with the inscription "Holiness to the Lord"; (4) a coat; (5) a miter; (6) a girdle. All these things are for Aaron. For his sons coats, bonnets, girdles, and linen breeches shall be made. Then follow directions for ordaining the priests, including robing, anointing (of Aaron), and a seven days' sacrifice; the institution of daily morning and evening offerings; directions for making a golden altar of incense, to be set up in front of the inner curtain, opposite the Ark of the Covenant, and on which an atonement shall be made once a year with the blood of the sin-offering; directions for a yearly tax of half a shekel to be paid by every Israelite enumerated in the census toward the expenses of this service; directions for making a laver and stand of brass, to be set up between the Tabernacle and the altar of sacrifice; the preparation of the holy oil for anointing and of the holy incense; appointment of the master workmen Bezaleel and Aholiab to direct the work; the observance of the Sabbath.

The most striking point in this enumeration is the place given to the directions regarding the altar of incense, which, to agree with the arrangement as described in chaps. xxxv.-xl., should follow the directions for making the golden candlestick (xxv. 31-40). This has been a puzzle to the critics, who have made it the basis of the most far-reaching hypotheses. The passage was not only supposed to be a later interpolation, but it was assumed that originally there was no altar of incense, not even in Herod's temple! The riddle may be solved as follows: In xxxv.-xl. the articles are enumerated in the order in which they were set up, while here they are enumerated according to their uses. The golden altar of incense later stood in the Tabernacle, between the table and the candlestick, a fact leading to the assumption that, like them, it belonged to the Tabernacle. But as throughout ancient literature the offerings of sacrifice and incense are two independent coordinated acts of worship, so the altar of incense was, to all intents and purposes, an independent requisite of worship as important as the rest of the apparatus. For this reason everything that is necessary for the dwelling of God and the sacrifices that guarantee His presence is described first, and the altar of incense after (comp. especially Lev. xvi. 16-17: first, atonement for the Holy of Holies and the "tabernacle . . . *that remaineth among them in the midst of their uncleannesses*"; then, the cleansing and sanctifying of the altar of incense "from the uncleannesses of the children of Israel").

The sacrifice presumes God's presence, while it is the object of the incense to insure the continuation of His presence. The things, again, that must be repeatedly renewed are placed last, namely, the oil for lighting; the yearly tax; the laver with stand, consisting of mirrors, which were taken apart again after the laver had been used, and are, therefore, not enumerated in Num. iv. 14; the oil for anointing; and the incense. In conclusion, there are the directions for the workshop, the appointing of the master workman, and the arrangement of the work. These directions are admirably thought out, down to the smallest detail.

Ch. xxxii.-xxxiv.: The Sin of the People with the Golden Calf. While Moses is on the mountain the people become impatient and urge Aaron to make them a golden calf, which they worship with idolatrous joy. God informs Moses and threatens to abandon Israel. Moses at first intercedes for the people, but when he comes down and beholds their madness, he angrily breaks the two tablets containing the divine writing. After pronouncing judgment upon Aaron and the people he again ascends to God to implore forgiveness for them, as God is about to withdraw from them His blessed presence and to leave them unguided in the wilderness. Moses' intercession prevails. When he petitions God to tell him who will accompany them, what He intends to do, and how He will manifest His splendor, God commands him to make new tablets, and reveals Himself to Moses as a God of inexhaustible love and mercy. He assures Moses that in spite of their waywardness He will lead Israel into the Promised Land, giving Moses in token thereof new commandments applicable only to that land. He commands the Israelites not to have intercourse with the pagan natives, to refrain from all idolatry, and to appear before Him on the three pilgrimage festivals. Moses then returns to the people, who listen to him in respectful silence.

Ch. xxxv.-xl.: The Sanctuary and the Garments of the Priests (almost in the same words as in ch. xxv.-xxxi.). Moses collects the congregation, enjoins upon them the keeping of the Sabbath, and requests gifts for the sanctuary. The entire people, men and women, high and low, respond willingly and quickly, and under the direction of the superintendent they make: (1) the dwelling, including the curtains, the walls, and the veil; (2) the Ark and cover; (3) the table; (4) the golden candlestick; (5) the golden altar of incense; (6) the altar of burnt offerings; (7) the laver; (8) the outer court. An estimate of the cost of the material follows. Next comes the preparation of the garments of the priests, including: (1) the ephod with the onyx stones, together with the breastplate and its twelve precious stones and its golden chains; (2) the robe of the ephod; (3) the coats for Aaron and his sons; (4) the miter and bonnets; (5) the breeches;

(6) the girdle; (7) the golden plate of the crown. Moses inspects the work when completed and praises it, and the sanctuary is set up on the first of the second month.

In connection with this section (xxxv.-xl.) the questions arise: Why the lengthy repetition of ch. xxv.-xxxi. in ch. xxxv.-xl.? and Why the difference in the order in which the various objects are described? To the first question the answer is: When the people fell away and God renounced them, the tablets of the covenant seemed to have become useless, wherefore Moses broke them. But after the people had been forgiven new tablets were made and the promises relating to the country had to be repeated. Furthermore, the promise given by God that He will dwell among Israel, in a sanctuary erected by them and in which they will worship, must not be allowed to remain unfulfilled; and therefore the building of the sanctuary that had been planned is undertaken anew, but according to the original idea. Hence ch. xxxii.-xxxiv. belong necessarily between ch. xxv.-xxxi. and xxxv.-xl. To the second question the reply is, that in xxv.-xxxi., which contain the plan, the pieces are enumerated according to the uses to which they are put, while in xxxv.-xl. (as also in the working-plans given to the overseers in xxxi. 7 *et seq.*), which narrate the progress of the work, they are enumerated according to their arrangement.

Religion.

Exodus contains the most fundamental and sublime revelations of God regarding His nature and will, and describes the beginnings of the theocratic constitution of the Israelitic people and the foundations of its ethics, law, customs, and worship. God, as revealed in Exodus, is not a new, hitherto unknown God: He is the God of Abraham, of Isaac, and of Jacob—the Fathers of the people—who has protected them and has been worshiped by them (Ex. ii. 24; iii. 6, 13-18; iv. 5; vi. 3, 8; xv. 2; xxxii. 13). He Himself designates the name by which He is to be addressed: "יהוה [YHWH], the God of your fathers, the God of Abraham, the God of Isaac, and the God of Jacob" (iii. 15). The book, however, expressly purposes to reveal, or fully develop, for the first time certain aspects of the divine nature that have not hitherto been noted. When God appears to Moses in the flaming bush, and commissions him to announce to the Israelites their impending liberation, Moses asks doubtingly (iii. 13): "Behold when I come unto the children of Israel, and shall say unto them, The God of your fathers hath sent me unto you; and they shall say to me, What is his name? what shall I say unto them?" Moses seeks to know, not the name of God, but what God's name, which he knows is full of significance, expresses in this particular case. Moses is well aware that the name "YHWH" means "the Almighty," and that salvation rests with God; but in his anxiety, amounting indeed to a lack of faith, he wishes to know at once *how* God will save. God, however, will not announce that now; merely comforting him by saying (iii. 14) אהיה אשר אהיה ("I will be there [helping when necessary] in such a way as I may deem fit"; A. V. "I AM THAT I AM"). "I will prove myself as the Almighty, the unfailing savior." On this passage, if interpreted rightly, is based the passage vi. 2, where God encourages Moses—who is disappointed because reference to this name has availed him nothing—by saying "I am YHWH! I have revealed myself as a faithful God ["El Shaddai"] to Abraham, Isaac, and Jacob, without their having known me according to my name YHWH." And now God works His miracles, all with the express intention that the people may "know that I am YHWH" (vi. 7; vii. 5, 17; viii. 6, 18; ix. 14, 25, 29; x. 2; xiv. 18; xvi. 12). Thus, God is, as His name YHWH implies, the almighty Savior, subject only to His own will, independent, above nature and commanding it; the God of miracles; the helpful God, who uses His power for moral purposes in order to establish law and liberty in the world, by destroying the wicked and saving the oppressed (iii. 8; vi. 6; vii. 5; xv. 2, 3, 11), in whose hands are given judgment and salvation (iii., iv., vi. 1-8).

Revelations of God.

In ch. xxxii. *et seq.* is revealed another side of God's nature. Israel has merited His destructive anger because of its sin with the golden calf. But God not only refrains from destruction and from recalling His word regarding the promised land; He even listens to Moses' prayers to grant His presence anew to the people. When Moses again asks, "Show me thy glory," God answers, "I will make all my goodness pass before thee, and I will proclaim the name of YHWH before thee, and will be gracious unto whom I will be gracious, and will show mercy unto whom I will show mercy" (xxxiii. 18-19). And again, "Thou canst not see my face: for man shall not see me and live; . . . thou shalt see my back; but my face shall not be seen" (*ib.* 20, 23, R. V.). When God appears to Moses He reveals Himself as "YHWH, YHWH God, merciful and gracious, long-suffering, and abundant in goodness and truth. Keeping mercy for thousands, forgiving iniquity and transgression and sin, and that will by no means clear the guilty; visiting the iniquity of the fathers upon the children, and upon the children's children, unto the third and to the fourth generation" (xxxiv. 6-7). In these words God has revealed Himself as a being full of holy zeal against wickedness—a zeal, however, which is counteracted by the immeasurably greater power of His love, mercy, and forgiveness, for these are inexhaustible. But even this does not constitute His entire nature, which in its full depth and clarity is beyond the comprehension of man.

These two revelations contain the highest and most blessed insight into the nature of God ever attained; and around them may be grouped the other statements regarding God which the book of Exodus contains.

God the Absolutely Exalted One.

God is the absolutely Exalted One, who can not be compared with any other gods; even the Midianite Jethro admits that YHWH is greater than all gods (xv. 1, 11; xviii. 11). The whole world belongs to God: He has created heaven and earth and all that is therein; He rules forever; He performs marvels; nothing like Him has ever been; hence He is an object of veneration (xv. 11, 18; xix. 5; xx. 11; xxxiv. 10). He gives speech to man, or leaves him deaf and dumb; gives him sight, or makes him blind (iv. 11). He has power over men's hearts, either encouraging them to do good (iii. 21, xi. 3, xii. 36), or, having larger ends in view, not preventing them from doing evil ("hardening the heart," iv. 21; vii. 3; x. 1, 20; xiv. 4, 17). God is omniscient: He knows the distant, the future, what man may be expected to do according to his nature (vi. 4–13, 29; viii. 11, 15; ix. 12, 35; xxiv. 20; xxxiv. 10–12). From God proceed artistic inspiration, wisdom, insight, knowledge, and skill (xxxi. 3; xxxv. 31, 34; xxxvi. 1, 2).

God is Providence (ii. 25); He rewards good deeds, be they done from fear of or love for Him (i. 21, xx. 6). He is not indifferent to human misery; He sees and hears and intervenes at the right moment (iii. 7; iv. 31; vi. 5; xxii. 22, 26); He makes promises which He fulfils (ii. 24, iii. 16, iv. 31, vi. 5, xxxii. 13). God is jealous and leaves nothing unpunished (xx. 7, xxxiv. 7); but He always punishes the sinner Himself, admitting no vicarious death, even if it is offered (xxxii. 33). His great moral indignation ("anger") against sin would be destructive (xxxii. 10, 33) were not His forgiving love still greater (xx. 5, xxxii. 14, xxxiii. 19). He is gracious and full of mercy (xv. 13, xxxiv. 6). His presence means grace; it sanctifies; for He Himself "is glorious in holiness" (xv. 11, xxix. 43).

Man can not perceive God in His entire nature; he may only look after God when He has passed by and imagine Him (Dillmann to Ex. xxxiii. 22).

Yet God reveals Himself to man; *i.e.*, He informs man visibly and audibly of His presence and will. God, who has already appeared to the Fathers, appears in the flaming bush, in the pillar of cloud and of fire on the march, in the clouds in which He came down on Sinai, in the fire on the mountain, in the cloud in the desert, in the pillar of cloud on Moses' tent, in the cloud from which He calls out to Moses His attributes of grace, in the cloud and the fire that serve as signals to the Israelites to start or to encamp (vi. 3; xiii. 21; xiv. 19; xix. 11; xx.; xxiv. 15, 17; xxxiii. 9; xxxiv. 5; xl. 34–36). This divine appearance is called God's message (xiv. 19; xxiii. 20, 23; xxxii. 34; xxxiii. 2) or His glory (xvi. 7, 10; xxiv. 16–17; xxxiii. 22; xl. 34).

God appears in order to make Himself known, to give commands, and to impart reverence leading to obedience (xvi. 10, xix. 9, xx. 20). God speaks chiefly with Moses; He puts the words in Moses' mouth, and tells him what to say; He talks with him face to face, as a man with his neighbor, and gives him a staff as a token of his office (iii. 15; iv. 17; vii. 2, 17, 20; ix. 23; x. 13; xxxiii. 11). But God also speaks from heaven to the entire people (xx. 22), and orders for Himself a permanent dwelling-place among them in the tabernacle set up according to His directions (xx. 22, xxv. 8, xxix. 45); He descends thither in order to talk with Moses, His especial place being the cover of the Ark of the Covenant, between the two cherubim (xxv. 22, xxix. 43, xxx. 6).

God has made a covenant with the Fathers of the people, Abraham, Isaac, and Jacob, that He will multiply them as the stars of heaven; that He will remember them, save them, and give to them and their descendants the land of Canaan—a land "flowing with milk and honey," and that shall reach "from the Red Sea even unto the sea of the Philistines, and from the desert unto the river" (ii. 24; iii. 8, 17; vi. 4–8; xiii. 5; xxiii. 31; xxxii. 13; xxxiii. 3). God remembers this covenant and keeps it despite everything, as is exemplified in the deliverance of Israel and the destruction of Pharaoh (i. 7, 12; iii. 7; vi. 1; xxiii. 20); He does not forget it, in spite of the dejection and the murmurings of the people (vi. 9; xiv. 10; xv. 24; xvi. 2, 27; xvii. 3), their worship of the golden calf and their obstinacy (xxxii. 9; xxxiii. 3, 5; xxxiv. 9). He leads, fights for, heals, and educates Israel and destroys Israel's enemies (xiii. 17; xiv. 14, 25; xv. 3, 26; xvi. 4; xx. 20; xxiii. 22, 23, 27; xxxiii. 2, xxxiv. 11, 24). The Israelites are God's people, His host, His first-born son (vi. 7, vii. 4, xii. 41, xv. 16, xxxii. 11 *et seq.*; xxxiii. 13, 16). Yhwh will be Israel's God (vi. 7, xxix. 5). Israel is His property ("segullah"). Above all people Israel shall be His people, "a kingdom of priests, and a holy nation," if Israel will listen to God's voice and keep His covenant (xix. 5, 6). Therefore He gives to the Israelites commandments, descends to them in His glory, holds them worthy of renewed revelations, and orders divine service (xxiv. 8, xxxiv. 27).

Israel.

The Moral Law.

In Exodus are found for the first time the preeminent characteristics of the Israelitic law: its origin in and pragmatic connection with history. An account is given of the laws in connection with the events that called them forth. Thus, on the one hand, history explains and justifies the Law, while on the other the Law keeps alive and commemorates the events and teachings of history. As furthermore God is the subject of history as well as the lawgiver, Israel's religion assumes here the fundamental characteristic that determines its entire future development: it is a law founded on God as revealed in history. The basis is the Decalogue, the Ten Commandments (Ex. xx. 1–17), in which all duties are designated as duties toward the God who liberated Israel from the slavery of Egypt. Israel must not recognize any other God; idolatry and the making and worshiping of images are forbidden (xx. 2–5, 23; xxiii. 13, 24, 33; xxxii.; xxxiv. 12–14, 17); Israel shall beware of seductive intercourse with the idolatrous Canaanites; sacrificing to idols, and magic, are punishable by death. Nor may the name of the true God be applied to vain idols (this is the only correct explanation of xx. 7). God is recognized as Creator of the world by the sanctification of the Sabbath, on which man and beast shall rest from all labors (xvi. 23 *et seq.*, xx. 7 *et seq.*, xxiii. 12, xxxi. 12–17, xxxv. 1–3), and also by the observance of the Sabbatical year (xxiii. 10). He is recognized as Israel's savior from Egyptian oppression by the celebration of the Passover (see below).

"Honor thy father and thy mother: that thy days may be long upon the land which the Lord thy God giveth thee" (xx. 12, fifth commandment). He who strikes or insults his father or mother is punished by death (xxi. 15, 17). Honor must also be accorded to those in authority (xxii. 27 [A. V. 28]

"Thou shalt not kill" (xx. 13). Murder is punishable by death (xxi. 12); there is no place of refuge for the murderer, as there is for the accidental homicide, even at the altar (xxi. 13–14). For bodily injuries there is a fine (xxi. 18–19, 22–25, 28–31).

"Thou shalt not commit adultery" (xx. 14). Lechery and intercourse with animals are punishable by death (xxii. 17); the seducer of a virgin must either marry her or compensate her father (xxii. 15 *et seq.*). "Thou shalt not steal" (xx. 15). Kidnapping is punishable by death (xxi. 16). Killing of a burglar is justifiable. Whoever steals cattle, slaughtering and selling it, has to pay four or five times its value; if it is found alive, double; if the thief is unable to pay he is sold into slavery (xxi. 37, xxii. 3). Property injured or destroyed must be made good (xxi. 33–36, xxii. 4–14).

"Thou shalt not bear false witness against thy neighbor" (xx. 16). Justice, veracity, impartiality, honesty in court, are enjoined (xxiii. 1, 2, 6–8). An oath is demanded where there is suspicion of a default (xxii. 7 *et seq.*).

"Thou shalt not covet thy neighbor's house, thou shalt not covet thy neighbor's wife, nor his manservant, nor his maidservant, nor his ox, nor his ass, nor anything that is thy neighbor's (xx. 17).

The duties to one's neighbor include both kindly deeds and kindly thoughts. The poor man must be cared for: justice shall be done to him; loans shall be made to him; and he shall not be pressed for payment, nor shall the necessaries of life be taken in pawn (xxii. 24 *et seq.*). Widows and orphans shall not be oppressed; for God is their advocate (xxii. 21). Strangers shall not be injured or oppressed; "for ye were strangers in the land of Egypt" (xxii. 20, xxiii. 9); they also shall rest on the Sabbath (xx. 10). A Hebrew bond-servant shall not serve longer than six years, unless he himself chooses to remain. He may not earn any wages for himself while serving. The master of a girl that has been sold into servitude shall marry her or give her a dower. Servants are to be set free on receiving bodily injuries; and death caused by an animal is requited (xxi. 1–11, 20, 21, 26, 27, 32). Servants also shall rest on the Sabbath (xx. 10, xxiii. 12). Animals shall be treated gently (xxiii. 4, 5, 19), and be allowed to rest on the Sabbath (xx. 10; xxiii. 12). Consideration for an enemy is enjoined (xxiii. 4, 5). To do these commandments is to obey God (xv. 26, xvi. 28, xx. 6, xxiii. 13). Israel shall trust in Him (iii.-vi., xiv. 31, xvi., xvii. 7, xix. 9); and in a significant passage (xx. 6) the love for God is accentuated.

Cult.

In Exodus the beginnings of the national cult are seen. It is strictly forbidden to make or worship idols (xx. 3, 23; xxiii. 24; xxxii.; xxxiv. 13, 17). The symbol of the Divine Presence is the Tabernacle built according to God's directions, more especially the cover of the Ark of the Covenant and the space between the cherubim thereon (see TABERNACLE). Worship by specially sanctified priests shall be observed in this sanctuary (see LEVITICUS). The festivals include the Sabbath, for which no ritual is mentioned, and three "pilgrimage festivals," at which all males are to appear before God (xxiii. 14–17, xxxiv. 18–23).

The Passover is discussed in detail, a large part of the book being devoted to its institution (xii. 1–28, 43–50; xiii. 1–16; xxiii. 15; xxxiv. 18–20); and its historical origin is to be brought home to all future generations (xii. 2, 14, 17, 24–27, 42; xiii. 5–10, 16; see MAẒẒAH; PESAḤ; SEDER). Toward evening of the 14th day of the first month a yearling male lamb or kid without blemish shall be slaughtered, roasted by the fire, and eaten at the family dinner, together with unleavened bread and bitter herbs. It must be roasted whole, with the legs and entrails, and no bones must be broken; none of the meat must be carried from the house, but whatever remains until morning must be burned. In connection with this there is a seven days' festival (חג), the Feast of Maẓẓot (unleavened bread). This bread shall be eaten for seven days, from the 14th to the 21st of the first month (the month of Abib, in which Israel went out from Egypt; xxiii. 15, xxxiv. 18). It is strictly forbidden to partake of anything leavened; it must be removed from the house on the first day. The first and the seventh day are strictly days of rest, on which only necessary food may be prepared. The sanctification of the firstlings that belong to God is also connected with the Passover. The first-born child, and that of the ass, which can not be sacrificed, must be redeemed by a lamb (xiii. 1 *et seq.*, xxii. 28, xxxiv. 19 *et seq.*). Other festivals are (1) the cutting of the first-fruits of the harvest ("Ḥag ha-Ḳaẓir") or the Feast of Weeks ("Ḥag Shabu'ot"), and (2) the harvest-home ("Ḥag ha-Asif") at the end of the year, after the harvest has been gathered in (xxiii. 16, xxxiv. 22). At these festivals the people must not appear empty-handed before God; they must not mix the blood of the Passover sacrifice with leavened bread, nor leave the sacrifice until the morning; they must take the firstlings of the field into the house of God, and must not seethe the kid in its mother's milk (xxiii. 18, 19; xxxiv. 25, 26). The tithes from the barn and the vineyard must not be delayed. Animals torn in the field ("ṭerefah") must not be eaten, but must be thrown to the dogs, for "ye shall be holy men" (xxii. 28–30; A. V. 29–31).

E. G. H. B. J.

——**Critical View I.:** The Book of Exodus, like the other books of the Hexateuch, is of composite origin, being compiled of documents originally distinct, which have been excerpted and combined by a redactor (see PENTATEUCH). The two main sources used in Exodus are the one now generally known as "JE," the chief component parts of which date probably from the seventh or eighth century B.C., and the one denoted by "P," which is generally considered to have been written during or shortly after the Babylonian captivity. The former of these sources is in tone and character akin to the writings of the great prophets; the latter is evidently the work of a priest, whose chief interest it was to trace to their origin, and describe with all needful particularity, the ceremonial institutions of his people. It is impossible, within the limits of the present article, to state the details of the analysis, at least in what relates to the line of demarcation between J and E, or to discuss the difficult problems which arise in connection with the account of the legislation contained in JE (xix.–xxiv. and xxxii.–xxxiv.); but the broad and important line of demarcation between P and JE may be indicated, and the leading characteristics of the principal sources may be briefly outlined.

The parts of Exodus which belong to P are: i. 1–5, 7, 13–14, ii. 23b–25 (the oppression); vi. 2–vii. 13 (commission of Moses, with genealogy, vi. 14–27); vii. 19–20a, 21b–22, viii. 1–3, 11b–15 (A.V. 5–7, 15b–19), ix. 8–12, xi. 9–10 (the plagues); xii. 1–20, 28, 37a, 40, 41, 43–51, xiii. 1–2, 20 (Passover, maẓẓot, dedication of first-born); xiv. 1–4, 8–9, 15–18, 21a, c, 22–23, 26–27a, 28a–29 (passage of Red Sea); xvi. 1–3, 6–24, 31–36 (the manna); xvii. 1a, xix. 1–2a (journey to Sinai); xxiv. 15–18a, xxv. 1–xxxi. 18a (instructions respecting the Tabernacle); xxxiv. 29–35, xxxv.–xl. (the construction and erection of the Tabernacle). The rest of the book consists of J and E, which (before they were combined with P) were united into a whole by a redactor, and at the same time, it seems, expanded in parts (especially in the legal portions) by hortatory or didactic additions, approximating in style to Deuteronomy.

Characteristics of JE.

In JE's narrative, particularly in the parts belonging to J, the style is graphic and picturesque, the descriptions are vivid and abound in detail and colloquy, and both emotion and religious feeling are warmly and sympathetically expressed. As between J and E, there are sometimes differences in the representation. In the account of the plagues, for instance, the Israelites are represented by J as living apart in Goshen (viii. 18 [A. V. 22], ix. 26; compare Gen. xlv. 10, xlvi. 28, etc.; also J); and the plagues are sent by Yhwh at a specified time announced beforehand to Pharaoh by Moses. In E the Israelites are represented, not as occupying a district apart, but as living side by side with the Egyptians (iii. 22, xi. 2, xii. 35 *et seq.*); and the plague is brought to pass on the spot by Moses with his rod (vii. 20b; ix. 23; x. 12, 13a; compare iv. 2, 17, 20b; xvii. 5; also E) or his hand (x. 22). An interesting chapter belonging to E is xviii., which presents a picture of Moses legislating. Disputes arise among the people; they are brought before Moses for settlement; and his decisions are termed "the statutes and directions ["torot"] of God." It was the office of the priests afterward to give direction (תורה, הורה) upon cases submitted to them, in matters both of civil right (Deut. xvii. 17) and of ceremonial observance (*ib.* xxiv. 8; Hag. ii. 11–13); and it is difficult not to think that in Exodus xviii. there is a genuine historical tradition of the manner in which the nucleus of Hebrew law was created by Moses himself.

JE's account of the Sinaitic legislation is contained in xix. 3–xxiv. 14, 18b; xxxi. 18b–xxxiv. 28. This narrative, when examined attentively, discloses manifest marks of composite structure. The greater part of it belongs tolerably clearly to E, viz.: xix. 3–19; xx.–xxiii. 33 (expanded in parts by the compiler); xxiv. 3–8, 12–14, 18b; xxxi. 18b; xxxii. 1–8 (9–14, probably compiler), 15–35; xxxiii. 5–11. To J belong xix. 20–25, xxiv. 1–2, 9–11 (fragments of an account of the theophany on Sinai); and xxxiii. 1–4, xxxiii. 12–xxxiv. 28 appear also to be based upon J, but amplified by the compiler. A particularly noticeable passage in E's narrative is xxxiii. 7–11, which preserves the oldest representation of the "Tent of Meeting"; it was outside the camp (compare Num. xi. 16, 17, 24–30; xii. 4; also E; and contrast the representation of P in Num. ii. *et seq.*); the youthful Joshua was its keeper; and Moses from time to time repaired to it for the purpose of communing with Yhwh. Evidently the Tent of Meeting, as pictured by E, was a much simpler structure than it is in the representation of P (xxvi.–xxxi., etc.), just as the altar (xx. 24–26), feasts, etc. (xxiii. 10–19), presented by E, reflect the usage of a simpler, more primitive age than do the corresponding regulations in P.

The laws of JE are contained in xii. 21 27 (Passover); xiii. 3–16 (maẓẓot and consecration of first-born); xx. 1–17 (the Decalogue); xx. 22–xxiii. 33 (the "Book of the Covenant"; see xxiv. 7); and the repetition (with slight verbal differences, and the addition in xxxiv. 12–17 of more specific warnings against idolatry) of xiii. 12–13, and of the theocratic section of the Book of the Covenant (xxiii. 10–19) in xxxiv. 10–26 (sometimes called the "Little Book of the Covenant"). The Decalogue and the Book of the Covenant both belong in particular to E.

These laws have in many places had parenetic additions made to them by the compiler (*e.g.*, much of xiii. 3–16; the explanatory comments in xx. 4–6, 9–11, 12b, 17; xxii. 21b, 22; xxiii. 23–25a). The laws in xxxiv. 10–26 are introduced ostensibly as embodying the conditions for the renewal of the Covenant after it had been broken by the sin of the golden calf; but it is generally supposed that originally they formed a separate collection, which was introduced independently, in slightly different recensions, into E in xxiii. 10–19, and into J here, and which probably, when J was complete, stood as part of J's direct sequel to xxiv. 1–2, 9–11. Further, although by the author of xxxiv. 1–28 in its present form (see verse 1b), the "ten commandments" (Hebr. "ten words") of verse 28b are evidently intended to be the Decalogue of xx. 1–17, yet the natural subject of "And he wrote" in verse 28 is "Moses" (compare verse 27); hence it is also inferred by many critics that, in the original context of verse 28, the "ten words" were the preceding group of laws (verses 10–26), which, though now expanded by the compiler, would in that case have comprised originally ten particular injunctions (the "ritual Decalogue" of J, as opposed to the "moral Decalogue" of E in xx. 1–17). Whatever the true explanation of the double appearance of this little group of laws may be, it is in any case the earliest existing formulation of what were regarded at the time as the essential ritual observances of the religion of Yhwh.

Characteristics of P.

The literary and other characteristics of P are, *mutatis mutandis*, the same in Exodus as in other parts of the Hexateuch. The same or similar stereotyped formulas appear; and (as a reference to the synopsis above will show) there is the same disposition to reduce the account of ordinary events to a bare summary, but to enlarge upon everything connected with ceremonial institutions. In i.–xi. the narrative of P runs parallel to that of JE; and the compiler has sometimes preserved divergent versions of the same events. Thus, if vi. 2–vii. 13 be compared carefully with iii. 1–vi. 1, it will be seen not to describe the sequel of it, but to contain a parallel and partly divergent account of the commission of Moses and of the preliminary steps taken by him to secure the release of the people. In the narrative of the plagues there are systematic differences between P and JE: thus in P Aaron cooperates with Moses; no demand for Israel's release is ever made upon Pharaoh, the plagues being viewed rather merely as signs or proofs of power; the description is brief; the success or failure of the Egyptian magicians (who are mentioned only in this narrative) is noted, and the hardening of Pharaoh's heart is expressed by the verb "ḥazaḳ," "ḥizzaḳ" (this verb is used also by E; but J has regularly "kabed," "hikbid"). In xii.–xiii. the double strand is particularly evident: Passover, maẓẓot, narrative, and the dedication of the first-born are all in duplicate (in P, xii. 1–13 [43–50 supplementary], 14–20, 28, 37a, 40–41, 51; xiii. 1–2: in JE, xii. 21–27 (which careful comparison will show to be not really the sequel of xii. 1–13), 29–36, 37b–39, 42a; xiii. 3–10, 11–16).

The most characteristic part of P is, however, the account of the instructions given to Moses on the Mount (xxiv. 15–18a) for the construction of the Tabernacle and the appointment of a priesthood (xxv.–xxxi.). These instructions fall into two parts: (1) xxv.–xxix.; (2) xxx.–xxxi. In xxv.–xxix. the following subjects are dealt with: the Ark, table of show-bread, and candlestick (xxv.); the Tabernacle ("mishkan"), its curtains, boards, and veil (xxvi.); the altar of burnt offering, and the court (xxvii.); the dress of the priests (xxviii.); the ritual for their consecration, and for the daily burnt offering, which it is a primary duty of the priesthood to maintain (xxix. 1–42); and finally what is apparently the formal close of the entire body of instructions, Yhwh's promise to take up His abode in the sanctuary thus established (xxix. 43–46). Chapters xxx.–xxxi. contain directions respecting the altar of incense, the maintenance of public worship, the brazen laver, the anointing-oil, the incense (xxx.); the nomination of Bezaleel and Aholiab, and the observance of the Sabbath (xxxi.). While now it is not doubted that xxv.–xxix., with unimportant exceptions, form part of the original legislation of P, it is generally held by critics that xxx.–xxxi. belong to a secondary and posterior stratum of it, reflecting a later stage of ceremonial usage. The chief reason for this conclusion is the manner in which the altar of incense is introduced (xxxi. 1–10). If such an altar had been contemplated by the author of xxv.–xxix., he must, it is argued, have introduced it in xxv., together with the other furniture of the Holy Place, and also mentioned it in xxvi. 33–35; moreover, he would naturally, in such a case, have distinguished the altar described in xxvii. 1–8 from the altar of incense, and not have spoken of it simply as *the* altar.

This conclusion respecting the secondary character of the altar of incense appears to be confirmed by the fact that in the other laws of P there is a stratum in which such an altar is not recognized (for instance, Lev. xvi.). There are also other indications tending to show that xxx.–xxxi. belong to a posterior stratum of P, as compared with xxv.–xxix. Chapters xxxv.–xl. describe, largely in the same words as xxv.–xxxi. (the tenses alone being altered), but with several differences of order, how the instructions given there to Moses were carried out. In these chapters the altar of incense and the brazen laver (xxx. 17–21) are introduced in the places which they would naturally be expected to occupy, namely, in the descriptions of the Holy Place and the court respectively (xxxvii. 25–28, xxxviii. 8). It follows that if xxx.–xxxi. belong to a secondary stratum of P, the same must be true of xxxv.–xl. The later origin of xxxv.–xl. seems to be further supported by the fact that the Septuagint version of these chapters is not by the same hand as the rest of the book: so that presumably they were not in the manuscript used by the original translators. The chapters, if this view is correct, have taken the place of a much briefer account of the manner in which the construction of the Tabernacle was carried out.

P's Representation of the Tabernacle Unhistorical.

P's representation of the Tabernacle and its appointments can not be historical. The Israelites in the wilderness had undoubtedly an "ohel mo'ed"; but it was the simple "ohel mo'ed" of E (Ex. xxxiii. 7–11; Num. xi., xii.), not the costly and elaborate structure described by P. P's representation is the embodiment of an ideal; it is a "product of religious idealism," constructing for the Mosaic age, upon the basis of traditions or reminiscences of the Temple of Solomon, a shrine such as might be adequate to Yhwh's majesty, and worthily symbolize His presence in the midst of His people (compare Ottley, "Aspects of the O. T." p. 226).

Bibliography: The introductions to the O. T. by Kuenen, Driver, Holzinger, König, Cornill, Baudissin; the commentaries of Dillmann, Baentsch (1900), Holzinger (1900), and A. R. S. Kennedy (forthcoming); C. A. Briggs, *The Higher Criticism of the Hexateuch*, 1897; Carpenter and Harford-Battersby, *The Hexateuch*, Oxford, 1900, especially ii. 79–143 (text of *Exodus*, with the sources distinguished typographically, and full critical notes); G. F. Moore, *Exodus*, in Cheyne and Black, *Encyc. Bibl.* ii. (where further literature is referred to).

E. G. H. S. R. D.

——**Critical View II.:** The critical problems and hypotheses that Exodus shares with the other books, such as the historical value of the accounts; authorship; relation to the later books; age, origin, and character of the alleged sources, can not be discussed here now; the analysis of sources of Exodus can alone be treated. According to the critics of the Pentateuch, Exodus, like all the other books of the Torah, possesses no unity, having been compiled from different sources at different times, the various parts being then revised finally by one redactor (R); the same sources as those for Genesis furnish the material, namely, J (Jahvist), E (Elohist), and P (Priestly Code), in which again several strata must be distinguished, as P^2, P^3, P^4, J^1, J^2, E^1, E^2, etc. It is not necessary to refer to all the suggestions that have been made; the analyses of sources by Kuenen and Cornill are chiefly treated here (Kuenen: Introduction; § 5; § 6, 2–15; § 8, 10–13; § 13, 12 *et seq.*; § 16, 12; Cornill: Introduction; § 7; § 11, 4: § 12; § 13, 2, 8; § 14, 1, 2, 3.

To P^2 is assigned, according to Kuenen: i. 1–7, 13, 14; ii. 23–25; vi. 2–12 (13–28 interrupt the course of the story and are by a later reviser; they are, according to Wellhausen, unskilfully inserted and amplified); vii. 1–13, 19, 20a (21c ?), 22; viii. 1–3, 11b, 12–15; ix. 8–12 (35 ?); xi. 9–10; xii. 1–20, 28, 40 *, 41 *, 43-51 (xiii. 20 ?); xiv. 1–4, 8, 9, 10 (in part), 15–18, 21 (in part), 22, 23, 26, 27 (in part), 28, 29; xvi. ("this chapter has been subsequently revised and completed") (xvii. 1; xix. 2a ?); xxiv. 15–18a; xxv.-xxix. "follow in natural and regular order, and may have been arranged in this way by the author himself," but (§ 16, 12) contain many interpolations by R.

---

* = revision; + = essentially.

Ch. xxx., xxxi. 1–17, in which "the connection is looser, or is wanting altogether; and in which there are contained regulations that do not harmonize with what has preceded, and that are not presupposed later where they would naturally be mentioned . . . probably contain later additions, harmonizing in style with xxiv.-xxix., but not composed by the same author." To P^4 are assigned ch. xxxv.-xl. (and also Lev. viii.), which "depend entirely on xxv.-xxxi., which the author must have had before him." They formed "originally a very brief account of the observance of the regulations laid down in xxv. *et seq.*; they seem to have been gradually worked out, and then made as similar to those regulations as possible. The striking variations found in the Greek translation of xxxv.-xl. lead to the assumption that the final redaction of these chapters was hardly completed—if indeed it was completed—when that translation was made, *i.e.*, about 250 B.C." This entire theory regarding xxv.-xxxi., xxxv.-xl. is based on Popper's work, which the other critics also follow.

Cornill, who includes the later parts of P^2 under the general designation P^x, assigns to the Priestly Code the following portions: i. 1–5, 7*, 13, 14*; ii. 23*, 24–25; vi.+ (13–30 = P^x); vii. 1–13, 19, 20a*, 21b–22; viii. 1–3, 11a,b–15; ix. 8–12; xi. 9–10; xii. 1–20, 28, 37*, 40–41, 43–51 (15–20 and 43–50 = P^x); xiii. 1–2; xiv. 1–4, 8, 9b, 10a,b, 15*, 16–18, 21–23+, 26–28aa, 28*, 29; xvi. 1–3, 6–7, 9–18*, 20, 22a,b–24, 32–35a; xvii. 1a; xix. 1*, 2a; xxiv. 15–18aa; xxv. 1–xxxi. 18a (xxviii. 41 belongs surely to P^x, as do perhaps also other shorter additions to xxv.-xxix.; and xxx.-xxxi. entire); xxxiv. 29-35 (?); xxxv.-xl. (entirely P^x).

It is much more difficult in what remains to distinguish between the closely related J and E. Passages relatively complete in themselves are: (1) ch. xxi.-xxiii., the so-called "Book of the Covenant"; it belongs to E, though dating from an earlier time, and was found by him and incorporated in his work; (2) the story of the golden calf (xxxii.-xxxiv.), J and E sharing about equally in the account; (3) the Decalogue and the preparations for it (xix., xx.), chiefly E, but J also has a Decalogue tradition, its Ten Commandments being found in xxxiv. 14–26 (Wellhausen). E^1, originally composed in the Northern Kingdom, must be distinguished from E^2; the latter was compiled about 100 years later for Judah, and was worked over with J to form JE, many passages of which can no longer be analyzed.

E: Kuenen: Traces of E are found in i. (15–21, and apparently also 8–12, "is generally included in E"); in ii. "there is great difference of opinion" on the origin of verses 1–25 (according to Jülicher verses 1–22 are taken from E; according to Dillmann 1–14 from E and 15–23a from J. Wellhausen takes the story on the whole to be a combination from J and E.) This document appears especially clear, though not without admixture, in iii. 1–15, a section that, as complement to vi. 2 *et seq.* (P), also explains the use of "Elohim" in the account of the pre-Mosaic time taken from E. In the following "the traces are only with difficulty distinguished: in iii. 16–xii. only here and there with any certainty." (*Dillmann includes in E: the greater part of iii. 16–22;* iv. 17, 20b, 18, 21; the greater part of v.; vii. 15, 16, 17b, 20b, 21a, 23 in part, 24; viii. 16a, 21-24a, 25b; ix. 22, 23a, 24a, 25b (?), 31, 32, 35; x. 8-13a, 14 in part, 15 in part, 20, 21–27; xi. 1–3; xii. 31–33, 37b, 38. Jülicher includes: iv. 17, 18, 20b; v. 1, 2, 5; vii. 17 in part, 18, 20 in part, and 21, 24, 25a; viii. 21b, 22, 23; ix. 22, 23a, 24 and 28 in part, 35; x. 7, 8–11, 12, 13a, 14a, 15a, 20, 21–27, 28, 29; xi. 1–7; xii. 32, 35-38.) E is found again in: xiii. 17–19, 21, 22; xiv. 19a (19b ?); xv. 22–26; xvii. 1b–7, 8–16; xviii. Also xix. 9a, 10–17; xx. 18–21, 1–17 (in this order); this—the so-called "first"—the Decalogue, with the historical matter connected with it in xix.-xxiv., belongs to E^2. From the Book of the Covenant xxiv. 1, 2, 9–14, 18a, and various other passages, belong to E, as does also the story of Israel's apostasy at Sinai, which appears enlarged and connected with other stories in xxxii.-xxxiv., belonging originally to E^2.

Cornill: i. 11–12, 15–22+; ii. 1–10+; iii. 1–15+, 21–22; iv. 17, 18, 20b; vii. 15b, 17b–18, 20b–21a, 24; ix. 22–23a, 24b*, 25b, 31–32, 35; x. 12–13aa, 14aa,b, 15b, 20–23, 25 (?); xi. 1–3; xii. 35–36, 37*; xiii. 17–19; xiv. 7–9a,β, 10a,β, 19a, 20 (?); xv. 20–26+; xvii.-xxiv.+; xxxi. 18b; xxxii.+; xxxiii. 1–11+; xxxiv. 1a,4*, 28b* (?). In xix.-xxxiv. only xix. 13b (perhaps); xxiv. 1–2, 9–11; and xxxiii. 7–10 belong to E^1.

J, according to Kuenen, is represented in i.–xv. by accounts parallel with those of E, but which can not now be distinguished; "but it is doubtful whether J contributed anything to the account of the laws promulgated at Mount Sinai and of the defection of Israel, xix.-xxiv. and xxxii.-xxxiv." (Wellhausen finds J in: xix. 20–25; xx. 23–26; xxi.-xxiii.; xxiv. 3-8; Dillmann, in: xix. 9a, 20–25 [xx. 1–17, perhaps under a different form]; xxiv. 1, 2; xxxiv. 10–27; fragments in xxiv. 3-8, 9-11, 12 in part, 18b; xxxii. 1–14, 19b–24, 30–34; also in xxxiii. 1-6, 12, 13, 18–23; xxxiii. 14–17; xxxiv. 1–9.)

Cornill: i. 6, 7a,b, 8–10, 14a,β, 20b, 22 (?); ii. 11–23aa; iii. 16–20; iv. 1–12, 19, 20a, 24–26, 29*, 30*, 31; v.+; vi. 1; vii. 14–15a, 16–17a, 23, 25, 29; viii. 4*, 5-7, 8*, 9–11aa, 16–20, 21*, 22-28; ix. 1–7, 13–21, 23b, 24*, 25a, 26, 27*, 28-30, 33; x.+; xi. 4–8; xii. 21–27+, 29–39+, 42a; xiii. 3–16+, 21–22; xiv. 5–6, 9aa, 10ba, 11–14, 19b, 21a,β, 24–25, 27*, 28b, 30–31; xvi. 4–5, 16a,β, 18b, 21–22aa; 25–31+, 35b; xvii. 1a,b, 2, 7; xix. 2b, 7, 9–11, 18, 20–21, 22b, 25a; xxxiii. 12-23+ (?); xxxiv. 1a*, 2-3, 4*, 5, 6a, 8, 10–28+.

Redaction.

Editions (according to Cornill): In the first place J and E were combined into one book (JE) by one redactor (RJE). He greatly revised iii., and may have added the marching song xv. 1–19 ("it is entirely improbable that it was composed at the time the event itself took place"). He also did much editing of the pericope dealing with the legislation (xix.-xxxiv.). He used E^2 throughout as foundation, supplementing it with J; he omitted entirely the second Decalogue in J, incorporating what he thought valuable in the Book of the Covenant, xxiii. 15–19, and reduced xxxii.-xxxiii., on the whole, to its present form. A second redactor then combined (the later) Deuteronomy with JE (= JE + D). He added iv. 21–23; in the story of the Egyptian plagues (x. 2) "there is at least a Deuteronomistic touch"; he also added viii. 18b and ix. 29b, and probably revised ix. 14–16. He greatly revised xii. 21–27, xiii. 3–16, xv. 26, xvi., and xviii. 20b. He transferred, according to Kuenen, the Book of the Covenant to Mount Sinai in order to get room for Deuteronomy, being responsible, therefore, for all the confusion caused thereby—for example, the transferring of xx. 18–21 from its original position before, to its present position after, xx. 1–17; the transition to the Book of the Covenant as found in xx. 22, 23; and the peculiar form of xxiv. 1–15a. Ch. xix. 3b–8 is also specifically Deuteronomic, as well as the revisions of the Book of the Covenant with the final admonitions in xxiii. 22b–25a, 27, 31b–33, and the revision of the second Decalogue, which RJE transferred to the Book of the Covenant.

A third redactor, who combined JED with P, thus practically producing the Pentateuch (R^p), added iv. 13–16 and 27–28, revised 29–30, and in v.-x. added everywhere the name of Aaron (which was not included at all originally!). He or P^x (see *ante*) added vi. 13–30. It is more difficult to ascertain the method of his revision of xii. 40–42. To xvi. he transferred (in consideration of JE) a passage by P on the manna, which originally was placed after the revelation on Sinai (the reason assigned for this assumption on the part of the critics is that verse 34 presupposes the Tabernacle; but this verse is as much merely an anticipatory comment as is 35). He added to xvii. the fragment of the Jahvistic miraculous story of the spring in order to make room for P in Num. xx. He added finally the repeated phrase "the tables of testimony," xxxi. 18, xxxiv. 29, and in xxxiii. he omitted the Elohistic account of the making of the Ark of the Covenant. It is often doubtful whether a revision was made by R^p or by $P^{3, 4, 5}$—R^p is himself a priestly redactor.

Errors of Critical School.

All these and similar analyses of the sources of Exodus and the conclusions based thereon are entirely wrong. However rich and many-sided may have been the traditions from which the author drew his material, the book from beginning to end is composed and arranged according to a predetermined plan. The fundamental errors of the critical views are these: (1) The distinction made between J and E is erroneous, resting as it does on the varying use of the divine names "Yhwh" and "Elohim"; this use does not indicate a difference in authorship, but is due to the different meanings of the two names, the choice of which is carefully considered in each case. The statement that E uses in iii. 15 the name "Yhwh" for the first time, is due to a wrong interpretation; it is based on the Alexandrian-Essenic-Christian-Gnostic common superstition of the power of names and mere words, which, going back to Egyptian antiquity, is strongly marked in the New Testament—and hence naturally influences modern scholars—but is entirely foreign to the Old Testament. The verses vi. 2 *et seq.* are likewise interpreted wrongly. (2) An entirely insufficient argument is the alleged further variations of the language; for this presupposes the point to be proved. This argument turns in a circle: the critics seek to prove different sources by the variations of language, and vice versa. Moreover, the vocabulary is too limited for such assertions. (3) The differences of style and treatment do not indicate different authors, but are called forth by the different subjects. The account of the Tabernacle demanded technical details; while the stories of the deliverance from Egypt and of the revelation on Sinai prompted a strong, energetic, and thoughtful style. A separation into JE and P is not admissible. (4) All suggestions of reduplications, differences, and contradictions show an insufficient insight into the spirit and intentions of the author. Ch. i.–vi., for example, appear, on close investigation, to be an indissolubly united passage, from which *not one word* may be omitted. The same holds good of the story of the Egyptian miracles (vii.–xi.), the arrangement of which the critics have entirely misunderstood. The critics have refuted their own argument by making as a criterion of the division of this narrative into J and E the very want of definite scheme which is, according to them, characteristic of J and E.

The Book of the Covenant (xix.–xxiv.) is a unified piece of work, with logical connections that are admirably established. The alleged double tradition of the revelation, and especially Wellhausen's so-called second Decalogue in ch. xxxiv., are mere figments of the brain. The inadequacy of these criticisms is most striking in the review of the account of the Tabernacle, in the sequence of the passages xxv.–xxxi. and xxxv.–xl. and their connection with xxxii.–xxxiv. (5) The theory that the book was compiled from previous works is not sufficiently supported; and the attempt to analyze it into its component parts is a hopeless one, for all the elements of the book are closely welded together into one harmonious whole. Compare Deuteronomy.

EXOGAMY. See Marriage.

EXORCISM: The expulsion of evil spirits by spells; in Greek ἐκβάλλειν (Matt. viii. 16, 31; ix. 34, 38; Mark i. 34, 38; ix. 38; Luke xiii. 32; and elsewhere). See Demonology; and compare the sorcery-papyrus in Paris, line 1257, *εκβαλειν τον διαβολον* and *διαβολον εκβαλλουσα*. In Hebrew only **צא** = "go out" occurs (Me'i. 17b; 'Ab. Zarah 55b; Greek ἐξῆλθε). The demon was cast out by exorcism, for which the Greek term ἐξορκίζω (from ἐξορκόω, ἐξορκιστής, only Acts xix. 13) and the Hebrew השביע are used. In the Bible the melancholia of King Saul is ascribed to an evil spirit, which David, by his harp-playing, drives away. The word "bi'et" (terrify) was still used in the fourth century of our era as a term to express the troubled state which precedes that of being possessed (I Sam. xvi. 14–23; compare Meg. 3a, bottom). The angel Raphael teaches Tobit how to ban the evil spirit (Tobit vi. 7, 16, 17; viii. 3; see TOBIT and TESTAMENT OF SOLOMON).

Josephus ("Ant." viii. 2, § 5) relates:

> "I have seen a certain man of my own country, whose name was Eleazar, releasing people that were demoniacal, in the presence of Vespasian and his sons and his captains and the whole multitude of his soldiers. The manner of the cure was this: He put a ring that had a root of one of those sorts mentioned by Solomon to the nostrils of the demoniac, after which he drew out the demon through his nostrils; and when the man fell down, immediately he abjured him to return into him no more, still making mention of Solomon, and reciting the incantations which he composed. And when Eleazar would persuade and demonstrate to the spectators that he had such a power, he set a little way off a cup or basin full of water, and commanded the demon, as he went out of the man, to overturn it, and thereby let the spectators know that he had left the man; and when this was done the skill and wisdom of Solomon were shown very manifestly." See BA'ARAS.

Exorcism in Rabbinical Literature.

Rabbi Johanan ben Zakkai, a contemporary of Josephus, alludes to the practise of exorcism by saying: "Has an evil spirit never entered into you? Have you never seen a person into whom an evil spirit had entered? What should be done with one so affected? Take roots of herbs, burn them under him, and surround him with water, whereupon the spirit will flee" (Pesiḳ., ed. Buber, 40a). R. Akiba (d. 132), in speaking of diseases, uses the technical terms of exorcism ('Ab. Zarah 55b). Simon ben Yoḥai drove out the demon BEN TEMALION from the daughter of a Roman emperor (Me'i. 17b).

Jewish Christianity.

According to the statements in the Talmud, cures by exorcism were especially common in Judæo-Christian circles. Mention is several times made of a certain Jacob of Sekanya (see JACOB THE GNOSTIC), who desired to cure in the name of Jesus one who had been bitten by a snake; R. Ishmael, however, would not permit it, preferring rather to let his sister's son die (Tosef., Ḥul. ii. 22). Origen says ("Contra Celsum," iii. 24) that he saw people cured of dangerous diseases—of possession, madness, and other ills—simply by calling on the names of God and Jesus, and that otherwise neither men nor demons could cure them. Christianity has preserved this belief up to the present day, for exorcism still forms a part of the rite of baptism (Herzog-Hauck, "Real-Encyc." v. 695–700; Hastings, "Dict. Bible," i. 811 *et seq.*; Winer, "B. R." i. 161–165; Acts xix. 13–16).

Sorcery Papyri.

An interesting recipe is given in a Greek papyrus (see Dietrich, "Abraxas," pp. 138 *et seq.*). In order to drive out a demon one must take an unripe olive, together with certain plants, and murmur some magic words over them, among the words used being *ιαω*, the Greek equivalent of the Hebraic Tetragrammaton. The exorcist says: "Go out ['demon'] from ——." Thereupon a phylactery is made from a piece of tin and is hung from the neck of the one possessed. The exorcist places himself in front of the possessed one and begins as follows: "I conjure thee in the name of the God of the Hebrews, Jesus, Jahaia," etc. The spirit is then conjured by a god, whose epithets are taken chiefly from the Bible. A shorter but similar exorcism is found in the same papyrus (lines 1225 *et seq.*). Compare also the Babylonian exorcisms cited in Wohlstein's "Dämonenbeschwörungen auf Babylonischen Thongefässen des Königlichen Museums in Berlin" (Berlin, 1894), and in Stübe's "Jüdisch-Babylonische Zaubertexte" (Halle, 1895).

Mysticism existed in all ages as an undercurrent, but in the thirteenth and following centuries it came to the surface. While in Spain, southern France, and Italy wide circles were opposing superstition and exorcism (see Jacob Anatoli, "Malmad," pp. 68a, 184a, Lyck, 1866), German Judaism, saturated with ignorance and mysticism, adopted with other superstitious customs the exorcistic method of working cures. The "Book of the Pious" (§ 462) states: "Whoever wishes to cure one possessed must repeat the magic formula nine times, as is done in Germany, where they count nine knots; or else he must cure him with rods of nine kinds of wood, or with turnips, which should be hung around the invalid" (Güdemann, "Geschichte des Erziehungswesens und der Cultur," i. 202, 205, 216).

At the close of the Middle Ages, and even in the first centuries of the modern era, the Cabala obtained more and more influence over people's minds, and as a consequence the belief in exorcism increased. In the "Zera' Ḳodesh" (Fürth, 1696) a regular method for driving out demons is cited; this superstition still exists in Ḥasidic circles, just as it prevails among civilized Arians and Semites. It is a noteworthy fact that a Hebrew proselyte in olden times was not exorcised at baptism (Herzog-Hauck, *l.c.* v. 696). Curtiss relates ("Primitive Semitic Religion of To-day," p. 152) that a few years ago a woman was exorcised in Palestine, and that the evil spirit when questioned replied that he was the spirit of a Jew murdered in Nablus twelve years before. The belief that the possessing spirit is often the soul of a wicked or a murdered person unable to find rest is frequently held.

K. L. B.

EXPECTATION OF LIFE: The expected duration of life after any given age, estimated according to fixed tables of mortality based on the mean number of years which individuals, under various conditions, have been found to live. The earliest important contribution to the subject is the work (1855) of De Neufville on the mortality of Frankfort-on-the-Main during the three years 1846–1848, derived from a total mortality of 3,213 among

Christians and 263 among Jews. A more recent investigation was published as part of the census of 1890, entitled "Vital Statistics of the Jews in the United States," being the partial results of a special inquiry, made under the direction of Dr. John S. Billings, formerly assistant surgeon-general of the United States and an authority on hygiene, of about 10,000 Jewish families in the United States. Both investigations fall short of the necessary degree of scientific accuracy with which such tables of mortality and life-expectancy are prepared for life-insurance purposes. Their value is impaired by the fact that the method adopted for the calculation of the tables was not stated.

De Neufville's tables have found their way into almost every treatise on the comparative mortality of Jews and Christians. His tables, excepting No. 15, where the numbers of those surviving to different ages are shown in a comparison between the Christian and Jewish populations, are mostly limited to a percentage statement of deaths at different periods of life. Table No. 15, which is as follows, must not be confused with a table showing the expected afterlifetime:

CALCULATION, AT EQUAL AGES, OF THE NUMBER OF CHRISTIANS AND JEWS, OUT OF 1,000 OF EACH BORN, SURVIVING TO SPECIFIED AGES (1846–48).

Ages Attained.	Christians.	Jews.	Ages Attained.	Christians.	Jews.
10........	736	867	50........	351	540
20........	691	827	60........	248	441
30........	567	734	70........	134	274
40	461	639	80........	37	69
			90........	2	4

This table leads to the conclusion that the expectation of life was much more favorable for the Jewish population of Frankfort at that period than for the Christian. While in the main the conclusions of De Neufville fairly coincide with general observations derived from mortality tables, they do not warrant the extravagant opinions usually based upon his tables. His general conclusions, derived from a percentage distribution of deaths at different ages, are inaccurate and misleading. The method adopted by him was crude and defective in theory, and therefore the value of this contribution to the literature of Jewish longevity is materially impaired. Census Bulletin No. 19, references to which are found in nearly all recent works on Jewish pathology and longevity, is open to criticisms similar to those directed against De Neufville's work. The same fundamental error was committed in not stating in detail the method adopted for the calculation of the life-tables, (1) for the year 1889, (2) for the five years 1885–89. The essential facts as derived from the bulletin are set forth in the above table for the year 1889, which gives evidence of greater accuracy than the table based upon five years of observation.

TABLE SHOWING THE NUMBERS OF JEWS, OUT OF 100,000 BORN, SURVIVING TO GIVEN AGES, COMPARED WITH THE CORRESPONDING NUMBERS OF NON-JEWISH INHABITANTS OF MASSACHUSETTS.

Ages.	Jews—1889.		Non-Jews in Massachusetts (1878–82).	
	Male.	Female.	Male.	Female.
0..........	50,684	49,316	51,253	48,747
5..........	41,731	42,326	36,727	36,361
15..........	39,849	40,829	34,543	34,121
25..........	38,592	39,698	32,023	31,290
35..........	37,314	36,451	29,208	28,171
45..........	35,474	33,563	26,239	25,244
55..........	33,788	30,613	22,668	22,114
65..........	29,188	26,405	17,585	17,740
75..........	21,836	14,742	10,168	11,243
85..........	13,391	7,492	2,951	3,950
95..........	108	468	185	358

The expectation of life for these Jews as compared with the expectation for other populations is set forth in Table No. 9 of the bulletin, which, in a reconstructed form, is given below. Comparison is made of the expectation of life among Jews with that of the general population of Massachusetts and New South Wales, two exceptionally healthful regions representing conditions rather above the average.

EXPECTATION OF YEARS OF LIFE.

Ages.	Males.			Females.		
	Jews U. S. 1889.	Mass. 1893–97.	New South Wales, 1890–91.	Jews U. S. 1889.	Mass. 1893–97.	New South Wales, 1890–91.

90..........	....	3.16	2.54	3.05	3.73	2.64
95..........	....	2.22	....	2.50	2.60	....

The table for 1889 may be accepted as approximately accurate. The cumulative effect of superior longevity must necessarily be quite considerable, and the relative increase in the Jewish population must therefore be much larger than the increase in the general population. In marked contrast to the general experience, this table shows that male Jews are likely to live longer than female Jews. On the whole these tables are approximate indications of superior vitality and resulting longevity among the Jewish population. More definite evidence is furnished by comparative mortality rates, in particular by the data published for Budapest under the direction of Dr. Joseph Körösi. The insurance associations of the Jews in the United States have never made known the results of their experience, but the published data as to average ages at death, average duration of membership, mortuary cost, death rate, etc., support the conclusion that the Jews in this country, as well as abroad, enjoy a longevity superior to that of the Christian population.

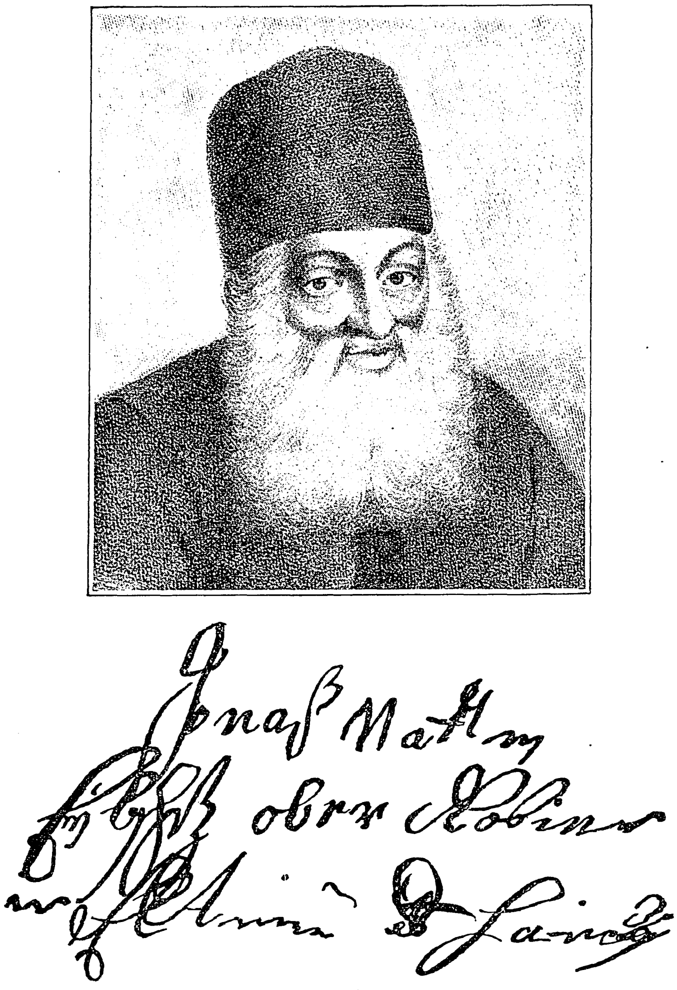
EXPRESSION. See Types.

EYBESCHÜTZ (or **EYBESCHITZ**), **JONATHAN**: German rabbi and Talmudist; born in Cracow about the year 1690; died in Altona Sept. 18, 1764. His father, Nathan (Nata), who was a grandson of the cabalistic author Nathan Spira, was called as rabbi to Eibenschitz, Moravia, about 1700, where he died about 1702 in early manhood (on the conflicting reports in regard to the date of his death see Dembitzer, "Kelilat Yofi," pp. 118 *et seq.*, Cracow, 1888). Jonathan was then sent to the yeshibah of Meïr Eisenstadt, who was then rabbi of Prossnitz, and later to the yeshibah of Holleschau, where a relative, Eliezer ha-Levi Oettingen, was rabbi. After the latter's death (1710) Eybeschütz went to Vienna, where Samson Wertheimer intended to marry him to his daughter. He thence went to Prague, where he married Elkele, daughter of Rabbi Isaac Spira; and later on he resided two years at Hamburg in the house of Mordecai ha-Kohen, his wife's maternal grandfather. About 1714 he returned to Prague, where he became preacher, probably in succession to Asher Spira, who died in that year (Hock, "Die Familien Prags," p. 381, Presburg, 1892). Here he soon became popular (see Nehemiah Reischer's letter to Jacob Emden, in the latter's "Sefat Emet," p. 11b, Lemberg, 1877); but he also incurred the enmity of some of the family and admirers of the former rabbi, Abraham Broda ("Bene Ahubah," 15b; see Dembitzer, *ib.* p. 120a), among them being Jacob Reischer, and David Oppenheimer, chief rabbi of Prague. These personal animosities were most likely responsible for the fact that about 1725 Jonathan was accused of sympathy with the followers of Shabbethai Ẓebi, who were still very active. Jonathan took an oath that the accusation was false, and with the other members of the Prague rabbinate signed the excommunication of the followers of Shabbethai Ẓebi.



Jonathan Eybeschütz (with Autograph).

(After a portrait by Gutekunst.)

Believing that his prospects in Prague were poor, he made an effort, upon the death of Jacob Reischer (1733), to secure the rabbinate of Metz. On this occasion he failed, but after Jacob Joshua, who had succeeded Reischer, had gone to Frankfort-on-the-Main, Eybeschütz again became a candidate, and was elected (1741). But in Metz, as in Prague, his congregation divided into enthusiastic admirers and bitter enemies. When in 1746 he was elected rabbi by the congregation of Fürth, the Metz congregation would not release him from his contract. In 1750 he became chief rabbi of Altona, Hamburg, and Wandsbeck.

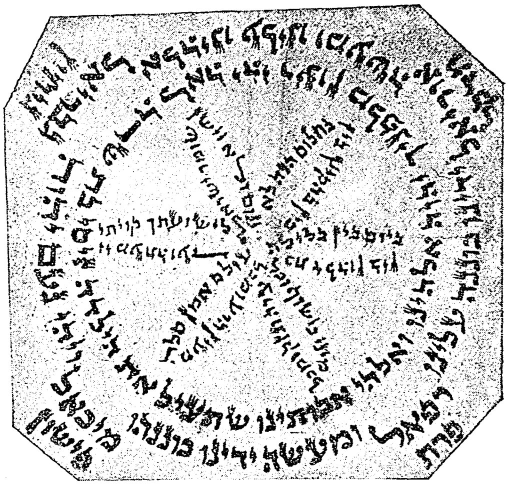
From that time he became a central figure in Jewish history. Shortly after his arrival in Altona a rumor began to spread that he still believed in the Messianic mission of Shabbethai Ẓebi. In substantiation of this charge a number of "ḳeme'ot" (see Amulet) were produced which, it was alleged, he had given to sick people in Metz and Altona, and the text of which, though partly in cipher, admitted of no other explanation than that given by his enemies. The inscription read substantially as follows: "In the name of Jahve, the God of Israel, who dwelleth in the beauty of His strength, the God of His anointed one Shabbethai Ẓebi, who with the breath of His lips shall slay the wicked, I decree and command that no evil spirit plague, or accident harm, the bearer of this amulet" (Emden, "Sefat Emet," beginning). These amulets were brought to Jacob Emden, who claimed to have been ignorant of the accusations, although they had been for several months the gossip of the congregation. In his private synagogue, which was in his house, he declared that while he did not accuse the chief rabbi of this heresy, the writer of these amulets was evidently a believer in Shabbethai Ẓebi (Feb. 4, 1751). The trustees of the congregation, who sided with their rabbi, at once gave orders to close Jacob Emden's synagogue. Emden wrote to his brother-in-law, Aryeh Löb, chief rabbi of Amsterdam, and to various rabbis who were outspoken enemies of Eybeschütz, among them Jacob Joshua of Frankfort, Samuel Helman (Eybeschütz's successor in Metz), and Nehemiah Reischer, rabbi of Kriechingen in Lorraine, formerly Eybeschütz's admirer, but now his bitterest enemy. All of these pronounced Eybeschütz a dangerous heretic, unfit to hold any rabbinical office.

The Dispute About Amulets.

However, the trustees of the Altona congregation declared Emden a disturber of the peace, against whom drastic measures should be taken; and the followers of Eybeschütz assumed such a threatening attitude that Emden was compelled to flee to Amsterdam (May 22, 1751). There he brought charges against his enemies before the Danish courts, with the result that the congregation of Altona was ordered to stop all proceedings against him. In Hamburg the conflict assumed such proportions that the Senate issued strong orders to make an end of the troubles, which were disturbing the public peace (May 1, 1752, and Aug. 10, 1753; see "Allg. Zeit. des Jud." 1858, pp. 520 *et seq.*). Emden returned to Altona Aug. 3, 1752; and in December of the same year the courts ordered that nothing should be published concerning the amulets. Meanwhile Eybeschütz's popularity had waned; the Senate of Hamburg suspended him, and many members of that congregation demanded that he should submit his case to rabbinical authorities. "Kurze Nachricht von dem Falschen Messias Sabbathai Zebhi," etc. (Wolfenbüttel, 1752), by Moses Gershon ha-Kohen (Carl Anton), a convert to Christianity, but a former disciple of Eybeschütz, was evidently an inspired apology. Emden and his followers, in spite of the royal edict, published a number of polemical pamphlets, and Eybeschütz answered in his "Luḥot 'Edut" (1755), which consists of a long introduction by himself, and a number of letters by his admirers denouncing as slanders the accusations brought against him.

His friends, however, were most numerous in Poland, and the Council of Four Lands excommunicated all those who said anything derogatory to the rabbi. A year after the publication of the "Luḥot 'Edut" he was recognized by the King of Denmark and the Senate of Hamburg as chief rabbi of the united congregations of Hamburg-Altona-Wandsbeck. From that time on, respected and beloved, he lived in peace. His enemy Emden testifies to the sincere grief of the congregation at the death of Eybeschütz ("Megillat Sefer," p. 208). Even the notorious extravagances and the subsequent failure in business of his youngest son, Wolf, seem not to have affected the high esteem in which the father was held.

Eybeschütz's memory was revered not only by his disciples, some of whom, like Meshullam Zalman ha-Kohen, rabbi of Fürth, became prominent rabbis and authors, but also by those who were not under personal obligations to him, such as Mordecai Benet, who speaks in the most enthusiastic terms of him in his approbation to the "Bene Ahubah," and Moses Sofer, who tries to defend him in a case where he committed a very bad blunder (Ḥatam Sofer, Yoreh De'ah, No. 69). With regard to Eybeschütz's actual attitude toward the Shabbethai Ẓebi heresy, it is difficult to say how far the suspicions of his enemies were justified. On the one hand it can not be denied that the amulets which he wrote contain expressions suggestive of belief in the Messiahship of Shabbethai Ẓebi; but on the other hand it is strange that the accusations came only from jealous enemies. Jacob Emden himself speaks of a rumor to the effect that even before Eybeschütz went to Altona he (Emden) had expressed himself in terms which showed a determination to persecute the successor of his father in the office of chief rabbi ("Megillat Sefer," p. 176); and although he indignantly denies this rumor, he speaks in another place of the chief rabbinate of Altona as "the heritage of my fathers" (*ib.* p. 209).



Amulet Prepared by Jonathan Eybeschütz.
(In the collection of Albert Wolf, Dresden.)

Eybeschütz's works, given in the order of their publication, are as follows:

1755. Luḥot 'Edut. Altona.
1765. Kereti u-Peleti, novellæ on Shulḥan 'Aruk, Yoreh De'ah. Altona.
Taryag Miẓwot, the 613 commandments in rimed acrostics. Prague.
1773. Tif'eret Yisrael, notes on the rabbinical laws regarding menstruation, with additions by the editor, Israel, grandson of the author and rabbi of Lichtenstadt.
1775. Urim we-Tummim, novellæ to Shulḥan 'Aruk, Ḥoshen Mishpaṭ. Carlsruhe.
1779–82. Ya'arot Debash, sermons, edited by his nephew Jacob ben Judah Löb of Wojslaw. Carlsruhe.
1796. Binah la-'Ittim, notes on the section of the "Yad" dealing

with the holy days, edited by the author's disciple Hillel of Stampfen. Vienna.

1799. Ḥiddushim 'al Hilkot Yom-Ṭob, edited by Joseph of Troppau. It is in substance the same as the last-named work, but differs from it in wording, and contains in addition Maimonides' text. Both therefore present not a work of the author, but notes taken from his lectures. Berlin.

1817. Sar ha-Alef, novellæ on Shulḥan 'Aruk, Oraḥ Ḥayyim. Warsaw.

1819. Bene Ahubah, on the matrimonial laws in the "Yad," edited by his grandson Gabriel Eybeschütz. Prague.

1825. Tif'eret Yehonatan, homilies on the Pentateuch (n.d., though 1825 is probably correct). Zolkiev.

1862. Perush 'al Piska Ḥad Gadya, a homiletical interpretation of the "Ḥad Gadya." Lemberg.

1869. Notes on the Haggadah, edited by Moses Zaloshin. Presburg.

1891. Shem 'Olam, letters on the Cabala, edited by A. S. Weissmann. Vienna.

A commentary on Lamentations under the title "Allon Bakut," and homilies on the Pentateuch under the title "Ḳeshet Yehonatan," are extant in manuscript in the Bodleian Library (Neubauer, "Cat. Bodl. Hebr. MSS." pp. 50 *et seq.*).

S. S. D.

EYE (עַיִן).—Biblical Data: This important organ is mentioned more than 800 times in the Bible, but is described only in its external appearance and significance, according to the experience of daily life. The following parts are mentioned: the eyeball ("bat 'ayin" = "girl of the eye," "little doll"; Lam. ii. 18; "babat 'ayin," Zech. ii. 12; comp. Levy, "Chal. Wörterb." i. 419b); the pupil ("ishon" = "little man," whose image appears in the eye as in a mirror; Deut. xxxii. 10; Ps. xvii. 8; Prov. vii. 2; comp. Prov. vii. 9, xx. 20); the eye-socket ("ḥor"; Zech. xiv. 2); the eyelashes ("'ap'appayim"; Ps. xi. 4; Prov. vi. 25; by synecdoche = "the eye"; comp. Job xli. 10); the eyelids ("shemurot"; Ps. lxxvii. 5), and the eyebrows ("gabbot 'enaw"; Lev. xiv. 9).

The eye of the Oriental is not only large, but it is also very strong. It appears from Gen. xxix. 17 that weak eyes were an exception. Near-sightedness, far-sightedness, and weak-sightedness are not mentioned. The eye became weak, heavy, or fixed in old age (Gen. xxvii. i.; Deut. xxxiv. 10, I Sam. iv. 15; compare also Eccl. xii. 3). The sight was also impaired by sorrow and misfortune (Ps. vi. 8, xxxi. 10, lxxxviii. 10; Job xvii. 7). The eye is the source of tears (Jer. viii. 23); and tears flowed often and copiously (Lam. i. 16; iii. 48, 49; Ps. cxix. 136), injuring and even ruining the eyes (Lam. ii. 11, iii. 51; I Sam. ii. 33; Jer. xiv. 6). Sorrow dims and obscures the eyes (Lev. xxvi. 16; Deut. xxviii. 32, 65; Job xxxi. 16; Lam. v. 17); while under favorable circumstances they light up (I Sam. xiv. 27, 29). The eye is said to be affected by emotions in general (Ps. lxix. 4; cxix. 82, 132). The fat eye of persons addicted to high living protrudes (Ps. lxxiii. 7); much drinking of wine makes the eye deep red (Gen. xlix. 12; Prov. xxiii. 29). The son closed the eyes of his dead parent (Gen. xlvi. 4).

Diseases and Care of the Eye.

How far blindness—very frequent in antiquity—prevailed in ancient Israel can not be determined from the references found in the Bible. Blind persons are spoken of comparatively seldom (see JEW. ENCYC. iii. 248, *s.v.* BLIND, THE). If a priest became blind or had a spot on his eye ("teballul be-'eno"; Lev. xxi. 20), he was not allowed to officiate at the sacrifice. Diseases of the eye were not recognized as such, since the oculist's art was not at all developed among any ancient people except the Egyptians; hence nothing has been transmitted on this point, and the nature of the diseases mentioned can not be definitely determined. The reference to the "shut" eyes (Isa. xliv. 18) indicates that an inflammation of the eyes is generally meant; and the same may be assumed from the expressions used to denote "opening the eyes" (Isa. xlii. 7, xxix. 19, xxxv. 5; comp. *ib.* xliii. 8; Num. xxii. 31; Ps. cxix. 18). The original inhabitants of Palestine are called figuratively "pricks" and "thorns" in the eyes (Num. xxxiii. 55; Josh. xxiii. 13). In regard to the care of the eyes, it is said that smoke injures them (Prov. x. 26). Women used a cosmetic for the eye consisting of a mixture of plumbagin and zinc, which they applied to the inner surface of the eyelids in such a way as to produce a narrow black rim, making the eyes appear larger (II Kings ix. 30; Jer. iv. 30; Isa. liv. 11; Ezek. xxiii. 40).

Blinding as a Punishment.

The barbaric custom of putting out the eyes was practised quite frequently. Samson was blinded by the Philistines, and King Zedekiah by the Babylonians (Judges xvi. 21; II Kings xxv. 7; Jer. xxxix. 7, lii. 11). The Ammonites consented to make peace with the inhabitants of Jabesh only on condition that all of them would submit to having their right eyes "thrust out" (I Sam. xi. 2). The "lex talionis" is expressed by the phrase "eye for eye" (Ex. xxi. 24; Lev. xxiv. 20; Deut. xix. 21; comp. Ex. xxi. 26). The custom of putting out the eyes was so widely spread that it became a figurative term for deceiving (Num. xvi. 14).

Emotional Significance of the Eye.

The ancient Israelites had very expressive eyes. Desire, love, hatred, pride, etc., were all expressed in the eye; and in the Hebrew language are found separate terms for all modes of seeing and not seeing (Gen. iii. 6; Num. xv. 39; I Kings ix. 3; II Chron. xvi. 9; Job x. 4, xv. 2, xvi. 9, xxxi. 7, xxxix. 29; Ps. x. 8, xxxv. 19; Prov. vi. 13, x. 10, xxiii. 5, xxviii. 27, xxx. 13; Eccl. ii. 10; Cant. iv. 9; Ecclus. [Sirach] xxvi. 29, xxvii. 22; Isa. iii. 16, vi. 10; Ezek. vi. 9, xxii. 26; God's eye, Ps. xciv. 9). According to Ecclus. (Sirach) xxiii. 19, God's eye is 10,000 times brighter than the sun. Good will and malevolence are mirrored in the eye (Prov. xxii. 9, xxiii. 6; I Sam. xviii. 9; Deut. xv. 9; xxviii. 54, 56). The raising of the eyes expressed a wish, as it still does among children (Ps. cxxiii. 1; Isa. xxxviii. 14). "Eye" is often used metaphorically (Ex. x. 5, 15 and Num. xxii. 5 ["the eye (= "face") of the earth"]; Prov. i. 17 ["the eye (= "sight") of any bird"]; Cant. i. 15, iv. 1, v. 12 ["eyes of doves"]; Ezek. i. 4, 7; x. 9 ["like the eye

(= "color") of amber," etc.]; Zech. ix. 1 ["the eyes (= "sight") of all men"]).

E. G. H.

——**In Rabbinical Literature:** Much more was known regarding the anatomy and physiology of the eye during the period of tradition in the centuries immediately preceding and succeeding the beginning of the common era than in Biblical times. The eyeball of man is round, while that of a beast is oblong. It consists of a dark and a white mass separated from each other by a narrow rim. The white part preponderates in the human eye, while the black preponderates in the eyes of beasts. The white is derived from the father; the black, from the mother. The black part is the means of sight. Eyes and eyesight differ in size and strength in various persons. "Persons with large eyes often have a peculiar expression. Heavy eyelids droop. The eyebrows are sometimes close to the eye; sometimes they are so long that they hang far down the face; and again there are no eyebrows at all. The eyelashes also may be heavy or sparse, or there may be none at all. Sometimes the eyes are very deeply set, a formation that may be regarded as a bodily defect" (Rosenzweig, "Das Auge in Bibel und Talmud," pp. 12, 19).

Care and Diseases of the Eye.

Pain in the eyes is dangerous, as the sight is connected with the heart ('Ab. Zarah 28b). Some kinds of food are beneficial and others harmful to the sight. Fine bread and old wine are good for the eyes, as well as for the entire body. Rapid walking consumes one five-hundredth part of the sight. Much talking hurts one whose eyes are affected. Dirt is harmful, and many diseases are caused by touching the eyes with unwashed hands. The salt taken from the Dead Sea is especially dangerous. The eyes of the inhabitants of Palmyra twitch because they live in a sandy region (Rosenzweig, *l.c.* pp. 20 *et seq.*). Water is excellent for the eyes. A drop of cold water in the eyes in the morning and washing the hands and feet at night are better than all the eyesalves in the world (Shab. 78a, 108b). Tears contain salt in order that they may not flow unrestrictedly in sorrow and distress, which would be very injurious. Tears produced by smoke or weeping injure the eye, while those that are produced by laughter or incense are beneficial. A collyrium made of stibium or antimony is often mentioned (comp. Levy, "Neuhebr. Wörterb." *s.v.* קלורית, סקר, כחל). This salve was forbidden when made by the heathen (Niddah 55b; Yer. 'Ab. Zarah 40d). The veil of the Arabian Jewish women left the eyes exposed (Shab. 65a; Yer. Shab. 7b). Several diseases of the eye are mentioned, but they can not be definitely identified. Professional and popular therapeutics are found side by side. Either Galen influenced the rabbinical physicians, or both he and they drew from the same source (see MEDICINE). Artificial eyes made of gold are mentioned (Yer. Ned. 41c; comp. Yer. Sanh. 13c).

With the rise of Arabian culture the art of medicine was more highly developed, and physicians acquired a scientific knowledge of the eye, although this was not advanced beyond the point reached by Galen, either by the Arabian or the Jewish physicians, or by Christian practitioners, down to the eighteenth century. The general history of medicine, therefore, presents also the theories of the Jewish physicians regarding the eye. For the history of the sense of sight as recorded by the Jewish philosophers, exegetes, and other non-medical writers of the Middle Ages, see D. Kaufmann's exhaustive monograph, "Die Sinne," in "Jahresbericht der Landes-Rabbinerschule," Budapest, 1884.

S. S. L. B.

——**Color:** The color of the eyes is an important racial trait. The various colors are due to the amount of pigmentation, and can be reduced to three; viz., fair (blue, gray), dark (black, brown), and intermediate (green, yellow, etc.).

The Jews have usually black or brown eyes. The appended table (No. 1) shows the colors of the eyes of 147,375 school-children in various countries:

TABLE NO. 1.

Country.	Number.	Percentage.			Observer.
		Blue.	Brown.	Gray.	
Germany.....	74,146	19.63	52.88	27.49	Virchow.
Austria.......	59,808	23.5	45.9	30.6	Schimmer.
Hungary.....	3,141	18.3	57.5	24.2	Körösi.
Bavaria......	7,054	20.0	49.0	31.0	Mayr.
Württemberg	1,995	20.0	52.0	28.0	Frass.

Observations on children must, however, be taken with reserve, because their eyes grow darker when they reach maturity. The appended table (No. 2), showing the colors of the eyes in more than 7,000 Jews, brings out this point clearly:

TABLE NO. 2.

Country.	No.	Percentage.			Observer.
		Brown.	Gray.	Blue.

Poland.......	125	62.4	13.6	24.0	Elkind.

It will be observed that the frequency of light, particularly blue, eyes among Jews reaches 25 per cent in some series (Ammon, Beddoe, Fishberg, Weissenberg). Some anthropologists claim that this trait points to intermixture of foreign, non-Semitic blood, especially Aryan. In support of this view it is shown that in those countries where light-colored eyes are frequent among the indigenous population the Jews also show a larger percentage of blue and of gray eyes. This can be seen in Table No. 2. In Baden over 50 per cent of Jewish recruits have blue or gray eyes; in Russia the percentage is less; while in Caucasia, where the native races have dark eyes, the Jews show 84.31 per cent of dark eyes. The English Sephardim show even a higher percentage of blue eyes than the Ashkenazim.

An important phenomenon in connection with the eyes of Jews is the variation of color according to sex. It appears from the figures in Table No. 2 that the eyes of Jewesses are darker than those of Jews. Joseph Jacobs sees in this a comparatively small variability of type among Jewesses as compared with Jews ("Racial Characteristics of Modern Jews," in "Jour. Anthropological Institute," 1885, v.).

The Jew's Eye.

The appearance and form of the Jewish eye have attracted much attention. It is stated that a Jew may be recognized by the appearance of his eyes even when his features as a whole are not peculiarly Jewish. Ripley ("Races of Europe," p. 396) gives this description: "The eyebrows, seemingly thick because of their darkness, appear nearer together than usual, arching smoothly into the lines of the nose. The lids are rather full, the eyes large, dark, and brilliant. A general impression of heaviness is apt to be given. In favorable cases this imparts a dreamy, melancholy, or thoughtful expression to the countenance; in others it degenerates into a blinking, drowsy type; or again, with eyes half-closed, it may suggest suppressed cunning." Similar descriptions of the Jewish eye are given by Leroy-Beaulieu ("Israel Among the Nations," p. 113) and also Jacobs (JEW. ENCYC. i. 620a, *s.v.* ANTHROPOLOGY).

——**Color-Blindness:** Inability to distinguish colors may be the result of disease or of injury, or it may be congenital.

Among Jews the defect is known to be extremely frequent, as is shown very clearly by the first table following, taken from Jacobs.

In a later communication Jacobs gives his own investigations on the subject ("On the Comparative Anthropometry of English Jews," in "Jour. Anthropological Institute," xix. 76-88), which show a yet larger proportion of color-blindness among English Jews:

No.	Place.	Jews.	Others.	Authority.
814....	Breslau	4.1	2.1	Cohn, in "Centralbl. für Augenheilkunde," 1873, p.97.
949....	London (boys)	4.9	3.5	"Tr. Ophthalmological Soc." i. 198.
730....	" (girls)	3.1	0.4	
500....	Frankfort	1.8	2.9	Carl, "Untersuchungen," 1881.
500....	Italy (boys)	2.9	2.7	Ottolenghi, "Gaz. Cliniche," 1883.
420....	" (girls)	0.0	...	*Idem*, in "Vessillo Israelitico," Sept., 1884.

	East End.	West End.	All.	Sephardim.
Jews.............	14.8	3.4	12.7	13.4
Jewesses..........	....	2.1	2.0	0.0

The average percentage of color-blindness among Jews examined by Cohn, Carl, Ottolenghi, and others, is about 4 per cent. Among the English Jews Jacobs has found that it is more than three times as large as this. These investigations confirm the general observations that color-blindness is more frequent in men than in women (Havelock Ellis, "Man and Woman," pp. 138-145). They also show that the East End (London) Jews, who are poorer, have a larger percentage of color-blindness than their wealthier brethren of the West End.

Jacobs attributes color-blindness to the fact that the Jews are town-dwellers, where comparatively so little color, and especially so little green, is to be met with.

To this high proportion of color-blindness he also attributes "the absence of any painters of great ability among Jews, and the want of taste shown by Jewesses of the lower grades of society," which manifests itself in the preference for bright primary colors for wearing-apparel.

It must also be remembered that in the main the Jews in almost every country are poor. They are consequently the class of people which is most predisposed to color-blindness. In the "Report" of the Committee on Color-Blindness appointed by the Ophthalmological Society of London it is stated that the reason for the high percentage of color-blindness found among the Jews lies in the fact that those of them who were examined were principally of the poorer class.

——**Defective Vision:** Jacobs and Spielman in their investigations on the comparative anthropometry of English Jews ("Jour. Anthropological Institute," 1889, p. 79) showed that London Jews could read a test-type at a distance of only 19 inches as against 25 inches by other Londoners; Jewesses were not so markedly inferior, 23 inches as against 24 inches. On the other hand, the better-nurtured Jews had a range of 29 inches.

Botwinnick reports his observations on 829 Jews and 2,763 Christians in Russia. Of the Christians

2.21 per cent were affected with near-sightedness, while about 4½ times as many Jews—9.88 per cent—were thus affected. The same observer shows that cases of myopia of a high degree (technically known as "10D") are more frequent among Jews than among non-Jews. His investigations in the Jewish schools in St. Petersburg revealed the fact that among Jewish school-children 16.7 per cent (16.5 per cent in boys and 16.8 per cent in girls) suffered from near-sightedness, as against 2 to 7.5 per cent in Christian children. Beginning with the twelfth year of life, when 18.2 per cent were affected with myopia, the percentage rose, nearly one-half of all the Jewish children from 16 to 18 years of age being near-sighted.

Astigmatism is also very frequent among Jews. Javal and Wecker have shown that it is of a peculiar kind. The horizontal meridian of the cornea presents the maximum of curvature. This is contrary to the rule, the maximum of curvature being usually perpendicular (Wecker, "Sur l'Astigmatisme dans Ses Rapports avec la Conformation des Os du Crâne," in "Bulletin de la Société d'Anthropologie," June 15, 1869, pp. 545–547).

Botwinnick attributes the near-sightedness of the Jews to hereditary predisposition to weakness of the organ of sight. But this does not by any means explain the problem. The fact that the Jews are town-dwellers must not be overlooked. Besides this, the Jews are a nation of students.

Bibliography: Joseph Jacobs and I. Spielman, *On the Comparative Anthropometry of English Jews*, in *Jour. Anthropological Institute*, xix. 76–88; N. R. Botwinnick, *Materiali k Voprosu o Blisorukosti u. Evreev*, in *Vratch*, 1899, No. 42.

——**Pathology:** Jews are known to be great sufferers from diseases of the eyes. The most frequent of these appears to be **trachoma** or **granular conjunctivitis.** Pilz ("Augenheilkunde," 1859) was the first to direct attention to this fact. In the city of New York the board of health recently (1903) investigated the frequency of trachoma among school-children. The results show that the disease was very prevalent in schools where the majority of the pupils were Jewish.

Glaucoma is another disease of the eyes prevalent among Jews. The characteristics of this disease are steadily increasing hardness of the globe of the eye, with pressure and cupping of the optic nerve; and forward pressure of the iris and dilation of pupil. It is very injurious to the eyesight.

As a result of these diseases blindness is very frequent among Jews (see Jew. Encyc. iii. 249, *s.v.* Blindness).

The most important sequela of trachoma is **entropion,** which consists in a distressing distortion of the lid-borders, due to the formation of contracting scar-tissue, which causes misdirection of the eyelashes, so that they turn against the globe. This condition is frequent among the Jews of eastern Europe, Egypt, and Palestine, who are huddled together in unhealthful dwellings and live under the worst conditions of poverty and misery.

Hervé states that lacrimal tumors are very frequent among Jews. He attributes this to an anatomical peculiarity, the narrowness of the nasal canal among Jews ("Bulletin de la Société d'Anthropologie," Dec. 20, 1883, p. 915).

Of the other diseases of the eyes frequent among Jews may be mentioned **simple conjunctivitis,** and particularly **blepharitis,** which consists in an inflammation of the lid-borders, with a resulting falling out of the eyelashes. In extreme cases, because of the destruction of the eyelashes and consequent distortion of the eyelids, it proves to be a most unsightly facial blemish. This disease is frequent among the Jews of eastern Europe, Egypt, and Palestine. It can be stated that the conditions predisposing to this disease are identical with those causing trachoma.

J. M. Fi.

EZBAI (אזבי): Father of Naarai, one of David's thirty mighty warriors (I Chron. xi. 37). The parallel list of II Samuel has "Paarai the Arbite" (xxiii. 35) instead of "Naarai the son of Ezbai." Kennicott concluded ("Dissertation," p. 209) that the latter is the correct reading.

E. G. H. M. Sel.

EZBON (אצבון): **1.** Son of Gad, and father of one of the Gadite families (Gen. xlvi. 16). In Num. xxvi. 16 "Ezbon" is replaced by "Ozni" (אזני). **2.** A son of Bela, son of Benjamin (I Chron. vii. 7).

E. G. H. M. Sel.

EZEKIAS: High priest mentioned by Josephus, who relates that among those who accompanied Ptolemy to Egypt after the battle of Gaza (320 B.C.) was Ezekias, then sixty-six years of age, a man skilled in oratory and in affairs of government. He is said to have become acquainted with Hekatæus, and to have explained to him and to some other friends the differences between the peoples whose homes and constitutions he had noted. The existence of Ezekias is questionable, for Josephus states elsewhere that Jaddua was succeeded by Onias I., who was in turn succeeded by Simeon I., which leaves no room for Ezekias.

G. S. Kr.

EZEKIEL.—Biblical Data: Concerning the life of Ezekiel there are but a few scattered references contained in the book bearing his name. He was the son of Buzi, a priest of Jerusalem (Ezek. i. 3), and consequently a member of the Zadok family. As such he was among the aristocracy whom Nebuchadnezzar (597 B.C.), after the first capture of Jerusalem, carried off to be exiles in Babylonia (II Kings xxiv. 14). Ezekiel therefore reckons the years from the abduction of Jehoiachin (Ezek. i. 2, xxxiii. 21, xl. 1). He lived among a colony of fellow sufferers in or near Tel-abib on the River Chebar (not the River Chaboras), which probably formed an arm of the extensive Babylonian network of canals (iii. 15). Ezekiel was married (xxiv. 16–18), and lived in his own house (iii. 24, viii. 1). On the fifth day of the fourth month in the fifth year of his exile (Tammuz, 592 B.C.), he beheld on the banks of the Chebar the glory of the Lord, who consecrated him as His prophet (i. 1–iii. 13). The latest date in his book is the first day of the first month in the twenty-seventh year of his exile (Nisan, 570); consequently, his prophecies extended over twenty-two years. The elders of the exiles repeatedly visited him to obtain a divine oracle (viii., xiv., xx.). He exerted no permanent influence upon his contemporaries, however, whom he repeatedly calls the "rebellious house" (ii. 5, 6, 8; iii. 9, 26, 27; and elsewhere), complaining that although they flock in great numbers to hear him they regard his discourse as a sort of esthetic amusement, and fail to act in accordance with his words (xxxiii. 30-33). If the enigmatical date, "the thirtieth year" (i. 1), be understood to apply to the age of the prophet—and this view still has the appearance of probability—Ezekiel must have been born exactly at the time of the reform in the ritual introduced by Josiah. Concerning his death nothing is known.

His Influence.

Ezekiel occupies a distinct and unique position among the Hebrew Prophets. He stands midway between two epochs, drawing his conclusions from the one and pointing out the path toward the other. Through the destruction of the city and the Temple, the downfall of the state, and the banishment of the people the natural development of Israel was forcibly interrupted. Prior to these events Israel was a united and homogeneous nation. True, it was characterized by a spirit totally unlike that of any other people; and the consciousness of this difference had ever been present in the best and noblest spirits of Israel. The demands of state and people, however, had to be fulfilled, and to this end the monarchical principle was established. There is undoubtedly an element of truth in the opinion that the human monarchy was antagonistic to the dominion of God, and that the political life of Israel would tend to estrange the nation from its eternal spiritual mission. The prophecy of the pre-exilic period was compelled to take these factors into account, and ever addressed itself either to the people as a nation or to its leaders—king, princes, priests—and sometimes to a distinguished individual, such as Shebna, the minister of the royal house mentioned in Isa xxii. 15-25; so that the opinion arose that the Prophets themselves were merely a sort of statesmen.

With the Exile, monarchy and state were annihilated, and a political and national life was no longer possible. In the absence of a worldly foundation it became necessary to build upon a spiritual one. This mission Ezekiel performed by observing the signs of the time and by deducing his doctrines from them. In conformity with the two parts of his book his personality and his preaching are alike twofold. The events of the past must be explained. If God has permitted His city and His Temple to be destroyed and His people to be led into exile, He has thereby betrayed no sign of impotency or weakness. He Himself has done it, and was compelled to do it, because of the sins of the people of Israel, who misunderstood His nature and His will. Nevertheless, there is no reason to despair; for God does not desire the death of the sinner, but his reformation. The Lord will remain the God of Israel, and Israel will remain His people. As soon as Israel recognizes the sovereignty of the Lord and acts accordingly, He will restore the people, in order that they may fulfil their eternal mission and that He may truly dwell in the midst of them. This, however, can not be accomplished until every individual reforms and makes the will of the Lord his law.

The Prophet's Spiritual Mission.

Herein lies that peculiar individualistic tendency of Ezekiel which distinguishes him from all his predecessors. He conceives it as his prophetic mission to strive to reach his brethren and compatriots individually, to follow them, and to win them back to God; and he considers himself personally responsible for every individual soul. Those redeemed were to form the congregation of the new Temple, and to exemplify by their lives the truth of the word that Israel was destined to become a "kingdom of priests" (Ex. xix. 6). Law and worship—these are the two focal points of Ezekiel's hope for the future. The people become a congregation; the nation, a religious fraternity. Political aims and tasks no longer exist; and monarchy and state have become absorbed in the pure dominion of God. Thus Ezekiel has stamped upon post-exilic Judaism its peculiar character; and herein lies his unique religio-historical importance.

His Individualistic Tendency.

Another feature of Ezekiel's personality is the pathological. With no other prophet are vision and ecstasy so prominent; and he repeatedly refers to symptoms of severe maladies, such as paralysis of the limbs and of the tongue (iii. 25 *et seq.*), from which infirmities he is relieved only upon the announcement of the downfall of Jerusalem (xxiv. 27, xxxiii. 22). These statements are to be taken not figuratively, but literally; for God had here purposely ordained that a man subject to physical infirmities should become the pliant instrument of His will.

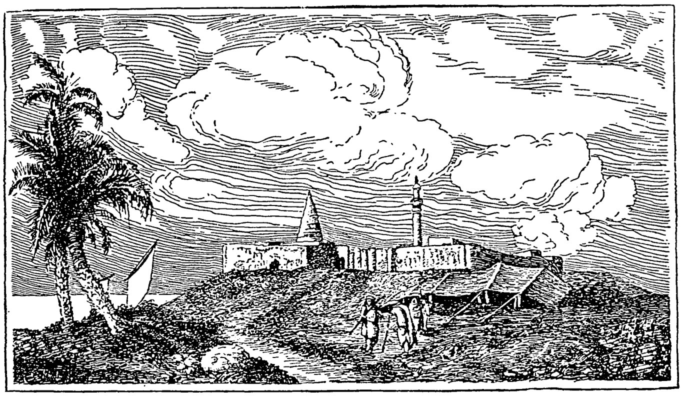
E. G. H. K. H. C.

——**In Rabbinical Literature:** Ezekiel, like Jeremiah, is said to have been a descendant of Joshua by his marriage with the proselyte Rahab (Meg. 14b; Sifre, Num. 78). Some even say that he was the son of Jeremiah, who was also called "Buzi" because he was despised—"buz"—by the Jews (Targ. Yer., quoted by Ḳimḥi on Ezek. i. 3). He was already active as a prophet while in Palestine, and he retained this gift when he was exiled with Jehoiachin and the nobles of the country to Babylon (Josephus, "Ant." x. 6, § 3: "while he was still a boy"; comp. Rashi on Sanh. 92b, above). Had he not begun his career as a prophet in the Holy Land, the spirit of prophecy would not have come upon him in a foreign land (Mek., Bo, i.; Targ. Ezek. i. 3; comp. M. Ḳ. 25a). Therefore the prophet's first prophecy does not form the initial chapter in the Book of Ezekiel, but the second: according to some, it is the third (Mek., Shirah, 7). Although in the beginning of the book he very clearly describes the throne of God, this is not due to the fact that he had seen more than Isaiah, but because the latter was more accustomed to such visions; for the relation of the two prophets is that of a courtier to a peasant, the latter of whom would always describe a royal court more floridly than the former, to whom such things

His Description of God's Throne.

would be familiar (Ḥag. 13b). Ezekiel, like all the other prophets, has beheld only a blurred reflection of the divine majesty, just as a poor mirror reflects objects only imperfectly (Lev. R. i. 14, toward the end). God allowed Ezekiel to behold the throne in order to demonstrate to him that Israel had no reason to be proud of the Temple; for God, who is praised day and night by the hosts of the angels, does not need human offerings and worship (Lev. R. ii. 8; Tanna debe Eliyahu R. vi.).

Three occurrences in the course of Ezekiel's prophetic activity deserve especial mention. It was he whom the three pious men, Hananiah, Mishael, and Azariah, asked for advice as to whether they should resist Nebuchadnezzar's command and choose death by fire rather than worship his idol. At first God revealed to the prophet that they could not hope for a miraculous rescue; whereupon the prophet was greatly grieved, since these three men constituted the remnant of Judah. But after they had left the house of the prophet, fully determined to sacrifice their lives to God, Ezekiel received this revelation: "Thou dost believe indeed that I will abandon them. That shall not happen; but do thou let them carry out their intention according to their pious dictates, and tell them nothing" (Cant. R. vii. 8; comp. Azariah in Rabbinical Literature).



Traditional Tomb of Ezekiel, South of Birs Nimrud.

(After Loftus, "Travels in Chaldea.")

Ezekiel's greatest miracle consisted in his resuscitation of the dead, which is recounted in Ezek. xxxvii. There are different traditions as to the fate of these men, both before and after their resurrection, and as to the time at which it happened. Some say that they were godless people, who in their lifetime had denied the resurrection, and committed other sins; others think they were those Ephraimites who tried to escape from Egypt before Moses and perished in the attempt (comp. Ephraim in Rabbinical Literature). There are still others who maintain that after Nebuchadnezzar had carried the beautiful youths of Judah to Babylon, he had them executed and their bodies mutilated, because their beauty had entranced the Babylonian women, and that it was these youths whom Ezekiel called back to life. The miracle was performed on the same day on which the three men were cast into the fiery furnace; namely, on the Sabbath and the Day of Atonement (Cant. R. vii. 9). Nebuchadnezzar, who had made a drinking-cup from the skull of a murdered Jew, was greatly astonished when, at the moment that the three men were cast into the furnace, the bodies of the dead boys moved, and, striking him in the face, cried out: "The companion of these three men revives the dead!" (see a Karaite distortion of this episode in Judah Hadasi's "Eshkol ha-Kofer," 45b, at foot; 134a, end of the section). When the boys awakened from death, they rose up and joined in a song of praise to God for the miracle vouchsafed to them; later, they went to Palestine, where they married and reared children. As early as the second century, however, some authorities declared this resurrection of the dead was a prophetic vision: an opinion regarded by Maimonides ("Moreh Nebukim," ii. 46; Arabic text, 98a) and his followers as the only rational explanation of the Biblical passage (comp. Abravanel's commentary on the passage). An account of the מתי יחזקאל varying from these stories of the Talmud (Sanh. 92b), found in Pirḳe R. El. xxxiii., runs as follows: "When the three men had been rescued by God from the fiery furnace, Nebuchadnezzar, turning to the other Jews who had obeyed his commands and worshiped the idol, said: 'You knew that you had a helping and saving God, yet you deserted Him in order to worship an idol that is nothing. This shows that, just as you destroyed your own country through your evil deeds, you now attempt to destroy my country'; and at his command they were all killed, to the number of 600,000." Twenty years later God took the prophet to the place where the dead boys were buried, and asked him whether he believed that He could awaken them. Instead of answering with a decisive "Yes," the prophet replied evasively, and as a punishment he was doomed to die "on foreign soil." Again, when God asked him to prophesy the awakening of these dead, he replied: "Will my prophecy be able to awaken them and those dead ones also which have been torn and devoured by wild beasts?" His doubts were unfounded, for the earth shook and brought the scattered bones together; a heavenly voice revived them; four winds flew to the four corners of the heavens, opened the treasure-house of the souls, and brought each soul to its body. One only among all the thousands remained dead, and he, as it was revealed to the prophet, had been a usurer, who by his actions had shown himself unworthy of resurrection. The resurrected ones at first wept because they thought that they would now have no part in the final resurrection, but God said to Ezekiel: "Go and tell them that I will awaken

The Dead Revived by Ezekiel.

them at the time of the resurrection and will lead them with the rest of Israel to Palestine" (comp. Tanna debe Eliyahu R. v.).

The Book of Ezekiel.

Among the doctrines that Ezekiel set down in his book, the Rabbis noted the following as especially important: He taught "the soul that sinneth, it [alone] shall die" (Ezek. xviii. 4), although Moses had said (Ex. xxxiv. 7) that God would visit "the iniquity of the fathers upon the children." Another important teaching of Ezekiel is his warning not to lay hands on the property of one's neighbor, which he considers the greatest sin among the twenty-four that he enumerates (Ezek. xxii. 2 *et seq.*), and therefore repeats (Eccl. R. i. 13) at the end of his index of sins (Ezek. xxii. 12). In ritual questions the Book of Ezekiel contains much that contradicts the teachings of the Pentateuch, and therefore it narrowly escaped being declared as "apocryphal" by the scholars shortly before the destruction of the Temple (Shab. 13b; Men. 45a). No one was allowed to read and explain publicly the first chapter of the book (Ḥag. ii. 1; *ib.* Gem. 13a), because it dealt with the secrets of God's throne (comp. MA'ASEH MERKABAH).

S. S. L. G.

EZEKIEL'S TOMB: The traditional burial-place of the prophet Ezekiel, around which many sagas and legends have gathered, is shown at Kefil near Birs Nimrud; for centuries it has been a favorite place of pilgrimage for Mohammedans as well as for Jews. The mausoleum, dating probably from the time of the califs, was regarded already in the twelfth century as the work of King Jehoiachin, who is said to have erected it when he was liberated from prison by Evil-merodach. The Sefer Torah found there is alleged to have been written by the prophet himself; and he is said to have lighted the lamp which was burning on his grave and had never gone out, as the oil was constantly replenished. In the twelfth century the mausoleum contained a large Hebrew library, and it was said that many of these books dated from the time of the First Temple (Benjamin of Tudela, "Itinerary," ed. Asher, i. 67; comp. also in Schechter, "Saadyana," the letter of Sherira, p. 123, line 45). The bringing of presents to the sacred spot was considered efficacious in the rearing of a large progeny, and in causing animals to be prolific. The objects placed there could not be stolen, as such an attempt was immediately followed by sickness. Therefore people contemplating lengthy journeys brought their treasures to the mausoleum, sure of having a safe deposit there. Moreover, in case of death only the legal heirs were able to take the goods away. The pilgrimages to the spot took place in the autumn, and thousands of Jews celebrated the Feast of Tabernacles there. On these occasions the small gate in the wall surrounding the tomb of the prophet was miraculously enlarged, so that the camels with their burdens could go through (Pethahiah of Regensburg, ed. Jerusalem, 1872, pp. 4b, 5b, 6b; comp. also Benjamin of Tudela, *l.c.* ii. 141–143). The tomb of the prophet was the subject of two fine poems by Al-Ḥarizi ("Taḥkemoni," ed. Kaminka, xxxv. 293–296, l. 392–393).

S. S. L. G.

EZEKIEL, BOOK OF: Ezekiel's book is one of the most original in the sacred literature of Israel. Its principal features are its systematic arrangement and homogeneity. The book falls into two principal parts, i.-xxiv. and xxv.-xlviii., corresponding to the two principal themes of Ezekiel's prophetic preaching—repentance and salvation, judgment and restoration. It is introduced by a vision, i. 1-iii. 15. At the River Chebar the glory of the Lord appears to Ezekiel on the chariot of the cherubim and consecrates him a prophet, sent to a "rebellious house" to preach only wailing, sighing, and misery. Chaps. iii. 16–xxiv. 27 show the prophet fulfilling this mission. Here Ezekiel is merely a "reprover" (iii. 26); he confronts the people as if he were not one of them; he shows no emotion, not a suggestion of pity, throughout the delivery of his dreadful tidings. He symbolizes the siege and conquest of Jerusalem, the leading of the people into exile (iv.-v.); on all the hills of Israel idolatry is practised (vi.), and therefore "the end" will come (vii.). The Temple is defiled with abominations of every description; therefore the glory of the Lord departs from it and from the city, and dedicates them to flames (viii.-xi.). Ezekiel represents the final catastrophe symbolically; judgment will not tarry, but approaches to immediate fulfilment (xii.). No one will mount into the breach. On the contrary, prophets and prophetesses will lead the people completely astray (xiii.); even a true prophet could not avail now, as God will not be questioned by idolaters.

That the judgment is fully merited will be demonstrated by the godliness of the few who survive the catastrophe (xiv.). Jerusalem is a useless vine, good only to be burned (xv.). And thus it has ever been: Jerusalem has ever requited the mercies and benefits of the Lord with blackest ingratitude and shameless infidelity (xvi.). The ruling king, Zedekiah, particularly, has incurred the judgment through his perjury (xvii.). God rewards each one according to his deeds, and He will visit upon the heads of the present generation, not the sins of the fathers, but their own sins (xviii.). Therefore the prophet is to sound a dirge over the downfall of royalty and the people (xix.). In an oration he once more brings before the people all the sins committed by them from the Exodus to the present time (xx.). Nebuchadnezzar approaches to execute the divine judgment (xxi.). Jerusalem is a city full of blood-guiltiness and impurity, all classes being equally debased (xxii.), and far lower than Samaria's (xxiii.). The city is a rusty kettle the impurities of which can be removed only by fire. The exiles, who still boast of the sanctity and inviolability of Jerusalem, will be amazed by the news of its fall (xxiv.).

Then follows (xxv.-xxxii.) a group of threatening prophecies against seven foreign nations: the Ammonites (xxv. 1–7), Moabites (xxv. 8–11), Edomites (xxv. 12–14), Philistines (xxv. 15–17), Tyrenes (xxvi.-xxviii. 19), Zidonians (xxviii. 20–23), and

Egyptians (xxix.–xxxii.). This division belongs to the promise of salvation as detailed in xxviii. 24–26; for it refers to the punishment visited on the neighboring nations because of their aggressions against Judah. It also indicates that Israel may yet be restored to fulfil its sacred mission, a mission which can be accomplished only when the nation lives in security. Ch. xxxiii. announces the downfall of Jerusalem, and the prophet now freely speaks words of consolation and promise to the people. The shepherds hitherto placed over Israel have thriven, but have neglected their flock, which God will now take under His protection, appointing a new David as a shepherd over it (xxxiv.). The Edomites, who have seized certain portions of the Holy Land, will be annihilated (xxxv.); Israel will be restored (xxxvi.); that is, Judah and Joseph will be merged into one (xxxvii.). The last onslaught of the pagan world against the newly established kingdom of God will be victoriously repelled by the Almighty Himself, who will manifest His sanctity among the nations (xxxviii.–xxxix.). The final division, xl.–xlviii., embodying the celebrated vision of the new Temple and the new Jerusalem, contains a description of the future era of salvation with its ordinances and conditions, which are epitomized in the final sentence: "And the name of the city from that day shall be, The Lord is there" (xlviii. 35).

"Dooms" of the Nations.

The evident unity of the whole work leaves only one question open in regard to its authorship: Did Ezekiel, as some maintain, write the whole book at one time, or is it a homogeneous compilation of separate parts written at different times? A number of pieces were dated by the prophet himself, in accordance with the number of years after the abduction of Jehoiachin: i. 1, in the fifth; viii. 1, in the sixth; xx. 1, in the seventh; xxiv. 1, in the ninth; xxix. 1, in the tenth; xxvi. 1, xxx. 20, xxxi. 1, xxxiii. 21 (LXX.), in the eleventh; xxxii. 1, 19 and xxxiii. 21 (Hebr.), in the twelfth; xl. 1, in the twenty-fifth; and xxix. 17, in the twenty-seventh year. The last-mentioned passage (xxix. 17–21) is evidently an appendix to the already completed book; and the twenty-fifth year (572), the date of the important division xl.–xlviii., is probably the date when the work was completed. If it were true, however, that the whole book was written at that time all previous dates would be merely literary embellishments, and this view is difficult because of the importance of the dating in several instances where the prophet claims to transcend ordinary human knowledge. Examples of such instances are: xi. 13, where Ezekiel at the Chebar is cognizant of the death of Pelatiah, the idolater, in Jerusalem; xxiv. 2, where he knows the exact day on which the siege of Jerusalem will begin; and xxxiii. 21, where he predicts to a day the arrival of the messenger bearing tidings of the capture of Jerusalem.

The Composition.

Moreover, it can be shown from the contradictions which the various divisions of the Book of Ezekiel contain that they were written at different periods. This is particularly true of the Messianic prophecy, which, although kept somewhat in the background in Ezekiel, is nevertheless directly expressed in xvii. 22–24, xxi. 32, xxxiv. 23–24, xxxvii. 22–24, and xxv. 14 (where Edom is referred to: "And I will lay my vengeance upon Edom by the hand of my people Israel"). In xl.–xlviii.—that grand panorama of the future—this feature has entirely disappeared. There is still some reference to a prince, but his sole function is to defray from the people's taxes the expenses of worship; there is no longer room for a Messianic king. Nevertheless, Ezekiel permitted the earlier passages to remain. Even more significant is xxix. 17–21, which can be understood only as an appendix to the already complete book. In xxvi.–xxviii. Ezekiel had positively prophesied the capture and destruction of Tyre by Nebuchadnezzar, but after thirteen years of fruitless labor the latter had to raise the siege and to arrange terms of peace with the city. Thereupon, in the above-mentioned passage, Ezekiel promises Egypt to Nebuchadnezzar as an indemnity. Here, then, is an oracle the non-fulfilment of which the prophet himself is destined to see. Yet he does not venture to change or to expunge it. Incidentally it may be stated that the transmission of oracles of which the prophets themselves were doomed to see the non-fulfilment is the strongest proof that they regarded these as messages for which they were not personally responsible, and which, consequently, they did not venture to change; they regarded them as God's word, the responsibility for the non-fulfilment of which rested with God, not with themselves. In view of these facts it must be assumed that although Ezekiel completed his book in 572, he availed himself of earlier writings, which he allowed to remain practically unchanged.

Style.

Not only is the whole artistically arranged, but the separate parts are also distinguished by careful finish. The well-defined and deliberate separation of prose and poetry is particularly conspicuous. The poetic passages are strictly rhythmical in form, while the didactic parts are written in pure, elegant prose. The author prefers parables, and his use of them is always lucid. In xx. 49 he even makes his audience say: "Doth he not speak parables?"

Very striking are the numerous symbolical actions by which the prophet illustrates his discourse. Nine unique examples may be distinguished; indeed at the very beginning of his prophetic activity there are not fewer than four by which he describes the siege, capture, and destruction of Jerusalem and the banishment of the people (iv. and v.). The two in xii. and the two in xxiv. refer to the same subject, while that in xxxvii. refers to the future redemption. Here, also, there is no question of mere literary embellishment, for Ezekiel undoubtedly actually performed the symbolic actions; indeed, he was the first to introduce symbolism into Hebrew literature, and therefore has been called the "father of apocalypse." The picture of the chariot ("merkabah") in i., and the concluding division of xl.–xlviii., are full of deep symbolism; and, according to the Rabbis, neither should be read by any one younger than thirty. The celebrated vision of Gog, the Prince of Rosh Meshech (A. V. "the chief prince of Meshech") and Tubal (xxxviii. and xxxix.), is also symbolical. The Book of Ezekiel shows throughout the touch of the scholar.

The Talmud (Ḥag. 13a) relates that in consequence of the contradictions to the Torah contained in xl.–xlviii. Ezekiel's book would have remained unknown had not Hananiah b. Hezekiah come to expound it. Nevertheless it has never been appreciated as it deserves; and it is probably due to this fact that the text of the work has been transmitted in a particularly poor and neglected form. The Septuagint, however, affords an opportunity to correct many of the errors in the Hebrew text.

The statement of Josephus ("Ant." x. 5, § 1) that Ezekiel wrote two books is entirely enigmatical. The doubt cast upon the authenticity of the book by Zunz, Seinecke, and Vernes has rightly never been taken seriously; but the authorship of several parts, such as iii. 16b–21, x. 8–17, xxiv. 22–23, and xxvii. 9b–25a, has, with more or less justification, sometimes been questioned. That the book consists of two divergent versions compiled by an editor, a hypothesis recently advanced by Kraetzschmar, has yet to be demonstrated.

E. G. H. K. H. C.

EZEKIEL, EZEKIEL ABRAHAM: English engraver; born in Exeter 1757; died there 1806. He engraved paintings by Opie, Sir Joshua Reynolds, and others, and was also known as a miniature-painter and scientific optician. His son **Solomon Ezekiel** (b. 1781; d. 1867) dissuaded Sir Rose Price from establishing in Penzance a branch of the Society for Promoting Christianity Among the Jews. Ezekiel published a series of lectures on the lives of Abraham and Isaac and on the Hebrew festivals (Penzance, 1844–47).

Bibliography: *Dict. National Biography*; Jacobs and Wolf, *Bibliotheca Anglo-Judaica*, Nos. 970–971; *Jew. Chron.* March, 1867.

J.

EZEKIEL FEIWEL BEN ZE'EB WOLF: Russian Talmudist and preacher; born at Polangen 1755; died at Wilna 1833. Early in life he filled the position of preacher in his native town, and later at Deretschin. He then traveled as a preacher through Germany and Hungary, and, after residing for some time at Breslau, returned to Polangen and devoted himself to literary work. In 1811 he was appointed preacher to the community of Wilna, which position he filled until his death.

Ezekiel was the author of "Musar Haskel," a commentary on Maimonides' "Yad," De'ot and Teshubah (Dyhernfurth, 1790); and "Toledot Adam," a biography of Rabbi Solomon Zelman ben Isaac, whom Ezekiel had met in the house of Elijah Wilna (*ib.* 1809–10). The latter work, in two volumes, contains biographical data, various novellæ, and a chapter devoted to remonstrances against the neglect of the study of the Bible. A special edition, containing only the biographical data, was published by Elijah Ẓebi Solowejczyk (Danzig, 1845; Warsaw, 1854). In addition to these works, Ezekiel left in manuscript a third volume of the "Toledot Adam," and novellæ on the first three books of the Midrash Rabbah, entitled "Bi'ure MaRIF," published with the Wilna edition of the Midrashim in 1885 and 1887.

Bibliography: Steinschneider, *'Ir Wilna*, pp. 87–90; Fuenn, *Kiryah Ne'emanah*, pp. 240–242; Benjacob, *Oẓar ha-Sefarim*, pp. 307, 308, 618.

H. R. N. T. L.

EZEKIEL, JACOB: Born in Philadelphia, Pa., June 28, 1812; died May 16, 1899. His parents, Ezekiel Jacob Ezekiel and Rebecca Israel, had come from Amsterdam, Holland, two years before his birth. He learned the bookbinding trade and worked at it for seven years. After having removed to Richmond, Va., he married Catherine Myers Castro on June 10, 1835. During his residence there he brought about the repeal of an ordinance which exacted an inordinate fine for the violation of the Sunday laws (1845), and four years later he succeeded in effecting the introduction of an amendment to the code of the state of Virginia, by which the observers of the Jewish Sabbath were placed on the same plane with those who rest on the "first day."

In 1849 Ezekiel secured the enactment of a law by which religious organizations were invested with the rights of incorporated institutions. In 1851 he protested against the ratification of a treaty between the United States and the Swiss Confederacy on the ground that the latter government discriminated against Jews, and that in consequence American-Jewish citizens would be without guaranty of their rights of settlement or sojourn in the cantons of Switzerland. Three years later he, with others, repeated his protest on the occasion of the proffer by the Swiss government of a block of marble for the Washington Monument. In 1841 he addressed a letter to President John Tyler with reference to the impropriety of calling the American nation a "Christian people," as had been done in a proclamation on the occasion of the death of William Henry Harrison. In a private reply to Ezekiel the president conceded that intimations of sectarianism are irrelevant in public documents.

Ezekiel removed to Cincinnati in 1869, and became secretary of the board of governors of the Hebrew Union College in 1876. He served in that capacity until advanced age compelled him to withdraw from active work (1896).

Besides numerous contributions to current Jewish journals, Ezekiel wrote "The Jews of Richmond," and "Persecutions of the Jews in 1840," in "Publications of the American Jewish Historical Society" (No. 4, pp. 21–27, and No. 8, pp. 141–145). President Tyler's letter to Ezekiel is reprinted in the "Publications" of the same society (No. 9, p. 162).

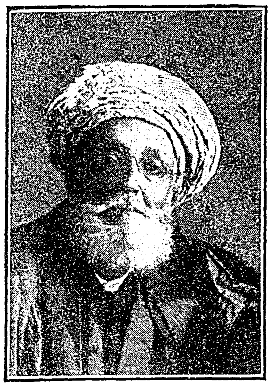
Bibliography: *Pub. Am. Jew. Hist. Soc.* No. 9, pp. 160–163.

A. L. Gr.

EZEKIEL, JACOB: The third of the Beni-Israel (the first two being Isaac Solomon and Joel Samuel) who visited the Holy Land (1894); he was accompanied on the pilgrimage by his wife. His "Travels to Jerusalem" (Bombay, 1895) is the record of his observations. It contains descriptions and photographs of the places visited, and gives some account of the Jewish ceremonies as performed in Jerusalem.

J. J. E.

EZEKIEL, JOSEPH: Indian Hebraist; one of the heads of the Beni-Israel of Bombay; born in that city 1834. Ezekiel was educated in the school of the Free General Assembly by the Rev. John Wilson, and under his tuition he learned the rudiments of Hebrew, his later knowledge being self-acquired.



Joseph Ezekiel.

Ezekiel's first post was as assistant teacher in the David Sassoon Benevolent Institution (1856), from which he rose in five years to be head master. Here he remained for forty years. In 1871 Ezekiel was appointed examiner in Hebrew at the University of Bombay, and in 1879 was made a fellow of the university. In 1890 he became justice of the peace.

Aside from his labors as teacher, translator, and commentator, Ezekiel has worked unceasingly for the good of the Jews in Bombay. His promptness of action probably saved the entire community from serious trouble in 1882, when the blood accusation was brought forward by a native paper.

When the famine and plague devastated Bombay and the central provinces, Ezekiel was asked by the government to carry out preventive measures among his people. He was named president of the Beni-Israel Plague and Famine Relief Fund.

Ezekiel's principal works are translations of the prayers, treatises on the Jewish religion, and textbooks of Hebrew, mainly written in Mahrati for the use of the Beni-Israel. Among them may be mentioned: "The Jewish Marriage Ceremony," transl. 1862; "History of Antiochus Epiphanes," etc., transl. 1866; "Hebrew Primer," 3d ed., 1881; "The Ethics of the Fathers," transl. 1870; "Scripture Proofs of Jewish Doctrines," 1876; "The True Aspect of Judaism," 1879; "A Chronological Outline of Ancient History," 1880; "A Handbook of Hebrew Abbreviations," 1887. Besides these, he has edited and translated into Mahrati the whole cycle of Jewish liturgy.

J. E. Ms.

EZEKIEL, MOSES JACOB: American sculptor; born in Richmond, Va., Oct. 28, 1844; educated at the Virginia Military Institute, from which, after serving as a Confederate soldier in the Civil war, he was graduated. He then determined to devote himself to an artistic career. Among his early works is the painting entitled "The Prisoner's Wife."

Ezekiel soon turned from the study of painting to that of sculpture. One of his first successful efforts as a sculptor was his "Cain, or The Offering Rejected." In 1868 he removed to Cincinnati, and there modeled a statue of "Industry," which evoked favorable criticism. There being no art school in Cincinnati, he went to Germany, and in Berlin studied under the sculptor Rudolph Siemering. Some of his works produced at this time were the bas-reliefs of Schiller and Goethe, now in the Villa Collin, Berlin; "The Sailor Boy"; and the statue of "Virginia Mourning Her Dead."

On the outbreak of the Franco-Prussian war Ezekiel became special correspondent of the "New York Herald." At Pillau he was suspected of being a French spy, and was confined for eight days in the Kronprinz-Caserne. After his release he worked in the studio of Prof. Albert Wolff of Berlin, where he executed the colossal bust of Washington now in the Cincinnati Art Museum. Upon the completion of this work he was elected a member of the Berlin Society of Artists. Establishing a studio for himself, he modeled, among other works, a bust of Mercury, a caryatid for Daniel Collin, and a bust of Grace Darling. His model in relief entitled "Israel," and a sketch-model for a group, "Adam and Eve Finding the Slain Abel," were awarded the Michael Beer Prize of Rome.

During a visit to America in 1874 he executed in marble a statue of "Religious Liberty" (see illustration on page 320)—the tribute of the Independent Order of B'nai B'rith to the centennial celebration of American independence. The statue was unveiled in 1876 in Fairmount Park, Philadelphia. Upon his return to Rome Ezekiel leased a portion of the ruins of the Baths of Diocletian, and transformed them into one of the most beautiful studios in Europe. Here he created for the niches of the Corcoran Art Gallery at Washington the heroic statues of Phidias, Raphael, Dürer, Michelangelo, Titian, Murillo, Da Vinci, Van Dyck, Canova, Rembrandt, Rubens, and Crawford. In 1896 a memorial to Jesse Seligman was executed by him for the Hebrew Orphan Asylum, New York. He has been elected a member of various academies, and was knighted by the German emperor.

Of his works the following may also be mentioned: mural monument to Lord Sherbrook, St. Margaret's, Westminster, London; monument to Massarani, in the Jewish cemetery, Rome; fountain of Neptune, Nettuno, Italy; Jefferson monument, Lexington, Va.; recumbent statue of Mrs. Andrew D. White, Cornell University, Ithaca, N. Y.; Hausserek monument, Spring Grove Cemetery, Cincinnati, O.; "Christ in the Tomb," in the Chapel of La Charité, Rue Jean Goujon, Paris; David; Homer; Beethoven; Portia; Eve (now in the palace of Sans Souci, near Berlin); Queen Esther; portrait-busts of Cardinal Hohenlohe, Liszt, Queen

Margarita of Italy, and the Grand Duke of Saxe-Meiningen.

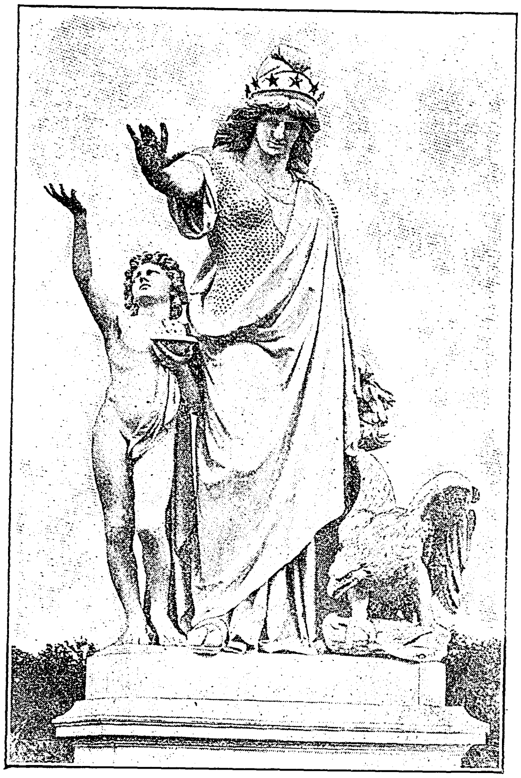
A. K. M. C.

EZEKIEL B. SAMUEL HA-LEVI. See Schlesinger, Ezekiel.

EZEKIELUS: Alexandrine poet; flourished in the second century B.C. He dramatized Biblical episodes in Greek hexameters. Four fragments of one of his dramas, representing the Exodus (Ἐξαγωγή), have been preserved by Clemens Alexandrinus ("Stromata," i. 23, 155) and by Eusebius ("Præparatio Evangelica," ed. Gaisford, ix. 29, § 14). After referring briefly to the suffering of the Israelites in Egypt, the first fragment gives a monologue of Moses, who relates the history of his life from his birth to his flight to Midian. Then appear the seven daughters of Jethro. Moses questions them as to their origin, and Zipporah gives him the required information.

In the second fragment Moses relates to his father-in-law a dream which he has had, and the latter interprets it as predicting the future greatness of Moses. The following scene represents the burning bush, from which is heard the voice of God (*ib.* ix. 29, §§ 4–6). The third fragment gives the orders of God concerning the Exodus and the Feast of Passover. Then appears an Egyptian who has escaped the catastrophe at the Red Sea, and who relates how the Israelites had crossed the sea, while the Egyptians perished therein (*ib.* ix. 29, §§ 12–13). The last fragment presents a messenger who informs Moses of the discovery of an excellent resting-place near Elim.



"Religious Liberty," by Moses Ezekiel.

(From a photograph.)

Apart from some embellishments, the poet follows closely the Biblical text, and displays some ability in the treatment of the subject. To the question whether dramas of this kind were intended for the stage, Schürer answers in the affirmative. According to him the author of this drama had a double end in view: to instruct the people in Biblical history, and to divert them from the pagan plays.

J. I. Br.

EZER (אצר): Son of Seir, and one of the princes of Edom (Gen. xxxvi. 21, 27, 30; I Chron. i. 38, 42).

EZER (עזר, "help"): Theophorous name, shortened either from "Eleazar" or from "Azriel," both occurring in the Bible. **1.** Son of Ephraim, slain by the inhabitants of Gath (I Chron. vii. 21). **2.** A Levite who assisted Nehemiah in reconstructing the walls of Jerusalem (Neh. iii. 19). **3.** A priest who assisted in the dedication of the walls of Jerusalem (Neh. xii. 42). **4.** One of the sons of Hur, father of Hushah (I Chron. iv. 4). **5.** A Gadite warrior, one of David's generals (I Chron. xii. 9).

E. G. H. M. Sel.

EZION-GEBER (עציון גבר): A maritime place of Idumæa, situated on the Ælanitic Gulf of the Red Sea, not far from Elath or Eloth (Deut. ii. 8; I Kings ix. 26; II Chron. viii. 17). It was the last encampment of the Israelites before they came to the wilderness of Zin, or Kadesh (Num. xxxiii. 35, 36), and the station for Solomon's navy, whence it sailed to Ophir (I Kings ix. 26). There also the ships of Jehoshaphat were wrecked (*ib.* xxii. 48), probably on the rocks near the roadstead. This place was called by the Greeks "Berenice" (Josephus, "Ant." viii. 6, § 4); it was near the present Akabah.

EZOBI, ELIEZER BEN ḤANAN: Provençal poet; lived at Béziers in the thirteenth century. He was the brother of Joseph Ezobi, and a contemporary of Abraham Bedersi, with whom he exchanged poems. His productions include a didactic poem of thirty strophes on man, in which he adopted the form of Ibn Ezra's poem, "Ben Adamah."

Bibliography: Carmoly, *La France Israélite*, p. 86; Renan-Neubauer, *Les Rabbins Français*, p. 705; Gross, *Gallia Judaica*, p. 104.

G. I. Br.

EZOBI, JOSEPH BEN ḤANAN BEN NATHAN: Liturgical poet; lived at Perpignan in the thirteenth century. He was the author of the following: (1) three liturgical poems, the first on the Feast of Pentecost, the second (found in the Avignon ritual), on the ten martyrs under Hadrian (English paraphrase by Israel Gollancz in "Jewish Chronicle," July 19, 1901), and the third a seliḥah beginning with איה חסדיך ה׳; (2) "Ḳa'arat Kesef," a poem of 130 distichs, composed for the wedding of his son Samuel (Constantinople, 1523); in it Ezobi advises his son how to comport himself in society, and what studies he ought to pursue. He recommends the study of the Talmud together with the commentaries of Alfasi and Maimonides, and warns him against Greek science, which resembles the fruits of Sodom and Gomorrah. The "Ḳa'arat Kesef" was translated into Latin by Reuchlin (Tübingen, 1512–14) and by Jean Mercier (Paris, 1561); into English by I. Freedman in "J. Q. R." viii. 535.

Ezobi was also the author of a ritual work entitled "Sefer Millu'im," known only by a quotation of Solomon ben Adret (Responsa, ed. Constantinople, p. 25).

G. I. Br.

EZOBI, SOLOMON BEN JUDAH: Rabbi at Carpentras, Leghorn, and Florence; born at Sofia, Bulgaria, in the sixteenth century; died in Italy about 1650. While officiating as rabbi of Carpentras (1620–35) he instructed Jean Plantavit de la Pause, Bishop of Lodève, in Hebrew. About 1633 Ezobi made the acquaintance of Peiresc, the eminent magistrate and scholar, and soon became his intimate friend. A lively correspondence ensued between them; and at one time Ezobi passed many months in Peiresc's house at Aix-les-Bains.

In 1638 Ezobi was appointed rabbi at Leghorn, and a little later at Florence.

Ezobi was the author of "Aguddat Ezob" (an allusion to his own name) a collection of homilies and sermons, still extant in manuscript in the library of the Alliance Israélite Universelle of Paris.

EZRA THE SCRIBE (עזרא הסופר).—Biblical Data: A descendant of Seraiah the high priest (Neh. viii. 13; Ezra vii. 1 *et seq.*; II Kings xxv. 18–21); a member of the priestly order, and therefore known also as **Ezra the Priest** (עזרא הכהן: Ezra vii. 11; x. 10, 16). The name, probably an abbreviation of "Azaryahu" (God helps), appears in Greek (LXX., Apocrypha, Josephus) and in Latin (Vulgate) as "Esdras." Though Ezra was one of the most important personages of his day, and of far-reaching influence upon the development of Judaism, his biography has to be reconstructed from scanty material, furnished in part by fragments from his own memoirs (see Ezra, Book of). The first definite mention of him is in connection with a royal firman granting him permission to lead a band of exiles back to Jerusalem (Ezra vii. 12–26). This edict was issued in the seventh year of King Artaxerxes, corresponding to 458 B.C. There is no reason to doubt the authenticity of the document as incorporated in Aramaic in the Book of Ezra, though Jewish coloring may be admitted. The arguments advanced for the opposite view (Cornill, "Einleitung in das Alte Testament," p. 264; Driver, "Introduction to the Literature of the Old Testament," 10th ed., p. 550) at their utmost reflect on the verbal, not the virtual, accuracy of the decree. Nor is there any ground for holding that the king in question was any other than Artaxerxes Longimanus. A. van Hoonacker's contention ("Néhémie et Esdras," etc., Paris, 1890) that Ezra came to Jerusalem in the seventh year of Artaxerxes II. (397 B.C.; comp. Winckler, "Altorientalische Forschungen," ii. 2; Cheyne, in "Biblical World," Oct., 1899), is untenable (see Guthe, "Gesch. des Volkes Israel," p. 252; Piepenbring, "Histoire du Peuple d'Israel," p. 537; Kuenen, "Gesammelte Abhandlungen zur Bibl. Wissenschaft," ed. Budde, pp. 239 *et seq.*).

Returns to Jerusalem.

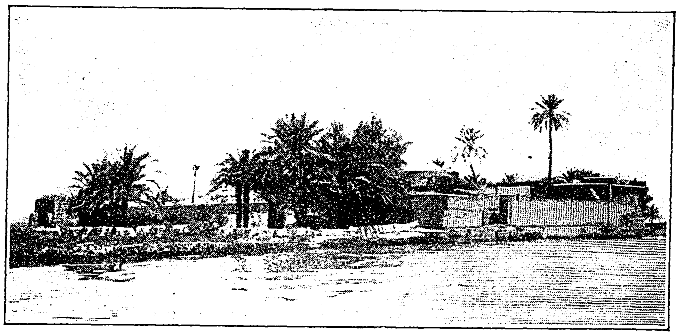
Though received with greater favor, the assumption of Kosters (in "Het Herstel van Israel," German ed. by Basedow, pp. 103 *et seq.*) that Ezra arrived in Jerusalem only during the second visit of Nehemiah (433 B.C.), can not be maintained (see Ed. Meyer, "Die Entstehung des Judenthums," 1896, pp. 60, 89, 199 *et seq.*; Wellhausen, "Die Rückkehr der Juden," pp. 3 *et seq.*). Probably the reputation he enjoyed for learning (hence "the ready scribe": Ezra vii. 6) stood him in good stead with the king, who in the firman appears to have conferred upon him extensive authority to carry his intention into effect. To the number of about 1,500, mostly from the tribes of Judah and Benjamin (Ezra viii. 1–14), not counting the women and children, the companions of Ezra assembled at the river flowing toward Ahava. But no Levite being among them, Ezra induced 38 Levites and 220 Nethinim to join his expedition. After observing a day of public fasting and prayer, on the twelfth day of the first month (Nisan = April), without military escort but with due precaution for the safeguarding of the rich gifts and treasures in their keeping, they set out on their journey, and arrived without mishap at Jerusalem in the fifth month (Ab = August).

Soon after his arrival Ezra was compelled to take strenuous measures against marriage with non-Hebrew women (which had become common even among men of high standing), and he insisted in a very dramatic manner upon the dismissal of such wives (Ezra ix. and x.); but it was only after the arrival of Nehemiah (444 B.C.; comp. Neh. viii. 1 *et seq.*) that he published the "book of the law of Moses" which he had brought with him from Babylon, and made the colony solemnly recognize it as the basis of their religious and civil code. Ezra is further mentioned as the leader of one of the two choirs singing hymns of thanksgiving at the dedication of the wall (Neh. xii. 36 *et seq.*), but this note is suspected of being a gloss of questionable historical value.

E. G. H.

——**In Rabbinical Literature:** Ezra marks the springtime in the national history of Judaism. "The flowers appear on the earth" (Cant. ii. 12) refers to Ezra and Nehemiah (Midr. Cant. *ad loc.*). Ezra was worthy of being the vehicle of the Law, had it not been already given through Moses (Sanh.

21b). It was forgotten, but Ezra restored it (Suk. 20a). But for its sins, Israel in the time of Ezra would have witnessed miracles as in the time of Joshua (Ber. 4a). Ezra was the disciple of Baruch ben Neriah (Cant. R.); his studies prevented him from joining the first party returning to Jerusalem in the reign of Cyrus, the study of the Law being of greater importance than the reconstruction of the Temple. According to another opinion, Ezra remained behind so as not to compete, even involuntarily, with Jeshua ben Jozadak for the office of chief priest. Ezra reestablished the text of the Pentateuch, introducing therein the Assyrian or square characters, apparently as a polemical measure against the Samaritans (Sanh. 21b). He showed his doubts concerning the correctness of some words of the text by placing points over them. Should Elijah, said he, approve the text, the points will be disregarded; should he disapprove, the doubtful words will be removed from the text (Ab. R. N. xxxiv.). Ezra wrote the Book of Chronicles and the book bearing his name (B. B. 16a).



Site of the Traditional Tomb of Ezra.
(From a photograph by Dr. W. Popper.)

He is regarded and quoted as the type of person most competent and learned in the Law (Ber. R. xxxvi.). The Rabbis associate his name with several important institutions. It was he who ordained that three men should read ten verses from the Torah on the second and fifth days of the week and during the afternoon ("Minḥah") service on Sabbath (B. Ḳ. 82a); that the "curses" in Leviticus should be read before Shabu'ot, and those in Deuteronomy before Rosh ha-Shanah (Meg. 31b; see Bloch, "Die Institutionen des Judenthums," i. 1, pp. 112 *et seq.*, Vienna, 1879). He ordained also that courts be in session on Mondays and Thursdays; that garments be washed on these days; that garlic be eaten on the eve of Sabbath; that the wife should rise early and bake bread in the morning; that women should wear a girdle (B. Ḳ. 82a; Yer. Meg. iv. 75a); that women should bathe (B. Ḳ. 82a); that pedlers be permitted to visit cities where merchants were established (B. Ḳ. 82a; see Bloch, *l.c.* p. 127); that under certain contingencies men should take a ritual bath; that the reading at the conclusion of the benedictions should be "min ha-'olam we-'ad ha-'olam" (from eternity to eternity: against the Sadducees; see Bloch, *l.c.* p. 137). His name is also associated with the work of the Great Synagogue (Meg. 17b). He is said to have pronounced the Divine Name (Yhwh) according to its proper sounds (Yoma 69b), and the beginnings of the Jewish calendar are traced back to him (Beẓah 6a; Rashi, *ad loc.*).

According to tradition, Ezra died at the age of 120 in Babylonia. Benjamin of Tudela was shown his grave on the Shaṭṭ al-'Arab, near the point where the Tigris flows into the Euphrates ("Itinerary," i. 73). According to another legend, he was at the time of his death in Babylon, as a courtier in the retinue of Artaxerxes (see Vigouroux, "Dictionnaire de la Bible," ii. 1931). Josephus, however, relates that Ezra died at Jerusalem, where he was buried ("Ant." xi. 5, § 5). In the seliḥah אלה אזכרה for the 10th of Ṭebet the date of Ezra's death is given as the 9th of Ṭebet (see Shulḥan 'Aruk, Oraḥ Ḥayyim, 580).

E. C. E. G. H.—I. Br.

——**Critical View:** The historical character of the Biblical data regarding Ezra the Scribe (after Ed. Meyer, "Die Entstehung des Judenthums," p. 321) is generally conceded. But the zeal of Ezra to carry out his theory that Israel should be a holy seed (זרע קדש), and therefore of absolutely pure Hebrew stock, was not altogether effective; that his views met with opposition is indicated in the books of Ruth and Jonah. The "book of the law" which he proclaimed at the public assembly (Neh. viii.-x.) is substantially identified with the Priestly Code (P), which, though containing older priestly ordinances ("torot"), came to be recognized as the constitutional law of the congregation (Judaism) only after Ezra's time and largely through his and Nehemiah's influence and authority. E. G. H.

EZRA, BOOK OF.—Biblical Data: The contents of the book are as follows:

Synopsis of Contents.

Ch. i.: Cyrus, inspired by Jehovah, permits the Israelites to rebuild the Temple of Jerusalem, and returns to them the golden vessels which had been carried off by Nebuchadnezzar.

Ch. ii.: The number of the captives that returned from Babylon to Palestine with Zerubbabel is stated as 42,360, besides 7,337 men servants and women servants and 200 singing men and women.

Ch. iii.: Jeshua ben Jozadak and Zerubbabel build the altar, and celebrate the Feast of Tabernacles. In the second year the foundations of the Temple are laid, and the dedication takes place with great rejoicing.

Ch. iv.: The adversaries of the Jews, especially the Samaritans, make efforts to hinder the Jews from building the Temple. A letter is written by the Samaritans to Artaxerxes to procure a prohibition of the construction of the Temple, and the work is interrupted till the second year of Darius.

Ch. v.: Through the exhortations of the prophets Haggai and Zechariah, Zerubbabel and Jeshua ben Jozadak recommence the building of the Temple. Tatnai, the governor "on this side the river," sends to the king a report of their action.

Ch. vi.: Darius finds the decree of Cyrus in the archives of Achmetha (Hamadan), and directs Tatnai not to disturb the Jews in their work. He also exempts them from tribute, and supplies everything necessary for the offerings. The Temple is finished in the month of Adar, in the sixth year of Darius, and is dedicated with great solemnity.

Ch. vii.: Artaxerxes gives Ezra a commission to bring with him to Jerusalem all the captives that remain in Babylon.

Ch. viii.: Contains a list of the heads of families who returned with Ezra to Palestine. Ezra institutes a fast while on his way to Jerusalem.

Ch. ix.: The princes of Israel inform Ezra that many have not repudiated their foreign wives.

Ch. x.: Those who have taken strange wives are compelled to send them away and to bring each a sin offering.

J. M. Sel.

——**Critical View:** The canonical Book of Ezra commences where the Chronicles leave off, and indeed with slight variation repeats the last two verses of II Chron. What follows consists of three portions: (1) an account of the return of the exiles, and a brief survey of the fortunes of the Jewish community down to the reign of Xerxes; (2) ch. iv. 7–vi. 22, extracts from a collection of historical documents in Aramaic, illustrating the fortunes of the community in the reigns of Artaxerxes I. and Darius, with a short appendix in Hebrew; (3) ch. vii. to end, a record of the enterprise of the author of the book, including a copy of the decree granted to him by Artaxerxes II., with an account of the author's work at Jerusalem.

The first section includes a document also transcribed in Neh. vii. 6–73a, called by Nehemiah a genealogical table of the first return. A third copy is to be found in the apocryphal I Esdras.

Varying Character of Composition.

The documents embodied in the second section are described as "written in Aramaic and 'targumed' in Nehemiah Aramaic" (iv. 7). Since a work can not be translated into the same language as that in which it is composed, the expression "targumed" must mean "described," a sense which corresponds closely to the sense of the Arabic word "tarjamah," which, used of a tradition, signifies the heading in which its contents are described. This phrase, then, implies that the contents of this section were transcribed from a collection of documents and accompanied with a commentary, probably made for the benefit of the Eastern community. In these extracts there is evidently a chronological transposition; for the correspondence with Artaxerxes I. (ch. iv.) is placed before the correspondence with Darius (ch. v., vi.), who is certainly Darius I. This may be due to momentary confusion on the author's part between Darius I. and Darius II.; but it is surprising, since in iv. 5–7 he shows himself well acquainted with the order of the Persian kings. Thus the period covered by the commentary on the documents in ch. v. and vi. is earlier than that covered by the documents in ch. iv.

Alleged Fabrications.

The authenticity of the documents is a matter on which there is difference of opinion, the most recent critics (E. Meyer excepted) being disposed to regard all of them as forgeries, whereas before the time of Graetz they were generally thought to be genuine. The custom in use among ancient historians of illustrating their histories by speeches and letters of their own composition makes the treatment of such questions exceedingly difficult. The edict of Cyrus, said to have been found at Achmetha (vi. 3–5), is the boldest of these fabrications, if they be such; but the mention of that ancient capital implies some very remarkable knowledge on the part of the author here excerpted. Some other reasons for believing these documents genuine are alleged by Herzfeld ("Geschichte des Volkes Israel," i. 125). The character of the Aramaic in which they are couched agrees fairly well, both in vocabulary and in grammar, with that of early inscriptions and papyri; and there would be nothing surprising in successive compilers having assimilated the language somewhat to the dialect with which they were most familiar. It is also possible that these Aramaic texts are translations of documents in Old Persian, and were accommodated to the taste of those whom they were intended to reach.

The third part of the book appears to be a personal memoir; and the decree there given (vii. 11–26), coming from an Artaxerxes whom the author distinguishes by spelling from Artaxerxes I., can not be regarded as spurious without seriously shaking the writer's credit. The narrative which he proceeds to give of his journey, however, contains little which might have been invented for the purpose of edification, though it might be open to any one to regard viii. 22 as written by one who had Neh. ii. 7 before him. The narrative of Ezra's doings at Jerusalem is also not marked by exaggeration. Ch. ix. records a lengthy prayer offered by him on receipt of the intelligence of the mixed marriages, and ch. x. the measures taken by him to separate the erring couples, with a list of the persons affected. The objection urged by some critics that so severe a measure would not have been obeyed, seems insufficient to justify the condemnation of this part of the narrative as unhistorical; since the author may well have supposed it would be more effective than it turned out to be. Nor indeed does the recurrence to the subject in Neh. x. 31 and xiii. 23 render it improbable that severe measures were taken years before in the same direction.

Supposing the king to have been Artaxerxes II., Ezra's arrival in Palestine may be considered to have taken place in 397 B.C. From the mention in Neh. xiii. 13 of Zadok as scribe, whereas in Neh. viii. 9 Ezra has that title, it is perhaps to be inferred that Ezra predeceased Nehemiah: in that case his death probably occurred between 370 and 360 B.C.

The question of the historical character of the Book of Ezra is concerned chiefly with the last section; since in the first two sections the scribe is not speaking as an eye-witness, whereas in the third there is either an authentic narration or a fiction. The latter view is taken by C. C. Torrey in Stade's "Zeitschrift," 1896, Supplement.

EZRA, APOCRYPHAL BOOKS OF. See Esdras, Books of.

EZRA: Palestinian halakist of the fifth century; disciple of R. Mana the Younger (Yer. Ter. i. 40b, vii. 44d). By a clerical error his name is sometimes substituted for that of Azariah a haggadist of an earlier generation (Yer. Shab. vii. 9b; Yer. Pes. i. 28a [some lines below "Ezra" is quoted]); and this has led some writers into the error of considering the two scholars as identical (see Azariah).

Bibliography: Frankel, *Mebo*, p. 120b; Bacher, *Ag. Pal. Amor.* iii. 449 *et seq.*

S. S. S. M.

EZRA THE CABALIST. See Azriel ben Menahem.

EZRA THE PROPHET OF MONCONTOUR: French tosafist; flourished in the thirteenth century. The title "prophet" is, according to Zunz, an honorific one. It is possible that his French name was "Profiat," which was translated into Hebrew as "Nabi" (= "Prophet"). Ezra is quoted in the Tosafot under various names; *e.g.*, "Azriel" (B. Ḳ. 24a), "Ezra" (B. B. 28a), and "Ezra ha-Nabi" (Giṭ. 88a). Sometimes he is quoted simply as "the rabbi and prophet of Moncontour" (דמונקטור). Gross identifies Ezra with R. Ezra of Moncontour, cited as a religious authority in the Halberstamm Manuscript No. 345; also with Ezra ha-Nasi (a misspelling of "ha-Nabi" = "the Prophet"), who is counted among the disciples of Isaac ben Solomon the Elder.

K. I. Br.

EZRA B. SOLOMON ASTRUC IBN GATIGNO. See Gatigno, Ezra b. Solomon.

EZRAHITE (אזרחי): Name occurring in Psalms lxxxviii. and lxxxix. (in the titles); I Kings iv. 31; and I Chronicles ii. 6. In the last-mentioned passage the Authorized Version gives "son of Zerah." It is not probable that the Ezrahite of Kings, who was famed for his wisdom, was the author of a psalm of the tenor of Psalm lxxxix., which, moreover, must have been written during the Exile, when the crown of the Davidic family was, as it were, broken (Ps. lxxxix. 40). In the superscription to the preceding psalm, the Korahite Heman, also, is called "the Ezrahite"; that is, a descendant of Levi is spoken of as if he were a son of Zerah, who belonged to the tribe of Judah. The addition of "the Ezrahite" to the names of Heman and Ethan in the superscriptions to Psalms lxxxviii. and lxxxix. is due to an error.

F

FABLE: A moral allegory in which beasts, and occasionally plants, act and speak like human beings. It is distinct from the beast-tale, in which beasts act like men, but in which there is no moral. In the ancient world two nations only, the Indians and the Greeks, are known to have had any considerable number of fables. In the Bible, however, there is the fable of the trees choosing their king (Judges xi. 8-15), told by Jotham to persuade the Israelites not to elect Abimelech as their king. This is a genuine fable which finds no parallel in either Greece or India. Besides this, Jehoash of Israel answers Amaziah of Judah, when requesting an alliance, in an allegorical response which resembles a fable (II Kings xiv. 9). It would appear from these examples that the Israelites had also adapted the beast-tale for moral or political purposes, as was done in Greece; but it would be idle to derive the origin of the ancient fable from the Israelites on account of these two examples, as Landsberger does in his "Fabeln des Sophos" (Leipsic, 1859). There is, on the contrary, evidence that the Jews after Biblical times adopted fables either from Greece or from India. In Ecclus. (Sirach) xiii. 20 there is a distinct reference to the fable of the two pots, which is known in classical antiquity only from Avian (ix.), though it occurs earlier in Indian sources ("Panchatantra," iii. 13, 14). There is a later reference to the same fable in the rabbinic proverb, "If a jug fall on a stone, wo to the jug! if a stone fall on the jug, wo to the jug!" (Esth. R. ii.). For the later spread of Æsopic and Indian fables among the rabbis of the Talmud, see Æsop, though with reference to the suggestion there made that "Kobesim" refers to the collection made by Kybises, it should be added that some are inclined to hold that the name "Kobesim" really refers to washermen, who were the gossips of the Babylonian communities (see Kobak's "Jeschurun," vi. 185).

In the Middle Ages a number of fables appear in Berechiah ha-Naḳdan's "Mishle Shu'alim" which are probably derived from Arabic sources (see Berechiah ben Natronai Krespia ha-Naḳdan). Two other collections, by Isaac ibn Solomon ibn Abu Sahula and Joseph ibn Zabara, also contain fables, possibly derived from India by way of Arabia. The many beast-tales contained in "Kalilah wa-Dimnah" were distributed through Europe by means of the Latin translation of John of Capua, and helped much in the circulation throughout Europe of the Bidpai literature. In more recent times the fables of Lessing, Krilof, and others, have been translated into Hebrew and Yiddish.

The ancient Israelites thus appear to have had the beginnings of a fable literature of their own, which probably disappeared through the competition of the Indian and Greek fables found in the Talmud (see Æsop's Fables among the Jews). It has been conjectured that the chief additions to the fable literature in the Middle Ages were made through the intermediation of the Jews Berechiah ha-Naḳdan and John of Capua.

J.

FADL, DA'UD ABU AL-: Karaite physician; born at Cairo 1161; died there about 1242. Having studied medicine under the Jewish physician Hibat Allah ibn Jami', and under Abu al-Faḍa'il ibn

Naḳid, he became the court physician of the sultan Al-Malik al-'Adil Abu Bakr ibn Ayyub, the brother and successor of Saladin. He was also chief professor at the Al-Naṣiri hospital at Cairo, where he had a great many pupils, among them being the historian Ibn Abi Uṣaibi'ah. The latter declared that Abu al-Faḍl was the most skilful physician of the time and that his success in curing the sick was miraculous. Abu al-Faḍl was the author of an Arabic pharmacopœia in twelve chapters, entitled "Aḳrabadhin," and treating chiefly of antidotes.

K. M. Sel.

FADUS CUSPIUS: Procurator of Judea after the death of Agrippa I. Appointed by Emperor Claudius in 44 C.E., he went to Palestine in the same year, and found the inhabitants of Peræa engaged in open hostilities against those of Philadelphia on account of boundary disputes. Fadus soon restored order, but he then incensed the Jews by the unreasonable demand that the sacred vestments of the high priest, which had been in the hands of the Romans from the year 6 to 36 C.E., but had been restored to the Jews by Vitellius, should again be given into the keeping of the Romans. With the consent of Fadus and the Syrian governor Cassius Longinus, the Jews sent an embassy to Rome, which obtained from Emperor Claudius the revocation of the procurator's demand. Fadus was also instrumental in checking the advance of the pseudo-prophet Theudas.

G. I. E.

FAGIUS, PAUL (Paul Büchlein): Christian Hebraist; born at Rheinzabern, in the Kurpfalz, 1504; died at Cambridge, England, Nov. 13, 1549. He studied at the universities of Heidelberg and Strasburg, and became successively pastor at Isny, professor and preacher at the University of Strasburg, and professor of Hebrew at Cambridge. He learned Hebrew from Elijah Levita and established a Hebrew press at Isny. He translated into Latin the following works: Pirḳe Abot (1541); Levita's "Tishbi" (1541); Tobit (1542); "Alfabeta de Ben Sira" (1542); "Sefer Amanah" (1542); David Ḳimḥi's commentary on Psalms, ch. i.–x. (1544); a part of the festival prayers under the title "Præcationes" (1542). He also edited Targum Onḳelos (1546), and wrote an exegetical work on the first four chapters of Genesis (1542); an elementary Hebrew grammar (1543); and two books, "Liber Fidei seu Veritatis" (1542) and "Parvus Tractulus" (1542), endeavoring to prove from the works of two Jews the truth of Christianity.

FAIRS: Periodical assemblies for the purchase and the sale of goods. Talmudic authorities were opposed to the attendance of Jews at fairs on the ground that they are an outgrowth of pagan festivals. The Talmudic word for fair, "yarid," which is still in use among the Jews, is, according to Hoffmann ("Zeitschrift für Assyriologie," 1896, pp. 241–246), akin to the Arabic "warad" (to go down to the water), and originated in the religious processions made to the ponds near the temples.

Ancient Fairs.

There were three cities in Palestine in which fairs were held—Gaza, Tyre, and Boḥna; the last-named is specially denounced as an idolatrous place (Yer. 'Ab. Zarah i. 4; Gen. R. xlvii.). In contrast with the custom of the time of Ezekiel, when the Jews transacted all sorts of business at the fairs of Tyre (xxvii. 17), only slave-buying was permitted by the Talmudic authorities, and that only in order that the slaves might be taken away from idolatry (Yer. 'Ab. Zarah i. 1, 4). R. Ḥiyya bar Abba, having bought a pair of sandals at the fair held at Tyre, was severely censured by R. Jacob b. R. Abba (*ib.*).

During the Middle Ages these restrictions were removed, and Jews were the chief frequenters of the fairs, even in places where their permanent residence was forbidden by law. But they had to pay special admission-fees. For instance, at the three annual fairs held at Leipsic in the last years of the seventeenth century the Jewish merchants, on their arrival at the gate of the town, were required to purchase tickets at the price of ten thalers and four groschen each, while women and servants were amerced in half that sum. The authorities of Leipsic kept a careful register of the names of all the Jewish merchants who attended the fairs, and deducted a percentage from their earnings. During the years 1675–1700 the number of Jewish merchants arriving at the Leipsic fairs was 18,182, among them being 2,362 women, servants, brokers, and musicians, who were admitted at half price; their admission-fees alone amounted to 173,000 thalers. It was customary to buy goods at the Easter fair and pay for them at the Michaelmas one. But during the Middle Ages fairs were not merely centers of trade for the Jews; they were also rendezvous for Talmudic scholars, especially in Poland, where scholars who had just completed their terms at the yeshibot would gather in hundreds, with their masters—in summer, at the fairs of Zaslavl and Jaroslav; in winter, at Lemberg and

Lublin. Public disputations on rabbinical matters were held at the fairs.

On these occasions marriages were also arranged—according to Hanover, "Yewen Meẓulah," hundreds, and even thousands, annually. Jair Ḥayyim Bacharach reports that he made several speeches, the first when he was twenty-four years old, at the fair of Frankfort-on-the-Main ("Ḥawwot Ya'ir," p. 230a).

Students at the Fairs.

At a still earlier period Jews in great numbers attended the fairs at Troyes (France), especially at the time of Rashi. At these meetings important points concerning Judaism were decided. The Council of Four Lands, instituted about the middle of the sixteenth century, originated at the fairs of Lublin and Jaroslav.

In Little Russia Jews were permitted to visit the fairs in 1727, though they were not allowed to remain. The great fair of Nijni-Novgorod is a modern counterpart, frequented by Jews from Persia, India, Khiva, and Bokhara, whose merchandise consists mainly of Asiatic fancy goods. At the fairs of Kharkov and Poltava contracts for very large amounts are closed with the Jews, who trade chiefly in wool, grain, and leather. The business of the fair of Kiev is also mainly in the hands of the Jews, who originally dealt in sugar. As Jews are not allowed to live in Great Russia, only merchants of the first and second gilds and their agents may attend the fairs of Nijni-Novgorod, Irbit, Kiev, and Kharkov.

FAIRY-TALES. See FOLK-TALES.

FAITH (אמונה: comp. אמן, Deut. xxxii. 21): In Biblical and rabbinical literature, and hence in the Jewish conception, "faith" denotes not belief in a dogmatic sense (see SAUL OF TARSUS), but either (*a*) faithfulness (from the passive form "ne'eman" = "trusted" or "trustworthy," Deut. *l.c.*; comp. Deut. xxxii. 4: "a god of faithfulness" ["emunah"; A. V. "truth"]; Ps. xxxvi. 6 [A. V. 5]; Prov. xx. 6, xxviii. 20: "a man of faithfulness" [A. V. "a faithful man"]; Hosea ii. 22 [A. V. 20]: "I will even betroth thee unto me in faithfulness"; Jer. vii. 28: "faithfulness [A. V. "truth"] is perished"; Ecclus. [Sirach] xlvi. 15) or (*b*) confidence and trust in God, in His word, or in His messenger (Hab. ii. 4: "The just shall live by his faith"; comp. Gen. xv. 5 [A. V. 6]: "He [Abraham] believed in the Lord; and he counted it to him for righteousness"; II Chron. xx. 20: "Believe in the Lord your God, so shall ye be established"; Isa. vii. 9: "If ye will not believe [that is, have faith], surely ye shall not be established").

In this sense of perfect trust in God the Rabbis laud and insist on faith as highly meritorious (see the classical passage on "amanah" in Mek., Beshallaḥ, 6 with reference to Ex. xiv. 31); whereas those lacking faith ("meḥusare amanah," Mek., Beshallaḥ, Shirah, 2; comp. ὀλιγοπιστοὶ [= "men of little faith" = קטני אמונה], Matt. vi. 30), are greatly blamed; the world's decline is brought about by the disappearance of "the men of faith" (Soṭah ix. 12).

Only in medieval times did the word "emunah" (faith) receive the meaning of dogmatic belief, on which see ARTICLES OF FAITH.

K.

FAITUSI, BARUCH B. SOLOMON: Preacher in Tunis toward the end of the eighteenth century. He was inclined toward mystical and cabalistic studies. His "Meḳor Baruk," containing sermons on the weekly portions, commentaries on various Talmudic treatises, and cabalistic discourses, was published at the expense of Joshua ben Abraham Lombroso in Leghorn (1790).

S. S. M. K.

FAITUSI, JACOB B. ABRAHAM: Talmudist; lived in Tunis, and later in Jerusalem; died at Algiers July, 1812. He traveled in the interest of the Jerusalem community. He wrote: "Berit Ya'aḳob," containing sermons, a commentary on Bezalel's "Shiṭṭah Meḳubbeẓet" on Soṭah, and notes of the Geonim on Nedarim and Nazir, with elucidations by Abraham b. Musa (Leghorn, 1800); "Mizbaḥ Kapparah," containing commentaries (his own and others) on various Talmudic treatises, and several sermons on charity (*ib.* 1810; 2d ed., Lemberg, 1861); "Yerek Ya'aḳob," containing cabalistic notes on the Pentateuch and several treatises of the Talmud, as well as responsa, edited by David Ḥayyim Faitusi, son of the author.

FALAISE (Hebrew, פלייזא or פליישא): Capital of the arrondissement of the department of Calvados, in Normandy, France, and till 1206 under English rule. It seems to have had a considerable Jewish community in the Middle Ages. Jacob and Morellus of "Falesia" were among the Jews authorized (1204) to live at the Châtelet at Paris. A decree of the Court of Exchequer of Falaise, issued in 1220 to avenge the murder of a Jew of Bernai, made all the citizens responsible, excepting those who had responded to his cries for help. In 1299 the taxes paid by the Jew Abraham and his coreligionists of Falaise amounted to seventy-five livres.

The following Jewish scholars of Falaise are known: Simson ben Joseph, the tosafist; Samuel ben Solomon, called also "Sire Morel"; Ḥayyim Paltiel; Moses of Falaise; Yom-Ṭob of Falaise.

FALAQUERA (PALQUERA), SHEM-ṬOB BEN JOSEPH: Spanish philosopher and poet; born 1225; died after 1290. He was well versed in Arabic and Greek philosophy, and had a fine critical sense. Falaquera unfortunately gives no information concerning his own personality. He was the author of:

Iggeret Hanhagat ha-Guf we ha-Nefesh, a treatise in verse on the control of the body and the soul.

Ẓeri ha-Yagon, on resignation and fortitude under misfortune. Cremona, 1550.

Iggeret ha-Wikkuaḥ, a dialogue between an orthodox Jew and a philosopher on the harmony of philosophy and religion, being an attempt to prove that not only the Bible, but even the Talmud, is in perfect accord with philosophy. Prague, 1810.

Reshit Ḥokmah, treating of moral duties (and giving the so-called "ethical epistles" of Aristotle), of the sciences, and of the necessity of studying philosophy. In this Shem-Ṭob treats of the philosophy of Aristotle and Plato. This and the preceding work have been translated into Latin (Bibliothèque Nationale, Paris, MS. Latin, No. 6691A).

Sefer ha-Ma'alot, on the different degrees of human perfection; ed. L. Venetianer, 1891.

Ha-Mebaḳḳesh, a survey of human knowledge in the form of a dialogue in rimed prose interspersed with verse. This work is a remodeling of the "Reshit Ḥokmah." Amsterdam, 1779.

Sefer ha-Nefesh, a psychological treatise according to the Arabian Peripatetics, especially Avicenna. Brody, 1835.

Moreh ha-Moreh, commentary on the philosophical part of the "Moreh Nebukim" of Maimonides, with an appendix containing corrections of the Hebrew translation of Samuel ibn Tibbon. Presburg, 1837.

Letter in defense of the "Moreh Nebukim," which had been attacked by several French rabbis; published in the "Minḥat Ḳena'ot." Presburg, 1838.

Extracts from Ibn Gabirol's "Meḳor Ḥayyim," published by Solomon Munk in his "Mélanges de Philosophie Juive et Arabe." Paris, 1859.

De'ot ha-Filusufim, containing Aristotle's "Physics and Metaphysics" according to Ibn Roshd's interpretations (Steinschneider, "Cat. Hebr. MSS." Leyden, No. 20).

Iggeret ha-Musar, a compilation of ethical sentences (comp. "Orient, Lit." 1879, p. 79).

Megillat ha-Zikkaron, a historical work, no longer in existence, quoted in the "Mebaḳḳesh."

Iggeret ha-Ḥalom, a treatise on dreams, mentioned in "Moreh ha-Moreh," iii., ch. 19, p. 131.

G. I. Br.

FALASHAS: Jews of Abyssinia. A colony of Jews exists in Abyssinia known under the denomination of "Falashas" or "Emigrants." They are also called "Kaila"; in the Walkait and Tchelga regions they are known as "Foggara," and the Ilmormas or Gallas give them the name of "Fenjas." In their families they make use of the expression "house of Israel," or simply "Israel"; the word "Aihud" (= "Jew") is almost unknown. The origin of the Falashas is unknown. According to a tradition preserved by them and recorded by Bruce, who traversed Abyssinia in the eighteenth century, they left Jerusalem in the retinue of Menilek, the son of Solomon and the Queen of Sheba. After a lengthy residence on the coast, about the time when the commerce of the Red Sea passed into foreign hands they appear to have withdrawn into the interior of the country, where they applied themselves to the fabrication of pottery. Others believe the Falashas to be descendants of prisoners of Shalmaneser, or of Jews driven from Judea when Jerusalem was destroyed in the time of Titus and Vespasian. But Joseph Halévy, who visited them in 1868, thinks that the Jewish element of the Falashas proceeds especially from the Himyarites captured in Ethiopia by the king Kaleb, conqueror of Dhu-Nuwas. Taking refuge in the mountains beyond the Takazze, they converted a part of the Agaus, and through intermixture with them produced the Falasha type. This opinion appears to be the more probable.

Manners, Customs, Dress.

The Falashas are in general darker and more corpulent than the Amharas, among whom they live. Their hair is shorter and often curly; their eyes are smaller, and their faces not so long. Their houses are built in the same fashion as those of other Abyssinians; they use the same implements and speak the same language. Their usual food is teff or "dagussa," and they do not eat raw meat. Their drink is hydromel or beer made from the dagussa-grains. Their dress is the same as that of the Christians; their priests wear turbans like Christian priests. The Roman toga is their gala-dress; during work they wear short trousers or a waist-cloth descending to the knees. For out-of-door wear the women put on a long shift edged with different colors; they also wear bracelets and earrings, but do not pierce the nose as do the tribes of the Tigre district. Laymen have no head-dress, but usually shave the head; and they walk barefoot. The woman is the equal of the man, and is neither veiled nor confined in a separate abode. Married couples apply themselves to their occupations in unison.

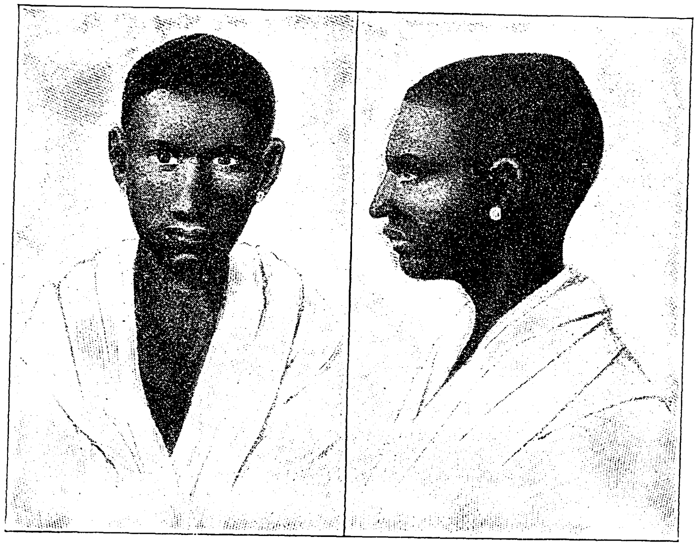
The Falashas ply all trades, though agriculture is their chief occupation. They make the articles necessary for the home or the field; they become masons, architects, blacksmiths, and weavers, but reject commerce. They marry at a mature age, and are monogamous. Divorces, which are very infrequent, take place in public assembly and not by writing. The children are taught by the "debteras" or scribes; education is very rudimentary, and consists in teaching them to read the Bible (especially the Psalter) and sacred history, and to recite prayers. Writing is seldom taught. As has been stated, the Falashas generally speak Amharic, the official language of Abyssinia, but in their homes they employ an Agau dialect, which is known under the name of "Falashina" or "Kailina." In the Kuara region, to the northwest of Lake Tana, it has a peculiar pronunciation. It is this dialect into which they translate the Bible and in which they recite their prayers.

The leaders of the Falashas are divided into three classes, "nezirim," "kohanim," and "debteras." The nezirim are said to have been founded by Abba Ze'ira in the fourth century. They live together in large numbers, and eat only food prepared by one of their own number. They are visited by other Falashas, and when the first-born is not redeemed he is given over the nezirim. The kohanim live with the other Falashas, often taking the place of the nezirim, by whom they are ordained. They are compelled to marry; but when the wife dies they do not marry again. They are the ritual slaughterers, and receive part of the animal offered. The debteras assist the kohanim in their work.

The religion of the Falashas is pure Mosaism, based upon the Ethiopic version of the Pentateuch, but modified by the fact that they are ignorant of the Hebrew language. Indeed, they appear never

Leaders and Religion of the Falashas.

to have known the Hebrew text of the Bible. They have no Hebrew books at all, despite the exaggerated reports of some scholars (Ludolf, "Hist. Æthiopica," i. 14; "Orient, Lit." 1848, p. 262). They read the Bible in Geez, and know nothing of Mishnah or Talmud, although there are a few points of contact between Falasha and Rabbinic, Karaite, and Samaritan observances. They follow generally the Pentateuch, but do not observe the customs connected with the ẓiẓit, tefillin, and mezuzot; nor do they celebrate either Purim or Ḥanukkah. They keep the Sabbath very rigorously, calling it "Sanbaṭ Ḳadma'i," following the tradition that the Sabbath was created before heaven and earth. In fact, they believe Sanbaṭ to be an angel placed over the sun and the rain, who will precede them on the way to Jerusalem in the days of the Messiah. The kohanim spend Friday night in the "masjid" (synagogue), and commence their prayers with the crowing of the cock. After prayers the people bring their food to the masjid, and all eat there together. On Sabbath they do not light a fire, nor do they cross a river. They sanctify the new moon, fasting on the eve. They preserve in "Nisan," "Ab," "Lul," and "Teshran," some remembrance of the Hebrew names of the months, though in ordinary life they use the solar cycle.



Falasha Woman, Showing Full Face and Profile.

(After Lefebure, "Voyage en Abyssinie.")

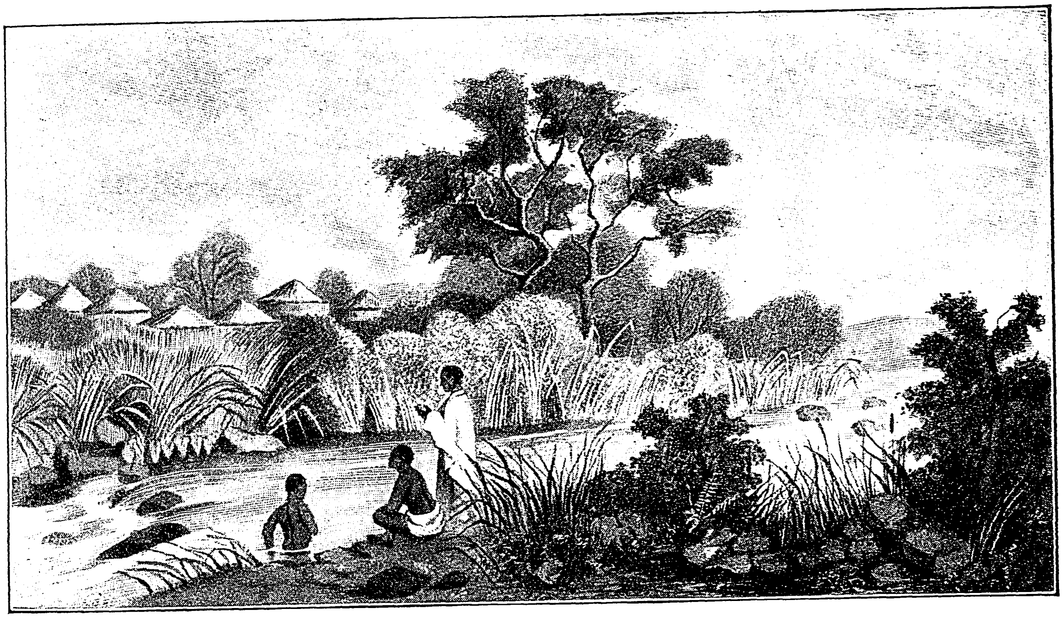
Every four years the Falashas add a month in order to equalize the lunar with the solar year. They fast on the tenth day of every month in remembrance of the Day of Atonement, on the twelfth day in honor of the angel Michael, and on the fifteenth in remembrance of the Passover and Pentecost. The yearly celebration of the Passover is observed in the following manner: On the eleventh, twelfth, and thirteenth, and until the evening of the fourteenth day, they eat only a peculiar sort of bread called "shimbera." They slaughter the paschal lamb at sunset on the fourteenth day. Their maẓẓah is made of shimbera and wheat. Pentecost is celebrated on the 12th of Siwan, as they commence to count from the last day of the Passover festival. It is for them also the day of the giving of the Law. New-Year's Day is called the "Festival of Shoferot"; the Day of Atonement, the "Day of Forgiveness," on which day God appeared to Jacob. During the Feast of Tabernacles they do not build booths, but, according to Flad, eat maẓẓot for seven days. The last day of the ninth month is the Festival of Ingathering, when they go up into the mountains, taking gifts to the nezirim, and pray and offer sacrifices. The tenth day is the Harvest Festival, when they give tithes to the kohanim. They have many fast-days —*e.g.*, the second and fifth days of the week, and, in commemoration of the destruction of the First Temple, from the 1st to the 9th of Tammuz. They do not commemorate the destruction of the Second Temple.

Festivals.

The synagogue or masjid of the Falashas consists of a Holy of Holies and a sanctuary. To the right of the door of the Holy of Holies is a table on which is placed the Book of the Law; to the left are the vestments of the priests. Two vessels are placed there, one containing the ashes of the red heifer, the other "the water of sin." On the right hand of the eastern gate is a stone altar 5 x 5 ells, and one ell high. The women's court is to the south of the masjid, while the congregation assembles in the northern end. Offerings are made more frequently than is commanded by the Pentateuch. The ceremonials are accompanied with the noise of sistra, together with the burning of incense; after each passage, recited in Geez, the translation is read in Kailina, and the hymns are also chanted in that dialect. Circumcision is performed on the eighth day, on both girls and boys; the operator is a woman. If the eighth day falls on a Sabbath, the ceremony is performed on the ninth. When the first-born is not redeemed by money he is trained as a nazir. A first-born must marry a woman who also is a first-born. The first-born of animals is given to the priest when it is one year old.

The Falashas are monogamists; they know nothing of the levirate. Before death they make confession to a nazir. The mourners put dust on their heads and cut themselves, while the nazirs recite psalms and prayers. They bury their dead at once, not in coffins, but in graves lined with stones. Lamentations are continued for seven days; on the third and seventh days an offering is brought, and it is believed that until this has been done the soul remains in the "valley of death." During the seven days the mourners' food is brought to them by friends. Among the Falashas, as among the Christians, are found hermits who enjoy a great reputation for knowledge and sanctity. They are the fathers of families who have made vows of chastity after the death of their wives.

The Falashas observe very carefully the distinctions between "clean" and "unclean." Next to each dwelling is a tent to which the unclean person retires. At the end of the day he must bathe. In the case of a death the mourners retire for seven days. The Falashas are also very careful to slaughter animals in strict accordance with the ritual. Before being cooked the flesh is cut into small pieces, and any traces of blood which remain are removed. They know nothing, however, of the distinction between that which is "meaty" and that which is "milky." They wash their hands and recite certain prayers before eating.



Falasha Village at Balankab.
(After Stern, "Travels Among the Falashas.")

The prayers of the Falashas have been published, with a Hebrew translation, by J. Halévy (Paris, 1877) from a manuscript which he brought back with him from Abyssinia. The following may serve as a specimen:

> "Praised be Thou, God of Israel, God of Abraham, God of Isaac, God of Jacob, God of the whole earth. God, give us Thy blessing. Bless us with the blessing with which Thou didst bless Abraham. Bless us as Thou didst bless the storehouse of Abitara [a charitable woman]. Keep our going-out and our coming-in, Thou who art the keeper of Israel. Keep us in peace. Praise the Lord, O ye heavens. Let the whole earth praise Him. Amen!"

Falashas exist in Tigre, in Shire, among the Azobo-Gallas, and as far as Shoa. In Amhara they have established themselves in the Walkait and along the Takazze, from the Semien to the Lasta. Less numerous to the east of Lake Tana, they are not found at all in Miethya and Gojam; but they form a considerable part of the inhabitants of Dembea and of Tchelga, and are much scattered to the west of Lake Tana, in Kuara, and elsewhere.

Distribution and History. In the tenth century a Jewish queen named "Judith" (or "Esther" or "Terdaë-Gobaz"), at the head of the Falashas of the province of Semien, appears to have dethroned a king of Abyssinia at Axum, and to have established a dynasty which occupied the throne for about three centuries. Joseph Halévy has doubted this story, and not without cause, as further researches have shown. Under the rule of Amda-Seyon I. (1314-44) Jews dwelt in Semien, Wogara, Ṣalamt, and Ṣagade. One of this king's generals suppressed a rebellion in Begameder, inhabited by Christians converted to Judaism. A Falasha revolt took place under Isḥaḳ (1412-29). The reign of Zara' Ya'eḳob (1434-68) was also troubled by a rebellion of Amba-Nahad, the governor of Salamaut; of Sagay, governor of Semien; and of Kantiba, all of whom had abjured Christianity and become Jews. The latter were then rigorously persecuted, as also under one Marḳos, general of Baeda-Maryam (1468-78), son of Zara' Ya'eḳob.

The wars which took place between the Abyssinians and the Mussulmans during the reigns of Lebna-Dengel (1508-40) and Galawdewos (1540-59) probably produced an alliance for common defense between the Christians and Jews of Abyssinia; but the latter were again attacked by Minas (1559-63), who during the first year of his reign proceeded to Semien and made war upon Rade'et the Falasha. This war was continued by his successor, Sartsa-Dengel (1563-1597). About 1578 the latter engaged in battle with the Abatis, a Falasha tribe, at Waina-Daga, and exterminated them. Two years later he made an expedition into Semien, seized upon Rade'et, and carried him off to Waj. In 1582 he conquered Kalef, another Jewish chief of Semien, and in 1587 made a fresh incursion into the country, attacked Gushn, brother of Gedewon, and slew him. At last in 1588 he carried his arms into Kuara. Under the reign of Susenyos (1607–32) Gedewon revolted and was subdued; he was killed by this ruler in 1626, and the Falashas of Dembea, terrified by the emperor's cruelty, embraced Christianity. In 1627 a battle occurred between Susenyos and the Falashas. Toward the end of the eighteenth century they seem still to have had a separate political existence in Semien, but they were at that time finally reduced to vassalage. In Gondar they are the masons and smiths ("Israelitische Annalen," 1839, p. 71); in other places, also carpenters, merchants, and agriculturists. In 1894 Falashas commenced to arrive at Massuah on the coast, desirous of advancing trade with Italy ("Allg. Zeit. des Jud." Oct. 5, 1894, p. 4). King Theodore, approached by Protestant missionaries who wished to convert the Abyssinians, authorized them to attempt the conversion only of the Falashas.

In Hebrew writings there are only a few and, in general, indistinct references to the Falashas. The earliest account is in the diary of Eldad the Danite (9th cent.). His account, especially of the halakot of the Abyssinian Jews, has been carefully studied by A. Epstein ("Eldad ha-Dani," Presburg, 1891). Most of the references date from the fifteenth to the seventeenth century, and are connected with the reports of "Prester John" and of the existence of the Ten Tribes. There is an evident confusion between the Jews of Abyssinia and those of India (both countries called "Cush" or "Ethiopia"). David ibn Abi Zimra (1479–1589) mentions in his Responsa (iv. 219) a question in regard to the Falashas. There is a possible reference in Obadiah of Bertinoro (1488). The cabalist Abraham Levi (1528), writing from Jerusalem, speaks of Falasha as being three days' journey from Suakin; he speaks of a Jewish king, and a Christian king, Theodorus, who killed 10,000 Jews in Salima in 1504. Levi's contemporary, Israel, mentions in a letter Jews who came from Cush, and a Jewish king who had Mohammedan and Christian subjects. Elijah of Pesaro (1532) speaks of the Jews in Ḥabesh, while Isaac ibn 'Aḳrish (1550), in the preface to his "Ḳol Mebasser," reports that he heard from an Abyssinian envoy in Constantinople that the Mohammedan governor there would have been annihilated had it not been for the help of the Jewish prince and his 12,000 horsemen. The Falashas are further mentioned by Moses de Rossi (1534; "J. Q. R." ix. 493); Abraham Yagel (16th cent.), who speaks of them as inhabiting the Mountains of the Moon; and Moses Edrei (1630), who knew of a Jewish king, Eleazar, in Abyssinia. Most of these references are to be found in Neubauer's article in "Sammelband" iv. of the Meḳiẓe Nirdamin, and in "J. Q. R." vol. i. ("Where Are the Ten Tribes?"). Compare also Lewin, "Wo Wären die Zehn Stämme Israels zu Suchen?" Frankfort-on-the-Main, 1901.

FALCES or **FALCET** (**פלסיט**): A town near Lerin, Navarre. Its Jewish community suffered greatly during the persecution of 1328. In 1366 it contained only eighteen families. Isaac Bonafos b. Shealtiel, son-in-law of Isaac b. Sheshet, lived there, probably as a physician.

FALCON. See Prey, Birds of.

FALERO, ABRAHAM ABOAB: Portuguese philanthropist; died at Verona 1642. At the beginning of the seventeenth century or perhaps even at the end of the sixteenth he settled at Hamburg. There he built a synagogue, named "Keter Torah," for the Portuguese community. He founded yeshibot wherever he could, his activity in this respect extending even to Palestine, and he was known as one who spent large sums in the ransom of captives. Toward the close of his life he went to Verona to see his son R. Samuel Aboab, and died there.

D. M. Sel.

FALK, EDUARD: German publicist; died in Paris July 7, 1863. Originally destined for a mercantile career, he later turned to study, and after having passed his examination at the gymnasium, entered the University of Berlin, whence he was graduated in 1858. He then entered the service of the state as assessor, and began at the same time his career as journalist, writing for the "Magdeburger Zeitung." He wrote a number of pamphlets on questions of the day, as "Brennuszug und Moskowitenthum, Mahnruf an das Deutsche Volk" (1859), in which he advocated the cause of Austria against Napoleon III., and on the suggestion of the Duke of Coburg, who took a great interest in his writings, he published this pamphlet in an enlarged edition under the title "Die Despoten als Revolutionäre." He also wrote: "Preussen's Aufgabe in Deutschland:

Rechtsstaat Wider Revolution," 1859; "Deutsche Federn in Oesterreich's Doppeladler"; "Gallischer Judaskuss, Antwort auf Edmond About's Schrift: Preussen im Jahre 1860," 1860; "Männer und Maassregeln," a defense of self-government; "Der Entlarvte Palmerston," 1861; and "Die Verfassung England's," 1862, which a year later passed into a second edition and an English translation. He then went to Paris to prepare himself for a new work on the development of political law in the European states since the French Revolution, with which he had hoped to enter upon an academic career in the University of Heidelberg, but he was killed in the French capital, being run over by an omnibus.

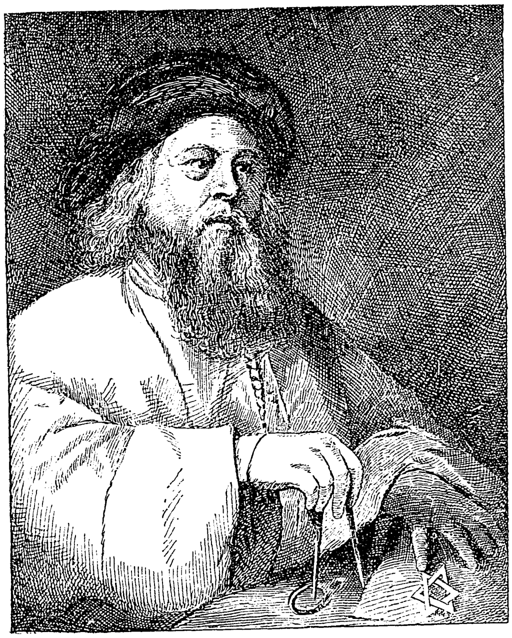
S. D.

FALK, ḤAYYIM SAMUEL JACOB (also known as **De Falk, Dr. Falk,** or **Falkon**): English cabalist and mystic; born about 1708; died in London April 17, 1782. Some writers give Fürth, others Podolia (Podhayce), as his birthplace. He was known as the "Ba'al Shem" of London. Falk left a diary, now in the library of the bet ha-midrash of the United Synagogue, which is a quaint medley of dreams, records of charitable gifts, book-lists, cabalistic names of angels, lists of pledges, and cooking-recipes.



Falk, the "Ba'al Shem."
(After a painting by Copley.)

Falk's contemporary R. Jacob Emden denounces him vehemently as an adherent of the false Messiah, Shabbethai Ẓebi, and accuses him of having sheltered the excommunicated Jew Moses David of Podhayce. Falk probably belonged to one of the fantastic sects that arose at this time in consequence of the Shabbethaian craze, but nothing definite is known of his early life except that his mother was buried at Fürth, to which congregation he bequeathed a sum of money. Falk claimed to possess thaumaturgic powers and to be able to discover hidden treasure. Archenholz ("England und Italien," i. 249) recounts certain marvels which he had seen performed by Falk in Brunswick, and which he attributes to a special knowledge of chemistry. In Westphalia at one time Falk was sentenced to be burned as a sorcerer, but escaped to England.

Received in London with hospitality, Falk rapidly gained fame as a cabalist and worker of miracles, and many stories of his powers were current. He could cause a small taper to remain alight for weeks; an incantation would fill his cellar with coal; plate left with a pawnbroker would glide back into his house. When a fire threatened to destroy the Great Synagogue he averted the disaster by writing four Hebrew letters on the pillars of the door. In a letter to Emden one Sussman Shesnowzi says of Falk:

> "His chamber is lighted up by a silver candlestick on the wall, with a central eight-branched lamp made of pure silver of beaten work. And albeit it contained oil to burn a day and a night it remained enkindled for three weeks. On one occasion he remained secluded in his room for six weeks without meat or drink. When at the conclusion of this period ten persons were summoned to enter, they found him seated on a sort of throne, his head covered with a golden turban, a golden chain round his neck with a pendent silver star on which sacred names were inscribed. Verily this man stands alone in his generation by reason of his knowledge of holy mysteries. I can not recount to you all the wonders he accomplishes. I am grateful in that I have been found worthy to be received among those who dwell within the shadow of his wisdom."

Tidings of these strange proceedings soon reached the outer world, and Falk began to have visitors of distinction. Archenholz mentions a royal prince who applied to Falk in his quest for the philosopher's stone, and was denied admittance. Ḥayyim Azulai mentions ("Ma'gal Ṭob," p. 13b) that when in Paris he was told by the Marchesa de Crona that the Ba'al Shem of London had taught her Cabala. Falk seems also to have been on intimate terms with that strange adventurer Baron Theodor de Neuhoff, who, expelled from his self-made kingdom of Corsica, settled in London and endeavored to restore his fallen fortunes by the discovery of ocean treasures. Falk records a mysterious meeting with Prince Czartoryski, probably the governor-general of Podolia, and with one Emanuel, whom he describes as "a servant of the King of France." He is also believed to have given the Duke of Orleans, to insure his succession to the throne, a talisman, consisting of a ring, which Philippe Egalité, before mounting the scaffold, is said to have sent to a Jewess, Juliet Goudchaux, who passed it on to his son, subsequently King Louis Philippe.

Falk's principal friends were the London bankers Aaron Goldsmid and his son. Pawnbroking and successful speculation enabled him to acquire a comfortable fortune. He left large sums of money to charity, and the overseers of the United Synagogue in London still distribute annually certain payments left by him for the poor.

FALK, JACOB JOSHUA BEN ẒEBI HIRSCH. See Jacob Joshua ben Ẓebi Hirsch Falk.

FALK (וולק), JOSHUA BEN ALEXANDER HA-KOHEN: Polish Talmudist; born at Lublin; died at Lemberg March 29, 1614. His name occurs as "RaFaK" (="R. Falk Kohen") and "MaHaRWaK" (="Morenu ha-Rab Walk Kohen"). He was a pupil of his relative Moses Isserles and of Solomon Luria, and became the head of the yeshibah of Lemberg. Many celebrated rabbis were his pupils, among them being Jacob Joshua b. Ẓebi of Cracow, the author of "Maginne Shelomoh." Falk was a great authority on rabbinical matters. At the meeting of the Council of Four Lands in 1607, during the Kremenetz fair, many of his proposals were approved. In 1611 Falk and Enoch Hendel b. Shemariah issued a bill of divorce at Vienna which occasioned lenghty discussions among the celebrated rabbis of the time, including Meïr of Lublin and Mordecai Yafeh (see "She'elot u-Teshubot MaHaRaM," Nos. 123 *et seq.*).

Falk was the author of various works, which are still popular and highly regarded among rabbinical scholars. They are: "Sefer Me'irat 'Enayim," a commentary to the Shulḥan 'Aruk, Ḥoshen Mishpaṭ, containing all the decisions of earlier authorities, with an index of their sources, Prague, 1606; "Bet Yisrael," a double commentary to the four Ṭurim (the first commentary, entitled "Derishah," contains explanations of responsa and decisions; the other, entitled "Perishah," explains the text of the Ṭurim and Bet Yosef: Yoreh De'ah and Eben ha-'Ezer, Lublin, 1635–1638; Ḥoshen Mishpaṭ, Frankfort-on-the-Main, 1712–16; and Oraḥ Ḥayyim, Berlin 1767); "Ḳontres 'al Dine Ribbit," a discourse on the laws relating to the prohibition of usury, followed by some "taḳḳanot" (ordinances by the Rabbis), Sulzbach, 1692; "Pene Yehoshu'a," homilies in the order of the parashiyyot, Zolkiev, 1742; "Sefer ha-Hosafah," a supplement to the "Darke Mosheh" of Moses Isserles, printed with the Ḥoshen Mishpaṭ, Dyhernfurth, 1796; novellæ on Talmudic treatises.

S. S. M. Sel.

FALK, MAX: Hungarian statesman and journalist; born at Budapest Oct. 7, 1828. The straitened circumstances of his parents threw him at an early age upon his own resources. He gave private lessons, and was the first to translate into German the works of the great Hungarian lyric poet Petöfi (1843). He also translated into Hungarian the plays of Karl Hugo. Having embraced Christianity and obtained his degree from the University of Budapest, he went to Vienna to study, and when the Revolution of March, 1848, broke out he joined the students' legion, doing yeoman's service in the cause of liberty. He also contributed to the "Studenten-Kurier" and "Der Freimüthige."

The outcome of the rising of October left Falk penniless and on the verge of despair. At this time he wrote an article for the "Oesterreichische Zeitung," advocating the restoration of the Hungarian constitution and emphasizing its importance for Austria itself. The article decided Falk's future career; he became a contributor to the paper and remained on its staff until it was suspended by the government. Falk then joined the staff of the "Wanderer." His articles were enthusiastically received in Hungary, and, with those contributed to the "Pesti Naplo," then the leading Hungarian paper, won him the recognition of Hungarian patriots. He was soon brought into personal relations with the great political leaders of the country, among them being Count Stephan Széchényi. His "Count Széchényi and His Time" is a memorable work.

Falk became a member of the Hungarian Academy of Sciences in 1863. He incurred the displeasure of Minister Schmerling by his bold advocacy of the rights of Hungary, and was imprisoned for three months on account of an objectionable article in the "Wanderer." In 1866 he was appointed instructor of Hungarian to the Empress Elizabeth, whose warm interest in Hungary was due to a large extent to him. In 1867 he returned to his native city and became editor-in-chief of the "Pester Lloyd," raising that paper to a high level of excellence.

Falk has always been an active politician. Since 1869 he has been a member of the Hungarian House of Representatives. He is especially known in connection with the committee on foreign relations of the Hungarian delegation, and has been decorated by the Emperor Francis Joseph with the Komthur Cross of the Order of Saint Stephen.

FALKENSOHN, ISSACHAR BEHR. See Behr, Issachar Falkensohn.

FALKSON, FERDINAND: German physician and political writer; born at Königsberg Aug. 20, 1820; died there Aug. 31, 1900. He was educated at the universities of Königsberg, Berlin, and Halle, graduating from the first-named as M.D. in 1843. In the same year he engaged in practise in his native city, and in 1844 was appointed physician to the poor of the Jewish community, a position which he held until his death.

In 1845 Falkson was betrothed to a Christian, but being unable to obtain in his own country the necessary permission to marry, he went to England, and was married there in 1846. On his return to Königsberg in the same year, he was accused of violating the state laws. The case occupied the courts for three years, and was finally won by Falkson (1849). He was active in politics, and at the time of his death was senior of the chamber of aldermen in Königsberg.

Falkson published: "Aktenstücke Meines Eheprocesses," 1845, 1847; "Gemischte Ehen Zwischen Juden und Christen," Altona, 1845; "Die Emancipation der Juden und die Emancipation der Denkenden, *ib.* 1845; "Giordano Bruno," 1846; "Memoiren (1840–48)," 1888; "Reisebilder," 1890.

S. F. T. H.

FALL OF ANGELS: The conception of fallen angels—angels who, for wilful, rebellious conduct against God, or through weakness under temptation,

In Apocalyptic Writings.

thereby forfeiting their angelic dignity, were degraded and condemned to a life of mischief or shame on earth or in a place of punishment—is wide-spread. Indications of this belief, behind which probably lies the symbolizing of an astronomical phenomenon, the shooting stars, are met with in Isa. xiv. 12 (comp. Job xxxviii. 31, 32; see Constellations). But it is in apocalyptic writings that this notion assumes crystallized definiteness and is brought into relations with the theological problem of the origin and nature of evil and sin. That Satan fell from heaven with the velocity of lightning is a New Testament conception (Luke x. 18; Rev. xii. 7–10). Originally Satan was one of God's angels, Lucifer, who, lusting for worldly power, was degraded. Samael (Yalḳ., Gen. 25), originally the chief of the angels around God's throne, becomes the angel of death and the "chieftain of all the Satans" (Deut. R. xi.; comp. Matt. xxv. 41).

But it is especially Samḥazai and Azael of whom the fall is narrated. In Targ. Pseudo-Jonathan to Gen. vi. 4 they appear as the "nefilim" (A. V. "giants"), undoubtedly in consequence of an incorrect interpretation of this word as "those that fell from heaven." The story of these two angels is found in brief form in Yalḳ., Gen. 44; it has been published by Jellinek ("B. H." iv. 127; originally in Midrash Abkir; comp. Rashi, Yoma 67b; Geiger, "Was Hat Mohammed aus dem Judenthume Aufgenommen?" p. 107).

Woman the Cause of Fall.

As in the case of man, so in that of the angels woman was the cause of the lapse. Naamah, the wife of Noah (Gen. R. xxiii. 3), was one of the women whose great beauty tempted the angels to sin (Naḥmanides to Gen. iv. 22). As regards Azazel and Samḥazai, mentioned above, it was a young woman named איסטהר ("Isṭar," "Esther") that proved fatal to their virtue. These angels, seeing God's grief over the corruption of the sons of men (Gen. vi. 2–7), volunteered to descend to earth for the purpose of proving their contention that, as they had foretold at the creation of Adam, the weakness of man (Ps. viii. 5) was alone responsible for his immorality. In their new surroundings they themselves yielded to the blandishments of women. Samḥazai especially became passionately enamored of Istar. She, however, would yield to his importunities only on the condition that he tell her the name of Yhwh (see God, Names of), by virtue of which he was enabled to return to heaven. As soon as she was possessed of the secret, she rose to heaven herself, and God rewarded her constancy by assigning her a place in the constellation of Kimah. Samḥazai and his companion thereupon took to themselves wives and begat children (comp. the bene Elohim, Gen. vi. 4). Meṭaṭron soon after sends word to Samḥazai concerning the approaching flood. This announcement of the world's and his own children's impending doom brings Samḥazai to repentance, and he suspends himself midway between heaven and earth, in which penitent position he has remained ever since. Azazel, who deals in rich adornments and fine garments for women, continues in his evil ways, seducing men by his fanciful wares (hence the goat sent to Azazel on the Day of Atonement).

Variants of this story are not rare. According to Pirḳe R. El. xxii., "the angels that fell from heaven," seeing the shameless attire of the men and women in Cain's family, had intercourse with the women, and in consequence were deprived of their garment of flaming fire and were clothed in ordinary material of dust. They also lost their angelic strength and stature. Samael was the leader of a whole band of rebellious angels (*ib.* xiii.).

In the Book of Enoch eighteen angels are named (Enoch, vi. 7) as chief participators in the conspiracy to mate with women. Samiaza is the leader, and Azael is one of the number (but see Charles, "Book of Enoch," p. 61, note to vi.-xi.). Azael, however, imparts to men all sorts of useful as well as secret knowledge and the art of beautifying eyes (Enoch, viii. 1; comp. Targ. Pseudo-Jon. to Gen. vi. 4). For other versions of the story or reminiscences thereof, see Book of Jubilees, v. 1, 6–11; vii. 21, 25; Test. Patr., Reuben, 5, and Naphtali, 31; Josephus, "Ant." i. 3, § 1; Philo, "De Gigantibus."

Later Jewish Tradition.

The later Jewish tradition, shocked at the notion of the angels' fall, insisted upon interpreting the bene Elohim of Gen. vi. 1–4 as referring to men (Gen. R. xxvi.: "sons of judges"; comp. Tryphon in Justin, "Dial. cum Tryph." p. 79). The Samaritan version reads בני שלטניה; Onḳelos, רברביא. The "Sefer ha-Yashar" ("Bereshit," end) ascribes the shameful conduct to magistrates and judges (see Charles, "Book of Jubilees," p. 33, note).

The cabalists give the older view. In the Zohar (iii. 208, ed. Mantua) Aza and Azael fall and are punished by being chained to the mountains of darkness. According to another passage (i. 37), these two rebelled against God and were hurled from heaven, and they now teach men all kinds of sorcery (for other quotations from cabalistic commentaries on the Pentateuch see Grünbaum, "Gesammelte Aufsätze zur Sprach- und Sagenkunde," p. 71).

Allusions to these fallen angels occur also in the Koran (sura ii. 96); but their names are there given as "Harut" and "Marut." Their fate in Arabic tradition is identical with that of Samḥazai and Azael (Geiger, *l.c.* p. 109). The refusal to worship Adam (suras ii. 32, vii. 11, xv. 29, xxxviii. 73) brings on the Fall, just as it does in the Midrash Bereshit Rabbati of R. Moses ha-Darshan (see Grünbaum, *l.c.* p. 70).

Bibliography: Grünbaum, *Gesammelte Aufsätze zur Sprach- und Sagenkunde*, Berlin, 1901.

E. G. H.

FALL OF MAN: A change from the beatific condition, due to the alleged original depravity of the human race. The events narrated in Gen. iii. leading up to the expulsion of Adam and Eve from Eden are held to support the doctrine of the fall of man and to be the historical warrant for its assumption. According to this doctrine, man (and woman) was first created perfect and without sin. Placed by God in the Garden of Eden, he found his wants provided for. In a state of innocence, he was not aware of his nudity, since, not having sinned, he was without the consciousness of sin and the sense of shame had not yet been aroused in him. Man could have continued in this blissful condition and would never have tasted either the bitterness of guilt or that of death had he not disobeyed the divine command, according to which he was not to partake of the fruit of the tree of life, under penalty of immediate death. (See ADAM; EDEN; EVE.) Expelled from the garden under the curse which their disobedience brought upon them, Adam and Eve were doomed to a life of labor and pain which was the prelude to death. Happiness, innocence, and deathlessness were forever forfeited. And in their fall were involved all of their descendants, none of whom in consequence was exempt from the corruption of death and from sin.

This theological construction of the narrative in Genesis assumes the historical authenticity of the account; and finds corroborative evidence in the many stories current among various races positing at the beginning of human history a similar state of blissful perfection which, through the misdeeds of man, came irretrievably to an end, giving way to conditions the reverse of those hitherto prevailing. Among these stories, that of Zoroastrian origin, concerning Yima, the first man, presents a striking parallel to Genesis. Having committed sin, he is cast out of his primeval paradise into the power of the serpent, which brings about his death. In a later version concerning the first pair, Masha and Mashyana, is introduced the incident of eating forbidden fruit at the instigation of the lying spirit. For other parallels see J. Baring-Gould, "Legends of Old Testament Characters"; Tuch, "Genesis," on Gen. iii.

Views of the Critical School.

The critical school views these parallels in the light of non-Hebrew attempts to solve the problem with which Gen. iii. is also concerned, viz., the origin of evil. This problem at a comparatively early period of human thought impressed itself upon the minds of men, and, owing to the fundamental psychic unity of the human race, found similar solution. Sin and suffering, the displeasure of the gods and human misery, are correlatives in all early religious conceits. As actual man suffered, struggled, and died, this fate must have been brought upon him by disobedience to the divine will and by disregard of divine commands. Under tribal organization and law, combined responsibility on the part of the clan for the deeds of its component members was an axiomatic proposition. The guilt of the father necessarily involved all his descendants in its consequences. These two factors—the one psychological and religious, the other sociological—are the dominant notes in the various stories concerning the forfeiture of pristine happiness and deathlessness by man's sin.

Biology and anthropology are in accord in demonstrating that the assumed state of perfection and moral innocency is never found in the beginning of human civilization. There is no proof of a fall either physical or moral. The reverse is, on the whole, true: all evidence points to a rise from primitive imperfection.

The story in Gen. iii. belongs, in all probability, like the other incidents related in the Book of Genesis up to the twelfth chapter, to a cycle of adaptations from Assyro-Babylonian creation- and origin-myths (see COSMOGONY; EDEN), though the exact counterpart of the Biblical narrative of the temptation and expulsion has not as yet been found in the tablets. Two human figures, with a serpent behind them, stretching out their hands toward the fruit of a tree, are depicted on a Babylonian cylinder; but the rendering of the third creation-tablet is so much in doubt that no conclusion may safely be based on this representation (see Sayce, "Ancient Monuments"; Schrader, "K. A. T." 2d ed., p. 37; Davis, "Genesis and Semitic Traditions").

The Biblical myth elaborates also culture-elements. It reflects the consciousness that in remote days man was vegetarian and existed in a state of absolute nudity, fig-leaves and other foliage furnishing the first coverings when advancing culture aroused a certain sense of shame, while subsequently hides and skins of animals came to be utilized for more complete dress.

Relation to Old Testament Theology.

The story of the fall of man is never appealed to in the Old Testament either as a historical event or as supporting a theological construction of the nature and origin of sin. The translation in the Revised Version of Job xxxi. 33 and Hosea vi. 7 ("Adam" for the Hebrew אדם), even if correct, would not substantiate the point in issue, that the Old Testament theology based its doctrine of sin on the fall of Adam. The Garden of Eden is not even alluded to in any writings before the post-exilic prophets (Ezek. xxviii. 13, xxxi. 9; Isa. li. 3; but comp. Gen. xiii. 10, and even in these no reference is found to the Fall. The contention that, notwithstanding this surprising absence of reference to the story and the theme, the Hebrews of Biblical times nevertheless entertained the notion that through the fall of the first man their own nature was corrupted, is untenable. Ps. li. 5, the classic passage of the defenders of the theory, is, under a fair interpretation, merely the avowal of the author that when he or the Israel of whom he speaks was born, Israel was unfaithful to YHWH; and Ps. xiv. 3 does not give a general statement applicable to the human race, but depicts a condition existing at a certain period in Israel.

The fall of man, as a theological concept, begins to appear only in the late Apocrypha and pseudepigrapha, probably under Essenic (if not Judæo-Christian) influences. In II Esd. iii. 7 it is stated that when Adam was punished with death, his posterity also was included in the decree (the variants in the versions, Ethiopic, Armenian, Syriac, and Latin, all point to a Hebrew דורות). II Esd. iii. 21 has: "For on account of his evil will the first Adam fell into sin and guilt, and, like him, all that were born of him." This view is again stated in ch. vii. 48: "O Adam, what hast thou done! When thou sinnest, thy fall did not come over thee alone, but upon us, as well, thy descendants" (comp. Ecclus. [Sirach] xxv. 24, "from woman was the beginning of sin; on her account must we all die"). Similarly, in the Apocalypse of Baruch (xvii. 3)

Adam is blamed for the shortening of the years of his progeny. Yet it would be hasty to hold that in these books the doctrine is advanced with the rigidity of an established dogma. Even in II Esd. iii. 9 the thesis is suggested that the consequence of the Fall came to an end with the Flood, when a generation of pious men sprang from Noah, and that it was only their descendants who wantonly brought corruption again into the world.

Philo's Views.

Philo's allegorical interpretation ("De Mundi Opificio," § 56), making of the Biblical incidents typical occurrences (δείγματα τύπων), represents a phase of Jewish thought on the whole more in accord with the teachings of Judaism on the Fall and on sin than is the quasi-dogmatic position of II Esdras. According to Philo, Adam typifies the rational, Eve the sensuous, element of human nature; while the serpent is the symbol of carnal lust and pleasure. After Philo, Samuel Hirsch, among modern expounders, treats the fall of man as a typical exposition of the psychological processes which precede sin (temptation) and gradually (through self-deception) culminate in actual sin (see his Catechism, ch. ii.).

Views of the Rabbis.

The sin of Adam, according to the Rabbis, had certain grievous results for him and for the earth. The Shekinah left earth after his fall (Gen. R. xix.; Tan., Peḳude, 6). He himself lost his personal splendor, deathlessness, and gigantic stature (see Adam). All men were doomed thenceforth to die; none, not even the most just, might escape the common fate: the old temptation of the serpent suffices to bring on death (B. B. 17a; Shab 55b). Adam wished, therefore, to refrain from procreating children; but, learning that the Torah would be given to Israel, was induced to change his mind (Gen. R. xxi.). Through the illicit intercourse of Eve with the serpent, however, the nature of her descendants was corrupted, Israel alone overcoming this fatal defect by accepting the Torah at Sinai, which had been offered to and rejected by all other nations (Shab. 146a; 'Ab. Zarah 22b; Yeb. 103b). If Israel had not made the golden calf, death would have been removed from the midst of Israel (Shab. 88a; comp. 'Ab. Zarah 5a).

Pious men and women overcame, at least partially, the consequences of Adam's fall. Abraham, Isaac, Jacob, Moses, Aaron, and Miriam did not suffer death at the hand of the angel of death; they died through God's kiss (בנשיקה), and even their bodies were not consumed by worms (B. B. 17a; M. Ḳ. 28a; Derek Ereẓ Zuṭa i.). Jacob and others entered into paradise while living (Ta'an. 5b; Derek Ereẓ Zuṭa i.). While thus it is not altogether true that the fall of man had no place in the theology of the Talmudists (against Nager, "Die Religionsphilosophie des Talmud," § 9) it is a fact that for the most part the foregoing notions were mere homiletical speculations that never crystallized into definite dogmas. R. Ammi's thesis (Shab. 55a) founded on Ezek. xviii. 20, that every death is caused by an actual sin, is entitled to recognition as clearly as the opinion held by his disputant, Simeon b. Eleazer, who contends that death is the result of the Fall.

In modern Jewish thought the fall of man is without dogmatic importance (see Original Sin; consult, however, Benamozegh, "Morale Juive et Morale Chrétienne," p. 117; David Castelli, "Il Messia Secondo gli Ebrei," p. 179, Florence, 1874).

FAMILIANTEN GESETZ: A law which required every Jew in "the countries of the Bohemian crown" (Bohemia, Moravia, and Silesia) to obtain a special permit from the state before he might marry. In these provinces it was the avowed policy of the government to prevent any increase in the number of Jewish residents, and it was for this reason that the "Familianten Gesetz" was passed. When Maria Theresa revoked her edict expelling the Jews from these provinces (1745), it was on the condition that their number should not be increased; even her son Joseph II. reasserted (1780-90) the condition. In 1787 a census was taken which showed the number of Jewish families in Bohemia (8,541) and Moravia (5,106). The number permitted in Bohemia was increased to 8,600, in Moravia to 5,400, while in Austrian Silesia 119 were permitted (patent for Moravia, Nov. 17, 1787; for Bohemia, various royal orders in 1788-89; for Silesia, Dec. 15, 1781). In Moravia the number of Familianten was distributed according to congregations, the largest being Nikolsburg with 620; in Bohemia and Austrian Silesia the Familiant was allowed to settle under the same conditions as were other Jews.

The number of marriage permits issued was limited to the number of deaths among the Familianten. An applicant for a permit was required to give surety for the payment of three years' taxes, to prove that he possessed at least 300 florins, to show that he had received a school education, to pass an examination in Jewish religion according to Herz Homberg's text-book, "Bene Zion," and to give evidence that he was at least twenty-four years of age. A first-born son, a school-teacher, or a veteran of the army had precedence over other candidates. The license was issued either by the county or by the provincial authorities ("Kreisamt" or "Gubernium").

Besides the ordinary Familianten there were those who, in recognition of special merit, were permitted to marry as "supernumeraries." It was a rule, however, that they should be given the first license vacated by death. The law of Francis I. (Aug. 3, 1797) permitted Jews who had served as volunteers in the army or who lived exclusively by agriculture or by technical skill to marry without regard to the number of established families. Those who married according to the Jewish law and without license were called "Magranten" (emigrants), because in order to be legally married they had to emigrate. Their weddings were called "garret-weddings."

This law was abolished by the constitution of March 4, 1849, which made all civil and political rights independent of religious belief. It was, however, revived in a different form by a law of March 19, 1853, which declared that section 124 of the civil code, demanding a court license ("kreisamtliche Bewilligung") for a Jewish marriage, had not been abrogated by the constitution. The difference between this and the former condition was only the abolition of the fixed number. This law was repealed Nov. 29, 1859.

FAMILLE DE JACOB. See Periodicals.

FAMILY AND FAMILY LIFE: The family includes either those who are descended from a common progenitor, as "bet Dawid," the house (dynasty) of David (I Sam. xx. 16); "bet Lewi," the house (tribe) of Levi (Num. xvii. 8); "bet Yisrael," the house (nation) of Israel (Ex. xvi. 31); or a body of persons who form one household under one head and one domestic government, including parents, children, sons- and daughters-in-law, and dependents. While the principle of kinship was the basis of the family, clan, and nation, by a legal fiction persons not of the Hebrew blood were admitted into its union as members. Much stress is laid upon purity of race. Abraham sends Eliezer to his kindred in search of a wife for his son Isaac (Gen. xxiv. 3 *et seq.*). In Judges xiv. Samson's family is surprised that he does not wed one of his tribe; yet union by intermarriage with alien people was quite prevalent. The laws of the Mosaic code sought to restrict intermarriage, and the fulminations of the Prophets, as well as the great reformation under Ezra and Nehemiah, are all evidence of the prevalence of this custom.

Law and Prophets, Psalmists and Proverbs, Talmud and Midrash again and again dwell upon the importance of the family. Malachi (iii. 23 [A. V. iv. 5] *et seq.*) tells of Yhwh sending the prophet Elijah before the coming of "the great day," that he may bring about perfect union between parents and children.

Importance of the Family.

The clan, "mishpaḥah" (Gen. x. 18-20; Num. i. 2); the tribe, "maṭṭeh" (I Kings viii. 1) and "shebeṭ" (Ex. xxviii. 21); and the nation, "'am" (Ex. i. 9), were considered as extensions of the family. In all these forms of development the underlying bond was the belief in a descent from a common ancestor, and the resulting kinship of all the persons constituting such a political division. The ties of blood were of absolute and undisputed strength (see Go'el). In the family is seen the patriarchal as distinct from the matriarchal system. The father is the head of the family, and through him the genealogy is traced. "The relationship on the father's side is a hereditary one, but that on the mother's side is not regarded as such" (B. B. 109b). This principle is based upon the section of the Mosaic law which provides that in case of a man dying without descendants and brothers, his father's brothers or kinsmen are the legal heirs. Hence the mother's father or brothers, or other kinsmen on the mother's side, are excluded from inheritance (Num. xxvii. 8–11).

The primitive family was a close corporation. This characteristic was retained to some extent down to the time of the Diaspora. The family determined right and wrong, made laws, administered justice, and maintained divine worship (Gen. viii. 20; xiii. 4; xxii. 13, 14; Job i. 5). This explains why among the ancient Hebrews the political state did not attain to the high development of Hellas and Rome. But the main reason for the solidarity of the family may be found in its religion. Not only is one born into a group of fellow citizens, but, as a matter of course, he embraces the gods of the family and of the state. These to the ancient mind were as much a part of the particular community as were the human members. Thus Yhwh appears to Jacob and tells him, "I am Yhwh, the Lord God of Abraham thy father, and the God of Isaac" (Gen. xxviii. 13); Rachel took with her the "teraphim" (images) of Laban, her father, and put them in "the camel's furniture" (*ib.* xxxi. 33–35); Joshua and the Prophets speak of Yhwh as the God of Israel, as their inheritance (Josh. xiii. 33). In the days of Saul and David the tribes had long been united in the worship of Yhwh, and yet the clans maintained their annual *sacra gentilicia*, at which every member of the group was bound to be present (I Sam. xx. 6, 29). Aaron, the high priest, on the Day of Atonement brings sacrifices to atone for the sins of his house, of his tribe, and of the people (Lev. xvi.). That the change of nationality involves a change of cult may be clearly seen from the Book of Ruth. "Thy sister-in-law," says Naomi to Ruth, "is gone back unto her people and unto her gods." Ruth replies, "Thy people shall be my people, and thy God my God" (i. 14 *et seq.*).

Paternal Authority.

The father's authority over the child was almost supreme. Abraham is ready to sacrifice Isaac (Gen. xxii.); Jephthah sacrifices his daughter (Judges xi. 39); the practise of sacrificing children to Molech rests on the same paternal authority (Lev. xviii. 21, xx. 2–5; II Kings xxiii. 10). Judah orders Tamar, his daughter-in-law, to be burned for having broken the marriage-vow (Gen. xxxviii. 24). Children were regarded as the property of the father and could be seized for debt (II Kings iv. 1). The father could sell his daughter into marriage, though not into slavery (Ex. xxi. 7–11). Only at a tender age, while still a minor, could a maiden be sold by her father against her will; when she had arrived at the age of puberty his paternal authority over her ceased, and could be exercised only in a sort of surveillance until she was married. But under no circumstance was he allowed to cause her to become a prostitute (Lev. xix. 29). As the legal system developed, the courts enforced punishment for all manner of disobedience against father and mother. He that smote or cursed his father or his mother was put to death (Ex. xxi. 15, 17; comp. Prov. xx. 20). Similarly the stubborn, rebellious, gluttonous, and disobedient son was stoned to death (Deut. xxi. 18–21). Children are bidden to honor and respect their

(In the possession of Prof. G. Deutsch.)

parents, to look upon them as God's representatives on earth, as their greatest benefactors (Ex. xx. 12; Lev. xix. 3; Prov. i. 8, xxx. 17). It is the duty of parents to instruct their children and to lead them in the ways of virtue and righteousness (Deut. vi. 6–7; comp. Ex. xii. 26 *et seq.*, xiii. 14–15).

Position of Women.

The family takes its character from the position of woman (see Woman). The position of the wife in the family depended largely upon her having a son. Children, especially sons, were looked upon as a blessing from God (Ps. cxxvii. 3–5). Sons were regarded as the future supporters of God's kingdom (Ps. viii. 3); they were to be the warriors who would defend the hearth (Deut. xxv. 4–13), and be the mainstay and support of the home. As among the Greeks in Homeric times childlessness was looked upon as a dire misfortune, so also among the Hebrews it was considered in the light of a punishment from God: "And she [Rachel] conceived, and bare a son; and said, God hath taken away my reproach" (Gen. xxx. 23; comp. I Sam. i. 12 *et seq.*). Even the sons of concubines ranked as ancestors of tribes. The levirate shows how essential was the building up of the house. Thus, if a brother died without issue, it was the duty of one of the surviving brothers to marry the widow (Gen. xxxviii. 8; Deut. xxv. 4–13).

Descent and Inheritance.

Primogeniture is recognized in the Mosaic code (Deut. xxi. 16–17) and regulated in the Talmud. The first-born son receives two portions of the father's estate, but not two portions of the mother's estate (Bek. viii.–ix.). Where there are no sons the daughters inherit, as in the case of the daughters of Zelophehad. In the absence of both sons and daughters the property goes to the male relations in order of kinship as determined by the Mosaic code (Num. xxvii. 1–11). Besides the larger share of the inheritance, certain privileges belong to the first-born son (the first-born of the father, not of the mother, for in a polygamous state of society each wife may have had a son). A blessing from the father before he was about to pass away was a special privilege of the first-born son. Isaac wishes to bless Esau, his first-born son (Gen. xxvii.). Joseph calls the attention of his father Jacob to Manasseh as his first-born son, for Jacob had placed his right hand in blessing upon the head of Ephraim (Gen. xlviii. 13 *et seq.*; comp. xlix. 3; Ex. xxii. 29). The privilege that belonged to the first-born son could be sold, as in the case of Esau, who sold his birthright to Jacob (Gen. xxv. 32 *et seq.*); or it could be bestowed by the father as a mark of favor upon a younger son. Thus Jacob withdraws from Reuben, his first-born son, the double portion that by right he should have received after his father's demise, and bestows it upon Joseph and his two sons (Gen. xlviii. 21 *et seq.*, xlix. 3 *et seq.*).

The instinct of solidarity in ancient Israel and the high regard for the chastity of woman explain the sanctity and purity of the Jewish family life. Patriarchal history abounds in pictures of beautiful home life. The filial obedience of Isaac; the love of Jacob for Rachel; the forgiveness by Joseph of his brethren; the death-bed scene of Jacob, where he blesses his sons and grandsons; the strong bond between Ruth and Naomi; and the passionate grief of David for his erring son Absalom—these and many other instances give evidence of the beauty and of the strength of the family affection (Gen. xxii., xlv.; Ruth; II Sam. xviii. 33). That the Bible laid great stress upon the power of the home is shown by the closing verses of Malachi: "Behold, I will send you Elijah the prophet before the coming of the great and terrible day of the Lord: And he shall turn the heart of the fathers to the children, and the heart of the children to their fathers, lest I come and smite the earth with a curse."

The Mosaic code guards the chastity of the mother, the sanctity of the home, the blessedness of the household, the preservation of society, and the upbuilding of mankind. The crime of adultery is punished with death (Deut. xxii. 21 *et seq.*; comp. Mal. ii. 14–15). Though the purity of family life was at times sullied, as for instance at Gibeah (Judges xix. 20 *et seq.*), and by David (II Sam. xi.), yet it remains true that through good and evil times the high ideals of home life were maintained. Cases of sensual excess or of unfilial conduct are rare among the Jews down to modern times.

In Talmudical times the purity and sanctity of the home were regarded with equal respect. "God dwells in a pure and loving home" (Kid. 71). "Marriages are made in heaven" (Shab. 22a, b). But the power for good is specially apparent in the Jewish home during the Middle Ages. Throughout those centuries of persecution and migration the moral atmosphere of the home was rarely contaminated, and it became a bulwark of moral and social strength, impregnable by reason of the religious spirit that permeated it. The observances of the faith are so entwined with the every-day customs of the home as to make the Jewish religion and the family life one, a bond in sanctity. Most of the religious ceremonies are to be celebrated in the bosom of the family; the observances of the dietary laws are an especially prominent feature in the daily routine. The Seder, the Sukkah, the lighting of the candles on Ḥanukkah, grace before and after meals, these help to unite the members of the family. But most valuable is the celebration of the Sabbath. The Sabbath lamp, kindled on Friday evening, is a symbol of the home influence of woman as the inspirer of a pure family life.

FAMILY VAULT: An exclusive burial-place for the members of a family. The desire of the ancient Hebrews to "lie with their fathers," and particularly the charge of Jacob to his sons to remove his body from Egypt and to bury it in the Cave of Machpelah, furnish early evidence of this form of sepulture.

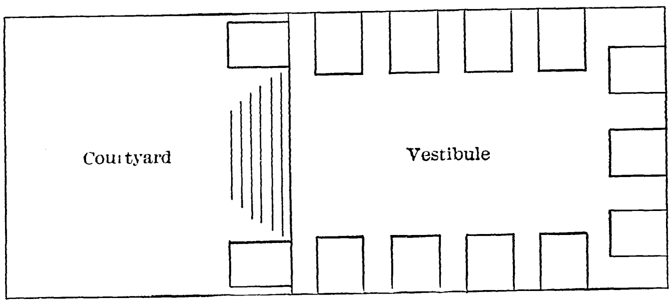
The Cave of Machpelah acquired by Abraham from Ephron is the first family vault of which there is record. It is still to be seen in Hebron, surmounted with an imposing stone structure of a later date. The upper part of the interior is now used as

Cave of Machpelah.

a mosque. Those who are not Mohammedans are not allowed to enter the cave, though an exception was made in favor of the Prince of Wales in 1861. Beneath the surface of the ground is the cave where the Patriarchs are supposed to be buried. Rab and Samuel of Babylonia differed as to the architectural style of the Cave of Machpelah (lit. "double"): one said it was a cave within a cave; the other that it resembled a house with an attic. According to another opinion, the signification "double" refers to the couples buried in the cave; namely, Abraham with Sarah, Isaac with Rebekah, Jacob with Leah ('Er. 53a).

There are numerous references in the Bible to the desire of the kings in Israel to be buried with their fathers. The king of the house of David had a separate burial-place "in the city of David." Hezekiah was buried in the "chiefest of the sepulchers of the sons of David" (II Chron. xxxii. 33).

Palestine, owing to its rocky conformation, was an ideal place for elaborate and ornate rock-cut vaults. Nebuchadnezzar is said to have been persuaded to conquer Jerusalem because the mausoleums in the Holy Land were superior to the king's palaces in Babylonia (Sanh. 96b). An example of a magnificent sepulcher is that of Queen Helen of Adiabene in Jerusalem, erroneously known as the "Tombs of the Kings," and by the Jews as "The Tomb of Kalba Sabua." The best example of a family vault is perhaps the structure near the monument of Absalom, popularly known as the "Bet ha-Ḥofshit" (II Kings xv. 5), or as the burial-cave of Haggai, Zechariah, and Malachi, and, according to the Christians, as the "Cave of St. James." It is really, however, as is proved by the inscription recently deciphered (Luncz, "Moreh Derek," p. 130), the family vault of the priest Hezir, mentioned in I Chron. xxiv. 15.



Ground-Plan of a Family Vault in Talmudic Times.
(After a drawing by J. D. Eisenstein.)

A cave at Meron, near Safed in Galilee, has a collection of chambers forming a small catacomb; and tradition assigns it to Hillel the Elder and his disciples.

Types of Rock-Tombs.

There are two distinct types of Jewish antique rock-tombs in Palestine. The ancient form is a sort of vestibule from which chambers or niches, just large enough to insert a body lengthwise, are cut in the walls. These chambers are known as "kukin" (כוכין). The later form is the sepulcher or sarcophagus cut in the rock, with a vacant space around it for the funeral party. The former type is mentioned in the Mishnah (B. B. vi. 8), with reference to the liability of the vender or contractor of a vault. The description follows:

> The plot is usually four by six ells or arm-lengths (1 arm-length = 24 inches), containing eight chambers, three on each side-wall and two on the wall opposite the entrance to the vault. Each chamber is four ells long, seven handbreadths high, and six handbreadths wide. R. Simeon said the usual size of a vault was six by eight ells, containing thirteen chambers, four on each side-wall, three opposite and one on each side of the entrance (see illustration below).

A courtyard six ells square was provided above the surface of the vault, for the accommodation of the bier and funeral party. This yard had steps leading down to the vault.

The latter style of sepulcher is mentioned in the Tosefta: "A sarcophagus cut in the rock . . . if built in the wall of the vault [= נפש]" (Oh. x., ed. Zuckermandel, p. 607).

Apparently the ancient type of family vault with the kukin was no more in use and was quite unknown at the time of the rabbis of the Babylonian Gemara, who asked for an explanation of it (B. B. 8b).

A criminal, condemned and executed by the bet-din, was not allowed burial in his family vault, but was interred in one of the separate burial-grounds provided for the four grades of capital offenders (Sanh. ii. 5).

The members of the Sanhedrin were all buried in one plot in Jerusalem. There are many caves wherein rabbis of distinction lie in groups. R. Simeon b. Laḳish took pains to mark these vaults for identification (B. M. 85b). Similar caves or vaults are found especially at Safed, where distinguished cabalists rest in peace together.

A. J. D. E.

FAMINE: A general scarcity of food, resulting as from drought, war, hail, flood, or insects. The land of Canaan is said in the Bible to have been several times afflicted with distressing famine, which is frequently mentioned together with pestilence and the sword of the enemy. David's decision when offered his choice from among these three scourges indicates that pestilence was considered the least terrible of them (II Sam. xxiv. 14–15). The following is a chronological enumeration of the famines recorded in the Bible:

The famine of the time of Abraham (Gen. xii. 10).

The famine in the days of Isaac (Gen. xxvi. 1), confined to the land of Canaan.

The general famine in the time of Jacob. It was first felt in Egypt, and it extended subsequently to the surrounding countries, and lasted seven years (Gen. xli. 54–57).

The famine "in the days when the judges ruled," which lasted ten years (Ruth i. 1, 6). It was limited to the land of

Canaan, for Elimelech and his family found a refuge in the land of Moab.

The famine in the days of David, which lasted three years (II Sam. xxi. 1).

In the time of Elijah, Samaria suffered three years from a famine as a result of drought (I Kings xviii. 1, 2).

A more terrible famine occurred when Ben-hadad besieged Samaria. An ass's head was sold for eighty shekels and a ḳab of dove's dung for twenty shekels. Mothers ate their own children (II Kings vi. 24-29).

After a brief respite another famine came upon the land and lasted seven years (II Kings viii. 1).

In the time of Zedekiah, King of Judah, the siege of Jerusalem by Nebuchadnezzar caused a famine in which mothers again ate their own children (II Kings xxv. 3; Jer. xxxviii. 9, lii. 6; Lam. ii. 20, iv. 10).

Another famine occurred in the time of the prophet Joel. It was due to locusts, and was followed by drought (Joel i. 4-20).

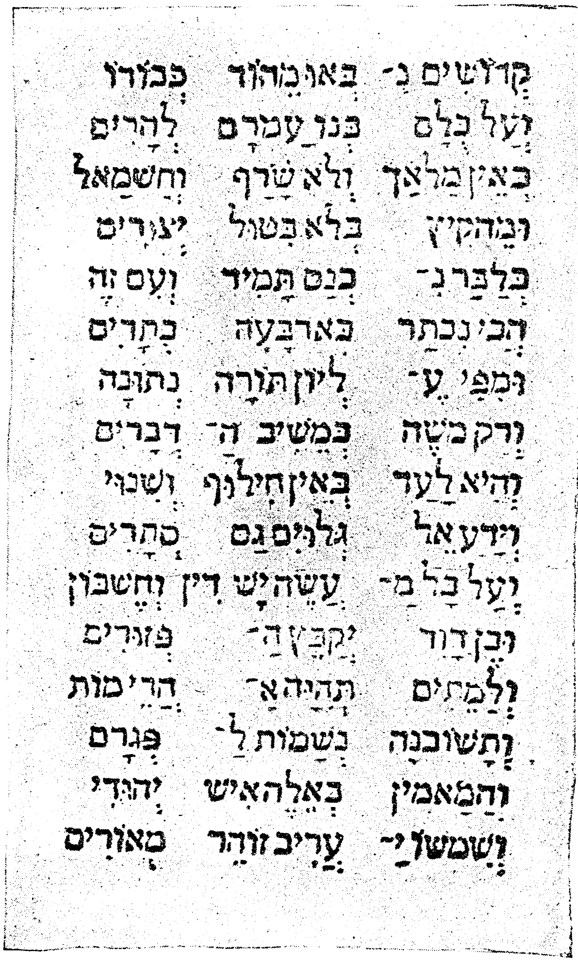
FANCIULLI, DE. See Adolescentoli.

FANO (Hebr. פאנו): Small town in the Papal States near Pesaro. Jewish bankers of Fano are known to have had a large financial transaction with the Malatestas (the rulers of the city) as early as 1332. There was a great demand for loans in that agricultural region, which possessed little capital. The Jewish bankers were well received and, winning the confidence of the authorities, were granted extensive privileges and were efficiently protected. At this period the Jewish community was so large that it paid taxes amounting to half the sum collected from the entire town. In 1367, when the heretics were expelled from the city, the Jews were expressly excepted. In 1447 the Malatestas defended them against the demands of the papal chamber for a Jews' tax. The bankers were treated as full citizens, and were exempt from all taxes. When the privileges were renewed in 1430, and the Jews demanded assurance against persecution and spoliation, the demand was granted.

The Jews' badge was introduced into Fano in 1464, but the bankers were not required to wear it. At the same time they were secured against repudiation of debts. When in 1492, after the affair of Simon of Trent, a preacher attacked the Jews in his sermons and brought against them the blood accusation, some of the city councilors rose to defend the Jews and to protest against inciting the populace. The city was, in fact, excommunicated three times within forty years because of its too lenient treatment of the Jews. The founding of the Monte di Pietà in 1471 did not detract from the wealth or the popularity of the Jewish banks.



קדושים ב־ באו מהוד כבודו

Page from Hai Gaon's "Musar Haskel," Printed at Fano, 1503. The first Hebrew 32mo.

(In the collection of Hon. Mayer Sulzberger.)

The security enjoyed by the Jews of Fano naturally induced others to settle there. In 1435 they formed a fairly large community. The later comers, however, were not full citizens; they were subject to the restrictions obtaining at that time, and were obliged, after 1464, to wear the Jews' badge. The hostility of the Christian populace, which was also felt by the bankers, forced some families to emigrate in 1452. In the second half of the fifteenth century, in consequence of the attacks of the monks, the relations between the Jews and Christians became even more unfriendly.

It is recorded that in 1460 a Jewess, Perna by name, applied for permission to practise medicine.

In 1542 Fano received many of the Jews who had fled from Sicily. It seems to have had an unprejudiced cardinal, who in 1553 disapproved of the burning of the Talmud and other Hebrew books. The community was dissolved on the expulsion of the Jews from the Pontifical States. In 1901 only three Jews were living in Fano. Among the scholars of Fano the following may be mentioned: the physician Elijah b. Judah of Rome (1400), R. Jacob Israel and R. Moses Nissim (fifteenth century), and Jehiel b. Azriel Trèves (sixteenth century). The Fano family of scholars has been widely known since the sixteenth century.

G.

Enrico Fano: Italian senator; born at Milan 1833; died there Dec. 11, 1899. In youth he was an ardent patriot and a conspirator. In 1859 he was sent by Victor Emmanuel II. as commissioner to Garibaldi's camp. He was a pronounced skeptic. Elected deputy of Milan in 1867, he remained in office for several legislative periods. In 1890 he was made a senator. Fano is author of "Della Carità Preventiva e dell' Ordinamento delle Società di Mutuo Soccorso in Italia," Milan, 1868.

Bibliography: *Almanacco Italiano*, 1901.

S. U. C.

Ezra ben Isaac Fano: Rabbi of Mantua and cabalist; lived in the sixteenth and seventeenth centuries. Fano was a pupil of the cabalist Israel Saruḳ, and among his own pupils were Menahem Azariah da Fano, Jacob the Levite, and Issachar Baer Eulenburg. On July 14, 1591, Fano received the title of "Chief Rabbi Laureate of Mantua." He was the possessor of valuable manuscripts, some of which he edited and annotated. He published, under the title of "Sefer Mishpeṭe Shebu'ot" (Venice, 1602), a collection of small treatises by Hai Gaon. In conjunction with Meïr of Padua, he edited a manuscript of the Midrash Tanḥuma, adding a preface, an index, and three tables of practical decisions (Mantua, 1613). His decisions were published in Moses Porto's "Palge Mayim" (p. 28b) and in the collection entitled "Mashbit Milḥamot" (p. 32b). MS. No. 130 in the "Codices Hebraic. Biblioth. I. B. de Rossi" (Parma, 1803) contains a collection of letters written to Fano by Mordecai Dato and Joseph Ḥazaḳ (Cod. 130), and Joseph Gikatilla's "Sefer ha-Orah," with a description by Fano (Cod. 1228). Fano also wrote notes to many cabalistic works.

Bibliography: Zunz, in *Kerem Ḥemed*, vii. 122; Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 282, 289; Mortara, *Indice*, p. 21.

Giulio Fano: Italian physiologist; born at Mantua in 1860. He studied physiology at Florence under Luciani, the most famous physiologist in Italy. In 1894 he succeeded his master as professor of physiology at the Istituto di Studi Superiori in Florence, and soon won a scientific reputation second only to that of his teacher. In 1898 he was awarded the prize of the Accademia dei Lincei at Rome. His works include: "La Fisiologia in Rapporto colla Chimica e colla Morfologia"; "La Fisiologia nel Passato e le Cause dei Suoi Recenti Progressi"; "L'Elettricità Animale"; "Physiologie Générale du Cœur."

S. I. E.

Isaac Berachiah ben Judah Aryeh Fano: Italian cabalist, liturgical poet, and rabbi; flourished in the seventeenth century in Lugo. He was a pupil and son-in-law of Menahem Azariah da Fano and teacher of Shabbethai Baer, author of "Be'er 'Eshek." Lampronti, in his "Paḥad Yiẓḥaḳ" (*s.v.* "Abel Asur" and "Ṭum'at Ohel"), quotes two responsa of Isaac Berachiah Fano. Some piyyuṭim written by the latter are to be found in the Italian "Siddur shel Berakah" (Ferrara, 1693). He also wrote "Ḥanok la-Na'ar," containing homilies and novellæ; but it was not published.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 141; Steinschneider, *Cat. Bodl.* col. 1096; Mortara, *Indice*, p. 21.

Jacob ben Joab Elijah da Fano: Italian rabbi and Hebrew poet; lived at Ferrara and Ancona about the middle of the sixteenth century; teacher of Abraham Portaleone. He wrote: "Shilṭe ha-Gibborim," a rhythmical poem warning men against women, and "Ḳinah," an elegy in verse on the persecution of the Jews at Ancona, published together at Ferrara, 1556; "Zoker ha-Berit," a treatise on the commandments, which formed the first part of his "Petaḥ Tiḳwah," no longer extant. He is generally supposed to have been the author of the "Ḳiẓẓur Ḥobot ha-Lebabot," Venice, 1655, a compendium of Baḥya's "Ḥobot ha-Lebabot."

S. S. M. Sel.

Menahem Azariah da Fano (also called **Immanuel da Fano**): Italian rabbi, Talmudist, and cabalist; born 1548; died at Mantua 1620. He was a disciple of Moses Cordovero, to whose widow he offered 1,000 sequins for her husband's manuscripts. Even as a youth Fano had some reputation for learning, as is shown by the fact that Moses Cordovero (d. 1570) sent him a copy of his "Pardes Rimmonim." One of Fano's teachers was Ishmael Ḥanina b. Mordecai of Valmontone. Fano was a patron of learning. When Joseph Caro, shortly before his death (1575), sent "Kesef Mishneh," his commentary on Maimonides' Yad ha-Ḥazaḳah, to Mantua for publication, Fano, at the suggestion of Dei Rossi, assumed part of the expense and took charge of the edition. According to a report of Immanuel Aboab, Fano lived for some time in Reggio. Numerous pupils flocked to him from Italy and Germany, and he was held in general respect for his learning and character.

Fano's authority as a Talmudist is evident in a collection of responsa ("She'elot Teshubot me-Rabbi Menahem 'Azaryah," Dyhernfurth, 1788) containing 130 chapters on various subjects connected with religious law and ritual questions. They are distinguished by precision of style as well as by the author's independence of the later authorities. He even decides sometimes in opposition to Joseph Caro (*e.g.*, No. 32), and holds changes in the ritual to be justifiable in certain cases (see, *e.g.*, No. 25). In his love for precision and brevity Fano compiled a book of extracts from Alfasi's code, which itself is only a compendium of the Talmud. This book is preserved in manuscript. Azulai enumerates twenty-four cabalistic treatises by Fano, part being in manuscript. Ten of these are comprised in the work "'Asarah Ma'amarot"; five of them, under the title "Amarot Ṭehorot," were printed together with "Ḳol Yehudah," a philosophical commentary by Judah b. Simon (Frankfort-on-the-Main, 1698; Mohilev, 1810).

These treatises originated partly in addresses delivered by the author on feast-days, especially on Rosh ha-Shanah. In spite of Fano's decided tendency toward scholastic and allegoric interpretation, his works are not quite devoid of original remarks. For example, in connection with the cabalistic interpretation of Num. xxxiii. 2, "And Moses wrote their goings out according to their journeys," he says: "The Torah speaks always of ideas when it seems to be describing concrete things: the higher meaning is the principal thing; the lower, material meaning holds the second place. Moses b. Naḥman, indeed, follows another opinion in his commentary on Genesis in holding to the principle that 'the Torah speaks according to the manner of men'; but we can justly say that men speak according to the manner of the Torah" ("Ḥiḳḳur Din," iii. 22). "The prohibitions of the Torah never appear in the imperative, but in the form of the future: 'Thou shalt have no other gods'; 'Thou shalt not bow down thyself to other gods'; 'Thou shalt not swear falsely'; etc. This means, 'I know thou wilt not be guilty of these things, since human nature does not tolerate such crimes, and if sin occurs in this life it can be only a passing episode.' On the other hand, the commandments are in the imperative: 'Kabbed,' 'zakor'; that is, 'I command thee nothing new; the good instincts in thee have always been there; they need only to be awakened and developed'" (*ib.* iv. 9). This last sentence is characteristic of the author's optimism as well as of his mild nature, which attracted the sympathy of all.

In 1581 Jedidiah (Amadeo) Recanati dedicated to Fano his Italian translation ("Erudizione dei Confusi") of Maimonides' "Moreh Nebukim." Isaiah Hurwitz especially mentions Fano's treatise "Yonat Elem" as a theological work the teaching of which comes very near to the truth (Joseph Solomon Delmedigo, introduction to "Nobelot Ḥokmah"). Fano's pupil Samuel Portaleone composed an elegy on the occasion of his death (Oxford MS. No. 988c). One of Fano's sons was Isaac Berechiah; and the same name was borne also by Fano's son-in-law and pupil (mentioned in a letter of Israel Sforno to his son Obadiah).

FAQUIN, JUCEFE (JOSEPH): Spanish traveler of the fourteenth century; lived first at Barcelona, but settled in Majorca after having made a tour of the known world. A year and a half later the representatives of the Aljama demanded that he should contribute his share to the tax of 18,000 livres which had been laid upon that body eight years previously. Faquin protested against the unjust and unreasonable demand in a petition which he presented to King James II. of Majorca (March 20, 1334), whereupon the king commissioned the royal procurators to examine the case carefully.

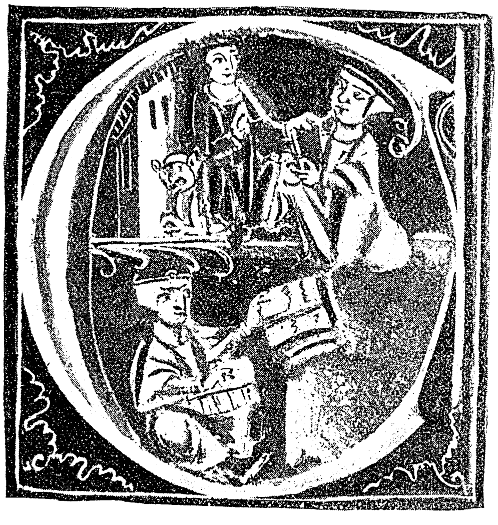
FARABI, AL-. See ALFARABI.

FARAJ BEN SALIM or **MOSES FARACHI OF GIRGENT** (known also as **Faragut, Fararius, Ferrarius,** and **Franchinus**): Italian physician and translator; flourished in the second half of the thirteenth century. He was engaged by King Charles of Anjou as translator of medical works from Arabic into Latin. In this capacity he rendered a great service to medicine by making a Latin translation of Razi's medical encyclopedia, "Al-Ḥawi" (published 1486, under the title "Continens," with a glossary by the translator). The translation is followed, between the same covers, by "De Expositionibus Vocabulorum seu Synonimorum Simplicis Medicinæ," which Steinschneider supposes to form a part of the "Continens." As a token of his esteem for the translator, Charles of Anjou ordered that on the original copy of the manuscript of the "Continens" (MS. Bibliothèque Nationale, Paris, No. 6912) the portrait of Faraj should be drawn



Charles of Anjou Presenting Arabic Manuscript
to Faraj for Translation.
(From an illumination by Friar Giovanni in the Bibliothèque Nationale, Paris.)

beside his own by Friar Giovanni of Monte Cassino, the greatest illuminator of his time.

Faraj also translated "De Medicinis Expertis," attributed to Galen and included in his works published by Juntas and Chartres (x. 561–570), and "Tacuini Ægritudinum" (Arabic, "Taḳwim al-Abdan"), by Ali ibn Jazla, published at Strasburg, 1532. Steinschneider believes that to Faraj should also be ascribed the Latin translation of Masawaih's treatise on surgery (MS. Bibliothèque Nationale, Paris, No. 7131), said to have been made by a certain "Ferrarius."

G. I. BR.

FARAJI, JACOB AL-: Rabbi at Alexandria, Egypt, in the middle of the seventeenth century; brother-in-law of Shabbethai Nawawi, rabbi of Rashid, and teacher of Samuel Laniado. Al-Faraji was the author of responsa, extracts from which were incorporated in the collection "Birke Yosef," published by Azulai at Leghorn in 1774–76. As shown by one of his responsa inserted in "Ginnat Weradim" by Abraham ben Mordecai ha-Levi (Constantinople, 1716–18), Al-Faraji was an able grammarian and a good Hebrew stylist.

G. I. BR.

FARḤI (PARḤI), ESTORI: Explorer of Palestine; born about 1282 at Florenza, Spain; died in Palestine, probably in 1357. His father, Moses, sent him to study under his grandfather, Rabbi Nathan, at Tronquetelle, near Arles, France. At the age of nineteen he went to Montpellier to study astronomy with Jacob ben Makir; he also studied Latin, Arabic, and the works of Aristotle, Hippocrates, Ptolemy, and Galen. When the Jews were expelled from France, July 22, 1306, he went to Perpignan, where he remained for seven years, and translated several works. In 1312 he decided to go to Palestine. On his way thither he stopped for a few days at Cairo. Thence he went to Jerusalem, where flattering efforts were made to induce him to stay. He refused, however, because of the anti-Maimonidean feeling there, and settled at Bethshan, near Jerusalem. During the next seven years he explored Palestine, and laid down in his "Kaftor u-Feraḥ" his researches into the history, geography, fauna, flora, and antiquities of the Holy Land. He carried with him the manuscript, corrected by R. Baruch of Jerusalem, but it disappeared at his death. Fortunately, some copies had previously been distributed, and one was found in 1515 by Isaac Kohen Sholal, Nagid of Egypt. Between 1545 and 1548 it was printed at Venice by Meïr b. Jacob Frantz, who attributed it to the nagid. David Conforte was the first to ascribe the work to Farḥi. A second edition appeared at Berlin (1849, ed. Hirsch Edelman), and a third edition at Jerusalem (two vols., 1897–98, ed. Moses Luncz).

Farḥi was the author of six other works: "Targum Sefer Refu'ot," translation of Armengaud Blaise's "De Remediis," a medical work (the Latin text is no longer extant, all the translations of this work since then being based on Farḥi's Hebrew text); "Sefer ha-Kabusim," on purgatives, translated from the Latin of Elijah b. Judah (an incomplete copy is in the Casanata collection in Rome, I. iv. 5); "Ma'amar be-Bi'ur Da'at"; "Shoshanat ha-Melek"; "Batte ha-Nefesh"; and "Sha'ar ha-Shamayim." The last four are no longer extant, but are quoted in his "Kaftor u-Feraḥ," a treatise in which Farḥi combats Avicenna's opinion regarding the inhabitants of the equator.

G. M. FR.

FARḤI, ḤAYYIM MU'ALLIM: Minister of the Pasha of Damascus and Acre; born at Damascus about the middle of the eighteenth century; assassinated in 1820. This remarkable statesman for more than forty years governed a part of the Turkish empire. His father, Saul Farḥi, was minister of the treasury to the Pasha of Damascus, and he himself, while still a young man, showed skill in state affairs. When Aḥmad Jazzar, Pasha of Acre, obtained also the pashalic of Damascus, he recognized the ability of the young Farḥi and promoted him to the position of minister. Farḥi utilized his influence to help his coreligionists. His love for his master and his desire to continue his services to the Syrian Jews were so strong that he bore even the most outrageous treatment on the part of the pasha.

During the siege of Acre by Napoleon in 1799, Farḥi was the soul of the defense, frustrating all of the enemy's strategic plans. Napoleon, knowing that it was owing to the efforts of the Jewish minister that he could not conquer the place, tried, but in vain, to win him over.

After Jazzar's death in 1808, Farḥi was confirmed in his dignity by Jazzar's successor, Sulaiman Pasha. The Jewish poets sang of Farḥi as a new Solomon, finding his name (from the Hebrew "faraḥ," meaning "to bloom") to be synonymous with the happiness of the country.

Farḥi was assassinated during the reign of Sulaiman's successor, Abdallah, who, although one of Farḥi's pupils, was his bitter enemy; and the body, in spite of the prayer of the Jews that it might be granted decent burial, was thrown into the sea.

FARḤI, ISAAC: Dayyan and almoner of Jerusalem; born at Safed; died at Jerusalem May 11, 1853. About 1840 Farḥi was sent to Europe by the rabbinate of Jerusalem to collect contributions for the poor. He was the author of "Marpe la-'Eẓem," moral essays, Ortakeui, 1830; "Matoḳ mi-Debash," on morals, with a pamphlet entitled "Ṭub Yerushalayim," a eulogy on the Holy City, Jerusalem, 1842; "Mine Metiḳah," a pamphlet containing three sermons for Shabbat Zakor, Leghorn, 1848; "Ẓuf Debash," morals, *ib.* 1849; "Matoḳ la-Nefesh," sermons, Constantinople; "Shebeṭ Mishor," ethical essays and novellæ, *ib.*; "Ma'aseh Abot," a commentary on Pirḳe Abot, Leghorn, 1864. He also left some unpublished novellæ on the Talmud and on Maimonides.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 208; Luncz, *Jerusalem*, i. 142; Fuenn, *Keneset Yisrael*, p. 654.

S. S. M. Sel.

FARḤI, JOSEPH SHABBETHAI: Talmudic scholar and cabalist; born at Jerusalem about 1802; died at Leghorn, Italy, in 1882. Farḥi was an earnest cabalist; he believed that after death the human body undergoes the trial of purgatory which the cabalists call "ḥibbuṭ ha-ḳeber" (the torments of the grave).

Farḥi went to Leghorn about 1842, and while there wrote: (1) "'Oseh Fele," a collection of wonderful stories (Leghorn, 1845); (2) "Toḳpo shel Yosef," a narration of the story of Joseph (*ib.* 1846); (3) "Rokeb 'Arabot," an Arabic commentary on Pirḳe Abot, with the text, the Decalogue, and the "Piyyuṭ bar Yoḥai" (*ib.* 1849); (4) "Sheber Bat 'Ami," an Arabic commentary on the Haftarah of the Ninth of Ab, with an Arabic version of the story of Anna and her seven sons (*ib.* 1853). He edited the "Ma'aseh Abot" of Isaac Farḥi, adding a number of notes (*ib.* 1864), and the "Ma'agal Ṭob" of Joseph Concio (*ib.* 1879).

FARIA, JUAN DE: Marano poet. While residing at Brussels in 1672 he wrote a poem in honor of his friend Miguel de Barrios' "Coro de las Musas." Barrios calls him and Aaron Dormido "ruiseñores del Musayco nido" (nightingales of the Mosaic nest).

Bibliography: Barrios, *Relacion de los Poetas*, p. 58.

D. M. K.

FARISSOL (PERIZOL), ABRAHAM BEN MORDECAI: Italian scholar and geographer; born at Avignon, France, 1451; died, according to Grätz ("Geschichte," ix. 44), in 1525; Zunz, however ("G. S." i. 178), says that he was living in 1526. In 1468 he was at Avignon, but soon afterward went to Mantua, and in 1473 to Ferrara. He acted at Ferrara as cantor in the synagogue (according to Steinschneider, "Hebr. Uebers." p. 81, the cantor at that time was a certain "Mordecai"), and occupied himself besides in the copying of manuscripts. He wrote a short commentary to the Pentateuch under the title of "Pirḥe Shoshannim" (De Rossi, "MSS. Codices," No. 201). Soon afterward he wrote a polemical work under the title of "Magen Abraham," or "Wikkuaḥ ha-Dat," in three parts, the second against Christianity, the third against Islam. He was induced to write this work by the fact that at the court of Ercole d'Este I., Duke of Ferrara, he had had a dispute with two monks. By order of the duke he also made a résumé in Italian of the Hebrew text, so that his antagonists might understand his position ("Monatsschrift," xlii. 421). Kirchheim proved (in "Orient, Lit." vi., col. 7) that the greater part of that work was copied from Duran's "Ḳeshet u-Magen." About the same time Abraham Farissol wrote a commentary to Job (in "Biblia Rabbinica," Venice, 1518). But the most important of his writings is the "Iggeret Orḥot 'Olam," a cosmographic and geographic work in thirty chapters (Ferrara, 1524; Venice, 1587). The chief sources Farissol used were Bergomas' "Supplementum" and Amerigo's "Cosmographia." The author speaks of the newly discovered parts of the world, of the wonderful stories told by travelers, and of the Ten Tribes.

Farissol was the first Jewish scholar who turned his attention to geography. The "Iggeret" was translated into Latin by Hyde under the title of "Tractatus Itinerum Mundi" (Oxford, 1691). In 1525 Farissol wrote a commentary to Ecclesiastes (De Rossi, *ib.* No. 48). He also translated into Hebrew Aristotle's "Logic" and the compendium of Porphyry (De Rossi, *ib.* No. 145). Some sermons of Farissol's, and a number of letters which he wrote in 1468 and 1474 to several of his contemporaries (Messer Leon of Ferrara being among them), are also extant.

Bibliography: Wolf, *Bibl. Hebr.* iii., No. 117; De Rossi, *MSS. Codices*, i. 95-97; idem, *Dizionario*, pp. 117, 118; Steinschneider, *Cat. Bodl.* col. 689; idem, *Hebr. Uebers.* p. 81; idem, *Hebr. FARISSOL, JACOB BEN ḤAYYIM COMPRAT VIDAL: Liturgical poet; born at Avignon; grandson of Vitalis Farissol, one of the three chief bailiffs of Avignon in 1400. He was a pupil of Solomon ben Menahem, or "Frat Maimon," under whose supervision he composed in 1422, at the age of seventeen, a commentary to Judah ha-Levi's "Cuzari" entitled "Bet Ya'aḳob." Jacob ben Ḥayyim is doubtless identical with the liturgical poet mentioned by Zunz ("Literaturgesch." p. 525) under the name of "Comprad Farissol," who flourished at Avignon in 1453. The name "Farissol" was a very common one among the Jews of Provence. It is found at Montpellier in 1306 (Saige, "Les Juifs du Languedoc," p. 128), at Perpignan in 1413 ("R. E. J." xiv. 67), and at Avignon in 1451, 1465-80, and 1558 (Bayle, "Les Médecins d'Avignon au Moyen Age," p. 54; Gross, "Gallia Judaica," p. 11; "R. E. J." xiv. 67, 89).

Bibliography: Renan-Neubauer, *Les Ecrivains Juifs Français*, p. 755; Zunz, *Literaturgesch.* p. 525; Gross, *Gallia Judaica*, pp. 6, 7; *R. E. J.* xii. 198; xiv. 67, 89.

G. S. K.

FARISSOL, JUDAH: Italian mathematician and astronomer; flourished at Mantua at the end of the fifteenth century. In 1499 he wrote "Iggeret Sefirah," a description of the astronomical sphere, with diagrams.

Bibliography: Steinschneider, *Jewish Literature*, p. 187; Neubauer, *Cat. Bodl. Hebr. MSS.* p. 711.

G. M. Sel.

FARJEON, BENJAMIN L.: English-Jewish novelist; born in London 1833; died there July 23, 1903; educated at private schools. He emigrated to New Zealand, where he entered upon a literary career and became manager and partial owner of the first daily newspaper in that colony. Turning to fiction, he published his first book, "Grif," in 1870, which attracted the notice of Dickens. Among his writings are "Joshua Marvel" (1871), "London's Heart," "Great Porter Square" (1884), "Set in a Silver Sea," "The Sacred Nugget," "The King of Noland," "Something Occurred," "A Secret Inheritance," "The House of White Shadows," "The Betrayal of John Fordham," "Samuel Boyd of Catchpole Square," and "The Mesmerists." "Solomon Isaacs" (1877), "Aaron the Jew," "Miriam Rozella," and "Pride of Race" deal sympathetically with Jewish scenes and characters.

J. V. E.

FARKAS, ALBERT: Hungarian journalist; born at Szilágy Somlyó Aug. 1, 1842; attended the gymnasium at Kolozsvár (Klausenburg), and studied law at Budapest. Farkas contributed to the "Magyar Sajtó," the "Hon," and the "Vasárnapi Ujság"; wrote various patriotic poems, including one, under the title "Sámson és Delila," on the defeat of the Hungarian national aspirations; and translated into Hungarian Gervinus' study on "Hamlet," as well as the work of Count Ladislaus Teleki on the Russian intervention in Hungary, Edmond About's "Tolla Féraldi," Racine's "Phèdre," and Wieland's "Die Abderiten." He took a leading part in the emancipation movement as editor of the "Magyar Zsidó," advocating a peaceable adjustment of the religious differences among the Hungarian Jews. In the course of the combat Farkas exerted his endeavors in behalf of the Orthodox party, and it was he who was the chief factor in securing official recognition of that party as a separate communal organization.

S. L. V.

FARKAS, GYULA (JULIUS): Hungarian mathematician and physicist; born at Puszta Sárosd March 28, 1847; attended the gymnasium at Györ (Raab), and studied law and philosophy at Budapest. After teaching in a secondary school at Székesfehérvár (Stuhlweissenburg), Farkas became in succession principal of the normal school at Pápa, privat-docent (1881) of mathematics at the University of Budapest, and professor of physics (1888) at Klausenburg. The Hungarian Academy of Science elected him corresponding member May 6, 1898. His principal writings are embodied in the reports of the Academy of Science of Paris (1878–84); the "Archiv der Mathematik und Physik"; and the "Journal des Mathematiques." His separately published works are "Die Diatomische Dur-Scale," Budapest, 1870; and "Termeszettan Elemei" (Elements of Physics), *ib.* 1872.

(In the British Museum.)

FARMING ON SHARES. See LANDLORD AND TENANT.

FARO: Capital of the Portuguese province of Algarve. It was the seat of the district rabbi, or chief justice, appointed by the chief rabbi. Faro had Jewish inhabitants at an early date. They are mentioned in the municipal laws of Alfonso III. after the capture of Algarve. Alfonso IV. made the Jews of the locality sign a document in which they agreed to pay punctually the protection-money levied on them.

That the Jews of Faro did not altogether escape the cruelties of the Inquisition is evidenced by the burning of Estevainha Gomes of Faro at Lisbon June 17, 1590.

There was formerly a family of the name of Faro at Bayonne, where the tomb of Abraham Rodrigues Faro, who died in 1693, may be seen. In London David and Isaac of Faro are included in the list of subscribers to the synagogue of Bevis Marks (*c.* 1700). The tomb of Jacob of Faro's widow, who died in 1686, has also been preserved in London.

In 1902 Faro had 9,330 inhabitants, including about fifteen Jewish families. There are two synagogues, one founded about 1830, the other in 1860: a ḥebra ḳaddisha; and a cemetery dating from 1820, when the community was organized. The cemetery contains the ancient tombstone of Joseph ben Thone (?), a rabbi who died in 1315. The community supports a ḥazzan and a slaughter-house established in 1830.

G. M. K.—C. DE B.

A printing-press existed in the house of Don Samuel Giacon, at whose expense was printed in 1487 a Pentateuch with 110 leaves without pagination or register, in double columns, and with from 30 to 35 lines to a full page. The letters, square characters, are unequal; the vowels often incorrect, and in many cases wanting; dagesh and accents are not expressed. There seem to have been marginal notes printed on the top and bottom of the first five leaves, but the margins have been cut off. According to Häbler ("Typographie Ibèrique," p. 38), this was the first Hebrew book printed with vowel-points. Moreover, it appears from the long list of printing-presses in the Iberian peninsula, published by Häbler ("The Early Printers of Spain and Portugal," London, 1897), that this was absolutely the first book printed in Portugal. Only one copy is known to exist, that now in the British Museum, and which formerly belonged to Almanzi. See illustration on page 345.

J.

FARRAR (FERRAR), ABRAHAM: Portuguese physician and poet; born at Porto; died at Amsterdam 1663. After practising medicine at Lisbon, Farrar emigrated to Amsterdam, where he became (1639) president of the Portuguese community. He was a nephew of Jacob Tirado, the founder of the Portuguese congregation Bet Ya‘aḳob at Amsterdam. There Farrar formed a friendship with Manasseh b. Israel, who dedicated to him his "Thesauro dos Dinim" Farrar's "Declaração das Seiscentas e Treze Encommendanças da Nossa Santa Ley" (Amsterdam, 1627) is a poetical rendering of the "Taryag Miẓwot" in Portuguese verse. He calls himself in this work "the Portuguese exile" (Judeo do destierro Portugal). De Barrios ("Relacion de los Poetas," p. 53) says, wrongly, that Farrar wrote in Spanish.

G. M. SEL.

FASSEL, HIRSCH BÄR: Austrian rabbi and author; born at Boskowitz, Moravia, Aug. 21, 1802; died at Nagy-Kanizsa, Hungary, Dec. 27, 1883. After receiving his early training in his native city he continued his studies at the yeshibah of Moses Sofer at Presburg. After his marriage he engaged in business, but finding mercantile life uncongenial, he accepted the rabbinate of Prossnitz (1836) in succession to Löb Schwab. The "Landesrabbiner," Nehemiah Trebitsch, objected to his election, but he was confirmed by the government in spite of the protest (Löw, "Gesammelte Schriften," ii. 207). Like his predecessor, Fassel was one of the pioneers of modern culture in Moravia, preaching in German and introducing some reforms. After the death of Solomon Tiktin the congregation of Breslau elected him (1845) as associate rabbi to Abraham Geiger in order to reconcile the conservative element of the congregation. Fassel, however, declined the call ("Abraham Geiger's Leben in Briefen," p. 113, Berlin, 1878). His competition for the vacant position of Landesrabbiner of Cassel and afterward of Moravia was unsuccessful, Samson Raphael Hirsch being elected. In 1851 he was called to Nagy-Kanizsa to succeed Leopold Löw, and held this position until his death.

Fassel's "Mozene Ẓedeḳ," a manual of the more important practical laws, intended for the use of rabbis, is written entirely in the spirit of Talmudic casuistry, although the author is uniformly inclined to more lenient decisions. In the introduction to his "Ḳol Adonai" (1854) he says: "A reform in Judaism, if it is not to degenerate into mere negation, is only possible on the basis of rabbinism." The rabbinical law, even the portion of it which deals with criminal cases, was regarded by him as authoritative.

Fassel was a voluminous writer. He published a number of sermons and contributed frequently to the Jewish press, as to the "Orient," "Ben Chananja," "Neuzeit," and other periodicals. His presentations of the Jewish law and of rabbinical ethics are of lasting value. His combination of traditional legal dialecticism with homiletic methods, exemplified in his "Neun Derusch-Vorträge" (1868), is quite original. He wrote:

Zwei Gottesdienstliche Vorträge, Gehalten in der Synagoge zu Prossnitz. Vienna, 1838.

Ḥoreb Beẓayon: Briefe eines Jüdischen Gelehrten und Rabbinen über das Werk "Ḥoreb" von S. R. Hirsch. Leipsic, 1839.

Reis- und Hülsenfrüchte am Pesach Erlaubte Speisen. Prague, 1846.

Ein Wort zur Zeit beim Dankfeste für die Errungenschaft der Freiheit. Vienna, 1848.

Ẓedeḳ u-Mishpaṭ, Tugend- und Rechtslehre, Bearbeitet nach den Principien des Talmuds und nach der Form der Philosophie. Vienna, 1848.
Die Epidemie: Trauer- und Gedenkrede. Nagy-Kanizsa, 1848.
Mishpeṭe El: das Mosaisch-Rabbinische Civilrecht, Bearbeitet nach Anordnung und Eintheilung der Gerichtsordnungen der Neuzeit und Erläutert mit Angabe der Quellen. Nagy-Kanizsa, 1852-54.
Ḳol Adonai: die Zehn Worte des Bundes (sermons). Nagy-Kanizsa, 1854.
'Asot Mishpaṭ: das Mosaisch-Rabbinische Gerichtsverfahren in Civilrechtlichen Sachen, Bearbeitet nach Anordnung und Eintheilung der Gerichtsordnungen der Neuzeit und Erläutert mit Angabe der Quellen. Nagy-Kanizsa, 1859.
Dat Mosheh we-Yisrael: die Mosaisch-Rabbinische Religionslehre, Katechetisch für den Unterricht Bearbeitet. Nagy-Kanizsa, 1859; 3d ed., Vienna, 1863.
Dibre Elohim Ḥay, Neun Derusch-Vorträge. Nagy-Kanizsa, 1868.
We-Shafeṭu we-Hiẓẓilu: das Mosaisch-Rabbinische Strafrecht und Strafrechtliche Gerichtsverfahren, Bearbeitet nach Anordnung und Eintheilung der Gesetzbücher der Neuzeit und Erläutert mit Angabe der Quellen. Nagy-Kanizsa, 1870.

His "Mozene Ẓedeḳ" was never published; only three of its four parts were completed. The manuscript is preserved in the library of the Hebrew Union College at Cincinnati.

FASTING AND FAST-DAYS (צום = "fasting"; ענות נפש = "affliction of soul"; later Hebrew [Ezra ix. 5] and Talmudic, תענית): Fasting is usually defined as a withholding of all natural food from the body for a determined period voluntarily appointed for moral or religious ends. This institution has found wide acceptance in all religious systems, although its forms and motives vary with different creeds and nationalities.

The origin of fasting is disputed by various critics. Some (*e.g.*, Herbert Spencer) are of the opinion that it arose from the custom of providing refreshments for the dead; others (*e.g.*, W. R. Smith) that it was merely a preparation for the eating of the sacrificial meal; others, again (*e.g.*, Smend), attribute the custom to a desire on the part of the worshipers to humble themselves before their God, so as to arouse His sympathy; while still others think that "it originated in the desire of primitive man to bring on at will certain abnormal nervous conditions favorable to those dreams which are supposed to give to the soul direct access to the objective realities of the spiritual world" (Tylor, cited in "Encyc. Brit." *s.v.*). The Rabbis compared fasting to sacrifice, and considered the affliction of one's body as the offering up of one's blood and fat upon the altar (Ber. 17a). Examples may be quoted from the Bible to corroborate these varying opinions.

In Biblical Times.

In olden times fasting was instituted as a sign of mourning (I Sam. xxxi. 13; II Sam. i. 12), or when danger threatened (II Sam. xii. 16; comp. I Kings xxi. 27), or when the seer was preparing himself for a divine revelation (Ex. xxxiv. 28; Deut. ix. 9, 18; Dan. ix. 3; comp. B. M. 85a). That individual fasting was common among the early Jews is evident from the provision made (Num. xxx. 14) that a vow made by a woman "to afflict the soul" may under certain conditions be canceled by the husband. More frequent, however, were the occasional fasts instituted for the whole community, especially when the nation believed itself to be under divine displeasure (Judges xx. 26; I Sam. vii. 6, where it is conjoined with the pouring out of water before the Lord; Jer. xxxvi. 9; Neh. ix. 1), or when a great calamity befell the land (Joel i. 14, ii. 12), as when pestilence raged or when drought set in; and sometimes also when an important act was about to be carried out by the officials of the land (I Kings xxi. 12; comp. I Sam. xiv. 24). In Jonah iii. 6–7 it may be seen with what rigor an official fast was observed, while in Isa. lviii. 5 is given a description of a fast-day among the Jews. For the attitude of the Prophets and of the Rabbis toward fasting see ABSTINENCE; ASCETICISM.

List of Fast-Days.

Of regular fixed fast-days the Jewish calendar has comparatively few. Besides the Day of Atonement, which is the only fast-day prescribed by the Mosaic law (Lev. xvi. 29; see ATONEMENT, DAY OF), there were established after the Captivity four regular fast-days in commemoration of the various sad events that had befallen the nation during that period (Zech. viii. 19; comp. vii. 3–5). These were the fast of the fourth month (Tammuz), of the fifth month (Ab), of the seventh month (Tishri), and of the tenth month (Ṭebet). According to some rabbis of the Talmud, these fasts were obligatory only when the nation was under oppression, but not when there was peace for Israel (R. H. 18b). In the Book of Esther an additional fast is recorded (ix. 31; comp. iv. 3, 16), which is commonly observed, in commemoration of the fast of Esther, on the thirteenth of Adar, although some used to fast three days—the first and second Mondays and the Thursday following Purim (Soferim xvii. 4, xxi. 2).

Many other fasts, in memory of certain troubles that befell Israel, were added in the course of time, a full list of which is given at the end of Megillat Ta'anit. These were not regarded as obligatory, and they found little acceptance among the people. The list, with a few changes as given in Shulḥan 'Aruk, Oraḥ Ḥayyim, 580, 2, marked in parentheses, is as follows:

1. First of Nisan: the sons of Aaron were destroyed in the Tabernacle.
2. Tenth of Nisan: Miriam the prophetess died; the well that followed the Israelites in the wilderness disappeared.
3. Twenty-sixth of Nisan: Joshua the son of Nun died.
4. Tenth of Iyyar: Eli the high priest and his two sons died, and the Ark was captured by the Philistines.
5. Twenty-ninth (twenty-eighth) of Iyyar: Samuel the prophet died.
6. Twenty-third of Siwan: the Israelites ceased bringing the firstlings to Jerusalem in the days of Jeroboam.
7. Twenty-fifth of Siwan: R. Simeon son of Gamaliel, R. Ishmael son of Elisha, and R. Ḥanina the superior ("segan") of the priests were executed.
8. Twenty-seventh of Siwan: R. Ḥanina son of Teradion was burned while holding a scroll of the Torah.
9. Seventeenth of Tammuz: the tablets were broken; the regular daily sacrifice ceased; Apostemus burned the Law, and introduced an idol into the holy place; the breaking into the city by the Romans (Ta'an. 28b).
10. First of Ab: Aaron the high priest died.
11. Ninth of Ab: it was decreed that Jews who went out of Egypt should not enter Palestine; the Temple was destroyed for the first and the second time; Bether was conquered, and Jerusalem plowed over with a plowshare (*ib.* 29a).
12. Eighteenth of Ab: the western light was extinguished in the time of Ahaz.

13. Seventh (seventeenth) of Elul: the spies died in a pestilence.
14. Third of Tishri: Gedaliah and his associates were assassinated in Mizpah (II Kings xxv. 25).
15. Fifth of Tishri: twenty Israelites died, and Akiba was imprisoned and afterward executed.
16. Seventh of Tishri: it was decreed that the Israelites should die by sword and by famine on account of the affair of the golden calf (see Meg. Ta'an. *ad loc.*, ed. princeps, Mantua, 1514).
17. Sixth (seventh) of Marḥeshwan: Nebuchadnezzar blinded King Zedekiah after he had slaughtered the latter's children in his presence.
18. Seventh (twenty-eighth) of Kislew: Jehoiakim burned the scroll that Baruch wrote at the dictation of Jeremiah.
19. Eighth of Ṭebet: the Torah was translated into Greek in the time of Ptolemy; there was darkness in the world for three days.
20. Ninth of Ṭebet: incident not explained (death of Ezra, as mentioned in "Kol Bo").
21. Tenth of Ṭebet: the siege of Jerusalem by Nebuchadnezzar began (II Kings xxv. 1; Jer. lii. 4).
22. Eighth (fifth) of Shebaṭ: the righteous (elders) that were in the time of Joshua died.
23. Twenty-third of Shebaṭ: the Israelites gathered to war with the tribe of Benjamin (Judges xx.).
24. Seventh of Adar: Moses died.
25. Ninth of Adar: the controversy between the house of Shammai and that of Hillel.

The Polish Jews are accustomed to fast on the twentieth of Siwan on account of the atrocities committed on that day in 1648 by the Cossacks. Some pious Jews also fast every Monday and Thursday in commemoration of the destruction of the Temple, of the burning of the Torah, and of the desecration of God's name (comp. Luke xviii. 12). The first and second Mondays and the first Thursday of Iyyar and of Marḥeshwan, following the festivals of Passover and of Sukkot respectively, are recognized fasts in most Jewish communities, and were originally instituted to atone for the sins that might have been committed in the pursuit of pleasure during the holidays (Ḳid. 81a; Tos., *s.v.* "Soḳobo"; Oraḥ Ḥayyim, 492). The burial societies observe a fast-day preceding their annual feast held in the evening. In some places it is observed on the fifteenth of Kislew; in some on the seventh of Adar; while others have other days for its observance (see Burial Society). It is also customary to fast on the eve of New-Year's Day (Tan., Emor, *s.v.* "U-Leḳaḥtem"), while many fast during all the ten penitential days (Oraḥ Ḥayyim, 581, 2, Isserles' gloss). Some pious Jews fast every Friday, so as to partake of the Sabbath meal with a hearty appetite (*ib.* 249, 3). The anniversary of the death of one's father or mother ("Jahrzeit") and the day of one's marriage are also observed as fasts (Yoreh De'ah, 402, 11, Isserles' gloss; Eben ha-'Ezer, 61, 1, Isserles' gloss). The first-born fast on the eve of Passover in commemoration of the miracle which was performed in Egypt when all the Egyptian first-born were slain and those of the Israelites were saved.

Besides these fixed fast-days, the Synagogue frequently imposed a fast-day upon the community when great calamities threatened the people. This right of the Synagogue had its origin in the fasts described in the treatise Ta'anit as having been instituted in early times when rain was late in coming. If no rain fell on or before the seventeenth of Marḥeshwan, the learned and pious men of the community fasted three days—Monday, Thursday, and Monday. In the case of continued drought, three more fasts were proclaimed, and, lastly, seven fast-days on successive Mondays and Thursdays were instituted. These fasts were accompanied with many solemn ceremonies, such as the taking out of the Ark to the market-place, while the people covered themselves with sackcloth and placed ashes on their foreheads, and impressive sermons were delivered (Ta'an. 18a). Fast-days were subsequently instituted in case any misfortune befell the people, as pestilence, famine, evil decrees by rulers, etc. (*ib.* 19a). Examples of the latter were the fasts instituted by the Russian rabbis during the anti-Jewish riots early in the eighth decade of the nineteenth century.

Private Fasts.

Private fasts were frequent among the Jews from earliest times (Judith viii. 6; I Macc. iii. 47; II Macc. xiii. 12). One may take it upon himself to fast on certain days, either in memory of certain events in his own life, or in expiation of his sins, or in time of trouble to arouse God's mercy (see Vows). The Rabbis, however, did not encourage such abstinence Indeed, they positively forbade it in the case of a scholar, who through his fasting would be disturbed in his study; or of a teacher, who would thereby be prevented from doing his work faithfully; or of one pursued by robbers, who might become weak (Ta'an. 11a). In no case should one boast of his fasts to others, and even though he is asked he should try to evade the question, except when he has fasted in expiation of his sins; in this case acknowledgment may lead others to expiation likewise (Oraḥ Ḥayyim, 565, 6).

The fast undertaken in consequence of an evil dream has peculiar significance in Jewish law. While in general no fast is permitted on Sabbaths or holidays, the Talmud permitted one to be undertaken even on these days, provided it be complemented later by another fast (Ber. 31b). There are, however, various opinions among the later authorities regarding such a fast. Some think that it may be observed on a Sabbath only after an evil dream has occurred three times, while others are of the opinion that it is not possible to distinguish at present between good and evil dreams, and that therefore one should not fast at all on the Sabbath. The custom is to fast if one dreams of the burning of a scroll of the Law, or the Day of Atonement during Ne'ilah service, or the beams of his house falling, or his teeth dropping out. The custom of fasting on such occasions has, however, lapsed into desuetude, and, as in the cases cited above, is discouraged by the Rabbis (Oraḥ Ḥayyim, 288).

All Jewish fasts begin at sunrise and end with the appearance of the first stars of the evening, except those of the Day of Atonement and the Ninth of Ab, which last "from even till even." There is no special ritual for the ordinary fast-days. The Law is taken out and the lesson from Exodus is read which treats of the thirteen qualities of mercy and of God's forgiveness at the supplication of the pious (Ex. xxxii. 11–14, xxxiv. 1–10). The same passages are read both at the morning and at the afternoon services, while at the latter the Hafṭarah is also read from Isa. lv. 6–lvi. 8. The Sephardim do not read the Hafṭarah on the afternoon of any fast-day except the Ninth of Ab (see Ab, Ninth Day of). In the 'Amidah the prayer beginning with "'Anenu" is inserted, and in the morning service special selihot are provided for the various fasts.

The giving of charity on a fast-day, especially the distribution of food necessary for the evening meal (Sanh. 35a, and Rashi *ad loc.*), was much encouraged, in accordance with the rabbinic saying that "the reward of the fast-day is in the amount of charity distributed" (Ber. 6b).

Relation to Sabbath.

The only fixed fast-day that may be celebrated on a Sabbath is the Day of Atonement; all the others, if they fall on a Sabbath, are postponed until the following day. Private or public occasional fasts can not be held on any of the holidays, or on a new moon, or on any of the minor festivals (see Festivals), or during the month of Nisan, or on the week-days of the festivals. The Megillat Ta'anit enumerates many days of the year upon which no fast may be held, but the later Rabbis declare that one is not bound by these laws, and that therefore fasts may be instituted on any day except those mentioned (R. H. 19b). On a Sabbath it is forbidden to go without food until midday (Yer. Ta'an. iii. 11), except when one is accustomed to eat late in the day and would injure himself by changing his custom (Oraḥ Ḥayyim, 288, 1, 2).

Except in regard to the Day of Atonement and the Ninth of Ab, the command to fast applies only to food and drink; all other acts, such as washing the body or anointing, are permitted. It is forbidden, however, to indulge in any unnecessary pleasures on these days: one should meditate on the significance of the fast and examine his own sins (*ib.* 568, 12). Even those who are permitted to eat, as pregnant or nursing women, should not have regular meals, but should take only as much food as is necessary, so that all may participate in the common sorrow (*ib.* 554, 5).

The first nine days of Ab, and, with some, the period from the seventeenth of Tammuz to the tenth of Ab, are regarded as partial fasts, the eating of meat and the drinking of wine alone being forbidden.

See Ab, Fifteenth Day of; Atonement, Day of; Purim; Ta'anit; Tammuz, Fast of; Ṭebet, Fast of.

In Islam.

Fasting, which had no place in the oldest ritual practises of Islam, dates from the Medinian period of Mohammed's career. The idea of fasting was not a spontaneous growth, but was adopted from the Jewish custom. Consequently the terms "ṣam" and "ṣiyam" had their original meanings altered to agree with the Hebrew "ẓaum."

According to tradition, Mohammed at first introduced only one fast-day, similar to the Jewish Day of Atonement, and called it "'Ashura," which is identical with the Judæo-Aramaic word "'asor" (10th of Tishri). Soon, however, he abandoned it (together with other customs borrowed from the Jewish ritual), and replaced it by an institution which he distinctly stated was adopted from an older custom ("O true believers, a fast is ordained unto you as it was ordained unto those before you, that ye may fear"; Koran, sura ii. 179). Instead of distributing a number of fast-days through the year, he appointed the month of Ramaḍan to form a continuous period of fasting, the fast to be kept from sunrise to sunset. To this he attached the following regulations, partly following, partly altering Jewish customs: Eating, drinking, and sexual intercourse were permitted during the night "until you can distinguish a white thread from a black thread in the dawn; then keep the fast until night; do not mix with the women, but retire to the places of worship" (*ib.* v. 183). It is easily seen that most of these regulations are borrowed from the Day of Atonement in its rabbinic interpretation. Tradition has preserved the following saying, attributed to Mohammed: "The breath of a fasting man is pleasanter to Allah than the odor of musk."

FAT.—Biblical Data: The rendering in the English versions of the Hebrew word "ḥeleb," an animal substance of an oily character deposited in adipose tissues. In Judges iii. 22 it is mentioned as covering the human intestines. It is held to indicate grossness and wickedness of disposition (Job xv. 27). A heart covered with fat is a sign of irresponsiveness and indifference (Ps. xvii. 10, cxix. 70). The fat of beasts is mentioned as rich food (Deut. xxxii. 14). Figuratively, fat connotes the choicest part of anything (of oil, Num. xviii. 12; of wine, *ib.*; of wheat, Deut. xxxii. 14; Ps. lxxxi. 17 [A. V. 16], cxlvii. 14).

The fat in the thank-offerings belonged to Yhwh (Lev. iii. 16; Ezek. xliv. 15; comp. Lev. iii.; Ex. xxix.). Like blood, it was regarded as the seat of life (Lev. iii. 17; Smith, "Rel. of Sem." 2d ed., pp. 376 *et seq.*). In the description of the sacrifice at the consecration of Aaron and his sons (Ex. xxix. 13) the fat covering the inwards, the caul, and the two kidneys with the fat upon them are specified; in Lev. iii. 3 "the fat that is upon the inwards" is added to these. The parts mentioned represent: the omentum (Josephus, "Ant." iii. 9, § 2, *ἐπίπλους*); the fat clinging to the intestines, *i.e.*, net-like adhesions to the colon (but see Paul Haupt, "Johns Hopkins Circular," 1894, No. 114, p. 115); the kidneys, which, especially near the loins, are as a rule surrounded by fat; and the "yoteret" (see Caul), a deposit of fat extending from the portal ("ḥaẓra") vein of the liver along the hepatic-duodenal ligament to the duodenum. In Lev. iii. 9 the fatty tail of the sacrificial animal, if a sheep, is mentioned as being among the portions which are to be burned upon the altar. This part, as being the choicest, was offered to the guest of honor (Budde, in "Z. D. P. V." 1895, p. 98; Geiger, "Urschrift," p. 380; I Sam. ix. 24). Again, in Lev. vii. 23-25 the fat of three sacrificial animals, the cow, the sheep, and the goat, is specifically prohibited as food, the punishment for infraction being "karet" (excision); but in the case of animals which have died a natural death or have been killed by wild beasts ("nebelah," "ṭerefah"), the fat, while not allowed for food, might be used for any other domestic purpose. It is thus an open question whether, when slaughtered for private (non-sacrificial) use, the fat of the three animals enumerated was prohibited, and it is not plain whether the interdict applied to other animals.

——**In Rabbinical Literature:** For the parts of the sacrificial animal which belonged to Yhwh, and which had to be burned, the Talmud has in addition to חלבים the term אימורים, a word of disputed etymology (Rapoport, "'Erek Millin," *s.v.*; 'Aruk, *s.v.* אמר, 6, and מר, 2; Solomon Geiger, in "Zion," 1842, p. 6, from אמר; comp. Suk. 55b), probably from the Greek *μοῖραι, μηρία* (*i.e.*, the choicest parts), of frequent occurrence (Suk. v. 7; Yoma vii. 5; Pes. v. 10; Zeb. 27b).

The precise delimitations of the Levitical prohibition, violation of which entailed karet, were a matter of controversy even among earlier Mishnaic authorities (see Sifra, Lev. 3, the opinions of R. Ishmael and R. Akiba; comp. Ḥul. 49b, 50a, those of R. Jose ha-Galili and R. Akiba; Tosef., Ḥul. viii.) and also among the Amoraim (Ḥul. 93a, Samuel [see Rashi and RaN], and Ḥul. 55a, Abayah). The distinction is made between "shumen" and "ḥeleb" (see Ramban to Lev. iii.), the latter being separate from the meat and consisting of a thin, close-fitting, skin-like layer that may be peeled off (Ḥul. 49a, 50a; see Wiener, "Die Jüdischen Speise Gesetze," p. 149). The use of "ḥeleb" in connection with the fatty tail of the sheep caused confusion (Lev. iii. 9), the Karaites—probably following an old Sadducean interpretation (see Wiener, *l.c.* p. 147, note)—extending to the tail the prohibition against eating fat, but others (Rashi, Targ. Yer., for example) explaining the word in this connection as "the best that is in the tail," as does Rab Ashi (Ḥul. 117a; for the controversial points see Hadasi, "Eshkol ha-Kofer," Alphabet 232; Ibn Ezra to Lev. iii. 9, vii. 23, and Naḥmanides to the same passages; also Bashyaẓi, "Aderet Eliyahu," pp. 118 *et seq.*; Ibn Ezra in "Apirion," ed. Neubauer, p. 24; "Lebush Malkut," p. 42; Aaron ben Elijah, "Dine Sheḥiṭah"; "Orient, Lit." 1840, No. 30). Maimonides ("Yad," Ma'akalot Asurot, vii.) makes the point that "ḥeleb" is used in conjunction with the tail not to include it among forbidden food, but to assign it to the sacrificial class, and that the parts so designated are to be lifted up and burned (comp. Ḥul. 117; Ker. 4; Tosef., Ḥul. 92a, *s.v.* "Amar Abayi"; Mak. 18a; Men. 78a).

In the Talmud the prohibition is not extended to the ḥeleb of a fetus (Ḥul. vii. 1, 92b); on the principle that only such fat is forbidden as might lawfully have been offered up as a sacrifice, that clinging to the animal's ribs may be eaten (Sifra, Ẓaw). From the language employed it may be inferred that the fat around the heart was regarded as not subject to the prohibition. The general principle is that fat which does not close up a hole or puncture beneath is unclean, but in the case of the lobe of fat around the heart the inability to close up a possible puncture beneath is attributed not to its being unclean fat, but to its helmet-like shape (Ḥul. 49b; Wiener, *l.c.* p. 150; "Yad," Sheḥiṭah, vi. 10; Semag, "Asin," p. 63). Five strings of fat, three on the right and two on the left, in the flanks or haunches, are not to be used (Ḥul. 93a). Three thin membranes or layers of fat, one each on the spleen, the bowels, and the kidneys, are also prohibited (*ib.*). The rule that fat covered with flesh is permitted is qualified by an exception in the case of fat that is uncovered when the animal is in motion (Ḥul. 93a; Rashi, *s.v.* פרוקי מפרקא; "Yad," Ma'akalot Asurot, vii. 7, 8).

As in the case of other Dietary Laws, the hygienic benefits of the enactment regarding fat have been adduced to explain the prohibition and to defend its enforcement for all time. Ibn Ezra (see commentary to Lev. vii. 24; Deut. xii. 15) rightly surmises that it was originally connected with the sacrificial ritual, and applied only to animals and parts destined and fit for the altar. Nevertheless, declaring that the "tradition of the fathers" is his support, he accepts the rabbinical decision according to which all domestic animals are now included, even though by reason of defects they were unfit for the altar (Bek. 15a), and even though at present sacrifices are not offered. Judah ha-Levi ("Cuzari," iii. 11) also is of the opinion that the sacrificial use of the fat underlies the prohibition. Naḥmanides' criticism of this theory in his commentary on Leviticus (vii. 25) is not convincing, and neither is Ibn Ezra's. Maimonides ("Moreh," iii. 48), on the one hand, looks upon this prohibition as a health-protective measure, but on the other ("Moreh," iii. 41) agrees that it was effective in guarding the distinct character of the altar's portions. Naḥmanides is another that ascribes to the observance certain sanitary advantages, as also do Aaron ha-Levi ("Ḥinuk," § 47) and RaLBaG (commentary to Lev. vii.). Albo ("Iḳḳarim," iii. 16), however, does not hesitate to suggest doubts as to the obligatory character, since the sacrifices have ceased, of the injunction not to eat the fat.

The final decisions on the eating of fat are these: The fat of ox, sheep, and goat is prohibited; that of other animals is allowed; but that of the "koi," an unidentified hybrid (see Yoma 74), is forbidden. By "fat" is understood a thin, close-fitting layer or membrane that may be peeled off, but meat (lean) must not cover it. The fatty tail is allowed, but the arteries (and muscles) on the inner side must be carefully removed. The fat on the loins and on the membrane above them is forbidden, as is that which is underneath the loins; and skill, attainable only through practise, is required to remove these forbidden portions. The fat upon the omasum, the caul, and the intestines is prohibited. Disregard of the prohibition entails excision, and so does violation of the provision not to eat the fat which is on the thick side of the spleen. What is on the other parts of the spleen should not be eaten, but the person that partakes of it is not liable to excision. Fat and meat must be neither salted nor rinsed together; the vessels for rinsing must be distinct, as must be also the knives for cutting meat and fat. Butchers must exercise care in removing the forbidden parts, and if careless they must be admonished. If, after admonition, as much as a grain of fat is found in the meat which the butcher professes to have prepared, he shall be deposed; and if the quantity overlooked is of the size of an olive, he shall be punished with stripes and be deposed (Shulḥan 'Aruk, Yoreh De'ah, 64). See Dietary Laws.

E. G. H.

FATALISM: The doctrine that every event is predestined and must inevitably take place. According to Josephus, the question of fate—or rather, as he really means, of divine predestination—was one of the points in which the Pharisees differed both from the Sadducees and from the Essenes. The Pharisees held that not all things are divinely predestined, but that some are dependent on the will of man; the Sadducees denied any interference of God in human affairs; while the Essenes ascribed everything to divine predestination ("B. J." ii. 8, § 14; "Ant." xiii. 5, § 9). Thus the Pharisees left to man freedom of will in his spiritual life, but denied any independent initiative in his material life, which they considered entirely subject to predestination. This view is expressed in the Mishnah in the following terms by Hananiah ben Dosa: "Everything is foreseen, but freedom is given" (Abot iii. 15). The same idea is expressed in other words by R. Hanina: "All is in the hands of God, except the fear of God" (Ber. 33a). Another saying of his is: "A man does not hurt his finger in this world unless it has been decreed above" (Ḥul. 7b). Similarly it is said: "The plague may rage for seven years, and yet no man will die before the appointed hour" (Sanh. 29a; Yeb. 114b). "Forty days before the birth of a child," says the Talmud, "a Bat Ḳol [heavenly voice] proclaims: 'The daughter of A shall belong to B; the field of C to D; the house of E to F'" (Soṭah 1a). In another passage it is said that the angel who presides over pregnancy addresses God in the following terms: "Lord of the world! what shall come forth—a strong man or a weak one, a wise one or an ignoramus, a rich man or a pauper?" (Niddah 16b). The most striking example of fatalism found in the Talmud is the legend concerning Eleazar ben Pedat. This amora, being in very straitened circumstances, asked God in a dream how long he would suffer from his poverty, whereupon God answered him: "My son, wouldst thou have me overthrow the world?" (Ta'anit 25a), meaning thereby that Eleazar's poverty could not be helped because it was his fate to be poor.

The Astrological "Fatum."

Besides these fatalistic ideas, proceeding from an exaggerated conception of divine providence and predestination, another kind of fatalism was developed by some later doctors of the Talmud. This was the belief that every person had a particular star with which his fate was indissolubly bound. Rabba said: "Progeny, duration of life, and subsistence are dependent upon the constellations" (M. Ḳ. 28a). Strange as it may seem, the leading idea of this form of fatalism was nothing else than the deep-rooted belief in free will in matters of religion and morality. Being embarrassed by the ever-recurring question, Why does a just God so often permit the wicked (who are responsible for their acts by reason of their freedom of choice) to lead a happy life, while many righteous are miserable? some rabbis had recourse to the astrological "fatum" which attempts to solve this problem. However, in order not to leave anything beyond the control of God they asserted that through prayer and devotion man was able sometimes to bring about a change in his fate. For further information see Astrology; Free Will; Providence.

FATE-BOOKS. See Lots, Books of.

FATHER: The word אב denotes primarily the begetter or genitor of an individual. In a looser sense it is used to designate the grandfather or remoter progenitor in general; also the head of the household, family, or clan; or the originator or patron of a class, profession, or art; or the benefactor or protector. Hence arises the employment of this term as a title of respect and honor. When used of God it generally refers to the covenant relation between Him and Israel (compare Murray's "Eng. Dict." *s.v.*). Moses is called "the father of wisdom" and "the father of the Prophets" (Lev. R. i.). Rabbi Hoshaya is called "the father of the Mishnah" (Yer. Yeb. 4d). The one next in authority to the Nasi in the court of justice was called "father of the bet din" (Ḥag. xvi. 6; compare Rapoport, "'Erek Millin," p. 2); and in the Middle Ages the head of the academy was called "father of the *yeshibah*" (see Schechter, "Saadyana," p. 82; Büchler, "Das Synedrion in Jerusalem," p. 173, and Index, *s.v.* "Ab-Bet-Din"). In the plural the word is used in the sense of famous men, celebrities in Israel's history, especially of the three patriarchs, Abraham, Isaac, and Jacob (Ecclus. [Sirach] xliv., heading). In Mishnah 'Eduyot, Shammai and Hillel are called "the fathers of the world," a title which was also accorded to Akiba and Ishmael (Yer. R. H. 56d).

The father was supreme over his children. His power of life and death is attested by the proposed sacrifice of Isaac (Gen. xxii.), the case of Jephthah's daughter (Judges xi.), and the practise of sacrificing children to Molech (Lev. xviii. 21, xx. 2-5; II Kings xxiii. 10; Jer. xxxii. 35). A later limitation of that right is the requirement in the case of a stubborn and rebellious son, a glutton, or a drunkard, to bring the matter before the elders. It was only by their decision that the son was stoned to death by his fellow citizens (Deut. xxi. 18-21). The father could dispose of his daughter in marriage (Gen. xxix.) and arrange his son's marriage (Gen. xxiv.), or sell his children as slaves (Ex. xxi. 7; Neh. v. 5), a law which was modified by the Rabbis so as to make it almost ineffective (see Slaves and Slavery). He had the right to chastise his children (Deut. viii. 5, xxi. 18; Prov. xiii. 24), and could insist on the utmost respect and obedience from them (Ex. xx. 12; Lev. xix. 3; Deut. v. 16; Prov. i. 8; vi. 26; xxiii. 22; xxviii. 24; xxx. 11, 17; compare Ezek. xxii. 7; Micah vii. 6). Smiting or cursing him was punished by death (Ex. xxi. 15, 17; Lev. xx. 9).

Deut. xxvii. 16 invokes a curse on any one who is disrespectful to his father.

The vow made by an unmarried daughter (Num. xxx. 6) could be disallowed by her father. He was not allowed to sell her in slavery to a foreigner (Ex. xxi. 8). To this the Halakah adds the further restriction that the buyer must not be related to her in any of the degrees in which intermarriage is forbidden (Maimonides, "Yad," 'Abadim, iv. 4).

The father's right to punish his children was restricted by rabbinical authorities to minor children. For the beating of a grown-up son he is liable to be put under the ban (M. Ḳ. 17a). Even minor children must not be chastised in a manner or degree so as to deaden their self-respect ("Yad," Mamrim, vi. 8). The father may not exact obedience from his children if he thereby requires them to do anything which is against the law (B. M. ii. 10).

Duties.

It is the duty of the father to support his children after they have been weaned by the mother—according to the decision of the Synod of Usha (2d century) at least up to the third year; but according to a later ruling, up to the sixth year, even if they have property. From that age on the father can be held to support them only in the same manner as he could be held to contribute to charity (Ket. 49b, 65b; Shulḥan 'Aruk, Eben ha-'Ezer, 71; *ib.* Yoreh De'ah, 250). The father is also obliged to circumcise and redeem his son, to give him an education, to teach him a trade (according to some, even the art of swimming), to secure him a wife, etc. (Tosef., Ḳid. i. 11; Mek. to Ex. xiii. 11; Ḳid. 29a, b; Yoreh De'ah, 245, 260, 305). FATTORI (Sindachi, Gonfalonieri, Fattori del Ghetto, ממונים): The executive body of the Roman community, consisting of three persons elected for one, later for one-half, year, by the representatives of the community. They called the meetings of the community; their consent was necessary in cases of excommunication; they controlled the treasurer, who could make no payments except on their order. They were aided by a committee chosen by the community; they reported to the community every three months, and rendered an account at the end of their term of office. The community was represented by them at the Vatican, which held them personally responsible. Thus they were imprisoned when a Jew escaped punishment by flight. At least one fattore, in addition to the rabbi, was required to take part in the carnival homage to a senator, and to be present during the Sabbath sermons for converts. Any attempt to shun this burdensome and costly office was punished by a fine and subsequently refusal to fill it was strictly forbidden. The office probably existed as early as the twelfth century, although its functions can not be traced definitely beyond the fifteenth century.

G. H. V.

FAUDEL-PHILLIPS, SIR GEORGE, BART.: Lord mayor of London (1896–97); second son of Sir Benjamin Samuel Phillips; born in 1840. George Phillips, who derived the name of Faudel from his uncle, was educated at University College School, completing his studies in Berlin and Paris. He then entered his father's business. In 1867 he married Helen, daughter of Joseph Moses Levy, the proprietor of the "Daily Telegraph," and sister of Sir Edward Lawson, its present chief proprietor. His sister Sarah is the Lady Pirbright. He was appointed sheriff of London and Middlesex (1884–85); succeeded his father as alderman of the ward of Farringdon Within (1888); and became a governor of the Honorable Irish Society (1894). The following year he was created high sheriff of the county of London, and in 1896 he became lord mayor of the city of London.

Sir George Faudel-Phillips,
G. C. S. I.

As chief magistrate of the city, Faudel-Phillips received Queen Victoria at Temple Bar on the occasion of the Jubilee thanksgiving service which was held at St. Paul's Cathedral and subsequently at the Mansion House. His year of office was one of remarkable philanthropy. He raised funds which amounted, in the aggregate, to £1,000,000 for the relief of the famine in India and for other charitable objects. He was the recipient of numerous honors at the close of his term of office, when he was created a baronet, and, in recognition of his services to India, received the Grand Cross of the Indian Empire. He also received numerous foreign decorations. He holds many municipal and charitable offices in connection with the city of London.

Sir George Faudel-Phillips has served the Jewish community as president of the Jews' Orphan Asylum and of the Society for the Relief of the Jewish Blind. The former institution celebrated its centenary during his mayoralty.

J. I. H.

FAULT (פשיעות): Harmful neglect of duty. The "culpa" of Roman law is treated to some extent under the heads of Accident and Bailments, the former dealing with torts arising from lack of care, the latter with the loss of goods or animals through the lack of care or the dishonesty ("dolus") of the keeper.

Another important branch of fault or culpa arises where men entrusted with material to work up, or with implements to repair, do their task badly, or disregard the instructions of the owner, or injure the

Fault in Workmanship.

things entrusted to them. The principles governing this branch are briefly laid down in the Mishnah (B. Ḳ. ix. 3, 4): "If one has given [anything] to mechanics to repair, and they have ruined [it], they must make compensation. If a wagon, a chest, a platform, has been given to a carpenter to repair, and he has ruined it, he is held responsible. And the mason who has undertaken to take down a wall, and in doing so breaks the stones, or does damage, is likewise responsible. [If] he was tearing down on one side, and it fell on another side, he is free from liability; but if [it fell] from his stroke, he is liable. When one gives wool to a dyer and the kettle burns it, the dyer must pay the price of the wool. If he dyes it [so that it looks] ugly, then if the improvement is greater than the outlay, [the owner] pays the amount expended; if the outlay is greater than the improvement, he gives the workman the value of the improvement. [If he gives him wool] to dye black, and he dyes it red, or red and he dyes it black, R. Meïr says he [the dyer] gives him the price of the wool, [keeping the dyed wool]. R. Judah [whose opinion prevails] says: If the improvement is greater than the outlay, he [the owner] pays him [the dyer] the outlay; if the outlay is greater than the improvement, he gives the worth of the latter."

The Gemara *ad locum* (B. Ḳ. 98b–102a), commenting on these two sections, discusses mainly the question whether the workman, by making a change in the object on which he is working, acquires title thereto, and how this would affect the measure of his liability; but the Halakah is against the view of a change of title.

Maimonides, in "Yad," Sekirut, x. 4, and Ḥobel u-Mazziḳ, vi. 11, states the law almost in the words of the Mishnah; adding to it for greater clearness a few words from the Talmud: "Whether the owner has given to the mechanic the wagon, etc., to put a nail in [that is, to make a slight repair], or has given him the timber to make the wagon, etc., the mechanic, if he breaks the wagon, etc., must pay the value of the wagon [of course deducting his wages and outlays]." To the case of the dyer, Maimonides adds: "Or if he gives timber to a mechanic to make a chair, and he makes a bad one, or makes a bench, he must pay for a good chair. And as the workman does not acquire the ownership by change in the material, the employer can not say, 'Let him pay me for my timber or my wool'; nor can the mechanic clear himself by offering to pay the price of the material."

Fault by Lack of Skill.

A baraita in the discussions on B. Ḳ. ix. 3 (99b) takes up the workman's liability for lack of skill: "If one gives wheat out to grind, and [the miller] does not bolt it, but turns it into coarse meal and bran; flour to a baker, and he makes it into flat loaves; a beast to the slaughterer, and he makes a carcass of it [kills it in an unlawful way], the workman is liable, because he is a taker of hire." Maimonides quotes this (*ib.* x. 5), and, following the reasoning of the Talmud, adds: "Hence, if the slaughterer was an expert and slaughtered without reward, he is free from liability; but if not an expert, though he did it for nothing, he is liable. Thus, if I show a coin to a banker who is well posted, and he tells me it is good, whereas it is bad, but charges me nothing, he is not liable for the loss. But if he is not posted he is liable, though he acted for nothing; for I ought to be able to rely on a banker's opinion. And so in like matters." There is in modern law a similar rule, that a quack is liable for mistakes in medical treatment, where a regular physician would not be liable.

In referring to the mason who does harm while taking down a wall ("Yad," Ḥobel, vi. 11), Maimonides couples with him the smith who starts a fire by sparks from his hammer; for a human being, he says, is always "forewarned," whether he acts wilfully or unwittingly, asleep or awake (see Accident).

Another rule connected with fault on the part of workmen entrusted with material or goods is thus stated in the Mishnah (B. M. vi. 6): "All mechanics are keepers for hire [and liable for loss or damage as such]; but all of them, when they say, 'Take thy goods and give me my money,' become gratuitous keepers. When [the owner] says, 'Keep this for me [to-day] and I will keep for you to-morrow,' he is a hired keeper. [If the owner says], 'Keep for me,' and he answers, 'It lies with me,' [he becomes] a gratuitous keeper." R. Huna, in the Talmud on this section, adds: "If he says, 'It lies before thee,' the mechanic is no longer even a gratuitous keeper" (B. M. 81b). And Maimonides ("Yad," Sekirut, ch. x.) gives these propositions as the Halakah.

The following case, however, of acting outside the line of strict law may be mentioned in this connection, though it is not noted by the codifiers: It happened to Rabba bar bar Ḥanah (others read "bar Rab Hunah") that the porters broke a cask of wine belonging to him. Then he took away their clothes in compensation. They went to Rab and complained. Whereupon he said, "Rabba, return them their clothes." The latter asked, "Is this the law?" Rab said, "Yes; as it is said, 'That thou mayest walk in the way of the good ones' (Prov. ii. 20)." He returned their clothes. Then the porters said to Rab, "We are poor and labor the whole day, and now we are hungry and have nothing." Rab then said to Rabba, "Go and pay them their wages." Rabba asked again, "Is this the law?" Rab replied, "Yes; as it is said, 'And keep the paths of the righteous'" (B. M. 83a).

As to a pawning of the finished commodity, and the pawnee's liability for a loss, see Pledges.

s. s. L. N. D.

FAYER, LADISLAUS: Hungarian jurist; born at Kecskemé in 1842. In 1870 he received the degree of doctor of law, three years later becoming privat-docent at the University of Budapest. In 1886 he became professor of criminal law, which position he still occupies. He founded the university seminary for penal law. He wrote: "Bünvádi Eljárásunk Reformjához" (1884); "Bünvádi Eljárás a Törvény Székek Elött" (1885), "A Magyar Bünvádi Eljárás mai Ervényében" (1887); "Bünügyi Esetek Seminariumi Használatra" (1891); "Tanulmányok a Büntetöjog es a Bünvádi Eljárás Köréböl" (1894). He edited the "Magyar Themis"

(1870–80) and the "Jogtudományi Kozlöny" (since 1880). Fayer is secretary of the Society of Hungarian Jurists, and a corresponding member (elected 1894) of the Hungarian Academy of Sciences. He has published several scientific works.

FAYYUM. See EGYPT.

FAYYUMI, AL-. See SAADIA BEN JOSEPH GAON.

FAYYUMI, NATHANAEL AL-: Talmudic scholar and philosopher; flourished in Yemen about the middle of the twelfth century. He wrote a philosophical work in Judæo-Arabic, called "Bustan al-'Uḳul," which he divided into seven parts: (1) the unity of God, (2) man as a microcosm, (3) the necessity of obedience to God, (4) repentance, (5) trust in God, (6) excellencies of the Messiah, (7) the future life. The author quotes Saadia, Baḥya ben Joseph, Solomon ha-Ḳaṭon, and Judah ha-Levi, speaking of the last two as men of his time. R. Gottheil supposes that this Nathanael was the father of R. Jacob b. Nathanael al-Fayyumi, who corresponded with Maimonides about a certain pseudo-Messiah, and to whom Maimonides addressed the "Iggeret Teman"; but Steinschneider declares this identification doubtful.

S. S. M. SEL.

FEAR OF GOD (יראת אלהים, יראת י״י): The Hebrew equivalent of "religion." It is the mainspring of religion, morality, and wisdom, and is productive of material prosperity and well-being. Who fears God will refrain from doing the things that would be displeasing to Him, the things that would make himself unworthy of God's regard. Fear of God does not make men shrink from Him as one would from a tyrant or a wild beast; it draws them nearer to Him and fills them with reverential awe. That fear which is merely self-regarding is unworthy of a child of God. The difference between fear of God and fear of man is contrasted in Isa. viii. 12–13: "Call ye not conspiracy all that this people calls conspiracy, and that which they fear, fear not ye, neither count it worthy of dread. YHWH Sabaoth, Him count ye holy; let Him be your fear; let Him be your dread" (Hebr.).

Fear of God is identical with love and service. "And now, Israel, what doth YHWH thy God require of thee but to fear YHWH thy God, to walk in all His ways, and to love Him, and to serve YHWH thy God with all thy heart and with all thy soul?" (Deut. x. 12). "Thou shalt fear YHWH thy God and Him shalt thou serve" (Deut. vi. 13, Hebr.) in acts of public devotion, the spontaneous outcome of sincere reverence (Ex. xxiii. 25; Deut. x. 12, xi. 13, xiii. 4; comp. Job xv. 4).

Fear of God implies hatred of evil and wrong, and makes for righteousness and peace. "Thou shalt not curse the deaf, nor put a stumbling-block before the blind, but shalt fear thy God" (Lev. xix. 14).

When Abimelech upbraids Abraham for having told him that Sarah was his (Abraham's) sister, Abraham excuses himself by saying: "I thought, surely the fear of God is not in this place; and they will slay me for my wife's sake" (Gen. xx. 11; comp. xlii. 18). Of Job it is said that he was "perfect and upright, and one that feared God, and eschewed evil" (Job i. 1; comp. Ex. i. 17; Prov. iii. 7, viii. 13). "The fear of the Lord driveth away sins" (Ecclus. [Sirach] i. 21).

There exists an intimate relation between fear of God and wisdom. The wise man knows how to value, while the fool despises, the fear of God. Ecclesiastes asserts that the fear of God is the whole duty of man (xii. 13). "The fear of the Lord is the beginning of wisdom" (Ps. cxi. 10; Ecclus. [Sirach] i. 18). Trust in God overcomes all fear and is a protection in time of danger. "Fear not, Abram: I am thy shield" (Gen. xv. 2). "Except the God of my father Abram, He whom Isaac feared, had been with me, surely now hadst thou sent me away empty" (Gen. xxxi. 42). "I will fear no evil: for thou art with me" (Ps. xxiii. 4; comp. cxii. 7).

The fear of God is practical wisdom, productive of blessings in life and death. Thus long life is promised to him who fears YHWH and keeps His laws and statutes (Deut. vi. 2; Yoma ix.; Ps. cxxviii. 1–2; Ecclus. [Sirach] i. 11 *et seq.*; Prov. xiv. 27). Blessings come not only to him who fears God, but also to his posterity (Jer. xxxii. 39). Gratitude for help and deliverance from danger leads naturally to fear of God (Ex. xiv. 31; I Sam. xii. 24).

Fear of God may also be dread of God's punishment in consequence of sin and shame. Thus Adam was afraid to meet God because he was naked (Gen. iii. 10). Job feels "the terrors of God"; and of the wicked it is said: "Terrors take hold on him as waters" (Job vi. 4, xxvii. 20). At times fear is inflicted by God as punishment for man's disobedience (Deut. xxviii. 66; comp. Lev. xxvi. 17).

In the Talmud the conception of the fear of God ("mora shamayim") is similar to that in Scripture. ANTIGONUS OF SOKO used to say: "Be not like slaves that serve their master to receive a reward; be like those that serve their master without regard to reward, and let the fear of Heaven be upon you" (Abot i. 3). "Everything is in the hand of Heaven, except the fear of Heaven" (Meg. 25a; Ber. 33b). "He who has the Torah without the fear of God is like a treasurer who has the keys to the inner treasure, but not to the outer; how then can he reach the inner?" (Shab. 31b). "He who fears God may be likened to the wise artisan who keeps his tools always ready for work" (Ab. R. N. xii.).

E. C. A. G.

FEAR OF MAN (מורא, יראה, אימה, פחד): Respect of parents is especially enjoined by both Scripture and Talmud (Ex. xx. 12; Deut. v. 16). The Talmud makes reverence for parents equal in importance to reverence for God (Ḳid. 30b), for parents are God's representatives on earth (Ḳid. 31a). There were special reasons for the cultivation of reverence for parents in ancient Israel. The machinery for the maintenance of public order and for the administration of civil and criminal justice was extremely simple. The family was the basis of the national polity, and parents were virtually magistrates. Resolute assertion of the authority of the parent was necessary to the security of the state. "Ye shall fear every man his mother and his father" (Lev. xix. 3). He who smote or cursed his parent was put to death by judicial authority (Ex. xxi. 15–17; comp. Prov. xx. 20). Death was also meted out to the stubborn, rebellious, or gluttonous son who would not obey the voice of his father or mother, even though they had chastened him (Deut. xxi. 18–21).

Respect is also enjoined for the aged, for the learned, and for constituted authorities. "Honor the face of the old man" (Lev. xix. 32). "The fear of thy teacher is as the fear of Heaven" (Abot iv. 17b). "Thou shalt not revile the judges nor curse a ruler of thy people" (Ex. xxii. 28, Hebr.). "Pray for the peace of the kingdom, since but for the fear thereof we had swallowed up each his neighbor alive" (Abot iii. 2; comp. Jer. xxix. 7). "As the big fish swallow the little ones, so it would be among men were it not for the fear of government" ('Ab. Zarah iv.; comp. Zeb. xix.).

Fear is looked upon as unmanly, and is rebuked in Scripture. Thus the faint-hearted of an army were allowed to return home lest their presence should have a demoralizing effect upon the other soldiers (Deut. xx. 8; comp. Josh. ii. 11). "I will mock when your fear cometh" (Prov. i. 26). "And it shall come to pass, that he who fleeth from the noise of the fear shall fall into the pit" (Isa. xxiv. 18). Fear is unmanly because it shows lack of confidence in God (see COURAGE). Thus the judges are admonished: "Ye shall not respect persons in judgment; . . . ye shall not be afraid of the face of man, for the judgment is God's" (Deut. i. 17; comp. xvi. 19).

Fear is a natural consequence of an accusing conscience. Thus Cain fears man because he is an outlaw and God's curse rests upon him (Gen. iv. 12). "The wicked flee when no man pursueth" (Prov. xxviii. 1). "The fear of the wicked, it shall come upon him" (*ib.* x. 24; comp. Job xxxix. 22).

FEASTS. See FESTIVALS.

FEDER, TOBIAS GUTMANN: Polish poet and grammarian; born at Przedborz about 1760; died at Tarnopol, Galicia, 1817. He followed in turn the professions of preacher, proof-reader, cantor, and teacher (1780).

Feder was an ardent admirer of Elijah Wilna, and, like him, a bitter opponent of Ḥasidism and mysticism. As a grammarian he was looked upon by J. S. Bick as the successor of Ben Ze'eb ("Kerem Ḥemed," i. 96). As a writer of polemics his satire was keen and biting; his humor was original; and his imitation of the language of the Zohar was excellent.

His Works.

Feder wrote the following works: "Bayit Ne'eman," an ethical treatise on truth, Berlin, 1794 (Fürst, "Bibl. Jud." i. 349, mentions also a Hebrew grammar by Feder bearing this title, but he seems to be incorrect in this); "Ḳol Nehi," elegy on the death of Elijah Wilna, Warsaw, 1798; "Lahaṭ ha-Ḥereb," attack on modern Biblical criticism directed against A. Wolfsohn and J. Satanov, Byelostok, 1804; "Mebasser Ṭob," introduction to Hebrew grammar, with a criticism of the Masorah commentary "Menorat Shelomoh," by Rabbi Phoebus of Dubrovno, Mohilev, 1804; "Ḳol Simḥah we-Sason," a song of triumph written for the Jewish community of Berdychev on the defeat of the French in Russia, Berdychev, 1814; "Haẓlaḥat Alexander," an ode to Alexander I. of Russia, after the departure of the French from Russian territory, *ib.* 1814; "Ḳol Meḥaẓeẓim," a satire against M. Levin (Satanov), who translated the Book of Proverbs into Judæo-German, *ib.* 1816; 2d ed., with introduction and biography by A. M. Mohr, Lemberg, 1853; "Zemir 'Ariẓim," a satirical polemic against the Ḥasidim and their miracle-working rabbis; "Shem u-She'erit," literary epistles and poems, edited by Abraham Gottlober, Lemberg, 1877; "Zohar Ḥadash le-Purim," humorous parody for Purim in the language of the Zohar, in "Oẓar ha-Sifrut," iii. 1–15.

H. R. A. R.

FEDERATION OF AMERICAN ZIONISTS: Zionist association organized in 1897 under the name of "Federation of Zionist Societies of Greater New York and Vicinity." It gradually expanded by absorbing societies outside New York, and on July 4, 1898, a convention was held in New York, the result of which was the founding of a national organization under the name of "Federation of American Zionists," incorporated by the New York state legislature (1902, ch. 102). The number of societies originally enrolled in the federation was twenty-four, comprising, approximately, a membership of 1,000. At the convention held in Boston, May, 1901, the secretary's report showed 152 enrolled societies, with a membership of 8,000.

The federation, from its New York headquarters, publishes a monthly magazine under the name of "The Maccabean," founded Oct., 1902. It has published also the following pamphlets: Richard Gottheil, "The Aims of Zionism"; Herbert Bentwich, "The Progress of Zionism"; Rebecca Altman, "George Eliot as a Zionist"; Emma Lazarus, "An Epistle to the Hebrews"; A. Tannenbaum, "Judaism and Zionism." Prof. Richard Gottheil has held the office of president since the organization of the federation, and the successive secretaries have been Stephen S. Wise, Isidore D. Morrison, and Jacob de Haas. It has a subfederation for the Western States under the name of **Knights of Zion,** with headquarters at Chicago.

A. I. D. M.

FEE: A payment for service done or to be done, usually for professional or special services, the amount being usually fixed by law or custom. The duties discharged by the Levites in connection with the service of the Tabernacle and, afterward, of the Temple were compensated by the tithes of Israel. The priests in their turn received a tithe of the income of the Levites, as well as a number of gratuities known under the name of "the twenty-four gifts of the priesthood" (Tosef., Ḥallah, ii.; "Aruch Completum," *s.v.* עשר). Samuel took naught of any man's hand (I Sam. xii. 4). Elisha refused to accept anything from Naaman, the Syrian captain, for curing his leprosy, and cursed Gehazi for taking a gift (II Kings v. 16-27). Yet Elisha did not object to the furnished chamber prepared by the Shunammite; from which the Talmud deduces that one may accept a gratuity, although the prophet Samuel taught otherwise by carrying his household with him whenever he traveled (Ber. 10b) so as not to be dependent on others.

Teachers.

The learned professions were not strictly defined in Talmudic times, and the Rabbis treated the laws pertaining to them under the laws of master and servant. While a learned man need not reject a favor or benefit, he must not demand payment for teaching the Law. Moses said: "Behold I have taught you statutes and judgments even as the Lord my God commanded me" (Deut. iv. 5). All must follow the example of God and of Moses and teach without reward. However, a primary-school teacher may charge for taking care of children, or for instruction in the accents and the division of verses (B. B. 37a). Maimonides allows the customary price for teaching the Scriptures, but not for the common law ("Yad," Talmud Torah, i. 7; compare Shulḥan 'Aruk, Yoreh De'ah, 246). Nevertheless, the student must hire a teacher, even if he can not obtain free tuition, as the Proverbs say: "Buy the truth and sell it not" (xxiii. 23). R. Zadok said: "Make not the Law thy hoe . . . for whoever derives a benefit of the Law loses his life in the world to come" (Abot iv.). R. Tarphon, accused of theft and in danger of being thrown into the river, saved himself by revealing his identity; an act which he regretted all his life as an unworthy use of the respect paid to him only as a scholar. Jonathan b. Amram, a disciple of Rabbi Judah, would not make himself known in order to share in Judah's distribution of food to scholars at a time of famine, but begged to be fed like a dog or a crow (B. B. 8a). In Temple times teachers were appointed to instruct the priests in the details of the service, and they received a stipulated sum from the Temple treasury (Ket. 106a).

Physicians.

The physician, although frequently looked upon as a communal official (see Health Laws), seems not to have received any fixed salary, but to have maintained himself by casual fees. The fee incidental to an illness caused by an assault was collected from the assailant, who was also obliged to make a further payment in compensation (see Damage; Tort). The fee in this case, as in the case of hired service, if not determined previously, was regulated by legal custom (see Hiring and Letting).

Attorneys at law were unknown to Jewish jurisprudence, and those who assumed their functions were regarded with suspicion by the Rabbis (see Abot i. 8; comp. Shab. 139a). The attorney who was authorized to represent his principal for the purpose of receiving property from a bailee or trustee was regarded as an agent, and the principal was obliged to pay all his expenses (B. Ḳ. 70a). There was no provision for his fee, which was probably regulated by the general customs of hiring and letting (see Attorney; Master and Servant).

Notaries.

The scribes of the court of justice or of the Temple received an annual salary (Ket. 106a; comp. Shab. 56a). There were, however, private notaries who drew up deeds of sale, bills of marriage or divorce, promissory notes, and other legal documents. They received a special fee for each service rendered. The general principle was that the party to whose advantage the transaction was presumably made should pay the scribe's fee. Thus the borrower paid the fee for the preparation of a promissory note, the buyer for the deed of sale, the hirer or tenant for the lease, and the bridegroom for the engagement or marriage contract. The fee for documents prepared in connection with the litigation of a case that came up in court was divided equally between the litigants (B. B. 167b; Maimonides, "Yad," Malweh, xxiv. 2).

Judges.

The judge was forbidden to take any fee for rendering judgment; the decisions of a judge who accepted a payment should be considered void (Bek. 29a). The rendering of judgment was regarded by the Rabbis as teaching the Law, for which no payment might be accepted. But a judge was permitted to demand payment for loss of time, which payment was shared equally by plaintiff and defendant. Thus Karna, a justice of Babylonia, accepted a zuz from both the complainant and the defendant, explaining that he merely took his usual fee as a connoisseur of wine. Another justice, R. Huna, when the litigants appeared before him, said: "Pay me for the hire of a man to irrigate the field in my place, and I will sit in judgment" (Ket. 105a). Those judges who were appointed by the community and had no other occupation might take a salary from the communal treasury (see "Yad," Sanhedrin, xxiii. 5; Ḥoshen Mishpaṭ, 9, 3). In Temple times the magistrates of Jerusalem (דייני גזירות), whose duty it was to guard the public safety, received an annual salary from the Temple treasury ("terumat-ha-lishkah": Ket. 105a). There is no mention made of the salaries which the members of the Sanhedrin, or the city or government officials, received.

Later, when communities chose permanent ministers, whose duty it was not only to decide questions of ritual, but to render judgment in civil cases, it became customary for both parties to pay a fee to the minister for the decision rendered. In spite of the opposition of many authorities to this custom, it remained in force and is still practised. In the Orient, however, and particularly in Jerusalem, the custom still prevails not to charge the litigants anything. Some pious and learned men would not derive benefit from the Law by accepting a paying rabbinical position. Isaiah Hurwitz of Safed, in his "ẓawwa'ah" (ethical will), admonished his sons not to accept remuneration for any rabbinical position beyond the amount necessary to maintain the yeshibah ("Shelah," p. 183b, ed. Amsterdam, 1698). On the other hand, the acceptance of fees is defended by Simeon b. Ẓemaḥ Duran ("Tashbaẓ," i. 142-148), by the Shulḥan 'Aruk (Ḥoshen Mishpaṭ, 9, 5), and by the glossarists, especially in a responsum of Alfandari. The continuance of the custom, in spite of much objection, is probably due to the fact that the rabbis of those days received meager salaries, the fees being necessary to their maintenance. The fee was not regulated by law or custom, but was left entirely to the good will of the parties interested (Ḥoshen Mishpaṭ, 9, 5; Pitḥe Teshubah, *ad loc.*; Ḥatam Sofer, Ḥoshen Mishpaṭ, 164; Shebut Ya'aḳob, i. 142). Fees were also given, notwithstanding the opposition of many authorities, for the performance of a marriage ceremony, the arrangement of a divorce or a ḥaliẓah, or for the performance of other religious functions. The fees charged for a divorce by the rabbis of Germany were sometimes very exorbitant (Obadiah de Bertinoro on Bek. iv. 6).

Ministers.

FEET, WASHING OF.—Biblical Data: Since the Israelites, like all other Oriental peoples, wore sandals instead of shoes, and as they usually went barefoot in the house, frequent washing of the feet was a necessity. Hence among the Israelites it was the first duty of the host to give his guest water for the washing of his feet (Gen. xviii. 4, xix. 2, xxiv. 32, xliii. 24; Judges xix. 21); to omit this was a sign of marked unfriendliness. It was also customary to wash the feet before meals and before going to bed (comp. Cant. v. 3); to abstain for a long time from washing them was a sign of deep mourning (II Sam. xix. 24). Though there are no extant laws for laymen in regard to washing the feet, such laws for priests are given in Ex. xxx. 19–21. There mention is made of brazen vessels, placed between the Tabernacle and the altar of burnt offering, in which the priests had to wash their hands and feet on entering the Tabernacle or before approaching the altar of burnt offerings: hence at all their priestly functions. Just as no one is allowed to appreach a king or prince without due preparation, which includes the washing of the hands and feet, so the Israelite, and especially the priest, is forbidden in his unclean condition to approach Yhwh, for he who comes defiled will surely die.

E. G. H. W. N.

——In Rabbinical Literature: This was a service which the wife was expected to render her husband (Yer. Ket. v. 30a); according to Rab Huna, it was one of the personal attentions to which her husband was entitled, no matter how many maids she may have had; likewise, according to the Babylonian Talmud (Ket. 61a), besides preparing his drink and bed, the wife had to wash her husband's face and feet (comp. Maimonides, "Yad," Ishut, xxi. 3; Shulḥan 'Aruk, Eben ha-'Ezer, 80, 4). The priests were not permitted to minister unless they had performed their ablutions, among which the washing of the feet is especially mentioned (Zeb. 17b). According to Tosef., Men. i., the priests were accustomed to rub and wash their hands and feet in the basin twice, to insure the proper degree of cleanliness.

On Sabbath and on Yom ha-Kippurim, as well as on Tish'ah be-Ab, certain restrictions were placed on washing of hands, face, and feet. Yet one who on Tish'ah be-Ab came from a journey was permitted to wash his feet (see Lampronti, "Paḥad Yiẓḥaḳ," *s.v.* רחיצה).

FEILBOGEN, JOSEPH: Austrian rabbi; born 1784; died at Strassnitz, Moravia, March 3, 1869. He officiated as rabbi successively at Piessling, Pirnitz, Kanitz, Great Meseritz and Holleschau. He was considered one of the keenest Talmudists of Moravia, was a great pilpulist, and wrote many novellæ on various Talmudic treatises. While at Great Meseritz he was the teacher of Isaac Hirsch Weiss, the author of "Dor Dor we-Dorshaw."

FEILCHENFELD, GABRIEL FABIAN: German rabbi and author; born at Schlichtingsheim, Silesia, June 18, 1827. He received his first training in rabbinical literature in Rawitsch, the home of his father, and continued his studies in Dresden under his brother-in-law, W. Landau, and under Zacharias Fränkel. He subsequently studied at the universities of Berlin and Halle, from which latter institution he received the degree of doctor of philosophy in 1857. A year previously he had been appointed to the teaching staff of the "Religionsschule" (Sabbath-school) in Berlin. He filled the same office in Dresden from 1857 to 1858. In 1859 he was called as rabbi to Kulm, West Prussia; this position he held until 1876, when he was called to Schwerin, where he still occupies the position of "Landesrabbiner" of the grand duchy of Mecklenburg-Schwerin. He is principal of a seminary for Sabbath-school teachers. Feilchenfeld is the author of the following works: "Anleitung zum Religionsunterricht," 1881; "Ein Systematisches Lehrbuch der Israelitischen Religion," 3d ed., 1900 (translated into English by Koppolowitz, Richmond, Va., 1894).

S. D.

FEINBERG, SOLOMON: Russian financier and philanthropist; born at Yurburg, near Kovno, in 1821; died at Königsberg, Prussia, May 21, 1893. He settled at Königsberg in 1866. At the outbreak of the persecutions of the Jews in Russia in the year 1881, Feinberg organized a committee of relief for the Jewish emigrants passing through Königsberg, and took a leading part in the conference of the Alliance Israélite Universelle held in Berlin in that year. A year later Feinberg was elected by the Lithuanian Jews to represent them at the conference of Jewish notables summoned by Alexander III. at St. Petersburg.

H. R. I. Br.

FEINSTEIN, ARYEH LÖB: Russian scholar; born at Damachev, near Brest-Litovsk, Dec. 6, 1821; died there Jan. 20, 1903. Feinstein studied the Talmud for many years, and afterward accepted the position of foreman with a firm at Brest. In his commercial transactions with Christian merchants Feinstein acquired a knowledge of languages, and he also studied the secular sciences. Later he established a business of his own and succeeded in amassing a large fortune.

Feinstein has always taken a great interest in the affairs of the Jewish community; and has been for many years its parnas.

He is the author of the following works: "Elef ha-Magen," a commentary on the Haggadah of Passover, Warsaw, 1870; "'Ir Tehillah," a history of the Jewish community of Brest-Litovsk (in collaboration with Abraham Marcus Finkelstein), *ib.* 1886. The latter work, although not always reliable because of its neglect of critical investigation into the material at hand, contains some valuable contributions to the history of the Lithuanian Jews in general and of those of Brest-Litovsk in particular.

H. R. I. BR.

FEIS, JACOB: German merchant and author; died on July 7, 1900, in London, where he had resided for many years. He devoted his literary attainments chiefly to rendering some of the English classics into German, including Tennyson's "In Memoriam" and "Œnone," and various excerpts from the works of Ruskin. In 1884 he published in English "Shakespeare and Montaigne: An Endeavor to Explain the Tendency of 'Hamlet' from Allusions to Contemporary Works." It was designed to prove that the innovations in the later editions of "Hamlet" were directed against the principles of the then novel philosophical work, "The Essays of Michel Montaigne."

FEISTEL, LEVY: French army officer; born 1789; died 1855. After receiving a Talmudic training, he went to Mayence in 1806, and was admitted into the polytechnic school. He entered the army, and became a captain of artillery in 1813, and a major in 1835. He was in the retreat of 1848, and took part in the Crimean campaign, after which he retired with his family to Metz.

FEIWEL (PHOEBUS), URI SHRAGA B. SOLOMON: Rabbi of Dubrovno, government of Mohilev, Russia, at the end of the eighteenth century and at the beginning of the nineteenth; married a daughter of Elijah Wilna. He is known only as the author of "Minḥat Shelomoh," notes on the Pentateuch (to supplement the omissions of R. Jedidiah Solomon Raphael Norzi in his "Minḥat Shai"), and of "Menorat Shelomoh," on the Masorah. Both works appeared together with "Adderet Eliyahu," Elijah Wilna's commentary on the Pentateuch (Dubrovno, 1804).

FEKETE, JOSEPH: Hungarian journalist; born in Kecskemét Nov. 19, 1854; studied law at Berlin and Leipsic. At the latter city he founded the critical review "Deutsche Reichslaterne." In 1884 he went to Budapest, where, together with Josef Hevesi, he edited the "Magyar Szalon," a monthly, of which he later (1891) became sole editor. He published the following works: "Az Esküdtszéki Intèzmenyröl" (1884); "A Magyar Nemzet Gazdasàgi Törtènete" (1887); "Magyar Festök Mütermeiben" (1894); etc. Fekete is a convert to Christianity.

FELBERMAN, LOUIS: Author and journalist; born in Hungary in 1861. In 1881 he went to England, and subsequently joined the staff of the society journal "Life" (then owned by his brother), of which he himself is now (1903) proprietor and editor. Felberman is a knight of the Austrian Imperial Order of Franz Josef, and a fellow of the Hungarian Geographical Society, etc. He is also chairman of the Franz Josef Shelter Fund of London, and the founder of the Society for the Encouragement of Home Industries. He was a member of the Royal Hungarian Commission for the Paris Exposition, 1900. His publications include: "Hungary and Its People"; "The Puszta"; "Ancestors of Our Future Queen" (a family history of the Duke of Teck); and "Gipsy Czinka's Prophecy." Felberman has translated several of Jokai's romances.

J. T. SE.

FELD, JULIUS: Rumanian artist; born at Botuschany, Rumania, June 21, 1871. At an early age he went to France and studied at the Ecole des Beaux Arts under Delaunay, Bonnat, and Gérôme. He quickly made his mark as a portrait-painter, and has painted portraits, among many others, of Zadoc Kahn and Prince Kalimaki. Feld has also established a reputation as a decorator. For the Paris Exposition of 1900 he painted four panels for the Palais de la Femme: "Le Champagne," "La Bière," "Le Chocolat," and "La Liqueur."

Among Feld's pictures are "La Morte de Cléopâtre," "La Renonciation de Saint Pierre," and "Rebecca Donnant à Boire à Eliezer."

S. V. E.

FELD (ROSENFELD), SIGMUND: Hungarian actor and theatrical manager; born at Spácza, Hungary, 1849. In 1867 he appeared at the Josefstädter Theater in Vienna. He studied in various German theaters on an allowance given him by Heinrich Laube, who in 1872 engaged him for the Vienna Stadttheater. In 1874 Feld went to the Deutsches Theater at Budapest, where he soon became a favorite in character rôles. In 1876 he was made director of the summer theater in the Stadtwäldchen, producing plays in German and in Hungarian. His principal creation is the part of the pastor in Anzengruber's "Der Pfarrer von Kirchfeld." The Hungarian poet E. Madách, and E. Tóth, the foremost Hungarian writer of national comedies, were introduced by Feld to the German stage.

FELDKIRCH. See TYROL.

FELDMAN, WILHELM: Polish author; born at Warsaw 1868. Since 1886 he has published the following works, in which he advocates the assimilation of the Jews with the people among whom they dwell: "Assimilatarzy, Sjonisci i Polaci"; "O Zargonie Zydowskim"; "Stasunek Mickiewicza do Zydow"; "Kosciuszko"; and "Berek Joselowicz." He acted as secretary of the Baron de Hirsch Fund at Cracow (1891–94), devoted himself to public affairs, and took part in forming the Galician Radical Progressive party. He was one of the founders of "Ognisko," a journal for the progressive Polish youth. In 1895 he attended the lectures on social science and philosophy at the University of Berlin, but at the end of that year, being accused of propagating the scheme of "Great Poland," he was compelled to leave Berlin. He then went to Cracow, where he founded the "Dziennik Krakowski," a democratic newspaper for freethinkers, which existed only a year and a half. He then settled in Lemberg as a journalist.

Feldman has written a drama, "Sady Boze," which was first played and printed at Warsaw in 1890, and the following novels: "Pienkna Zidowka"; "Zidziak," 1888; "Nowele i Obrazki," 1889; "W Okowach," 1890; "Jak w Zyciu," 1894; "Nowi Ludzie," 1894; "Ananke," 1897.

H. R. V. R.

FELDMANN, LEOPOLD: German dramatist; born at Munich May 22, 1802; died in Vienna March 26, 1882. He was one of the most prolific farce- and comedy-writers in Germany, and his plays have proved their worth by their long-continued popularity.

Feldmann, whose early inclinations were toward poetry, was apprenticed when a boy to a saddler, but his strength proving insufficient for the work, he was indentured to a shoemaker, and soon made progress in his trade. His shoemaking career was ended abruptly by an ill-appreciated effort at poetry, addressed by him to a maiden of the vicinity, and glued to the sole of one of her shoes, which had been repaired by the future dramatist. Despairing of making a respectable cobbler of the boy, his parents sent him to school again, where, at the age of sixteen, he composed a tragedy, "Der Falsche Eid," which was produced at the Volkstheater, Munich.

He next engaged in business at Pappenheim, where he remained until 1821, when he returned to Munich and abandoned commerce for literature. Soon afterward he made the acquaintance of Safir, on whose advice he gave free vent to his humorous inclinations. In 1835 he published his "Höllenlieder," a satire on a luckless love. After traveling through Greece and Turkey for five years, Feldmann returned to Munich and resumed his literary labors. In 1850 he went to Vienna, and was appointed dramatist of the Theater an der Wien, a post which he held for four years and then resigned.

Feldmann's best-known plays are: "Der Sohn auf Reisen" (comedy); "Reisebilder"; "Das Porträt der Geliebten"; "Die Freie Wahl"; "Die Seelige Gräfin"; "Der Rechnungsrath und Seine Töchter"; "Ein Filz als Prasser"; "Ein Höflicher Mann"; "Der Deutsche Michel"; "Die Heimkehr von der Hochzeit"; and "Die Schwiegertochter."

FELEKI, HUGO: Hungarian physician; born at Lovasberény March 23, 1861; studied medicine at the University of Budapest, where he became privat-docent of urogenital diseases in 1889. The instruments invented by him and bearing his name are generally recognized by specialists. His work on urogenital diseases appeared in 1890, in two volumes (German transl. in 1894), under the title "Die Klinik der Blasenkrankheiten." Feleki is on the editorial board of the "Centralblatt für die Krankheiten der Harn- und Sexualorgane" of Berlin, and is vice-president of the dermatological section of the Royal Society of Physicians of Budapest, and one of the superintending physicians of the Polyclinic of that city. He was instrumental in founding the Teleia society of Budapest, the purpose of which is, by literary and social institutions, as well as by gratuitous medical services, to check prostitution, and the spread of the diseases incidental to it.

S. L. V.

FELIX (ANTONIUS FELIX): Procurator of Judea. Felix, who was a freedman of the empress Antonia, was administrator of Samaria, and probably of Judea proper also, as early as the time of the procurator Cumanus (Tacitus, "Annales," xii. 54; Josephus, "Ant." xx. 7, § 1). The two procurators almost went to war with each other during the conflict that broke out between the Samaritans and the Galileans; but Cumanus was recalled. Felix was thereupon appointed sole procurator of Judea by Claudius (52 C.E.) on the suggestion of the high priest Jonathan, who had gone to Rome with other nobles on account of the Samaritan disturbances (Josephus, "B. J." ii. 11, § 6; "Ant." xx. 8, § 5). Felix was also entrusted with the entire military command, as Suetonius ("Claudius," § 28) and Victor ("Epit." § 4) distinctly point out. Felix exercised, as Tacitus says, "the royal prerogative in a slavish sense, with all manner of cruelties and excesses"; it was he who excited the bitter feelings of the Jewish patriots to the highest pitch, and for this even his patron Jonathan reproached him in the end.

Related to Claudius by a former marriage, Felix, immediately on entering office, alienated the affections of the Jewish princess Drusilla, sister of Agrippa II., from her husband, King Azizus of Emesa (Josephus, "Ant." xx. 7, § 2; comp. Acts xxiv. 24). He sent the chief of the Zealots, Eleazar b. Dinai, in chains to Rome, while taking relentless measures against his followers, whom he denounced as robbers, crucifying them in countless numbers ("B. J." ii. 3, § 2; "Ant." xx. 8, § 5). On the other hand, he tolerated the much more formidable Sicarii, and used them for his own purposes, as, for instance, in the murder of Jonathan (*ib.*). He also proceeded rigorously against the would-be prophets that were disturbing the peace with their fanaticism, especially against an Egyptian Jew who, with several thousand followers, attempted to drive the Roman garrison from Jerusalem, but who was defeated ("B. J." ii. 13, §§ 4-5; "Ant." xx. 8, § 6; comp. Acts xxi. 38; Eusebius, "Hist. Eccl."

ii. 21). His term of office was practically a reign of anarchy; for even the high-priestly families were at war with the lower priests ("Ant." xx. 8, § 8; "Vita," § 3).

During his term, the apostle Paul was taken prisoner at Cæsarea (Acts xxiii.-xxiv.). A fierce contest arose at that time between the Jewish and Syrian citizens of Cæsarea, and as Felix acted unjustly toward the Jews, he was recalled by Nero about 60 C.E. ("Ant." xx. 8, §§ 7-9; "B. J." ii. 12, § 7). At the intercession of Pallas he escaped punishment ("Ant." *l.c.*). He is mentioned in rabbinical sources (Krauss, "Lehnwörter," ii. 459).

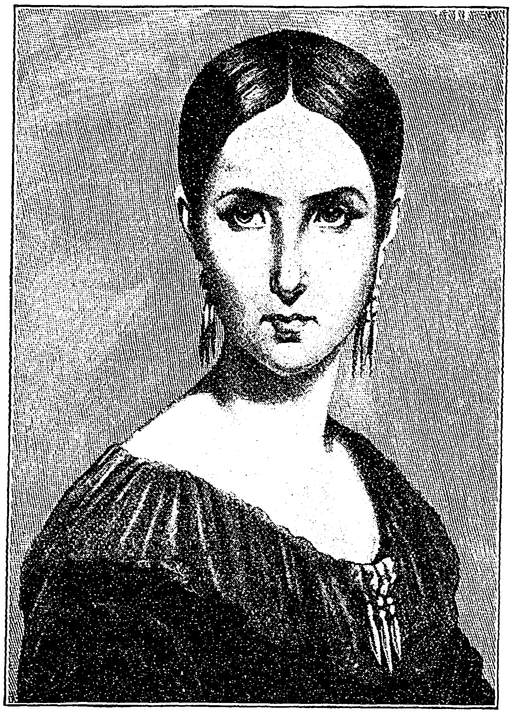
G. S. Kr.

FÉLIX, ELISA-RACHEL (better known as **RACHEL**): French actress; born in the Soleil d'Or, the principal inn of the village of Munf, in the canton Aargau, Switzerland, March 24, 1821; died at Cannet, near Toulon, France, Jan. 3, 1858. Her father was of German extraction, and lived by peddling at Lyons, and afterward at Paris. In the latter city his daughters sang on the streets for a living, and it was there that Rachel was overheard by Etienne Choron, who gave her free instruction, and afterward took her to Pagnon Saint Aulaire, a dramatic teacher, who taught her declamation. Rachel obtained an engagement at the Comédie Française at a salary of 800 francs, but for some unexplained reason the contract was cancelled, and the actress went back to her studies, this time at the Conservatoire. Her début took place at the Gymnase (1837), where she appeared in Paul Dupont's "La Vendéenne"; but, achieving only moderate success, she continued her studies for another year, at the end of which she joined the company playing at the Comédie Française, taking the part of *Camille* in "Les Horaces" (June, 1838). Here Rachel created an extraordinary sensation. She acted in "Cinna," "Andromaque," and "Mithridate," taking the part of *Monime* in the last-named play.



Elisa-Rachel Felix.
(After the painting by Charpentier.)

Rachel made Racine and Corneille's works pay better than modern plays, and saved the Comédie Française from financial ruin. But her father now put forward enormous claims upon the managers, demanding what was then the unparalleled sum of 20,000 francs a year. This aroused the ill will of several critics and of others connected with the Comédie Française. When on Nov. 23, 1838, she appeared as *Roxane* in Racine's "Bajazet," a clique was formed against her, and she was coldly received; but on the following night Rachel received an overwhelming ovation. Thenceforth she was indisputably the greatest actress of her day.

In 1841 Rachel went to London, and was received with great enthusiasm. In the following year she appeared in Belgium. Returning to Paris (Jan. 24, 1843), she appeared in the character of *Phèdre*, her greatest success, and continued in the part for two entire years. She also appeared as *Jeanne d'Arc, Frédégonde, Lucrèce, Mlle. de Belle Isle, Angelo,* and *Louise de Lignerolles*. But her greatest popular triumph was in 1848, during the Revolution, when she sang the "Marseillaise" nightly at the Comédie Française, then rechristened "Théâtre de la République." Night after night the theater was crowded, and each night the workmen in the audience subscribed for her bouquets. Rachel always considered this a far greater triumph than her success in *Phèdre*; but by common consent *Phèdre* was considered her masterpiece, and has been described as "an apocalypse of human agony not to be forgotten by any one who ever witnessed it."

In the following year (April 14) Rachel appeared in the title rôle of "Adrienne Lecouvreur," a play written especially for her by Legouvé and Scribe, and one in which she had immense success. Later in the year she left the Comédie Française to make a tour of the French provinces. In 1853 she went to Berlin and St. Petersburg, where she was enthusiastically received. In 1855 she went to London again, and thence to America. On Sept. 3, 1855, she appeared at the Metropolitan Theater, New York. But though she was warmly welcomed, the trip proved financially unsuccessful. While acting in Philadelphia her health, which had for some time been precarious, gave way. She was ordered South, acted for the last time at Charleston, went thence to Cuba, and finally returned to France. A trip to Egypt failed to cure her. She returned home, and after lingering for three years, during which time she was never able to appear, she died, in her thirty-seventh year.

Rachel's reputation was made in five or six rôles of the old classic drama. Thirteen were specially created for her, but of these *Adrienne Lecouvreur* has alone kept the stage.

S. E. Ms.

FELIX, LUDWIG: Austrian economist; born at Horitz, Bohemia, Feb. 22, 1830. He attended lectures on commerce in Vienna, and devoted himself to historical and economical studies. He wrote: "Die Arbeiter und die Gesellschaft" (1874); "Entwicklungsgeschichte des Eigenthums" (6 vols., 1883–1903); "Währungsstudien mit Besonderer Rücksicht auf Oesterreich-Ungarn" (1890); "Kritik des Sozialismus" (1893).

S. A. Ki.

FELIX PRATENSIS: Jewish apostate; born at Prato, Italy, in the second half of the fifteenth century; died at Rome in 1539. He received a good education and acquired a perfect knowledge of three languages. In 1518 he embraced Christianity, becoming a member of the Augustine order, and thereafter devoted himself to the conversion of the Jews. Like all his congeners, he displayed in his sermons great intolerance of his former coreligionists, earning for himself the sobriquet "the Jews' scourge."

While still a Jew, Felix published a Latin translation of the Psalms, entitled "Psalterium ex Hebræo ad Verbum Translatum," Venice. 1515. He also arranged the Masorah for the "Biblia Veneta" (1518), published by his disciple Bomberg.

K. I. Br.

FÉLIX, REBECCA: French actress; born at Lyons 1829; died at Eaux-Bonnes June 19, 1854. She gave early evidence of talent, was trained by her sister Rachel, and made her first appearance at the age of fourteen, at the Odéon, in the rôle of *Chimène* in "The Cid." Some time later she joined the Comédie Française, where she attracted attention as *Iphise* in Voltaire's "Oreste," and as *Junie* in "Britannicus." In 1850 she played *Catarina* to Rachel's *Tisbé* in "Angelo." Then she played successively *Cécile de Civry* in "Louise de Lignerolles," *Christine* in "Bertrand et Raton," *Dona Florinde* in "Don Juan," the title rôle in "Gabrielle," and the *Dauphin* in "Louis XI." Her health, however, did not permit her to continue these successes.

S. M. Bl.

FÉLIX, SOPHIE (known as **SARA**): French actress; eldest of the sisters of Elisa-Rachel Félix (Rachel); born in a small village near Frankfort-on-the-Main Feb. 2, 1819; died Jan. 12, 1877. She began as a singer in the cafés of Lyons and Paris, later entering the Conservatoire to study for the opera. Failing at the final examination, she gave up this project, and resolved to attempt tragedy and comedy. After several attempts at the Gaîté and the Ambigu, she entered the Odéon, but, following her sister's wishes, she soon after entered the Comédie Française, where she made her appearance as *Célimène* in the "Misanthrope" (1849). Her admission there had been premature, however, and she returned to the Odéon. Here she played in different pieces, finally achieving, in the rôle of *Caroline de Lussan* in Prémaray's "Les Droits de l'Homme," a success that enabled her to return to the Comédie Française. She appeared there (Oct. 29, 1852) as *Elmire* in "Tartuffe," and as the *Marquise* in "La Gageure Imprévue"; she took up again the rôle of *Caroline de Lussan*, and created that of the *Duchesse de Lenoncourt* in "Lys dans la Vallée."

Sophie, however, was much less gifted than her sisters, and much less suited to the dramatic career. After another season at the Odéon, and a journey to America in the company of Rachel, she abandoned the stage. She was present at the last moments of her famous sister, and wrote a last appeal to the chief rabbi of France, Isidor, telling him of Rachel's desire to die in the faith of her fathers, and to receive a minister of the Jewish religion.

S. M. Bl.

FELSENTHAL, BERNHARD: German-American rabbi and author; born Jan. 2, 1822, at Münchweiler, near Kaiserslautern, Germany. He was educated at the Kreisgewerbschule in Kaiserslautern, the Polytechnic High School, Munich, and the Teachers' Seminary at Kaiserslautern. After teaching for a decade in a small Jewish congregational school, he emigrated to America (1854), and settled at Madison, Ind., where he remained for three years as rabbi and teacher. In 1858 he moved to Chicago, Ill., and accepted employment in the banking-house of Greenebaum Brothers. In the same year the Jüdische Reformverein was founded (June 20), with Felsenthal as its secretary and guiding spirit, in which capacity he published, in March, 1859, a pamphlet entitled "Kol Kore Bamidbar: Ueber Jüdische Reform," which attracted attention both in America and abroad. Felsenthal maintained that the Bible was the product and not the source of Judaism, and he emphasized the right of the individual and of the congregation to autonomy in religious affairs.

Bernhard Felsenthal.

The Reformverein developed into Sinai Congregation, and in June, 1861, Felsenthal became its first rabbi. After officiating for three years. he declined reelection, and in Sept., 1864, took charge of Zion Congregation, West Chicago, which had then been recently founded upon the same platform as Sinai Congregation. Felsenthal served this congregation until 1887, when he was relieved from active duty and pensioned as rabbi emeritus. In 1886 Chicago University conferred upon Felsenthal the degree of Ph.D., "honoris causa," and on his eightieth birthday the Hebrew Union College bestowed on him the degree of D.D. In recent years he has identified himself prominently with the Zionist movement.

Felsenthal's published writings include: "Jüdisches Schulwesen in Amerika," 1866; "A Practical Hebrew Grammar," 1868; "Kritik des Christlichen Missionswesens," 1869; "Zur Proselytenfrage," 1878; "Jüdische Fragen," 1896; "The Beginnings of the Chicago Sinai Congregation" (containing also a reprint of "Kol Kore Bamidbar"), 1899.

FÉNYES (FISCHMANN), ADOLF: Hungarian painter; born at Kecskemét April 28, 1867; son of J. H. Fischmann, rabbi of that town. Though he first attracted attention as a caricaturist, he studied law at the University of Budapest; at the end of two years, however, he abandoned law and devoted himself to art, studying at Budapest, Weimar, and Paris. His principal works, awarded prizes in Paris and in Budapest, are: "Prattling," "The Quarrel," "The Life of the Poor Man," and "The Old Man."

S. L. V.

FENYVESSY, ADOLF: Chief of the bureau of stenography of the Hungarian Parliament; born at Zala-Egerszeg 1837; completed his studies at Székesfehérvár and Budapest; adapted the Stolze system of stenography to the Hungarian language, and became the founder of Hungarian stenography. His first book on this subject was entitled "A Gyorsirás Kimeritö Tankönyve" (Berlin, Budapest, 1863). When the Hungarian Parliament reopened he organized its bureau of stenography. He established the stenographers' association, and organized the first stenographic classes in Hungary. As an economist he has contributed to the most prominent Hungarian periodicals—"Budapesti Szemle," "Nemzetgazdaságtani Szemle," etc. He was commissioned by the Hazai Takarékpénztar (Home Savings Bank) of Budapest to write its history, covering a period of fifty years; it appeared under the title "A Pesti Hazai Takarékpénztar 50 Eves Története" (Budapest, 1890). He is a member of the municipal government and an authority on finance.

FEODOSI PECHERSKI. See KIEV.

FERBER, BORIS: Russian author; born in Jitomir 1859; died in St. Petersburg 1895. He entered the University of St. Petersburg, where he took a course in law, but his inclinations not being toward the legal profession, he willingly accepted a position as instructor in the Jewish school of St. Petersburg, where he taught successfully until poor health compelled him to resign. His first literary labors date back from shortly after 1880, when he published several letters in the "Russki Yevrei." Ferber soon gained recognition by his sketches of Russian-Jewish life—"Iz Khroniki Myestechka Cherashni" (in "Voskhod," 1890, xi., xii.), and "Okolo Lyubvi" (*ib.* 1892, viii.)—and also by numerous critical essays and feuilletons in various numbers of the same periodical for 1892 and 1893.

During a residence in Odessa in 1892-94 he took part in the work of the historico-ethnographical commission of the Society for the Promotion of Culture Among the Jews of Russia; and there he wrote his "Sketches of the History of the Jews in England," and "Materials for a History of the Jewish Community of London" (in "Voskhod," 1894).

FERDINAND II.: Emperor of Germany; born July 9, 1578; elected Aug. 28, 1619; died Feb. 15, 1637. On the whole his reign was favorable for the condition of the Jews in the empire, even though they were subjected to the vicissitudes of the Thirty Years' war, which began during his reign. He permitted the erection of the synagogue at Hamburg in 1627, perhaps, however, merely with the view of obtaining similar privileges for the Roman Catholics of that city, of whom he was a protector (Schudt, "Jüdische Merckwürdigkeiten," i. 373). Nevertheless he gave the same permission to the Jews of Vienna, who were allowed by an edict issued December, 1624, to build a synagogue on the payment of 17,000 florins. He also issued a decree to his military officials, ordering them to take particular care of the Jews (Wolf, "Ferdinand II. und die Juden," Beitrag xiii.). For this immunity the Bohemian Jews paid 40,000 gulden per annum, an amount which Wallenstein raised in 1628 to 48,000. When the municipal council of Vienna petitioned for the expulsion of the Jews from that city, the emperor settled them in fourteen houses on the other side of the river, in the present Leopoldstadt; for this he demanded of them 10,000 florins, of which only 4,000 was paid. Similarly, he demanded between 40,000 and 50,000 florins for the privilege he granted them of dispensing with the badge; but after bargaining they obtained the immunity for 20,000 florins. When the Jews were driven out of Mantua, he ordered them, at the request of three influential Austrian Jews, to be reinstated.

It was Ferdinand II. who introduced the formal appointment of court Jews, and in 1622 he raised Jacob Bassevi of Prague to the nobility. The only anti-Jewish action of a marked character taken by Ferdinand was the order given in 1630 to the Jews of Prague and Vienna to attend conversionist sermons on every Sunday. The Jews, however, managed to make the order nugatory. After he died the Viennese Jews had to pay his widow 2,500 florins yearly.

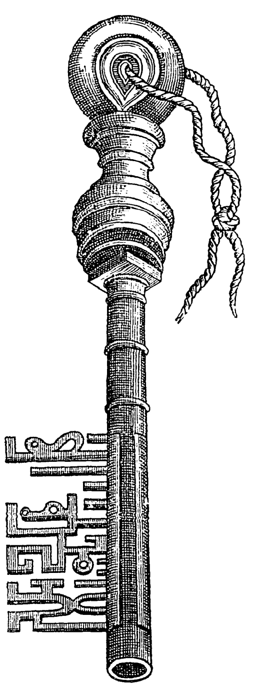
J.

FERDINAND III. (the Holy): King of Castile and Leon; son of Alfonso IX., King of Leon, and the pious Berenguela; born 1200; ascended the throne 1217; died 1252. His reign may be regarded as marking a turning-point in the destinies of the Jews. Despite the opposition of the clergy, he retained the Jewish chief tax-farmer, Don Meïr, as well as all the other Jewish tax-farmers, and sanctioned the "Concordia" which Archbishop Rodrigo of Toledo made with the Jews of his diocese. Ferdinand was the conqueror of Cordova, the old seat of the califs. In recognition of the services rendered by Jews during his expeditions he confirmed their privileges in several cities. Although he was not very favorably inclined toward Jews, they shared in the distribution of land after the capture of Seville. Aznalfarache, Aznalcazar, and Paterna, for a long time called "Aldeas de los Judios," were almost entirely turned over to them. Don Meïr received Valencia del Rio, several thousand feet of olive gardens, and 1,414 acres of land. The tax-farmer Maestre Zag; his sons Moses, Zag, and Abraham; his brother Salomon; the king's physician Joseph Abraham ha-Kohen, and his son Joseph; the interpreter, or physician, Samuel of Fez; an interpreter of Talavera; and an unknown rabbi received in Paterna 40,000 feet of olive- and fig-gardens and many farms in Aznalcazar. The kings also granted Jews lands in Leirena, or Valfermoso, Galichena, Valencina-Toston, Treya, and La Algaba. He allowed the Jews of Seville to retain their synagogue, and presented them in addition four small mosques to be transformed into synagogues, while Don Meïr, Maestre Zag, Don Zag, and Don Joseph received various houses.



Key Presented to Ferdinand III. by the Jewish Community of Seville.
(From Papenbroeck, "Acta Vitæ S. Ferdinandi," 1684.)

The Jews of Seville presented Ferdinand (according to some authorities, Alfonso X., whom Grätz credits with the benefactions referred to) with a large, artistically worked silver key, bearing on one side the inscription מלך המלכים יפתח מלך כל הארץ יבוא, and on the other side the same sentiment in Spanish:

> "Dios abrirá, rey entrá."
> (God will open, the king will enter.)

The key, now in the possession of the cathedral in Seville, is represented in Zuñiga's *Anales de Sevilla*, i. 47, and in Papenbroeck, *Acta Vitæ S. Ferdinandi*, Antwerp, 1684.

G. M. K.

FERDINAND IV.: King of Castile and Leon (1295–1312); son of Sancho IV.; came to the throne in his youth. He had for his confidential friend a Jew of Andalusia, Don Samuel, who acted as his "almojarife mor," or farmer-general of taxes, and director of the royal finances, and exercised a powerful influence over him ("Chron. de D. Fernando IV." xix. 34). In contrast to his pious mother, Doña Maria de Molina, who was regent during his minority, Ferdinand was very partial to the Jews. Soon after his accession he ordered the city of Ocaña to cease its attacks on and oppression of the Jews, and to allow them to enjoy all their rights undisturbed. He granted extraordinary privileges to the Jews of Valladolid, to the great mortification of his mother, with whom he had difficulties for several years. He curtly denied the petition of the Cortes to revoke the Jews' right of appeal in legal disputes between Jews and Christians. Ferdinand was considered an adversary of the clergy, but for no other reason than that he would not permit the Archbishop and Chapter of Toledo to take the Jews under their jurisdiction and impose heavy penalties contrary to law and justice. The Jews rendered him considerable service during the different wars that he waged with the King of Portugal, the King of Aragon, and the Moorish king, especially at the conquest of Gibraltar. In recognition of their services he granted the Jews of Gibraltar complete exemption from taxes. He was finally compelled to recede before the repeated and bitter complaints brought against the Jewish and ecclesiastical tax-gatherers, and to promise that neither Jew nor cleric should thenceforth fill that post.

G. M. K.

FERDINAND AND ISABELLA.—Ferdinand V. the Catholic: King of Spain; born 1452; died 1516; son of Juan II. of Aragon by his second wife, Juana Enriquez, daughter of Fredrique Enriquez, admiral of Castile, and granddaughter of the beautiful Jewess Paloma of Toledo. While still heir to the throne Ferdinand had friendly dealings with many Maranos. His marriage with the much-admired Isabella of Castile was materially furthered by Jews and Maranos on the supposition that he, himself of Jewish descent on his mother's side, would prove, like his father, benevolent toward the Jews. Abraham Senior of Segovia, the chief farmer of the taxes, was specially concerned. He had the young Ferdinand come secretly to Toledo, although this afterward directed against him the opposition of a part of the Castilian nobility. In Monzon Ferdinand had to borrow twenty thousand sueldos from his "beloved" Yayme Ram, who was the son of a rabbi and one of the most important jurists of his time.

Pedro de la Caballeria, a very rich and respected Marano of Saragossa, was called upon to win over the Archbishop of Toledo, Pedro Gonzalez de Mendoza, the Bishop of Siguenza (later Primate of Spain), and others, to this marriage of Ferdinand, and the bridal gift, a costly necklace worth 40,000 ducats, was paid for largely by him. Yayme de la Caballeria, son of Don Bonafos, was the trusted friend of Ferdinand, and accompanied him on his first journey to Naples. Miguel de Almazan and Gaspar de Barrachina, son of Abiatar Xamos, were his private secretaries; the Maranos Gabriel and Alfonso Sanchez, his treasurers. He made Francisco Sanchez his majordomo, and raised Francisco Gurrea, son-in-law of Gabriel Sanchez, to the position of governor of Aragon. As King of Aragon he had recourse to the Santangels when in need of money. Ferdinand wrapped himself in a mantle of piety. The introduction of the Spanish Inquisition, and the subsequent banishment of the Jews from Spain, although decreed by the royal pair, were chiefly the result of Ferdinand's work.

Isabella the Catholic, Ferdinand's wife (b. 1451; d. 1504), was also surrounded by baptized Jews or their sons. Her confidential advisers and secretaries were Fernando Alvarez de Toledo, whose descendants bore the title of Count of Cedillo, and Fernando del Pulgar, author of a history of the reign of Ferdinand and Isabella. Pulgar openly defended his coreligionists and approved neither of the expulsion of the Jews nor of the institution of the Inquisition. The queen's confessor, Fernando de Talavera, was of Jewish descent on his mother's side, and was persecuted as a Marano by the Inquisition despite his high office. Even avowed Jews (for instance, Don Isaac Abravanel) enjoyed Isabella's confidence; but she soon came entirely under the power of the Dominicans.

Nor was she free from covetousness. Pope Sixtus IV. says in a breve dated Jan. 23, 1483: "It seems to us that the queen is urged to institute and confirm the Inquisition by ambition and a desire for worldly goods rather than by zeal for the faith and true fear of God" (Llorente, "Hist. Critique de l'Inquisition d'Espagne," etc., i. 165). Isabella not only endeavored to exterminate the Jewish race from her own kingdom, but also compelled the petty Italian princes to do the same; she made Henry VIII. promise not to allow the Spanish Jews to stay in England; and she promised the hand of her daughter to Dom Manuel of Portugal only on condition that he would expel both the Spanish immigrants and the native Portuguese Jews.

G. M. K.

FERDINAND, PHILIP: Hebrew teacher; born in Poland about 1555; died at Leyden, Holland, 1598. After an adventurous career on the Continent, during which he became first a Roman Catholic and afterward a Protestant, he went to Oxford University, and later removed to the University of Cambridge, where he was matriculated Dec. 16, 1596. He claimed a pension from the "Domus Conversorum," which was paid Feb. 3, 1598, and receipted for by him in Latin, Hebrew, and Greek. The same year he was attracted to Leyden by Joseph Scaliger, who obtained a professorship for him. Scaliger himself acknowledges having learned much from Ferdinand, in the short time he was at Leyden. Ferdinand's only publication was a translation of the six hundred and thirteen commandments as collected by Abraham ben "Kattani" in the Bomberg Bible (Cambridge, 1597).

FERMOSA: A Jewess of Toledo named "Rahel," afterward called "Fermosa" (The Beautiful) because of her rare beauty. She held Alfonso VIII. of Castile, husband of the beautiful and clever Donna Leonora, under her spell for almost seven years. With the consent of the clergy she was seized in the presence of the king by members of the Spanish nobility, and murdered, together with those of her coreligionists who gathered about her. This love-story, which had been relegated to the realm of fable by the Marquis de Mondejar ("Memorias Historicas," xxiii. 67 *et seq.*) and other Spanish literary historians, is related as a fact by Alfonso X., grandson of Alfonso VIII., and by the latter's son Don Sancho. It has been dramatized by Martin de Ulloa, Vicente Garcia de la Huete, and other Spanish writers, as well as by Grillparzer in his play, "Die Jüdin von Toledo."

FERNANDEZ, MANUEL, DA VILLA-REAL: Political economist and dramatist; born in Lisbon of Marano parents. He attended the University of Madrid, and served for a number of years in the army, in which he became captain. Later he removed to Paris as Portuguese consul-general, returning to Lisbon about 1650. He was seized by the Inquisition and garroted in Lisbon (Dec. 1, 1652).

He wrote: "El Color Verde à la Divina Celia," a eulogy on the physician Fernando Alvarez Brandam, also a Portuguese Marano, Madrid, 1637; "El Politico Christianissimo: Discursos Politicos sobre Algunas Acciones de la Vida del . . . Duque de Richelieu" (the first edition of which appeared under the title "Epitome Genealogico del . . . Duque de Richelieu"), Pamplona, 1642; "El Principe Vendido e Venta del Inocente, y Libre Principe D. Duarte, Celebrada en Viana à 25 de Junio de 1642," Paris, 1643; "Anti-Caramuel ò Defensa del Manifesto del Reyna de Portugal à la Respuesta que Escrevio D. Juan Caramuel Lobkovitz," Paris, 1643; "Cinco Livros de Decada 12 da Historia da India," Paris. Fernandez's son José da Villa-Real was professor of the Greek language in Marseilles (1682).

FERNANDO, AARON: Teacher and reformer at Leghorn, Italy; died 1830. He held a position under the first Napoleon, for whom he had the greatest admiration; and in the enthusiasm of that period, he imagined that the eve of universal brotherhood had arrived, and that the Jews must put themselves in line by simplifying their ceremonial. The commandments of the Law were to be reduced to sixty, and most of the ceremonial laws abolished. He set forth these theories in his "Progetto Filosofico di una Completa Riforma del Culto e dell' Educazine Politico-Morale del Popolo Ebreo. Tiberiade 1810," of which only the first of the two volumes was printed. The Jews denounced the book to the authorities as dangerous to religion. The publication was interdicted, and all the copies of the first volume were confiscated (July 14, 1814), bought up by the congregation, and burned. The only existing copy is that of the author, which is now in the Stadtbibliothek at Frankfort-on-the-Main.

FERRARA (פירארה, פיררא): City in central Italy; capital of the province and former duchy of the same name. The Jewish community of Ferrara was one of the most flourishing and important in Italy, and it gave to Judaism a number of prominent men. It would seem that Jews existed at Ferrara in 1088, but not until the thirteenth century was their number large enough to give them a status in history. In 1275 an edict was issued in their favor, with a clause providing that neither the pope nor the duke nor any other power might relieve the authorities of their duties toward the Jews. The community must have been of importance at that time, because many well-known men became residents of the city with the view of winning members of the community to support one side or the other of the controversies then raging among the Jews. Thus Hillel of Verona regarded Ferrara as a desirable field for his efforts in defending Maimonides' philosophy, and at the same time Solomon Petit considered the city a suitable place wherein to conduct his fight against it. The tosafist Moses ben Meïr was probably an older contemporary of these two rabbis (Zunz, "Z. G." p. 57). Moses' father, or son, Meïr ben Moses, was rabbi at Rome and a friend of R. Isaiah di Trani, and is known for his liturgical compositions (Vogelstein and Rieger, "Gesch. der Juden in Rom," i. 376). Of the existence of Jews in Ferrara during the fourteenth century the only evidence is furnished by the name of a rabbi, Solomon Ḥasdai, who was active at Bologna also.

In the Thirteenth Century.

Under the Dukes of Este.

Under the dukes of Este in the fifteenth century the community developed rapidly. It was the aim of these rulers to strengthen the economic condition of their country by attracting settlers. The growing need of credit facilitated the settlement of Jews, who probably were at first admitted here, as to other states of Italy, as money-lenders, though they afterward became active as retailers, manufacturers, and tradesmen. The Jews were allowed autonomy; and the government appointed a special judge to adjudicate matters between Jews and Christians. Though the Jews were permitted to dwell anywhere in the city, most of them lived together in certain streets, which were collectively called "La Zuecca." The community of Ferrara was at that time large enough to be represented at the rabbinical congresses of Bologna (1416) and Forli (1418). It was the duty of Elhanan ben Menahem Portaleone and Joseph Hezekiah ben Moses, delegates at Forli, to see that the enactments of the congress were carried out, and that the money necessary to secure papal intervention was paid at the proper time. The Jews of the Romagna shared in the privileges granted by Martin V. in 1419 to secure to the Jews generally the protection of their rights. Fanatical priests, it is true, constantly sought, by threats of excommunication, to incite the populace against the Jews, to prohibit the sale to them of provisions, and to break off all relations with them; but upon the combined requests of the archduke Lionel and the Jewry, Nicholas V. assured the latter the fullest protection and forbade all further incitation to trouble on the part of the priests. The same pope was also petitioned in 1451 by Duke Borso for immunity for having extended to the Jews, who had lived there "from time immemorial," the privilege of further residence, and for having granted them permission to build synagogues. In return for the legal protection which Borso accorded the Jews, the state imposed high taxes upon them, while the princes no doubt borrowed money from them without paying interest. The Jews were further called upon on various occasions to undertake special tasks. In 1456 Borso forced them, as a penalty "for insults to religion," to lay out at their own expense a long avenue of poplars. The dukes of Este not only protected the Jews, but even offered an asylum to those who were persecuted. Thus in 1473 Duke Ercole I. declared, probably in answer to the pope's request for their expulsion, that in the interest of the duchy he could not spare them, and that he would therefore relieve them not only from all special burdens, but also from the payment of the sums formerly extorted as taxes by papal legates. On account, however, of the magnificent buildings which were being erected, the burden of the ordinary taxes had become so heavy that Alfonso I., in confirming (1505) the privileges of the Jews of Ferrara, decreed that the communities of the province should bear a part of that burden.

The expulsion of the Jews from Spain and Portugal proved to be a matter of great importance to the community of Ferrara. Ercole I., at the instance of his wife, Eleanora of Naples, granted to twenty-one families which had landed at Genoa the privilege of settling in his territory and of leaving it at any time. They were allowed to follow any trade, to farm the taxes, and to be apothecaries; and the duke even promised to secure for them papal permission to practise medicine among Christians. Their baggage was to be admitted free of duty; but, since the revenues were farmed, and the matter was out of the jurisdiction of the state, the customary rates had to be paid on merchandise. The refugees were to share all the privileges of the other Jews, with the exception of establishing loan-offices, though afterward permits were granted even to do this. On Nov. 20, 1492, the fugitives received their passports, and on Feb. 1, 1493, the final agreement was made. Among those who signed this compact were members of well-known families, like the Naḥmias, the Abulafias, and the Francos. The immigrants were physicians, merchants, and artisans.

Settlement of Maranos.

The kind treatment of the duke soon attracted to Ferrara other fugitives, among whom were many Maranos from Portugal, who now openly professed Judaism. The Christian population gladly received the newcomers (all of whom they called "Portuguese"), since they were wealthy and intelligent citizens through whom the flourishing city entered into new commercial relations and was taught new industries. By their share in the commerce of the Spanish colonies, from which they brought Spanish wools, silks, and crimson, as well as of India, whence pearls were imported, they greatly developed the commerce of the city. They likewise stimulated the export trade by their transactions with Maranos in Flanders, Lyons, Rome, Naples, and Venice. The population of Ferrara grew rapidly at this time. Under Ercole the city doubled in population, and there was a rapid development of industries, especially in silk and cloth. The Jewish community of Ferrara is said to have consisted of 3,000 souls. The fact that the sum paid by it—5 per cent of the total property of the Jews—as "Turks' tax" amounted to one-third more than that paid by the community of Rome, is an indication of its development and increasing resources.

It is true, however, that the Estes could not free themselves from all the prejudices of the time. They, also, regarded it as a "mark of respect" for the Jews to be distinguished from the Christian population; thus Alfonso I. "in grazia loro" decreed that the Jews and Maranos should wear the Jews' badge, an "O" with an orange-yellow stripe a handbreadth wide. A "monte di pietà" (pawnshop)—one of the institutions established by Christian socialism in opposition to the Jews—was opened at Ferrara in 1507, without, however, ruining the Jews there as in other places. Religious disputations, also, were forced upon the Jews. Ercole I., his wife, and his brother compelled Abraham Farissol to dispute with several monks (after 1505), and to write his arguments in Italian, so that his opponents might examine and refute them. Under Julius III. the Inquisition was allowed to proceed against the Jews, and as a result the Talmud and other rabbinical writings were burned (1553).

The compact between Ercole II. and the arch-enemy of the Jews, Pope Paul IV., made the condition of the Jews worse. Taxes for the maintenance of the House of Catechumens at Rome were then rigorously exacted. Isaac Abravanel II., whom the Estes highly esteemed as a physician and philanthropist, was imprisoned on a charge of treason, but was found innocent and released.

But the princes were not so blind as not to perceive the beneficial effect of Jewish immigration upon the general welfare. In 1534 Ercole II., especially emphasizing the loyalty of the Jews, confirmed them in all their former privileges, allowed the Maranos free admission to his territories, and granted them permission to openly profess their ancestral faith. At a time when hatred of the Jews was strongest and the fiercest persecution was general, Ferrara remained a bulwark of religious liberty, an asylum for "heretics"; the expelled Jews of Naples and Bologna found a refuge there, as did also the Maranos from Ancona, the duke assuring them perfect religious freedom. When Pius II. wished to abolish the pawn-shops, Alfonso II. decidedly opposed the step, because he felt that the interest of his country demanded their retention.

The Earthquake of 1570.

In 1570 (Feb. 16-17) a terrible earthquake visited Ferrara, "on which occasion many houses and about twelve churches, monasteries, and nunneries were destroyed. Under the ruins of the houses about 200 persons met their death, but not a single Jew perished. The wealthy and liberal Jews who owned houses, courts, or enclosed gardens, opened them and received every one who came, so that some of them harbored no less than 100 strangers; they cared for the needs of the poor, provided fuel for them, and clothed and fed them" (Joseph ha-Kohen, "'Emeḳ ha-Bakah"). The Jews felt themselves so closely connected with the house of Este that when in 1581 Princess Leonora, the friend of Tasso, fell sick, they offered public prayers in the synagogue for her recovery. She herself was a friend of the Jews and repeatedly protected them. Her husband, Alfonso II., also showed his good will toward them; during the famine of 1590 he distributed bread among 2,000 Jews and 200 Spanish and Portuguese Maranos.

The prosperous condition of the Jews, which rested on the favor of the ruling prince, came to an end when, in 1597, the last Este died without leaving any direct male heir. The pope claimed the duchy, and received it after a short resistance, Cardinal Pietro Aldobrandini taking charge of it in behalf of the Curia. Amidst the shouts of rejoicing which greeted the papal legate upon entering the city, the cry was heard: "Down with the Jews!" Great anxiety took possession of the community, especially the Maranos, who dreaded the rule of the pope; and about one-half of the Ferrara Jews migrated to Modena, Venice, and Mantua, so that the census of 1601 showed only 1,530 Jews in a total population of 32,860.

The new ruler, however, proved himself more just than the Jews had anticipated. The cardinal soon became convinced of the importance of the Jews for the commerce and industry of the city; and he granted to the Maranos a respite of five years, which he had obtained with great difficulty from the pope.

On Feb. 17, 1598, was issued a constitution which provided that the Jews in the city and duchy of Ferrara were to be tolerated only on condition that, commencing with May 24, both men and women wore the Jews' badge. Permission to engage in trade was renewed; but the farming of taxes, the keeping of animals, and the acquisition of real estate were prohibited. Within five years all property in the hands of Jews was to be sold—a provision which was carried out in 1602. The number of synagogues was limited to one for each rite; and for the permission to sustain them the Jews had to pay a tax to the House of Catechumens. They were allowed to have only one cemetery (public obsequies being entirely prohibited), and to use Hebrew books only when provided with the imprimatur of the censor. Every new arrival had to report himself to the authorities within three days. Lending money on interest and banking were forbidden to the Jews, being permitted to the monte di pietà exclusively. This provision, however, failed as early as 1599; and the excited population was quieted only when the Jews were again allowed to open banks, a privilege which remained in force till 1683. Other enactments tending to mortify the Jews and to lower them in the eyes of the populace were issued, and finally the severest measure which the papacy ever adopted against the Jews—the institution of the ghetto—was extended to Ferrara (1624). A commission of twelve noblemen appointed to protest against the proposed measure gained nothing except a short respite. During 1626–27 the Via Sabbioni, Via Gattamarcia, and Via Vignatagliata, where the greater part of the Jews had lived for many years, were enclosed by five gates erected at their expense. All Jews were obliged to take houses there that they might be better protected and guarded. The regulations for taking possession of lodgings by the Jews and the newly established "jus ḥazaka" were published in sixteen paragraphs. Among the decrees enacted by the papacy, likewise "in the interest of the Jews," was one ordering one-third of the male members of the community of the age of twelve years and upward to be present at the delivery of sermons directed toward their conversion. The church in which these sermons were preached was at a considerable distance from the ghetto, and on the way thither the victims of intolerance were often grossly insulted. On this account a more convenient place was chosen in 1695. Forced baptisms, likewise, were not unknown. Jurisdiction in the case of difficulties between Jews and Christians was still exercised by the "giudice dé savi"; and the efforts of the bishop in 1630 to have the powers of that officer annulled proved vain. Furthermore, until 1708 the Jewish authorities were allowed jurisdiction within the community, appeal from their decisions being permitted only in cases where more than five scudi was involved. In that year, however, the united efforts of the lawyers were successful in securing the abolition of this partial autonomy.

The Ghetto.

It was natural that such treatment should reduce the wealth of the Jewish population more and more; the ghetto was too poor; and high rents oppressed the impoverished community. Petitions to limit the number inhabiting the ghetto and to reduce the taxes were flatly refused. The result was that the debts of the community and the interest charges grew from year to year; and the richer Jews, obliged to make ever greater sacrifices, emigrated. According to a greatly overestimated report of the papal legate made in 1703, among the 328 families was one whose wealth amounted to 80,000 scudi; ten others possessed between 5,000 and 8,000 scudi; while 148 tradesmen were unable to pay taxes, and 72 lived on alms ("R. E. J." xvi. 249). Naturally, the repressive laws produced among the general population a malicious disposition toward the Jews. In 1648 a Jew sentenced for murder was frightfully tortured. The populace seized the opportunity to commit greater outrages in the ghetto; and similar excesses are reported in the years 1651, 1705, 1744, 1747, and 1754.

On such occasions, it is true, edicts to protect the Jews were issued by the papal legates; but, on the other hand, the populace was reminded of the existing strict laws, and all intercourse with Jews and all services to them were forbidden. Thus at Ferrara the rigid Roman decree of 1732 referring to the Jews was introduced; and in 1733 an edict was issued prohibiting the employment of Christian servants and enjoining a strict censorship of Hebrew books. Jews might neither travel nor visit fairs without the permission of the Inquisition; and in their journeys they were to wear the Jews' badge. This last provision, however, was abolished in 1735. That in spite of such cruel laws and mental torment the community nevertheless continued to exist was due to the discrepancy between the law and its execution. The population was often more friendly than the papal government to the Jews; and the officials quite frequently failed to enforce the laws.

These conditions changed in 1796 with the entry into Italy of the French troops, who proclaimed in Ferrara "the rights of man," so that all civil disabilities were removed from the Jews. On Oct. 3, 1796—during the New-Year festival—the French civil and military authorities visited the four synagogues, where they were received with joy, being escorted back in triumph. The attacks made by the Catholics against the emancipation of the Jews were successfully refuted in pamphlets. The Jews were admitted into the municipal guard; and in 1797, at the instance of the French general Latner, the gates of the ghetto were torn down. The Jews proved themselves worthy of their new rights and duties, and in a short time the municipal guard included nine Jewish officers and the municipality four Jewish officials.

Under French Rule.

The reign of liberty was, however, of short duration. On May 23, 1799, Austrian troops entered the city; the fury of the populace was directed against the Jews, who had to be protected by the soldiers, and for a whole week dared not leave the ghetto. The community was sentenced to pay a fine of 5,000 scudi, and all the ancient laws were enforced. In 1802 the French returned as bearers of liberty; and equality of rights showed itself in the election of three Jewish representatives to the council of the Italian republic. Full liberty was given for religious worship; and in 1803 the clergy was advised not to receive Jews too hastily for baptism. The Vienna Congress of 1814-15 restored the papal government; but times had changed, and a new, liberal spirit permeated the nations. In 1815 Pius VII. demanded the removal of the Jews from public offices, but did not otherwise interfere with their liberties. On the whole, he showed a friendly disposition.

Under his successor, Leo XII., the tendency again prevailed to torture and to kill the Jews, on the plea that "they had tortured and killed Jesus." The ghetto gates were restored at the expense of the Jews, and closed on Jan. 13, 1826; many of the old enactments were enforced, especially the prohibition against keeping Christian servants. The military guarded the ghetto to see that no one lighted fires for the Jews on the Sabbath and on festivals; but, more humane than the pope, the soldiers themselves took pity on them and lighted the fires. Under such circumstances many Hebrews left for the more tolerant Tuscany. In 1827 several more of the provisions of the old laws were renewed. The Jews were prohibited from leaving the city without permission, from having intercourse with Christians, and from owning real estate after the short time allowed for its sale had elapsed. When Leo died the entire population felt relieved; and the vehement hatred against the medieval papal régime showed itself clearly in the revolutionary days of 1831, when the gates of the ghetto were again torn down, and the Jews received all rights as citizens. What remained of the ghetto was enclosed by chains.

Gregory XVI. was on the whole friendly disposed toward the Jews, but even his government allowed them no liberties. When in 1837 a public funeral procession took place on the occasion of the burial of Rabbi Reggio, the community was severely punished. Nevertheless the liberal national movement made rapid progress. The Jews enjoyed the friendship and esteem of the better classes of Christians; they participated more and more in public affairs; and the most respectable "casinos" received them as members.

Hopes Under Pius IX.

With the election of Pope Pius IX. all the dreams and hopes of the noblest and best were expected to be realized. Italy was to be freed and united. His accession was hailed with general jubilation, the Jews being no less enthusiastic than their fellow citizens. Dr. Moses Leone Finzi of Ferrara caused an allegorical painting to be executed for the occasion with the inscription: "Mild in punishment, a god in forgiveness—such is the true picture of Pius." Supported by the citizens, the Jews asked to be granted emancipation. The cardinal legate, Ciacchi, thereupon ordered the removal of the ghetto gates, and only the pillars were allowed to remain. These, also, were destroyed on March 21, 1848, by the professors and students of the Athenæum amidst great jubilation on the part of the noblest and best of the citizens. General fraternization and removal of all religious differences was the watchword of the time. Borsari wrote in defense of the Jews; the Circolo Nazionale, which advocated the union of Italy, sent Salvatore Anau as delegate to Turin, and afterward elected him a member of the constitutional national assembly at Rome; while four Jewish representatives were elected to the new provincial diet. Equality was obtained; and the sacrifices of the Jews for the national cause were justified. To be sure, the hour of final deliverance had not yet come. In 1849 the pope was reinstated by the Catholic powers, and Austrian troops were charged with the protection of his dominions. The Jews suffered most from the change; for they lost their briefly enjoyed liberty. They had to resign all offices and to withdraw from all societies, and even the old prohibition against leaving the city without permission was enforced. In 1857 Pius IX. visited the city. A deputation which asked for the abolition of this decree was kindly received, and the old law was soon abolished. This was the last time that the community was compelled to ask a favor of the pope; for in 1859 the Assemblea Nazionale delle Romagne at Bologna ratified the incorporation of Italy with the kingdom of Sardinia under the scepter of Victor Emmanuel II.

All civic differences between Jews and Christians were immediately removed. The extension of the Piedmontese constitution to the kingdom of Italy admitted the Jews of Ferrara to full citizenship. That emancipation was complete was shown by the fact that some Jews were at once elected to the Consiglio Comunale. The first Jewish member of the Parliament was Leone Carpi of Bologna, who had had to pay with a long exile for his patriotic participation in the national movement. Another sign of the changed conditions was the attendance of the highest authorities at the services held in the synagogue to commemorate the reception of the duchy into the kingdom of Italy. Since 1861 the community has evidenced its warm patriotism in all matters pertaining to the new kingdom, and has given to the state a number of deserving citizens. In 1891 the Jews of Ferrara numbered 1,465 in a total population of 68,000.

——**Internal History:** The Jewish community of Ferrara had to develop under the legal conditions described above. It is not known at what time it was first organized nor what its first constitution was. The first record of its activity dates from the congress held at Forli in 1418. At that time the community possessed all the usual institutions of an organized commonwealth. In 1452 it exchanged its old cemetery for a new one. In 1469 Jacob ben Elijah of Cagli donated to the community a book of prayer, accompanying it with a deed of gift. In 1481, through the generosity of Sev (Ze'eb) Samuel Melli of Rome, it secured in the Via Sabbioni a house to be used as a synagogue, which still serves the

The Constitution of the Community.

same purpose. The same benefactor left a legacy in 1485, the income of which was to be used for giving gratuitous instruction in Hebrew and in the Jewish religion, as well as for the support of the poor; and after Melli's death in 1486 the community organized its first benevolent institutions. The immigration from Spain and Portugal brought the community a large increase in eminent, wealthy, and highly educated members; but at the same time it brought discord and difficulties. The Spanish Jews not only retained their own ritual and erected special houses of prayer, but in every respect formed a separate community of their own. They had their own rabbi, their own Talmud Torah, and in 1550 laid out their own cemetery. In 1531 a house of prayer according to the German rite was built.

The "Università degli Ebrei."

The prevalent distress and continued persecution warned the factions in the community to unite, and union was easily brought about where the interests of the whole coincided. Isaac ben Judah Abravanel, grandson of Don Isaac, rendered great service in this connection after 1550. Though true to Spanish traditions, he was everywhere recognized as leader on account of his noble character and his unselfish devotion to the interests of the community; and he represented the community at the Ferrara Congress of 1554, which adopted resolutions that became binding upon the Jews throughout Italy. After the earthquake the need of a new organization for the community asserted itself. On April 5, 1573, there was held under the leadership of Don Isaac Abravanel a meeting which suggested that the entire community, under the title of "Università degli Ebrei di Farrara," be placed under the control of eighteen delegates to be elected by lot, such delegates to choose annually from among themselves a president and a treasurer; that each member who possessed more than fifty scudi should be obliged to contribute toward the communal funds; and that a commission of eight members, among them three rabbis, be appointed to fix the sum to be raised and to make the assessment. These propositions having been agreed to, the community was at once organized, and Abravanel was elected president.

The payment of the first assessment was effected by each member placing his share in a sealed box, and declaring under oath that it was the correct amount due from him. Although at first intended for three years only, this method proved so practical that it continued to be followed for centuries. The next beneficial result of the new organization was the union of the German synagogue with the Italian, and of the Bolognese with the Neapolitan, Naples having a short time before expelled the Jews, who had then been received by the dukes of Ferrara.

Under the popes the community had to limit the number of its synagogues. The laying out of cemeteries was also made difficult. The administration of the community was in the hands of a large board of sixty-two members and of a smaller one of ten, assisted by the rabbinate. Their main care was that of the finances. Besides the ordinary taxes, the community was obliged to pay high rents for the houses in the ghetto, whether inhabited or not, and whether the tenants themselves were able or unable to pay the rentals. It thus came about that at the end of the papal régime the community had a debt of 32,450 scudi. Added to this, the ever-increasing pauperism made necessary the expenditure of larger sums in charity. In spite of great expenses, however, instruction of the young was not neglected. In 1626 the school was reorganized; besides the income from the Melli legacy, it received congregational support. In 1630 it was united with the Italian synagogue. To defray all charges the taxes were naturally very high, and many wealthy people on this account left the city. The board, therefore, obtained in 1632 the right to prevent any one removing his wealth from the city without permission, and it was later on decided that those who should leave be required to pay 2 per cent on their property toward liquidating the communal debts. These resolutions brought about continual friction; but they were nevertheless carried out, no doubt on account of the impoverished condition of the community. Outside Jews who did business in Ferrara had to pay a trade-tax. The executive board of the community, called "massari," found their efforts warmly seconded by the papal legate; and obedience to them on the part of Jews was often ordered by the authorities.

New Constitution.

The changes under the rule of the French necessitated a new organization. The members formed themselves into a Società dei Pagatori, within which four committees were formed: (1) for the payment of debts; (2) for administering the ghetto property; (3) for benevolence; and (4) for worship and instruction, the recommendation being made that special attention be paid to instruction. In the budget of 4,000 scudi there was needed 2,000 scudi for charity alone; for the interest on debts, 1,500. The new society entered upon its existence in 1798 under the leadership of Angelo Pacè Pesaro; in 1807 some changes were made in its organization; for example, the expenditure of a certain sum in monthly pensions for soldiers was added to its budget. In 1808 the community became a part of the French consistorial organization, which continued to be in force till 1815.

With the return of the popes was restored the ancient form of administration, including the former obligations of the "gazaka" and the former taxes. Two massari represented the community in extra-communal affairs. Communal activity showed itself especially during the famine of 1854 and the cholera epidemic of 1855.

Upon the union of Ferrara with the kingdom of Italy the Ferrara community came under the Ratazzi law of Piedmont, by which it is still governed. The last relic of ancient times was the debt owing to the House of Catechumens, payment of which was demanded and made in 1865.

Synagogues: In ancient times many places of prayer according to the Italian rite existed in private houses. By the donation of Sev Samuel Melli the community received in 1481 a special synagogue building, in addition to which the old places of devotion continued in existence. After the year 1492 houses of prayer for the Sephardic rite were built, and with the permission of the Inquisition the German Jews also opened a

Communal Institutions.

synagogue in one of the existing houses of prayer (1532). Each congregation had its rabbi and its own charity-budget. About 1570 the community had ten houses of prayer; and the Jews regarded as a visible sign of divine protection that during the earthquake of 1570 churches and monasteries tumbled down, but "in none of the ten houses of prayer and small sanctuaries of the Lord in Ferrara was divine service interrupted. True, fissures appeared in the walls, but the people were not prevented from offering prayer in the morning and evening" (Azariah dei Rossi, "Ḳol Elohim," toward the end). In 1573 the founding of the Università degli Ebrei di Ferrara, a fusion of the German and Italian congregations, took place. Under the papal régime there was only one synagogue for each of the various rites; in 1603 the German synagogue was transferred to the building formerly occupied by the Italian. In 1798 the latter was separated from the Melli foundation and incorporated in the property of the community. In 1842 and 1867 the building in the Via Sabbioni, which had stood for centuries, was thoroughly renovated. The beautiful Spanish synagogue still has its own administration. Of the peculiar religious usages in the Ferrara synagogues Isaac Lampronti makes occasional mention in his "Paḥad Yiẓḥaḳ." The synagogue according to the German rite possesses a manuscript list of the various minhagim, which is ascribed to Rabbi Olmo; another manuscript collection of Ferrara minhagim is in the city library of Frankfort-on-the-Main.

Schools: Under the Melli foundation the community received an annual income wherewith to provide a teacher for the poor. From this was developed the Talmud Torah, in which elementary instruction was supplemented by advanced courses in the rabbinic academy. The Spanish had their own Talmud Torah, which, through the efforts of Isaac Lampronti, was united in 1739 with that of the general community. The great attachment of the pupils for these institutions is shown by legacies to the library and to the funds for poor pupils of the Talmud Torah. Not only was instruction given in Hebrew and in the Jewish religion, but the teaching of Italian was likewise gradually introduced; the latter, however, was abolished after 1859, when the general schools were opened to the Jews. Since 1849 the community has also had a kindergarten ("asili infantili"). At all times great care has been bestowed upon the development of the schools of Ferrara, the community as well as individuals making great sacrifices to this end. A large, costly library bears testimony to this day to the zeal with which studies were once prosecuted.

Cemeteries: The oldest cemetery, situated beside the monastery of S. Girolamo, was in 1452 exchanged by the community for another in S. Maria Nuova. The purchase of a cemetery in 1626 was rendered very difficult by the Curia. The Spanish rented a special cemetery in 1550, and bought it outright in 1574; in 1600 they were obliged to lay out a new one, which was enlarged in 1647; sanction for a further enlargement in 1739 was obtained only with great difficulty. The tombstones were demolished by the populace, used as building material by the government, or stolen and placed in Christian cemeteries with new inscriptions. On this account no old inscriptions are preserved at Ferrara. In 1869 the community laid out a new cemetery, toward the expense of which the city contributed. The Spanish then united with the rest of the community and sold their old cemetery site. The Saralov family alone still possesses a burial-place in the old Spanish cemetery.

Foundations and Societies at Ferrara: Samuel Melli of Rome left to the community for charitable purposes the income from his house in the Via Sabbioni, and also his goods and chattels. In 1626 the important society Arcicon Fraternità Ghemillud Assadim, afterward called "Misericordia," was organized to take care of the sick poor and to provide for burials. In 1661 the society of bearers ("kattafim"), and in 1665 that of the grave-diggers ("ḳabbarim"), separated from the parent organization. In addition smaller societies were formed for the help of the sick and the dying, as the Marpe ha-Nefesh (1700), Beruḥe El (1750), Yedide El (1810). The many applications for charity made to the societies often caused pecuniary embarrassment, which was relieved through contributions from the community and from individuals. Since 1877 all these societies have been united under the name "Anshe Ḥesed," which organization, under the direction of the rabbi, is managed by a commission.

In 1718 Rabbi Jacob Daniel Olno established the society Ḥadashim li-Beḳarim, whose object was to provide for the daily minyan and study and to keep certain of the fasts. With this was afterward combined the duty of providing fuel for the poor and of aiding them in paying their rent. This society is subventioned by the community. The Raḥame 'Aniyim was founded in 1820 by pupils of the Talmud Torah to provide candles in cases of death; with this were afterward combined other organizations of pupils which looked after the welfare of the school and of their poorer fellow students, such as the Biḳḳur Ḥolim (1742) and the Malbish 'Arumim (1782); likewise the Shalom Rav, founded in 1698 by Rabbis Jacob and Angelo Zahalun for the purpose of delivering lectures on the Sabbaths, and enlarged by I. Lampronti to a charitable organization. Besides the regular members, the society, which was reorganized in 1856, admits ladies as honorary members.

The Raḥamim, a society for reading the Torah on holidays, was established in 1800 by persons who met every Sabbath for a repast, and who wished to give their society a religious character also. Siinah (*i.e.*, Siyyua ' 'Aniyim), or Il Soccorso, was established in 1850 for the purpose of making small loans to merchants; afterward it distributed books and money as prizes to diligent pupils. A society known as "Maḥziḳe Umanut" or "Arti e Mestieri," founded in 1840, was dissolved, since under the existing laws Jews found no masters and no employment. In the same manner many religious and humane societies which originated in former centuries have been dissolved.

Besides these benevolent societies several legacies for the benefit of the poor are administered by the community. Joseppe Benedetto Alatino and Abraham Raphael Feglio (1755) left a legacy for poor brides. The Pesaro family made great sacrifices in 1737 in order to further the advancement of education. Angelo Pace Pesaro maintained the theological school in 1800 at his own expense. Leone Vita Pesaro left an income for the support of candidates for the rabbinate; in 1827 his descendants made this a permanent endowment, under the administration of the rabbi, for the support of theological studies and for the increase of the library.

Share in General Jewish Interests.

As in 1416 and 1418, so also later the Ferrara community took an interest in general Jewish matters. Twice it had the honor of being the meeting-place of an assembly of Italian Jewish notables. Shortly after the burning of rabbinical writings, June 21, 1554, fourteen representatives from Rome, Mantua, Ferrara, Bologna, Reggio, Modena, Padua, and Venice met under the presidency of Rabbi Meïr Katzenellenbogen to deliberate on some important social questions and to strengthen the moral condition of the Italian communities. The resolutions of this conference have remained in force till the present time. In view of restrictions placed by the censorship laws upon the printing of Hebrew books, it was decided to publish no new book without the approbation ("haskamah") of three ordained rabbis. Every Israelite who bought books without an approbation was to be fined 25 scudi. It was also resolved that lawsuits were not to be brought by Jews in Christian courts without the permission of the community or rabbi. Decisions in civil suits were not to be recorded without the permission of the parties concerned. No rabbi might give a legal decision in the community of another rabbi unless the latter had previously given his permission and had refused to adjudicate the case himself. The enactment of R. Gershon concerning the perpetual right of lease was renewed and developed in Italy into the "jus gazaka," which was valid everywhere in the ghettos, even in the most ancient times. Gershom's prohibition of polygamy was also enforced. Whoever betrothed himself to a girl under ten years of age without the permission of the parents or guardians was to be excommunicated together with his witnesses. Finally, another clause was added, by which money-trading was condemned, and usury was threatened with severe punishment. The representatives of Ferrara who signed the protocol were Elhanan ben Isaac da Fano, Samuel b. Mazliaḥ Finzi, and Isaac ben Joseph Abravanel.

Censorship of Jewish Books.

The destruction of Hebrew literature through the Inquisition likewise necessitated the interposition of the Ferrara community. After the Council of Trent the fate of Hebrew books was uncertain. On this account Abtalion ben Mordecai da Modena, rabbi of Ferrara, in 1581 visited Pope Gregory XIV. at Rome. After many interviews in Latin, one of which concerning the Talmud lasted more than two hours, he obtained a respite of the confiscation; but this did not remove the danger permanently. Under Sixtus V., who showed the Jews a toleration which seems incredible for that time, Jewish literature was again untrammeled. The Ferrara community bore its share in the sacrifices and the difficult negotiations which the passage of this measure had made necessary. It concurred in the resolution of the most prominent Italian communities to carry out through a commission a previous censorship of their own for Hebrew books; afterward at the Congress of Padua it was resolved to raise, by a special tax to be deposited in a central treasury at Ferrara in the care of Solomon da Fano, the amount necessary to cover the expenses of this censorship and of the reprinting of the Talmud. A commission sent to Rome under the leadership of Bezaleel Massari, which obtained permission to own and to print Hebrew books after a previous censorship and expurgation, included deputies from Ferrara. When new opposition to the printing of the Talmud arose, further sums were raised by the communities of Mantua and Ferrara, which pledged themselves to take 700 copies of the proposed Talmud edition. The commission for the expurgation of Hebrew books was formed in 1590, and, Ferrara having again raised the necessary funds, the ban against the Talmud was removed. That the Talmud was saved from the destruction to which it had been condemned was probably owing to the self-sacrifice of the Ferrara and Mantua communities (Stern, "Urkundliche Beiträge über die Stellung der Päpste zu den Juden," i., Nos. 141 *et seq.*). All the later and less important attacks upon Jewish literature were easily repelled after this first victory.

(In the Columbia University Library, New York.)

It is not until the nineteenth century that the community again appears as representative of general Jewish interests. The Ferrara physician Bondi-Zamorain attended the Sanhedrin in Paris, and composed an ode in Hebrew and Latin for the opening of the council's first session. The Alliance Israélite Universelle as soon as it was organized found adherents at Ferrara, and, under the guidance of Rabbi Ascoli and Advocate Leone Ravenna, almost the whole community joined the new union.

In order to adjust the affairs of the Italian community to the changed conditions, thirty-one delegates met at Ferrara on May 12, 1863; they protested energetically against the frequent forcible baptism of Jewish children, and resolved to ask the government for a reform of the laws of the community and for the right of the rabbis to grant divorces. They further proposed to make religious instruction obligatory, in order to promote a sense of religious duty; to disseminate good books on Jews and Judaism; and to found an Italian rabbinical seminary. Their resolutions remained without effect, however, and the congress which met at Florence in 1867, at which Ferrara was again represented, was equally unsuccessful.

Rabbis and Scholars.

The Jewish community of Ferrara takes pride in its possession of names held in high repute in Jewish history and in the world of letters. Moses b. Meïr of the thirteenth century, Solomon Ḥasdai of the fourteenth, and Elia di Ferrara and Menahem b. Perez Trabotti of the fifteenth deserve especial mention. In 1467 flourished the famous surgeon Jacob, court physician to the Estes, who brought Ercole I. through a serious sickness. In the sixteenth century the number of learned men must have been very great. In 1573 a rabbinical society was organized for the education of rabbis and teachers.

The Orientalist Emanuel Tremellius taught at the university; he was baptized, fled from Italy in 1542, and is said to have returned to Judaism at Heidelberg. A few years later Abraham Gallo (Francese Ẓarfati ?) held the professorship in Hebrew at the Ferrara University. The Marano Amatus Lusitanus was a professor of botany and anatomy, and also one of the prominent physicians of his time. Raffaello Mirami was a physician and mathematician. Many Jews attended the medical lectures of the famous Brasavola. Elia Pirro (about 1535) is often mentioned as a Latin poet. The sons and grandsons of Don Isaac Abravanel lived at Ferrara, and most of them are buried there. Don Isaac II. rendered especially important services to the community (see above); and of equal prominence for a long time was Donna Gracia Mendesia, who, with her daughters Gracia and Reyna, and her son-in law Joseph of Naxos, took refuge under the mild rule of the Estes. Under her protection lived the brothers Usque (see FERRARA, TYPOGRAPHY) and their relative, the poet Samuel Usque, author of the "Consolaçamas Tribulações de Ysrael" (*c.* 1565). Azariah dei Rossi, author of "Me'or 'Enayim," likewise lived at Ferrara; as did Abraham Colorni, architect and mechanician, whose services were sought by many courts of Italy and Germany, and Bonajuto Alatino, who in April, 1617, was compelled to take part in a public religious disputation.

During ghetto times there were among the rabbis of Ferrara several who were also famous as philosophical writers and physicians. Among these Isaac Lampronti occupies an honorable position; his fame is commemorated by a tablet placed by the city of Ferrara in 1872 in the wall of the house in which he had lived. Of merchants Moses Vita COEN was prominent and highly honored by the papal court. During the famine of 1764 he supplied the papal government with grain; a namesake of his, Moses Coen, was mayor of the city during the French occupation in 1799.

Leone Carpi and Enea Cavalieri are distinguished modern representatives of the community, and are also members of the Italian Parliament. Rossi and Angelo Castelbolognesi, travelers and explorers, should also be mentioned, as well as the Reggio family, all of whom belong to Ferrara.

The following is a list of the rabbis of Ferrara:

Jacob b. Jekuthiel Corinaldo (beginning of sixteenth century).
Judah Liwa (1511).
David Levi.
Zion Asher ben Eliakim Levi.
Eliezer ben Samuel Ventura (1534).
Menahem ben Perez Trabotti.
Perez ben Menahem Trabotti.
Solomon ben Moses Castelletto (1534).
Johanan Treves.
Joseph ben Ḥayyim (1546).
David Darshan Isaac al-Ḥakim (1553).
Ishmael Ḥanina.
Abraham ben Daud da Modena.
Solomon Modena.
Jehiel II. ben Azriel II. Trabotti.
Benjamin Saul ben Eliezer dei Rossi.
Raphael Joseph ben Johanan Treves.
Baruch Uzziel ben Baruch Forti (1557).
Abraham ben Dia.
Isaac ben Joseph da Monselice (first rabbi after the founding of the Academy).
Moses ben Israel Finzi da Arezzo.
Aaron ben Israel Finzi da Arezzo.
Jehiel Nissim ben Samuel da Pisa.
Ishmael Ḥanina ben Mordecai Rofe da Valmontano.
Joseph Fikas of Fez.
Benjamin ben Ephraim Finzi (close of the sixteenth century).
Hezekiah ben Benjamin Finzi.
Abraham ben Yaḳar (1590).
Abraham Jaghel ben Hananiah da Monselice.
Jacob Moses Ayash.
Abtalion ben Mordecai of Modena (seventeenth century).
Moses ben Menahem da Terracina.
Eliezer David ben Ezekiel del Bene.
Mordecai ben David Carpaneti.
Hananiah Jaghel Monselice (1630).
Judah Azael ben Eliezer del Bene (1650-65).
Menahem Recanati.
Pelatiah ben Hananiah Monselice.
Isaac Jedidiah ben Samuel Borghi.
Menahem ben Elisha Cases.
Phineas ben Pelatiah Monselice.
Hananiah Cases.
Jacob ben Isaac Zahalun.
Mordecai Recanati.
Isaac Lampronti.
Mordecai Zahalun (eighteenth century).
Sabbato Sanguinetti.
Raphael Emanuel Hai Rechi.
Felice Umano.
Joseph ben Isaac Jedidiah.
Samuel Baruch ben Joseph Hezekiah Borghi.
Elisha Michael Finzi.
Jacob Daniel ben Abraham Olmo (1757).
Jacob Moses Ayash.
Joseph Mordecai Carpaneti.
Samuel Bar Shalom Finzi.
Nehemiah ben Baruch Coen.
Isaac ben Close Israel Norsa.
Moses Isaac Hai Pesaro.
Jacob Hai Recanati.
Judah Hezekiah della Vida (d. 1806).
Joseph ben David Bassani (1827).
Elhanan Sabbato Pesaro (1828).
Issachar Ezekiel Reggio (1837).
Leone Reggio ben Issachar (1870).
Isaac Elijah Menahem Ascoli (1875).
Benedetto Levi (1880).
Giuseppe Jaré (....).

E. C. I. E.

——**Typography:** Ferrara contained a Hebrew printing-press as early as the fifteenth century. In 1476, almost contemporaneously with Reggio and Pieve di Sacco, Abraham b. Ḥayyim (מן הצנועים) of Pesaro established a printing-press which competed with Conat's at Mantua. Abraham, however, produced (1477) only two works there, Levi b. Gershon's commentary on Job, and the greater part of the Ṭur Yoreh De'ah, begun by Conat in 1475 (see Zunz, "Z. G." pp. 218 *et seq.*). Abraham then removed to Bologna. In 1551 Samuel Gallus established a printing-house at Ferrara, and produced six works, Isaac Abravanel's "Ma'yene ha-Yeshu'ah" (1551) and five others (1552), the last being R. Meïr's "Hilkot ha-Re'ah." In the latter year Abraham Usque established a press, which existed until 1558. In the first year he printed only Judæo-Spanish and Portuguese works; but in 1553–58 he printed, according to De Rossi, twenty-seven Hebrew works, the first being Simon b. Ẓemaḥ Duran's commentary to the Sukkot "Hosha'not" and the last R. Pereẓ's "Ma'areket ha-Elohut." Steinschneider and Cassel (in Ersch and Gruber, "Encyc." section ii., part 28, p. 45) state that the "Amarot Ṭehorot" must be omitted, and the "Me'ah Berakot" and "Seder Ma'amadot" added to the list. Since 1558 only one Hebrew work is known to have been printed at Ferrara —at Filoni's printing house—viz., "Siddur mi-Berakah," the Italian liturgy (1693). The printers of this book were Joseph Nissim and Abraham Ḥayyim of Fano.

FERRARA BIBLE. See Bible Editions.

FERRARA, MOSES BEN MEÏR: Italian tosafist of the thirteenth century. He was a contemporary of Eleazar ben Samuel and of Isaiah ben Mali. No details of his life are known. He is quoted three times as a tosafist in "Haggahot Maimuni" ("Tefillah," ch. xi.; "Yom-Ṭob," ch. iii., iv.); according to this same work ("Ḥameẓ u-Mazzah," ch. 8), he copied R. Judah's tosafot to Berakot.

S. S. A. Pe.

FERREOLUS: Bishop of Uzès, France (553–581). As soon as he had obtained the bishopric he showed great zeal in trying to convert the many Jews of Uzès. At first he treated them kindly, even inviting them to his table. Complaint was brought against him for this action; and Childebert I. banished him to Paris for three years. In 558 Ferreolus, having proved his innocence, returned to his diocese, but changed his attitude toward the Jews. He convoked a synod for the purpose of converting them by persuasion or by force. Many embraced Christianity, and those who resisted conversion were driven from the diocese. After his death (581) several of his converts returned to Judaism.

FERRER, VICENTE: Spanish Dominican preacher; born at Valencia Jan. 23, 1350; died at Vannes, France, April 5, 1419. Basnage supposes that he was of Jewish descent ("Histoire des Juifs," xiv. 701). He entered the Dominican order in Valencia Feb. 5, 1374, and studied at the University of Lerida (1382–84). From 1385 he preached in the Cathedral of Valencia, and soon became famous for his pulpit eloquence. In 1395 he became confessor and private chaplain to the antipope Benedict XIII. at Avignon. In 1398, however, he became a wandering preacher, and traveled through Spain, France, Italy, and Germany. He had a regular retinue of about 300 Flagellants. At times the people followed him in crowds of thousands, forsaking temporarily their occupations to hear him preach or to be cured by him. The appearance of Ferrer in Spain was one of the principal factors leading to the expulsion of the Jews.

Ferrer saw in the Jews the greatest impediment to his holy mission, and in their conversion a daily proof of it. Therefore he zealously endeavored to bring them into the fold of the Church, imposing upon them, as Jews, many limitations and burdens, and promising them, in the event of conversion, freedom and the pleasures of life. With uplifted cross he forced his way into synagogues and dedicated them as churches, as in Valencia (1391), Santiago (1408), and Alcañiz (1413). His first significant conversion was that of the rabbi Solomon Levi of Burgos, known as "Paulus Burgensis" (1390 or 1391), who, with Ferrer, caused the promulgation of the Castilian edict (Jan. 12, 1412), containing twenty-four articles against the Jews, and creating the "Juderias," or ghettos. According to Rodriguez de Castro, in 1412 Ferrer converted in Alcañiz Joshua Lorki, known as "Geronimo de Santa Fé," who led the discussion against the Jews at the disputation of Tortosa (1413).

FERRET: The rendering in the Authorized Version of the Hebrew "anaḳah" (Lev. xi. 30). The Septuagint has *μυγάλη* ("shrew-mouse"); but from the context it appears that some kind of lizard is meant. The Revised Version gives "gecko" (see Lizard). Some identify the ferret with the "tela-ilan," which the striped "taḥash" is said to resemble (Shab. 28a). The tela-ilan is described by the 'Aruk as a "small animal resembling a cat; unclean, striped, and trained to catch rabbits; called in Arabic 'zabzib,' and in Greek תלא אילן [?]."

E. G. H. I. M. C.

FERRUS, PETER: Jewish convert to Christianity; lived in Spain in the fifteenth century. A poet of ability, he exercised his talents in deriding his former coreligionists. Juan Alfonso de Baena, in his "Canzionero," cites four poems by Ferrus, one of which is directed against the rabbis of Alcala. His attacks did not remain unanswered, for Juan Alfonso cites a poem written by the rabbis in reply to him.

FERUSSOL, COMPRAT VIDAL. See Farissol, Jacob ben Ḥayyim.

FESSLER, SIGISMUND: Austrian lawyer and author; born at Vienna Aug. 26, 1845; educated at the gymnasium and university of that city. He was appointed (1868) judge at the Landesgericht, which office he resigned in 1870. Since 1875 he has practised law in Vienna. He was elected secretary of the Museum für Oesterreichische Volkskunde in 1894.

Fessler has voyaged to the polar seas, Africa, Palestine, Greece, and Italy, and has published accounts of his experiences in various Austrian and German dailies and magazines. He is the author of "Abarbanel" and "Die Letzten Tage von Carthag" (dramas); "Juvenes dum Sumus" (humorous novel); "Humoresken aus dem Ghetto von Nikolsburg"; and "Ghetto Leute."

FESTIVALS.—Biblical Data: The Hebrews designated a festival by the word "ḥag" (the Arabic "ḥajj"), originally implying a choragic rhythmic procession around the shrine of an idol or an altar (see Wellhausen, "Skizzen und Vorarbeiten," iii. 106); but later, without specific reference to this usage, connoting a day or season of joy ("ḥag" and "simḥah" are correlatives; comp. Amos viii. 10; Deut. xvi. 14). As fixed festivals occurred at appointed times, they came to be known as "mo'adim" or "mo'ade Yhwh"; and these became the technical terms for the prescribed holidays, with one exception (Lev. xxiii. 2) always connoting festivals to the exclusion of the Sabbath and New Moon (Ex. xiii. 10, xxiii. 15, xxxiv. 18; Num. ix. 2, 3, 7; xxviii. 2; Deut. xvi. 6; Isa. i. 14, xxxiii. 20), while "ḥag" denotes more specifically the three agricultural festivals (Ex. xxiii. 14), or the Festival of Unleavened Bread and Tabernacles (Lev. xxiii. 6, 34), or the latter only (Judges xxi. 19; Ezek. xlv. 25; II Chron. v. 3; see Bertheau on II Chron. vii. 8, 9).

Traces of old popular festivals indicative of the manner of their observance show that sacrifices were an important feature, usually leading up to feasting (eating and drinking; see Ex. xxxii. 6). Marriage games (see Dancing), probably imitative of former marriage by capture (Judges xxi. 21), persisted even down to the time of the Second Temple; and debauch and revelry were by no means rare (Amos ii. 7–8; comp. I Sam. i. 13–14).

The following are the religious festivals ordained in the Law or referred to in the Old Testament:

The Sabbath (Ex. xx. 10; Deut. v. 14), marked by the cessation of all labor (Amos viii. 15), regarded as a day of joy (Hosea ii. 13), and observed with offerings to Yhwh (Isa. i. 13; Ezek. xlvi. 4). See Sabbath.

Rosh Ḥodesh, or simply **Ḥodesh** (Day of the New Moon), mentioned in the prophetic writings in connection with the Sabbath (Hosea ii. 13; Isa. i. 3; II Kings iv. 23; Isa. lxvi. 23; Hag. i. 1), and marked in the Law by special sacrifices (Num. xxviii. 14, xxix. 6; comp. Ezra iii. 5). See New Moon.

Pesaḥ (Passover; Ex. xii. 1–28), the "Ḥag ha-Maẓẓot" (Ex. xxiii. 14; Lev. xxiii. 4–8), in commemoration of Israel's liberation from Egypt. It lasted seven days, from the fifteenth to the twenty-second of Nisan, the first and the last day being "holy convocations," with abstention from hard labor and the offering of sacrifices (comp. Num. xxviii. 16–25; Deut. xvi. 1–8). On the second day the first-fruit (barley) 'omer was offered (Lev. xxiii. 10). Those that were in a state of impurity or distant from home were bidden to celebrate the festival in the next succeeding month (Num. ix. 1–14). See Passover.

Shabu'ot (Festival of Weeks; Ex. xxxiv. 22), "the feast of the harvest, the first-fruits of thy labors" (Ex. xxiii. 16), the day on which to offer, at the conclusion of seven weeks counted from the day after Pesaḥ (Sabbath), the new meal-offering, "two wave-loaves . . . the first-fruits unto Yhwh," with animal burnt-offerings and drink-offerings and sin-offerings and peace-offerings (Lev. xxiii. 15–22, R. V.; Deut. xvi. 10–12; Num. xxviii. 26–30). The festival was marked by abstention from hard labor, and by a holy convocation. See Pentecost.

Yom Teru'ah (Blowing of the Trumpets; Num. xxix. 1; comp. *ib.* x. 10), or **"Zikron Teru'ah"** (a memorial of blowing of trumpets; Lev. xxiii. 24), the first day of the seventh month, a holy convocation with cessation of hard labor and prescribed fire-offerings. See New-Year.

Yom ha-Kippurim (Day of Atonement), the tenth day of the seventh month, "a Sabbath of rest" ("Shabbat Shabbaton"), with fire-offerings, and holy convocation, with absolute cessation of all labor, under penalty of excision ("karet"), and with fasting (Lev. xxiii. 26; Num. xxix. 7–11). See Atonement, Day of.

Sukkot (Festival of Booths ["tabernacles"; Lev. xxiii. 34; Deut. xvi. 13]), lasting seven days, from the fifteenth to the twenty-second of the tenth month (Tishri), the first day being a holy convocation. For seven days offerings had to be brought (Num. xxix. 13), the eighth day being also a holy convocation ("'Aẓeret"; Num. xxix. 35). Labor ceased on the first and eighth days. This feast was also known as "Ḥag ha-Asif" ("the festival of ingathering"; Ex. xxiii. 16). The celebration was marked by the erection of booths, in which to dwell during seven days, and by the waving of palm-leaves with the fruit of the "'eẓ hadar" ("goodly tree"; Lev. xxiii. 40). See Tabernacles, Feast of.

——Post-Biblical Data: In post-Biblical times (in which "Yom Ṭob" as a technical term for "festival" comes into use) the character and appellations of many of the Biblical festivals were modified, and their number was increased by the addition of new semi-holidays and by the investing with sanctity of the days immediately following the holy days prescribed in the Law, except in the case of the Day of Atonement and the Sabbath. These "second days," known as "the second holidays of the Diaspora" (Yer. Ta'an. i. 62d; Beẓah 4b), owed their institution to the desire to have all Israel observe the festivals upon the same day (Sifra ix. 1). But before the fixation of the calendar by calculation, the beginning of the doubtful months (those having 29 or 30 days) and the intercalation of the year depended upon the decision of the Jerusalem authorities, which decision was based upon the appearance of the new moon and upon the state of the crops. In the case of the months in which festivals occurred (R. H. i. 3), the authorities announced their decision to the outlying districts by means of fire-signals and messengers. In order, therefore, to make sure of not ignoring the proper day, the communities in the Diaspora added a second holiday to the day presumptively correct according to their calculation.

Later, when such doubt was precluded by the method of determining the calendar by calculation, the custom was nevertheless sanctioned on the ground that the "minhag of the fathers" should be scrupulously regarded (Beẓah 4b). Even the first of Tishri was extended to two days (considered, however, as one long day), because during the existence of the Temple the second day of Tishri was observed as holy, the witnesses to the appearance of the new moon having arrived only in the afternoon of the first of Tishri. These "second days" are not observed in Reform congregations. See SECOND DAY OF FESTIVALS. The "semi-holidays" of later origin than the Torah are:

Additional Festivals.

Purim, generally on the fourteenth of Adar; but for the cities with walls dating from Joshua's days (Meg. i. 1-3; Sheḳ. i. 1), on the fifteenth. It is a day of rejoicing and merrymaking, in commemoration of the events related in the Book of Esther. See ESTHER; PURIM.

Ḥanukkah (Festival of Dedication), from the twenty-fifth of Kislew to the third of Ṭebet, in commemoration of the events recorded in I Macc. iv. 59. According to II Macc. i. 9, 18; ii. 16; x. 8, it is a belated Tabernacles; called the "Festival of Lights" by Josephus ("Ant." xii. 7, § 7; comp. Shab. 21b; B. Ḳ. vi. 6; Yer. Suk. 53d). See ḤANUKKAH.

Josephus mentions ("B. J." ii. 17, § 6) a festival in connection with the carrying of wood (comp. Neh. x. 35, xiii. 31), on the fifteenth of Ab (see Schürer, "Geschichte," 3d ed., ii. 260; Ta'an. iv. 5, 8; Meg. Ta'an. xi.; Derenbourg, "Essai," pp. 443, 445).

The Alexandrian Jews observed as joyful memorial days: (1) one to commemorate their escape from the elephants of Ptolemy VII. Physcon (III Macc. vi. 36); (2) one in honor of the translation of the Bible into Greek (Philo, "Vita Mosis," ii. § 7).

The following modifications of the significance and designation of the Biblical holidays in post-Biblical times may be noted:

(*a*) The first of Tishri becomes the "Rosh ha-Shanah," in Aramaic "Resh Shatta" (R. H. i. 1). It is the day of judgment (R. H. *l.c.*), and thus assumes a more solemn character, though fasting is interdicted (Ta'an. ii. 10; Yer. Ta'an. 66a). The blowing of the shofar is invested with theological and mystic significance ("Malkiyyot, Zikronot, we-Shoferot"; R. H. iv. 5, 6, 9; Yer. R. H. 58d). See SHOFAR.

(*b*) On Pesaḥ the SEDER, or meal introducing the festal week, takes the place of the paschal lamb (Pes. x.; Yer. Pes. 37d). The season itself has come to be designated in the prayers as זמן חרותנו ("the time of our liberation").

(*c*) Shabu'ot (also 'Aẓeret). The proper counting of the seven weeks was, between the Sadducees and Pharisees, a point of controversy hinging on the Biblical phrase "mi-moḥorat ha-Shabbat" (Lev. xxiii. 15), which, against the literal construction by the former, was authoritatively and demonstratively explained to mean the day after the first day of Pesaḥ (Sifra, ed. Weiss, p. 100d; Men. x. 3). The designation "'Aẓeret" marks it as the concluding festival of Pesaḥ. In the later liturgy it is celebrated as the "zeman mattan toratenu" (comp. Shab. 86b), the memorial-tide of the revelation on Sinai.

(*d*) The second or "minor" Pesaḥ ("Pisaḥ Ze'era"; see Num. ix. 1 *et seq.*) fell into desuetude after the passing of the Temple service with its requirements of purity and sacrifices.

(*e*) Sukkot becomes the "ḥag" par excellence. In the liturgy it is denoted as "zeman simḥatenu" (the time of our joy). The eve of the second day, in the Second Temple, was proverbial for the rejoicing attendant upon the ceremonial drawing of water ("simḥat bet ha-sho'ebah"; Suk. v. 1), on which occasion priests and Levites in stately torchlight procession, with singing, the blowing of trumpets, and the playing of other instruments, made the circuit of the Temple court to the eastern gate, reciting and repeating there the declaration that while the Fathers bowed eastward to the rising sun, they belonged to YHWH and their eyes were lifted toward Him (Suk. v. 1-4). During that night Jerusalem was brilliantly illuminated.

Extension of Sukkot.

The seventh day of the festival is distinguished as the "great Hosha'na" (the Gospel accounts of Jesus' entry on Palm Sunday seem to have confused this with Pesaḥ), or "the day of the palm- and willow-branches" (Suk. 42-45). Carrying in their hands branches at least eleven feet long, the celebrants make seven circuits around the desk, chanting "Hosha'na" (Ps. cxviii. 25), and then beat the floor with the branches. This custom, said to be of Mosaic origin, is undoubtedly an adaptation of a Babylonian rite (Yer. 'Ab. Zarah iv.).

The eighth day, Shemini 'Aẓeret, is treated as an independent holiday in regard to certain rabbinical prescriptions (mourning, for example). It is a "yom-ṭob bi-f'ne 'aẓmo." See SHEMINI 'AẒERET.

The ninth day is styled "Simḥat Torah" (joy of the Torah), because it marks the conclusion of the (annual) cycle of Pentateuchal lessons and the beginning of a new cycle. See LAW, READING OF THE; SIMḤAT TORAH.

(*f*) The New Moon, in Biblical times a holiday (I Sam. xx. 18, 24-27; II Kings iv. 23), came to be regarded as a day of penitence, owing to the circumstance that among the sacrifices prescribed is also a sin-offering (Num. xxviii. 11-16). This sin-offering was said to have been instituted on account of the moon's jealousy of the sun (Sheb. 9; Gen. R. vi.; Ḥul. 60b; Zohar, Wayiḳra); or, according to others, it is an atonement for the sins committed during the preceding month (Sheb. i.); thus the day is called in the liturgy "zeman kapparah" (the time of atonement). Yet, withal, it remained a day of joy, on which fasting was not permitted; women abstained from petty manual occupations (Soferim xix.). But by the cabalists in recent centuries it was changed into the "Minor Day of Atonement" ("Yom Kippur Ḳaton").

The days intervening between the "holy [convocation] days" (the first or second and seventh or eighth respectively) of Pesaḥ and Sukkot are known as "ḥol ha-mo'ed" ("the week-days of the festival"), entailing certain restrictions regarding work, mourning, the solemnization of marriages, and the like. See Ḥol ha-Mo'ed.

The Biblical festivals readily fall into two groups:

Classification of Festivals.

(1) Those dependent upon the seasons or the harvest (Pesaḥ and Shabu'ot in spring and summer, and Sukkot in autumn). As the Law prescribes that at those festivals "every male shall appear before [correctly, "shall see"] Yhwh" (Deut. xvi. 16), thus demanding pilgrimages to the Temple, these comprise the "pilgrim festivals," the three "regalim" (Ex. xxiii. 14), on which the "re'iyyah," *i.e.*, the visit to the Temple court, took place. The Mishnaic term for this visit is "re'iyyat panim" (Yer. Peah i. 15a), or "re'ayon" (Peah i. 1), or, as none was to come empty-handed, but must bring a gift, "re'iyyat ḳorban." This obligation rested on all male Israelites, with the exception of such as were under age or afflicted with deafness or a mental defect. The gift had to be worth at least two silver denarim according to Shammai's school; while the Hillelites contended that a silver "ma'ah" was sufficient (Ḥag. i. 1, 2a; comp. *ib.* 6a). The number of visits was not fixed (Peah i. 1; but see Beẓah 7a, and R. Johanan in Tosafot *ad loc.*; Levy, "Chald. Wörterb." iii. 406a). The character of these three festivals is agricultural; hence the fundamental note is joy and gratitude (Deut. xvi. 11, 14, 15).

(2) Those connected with the moon: (*a*) Sabbath; (*b*) New Moon; (*c*) the New Moon of the seventh month, and (*d*), in connection with the seventh month, the tenth day thereof. The Sabbath and the New Moon festivals were certainly days of joy; but the first and the tenth of Tishri developed into days for solemn reflection, and in course of time in the synagogue were designated as "yamim nora'im" (fearful [awful] days), though the endeavor to ascribe to them also the nature of days of joy was not wanting (see Maḥzor Vitry, ed. Hurwitz, p. 360). The ten days intervening are styled "'aseret yeme teshubah" (ten days of repentance), distinguished by additions in certain parts of the liturgy.

The Influence of Seven.

It has been noticed that the Biblical festivals, all of which occur within the first seven months of the year, are seven in number, and that they are otherwise intended to bring out the symbolic bearing of this the sacred number. The Sabbath is the seventh day; the Sabbatical ("Shemiṭṭah") year is the seventh year; the jubilee the first after 7×7 years; 7×7 (= 49) days elapse between Pesaḥ and Shabu'ot; Pesaḥ and Sukkot each have seven days; the seventh month has four holidays; the first of the seventh month alone of all the New Moon festivals being important. Of the seven festivals six are in a class requiring abstention from only hard labor; on the seventh (the Day of Atonement), as on the Sabbath, all labor is forbidden. Hence both the Sabbath and the Day of Atonement are "Shabbat Shabbaton" (Lev. xxiii. 24, 32, 39; xvi. 31).

——**Critical View:** When the Hebrews were still nomadic shepherds they could not have observed festivals having an agricultural background. Nor before the establishment and recognition of one central sanctuary, and the development of the sacerdotal and sacrificial ritual, could fixed and well-defined sacrifices have been the prominent feature of the festal celebration. The laws in the Pentateuch that bear on the festivals are, therefore, posterior to the invasion and conquest of Palestine; and the analysis of their contents and the comparison of their provisions, with allusions to and descriptions of the festivals in other Biblical books, demonstrate that the festal cycle as finally regulated is the outcome of a long process of growth in which the successive domination of various social and religious influences may be clearly differentiated. Of the pastoral period, the Sabbath, the New Moon, and Pesaḥ as the festival of the slaughtering of the young firstling of the flock, are survivals, displaying even in their adaptation to later social and theological circumstances the traces of an anterior pastoral connection.

Pastoral Feasts.

The moon was the beneficent deity of the shepherds in the region and climate where ancient Israel had its ancestral home. Hence the many traces of lunar institutions in even the latest Israelitish cult and its phraseology; *e.g.*, the "horn" (crescent), the "face" (of Yhwh) in the benedictions, etc. The Sabbath, as marking the end of the week, reveals its lunar origin; the phases of the moon having taught the shepherds, whose weal or wo depended so largely upon the benevolence or malevolence of the night season, to divide the period elapsing between two new moons into four equal groups (weeks), the last day of each—in imitation of the moon's coming to rest, as it were—becoming the day of rest. Indications are not wanting that at first the New Moon festival was not counted among the seven days of the week (see Week); but after 7×4 (=28) days had elapsed, one or two days were intercalated as New Moon days, whereupon a new cycle of four weeks began, so that the Sabbath was a movable festival. Later the week and the Sabbath became fixed; and this gradually resulted in taking away from the New Moon festival its popular importance.

The Pesaḥ lamb marks the spring festival of the shepherd clans offering a gift to the deity, and trysting their god at the common "family" feast, before setting out for their several pasture-grounds. In the appointments of the occasion, as described in the chapter purporting to account for the institution (Ex. xii.), the pastoral character is still dominant. The "sprinkling of the blood" on the door-post recalls the "blood covenant" which insures safety to both man and beast, and protects the flock from harm. The Meccan hadj is, indeed, the old Semitic

Pesaḥ—the limping dance in imitation of "skipping rams." With the later agricultural spring festival these pastoral customs were combined, but the Pesaḥ must originally have been distinct from the festival of the Maẓẓot, which is clearly of an agricultural nature.

Agricultural Festivals.

The harvest is the natural provocation for the farmer to rejoice and to manifest his gratitude to the Godhead. The oldest traditions (Judges xxi. 19; I Sam. i. 3) mention a yearly festival of thanksgiving ("hillulim": Judges ix. 27) after the vintage; and it is this festival which even later is called *the* festival (I Kings viii. 2, 65; xii. 32, 33; comp. Ezek. xlv. 25; Neh. viii. 14). It was celebrated first by dancing in the vineyards (Judges xxi. 21); later, by processions to festal halls ("leshakot"; I Sam. ix. 22), with music (Isa. xxx. 29)—at Shiloh, for example (I Sam. i. 3), at Beth-el (I Kings xii. 32), and at Jerusalem (I Kings vi. 38, viii. 2; Isa. xxix. 1). As these festivals increased, the necessity arose of regulating them and of fixing them for certain seasons of the year; hence, in Isa. xxix. 1 allusion is made to a regular cycle of the "ḥaggim" circuiting the year.

Traces of Development.

The oldest code (Book of the Covenant), in Ex. xxiii. 14 *et seq.*, provides that three pilgrimages in one year shall be made to the sanctuaries, not necessarily to Jerusalem, as has been supposed, but to the central shrine of the clan or tribe (comp. I Sam. xx. 6). The three festivals are purely agrarian; viz.: the Ḥag ha-Maẓẓot (seven days), in the month of Abib (Ex. xxxiv. 18, where there is no mention of the slaughter of the lamb); the Ḥag ha-Ḳaẓir, the wheat-harvest (Ex. xxxiv. 22a), for offering the first-fruit ("bikkurim"); the Ḥag ha-Asif, the old festival of the vintage (see above). Deuteronomy retains this cycle, but makes pilgrimage to Jerusalem imperative (Deut. xvi. 16). It combines the old pastoral Pesaḥ with the Maẓẓot feast, but the offering of the firstlings (Deut. xvi. 2) is merely intended as a sacrificial meal, the flesh being boiled and not roasted (Deut. xvi. 7, against Ex. xii. 8). Maẓẓot is historically connected with the exodus from Egypt ("leḥem 'oni"; Deut. xvi. 3). The second festival appears as "Ḥag ha-Shabu'ot" (Deut. xvi. 10). The third is named "Ḥag ha-Sukkot" (*ib.* xvi. 13), and lasts seven days (*ib.* 15).

In Deuteronomy the tendency is manifest to give these natural agrarian tides a religio-historical setting. A further development is shown in the festival scheme of Ezekiel, who divides the year into two parts, each beginning with an expiatory celebration, on the first day of the first and seventh months respectively (Ezek. xlv. 18, 20; Cornill, "Das Buch des Propheten Ezechiel," p. 494), and each celebration followed after the lapse of fourteen days by a festival of seven days (the spring or Pesaḥ festival, and the autumn festival respectively); while stress is mainly laid on the sacrificial cult. It may be observed that Ezekiel neglects Shabu'ot.

Lev. xxiii. (P^1) marks another modification. The *three* festivals are designated as the "Mo'ade Yhwh" (verse 2); and holy convocations are therefore the distinguishing feature. Pesaḥ is "la-Adonai," on the fourteenth day, with exact regulation of the time for slaughtering, followed by seven days of the Maẓẓot, together with the offering of the first of the barley (verses 9–11) and other sacrifices (verse 12b). The next festival is fixed for the fiftieth day (verse 16) following, its distinguishing feature being the offering of the two loaves of bread baked of wheat (verse 17), in addition to other offerings (verses 18–20); but no name is given to this holiday. The third festival is Ḥag ha-Sukkot (verse 34), lasting seven days, with the addition of an eighth day ("'aẓeret"; verse 36). Here the connection of this festival with the history of Israel's desert-wanderings is first mentioned (verses 42–43; comp. Hosea xii. 10).

P^2 loses sight entirely of the natural bases of the holidays. The historical and ritual aspect is exclusively emphasized. In Num. xxviii. no mention is made of the barley-offering characteristic elsewhere of Pesaḥ. Pesaḥ is the memorial of the Exodus (Ex. xii. 14), a ritual occasion ("'abodah," verse 26; "lel shimmurim," verse 42). All details concerning the lamb are scrupulously regulated, and offerings are prescribed (Num. xxviii. 16–25). Shabu'ot becomes the "Yom ha-Bikkurim" (Num. xxviii. 26–31), without historical connection, but of ritual significance. For Sukkot a very elaborate sacrificial order is given (Num. xxix. 12–38).

Summary.

From the foregoing it appears that the festivals, in part originally pastoral and agricultural, gradually assumed a historical and ritual character: Pesaḥ and Maẓẓot, at first distinct, becoming merged; Shabu'ot, originally the close of the spring harvest, assuming historical significance only in Talmudic times (Pes. 68b); but, in the light of the Priestly Code, all three festivals of the agricultural season being invested with mainly sacrificial importance.

The pastoral moon festivals (Sabbath and New Moon) underwent similar changes. Of the New Moon festivals not mentioned in Deuteronomy, or in JE, that of the seventh month alone survived as an important holiday (see Lev. xxiii. 24 [P^1] and Num. x. 10 [P^2]).

Various reasons for this exceptional fate of this New Moon festival are given. The fortuitous fact that it was the new moon of the seventh month may have lent to it a higher degree of sanctity from the very beginning. Again, reckoning the beginning of the ecclesiastical year from autumn, and not, as the civil year, from spring (see Calendar; New-Year), may account for the survival. The building of the wall under Nehemiah (Neh. iv.), and its dedication, have also been brought (by Geiger) into connection with the first day of the seventh month as a day of memorial of the blowing of the shofar (Neh. xii.; comp. *ib.* viii. and ix.). Whatever may have been the reason, the solemn celebration of this day is post-exilic, probably even later than Ezra iii. 6 and Neh. viii. 2.

The tenth day of the seventh month (see Atonement, Day of) is not known to Ezekiel. It is instituted in Lev. xxiii. 27. It was originally a priestly day for the cleansing of the sanctuary (Samuel Adler, in Stade's "Zeitschrift," iii. 178–185). With it in course of time was combined an old popular festival (see Dancing): the late ritual is not free from pagan (Edomite) survivals (see Azazel). The order of procedure, as given in Lev. xvi., is a very late addition to the Pentateuch. It is characteristic of the very late introduction of this day as the Day of Atonement that in Ezra's time (Neh. ix. 1) the twenty-fourth and not the tenth of the seventh month was kept as a day of atonement.

In P the Sabbath is emphasized as a day of solemn import (Ex. xvi. 27, xxxi. 12 *et seq.*); the New Moon is held to be one of the cycle of feasts (Num. xxviii. 11 *et seq.*); and in further extension of the ideas underlying the Sabbath, the Sabbatical year and the year of jubilee are instituted.

E. G. H.

FESTUS, PORCIUS: Procurator of Judea about 60–62 c.e., after Felix (Josephus, "Ant." xx. 8, § 9; "B. J." ii. 14, § 1). Although he was more just than his predecessor, he could not allay the intense bitterness of feeling among the Jews, caused chiefly by their being slighted in the affair of Cæsarea. Felix left him also the suit with Paul (Acts xxiv.–xxvi.), whom he sent to Rome (*ib.* xxvii.), Paul having appealed to the emperor as a Roman citizen. Festus proceeded with rigor against the Sicarii, pursuing them with infantry and cavalry. He also took severe measures against a certain "magician," as Josephus calls him, but who was probably one of the numerous prophets who enticed the people into the desert, promising them salvation (compare "Ant." *l.c.*; "B. J." *l.c.*). When King Agrippa II., in order to be able to oversee the court of the Temple, erected a high wall in the former Hasmonean castle, the Jews in turn erected a higher wall to cut off his view. Festus, however, for military reasons would not allow this latter wall to stand; but he was just enough to permit the Jews to send an embassy to appeal against his decision to Nero, who decided in their favor ("Ant." xx. 8, § 11). Festus died after a short term of office, and was succeeded by Albinus.

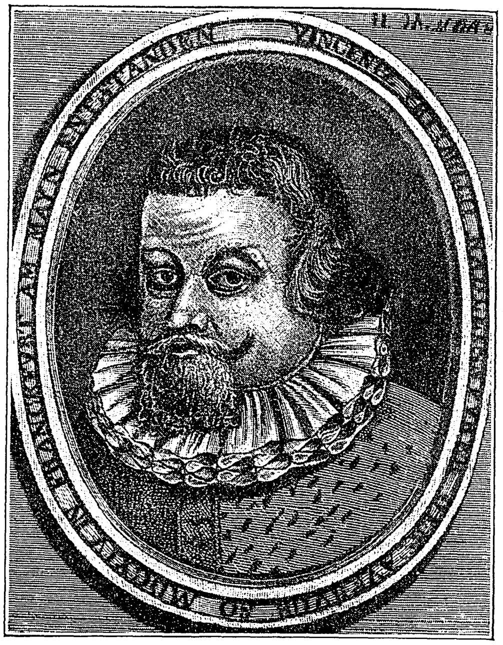
G. S. Kr.

FETTERS: Chains or shackles by which the feet may be fastened either together or to some heavy object. The most usual term for fetters in the Bible is "neḥushtayim" (Judges xvi. 21; II Sam. iii. 34; II Kings xxv. 7; Jer. xxxix. 7, lii. 11; II Chron. xxxiii. 11, xxxvi. 6), indicating that they were made of brass; the dual form shows that they were made in pairs. There were also iron fetters, called in Hebrew "kebel"; in Ps. cv. 18 this noun is used in the singular, and in Ps. cxlix in the plural construct state, which proves that the feet were fastened by means of the fetters to some other object. An additional Hebrew term for fetters is "ziḳḳim" (Job xxxvi. 8; Ps. cxlix. 8; Isa. xlv. 14; Nahum iii. 10), derived from a root meaning "to bind," and which may be applied even to ropes. See Chains.

E. C. M. Sel.

FETTMILCH, VINCENT: Leader of the gilds of Frankfort-on-the-Main against the Jews in 1612, and instigator of the riots which led to the expulsion of the latter from that city in 1614; he was hanged in 1616. Fettmilch came of a family of Calvinists, and sought to revenge himself on the authorities, who were Lutherans, by attacking the Jews. In 1595, being refused the office of hospital clerk which he had solicited, he became first a soldier and then a "Lebkuchen"-baker. His boldness and energy won for him the confidence of the rabble, and for four years he was thus able to terrorize the magistrates of Frankfort and the imperial commissioners. He called himself "the new Haman" of the Jews, as though he foresaw his end. His petitions for the expulsion of the Jews from Frankfort being unsuccessful, he with a large mob invaded the Jews' quarter on Aug. 22, 1614. Having removed the children and the aged to the cemetery, situated at the farther end of the street, the Jews, who numbered about 2,000, took up arms and fought bravely. Several persons were wounded, and two Jews and one Christian were killed. The Jews were overpowered, and they left the scene to protect their families. Fettmilch and his men plundered the dwellings of the Jews and burnt what they could not carry away. The amount of damage caused by this riot was reckoned at 176,919 florins.



Vincent Fettmilch.
(From Schudt, "Jüdische Merckwürdigkeiten," 1714-17.)

The Riot.

The Jews who had sought shelter in the cemetery were warned by Fettmilch to leave the town. The Fishers' Gate was opened for them, and they embarked in small boats, some of them going up and some down the River Main. Many who had been sheltered by compassionate Christians were obliged to leave three days afterward, their protectors having been threatened by Fettmilch. The total number of Jews who left Frankfort was 1,380.

Finally, the patience of the emperor was exhausted, and he issued an order for the arrest of Fettmilch and his fellow agitators. Fettmilch, owing to his popularity with the rabble, eluded the imperial commissioners for a long time, but he was ultimately arrested and convicted. On March 10, 1616, he was hanged and quartered, his house was razed to the ground, and his family banished.

The Jewish community of Frankfort appointed the twentieth of Adar to be a festival named "Purim Winẓ," in memory of their deliverance, the previous day being kept as a fast. The services of this Purim consist of the singing of "Adon 'Olam" to a special tune. R. Elhanan b. Abraham Helen composed a long poem, in Judæo-German and in Hebrew, entitled "Megillat Winẓ," and in German with the title "Das Vinz-Hans Lied," which contains the history of the persecution and the deliverance. It used to be sung on Purim Winẓ to the tune of "Die Schlacht von Pavia."

(From H. M. Gottfried, "Chronica," 1642.)

FEUER, NATHANIEL: Hungarian oculist; born in Szobotiszt, Hungary, Aug. 18, 1844. He studied at the University of Vienna (M.D., 1872). Assistant at the eye clinic of the Klausenburg University in 1873, he became privat-docent at the same institution in 1874. In 1875 he went as privat-docent to Vienna, where he stayed till 1882; in that year he was sent by the government as specialist to Theresienstadt, where a severe epidemic of trachoma was raging. In 1886 he was appointed sanitary inspector at Budapest; in 1891 privat-docent at the university there; and in 1895 assistant professor.

Feuer has written several important essays in the ophthalmic journals, among which may be mentioned "Das Trachom in der Oesterreichisch-Ungarischen Armee," in "Klinische Zeit- und Streitfragen," 1890, and "Meine Gegenwärtige Trachom Behandlung," in "Centralblatt für Praktische Augenheilkunde," 1899. He is also the author of "Die Trachom-Endemie im Torontaler Comitat," in "Szemészet," 1884, and "Die Verbreitung des Trachom in Ungarn," Stuttgart, 1897.

FEUST, KARL: German jurist; son of the chief rabbi of Bamberg; born at Bamberg Oct. 9, 1798; died at Fürth Aug. 19, 1872. Having been destined for a rabbinical career, he received a Talmudic education. At the age of fifteen he entered the Bamberg gymnasium. In 1818 he went to the University of Würzburg, where he studied first philology, and later law, and whence he graduated as doctor of law in 1822. Unwilling to change his religion in order to gain admittance to the bar, he became editor of the "Aachener Zeitung." A few years later he was appointed to a minor office at the judicial court in Bamberg. In 1831 he removed to Fürth, and became the secretary of the Jewish community. In 1848 he was finally admitted to the bar, and became a counselor at Fürth. Feust devoted himself to writing on jurisprudence, the most important of his works being a translation of the eighteenth, thirty-ninth, and forty-ninth books of the "Pandects," (ed. Karl Sintenis, 1834). In 1868, on his seventieth birthday, the King of Bavaria created him a knight of the Order of Michael.

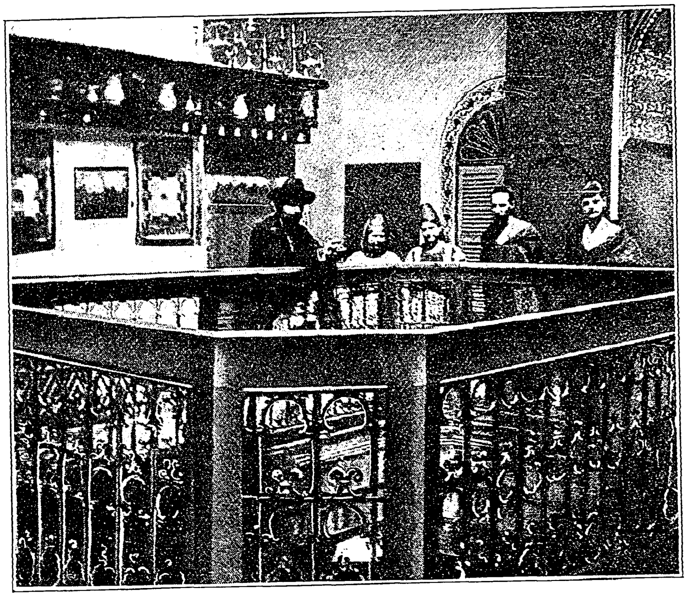
FEZ (פּיין, פּיס, פּאס; Arabic, **Fas**): Capital of the province of Fez in the sultanate of Morocco; built in the year 808 by Imam Idris II., who founded in Morocco the first Shiite state. A small wadi, known under various names, divides the city into two parts, Old Fez, containing the palace and the "Mellah" or Jewish quarter, and New Fez, which contains the bulk of the modern city. Idris, finding that his nomadic subjects were thoroughly averse to a town life, colonized his new capital with 8,000 Andalusians and a number of Jews; the latter must have been numerous even at this early date, since he sought their aid in his rebellion against the ruling king, Muhadi. The Jews received from Idris a special quarter, the Mellah, and thenceforth paid a special tax of 30,000 denarii annually in lieu of military service. A similar tax exists in Morocco to the present day. The Mellah has high walls and a single gate; it is very dirty and unsanitary. First mention of the Jews of Fez is found in Judah ibn Koreish's letter on Targum study, which was addressed to them about 900. As several teshubot show, they communicated with the Geonim. The civil and political liberties of the Jews were restricted by the Pact of Omar, and after the capture of Fez by Yusuf ibn Tashfin in 1070 these restrictions were rigidly enforced over all North Africa. In 1145 Fez fell into the hands of 'Abd al-Mu'min, the follower of the fanatical Mohammed ibn Tumart, and an era of persecution began. On the capture of Morocco in the following year the Jews were given the alternative of conversion or banishment. Many fled to Italy, Spain, and Palestine, R. Jehuda b. Abun b. Abbas among them; the majority adopted the semblance of Islamism.

Group of Jews at Fez.

(From a photograph by Count S. Adelman.)

It was during this time that the martyrdom is recorded of Judah ha-Kohen ibn Susan. From 1152 to 1165 Maimonides' father, with his family, sought refuge in Fez from the persecutions at Cordova, attracted thither by the scholarship of Judah ha-Kohen. In 1275 the mob attacked the Mellah, and forty Jews were slain, after which Moors were forbidden to enter the Jewish quarter. The emir laid out New Fez, where the Jews were permitted to dwell, and where they still reside. With the inauguration of the Spanish persecutions of 1391 the influx of Jews increased until, according to Bakuwi, a geographer of the fifteenth century, they formed a majority of the population. Under the merciful government of Maula Shaikh fugitives from Spain found a resting-place here. Some years later a great persecution took place, accompanied by pillage and massacre, the king and his favorite Aaron falling victims to the fury of the mob. But the next king allowed the pseudo-Mohammedans to return to their faith under certain conditions, which are still in force: they were forbidden to wear leather shoes, to ride on horseback through the city, or to carry arms. In addition to these restrictions the earlier decree of Manṣur ordering that Jews should wear black mantles and Jewesses yellow mantles and veils, was enforced.

At the time of the expulsion from Spain (1492) many Jews fled to Fez, but were expelled by the natives, who feared an increase in the price of provisions. Some of the refugees died of starvation; the rest were enslaved by the population, but were later freed by a decree of the governor. Abu Sa'id III. set apart for them a large district in the new city. The Arabic language, which had hitherto been spoken by the Jews, was now replaced by Spanish. At the beginning of the sixteenth century the Jewish population, according to Bernaldes, amounted to 10,000, according to Leo Africanus to 5,000, according to Mendoça to 1,000. In the first quarter of the century the Jews had an influential statesman, Shumel al-Barensi, minister of the emir Sa'id al-Watas, by whom several Jews were admitted to the royal court. In the struggle between the Merinids and the Sherifs a Spanish Jew, Samuel Alvalensi, was a political partizan of the former. The Jews of Fez also took part in the movement connected with the person of David Reubeni, who appears to have been cheated in a transaction entered into by correspondence from Cairo with R. Cohen, a writer of Fez, in 1523. In 1532 the Franciscan Andre of Spoleto had a public disputation with the Jews, but being unable to make any conversions, he committed suicide.



Interior of a Jewish Residence at Fez.

(From a photograph by Count S. Adelman.)

Because of the severe persecutions under Mulai Mohammed many Jewish captives were brought to Fez and there ransomed by the community. After the defeat of the Portuguese at Al-Ḳaṣr in 1578, many Portuguese noblemen were sold as slaves to the Jews in Fez, who ransomed and treated with kindness their former oppressors. In 1670 Fez was the asylum of the Jews of Sus, expelled by Mulai Arshid. In the reign of his successor, Ismail, the Jews suffered greatly because of high taxes. When in 1790 Mulai Sidi Mohammed was slain through the sedition of his son Mulai Yazid, the latter persecuted the Jews because they had not helped him against his father. Houses and synagogues were pillaged and the bones of the dead disinterred. The condition of the Jewish community did not improve in the nineteenth century. In 1834 a Jewish girl, a daughter of Sol Hachuel, was a martyr to her faith, preferring death to becoming the bride of the sultan. Her tomb became a place of pilgrimage.

Out of a total estimated at from 100,000 to 150,000 the Jewish population of Fez a few years ago was 9,000 according to Balbi, 2,500 according to Mordtmann, 8,000 according to Richardson, 10,000 according to Horowitz, and 30,000 according to Meakin, while the Alliance Israélite Universelle placed the number at 12,000. Over 2,000 died recently in a typhus epidemic, and their number is now estimated at 8,000, most of whom live in New Fez. There are nineteen synagogues, many of which possess very old scrolls of the Law. They are mostly named after their founders, as Keneset Jonathan Severo, or Keneset Rabbi Judah Aṭṭar. Fez possesses a Talmud Torah attended by about 500 pupils, and two schools founded by the Alliance in 1883 and 1899, attended respectively by 103 boys and 80 girls. A synod of six rabbis whose salaries are paid from the meat-tax takes charge of the spiritual interests of the Jews. There are no Jewish government officials. The Jews of Fez are by preference shoemakers and grocers. The richer are money-lenders. The men wear cork-screw curls behind their ears, shave the head, and leave a pig-tail pendent from the top. The women, who are partly secluded, wear after marriage a black wig covered with a kerchief. Women in mourning wear a red head-kerchief, leave the feet bare, and wear around the mouth part of the winding-sheet of the dead. Early marriages are the rule.

Fez has produced several writers. Prominent among them are the grammarians Dunash ibn Labrat, and Judah b. David Ḥayyuj; Alfasi, and the Karaite Moses Alfasi and members of the Azulai family, authors of various bibliographies of Jewish literature. Ḥayyim Azulai emigrated from Castile to Fez in 1492. Toward 1630 Vidal Ẓarfati, author of "Ẓuf Debash," was chief rabbi of Fez, as was (c. 1755) Jacob ben Ẓur, author of "Mishpaṭ Ẓedakah." Fifteen years later the chief rabbi was Elijah Ẓarfati. A former rabbi of Fez, Jacob ben Na'im, became chief rabbi of Leghorn, where he died in 1800.

FEZ, DAVID OF. See Fez.

FIAMETTA, JOSEPH BEN SOLOMON: Rabbi of Ancona, Italy; died in 1721. His name is written variously: Wolf, in the Latin transcription of his name, gives "Flammeta"; Carmoly ("Hist. des Médecins Juifs," p. 237) has "Piamita"; and Delitzsch ("Zur Geschichte der Jüdischen Poesie," p. 74) gives "Piatita." He was the father-in-law (Steinschneider says son-in-law) of Samson Morpurgo, rabbi of Ancona. He wrote: "Widdui," atonement prayers of the Italian rite, included in the "Tikkun Shobabim" of Moses Zacuto, Venice, 1712; "Or Boḳer," containing prayers and seliḥot, Venice, 1709. He wrote also an approbation to Nehemiah Ḥayyun's "'Oz le-Elohim," Berlin, 1713, and a panegyric poem on Abraham Cohen's "Kehunnat Abraham," Venice, 1719. Among the Italian responsa there is one regarding communal taxation signed by Shabbethai Panzieri and Joseph Fiametta.

S. S. M. SEL.

FICHEL, BENJAMIN-EUGÈNE: French painter; born in Paris Aug. 30, 1826; died there Feb. 7, 1895. After essaying historical painting he turned his attention to producing small genre pictures in the style of Meissonier, though he was a pupil of Paul Delaroche. These he executed with great skill in technique, historic correctness of costume being a characteristic feature of his compositions. He received the Cross of the Legion of Honor in 1870. Some of his genre paintings were exhibited in Munich in 1879. "L'Arrivée à l'Auberge," one of his best works, has been since 1863 in the possession of the Luxembourg museum at Paris; "La Joueuse de Luth" is in the Stettin museum. Other works: "Le Numismate"; "Le Joueur du Violon"; "Une Fête Foraine en 1776"; "La Capture d'un Espion"; "Le Savetier et le Banquier"; "La Belle Marchande"; "Une Partie d'Echecs"; "Chanteurs Ambulants"; "Le Rapport au Général"; "La Dernière Acquisition du Maître." Among his historical genre paintings may be named: "Le Duc de Choiseul chez l'Abbé Barthélemy"; "La Nuit du 24 Août 1572"; "Fondation de l'Académie Française"; "Bonaparte et Eugène Beauharnais"; "Daubenton dans Son Laboratoire"; "Lacépède Ecrivant l'Histoire des Poissons."

Fichel's wife, *née* Jeanne Samson, a pupil of her husband, has exhibited at the Salon since 1878.

FIDANQUE, JACOB BEN ABRAHAM: English scholar; died at London in 1701. He was one of the first Jews after the Return to busy himself with the study of rabbinic literature. He is the author of notes on the commentary to the Earlier Prophets by Isaac Abravanel, published with the text, Hamburg, 1686. Fidanque revised and published a second edition of the "Miklal Yofi" by Solomon ben Melek, Amsterdam, 1685.

FIELDS. See AGRARIAN LAWS; LANDLORD AND TENANT.

FIG AND FIG-TREE: The fig-tree (*Ficus Carica*) and its fruit are designated in Hebrew by the same word, "te'enah" (Deut. viii. 8; Judges ix. 10; Num. xiii. 23; II Kings xx. 7); the plural, "te'enim," indicating the fruit as distinct from the tree. According to Lagarde ("Mittheilungen," i. 58 *et seq.*), the fact that the name is not found originally in any other Semitic language indicates that the fig is indigenous to the territory occupied by the Hebrew-Aramaic Semites (see also Guidi, "Della Sede Primitiva dei Popoli Semitici," p. 35). "Te'enah" is the common term for "fig"; in a special sense, however, it denotes the figs which ripen in August and form the largest crop. The early figs, appearing in March or April and ripening in June, are called "bikkurah." In the Revised Version this word, in accordance with its etymology, is uniformly rendered by "first ripe fig" (Isa. xxviii. 4; Micah vii. 1; Hosea ix. 10). The early fig was considered a great delicacy by the Hebrews. The late or green figs, which sometimes ripen after the fall of the leaf, and occasionally remain on the tree during the winter months, are called "pag," whence the Greek *βηθφαγή* ("the house of green figs"). They are alluded to in Cant. ii. 13, where the Vulgate rightly translates "paggeha" by "grossos suos," *i.e.*, "its green figs." The term "ḳayiẓ," primarily meaning "the harvest of fruits" and "summer fruits" (Jer. xlviii. 32; Isa. xvi. 9), is sometimes used for the fig itself, probably for the late fig (II Sam. xvi. 1; Amos viii. 12).

The fig was one of the principal fruits of Palestine, even before the entrance of the Hebrews into the Promised Land (Num. xiii. 23). Figs were sometimes dried and pressed into cakes, called "debelah" on account of their round shape. These were used as food (I Sam. xxx. 12) and as a remedy for boils (II Kings xx. 7; Isa. xxxviii. 21). "Fig leaves" are mentioned as the material of the "aprons" of Adam and Eve (Gen. iii. 7), these leaves being larger than those of any other Palestinian tree.

The fig-tree was associated with the vine as an emblem of peace and prosperity (Micah iv. 4; Isa. xxxvi. 16). On the other hand, the failure of the fig-crop and the destruction of the fig-tree were regarded as a misfortune and as a punishment from God (Ps. cv. 33). In Jotham's parable (Judges ix.) the fig is distinguished for its sweetness and good fruit.

FIGAH (פיגה): River in the Damascene, affluent of the Barada (the Biblical "Abana"). "Figah" comes from the Greek *πηγὴ*, and is still to be found in the name "'Ain Fijah," the chief source of the Barada. Reland has identified it with Pliny's "Pagida" ("Palæstina," i. 290), and Schwarz, wrongly, with the Biblical Pharpar ("Das Heilige Land," p. 31). The Figah is spoken of in the Mishnah (Parah viii. 10) as a troubled stream, the water of which was unfit for sacrificial uses. Nevertheless, it is supposed to be one of the four rivers which surround Palestine (B. B. 74b).

FIGO (PIGO), AZARIAH BEN EPHRAIM: Preacher at Venice; died at Rovigo 1647. Figo was an excellent scribe, and the scrolls which he wrote are highly prized. He was the author of "Iggerot u-Teshubot," letters and responsa, published in a similar work entitled "Be'er Sheba'," Venice, 1614; "Giddule Terumah," a casuistic commentary on Samuel ha-Sardi's "Sefer ha-Terumot," *ib.* 1643; "Binah la-'Ittim," seventy-five sermons for Saturdays and holidays (*ib.* 1647-48), a work which went through many editions and is still very popular with Eastern Jews.

FILEHNE. See Posen.

FILIPOWSKI (PHILLIP), HIRSCH: Mathematician, linguist, and editor; born at Wirballen, Russia, 1816; died in London, England, July 22, 1872. At an early age he showed great aptitude for the study of mathematics and languages, and was fortunate in finding a Polish schoolmaster who secretly aided him in acquiring the rudiments of a modern education. In 1839 he emigrated to London. Here he was at first employed as teacher in a Jewish school, at the same time preparing himself for his future career as a mathematician and author. His first work was "Mo'ed Mo'adim," on the Jewish, Karaite, Christian, and Mohammedan calendars, with tables from the Creation to the year six thousand (London, 1846; republished 1863). In 1847 he edited a Hebrew annual, "Ha-Asif," containing various essays on Hebrew literature and mathematics (London and Leipsic, 1849). He edited for the Jewish Antiquarian Society the "Mibhar ha-Peninim" of Ibn Gabirol; appended to it is "Megillat Anteyukas," Aramaic text, with Hebrew and English translations by the editor (London, 1851). He edited also: "Sefer ha 'Ibbur," by Abraham ben Ḥiyya (London, 1851); "Sefer Maẓref la-Kesef," by Azariah dei Rossi (Edinburgh, 1854); "Maḥberet," by Menahem ben Saruḳ (London, 1854); "Teshubot Dunash ben Labraṭ," with critical notes by Dukes and Kirchheim (London, 1855); "Sefer Yuḥasin ha-Shalem," by Abraham Zacuto, with notes by Jacob Emden (London, 1857). Appended to the last-mentioned work are: (1) Josephus, "Contra Apionem"; (2) "Binyan Herodes," a description of Herod's Temple; (3) "Iggeret Rab Sherira Gaon"; (4) "Iggeret Abraham Farissol," on the Ten Tribes; (5) "Iggeret Yehoshua' ben Nun."

Filipowski was also employed as an actuary at Edinburgh. In this capacity he published a work on "Anti-Logarithms" (1849), which established his name among mathematicians. In 1857 he translated Napier's "Canon of Logarithms" from the Latin into English, and in 1864-66 he edited Baily's "Doctrine of Life Annuities and Assurance."

In 1862 he designed a font of Hebrew type with the vowel-points attached to the letters, from which a pocket edition of a Hebrew prayer-book was printed, containing also an English translation by him. In 1867 he founded the "Hebrew National," a journal which lived but six months. His last work was a pamphlet entitled "Biblical Prophecies" (London, 1870), on the Jewish position in regard to the Biblical prophecies and the Messiah. In appreciation of his services to antiquarian research he was elected a fellow of the Antiquarian Society, and for his actuarial work a fellow of the Society of Actuaries.

H. R. M. B.

FINANCE: The supplying of capital for large undertakings, a characteristic of modern forms of commerce. As distinguished from the more passive side of banking, the reception of deposits, it may be described as the active aspect of a banker's operations. The earliest beginnings of finance are probably to be found in the money-lending of the Middle Ages (see Usury). In the modern form, however, the origin of financial operations came with the need of large sums to supply the armies of the Hapsburgs and the Valois in the sixteenth century (see Ehrenburg, "Zeitalter der Fugger"). Jews had nothing to do with this except in so far as the Antwerp firm of Mendes may have assisted Charles V. It was only with the gradual accumulation of capital in Jewish hands during the seventeenth and eighteenth centuries, when such capital was to a certain extent free from government interference, that any Jewish activity in finance began. The court Jews of Germany, who had acquired a certain amount of capital by the purchase of loot during the Thirty Years' war, and the Jewish frequenters of the Amsterdam bourse (of which the London exchange is only a "filial") in the eighteenth century, were the earliest examples of Jewish financiers.

When Napoleon captured Holland, the financial center of the Anti-Napoleonic league was transferred to Frankfort-on-the-Main, where the house of Rothschild obtained its prominent position in the financial world.

With the peace of 1815 came the beginnings of international finance, in which industrial operations in one country were assisted by loans from financiers of other countries. The Jews, through their international position, were the first to combine into syndicates for such purposes, and the earlier stages of national loans and the larger industrial operations —especially those relating to railways—were largely financed by means of Jewish capital. Even in cases where, as in England and the United States, there were large bodies of capitalists ready to advance money, the actual operation was often conducted by means of Jewish firms. The practise initiated by the Rothschilds of having several brothers of a firm establish branches in the different financial centers was followed by other Jewish financiers, like the Bischoffsheims, Pereires, Seligmans, Lazards, and others, and these financiers by their integrity and financial skill obtained credit not alone with their Jewish confrères, but with the banking fraternity in general. By this means Jewish financiers obtained an increasing share of international finance during the middle and last quarter of the nineteenth century. The head of the whole group was the Rothschild family, for whose operations see Rothschild. Of more recent years non-Jewish financiers have learned the same cosmopolitan method, and, on the whole, the control is now rather less than more in Jewish hands than formerly. For further details see the respective countries and BANKING.

There is no evidence that Jewish financiers of one country, or of all countries, are in any sense combined to form one fund for financial operations. On the contrary, Jewish firms compete very keenly with one another, and the more ambitious among the smaller firms are always combining to divert business from the larger and older institutions. Still, the existence of branches of various firms in different countries often enables them to obtain the assistance of foreign Jewish capital in any large operations to this extent.

Special Activity.

As regards the special directions in which Jewish finance has been directed, during the first half of the nineteenth century state and municipal loans in Europe were largely in Jewish hands. The Sterns and Goldsmids, for example, financed Portugal almost exclusively. In railways, however, Jewish activity was not so prominent, though Baron de Hirsch in Turkey, the Rothschilds in France, Strousberg in Rumania, Poliakoff and Speyer & Co. in Russia, and more recently Kuhn, Loeb & Co. in the United States, have been important factors in railway financing. Jewish financial interests have rarely been connected with industrials, except as regards some of the precious stones and metals, the Rothschilds controlling mercury, Barnato Bros. and Werner, Beit & Co. diamonds, and the firms of Lewisohn Brothers and Guggenheim Sons controlling copper, and to some extent silver. Perhaps the most important operation financed by Jewish capital in recent years has been the great dam of the Nile, the capital for which was furnished by Sir Ernest Cassel. It is, however, mainly in the direction of foreign loans that there has been any definite predominance of Jewish financiers, this being due, as before stated, to the international relations of the larger Jewish firms.

It is clear from the above account that Jewish financiers could not have had much influence on the various crises of the last thirty years, as has often been charged against them by anti-Semitic writers. Such crises have almost invariably been caused by overspeculation in industrials, in which Jewish capital has rarely been invested. It is for this reason that they appear to be rarely affected by such occurrences as the "Krach" of 1873 in Germany, or the Baring panic of 1893 in England, which was tided over mainly by the influence of the Rothschilds. Indeed, the history of Jewish finance has been remarkably free from any tendency to rash speculation. The names of Mires in France, Strousberg in Germany, and Baron Grant in England are almost the only examples of reckless speculation on a large scale among Jews, though the operations of Baron de Hirsch are stated to have been sometimes characterized by remarkable financial audacity, only justified by success. As contrasted with the general run of dealers in capital, Jews have shown themselves especially cautious, and no case is known of any large "corner" having been attempted by Jewish financiers.

The Stock Exchange.

Here it is only necessary to refer to one particular organization with which Jewish financiers have been especially connected. The stock exchange finds its function in modern capitalism in "making a market" for all kinds of securities. Here, undoubtedly, Jews have taken a prominent part, though at first sight their numbers do not seem to be exceptionally large. In the London Stock Exchange they were only 5 per cent in 1885 (Jacobs, "Studies in Jewish Statistics," p. 38), and in that of New York the Jews appear to have only 128 out of the 1,150 members—a little more than 10 per cent: whereas Jews form at least 20 per cent. of the whole population of New York, and much more than that percentage of the business section. But on closer examination it is found that the majority of these are concentrated in the foreign market; and here undoubtedly the Jews fill a particular function, that is, in accommodating prices in international finance. It has been stated that nearly 60 per cent of the members of the foreign market at Frankfort, and nearly as many at Berlin, are of Jewish origin. The Prussian law against options was declared to be influenced by anti-Semitic desire to undermine the preponderating influence of Jews on these markets; but as their activity was mainly connected with the Foreign Exchange or Arbitrage Market, the law was ineffective, and is about to be repealed. The activity of Jews in this latter direction is intimately connected with their work as foreign exchange-brokers, the movement of the precious metals throughout the world being largely directed by Jewish hands, and the rate of exchange between one country and another being largely determined by them. It is only in this direction that there can be any mention made of Jewish finance as such.

The chief Jewish firms of financial importance, besides the Rothschilds, are those of Camondo, Fould, Pereire, and Bischoffsheim in Paris; Montague, Sassoon, and Stern in London; Bleichröder, Warschauer, and Mendelssohn in Berlin; Günzburg in Russia; and Kuhn, Loeb & Co., Seligman, and Lazard in the United States. The members of some of these firms have terminated their connection with the Jewish faith, but still maintain connections with their Jewish relations. It is characteristic of these and of most Jewish financial firms that they do not lose their identity in joint-stock companies, but retain personal control of the business. Besides these, there are many other banking firms which have no specific family heads but are mainly controlled by Jews and run by Jewish capital, as, for instance, the Dresdner Bank, the Handels Gesellschaft, and National Union Bank of Berlin, and the Crédit Mobilier of Paris.

J.

FINCKENSTEIN, RAPHAEL: German physician and poet; born at Breslau Nov. 10, 1828; died there July 31, 1874. He was educated at the gymnasium and the university of his native town, receiving the degree of doctor of medicine in 1850. The same year he established himself as a physician in Breslau, and in 1854 became at the university privat-docent in the history and geography of medicine and in epidemiology.

He contributed to the medical journals many essays on his specialty, and is the author of several works, among which may be mentioned "De Furoribus Epidemicis," Breslau, 1858; and "Zur Geschichte der Syphilis die Aeltesten Spanischen Nachrichten über Diese Krankheit und das Gedicht des Francesco Lopez de Villalobos vom Jahre 1498," *ib.* 1870. Finckenstein also wrote: "Dichter und Aerzte," Breslau, 1863; and "Bei Saarbrücken," 1870, a one-act play, which was very successful on the German stage.

Bibliography: Pagel, *Biog. Lex.* s.v., Vienna, 1901.

s. F. T. H.

FINDER OF PROPERTY: In law he who finds and takes up lost goods acquires thereby a special ownership as first occupant against all the world excepting the true owner. The duty, however, to seek out the true owner and to restore the lost things to him is imposed on the Israelite, first as to lost cattle or beasts of burden, and then in more general terms as follows: "and thus shalt thou do to his garment: and thus shalt thou do to all the lost property of thy brother which is lost from him and thou mayest find, thou canst not withdraw thyself" (Deut. xxii. 1–3, Hebr.).

Thus the law of things lost and found falls into two parts: (1) respecting the person who is the true finder and gains the qualified ownership; (2) defining his duties to the owner. The latter part is more a question of morals and of conscience than of right to be determined by the courts. This is aside from the question arising in regard to lost and found documents.

1. The first part of the law has been developed by the rabbinical authorities without the aid of Scriptural texts. The qualified ownership depends in the main upon such acts of occupation as in the case of a purchase would vest title in the buyer—*i.e.*, upon the "ḳinyan" (acquisition), fully explained under Alienation and Acquisition. Inanimate things are "found" by seizing them, not by seeing them (B. M. i.), while domestic animals are "acquired" by leading or pulling them (*ib.* Mishnah, ii. 3, 4). Things may also be found by dependents: everything found by a man's minor children, his wife, or his bondmen belongs to him (*ib.* v. 5).

Lost Deeds.

2. There are special laws relating to the finding of lost writings, it being enjoined, on grounds of public policy, that certain classes shall not be returned to their owners. Foremost among these are bonds for debt. The sages, overruling the opinion of R. Meïr, say such bonds should not be returned, though they contain no lien clause; for the court might declare the absence of such a clause a mere mistake of the scrivener, and might thus enforce the bond against innocent purchasers of the debtor's land, after the amount of it had been paid off and the document lost or thrown away by the debtor. In the case of a bill of divorce, a deed of manumission, a last will, a deed of gift, or an acquittance, the finder should not return the document; for it is probable that after it had been written the grantor, donor, etc., decided not to put it in force. A letter of Appraisement, however, a grant of alimony, a deed attesting a ḥaliẓah or refusal (a woman's refusal to ratify a marriage concluded for her in infancy; see Mi'un), a deed for selection of arbiters, or any other judicial writing—all these the finder should return. Writings found in a pocketbook, in a writing-case, or in a bundle of deeds should be returned; that is, when three or more are tied together (*ib.* 8; compare Gemara *ad loc.*). Deeds or bonds found among a man's own papers but which he can not account for must be left there; that is, must not be returned to the parties mentioned in the deeds or the bonds, unless they bear some indorsements or riders for his guidance (*ib.*).

The finder must, as a rule, advertise ("hakriz") for the true owner.

Finds to Be Advertised.

But some things which can hardly be identified, and which the owner has presumably "given up in despair" ("yi'esh"), the finder may keep without advertising, *e.g.*, grain, fruits, or copper coins scattered about, small sheaves on the common thrashing-ground, round cakes of figs, etc. But when articles even of this class contain anything that distinguishes them they must be advertised; for instance, if there is a piece of pottery among the figs.

Fowls tied together by their wings, found behind a hedge or behind a stone fence or on the footpaths of a field, must not be touched; for should they be removed and advertised, the owner would have no means of identifying them. Articles found covered up in a dung-heap must not be taken; for they are evidently not lost, but hidden away. Things found in a very old wall or stone-heap may be kept, for they probably belonged, if found in the Holy Land, to the ancient Canaanites, or to one of some other forgotten nation. If found in a new wall, and in the outer half of the wall's thickness, they belong to the finder; if in the inner half, to the master of the house. In the former case it is supposed that some one passing on the highway has placed them in the wall.

Things found before the counter in a store are the property of the finder, having presumably been dropped by a customer; what is found behind the counter belongs to the storekeeper; and so with a money-changer.

Garments Typical.

The Scripture text, it is explained, names specifically a garment, because it is the best type of an article that can be identified and for which an owner is apt to look; hence every found article which has these two characteristics must be advertised by the finder. Nothing can be legally found that has not first been lost. A cow or an ass which is grazing along the highway is not lost; an ass with his gear hanging upside down or a cow grazing in the vineyards is lost; and the finder lies under the duty, enjoined by Scripture (Deut. xxii. 1–2), of returning the beast; and though it runs off even four or five times, he must still bring it back, and he must not charge more for his time than a workman out of employment would be willing to take for the time occupied in such a task. If the lost article is in a large basket or sack, and the finder is an old gentleman whose dignity would suffer by carrying it along the street or road, he is excused from carrying it himself to the owner; but he should notify him of his find.

As regards the use of anything found, a beast that "works and eats" should be set to working and eating while it waits for the true owner; one that eats and does not work should be sold, and the proceeds laid away. The rules in detail as to the time and mode of keeping sundry kinds of animals can not be here discussed. Where money is raised by the sale of lost and found things, the finder may use the money, but in any event he is responsible for its loss; but when money itself is lost and found he should keep it unused; and he is not responsible as a hired keeper would be, except for negligence. Such is also the liability for goods still unclaimed. He who finds books should read from them once in thirty days; if he can not read, he should turn them over at such intervals; but he should not use them for study, nor let another man read with him. He who finds coverings (*e.g.*, bedspreads) should shake and spread them out once in thirty days—not by way of display on his own behalf, but for better preservation. Silver and copper vessels the finder may put to use, but not so as to wear or injure them. Vessels of gold and glass he should not touch at all.

Mode of Advertisement.

According to the Mishnah (*ib.* ii. 6), under the prevailing opinion of R. Judah, the advertisement —of course, by word of mouth—is to be continued for the three festivals (Passover, Weeks, Booths) next following, and for seven days thereafter. During the days of the Temple this was done with a view to the possibility of the owner being absent on a pilgrimage to Jerusalem; but by an "institution" made by the sages after the Temple's fall, announcement was to be made for a shorter time in the synagogues and houses of study. At times when men of violence (אנסים) claimed all things lost and found as perquisites of the crown, the finder would be justified in doing no more than telling the fact to all his neighbors and acquaintances (see Bertinoro on the Mishnah, *l.c.*; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 267, 3).

The announcement is made in very general terms, such as: "Who has lost coins [or garments, or a domestic animal], let him come and describe the marks of identification." These marks should be very clear, or the property should not be given up; and if the applicant is known as a cheat, it should not be delivered to him unless he brings witnesses. In latter days, when cheats became numerous, the courts adopted the rule of calling on the applicant for witnesses as to his good character; otherwise, besides describing identifying marks, he would have to prove his ownership by witnesses. Between an applicant who describes the identifying marks on a found article and one who proves his ownership by witnesses, the latter prevails.

The active duty of the finder to take care of lost goods and to return them to the owner ("of thy brother," Deut. xxii. 3), imposed by the words of Scripture, applies only when the owner is an Israelite; in fact, no aid is to be given to an idolater by such service. However, if the finder treats a Gentile fairly ("to sanctify the Name") by impressing the outside world with the honesty of Israel, he deserves praise. An Israelite who denies his faith or defies the Law is not entitled to the finder's active care and work in returning lost property.

For the sake of peace, where a Gentile leaves his implements at night in the open air, Israelites ought to take them under cover to save them from thieves (Yer. Giṭ. v.). If the Gentile or infidel learns of the whereabouts of his goods, his title is not affected by his status.
